people are seeking and Sahaja Yoga is manifesting on a mass scale. This is such a fortunate thing, that you are seekers of ages, gathered here and that, Sahaja Yoga has come to you as a blessing of the Divine, because Divine Itself is anxious to manifesting. But people who come to Me, are of different levels.

Some are mediocres, some are absolutely base.

Those who are absolutely base will say, “Mother, what about my job? I have applied for it, now maybe something little better." Or some people can say, “Mother I am not sick... well, this, that." All right, that also can be done.

But, those who are of a very high quality, whatever may be their problems, whatever they have done so-called sins, is all forgiven completely, believe Me. Not to feel guilty at all. In Sahaja Yoga, the first mantra one has to say, `Mother I am not guilty,' three times, at least.

So one has to understand that you are ready for it, you are glorified for it and you have to get it. You don't have to say, `What have I done, I have had so many mistakes on my account.' Nothing of the kind. I am here like a banker, I have to cash your cheques and you will get it, no doubt. You don't know how much money you have in the bank, do you? I know it, so you don't judge yourself. You leave it to Me to judge. It's My judgment. And then when it happens, if you have pure intelligence you will understand this is what it is and you have to settle down with it. Of course you can't pay for it, I mean it's all absurd ideas: “We can pay for it. How long we have to sit? There should be an organization." We have no organization, you know it very well. We cannot organize

God, we cannot organize these things. We don't even have membership, nothing of the kind. Of course we keep your list, because if we have any programs, we inform you, that's a different thing.

Moreover, in Sahaja Yoga, everybody is not exposed to the complete thing, is not exposed. First, they are given Realisation, then they are weighed, how far they are. Then gradually when they grow up, they receive higher truths. Because sometimes they can be shocked, it's not easy to bear the truth, sometimes it's very difficult. Like, I told them once, that, there is no difference between what Christ has taught and what Kṛiṣhṇa has said. On the contrary, Kṛiṣhṇa said that you cannot be destroyed, the Spirit cannot be destroyed, by anything and that was proved by Christ. And all the Hindus were about to kill Me, they couldn't bear it.

But if I say something about Kṛiṣhṇa, all the Christians will be there to criticise Me, so, it's a big problem. You see if you talk to them about Kṛiṣhṇa, the Christians don't like it; if you talk about Christ, the Hindus don't like it; if you talk about Sikhism, the Islam... the Muslims do not like it; and if you talk about Mohammed Sāb, the Sikhs don't like it. I am not here to please anyone. I am here to tell you the truth about them, that they are all one and like fools and stupid people, you are fighting each other. There is no difference between them, they are all one, absolutely one. Such a concord and such a understanding exists between them that you cannot separate them, they are so one with each other, as the moonlight is with moon, or sunlight is with sun. It's only our ignorance makes that kind of allegation against them and this you

will realise in Sahaja Yoga itself. It will be proved by the ascendance of your awareness.

Through your Kuṇḍalinī, it will be proved that whatever I am saying will be proved scientifically, because the Kuṇḍalinī when She rises and it stops, you have to get over your mythical ideas, otherwise it won't rise. You, yourself will learn gradually that what I am saying is the truth. Whatever I am saying about Mohammed Sāb is the truth and you will learn it. We have had enough of fights, we have had enough of nonsense... see now what's happening is this... Israelis are killing the P.L.O.'s and all this. Do you think by killing them, they are going to achieve God? These false ideas, all have to go. We have to become universal beings. Become. You become that.

Whether somebody is a Muslim or a Hindu or a Christian or anything. When you become universal being, you can feel the person where he is, on your fingers. Christ [Śhrī Mohammed] has said, “Your hands will speak, your hands will speak." We don't have to challenge any scriptures... we have to see the inner light, in all what is described, which is making us separated is actually the uniting factor. The diversity has such a beautiful unity within us. But that only can be seen by the raising of the Kuṇḍalinī, there's no way out. Because when the Kuṇḍalinī rises, the integration takes place and you start seeing it as an actual experience.

I hope, you have understood what I have said. But arguments are not going to give you Realisation, it has to happen. It doesn't matter, you may be the crown prince, or you may be the king, or you may be anything, makes no difference. It's your individual happening that has to

take place. This is your individual Mother within you. This is the Rūh, I am talking about. Just by ritualism you cannot achieve God, you have to be connected with God. For all the people of the world, who understand and who think it is important, to know that there must be a truth, which we can actualise. It has been promised in all the religions and scriptures and it has to happen.

May God bless you all.

I would like to have some questions from you, if possible. I'll try to answer them. And please ask Me some questions, would be a good idea. Again, I say I am sorry for coming late but, you understand the way you had jammed the traffic. Yes, please? Question: Could you compare Your Yoga with Haṭha Yoga and Rāja Yoga?

Shri Mataji: Oh! I'll tell you about that. It's a very good question. It's about Haṭha Yoga and Rāja Yoga. Now, the modern Haṭha Yoga is something, I just don't understand. But Patanjali Shāstra, the one who has written `Ha Tha', that is `Ha' and `Tha' is nothing, but you have these two Nāḍīs which these must have described to you. And, there are ashtangas, means there are eight aspects of Haṭha Yoga, according to Patanjali who has written it. The most important and the primordial and the first one, is, Īshwara Pranidhana, means the establishment of God within you. Now in these acrobatic things that we do, we have no idea of God, we never talk of it, forget, forget about God, only you have to thin down, that's all. Because they all want to be actors and actresses you see. They don't want to be yogis. It's a different style of things. It was Īshwara Pranidhana, first you must get your Realisation. Out of these eight, one is Yama Niyama. In

the Niyama, there is only one for physical exercises, that too, depending on where the Kuṇḍalinī is. We also use Haṭha Yoga in a way. Supposing Kuṇḍalinī is stopping at a point at a certain center due to physical problem, we do a little asanas which are necessary, or some exercise, to do it. But that's a very different thing. Modern Haṭha Yoga is like this: that supposing I have to come from London to Birmingham, all right? I don't start My car, nothing, but I turn it to the left and the right, standing there, static, you see and I think I have reached Birmingham. Only I have the map, I'll go right, left, this thing. Or even worse than that I would give an analogy, it is like taking all the medicines together without knowing what disease you have got. It's very indiscriminate. None of these teachers have realisation, how will they understand the importance of Haṭha Yoga I don't understand. In India, a Guru is the person who is a realised Soul. He could be a Muslim, he could be Hindu, he could be anyone, but he has to be a realised Soul to begin with. Brahmin is a realised Soul. Now these days, these days the Brahmins can be kept as cooks.

So the whole concept is so superficial, today's Haṭha Yoga.

Then Rāja Yoga, is... Now, so you understand Haṭha Yoga is a thing. The beginning of Haṭha Yoga starts with Sahaja Yoga, where it is established, but Haṭha Yoga is a subsidiary thing. Wherever we need, we can use it. Wherever we need, the part of it, we use it.

The second part is the Rāja Yoga. Rāja Yoga is another misconception people have got. That when the Kuṇḍalinī rises you see, you must see this is a tremendous

happening that takes place is the Kuṇḍalinī rising from that, upwards. It's not the work of gravity, it's moving upwards.

So to happen this, there must be some happenings taking place. For example, when it rises, suddenly, you see, when it crosses the second center, it goes into a kind of a kind of an augmentation there, so the Kuṇḍalinī doesn't fall off. That is called as bandhas. These bandhas, you see the augmentation we can say, the closing of it. Then it goes higher, it starts closing these. It comes to the Viśhuddhi Chakra, there the all energy has to be brought into play.

So there's a *[UNCLEAR* khechari] happens, that the tongue little bit put here. But you won't feel anything, it's so fast. It's so quick you won't feel it. I mean I cannot give any other analogy like that, that even if you say, `Concorde,' I mean you do feel something about it, but supposing if you have a plane that you just board in [snaps Her fingers] and you are there. It's a split of a second the Kuṇḍalinī [snaps Her fingers again] can just shoot off.

So you don't feel any of these things, like, the whole earth is so big, but you don't see that it's round. The circumference, in relation to thing that you see, is so small, that you don't see it's round. In the same way, the Sahaja Yoga is such a quick method of Kuṇḍalinī rising, I mean there's no other method. But today's Sahaja Yoga I should say, so fast that you don't feel anything, but happens. Your eyes also get dilated. But I have seen these mad people called Rāja Yogis, they even put atropine in their eyes to dilate their pupils, because is said your eyes must be dilated. They cut out their

tongues, push it back. You see there was one in America used to cut out the tongue of the people, used to wag their tongues, even there are now today people affected by this great Guru whose tongues are still wagging like this and they used to put back their tongues. Do you mean to say by doing all these tricks you are going to raise the Kuṇḍalinī? Some hold their thing, there's nothing to be done, it is spontaneous. It is effortless. It is in the loving care of God. Why do you want to break your necks for nothing at all? What is the need? I first used to think, like children, you see, when they want to impress their Mother for something, they do these Tantrums you see, just to attract the attention of the Mother. But now I think they are very serious about it. It's most surprising.

You're going to that extent you see, it spoils your Chakras. It spoils your position... in Sahaja Yoga, as a good Sahaja Yogi and a bad Sahaja Yogi. A Sahaja Yogi who gets it quick, stationed himself there and mastered it, is a person who goes very fast and a person who has ruined his Chakras requires attention, or has to take a lot of trouble to improve them, to care for.

So all these ideas can be only clarified when you get your Realisation. All right? The person who had posed the question: Yes, thank you.

Shri Mataji: May God bless you.

Question: Can Bhagavad Gītā or the eight ashtangas of Patanjali help?

Shri Mataji: What is it? Bhagavad Gītā and? Answer: *[UNCLEAR]*.

Shri Mataji: Eight? No, because unless and until you are realised, I am saying, supposing now, it is like this: before

starting your car, if you move it right and left and then start the car, will it help to come to Birmingham? It is wasteful. First of all and it might have already broken your wheels. Oh, but nothing to worry. I mean I must say, nothing to worry about it, all right? May God bless you. May God bless you.

See, I don't blame anyone, or don't feel bad. Because after all you are seekers, you know, you are seekers. How are you to know? You are all seekers. How are you to know, these people write so many books, easy to write any book, isn't it, these days, what is there? If you have money you can write anything. You can publish anything, whatever you want to write. What does it take, to write? Only I am the person who has not written anything so far. There are people writing about Me or about Sahaja Yoga, is different problem, I have not written anything so far. Christ has not written anything. Śhrī Kṛiṣhṇa never wrote anything. Rāma never wrote anything. But I'll have to write, I think. I wrote something and people said, “It goes over our head, Mother, because as soon as we read it we become thoughtless." Now what to do.

All right. What's the next question please? It's a very good question. What's the next question? Five minutes more.

Yes? Question: Could we ask a question to God when we get connected with Him?

Shri Mataji: Could we?

Sahaja Yogi: Can you ask a question of God when you get connected.

Question: Could you ask questions to God when you are connected with Him?

Shri Mataji: Yes. Of course! Of course! Now I say, because you are connected.

So you put your hands towards God and say, `Is there God?' If you ask such a question, tremendous vibrations will flow.

You, not only that, but you want to ask, say, about your own father how is he? Supposing he is not here.

You will get a burning somewhere here. These are his centers. Immediately you will know which center is catching and if you know the decoding, immediately you will know what's the problem he has got. You will know about everyone like that, not only about God, about yourself and about others. That is what it is, the becoming of the Collective Consciousness... that, you become a universal being.

Question: And will we be able to see the God as I am able to see You.

Shri Mataji: It's not seeing The God, it's not the point today. Because seeing is in any case is not being. You see My difference? Now you are... what's your name please? Answer from the person who put the question: Bippin.

Shri Mataji: Bippin. Now you are Mister Bippin. Can you see yourself, Mister Bippin? Now when you have become Mister Bippin, you can't see. When you become part and parcel of God you can't see anything. But you can act. Seeing is being separated.

Question: So you mean to say we become one with the God.

Shri Mataji: Yes, that's the point. You become one with the God, with the Primordial Being. You become, you become His power, or you become His instrument. You see once you don't go into dogmas, because you see on that there might be a quarrel already existing whether you become His instrument or He becomes your instrument, all that you see, so I don't want to fall into that trap, but what I would say that, you start feeling the power. Let's put it down, you become the Spirit. That's why you know, Buddha never talked of God. He said, “Better not talk of God” because then, other questions will start.

Better tell them you become your Spirit, finished. First let them become Spirit, then we'll talk further.

Any other question please? Question: And do you see spirits, you see spirits?

Shri Mataji: What is it? Spirits? Now why do you want to see? They exist, no doubt, but we have nothing to do with them. They are past, they are finished, they are gone, what are we to bother about them? Of course I mean they are there, what to do. They are very troublesome people. We have had lots of problems from them. All these Gurus are using them, it's all done. It's there.

Question: Are there what do you call...

Shri Mataji: Good spirits? No! No! We should have nothing to do with them because now, you are a person, who lives in the present. Good or bad, we have nothing to do with them. How do you know who's good, who's bad? Once you allow a good man to come in, a bad man may walk in, how will you know.

So better have none of them coming to you. Better be alone about those. Gradually you'll know about all of them and you'll be amazed how you know, to keep away from these people.

Question: What is Kuṇḍalinī? Shri Mataji [directed at Sahaja Yogis]: They didn't tell you? What with? You didn't tell? Sahaja Yogi [responds]: We mentioned it, we explained it, but You tell *[UNCLEAR]*.

Shri Mataji: What say? Question: Is it some sort of energy or...?

Shri Mataji: Yes it is, it is energy. It is the energy of our desire, which is not yet manifested. And which is that desire, which is not yet manifested within us? It is the desire to become the Divine. Once this energy is manifested, that's why it is called as residual, then this desire is manifested.

Question: Shri Mataji, You have to create and imagining this energy and be... *[UNCLEAR]*.

Sahaja Yogi: You have to create and imagine this energy?

Shri Mataji: No, no, no, no! It exists, it's there. Nothing is imaginary, nothing is to be done by you.

It's all there just like a primule in a seed, it exists there. You don't have to, there's nothing you know, imaginary things, nothing. It's really there, you can see the pulsation. You can see it pulsating. You can see it rising. You can feel the pulsation on top of your head. You can see the breaking of this, you can see the Cool Breeze coming out of your head, the real baptism taking place. It's all there. It's all there.

It's no imagination needed at all. It's not thinking, by thinking, you don't do it. If you think say about a seed, that I imagine now this seed will sprout, will it sprout? No, it has to sprout. In the same way, it has to happen. It's a living process.

Question: When we realise we have the desire for Self-realisation, *[UNCLEAR]*, if we have acquired faith and trust, will it gradually come to us?

Shri Mataji: What? Question: If we have the desire and we don't recognize it, will it gradually come to us, anyway?

Shri Mataji: Yah, good. But that desire is only manifested by Kuṇḍalinī awakening. That desire is there, of course, in the unconscious it is there... gradually, it becomes a very conscious desire... then you seek it, you run for it, but it is only manifested when the Kuṇḍalinī rises and breaks your fontanelle bone area, that's it.

Question: But, how does one actually stimulates...

Shri Mataji: What stimulates?

Sahaja Yogi: How does one stimulate this energy?

Shri Mataji: It... it just gets stimulated. It is there, I think something special about Me. And then, you become the same special being. You can do it, too. Its question as I told you, a light enlightens another light, all right? In the same way.

Question: *[UNCLEAR]*.

Sahaja Yogi: You spoke of... he says, You spoke of Haṭha Yoga as being physical Yoga, Rāja Yoga as being mental Yoga. Could You talk about the process of this Yoga?

Shri Mataji: Ah. No, no, I am not saying that is physical, we are using it for a physical purpose. It is not physical,

nor it is mental, this Rāja Yoga is, all these things are the part and parcel in this Sahaja Yoga which is a spontaneous happening. In this, this Kuṇḍalinī which is the residual force within us, the desire force within us, unwinds itself, and, few threads of this start rising as pulsation, you can see it also, the rising. She moves up, gradually enlightening these centers and opens up the last center, the seventh center here, by which, the Spirit, which is actually seated in your heart, gets enlightened, because the seat of the Spirit is on top of your head. All right? No questions? All right.

So now I think we should have it. What do you say? Better have it. All right.

Just put your hands like this. Is very simple because hands have to speak.

So these fingers, the tips of fingers, are sensitive sensory organs of the sympathetic nervous system. If you put your hands like this, towards Me, just like this and your feet on the ground, touching the ground fully, put both the feet separate not close together, not too far away and sit most comfortably. Now close your eyes.

Now put your right hand on your heart, right hand on your heart and ask the question: Mother am I the Spirit? Close your eyes. Close your eyes. You must keep your eyes shut. Just ask the question: Mother am I the Spirit? Some of you might start feeling a Cool Breeze coming into your hand, with this question alone, ask it sincerely. That means your attention is now on your physical, mental, emotional being, but suddenly the Spirit comes into play.

First of all you have to know that you are not guilty and please don't have guilt in your mind at all.

On the contrary you should say, `Mother I am not guilty. Mother I am not guilty. Mother I am not guilty.' In no way you are guilty of anything. They might have told you, you have committed sins, this, forget it, forget all that. Is a very common practice to degrade human beings. Those who tell must be guilty themselves. Don't believe anyone. Now put your right hand across the neck on the left hand side and say that `Mother I am not guilty.' Now put the same hand on the forehead across and say, `Mother I forgive everyone.' Say it again and again, just say, `I forgive everyone.' It's a big pressure of not forgiving.

***Contents: 1982-07-10*, Public Program, Day 1, From Mūlādhāra to Void or We Have to Know Something More, Derby, UK**

I thank all the Sahaja Yogis from Derbyshire and Birmingham for giving Me this opportunity to talk to the seekers of this place. We have seekers in the modern times, is something very unique. We never had seekers before, at least not so many.

There used to be people who would seek money, as there are many who are seeking these days, who would seek countries after countries, the power. There were many who were seeking these few pearls of bliss of God, very few. The reason was the awareness, the collective awareness of human beings did not think themselves perhaps capable or perhaps needing some seeking.

But today it's such a beautiful combination that there are seekers of very high quality born on this earth. Those who are seeking are en masses. They are not one or two here and there sitting on top of a mountain, cave or something and trying to meditate, but there are so many who are seeking, who feel dissatisfied with themselves, with whatever they have.

They think there must be something beyond. Those who feel that they have not yet found their meaning, those who feel they have to find the purpose of their life, those who feel that there has to be something higher than what they are into. All such people are seekers, not of today but of thousands of years.

At the time of Christ there were none, I should say, because even the ones Christ took as His disciples, they were actually forced into it; and He had to go and seek them and find them out and tell them about it.

So, we have to say that these are very important times in the history of creation where there are so many seekers, but the problem with the seekers today is this that they don't know what they are seeking. They have no idea as to what to seek. How to seek? What to expect? It's an unknown area they are entering into. It's very unknown to them. And, this unknown area which they are seeking is now represented by so many people. Everyone says, “I'm the one who will deliver the goods." Another one says, “I'm the one who can do it." Naturally, confusion is created. As it is, modern times are the times of confusion. Great confusion.

And when there is such a confusion comes in, then only we find out a great solution also, a permanent solution to solve the problem once for all.

There has been never such confusion in the minds of human beings as it is today as to the right or wrong. Never so much. Whatever was said, “This was not good” they would do, knowingly that they are doing wrong. If they were good people, they would say, “All right, this is good, we'll do the good." But everybody knew that this was wrong or right. They may do it. But today no one knows what is wrong and what is right.

Apart from wrong and right, it's much beyond that, you have to know yourself. Because this awareness is within us that we do not know ourselves, we do not know the absolute.

We live in a relative world of things, everybody seems to be conscious. May be in the subconscious or may be in the unconscious, but definitely there's a feeling in every one of us that “We do not know." And, it's a very honest feeling. It's a very sublime feeling that “We have to know something more." Now when we say the word `know', we think as if I would say, “I don't know about Derbyshire” I have never been there.

Now, this means what? I don't know about Derbyshire. Don't I know about Derbyshire? I can read it in the books, I can find out. I can know all the history of Derbyshire. I can find out who were the people who were making beautiful porcelain here. I can find out all about their history. Everything I can read about it.

Still, why should I say I don't know anything about Derbyshire? Because I have not been to Derbyshire

before. I have not been to Derby, I have not been to this area, I have not seen this place, I have not visited it, I have had no experience of this place so I don't know about it. This is exactly what is the situation.

The situation is that we do not know about the Divine. We have read about it. We have heard about it.

So many people have written about it. Once they know there is an enquiry about it, they come out with books, books after books, thousands of books they have written. How many of them are true and how many of them are untrue? It is impossible to find out because we do not actually know. Supposing somebody says that Duke of Bedford was born in Derbyshire. All right, how will I know? I would not know till I meet somebody who is really belonging to that place, who knows about it. In the same way, the knowledge that we have also about Divine is very confusing. But this is not knowledge. This is never the knowledge.

The idea of knowledge comes to us as if it is a kind of an answer to our enquiries which is rational, which we can understand intelligently through our intelligence. But now this area is beyond intelligence, beyond rationality, beyond all that is limited is the unlimited area. All such unlimited areas can be only known by experience of your awareness.

Now this one should understand is a very delicate thing: how to know something, an experience of our awareness.

Not an experience, we suddenly see a light and so it's an experience. I mean, you can always see a light.

It's so great. People feel about it that they have seen some light suddenly sparkling before them.

Nothing so great.

There could be some area from there the sparkling can come and may be it is of no use to you, but just you might feel that you have experienced.

So, one must know that seeing is not experiencing. For example, a dog sees this instrument but what does he know about it? He sees it.

Awareness, the human awareness, has so many great things about itself compared to the animal awareness.

For example, we can say the awareness of beauty animals don't have, awareness of cleanliness animals don't have. Human beings have these built within themselves, they can feel it. They can feel it on their central nervous system.

So, whatever is your awareness is to be felt on your central nervous system.

It's not just an imaginary thing or a intellectual discussion. `Yes, yes, I know, I know.' Not that! The knowledge should come to you through your feelings, like I can feel this is hot or cold, but a stone will not feel anything. In the same way, the feeling has to come through your central nervous system. That means your awareness itself has to be charged. It has to get a new dimension.

Your awareness itself has to get a new dimension. All other experiences has no meaning whatsoever in evolution, if you see. In the evolutionary process, it is the awareness that improves, receives better and better dimensions. And these dimensions have reached its maximum at the time when you become a human being,

where your awareness is just ready to receive the awareness of the Universal Being, of the Collective Being so that you become the collective being.

Now, I would like to tell you about this within ourselves how we are placed. For every practical purposes you should not take Me for granted. But you should not also deny what I tell you. It's like entering into a new university. We listen to the professor and we try to follow him. Supposing he propounds a hypothesis before you, then you just start judging it. Work it out. If it is true, then you call it a law. In the same way, we should enter into this new understanding by first seeing it, not denying it. Then if it is true, then we have to believe it. There should be no blind faith about Sahaja Yoga. Blind faith does not help at all.

Neither there should be a denial.

And with that cheerful attitude, if you just listen to Me as a hypothesis whatever I'm telling you. You need not accept it as to just now. But then the time has come for Me to prove the truth to you. And, the truth can be proved to you. Time has come to prove the existence of God. To prove, not prove that I give you a big lecture or take you to court, or some sort of a thing like that, but how am I going to prove it on your awareness. It is going to be absolute experience of your awareness that you are going to feel God Almighty. Time has come to prove the scriptures, all the scriptures. The time has come to prove your own connection with God, your own relationship with Him, your own relationship with that Primordial Being whether you call it God or anything, it makes no difference to God Himself. Whether you call Him by any

name, there is God and that God is not the way you conceive God. Is not the way you understand God or you know God, but is the God as He is.

Unless and until you yourself feel Him, you are not going to believe in Him. Even if you believe under certain circumstances, it's a belief that is blind. It has no meaning for any intelligent person and a day will come that such a person is going to denounce that kind of a blind faith.

So now within ourselves, as I said, is a built-in system which has come to us through our ascent in our awareness at different stages which is like a history written within ourselves, how we become human beings. Into different stages we were divided. First of all the stage of the carbon where we became a life, the dead became the life. That is placed at that point.

It is below that great power within us which lies in the triangular bone which we call as Kuṇḍalinī.

This power is the power also described in the Bible as the Tree of Life: “I'll appear before you like tongues of flames." But Bible being a very microscopic thing, it cannot be explained, the symbolism of that. Unless and until you get your new awareness, or the vibratory awareness, it cannot be explained.

Now, this power is the power of desire, of the ultimate desire, the only desire, the real desire that we have within ourselves. All other desires become useless. See in the affluent countries now. People have achieved affluence. They are rich, well-to-do, but they are not happy. People who are extremely affluent like in Sweden and in Switzerland they are competing among

themselves: how many youths are going to commit suicide? Recently, I learnt that Swiss people are better off. Many more Swiss people are committing suicide than the people who were young people in Sweden.

This is the state where we should realise that affluence, if it was our desire, is not the real desire, because when we got the affluence we should have been very happy and joyous people, but we are not.

And the basics of economics is that wants in particular may be satiable, but in general they are never satiable. Means, matter cannot satisfy your wants.

So, what is the want? What is the seeking one has is hidden in this power and that is the seeking to become one with God, the Yoga, the union with God.

What we call the baptism.

In the Koran, it's called as the Pīr. You have to become the Pīr, the twice born. It is described in various languages, but the same thing that they have described. Is the same in every scripture, if you try to follow what it means you'll be amazed that they all said the same things. Now somebody might say, “There might be some other methods, Mother. It can be something else that can work it out." There is no other method because this has been worked out for thousands and thousands of years within yourselves since you became carbon. And it's all arranged within you by nature. Like somebody can say that a seed has to sprout by some other method. There is no other method for a seed. The seed has got a primule and the primule has to be awakened, is the only way it works out. In the same way, it is going to work out in all of you. This power is to be shaken within you. It is to be

awakened within you. If it is awakened within you, it rises. But what is this power? This power is to become one with the Spirit.

So, this power knows that it has to become one with the Divine.

Now, we have so many other desires.

So, we should say, “How is it related to that?" It's like this, that we have to say, “Come to Derbyshire and meet you all people." Now we come all the way, we come up to Guild Hall, come up here and don't meet you. Then all My coming, all My travelling is useless because I've not met you. It has no meaning whatsoever. In the same way, all other desires are just to accomplish this desire, the ultimate desire, the desire to become one with the Divine.

Lots of things can be said about Kuṇḍalinī. I must have spoken hundreds of times about Kuṇḍalinī and to know more about it you will have to get to Sahaja Yoga and know more about it. But just now I have told you in brief what is this Kuṇḍalinī and how it is placed there.

Now the, above that is the second, actually the second one we treat as the third one it looks here, is the power of, I would say, this is the center of our seeking.

This center is called as the Nābhī Chakra which gives us our seeking. When we are in the state of animal, then we seek food through our stomach and you will be amazed then when we become human being, also we seek our money through our stomach. We may get little diverted here and there, but ultimately we even seek our God through our stomach.

Surrounding this stomach is the area where one has to cross and this area is actually the area of the Masters. All the Primordial Masters were born in this area like Moses, Socrates. There are main basic ten Primordial Beings Who came on this earth, Who came to give us an idea as to our seeking, what we have to do. Basically, They came here to teach us how to balance ourselves, how to balance so we can ascend.

Now all these great Prophets or Primordial Beings, we should say, They were the ones who were the Masters. They came to inform us that if you cross too much onto the left side or too much on the right side, then you will be falling in your sustenance, in your quality as a human being. As a human being, you have to have a sustenance and this is the center that gradually unfolds the sustenance from animal to higher animals and to human stage, where a person starts realizing that these sustenances exist within us. That's how all our laws have come. The Ten Commandments of the Bible are the ten sustenances that are within us. These are the ten Gurus who came on this earth to save human beings from getting out of the middle path, going more to the left and more to the right.

Now the left side, as you see here, is the side which is the emotional side within us, is also the power of desire. It's the emotional side which gives us our subconscious and beyond that is our collective subconscious. On the right hand side, we have another power of action, that our desire we try to put in the action and this power of action gives us our future and sustains our physical and mental activities.

As a result of that, we develop an institution in our head called ego. Everyone has it. There's nothing to be frightened of. When we do something we feel we have done it and that is a myth, but still we carry on with the myth because we have not yet seen the reality.

The another one is a left side power within us by which we receive the aggression of others, by which we have our past.

Gives us an institution as a by-product of our activity, emotional activity, an institution, like a balloon you will see there called as superego.

These two things meet in the head just like this as you grow and calcification takes place on top of your head near the fontanelle bone area and this soft area which is pulsating in childhood becomes completely covered.

Thus you develop your `I'-ness. You become Mister X, Y, Z and all that. You develop your own freedom. This is the freedom that you have achieved to be Mister X, Mister Y, Mister Z.

After achieving this, you start using the second center, which is the center of your creativity, the center of your action. Animals do not have any ego. Of course, if they live with human beings they may develop.

But otherwise they have no ego at all. And, if you do something wrong you feel hurt, you feel guilty.

Animals never feel guilty because it is in their nature to kill another animal, it is in their nature to eat so they never feel guilty. It's only human beings who'll say, “Oh, I should not have said this. I should have not done this."

This is only human quality that we feel guilty. It is only human quality that we aggress others.

So the second center comes into play by which you think and you think about the future, you plan.

Your physical...

[Aside.] And you think. For that thinking you require energy and this energy you get from the cells of fats that are in the stomach which are converted for the use of brain. And when this conversion takes place, this poor center has to work very hard. When you think, this center goes into action. It has to work very, very hard for one work only and that is to look after the supply of fat cells.

So, this center that is what we call the Swādhiṣhṭhān center is the center that gives you your future, the energy to think of your future, your planning, which gives you energy to bring forth the manifestation of the physical labor, of physical exercise, or physical work. This poor center has to work for one work: to convert the fat for the use of the brain. Now, if one center which has to do many other things starts doing only one work, all other things are neglected. As a result of that, you develop problems, because it has to cater to your liver, to your pancreas, to your kidneys, to your spleen. And, once it goes into action for one channelized work, it gets programed for it and then it cannot take care of these things. That's how you develop a bad liver, you develop a diabetes, kidney trouble, blood pressures. Also, you develop a very serious disease called blood cancer.

Now, Sahaja Yoga can cure all these troubles. It's only physical but it can cure even physical troubles because if this center is brought to its normal behaviour, if it is

made to behave in a very normal way, you can easily cure all such diseases which come out of your over-activity, overthinking, overimaginativeness.

It is a very dangerous thing to always think about the future. For example, now we are here sitting down, we should be comfortably sitting down and talking to each other. Instead of that, we are now we are thinking, “What am I going to do tomorrow or what am I going to do when I go home? How I'm going to cook? What am I going to eat or how I am going to take my train?" All these futuristic behaviours lead you to a very funny personality. You become so futuristic that you forget the past. I met a gentleman who forgot even his own name. He forgot the name of his father. He forgot the name of his mother and also, to the dismay of his wife, her name. And, she started crying. She said, “Now, what to do? He's forgotten everything. Now he is in a futuristic area. He just knows the future." Then he was to be pushed back again into the center. Then gradually he started remembering. Then he told Me that he is chairman of one of the councils of a big district place in India. And, he said, “I was." He said, “No, I am." I said, “That's good. That's better. Now you are in that state where you say I am." So this is what happens and this is what was going to happen to our societies here which is very futuristic.

So, to cut it down, one can try anything. You may try anything, for example, you may show pictures of the past and things like that, but that is not going to bring back the horse. It's running very fast. The only thing that can work it out is the awakening of the Kuṇḍalinī. When the Kuṇḍalinī awakens Itself, She makes the center

enlightened and the center itself resumes its normal shape, its normal behaviour and its normal condition. Apart from that it has got a dynamic power of manifestation that this one, this center which looks after our attention becomes enlightened and our attention becomes enlightened and the attention which is enlightened become dynamic. In the sense now, sitting down here you can pay attention to anyone, just pay attention, don't have to do anything. Just pay attention to that person and you can find out on your fingertips what's the matter with the person. Thousands of miles it may be. When Nixon was having trouble, suddenly I don't know, I said, “Find out about Nixon. How is he?" And, they said, “Ma, he is in a terrible mess." Christ has said, “Your hands will speak." That's the time has come. These hands which look so simple but they are so intricate and so intricately built that the nerve endings are so microscopic that we cannot understand how much they can tell us, how far they can go.

When the awakening takes place you start feeling the vibrations around you, the All-pervading Power which you have never felt before through these fingertips. These fingertips which we neglect, we misuse them, we use them for wrong things, these fingertips, themselves, get enlightened and you start feeling them.

That's what I said, that you have to get your awareness which is enlightened. It's the awareness which has to manifest. And, that's how you start feeling them on your fingers. This is wrong here, that's wrong there, you can see where is the problem. Now, all these are related to

your centers. These are five, six and seven. Seven on the left and seven on the right.

So, this is about your emotional side and this is about your physical and your rational, or you can say mental side.

So, you can make out a person, how he is, by just knowing whether you are getting heat from that person, whether you are getting burning from that person, whether they are getting numb, whether they are becoming heavy. And a rapport is established with the All-pervading Power which informs you, get the messages. And the messages are so correct that even if you have ten children who are realised Souls, there are many children these days are born as realised Souls. We don't understand children these days, but these days there are great children and they are born today because the time has come. This is the time of Judgment time; this is the time of Resurrection; this is the time about which people have described in all the scriptures.

So, great people are taking birth. And, these children if you tie them up and their eyes and ask them about a person who is sitting facing them, “What's the problem with this person?" They will all raise the same finger. All of them will raise the same finger even if their eyes are tied, even if their backs are towards the person, they can just push back their hands and say. They are so good, children are so good. You see, when they put their fingers in the mouth we sometimes think, I don't know, Freud whom I call a very half-baked person. He didn't know much about God and life and nothing at all. He was very... little bit he knew. He says that this has something

to want sex. It was nothing but a sex point and he wants everybody to be a sex point, not a human being.

So this fellow, whatever he may say, but the truth is that it is nothing to do with sex. It is that they feel the heat on their fingers.

They actually feel it. And, that's how they put it in the mouth. There are little, little children I've seen.

We have one here who has come from London, there's another one who is from here somewhere and she, all of these if you ask them they will immediately tell where is the catch, which Chakra is catching. Now, children you cannot befool them. They all tell you the same thing that this is what is happening.

So your awareness is enlightened and your hands which have got the sympathetic endings here tell you.

We can say that now in our central nervous system we can feel about others and about ourselves. Now, supposing you are sitting here and I ask you, “What's the problem with you?" You will say, “I don't know what's the problem with me is. I don't know." But I may be able to tell you what's the problem is. If you go and see the doctor, he'll say: “That's the problem. How do you know?" You don't have to go to any examination, for all pathological examination where all your teeth are taken out, eyes are taken out and by the time you are left they tell you, “You are the healthiest man." You don't have to go to all those horrible things. You don't have to waste any money and try all these frustrating things. Just putting your hands, you will know about yourself. And the people who are Sahaja Yogis will tell you that “This is what is wrong with you and this is how you cure." Now

the time has come, this is such a fantastic time, with Sahaja Yoga we have cured so many cancer patients, so many blood cancer patients. Recently a girl who is a Sahaja Yogini in New York has cured a blood cancer patient. This boy was about to die. They had declared that “He is going to die." This declaration they had given: “For about fifteen days” they said he may live, “and then he is going to die." I mean that's the only thing they could do. With all the things poor fellow had gone through, the boy had come from India. All the money was spent and this was the certificate he got, that he is going to die within fifteen days. Now, somehow these people contacted Me and I told them to contact a Sahaja Yogini in New York. And, they told that “Such and such boy is there, his name is Rahul, he is hardly about sixteen years of age." He had blood cancer. The boy not only got cured, he came down to London to see Me and he is back in his home.

It sounds very fantastic that how can a person who is not a doctor, who has nothing to do with Medicine, can cure. Beyond all these medicines, beyond all these things is the subtle power, the Divine power from where everything has come from. If you somehow or other become the owner of that or the person who knows how to handle it, you can cure anyone you want to. It's not that I am curing these days, My disciples are curing. I don't know how many people this Doctor Warren, who was a doctor, has cured through Sahaja Yoga which is not a medical science. How many patients he, himself, has cured he won't be able to count.

So, the whole system is going to change. Now you are going to become the master of yourself, of your powers and all these powers are going to be released from you. Now when we say that there were Gurus who could cure, there were Gurus who could stop a growth of a horrible disease and things like that, we think it's not possible. We think it's an impossible thing. How can it be? How can we believe it? It's a cock and bull story. But you, yourself, when you see manifesting it, you'll be amazed.

Once I was travelling by a ship and the captain of the ship, I gave him Realisation. And, it so happened that one of the ship's staff got into the freezer and he got choked up and he got pneumonia. Of course, I was in a position, I was travelling because My husband was the chairman of that company.

So, he would not ask Me to go down. He thought it was too much to ask Me. I said, “All right, if you don't allow Me to go down. You better go down to the spot where he is. Don't send an SOS to call a doctor, nothing.

You just go and put your hand on his chest for about five minutes." His pneumonia got cured completely and this captain could not believe it. He said, “How could it be?" I said, “It is. That has happened to you. Now you have become that, accept it." You must assume that power whatever has been given to you, as in Sanskrit language we say `virāj'.

Assume it. You see, even if you are given a throne, if you don't know how to assume the power of the throne, to believe into it, then like a beggar boy, if you put him on the throne he still sees people coming down, he puts his hand before, `Give me five rupees. Give me five rupees.'

Unless and until you assume these powers you are still uncertain, but you have got them. And this is the point which is very difficult with the Western mind specially, because they cannot believe that they can have these powers. They just can't believe it. You tell them but they say, “How can that be?" But it is so.

Now for example, this instrument. If you take it to a village and tell them that this will carry your voices around, or if you take, say, a television set and tell them that you can see all kinds of cinemas or, we can say, a drama and play or music out of this, he is not going to believe it. He will say, “This box? This looks like an ordinary wooden box." But when you plug in, it shows its powers.

In the same way, what you look at human beings as something very, very ordinary mundane thing. For us we take it for granted ourselves. We don't know how glorified we are, how great we are, how God has created us with such difficulty, with such care, with such love for a very special purpose: that He wants to bestow all His powers upon you. He wants you to enter into the Kingdom of God and to enjoy His blessings, His love. It is something that we cannot believe, we are so frustrated, we are so disgusted with ourselves, with our societies, with everything. But it's not so, it's not so. It just has to happen. You are just to be plugged in to the mains and it works and it works. It has worked. It has worked with thousands and it should work with you.

But the absurd ideas people have, which is the conception they have that you can be pay for it. How can you pay for anything that is living? Have you ever paid

anything for that is living? Like, have you paid anything for getting a fruit out of a flower? Can you pay to the flower? “All right, I'll give you one pound, give me a fruit." Will it work out? It's that absurd that you cannot pay for the living God, you cannot pay for that living experience and you cannot pay for the evolutionary process. It is spontaneous.

It is within ourselves. It works out.

But we understand money so much that we can't understand that is free, though we have got so many things free.

So many things we have got free, still we don't understand the importance of free things, because we think whatever is free cannot be great. Actually all great things have to be free, otherwise we won't exist. We won't live if we didn't get air to breathe freely, we'll not exist. If it happens sometimes in aeroplane or some place, you should see then people realise the importance of those free things which we take it for granted.

So one has to understand the conception that we have about God, about achieving Him, about getting into ourselves is also faulty. We think that “Supposing we stand on our heads, we'll get it." I mean, standing on our heads if we can get God, then in all evolutionary process they should have stood on their heads.

Or we think that by running these races we'll get it, or by eating this kind of food or that kind of food, or by doing this or that we'll get it, it is wrong. But then you may ask that “Why all these people in religion said that `Thou shall not commit this; thou shall not do that.'?" They said it because these are the things which are required for our

sustenance, for our balancing as a human being. We loose our balance if we do not do these things. We have to have the balance, that's why it was said, “Don't do it." Human beings have a capacity to go to extremes. I mean, you tell them something. I have known people. You just tell them that to cure this particular center you have to do this asana or you have to do this kind of a thing, they will do it hundred times, thousand times in one day. I mean, I never asked them.

I said just once in a while you do it, or once a week. They'll do it hundred times.

We go to extremes. And, that's why to strike the balance these people told us, “Don't do this, don't do that, don't do that." But then in our ego we say, “Why not? What's wrong?" All right, go ahead. When you tell children, “Don't smoke." “Why not? All my friends are smoking, I'll smoke." All right go ahead. Smoke, get cancer then you'll have a hole here. Breathe through that. After sometime this will go away, the nose will go away. And you'll be moving like a machine looking at everyone. You can't talk, you cannot live like a normal person. Then one realises that, `Oh God, I wish I had not smoked." But in Sahaja Yoga we don't say, “Don't smoke” because half of the people will walk off. We never say, “Don't drink” never say anything `don't.' We say, “All right you are doing it, it's all right." Let this happen.

As soon as this happens, you just give up, yourself, because when you have found the highest, then you don't care for all these small things. All your habits drop out automatically. I don't have to force you for that. You have everything within you, that power, like you get

lifted up. Like a lotus that rises out of the mire by its own force, you come up and your fragrance fills that mire and you are amazed at it yourself.

First you are identified with that mire and you think that this is what it is. It is not so. When it comes up, that lotus it spreads its beautiful petals and the fragrance gives it that personality which spreads all over. And, that's what is going to happen to you. All of you are going to be that lotus which looks hidden, which is absolutely invisible within you, which is going to open out and a fragrance of your Divinity is going to spread.

Now today I cannot cover all the centers, because if I start covering all the centers it will be a very lengthy thing. I have covered three centers as you have seen: the Mūlādhāra Chakra, the Swādhiṣhṭhāna and the Nābhī Chakra. And, others I'll cover later on tomorrow but I must talk about the Spirit, about which we are talking for ages now, that we have to become the Spirit. Now English language as you know, spirit can be anything. It's a very ambiguous word: even to alcohols we call as spirits, even to the dead souls we call them spirits and even to the Spirit that is beyond, the pure being which is called as Ātmā in Sanskrit language, we call them all Spirit. Here I'm talking about that Spirit which is the pure being within you, which is a detached being within you, which is the witness within you, which sees you all the time, which watches you, it resides within you as joy and happiness in the heart, it resides in the heart.

This Spirit is not in our conscious mind, is not in our central nervous system, is not under our control. To give it an analogy, I say that the left side within us is like the

break and the right side is like an accelerator in a car. Now, in the car we are learning driving sitting in the front seat and there is the master watching at the back and seeing the whole play.

Now what you do is to go to the left, means sometimes you put the break, sometimes you put the accelerator, make mistake and then you learn how to drive. That learning how to drive is the wisdom part of it which comes to us through balancing our life, balance is the most important thing to begin with. But even if you don't have balance, I've seen in Sahaja Yoga very imbalanced people get into the balance.

Now this balancing left and right or say of the break and the accelerator gives you a position where you can say now you have mastered the driving. But still there's the master sitting at the back. Then you become the master. The master is the Spirit within you.

You become the Spirit and you start watching yourself as a driver. The whole thing becomes like a play, like a drama. That you separate yourself and start seeing everything happening before your eyes, everything happening just like a drama outside you and you are not the part and parcel of it.

So you enter into the area of your axis and the periphery loses its impact on you. You become a person who is silent, blissful, quiet and sees the periphery, the movement of the periphery, but you are not in it.

That's how you become the master. That's how you become the prophet. But Sahaja Yoga today has the power to make prophets out of the men of God and these prophets will have power to make others prophet, so

says William Blake, the great poet of this country. And, that's what exactly what Sahaja Yoga is. He predicted it hundred years back and today, if you come to Sahaja Yoga, you'll be amazed what you are. Whatever he has predicted about England being the Jerusalem of tomorrow, that tomorrow is today. This country of yours, England, which is so far, I don't know if people understand or aware of what this country is, which is the Heart of the Universe, which is the most important part of the Universe, has to become the Jerusalem. For that, the Englishmen have to come out of their inertia to see what are their potentials, to rise up to that point and that's going to work out. It's already is working very well in London. Of course, we can't have too many people because plastics can be produced in the machines in thousands, but if you have to have something living it takes time. But once it takes time, once it comes to its maturity, I'm sure this great country is going to assume that status of becoming Jerusalem, the place of worship where people have to come to worship. It's very surprising things are happening with Sahaja Yoga, the flower daisy which never had any fragrance, if you go and see, now is having fragrance. Most of the English flowers had no fragrance, they were known by that. Most of the flowers are now having tremendous fragrance. You can see for yourself.

All these things are working by nature are worked out. They are coming, but what about human beings? Where are they, what are they doing, where are they lost? This is a very sad thing. I came to London just by chance, I should say, or may be that is pre-arranged. My husband

got elected to this job and he had to come. And, this agency of the U.N. is only placed here. It's in England. It's nowhere else.

You have only one agency of the U.N. that is in England for which My husband got elected and so I am here. Otherwise, I don't think I could have come here like a Guru, because I don't have any other interest but this.

And I could not have come here otherwise, because uninvited I would not come to a country, but I came here as an invited person. It's all working out. Only you people have to work it out yourself, because understand not only the dynamism, the vitality but the greatest importance is that at this point you are standing on the verge of destruction or construction.

And the English people have a special place. They have to rise up to it, because they are the cells of the heart. I'll have this lecture tomorrow again.

I'll hope you'll come and make it comfortable.

Sorry for My throat. I have been speaking day in and day out, everyday. Thank you very much.

If you have any questions, I would like to answer them.

Sahaja Yogi [explains the question of a seeker]: You said You could cure after Self-realisation. His problem is that his mother is deaf. Can You fix that hearing problem?

Shri Mataji: You see this question is such that it makes you feel that I am a person who have to cure everyone. You are sadly mistaken. It's a by-product of awakening of the Kuṇḍalinī you get cured. I'm sorry for that, that you have this understanding that I'm here to cure all the people. I should settle down in a hospital? But main thing

is Kuṇḍalinī has to be awakened to get you cured. All right? If your mother was here we could work it out. But the main thing you must understand, that God has lot of common sense as we have and He's only interested in such lights as we are which will work out His work. Those who are, say, very sick people, extremely sick, can get cured in a second. You'll be amazed I tell you.

Our President of India, he went to America for his treatment and they failed and he was going back to India. And, I went to see him as Mrs.

So and So. But the High Commissioner told him that I'm So and So and he had heard My name in India.

His wife said, “Why don't you cure my husband?" And, he was just on his last... they had prepared everything for his last rites in India. I just put My hand on his back for ten minutes, you won't believe.

He had not slept for days together with pain. He said, “My pain is relieved. I want to sleep." And, he got up, he was perfectly all right. He walked down, people had brought stretchers and things.

He just walked down. They couldn't believe their eyes. But this has happened because he is going to be used for the work of God.

In our house if you have lights which are never going to give light, we don't bother about them. We sell them in the junk. In the same way, the Divine doesn't cure people, all of them. It does many thousands but some of the people who are very sick, He says, “All right. You go through the second cycle. All right? Come back purified, rested and then it works out." So not necessarily that everybody will be cured, not necessarily. But so many

have got cured and it has worked. But that's not our main job is to give cures to people. No.

It is to give Realisation to people and as a by-product as you said, of course if she gets Realisation her deafness will go away. Many people have cured their deafness. Not only deafness but even bald headed people have got hair. He had no hair on his head when he came to Me.

But I don't say that after Realisation and before Realisation it's so tremendous that it's better to take photographs before Realisation and see yourself.

Sometimes after Realisation people, see, they have got their photographs before Realisation, they have thrown them away. It is different but the main thing is not curing, it's the Self-realisation, that's the main thing.

And, age has no problem. Yesterday I think in Birmingham we gave Realisation to somebody who was a very, very old man.

So age has no consideration, health has no consideration, nothing of the kind.

Everyone can get it and should try to get it. All right? So if you can get her, we'll work it out. But I don't promise anything. All right? May God bless you.

Of course, Self-realisation I promise, that I promise. If you have patience with yourself as I have with you. You have to have patience. Any other question please? Sahaja Yogi [explains the question of a seeker]: He has had chest problem for last four or five years. Is there any way You can help him?

Shri Mataji: Of course, that can be helped. Yes, chest problem like breathing trouble or what? Breathing

trouble? Is he an Indian? Asthma. Are you an Indian? Ahh, Indians you know. They take so much bath. They still think they are in India. Everyday take bath in the morning and then go out.

Isn't it? That should not be done. This is England. We should take bath in the night. We should live like English people. They are great bathers. Indians are great bathers, you see, they must have bath everyday whether it is zero degrees or minus twelve degrees. They must have bath.

You see, it's a habit formation they have got. They don't feel all right without a bath and that's how they develop, but in any case we'll cure your asthma. All right? It's not so difficult. But one should not take too much bath in England. I would suggest that if you want to take bath, take it in the night as the English people do, because it's a very treacherous climate. And if you take your bath and get out of your bath, you are definite to catch these troubles in the chest. Not only that but arthritis and all these things come out of this. This is very indiscriminating in this country. The climate is such you have to be careful.

I mean, one should not postpone bathing forever. Because, you see, when I say something I must give the other extreme also.

But we are great bathers, no doubt you see. Personal cleanliness is too much with Indians, too much.

But general cleanliness or you can say the collective cleanliness is more here, you see. Like mowing the lawn and looking after the cleanliness of the roads and all much better. I mean, we have to combine these things.

It's important. That can work out. All right? Asthma is not such a problem. What else? Sahaja Yogi [explains the question of a seeker]: In what way does it work out?

Shri Mataji: We have a center within us which is the center of Śhrī Rāma on the right hand side. We call it a right Heart. And, if we can cure that center of yours, you'll be all right. All right? We'll work it out. We'll tell you how to do it.

Sahaja Yogi [explains the question of a seeker]: How many thousands of years does the Yoga date back from, she said.

Shri Mataji: Which Yoga you mean? Yoga as being the spontaneous Yoga has been there throughout.

You see, what is spontaneous is living. And, the living process has been there throughout.

So we cannot say when it started. We can say when it got separated. When God and His power separated and God started watching the whole thing as a witness, the God Almighty and His power started working it out.

It created all the Universes, it created our Universe out of which it created now human beings. And now, it has to become one again. That creation has to know its Creator.

One, two, three, four, there have been always few people getting this connection, but today is the time for en masse evolution.

So for a growth of life you cannot give any time. You can't say when it started, how many years back it has been on. But today is the blossom time when many have to get the blessings of Yoga. All right? Thank you.

What is it? Sahaja Yogi [explains the question of a seeker]: You spoke about Kuṇḍalinī. For the ordinary person, it's very difficult to awaken.

Shri Mataji: Ah, who told you that? It's not so. You see it is these abnormal people when they talk about Kuṇḍalinī they call it abnormal because they don't know how to do it. It's the easiest thing to do. It's the easiest thing to do if you are an awakened person. Even a child can do it. It's those people who say that Kuṇḍalinī is very difficult are the people who have no idea of Kuṇḍalinī at all. They are not masters. For a master what is difficult? And even an ordinary can become a master, then what is difficult? These are not masters. These are people absolutely naive, money makers, useless people. They write books without know anything about Kuṇḍalinī.

They are the misguiding people. It's the easiest thing to do. Just under your hand it will move, you will see it moving up and you will see it pulsating on the head. It's not at all difficult. I told you it's the most vital thing that has to happen and all that is vital has to be free and easy, Sahaja.

Why in India we had Nanaka who said, “Sahaja Samādhi lāgo. Sahaja Samādhi lāgo." Nobody said it is difficult.

Kabīra never said it. He said, “Pācho pachiso pakar bulau ek hi dor bandhahu." I'll get twenty-five people together and put them onto one thread.

Those who had the authority always talked like that. Nobody said it is difficult. It's only these people who do not know the job, who have no authority to talk like that. Don't believe them. It's the easiest thing to do. You will see yourself. But supposing it is easiest, then why should

we deny it? Supposing I've got the diamond for you free, won't you see it, won't you have it? Or are we going to feel, “Oh it's very difficult. How can we do?" When I am saying it is easy. You don't have to pay for it. All right? Someone in the audience: *[UNCLEAR]*.

Shri Mataji: What's it? Someone in the audience: *[UNCLEAR]*.

Shri Mataji: No, that's correct. Sit down, sit down. All right, all right. Please sit down. I'll tell you.

That's the method people tried. It doesn't work out that way. Say, your car, is something wrong with your car, all right? Now, can you clean it from sitting inside it? Can you put it right? You have to get out of it.

So first the Kuṇḍalinī rising has to be done. You see, people have confused everything. Even in Haṭha Yoga where there are ashtangas, first thing is Īshwar Pranidhana. First is the establishment of God, first you have to be connected with God.

Even in Christianity you have to be baptized first. Of course, it's an artificial one, forget it, but you have to be baptized. Even as a Hindu you have to be Christianed [christened] in a way what you call a Yagnopavita is done at the age of eight years. That's what Realisation is. Or Mohammed Sahib and all these people use Sunta, that's the same thing.

So the first thing is to get your Realisation. It doesn't mean that you become a master. But awakening of the Kuṇḍalinī and then with the growth of the Kuṇḍalinī you become a master. This was the real process but they have put it upside down. How can you cleanse yourself unless and until you get out of it? Supposing My sarī is

spoilt, I have to take out My sarī and clean it. Isn't it? And that's why it is difficult. That is it. It's a confusion they have created. And don't believe in all these stories. If you try to suppress your ego, it will sit on your head. Never it will run away. If you try to suppress your superego, it will never help you. But here automatically it happens and how it happens I'll tell you tomorrow. By awakening these deities within yourself these things are sucked in. Kuṇḍalinī awakens and does it. Last of all, if you want Me to confess, there is something special about Me that I can do it. Must be something.

If you don't crucify Me, I'll say that much, not more. You better find out, otherwise the first thing you will do is to crucify Me. I don't want it anymore. All right? Thank you.

May God bless you. Yes, My child? Question: Mother, how can we help each other *[UNCLEAR]* to open our hearts and become more connected?

Shri Mataji: It's not any surgery needed for that. In Sahaja Yoga, we have techniques, Divine techniques by which we open our heart. The confusion is on another line also and this confusion has led us into problem.

You see, the confusion is about how our relationships should be to ourselves, to others and to the society. There's a big confusion that started long time back when the Smritis were written, or we can say when the religion was practiced it was just the other way round.

We started doing everything and that's how we have lost that capacity.

The attitude towards ourselves should be that we should try to perfect ourselves. It's absolute tyrannical I tell you.

When I try to perfect Sahaja Yoga, I am tyrannical towards Myself.

The amount of work I take out of this body and the amount of exertions I can put in out of this body, the stretching of My complete patience to a great extent, I work it out.

I mean, normally you know, people get just clenched up, “Oh Mother, this is too much. We can't bear." You have seen it yourself. But you have to be really tyrannical to perfect yourself. That should be the way we should work it out towards ourselves and towards others it should be an ideal relationship.

Like now you have a brother, he is your brother, should be ideal brother. If he is your father, he should be an ideal. But such a confusion! The more enlightened, so-called, you become, the more elevated you become, the confusion is: who is your sister, who is your mother, who is your father? Then the relationship between the Sahaja Yogis also becomes confused.

You are Sahaja Yogis, you are all prophets, you must respect each other. You are all prophets, you speak the same language. You have to love each other. It's not rational, it has to happen to you because the relationship has to be established, that relationship, that ideal relationship.

So many people now you have known that get angry with Me, “Mother, You are too patient with the Sahaja Yogis." But they are My children. I have to perfect Myself and My relationship with them should be ideal. I have to go to a great extent forgiving them so that they come up.

So relationship with others should be ideal. Are you an ideal father? Are you an ideal mother? Are you an ideal sister and a brother? Are you an ideal citizen towards others? But the society has to be pragmatic. The society has to work it out pragmatically and the pragmatic working out comes by changing.

Supposing today I would say that for India we don't need vegetarianism. For England we need vegetarianism.

It's all pragmatic. The society has to be pragmatic.

Here, we are pragmatic about ourselves, not about the society, we are pragmatic about ourselves.

Everything works out *[UNCLEAR]*. “What's wrong?" A woman who has children will run away with another maṇ”What's wrong?" Or a woman who has children can sell the country for the sake of her children. “What's wrong?" So this confusion within us creates this problem and that's how we do not know how to open out ourselves. If we could get rid of our confusions, it could be all right. It can be done through Sahaja Yoga.

All these confusions have been created by half-baked people I will say.

Like there's nothing wrong with the incarnations, with the prophets. Nothing wrong with the depth of such people. What is wrong with us is our attitude. And if we can discriminately use our attitude towards ourselves, towards others and towards the society, everything will work out. It's going to be beautiful.

Because of this confusion our heart is closed. We are frightened of others. What is there to be frightened? Relationship is ideal. What can we do? Your relationship

as far as they are concerned, your relationship, your heart is ideal. Whatever they do is not the point. Whatever I do for them has to be ideal. I have to go on loving them. I have to go on admiring them, encouraging them, sustaining them and giving them what I have to go as My relationship has to. Say for example, a source of water that is under the Mother Earth, does it think what kind of a tree it is, what sort of things it is doing? It just gives its source, its water. In the same way, because you are the source, so the relationship has to be ideal. These confusions have worked out and rationally we have accepted all these confusions. And this has led us into this kind of a trap that our hearts are closed. All right?
Sahaja Yogi [explains the question of a seeker]: Can you explain the difference between Sahaja Yoga and Kriya Yoga?

Shri Mataji: Oh! In a way it is just the same or in a way it is juxtaposition.

Like I would say with you real Realisation or real baptism through Kuṇḍalinī awakening while there are priests who give baptism, too. This baptism and that baptism is in juxtaposition.

In the same way when Kuṇḍalinī rises, Kriya Yog takes place within ourselves.

Something goes into Kriya, into action. The action is that when Kuṇḍalinī rises, it's a tremendous force that is rising and it's a very unique happening and the whole body is prepared for that.

And when it rises, a kind of a wave of action takes place in the body. Like peristaltic movement we have when we digest our food, in the same way.

When Kuṇḍalinī rises a some sort of a muscular contraction takes place which keeps the risen Kuṇḍalinī upward and then it dilates, it opens out and then it contracts. All these things take place automatically within ourselves. As we start the car, every machinery starts working.

In the same way the Kriya takes place actually within ourselves.

So the Kriya takes place within us in Sahaja Yoga. All are subsidiary to Sahaja Yoga, means the Yoga itself. But all these things take place inside ourselves.

But on the contrary we can do one thing: without starting the car we can start moving the wheel.

That is Kriya Yoga, so-called.

So that is at juxtaposition with the real Kriya Yoga which is spontaneous, built-in within us. You don't have to do anything, you are meant for it. I have seen people. Their tongues are cut. They are wagging their tongues. Very old people in India have got this from somebody from America. Horrible fellow. They cut their tongues and their tongues are wagging like this. They are useless people. One doctor was like that, one doctor. A seeker, imagine a seeker being ruined like that. I said, “Why? Why did you do that?" He said, “We are supposed to do Khechari." Khechari is a thing where you cut the tongue, put it back and try to touch this back side with the tongue tip. Can you imagine? As it call as dawedi raveni Prāṇāyāms, these are of no use.

These things have ruined the path of Kuṇḍalinī. I have seen the Kuṇḍalinī being hurt, wounded. She just tosses Her head all sides. This is the ego of man, he thinks, “I

can do it and I'll go to any extent to do it." Forget it. It's so simple. Just like an enlightened light, enlightened candle can enlighten another candle. It works out that simple ways. Don't do all these things to yourself. If you are a real seeker, just forget it. Don't ruin yourself.

There's nothing you did to ruin yourself. This is done because they are earnest seekers. Their ego is pampered that you can do it, they do it.

In Sahaja Yoga, you don't have to do anything till you are realised. Like the people who don't know how to swim are told, “You keep silent. We'll try to bring you to the shore." So they are brought to the shore, they are taught how to swim, how to save people and then they save the people. You don't have to do anything till you get your real Realisation and the mastery over it. Unless and until you become the master you are not to do anything. You have to become the master first. It takes hardly any time to become the master. It's too good to believe, but it is true. Everything that is perfect looks like that. Isn't it? Someone in the audience: *[UNCLEAR]*.

Shri Mataji: Yes, now for shoes. I mean, even there people have an argument with Me, “Why shoes?" So I better give explanation otherwise again they will stand up and say, “Why shoes?" Because shoes, we are so identified with them.

You see, shoes these days, in modern times especially, they make, you see, the soles with not leather but something else and they insulate you. As it is, shoes do insulate you from the Mother Earth. And to take the help of Mother Earth, we have to take out the shoes, but even

that upsets people, you know. Can you imagine? But if you ask them to cut their tongues they don't mind.

They want it to be absolutely Sahaja. When it is Sahaja, it has to be extremely Sahaja, that why take out the shoe. Isn't it interesting the way we are? It is such a play, such a beauty. All right, let's take out our shoes and be in cheerful mood. There's nothing serious going on here.

Just take out your shoes, that's all. Now put your hands towards Me please, just like this. Both the hands and close your eyes. Please don't keep your eyes open. That's important. Again, the same Kriya Yoga as you were saying, when the Kuṇḍalinī rises, first time when She touches this center here. This center is placed on the Optic Chiasma. There's a dilation of the pupil and that's why if your eyes are not closed, it won't rise. It's just other way round in hypnosis.

So please keep your eyes shut, please. And, be kind to yourself, be kind. Don't judge yourself by thinking you are guilty. This is the first mantra we tell people, in the West especially where everybody seems to be guilty about something, I don't know what, something unknown. It's catching on this finger as they say. Please, before starting anything, just say in your heart, `Mother, I am not guilty.' There's nothing to feel guilty. After all, what guilt can you have? What wrong can you do which cannot be engulfed by love of God? So just don't feel guilty for anything.

Maybe in My lecture I might have said that this doing is not good and that, doesn't matter. It makes no difference to Me. Whatever style it is, I know how to do the job.

So just don't feel guilty at all. Just say, `Mother, I am not guilty.' That is very important because it blocks this horrible Viśhuddhi. With this guilt you develop all this spondylitis on the left side and all kinds of problem.

So better say, `Mother, I am not guilty.' One simple thing, `Mother, I am not guilty.' Now close your eyes.

Please do not feel guilty, please. Say again and again that, `Mother, I am not guilty.' Please don't open your eyes, just don't open your eyes, please.

Please put your right hand, don't open your eyes and put your right hand on your heart. Then ask a question in your heart, `Mother, am I the Spirit?' Ask the question. It's very simple question but this question will establish itself. Just ask the question in a humble way, `Mother, am I the Spirit?' Please say it twelve times.

This answer itself will give you a Cool Breeze in the hand flowing.

[Shri Mataji blows thrice into the microphone.] Now you put your hand on top of your head where the fontanelle bone area is, where you had a very soft bone which is called as Tālu.

Just see if there's a Cool Breeze coming out of it. You may ask one question to Me, because I cannot force it onto you, you have to ask for it. You have to ask for your Realisation saying, `Mother, please give me my Realisation.' I cannot force it to you. Your freedom is to be respected. If you want to go to hell, you can go. Or, if you want to go to heaven, it can be worked out also.

So, please ask Me for Realisation.

Actually, I don't give it, but this works out that way.

Contents: 1982-07-10 **Talk to Doctors, Hormones, Derby, UK**

Sahaja Yogi: Mullerian duct is something new about these two main lines that are in the [embryo].

Another Sahaja Yogi: Yes, it is the, reproducts it and the...

Sahaja Yogi: They reproduct in the kidney, they reproduct and *[UNCLEAR]* I would *[UNCLEAR]*.

I have no idea. You see *[UNCLEAR]* in the embryo Shri Mataji, the first thing they develop, it's very interesting, is the, the brain. Not the brain but the neuron placement. [Alternative] separates to form the spinal cord. Kuṇḍalinī in other words does [create] that. Not in the spinal cord. What is it, the neuron, Christy? Another Sahaja Yogi: Is the neuron tube.

Sahaja Yogi: It's the, it's the basis of that, of the spine itself.

Another Sahaja Yogi: The neuron tube.

Shri Mataji: The medullar chord itself.

Sahaja Yogi: Ha and the segments. And then the rest developments around it, half. But all that endocrine glands come from this reed, this pattern it's the very interesting.

Shri Mataji: That means that they are from the Iḍā and Piñgalā.

Sahaja Yogi: Hmm.

Shri Mataji: They are the stored energy of Iḍā and Piñgalā.

Sahaja Yogi: Because it emits two side things afterwards, [none] of them, Mullerian ducts or something like that.

Shri Mataji: Actually, first they are formed, then maintain them.

Sahaja Yogi: That's right. First that is right, first to do like that, these Mullerian ducts, you know.

Shri Mataji: Why are they [doctors]? Because they are aiders. Energies don't require [practice].

They emit energy. You see, anything [that is put low as the floor] require the... Actually [doctors] [Hindi.] They are energy pockets. And they emit energy, [emit energy].

Sahaja Yogi: The whole thing, yes, but.

Shri Mataji: So these are actually the energies. These are formed by the left and right and central, all of them. And these energy pockets are placed there, close of that. If we go right side, right-sided. If there's a left side [needed], left side. *[UNCLEAR* I mean if there's a dirt/dint of right side] they start flowing. *[UNCLEAR* Dirt/Dint] of left side they start flowing.

So to have a coil in respect the difference comes. These are energy pockets.

Sahaja Yogi: And another thing, Ma.

Another Sahaja Yogi: In the embryonic stage, Ma?

Shri Mataji: No, no, more they are [beyond this].

Sahaja Yogi: In the other. Even beyond, even beyond.

Shri Mataji: In the embryonic stage these are energies.

Sahaja Yogi: As, as, as pockets of it.

Shri Mataji: In the embryonic stage actually the energies flow in a channel but they do not have that state.

Sahaja Yogi: Right.

Shri Mataji: Now, is the, that... Like a dynamo. They create dynamo, we call them, left and right side can create a [dynamo]. And you can have a battery or something like that it's reproduced. That's what they have a battery produced [to send a signal]. Now they become batteries or not that, that's a dynamo, or something that emits, manifests, like a light.

Sahaja Yogi: Another thing it's in.

Shri Mataji: Stored up in it. Left and right-sided stored up in it.

Sahaja Yogi: You see and that's a significant act in the beginning to say also you [pop] the five elements in the neuron tube, three constituting the left side, right side and center and two the Ātmā and Kuṇḍalinī.

Shri Mataji: Yeah.

Sahaja Yogi: Which open out, [does use] these pockets and the other opening out is the, is the Ātmā here and the [seedling] that becoming the grosser aspect [it's no other than] the heart and the sacrum which is the residence of the Ātmā and the Kuṇḍalinī.

Shri Mataji: You see, Ātmā is [that thing].

Sahaja Yogi: Ātmā is that?

Shri Mataji: Ātmā is the reflect, is the object which reflects. This is the reflector. And that reflector is separate from you. And when this reflecting will work out, then the Iḍā and Piñgalā Nāḍī, both of them together, produce these energy pockets. All right? And then keep for the reflector for *[UNCLEAR* its use/its switch]. Then when the reflector is perfect then the reflector is *[UNCLEAR]*.

Sahaja Yogi: All right. This is the mechanism. This is the machine of the Kuṇḍalinī that what you can call a Tantra. The whole, I mean, the whole chakric system is the machinery of the Ātmā.

Shri Mataji: Is the machinery of the Ātmā.

Sahaja Yogi: To work out that reflection of the Ātmā, protect it and to *[UNCLEAR]*.

Shri Mataji: I wouldn't say, I wouldn't say like this.

Sahaja Yogi: Yes, I can see that.

Shri Mataji: No, to do an analogy, we say that energy that is going to flow in this machinery is the Kuṇḍalinī which is going to work and this energy gets connected through the All-pervading Power, to Ātmā.

So it's like a plug. All right? Now this All-pervading Power is the power of God Almighty.

So we have God Almighty or His All-pervading Power. This All-pervading Power is felt by a plug here which is the Ātmā, the reflection of God. And this energy, when it gets to the plug it feels this higher energy which is the power of the Ātmā, of the Param'ātmā. [Can you cover?]

Sahaja Yogi: Yes. Yes.

Shri Mataji: You get something like the Rolls-Royce [in you].

Sahaja Yogi: We, just, just, You know, in the simplistic terms, does the Ātmā actually rise in conjunction with the power that is Kuṇḍalinī or is it, where is it touched the All-pervading Power this point or obviously this point?

Shri Mataji: [Where it's perceived?]

Sahaja Yogi: That is [here].

So it rises.

Shri Mataji: But in the human being it [resides] in the heart, of course. It comes out [of this nature].

Sense of reflection, that moves, reflection that moves.

Sahaja Yogi: One thing which is quite interesting, Mātājī, that all the hormones that are produced by the Swādhiṣhṭhāna, they are all made out of fat. They are all steroids.

Shri Mataji: Now does that explain such a use of the body? This is called as so be in the [Viṣhṇu].

Devī is called as made in the [Viṣhṇu].

Sahaja Yogi: Hmm. That's right.

Shri Mataji: That She stays, the power stays with the [made up] do not [depart of it]. Now how is fat produced according to the medical science? Let's see?

Sahaja Yogi: Nicely in the liver.

Shri Mataji: Perfect.

Sahaja Yogi: Formed in the liver and transported out and laid down.

Shri Mataji: But how? How does liver produce fat?

Sahaja Yogi: Of lipids.

Sahaja Yogi: Direct digestion. Whatever fat it digests...

Shri Mataji: Digested by?

Sahaja Yogi: By liver.

Shri Mataji: By?

Sahaja Yogi: Intestines.

Shri Mataji: Intestines. Then?

Sahaja Yogi: Then from sugar also creates fat, can.

Shri Mataji: Hmm?

Sahaja Yogi: Can create sugar from fat.

Shri Mataji: From sugar? Reaction is what?

Sahaja Yogi: Not sure actually. Sugar, which. I'm not sure, Mātājī, which is the *[UNCLEAR]*. How does the liver produce fat out of sugar? Another Sahaja Yogi: By glycemia genesis. It's a...

Sahaja Yogi: No, that's the opposite. That's producing the sugar.

Another Sahaja Yogi: *[UNCLEAR]*.

Sahaja Yogi: [That's getting an invert].

Sahaja Yogini: Why?

Sahaja Yogi: That's coming back into sugar. I do not know what to. I thought that You know Mother it does it automatically, use the sugar with sugar and does it.

Another Sahaja Yogi: So we're missing something very subtle.

Sahaja Yogi: Yes, is something more subtle.

Shri Mataji: Nothing, it's very simple, very gross.

Sahaja Yogi: [Try Mother.]

Shri Mataji: Sugar never gets into fat *[UNCLEAR]*. Actually, this is [autonomous] system. Sugar digests all the fat.

Sahaja Yogi: That is true. When it goes in the worse [cause] the death, sudden death.

Shri Mataji: It just takes sugar into fat. It will never produce fat.

Sahaja Yogini: Never produce fat.

Shri Mataji: It cannot do that so.

Sahaja Yogi: That is true also.

Shri Mataji: Because no carbohydrates. It just have gluten and fats. Is never [carbohydrate]. There's no

carbohydrate. Carbohydrates actually dissolve fats. I will not [percolate]. Creates called diabetes. Is this fact? Have you? Have you ever saw? [Hindi.] Just carbohydrates. Achcha, there are those kinds of carbohydrates. Yes? So now, is all right? Carbohydrates? Sugar never gets converted into fat.

So *[UNCLEAR]*, outside is prepared.

So means question *[UNCLEAR* remains/limit].

Sahaja Yogi: That's a big one thrown in the *[UNCLEAR]* in the webs and medical science, isn't it? Another Sahaja Yogi: No, but the [that's medical science]. They have to change all the text books now.

Shri Mataji: From where that fat is, that fat is produced in the human beings or in the *[UNCLEAR* animals/cells], how?

Sahaja Yogi: By digestion, using sugar as a catalyst [it does absorb].

Shri Mataji: With. But that is [what] source of fat comes from where? For us and for any digestion [group], so we go into the basic?

Sahaja Yogi: I don't know, Mātājī.

Shri Mataji: There is something converting into fat.

Another Sahaja Yogi: The string of the fatty acids together...

Shri Mataji: Hmmm? Another Sahaja Yogi: String of fatty acids together with glycerols.

Sahaja Yogi: No, but Mātājī is *[UNCLEAR]*.

Another Sahaja Yogi: Oh, is it?

Shri Mataji: So what did he say? Another Sahaja Yogi: Said, polymerized fatty acids with glycerol.

Sahaja Yogi: He's giving the chemical reaction that produces fat which is fatty acids plus glycerol.

Shri Mataji: No, no, but these people [used it]. What is the reaction you say? Just tell that.

Sahaja Yogi: Just polymerizing the fatty acids with glycerol to get fat.

Shri Mataji: Glycerin. From glycerol?

Sahaja Yogi: Glycerol plus fatty acids.

Shri Mataji: But fatty acids from where do they come?

Sahaja Yogi: Yeah.

Shri Mataji: [If you are getting.] What is the source of fatty acids?

Sahaja Yogi: From the food.

Another Sahaja Yogi: But where do they? Somewhere must have *[UNCLEAR]*?

Shri Mataji: [Some and what then?]

Sahaja Yogi: I don't know.

Shri Mataji: [So you are going to the] oxygen, everything.

Sahaja Yogi: Fatty acids are produced, you see, if you go back to plant [lesson], Mātājī, fatty acids are produced basically by things that eat, vegetables.

Shri Mataji: Ah, vegetables? Supposing we eat them but where does it come from?

Sahaja Yogi: Cellulose.

Shri Mataji: Ah?

Sahaja Yogi: You mean it's... It's [private]. It's primordial.

Shri Mataji: Ah?

Sahaja Yogi: From the earth.

Shri Mataji: Simple.

Sahaja Yogi: From the earth element.

Shri Mataji: No. In the earth element we have got oils, already. With the earth element oils [even] which are produced carbohydrates.

Sahaja Yogi: No, it cannot be.

Shri Mataji: All right? So the petrol you can't eat, can you?

Sahaja Yogi: No, I cannot adjust it.

Shri Mataji: None of the oils that are produced by Mother Earth we have it.

So which is the fat that we get? What is the source of that fat?

Sahaja Yogi: Don't know, Mother.

Another Sahaja Yogi: Well, vegetation.

Shri Mataji: What are you so *[UNCLEAR]* carries the Mother Earth.

Sahaja Yogi: Plants and plants and animals.

Shri Mataji: *[UNCLEAR]*. Same oils are converted by the plants and by the sun into subtler fats.

Sahaja Yogi: Achcha, so the subtles and the fats are.

Shri Mataji: What we use is nothing but petrol.

Sahaja Yogi: Then we shouldn't burn it, Mother. Another day they used to say that petrol was originally plants.

Another Sahaja Yogi: Hmm, that's right.

Shri Mataji: You see, this petrol is made subtler for the use of man by the action of the sun. Who watches the sun away is Prāṇa.

So gana acts on the Mother Earth, the petrol and creates the fat which is available.

Sahaja Yogi: For us.

Shri Mataji: Means for this motorcar a new petrol is made that way. All right?

Sahaja Yogi: So that is why.

Shri Mataji: But within it is the hydrogen.

Sahaja Yogi: So fat is very unusual, Mother. And that is only carbon and hydrogen and oxygen and contains no nitrogen.

Shri Mataji: Mmm?

Sahaja Yogi: Fat is a very high per cent hydro or what's it hydrogen in relation with oxygen, isn't it? Much higher than.

Shri Mataji: Only hydrogen they just [cut it].

Sahaja Yogi: Hydrogen in relation with oxygen.

Shri Mataji: So it is the moon. This is the action of moon, sun and the Mother Earth, inside to support it. But in human beings it is formed as flabbiness. As fat is produced and the moon [created] this fat. Flabbiness.

Sahaja Yogi: That is why until the Mūlādhāra Chakra opens, the Swādhiṣhṭhāna cannot open fully. The Mūlādhāra Chakra, I think you were telling in [Jamail], Mātājī, that in Pūjā, when we do Pūjā, Mūlādhāra Chakra opens and then Swādhiṣhṭhāna opens.

Shri Mataji: If your Mūlādhāra is closed up I think I'm *[UNCLEAR* stopped/stucked]. But it's slightly opened in somebody. What I try to say that when the left side hydrogen within us, that's mixed up with [water, water], that means more hydrogen is added, through the water some *[UNCLEAR]* is formed and that is the one which forms fat.

So most of the people are fat are left-sided.

Sahaja Yogi: That I admit. My patients when they come in [there] they get fat.

Shri Mataji: Aā?

Sahaja Yogi: I, I noticed something very interesting, Mother. When I was a [registry] I joined the psychiatric also there. All third year was joined together. And I noticed within six months they all put on weight, specially here the young. All the young doctors.

Shri Mataji: In the psychiatric hospitals whatever they have. Too much of hydrogen.

Sahaja Yogi: Too much left. But I noticed since coming to work here I put on a lot of weight as if like a reaction.

Shri Mataji: So like this you do that hydrogen comes from moon and that the hydrogen then it reacts on water and gives more hydrogen. Then fats are formed as flab to begin with. And then you get fatty acids. If it doesn't go in the chest it goes in the blood.

Sahaja Yogi: What diseases are caused by too much *[UNCLEAR* ab/am] Mother?

Shri Mataji: Too much fat?

Sahaja Yogi: Too much *[UNCLEAR* ab/am]. Or too much fat even.

Shri Mataji: So, [jaḍa]. Hydrogen. It makes you [jaḍa].

Sahaja Yogi: So arthritis.

Shri Mataji: Mmm?

Sahaja Yogi: Arthritis is caused by.

Shri Mataji: All kinds of arthritis in circulation.

Sahaja Yogi: Could they also be responsible for breathing troubles and bronchitis and *[UNCLEAR]*?

Shri Mataji: If it goes into the lungs.

Sahaja Yogi: Achcha, achcha.

Shri Mataji: Flab, if it goes into the lungs.

Sahaja Yogi: So the whole thing revolves around the relative amount of the moon.

Shri Mataji: Moon is the first.

Sahaja Yogi: In the first.

Shri Mataji: But it is always at a contrast with the sun.

Sahaja Yogi: Do You have anything, Mother, to do with the moon in Your Kuṇḍalinī?

Shri Mataji: Moon in your?

Sahaja Yogi: Kuṇḍalinī. [Jag Ma] Kuṇḍalinī.

Shri Mataji: Of course. Of course, must be.

Sahaja Yogi: Where is that? Another Sahaja Yogi: That [is] Your horoscope.

Shri Mataji: Moon is very important. As [Hindi] this moon is important.

Sahaja Yogi: So what is the significance, Mother, as if we take it sign by sign? Like my moon is in [Hindi] so what defects?

Shri Mataji: Oh, that I don't know.

Sahaja Yogi: You don't know about that. It's OK.

Shri Mataji: But that [Hindi] is Sagittarius. That means as far as Ātmā is concerned, you are straightforward. That's why in India we use the, not signs, but another thing.

Sahaja Yogi: The [Rakshi].

Shri Mataji: The lunar.

Sahaja Yogi: Aā, [Rakshi] that is lunar.

Shri Mataji: Because for us the left side, the moon is important.

Sahaja Yogi: And [Lakhna] is in the middle.

Shri Mataji: Aā?

Sahaja Yogi: Three things we use: [lakhna], Sūrya or [rashi].

So [lakhna] is what, Mother? That is, must be the Mūlādhāra.

Shri Mataji: [Lakhna] is...

Sahaja Yogi: Or for horoscope.

Shri Mataji: I mean, in private you have this as nitrogen. This is nitrogen, actually. The [center] comes through nitrogen.

Sahaja Yogi: So [lakhna] is the center of one's existence.

So when someone's [lakhna] what your [lakhna] is, will describe your...

Shri Mataji: It's a combination, everything *[UNCLEAR* reverbs/reverts] on the [Chakras].

Sahaja Yogi: So we have chandran and the lakhna or [Hindi] in lakhna. We're thinking that they are prop for your ascent.

Shri Mataji: I don't know all that.

Sahaja Yogi: But this is also part of Vidyā, Mātājī.

Shri Mataji: Just now we are dealing with [chandra].

Sahaja Yogi: You can also think about and at a very large scale that at the same degree of subtlety, countries which are producing, areas which are producing oily plants, oily plants, are opened that sided.

That's, that's, if you think geographically...

Another Sahaja Yogi: Mustard for example. They are very full of mustard.

Shri Mataji: Yeah?

Sahaja Yogi: Yeah. This area it grows a lot of mustard.

Another Sahaja Yogi: And just so just thinking about areas around the world and the...

Shri Mataji: One can work it out. Means you have got the principle and then use it.

Sahaja Yogi: What about these countries which are extracting oil from the earth? They must be having a very harmful effect on the...

Shri Mataji: Who? Those who are extracting?

Sahaja Yogi: It's going the other way.

Shri Mataji: But you see the thing is, they extract oil...

Sahaja Yogi: They don't have to face...

Shri Mataji: They have no subtler ways. Otherwise are very thin people, extremely thin.

Sahaja Yogi: They are going against...

Shri Mataji: Mmmm?

Sahaja Yogi: They are going against this principle, aren't they?

Shri Mataji: Yes, that is full of [subtlety] in extraction of these oils. But they are very thin.

Sahaja Yogi: That is why their point and one thing that is obvious is that any country that produces oil has some battle or fight is going on there. Iraq, most of these countries that produce oil, they are having some problem or other.

Shri Mataji: Sun is, no? The sun makes this. It's a scorching hot place. And the sun has created all of that. In that sun you find this. Because there's no moon in, no moon at all. That's why Mohammed Sāhab wanted them to worship the moon.

Sahaja Yogi: To get the balance.

Shri Mataji: Right.

Another Sahaja Yogi: And also previously the Semitic people of this area were much heavier, much chantier than they are today.

Shri Mataji: Which place is that?

Sahaja Yogi: The Middle East generally. The Semitic people in, in early time, in really early time.

Much before.

Shri Mataji: Yeah. Youth, youth were never been taught normally. They have to be seen, aren't they?

Sahaja Yogi: Generally, yeah.

Shri Mataji: [The central to be seen].

Sahaja Yogi: But that's nowadays.

Shri Mataji: Ha. Nowadays. And that's they've got, I mean, they are going very right side.

Sahaja Yogi: Jewish men especially are very thin.

Shri Mataji: Can be. [Yes].

Sahaja Yogi: I can say there are very few fat. It is true.

Shri Mataji: Hmm?

Sahaja Yogi: Very, very few of them are fat.

Shri Mataji: Mmm. Same with Arabs. If you see Arabs.

Sahaja Yogi: But that's misuse of the energy, isn't it Mother?

Shri Mataji: Yes, misuse or overuse.

Sahaja Yogi: More overuse, yeah.

Shri Mataji: Overuse. In fact, whatever reactions are nonsense because the sun is there scorchingly *[UNCLEAR* hot/hard]. The, they take out the... The oil...

Sahaja Yogi: Yes.

Shri Mataji: Is formed there. They take out the oil. It's such a *[UNCLEAR* temperature or formed there]. You can't blame them. You can't blame the nature. Because of their temperament. Forget it.

Sahaja Yogi: But I remember descriptions in the Old Testament that they are waiting people.

Shri Mataji: They are all *[UNCLEAR]* one. That was in Iran or in Egypt there they are. See, they never got it.

Sahaja Yogi: Yes, I'll think about it.

Shri Mataji: That's why in Iran they worshipped the sun. In Egypt they worshipped the sun.

Sahaja Yogi: No balance at all. You have seen, Mother, that Indra's capital was in Iran, some [quite near]. That's a very right-sided.

Shri Mataji: Of course, of course. Very right-sided.

Sahaja Yogi: As well as [bond] to strive on.

Shri Mataji: *[UNCLEAR]* the memory.

Sahaja Yogi: Even to this day the Parsees is all on the right, absolutely on the right. They have no [left side].

Shri Mataji: Very *[UNCLEAR]*. Parsees are very selfish, very right-sided. All right.

So that. Where are we?

Sahaja Yogi: Well, maybe You showed this source of fats. Then we were back to the point of the Tao.

Shri Mataji: But what neutralises fat now?

Sahaja Yogi: *[UNCLEAR]* one.

Shri Mataji: Prāṇa comes from proteins, you see. Chana is [udandaya] Sahaja Yogi. Gives you the Udan, Udan with the Sahaja Yogis. But with others it can give them belching or can give them gases. It can be both ways.

Sahaja Yogi: What happens to, where do we use, Mother? Gives you what?

Shri Mataji: Udan, udan.

Sahaja Yogi: It's one of the five Pranas.

Shri Mataji: Prāṇa that goes upwards.

Sahaja Yogi: Ha Tha. [Udana] the first.

Shri Mataji: But the Udana Prāṇa can give belching to people who do not have their Chakras opened.

[Nābhī comes].

Sahaja Yogi: So the five Pranas must be... What are their various functions of these udān, vyana...

Shri Mataji: Vyana.

Sahaja Yogi: Apana. Apana. Vyana.

Shri Mataji: Vyana is the one that [distributes] coming. [Hindi.] Rhythm. Rhythm. All right, who will take them out? She, she wants to. Can you? Go.

Sahaja Yogi: Such a... But it's not only the protein part of the chana. It's the carbohydrate part as well.

Shri Mataji: Hmmm?

Sahaja Yogi: The carbohydrate part of the chana as well will help, won't it?

Shri Mataji: Carbohydrate?

Sahaja Yogi: That, that part as well as protein part will assist in this...

Shri Mataji: Chana has very little carbohydrate.

Sahaja Yogi: Really?

Shri Mataji: Very. Very little [carbohydrate] is in. Is a, is a treatment for food calories. Treatment something for diabetes.

Sahaja Yogi: Instead of having [this germinated] carbohydrates.

Shri Mataji: For diabetic people you can grind it, make it into anything.

Sahaja Yogi: It's very rich in protein.

Shri Mataji: Absolutely rich in protein.

Sahaja Yogi: Some people in Bihar, they only eat chana. They eat nothing, just [tatu].

Shri Mataji: Tatu is chana. For lethargic people chana is very good. [Horses] eat chana. And the white horses must eat chana. It gives you energy.

Sahaja Yogi: Is there anything it's not good for, Mother?

Shri Mataji: I beg your pardon?

Sahaja Yogi: Is there anything is not good for? Chana?

Shri Mataji: Is not good for?

Sahaja Yogi: Is there anything?

Shri Mataji: What? Another Sahaja Yogi: Is there anything is harmful for any?

Shri Mataji: Can you sit?

Sahaja Yogi: Not good for the bhoots.

Shri Mataji: For a Sahaja Yogi it is not. For a non Sahaja Yogi it is. It gives you gases. It gives hiccups.

Sahaja Yogi: It also puts some weight.

Shri Mataji: No, no, this chana wouldn't do.

Sahaja Yogi: No, no, before realisation.

Shri Mataji: No, no, never.

Sahaja Yogi: You see, all these rickshaw and all the coolie, they eat only chana. No vegetables, nothing.

Just chana.

Another Sahaja Yogi: Really?

Sahaja Yogi: They are all very healthy, very strong. The right balance.

Shri Mataji: You see, they are muscular, for muscular people, must [have].

Sahaja Yogi: Very muscular.

So eating chana must be very good...

Shri Mataji: No. The body shows *[UNCLEAR]* come and [just advertise], “Eat chana, eat chana."

Sahaja Yogi: That's a, that's a complete misunderstanding in the West, Mother, because we thought that these second class proteins, as they are called, are substantial fat-giving.

Sahaja Yogini: Yes.

Another Sahaja Yogi: You see, they are, the so-called primer proteins. They are the right-sided.

Shri Mataji: Oh, I know. These are the balanced. Is the balanced.

Sahaja Yogi: These are the balanced.

Another Sahaja Yogi: Yes. No, no, I accept it, Mother. I accept it we get all these [things] set in our head, which are completely wrong.

Shri Mataji: This one, then you have moong dhal. Very good, left-sided.

Sahaja Yogi: Ha, hm, very good for the stomach. It makes, chew it, moong dhal.

Shri Mataji: Moong dhal is even better than chana. It gives no pressure.

Sahaja Yogini: What is it?

Sahaja Yogi: Moong dhal. Moong dhal. Moong beans, I can call it.

Another Sahaja Yogi: Oh, that, yes, yes.

Sahaja Yogi: So what is good for adding fat, Mother?

Shri Mataji: For what?

Sahaja Yogi: For putting fat.

Shri Mataji: For adding fat? Sugar. Take four kilos every day. You will have fat.

Sahaja Yogi: He needs that.

Another Sahaja Yogi: Oh, I'm all right, Mother.

Shri Mataji: One must put on some.

Sahaja Yogi: Some more?

Shri Mataji: Of, course, some more. What?

Sahaja Yogi: Actually [his suit] is tight after Sahaja Yoga.

Shri Mataji: No, no, you must have got those [tight] ones. That's a problem for [we shouldn't put on, size] *[UNCLEAR]*. I mean, people even if they become as [straws], they want to diet. I don't know if that is very good. Gavin, you don't take sufficient sugar also.

Sahaja Yogi: All right, Mother.

Shri Mataji: Don't you? And another thing is never to fuss about food. Those who fuss about food they never put on weight. Example is Mister C.P. Srivastava. He eats like this, double and no diet. No, but that is important. You have to eat [anything].

Sahaja Yogi: He is less active than You are.

Shri Mataji: Mmmm?

Sahaja Yogi: Much less active than You are.

Shri Mataji: No. That I can't say.

Sahaja Yogi: He sits in the office all the time.

Shri Mataji: He's sedentary. Can't say about, it's one of his habits.

Sahaja Yogi: How?

Shri Mataji: But that's not the point. The point is, if you are fussy about food, you see, your body's rejecting it. The fussy men never put on weight.

Sahaja Yogi: He goes [from] right.

Shri Mataji: Are you fussy?

Sahaja Yogi: He's the opposite. He's indiscriminate one.

Shri Mataji: Mmmm?

Sahaja Yogi: He's the opposite. He's indiscriminate. Very cool, it's cool, isn't it?

Shri Mataji: I don't understand the left cooling of him, left towards Me very nice. That's [so good of it]. Now there is a kidding at each other. It's nice to only watch, isn't it? So then, Swādhiṣhṭhāna.

Sahaja Yogi: Ha. Only one gland we haven't done in Swādhiṣhṭhāna and that is the adrenal gland.

Shri Mataji: Mmmm?

Sahaja Yogi: The adrenal gland in Swādhiṣhṭhāna. Not the adrenal cortex. Cortex is OK. That is steroids. But the adrenal medulla which produces adrenaline. For that comes [on both sides or from outside] the Swādhiṣhṭhāna and it produces *[UNCLEAR]*.

Sahaja Yogi [at the telephone]: Hello. Yes. No, it's *[UNCLEAR]*.

Shri Mataji: They started? Sahaja Yogi [speaking at the phone]: [Aside:] No, it's not. It's *[UNCLEAR* Garry/C.P.] and Rachel.

Mother is talking about medicine to us. [Mother] they are asking if they can come, *[UNCLEAR* Garry/C.P.] and Rachel?

Shri Mataji: How much time they take?

Sahaja Yogi: Ten minutes, fifteen minutes.

Shri Mataji: Come.

Sahaja Yogi [at the phone]: Yes, come over.

Shri Mataji: Then we'll go, now after the...

Sahaja Yogi: If we go for a little walk I'll show you flowers, Mother.

Shri Mataji: Shop [Hindi].

Sahaja Yogi: Will be. Achcha, shop day.

Shri Mataji: Today is the only day.

Sahaja Yogi: Ha, tike, shop day.

Shri Mataji: [Hindi.]

Sahaja Yogi: Achha. Tike.

Shri Mataji: Hanna?

Sahaja Yogi: No problem. I think you have to come to a hospital on Sunday, Christ day. [Ask Jesus, hanna].

Shri Mataji: [Characterless]. Now, she looks quite disturbed about things. Is it Christine?

Sahaja Yogini: As now you are here, Mother, I'm not disturbed anymore.

Shri Mataji: Just see. One master will put you a tester for everything. I've talked to C.P. and I told him, “If you want to have your fussy food then you bring Me a supper. It's no *[UNCLEAR]*. It's your discretion." “No” he said, “I am not fussy at all." “I know you are not." He said that, “*[UNCLEAR* I'm glad/I would like] to eat outside with you and [family]." So our problem is solved.

So we are eating outside. Only for the lunch perhaps I was thinking to have it here. But even for lunch I think you should not worry because if you are going to give the hall, you can give them lunch and *[UNCLEAR]* there.

Sahaja Yogi: And give it to all.

Shri Mataji: Ha.

Sahaja Yogi: Do they have good restaurants, you know [this time in Lausanne]? Another Sahaja Yogi: You would know or you would know. No.

Shri Mataji: Course God knows what time they would come.

Sahaja Yogis: Then maybe not give them *[UNCLEAR]*?

Sahaja Yogi: Also there are nice [things to be seen], as well.

Another Sahaja Yogi: Ah? Sahaja Yogis: The surroundings are very nice, Mother.

Sahaja Yogini: One nice Indian restaurant seems to be the best one.

Shri Mataji: Not good. He's not looking for an Indian restaurant.

Another Sahaja Yogini: See the [subtler]. Because where is *[UNCLEAR]*.

Sahaja Yogi: Is no way very good.

Another Sahaja Yogi: There's one good Italian restaurant.

Shri Mataji: They have to eat exactly like you eat here.

Sahaja Yogi: To me are the best.

Another Sahaja Yogi: Three zero and ask them to call Doctor Rao.

Shri Mataji: There are some Italian one? Sahaja Yogis: There is, Mother, but I mean it's, it's not a, I don't know if Mister C.P. will go.

Shri Mataji: No. [Pizza] He likes to eat Italian.

Sahaja Yogi: I'll ask, Mother, one of my friends here who were telling me of a good Italian restaurant.

Shri Mataji: All right.

Sahaja Yogi: He said it was very good.

Shri Mataji: Where? Nearby?

Sahaja Yogi: I'll ask him. He, I'll bring him here. He is a doctor here.

Shri Mataji: So you see once they come to give the hall I would say that we'll take our lunch there, wherever it is and come and sleep for a while. And then go round and see the places nearby and then what we can do is to, tomorrow [have]. Then in the evening time, when I go for the program they would like to rest here.

Sahaja Yogi: We shall inform *[UNCLEAR]*.

Shri Mataji: What is the evening entertainment here? *[UNCLEAR* For the/Sir C.P.], not for Me.

Sahaja Yogi: Believe me, I'm telling, what they have, it's pubs.

Shri Mataji: Nothing but the pubs? Sahaja Yogis: *[UNCLEAR]*. It's cinema maybe. It's cinema.

Shri Mataji: Did they go round? You see, it's quite polite to have organized all things.

Sahaja Yogi [to Dr. Rao]: Hello. There's a cinema. I want to ask you, Rao Sāhab, which is this Italian restaurant you went to? Another Sahaja Yogi: Yes, it's probably nicest thing to do, it's to go around. There are some very pretty places.

Shri Mataji: If we can go around and join us about ten o'clock to the restaurant, to what place is that, so that meal part we'll think for the family, all right?

Sahaja Yogi: Gondola. The gondola.

Sahaja Yogini: Gondola.

Shri Mataji: Gondola.

Sahaja Yogi: Where is that? [Opens the door.] OK, OK, thanks a lot. Bye.

Sahaja Yogini: Mother, can I show You the advertisement we'll give in the local paper? It will be also tonight. I will be again this night, this evening.

Shri Mataji: It's very rightly placed in. In the evening it will appear?

Sahaja Yogini: It appeared yesterday. This newspaper starts at lunch timer really. Lunchtime and again in the evening. And today also lunchtime and again in the

evening. Today I am sure [it] will be placed in the top, at the, absolutely at the top of the center pages.

So I, I'll buy one of these papers today.

Sahaja Yogi: Mother, just to finish off on sugar. There seems that there are two categories beings. The right-sided person who is thin needs a lot of sugar. A left-sided person, in fact the sugar will neutralise the fat. It will have two different effects.

Shri Mataji: No, not for left side. For left-sided person... You mean you say for the [inerts] ones.

Sahaja Yogi: Well, I only wonder, say, today...

Shri Mataji: No, what I tell you one thing about this. This left-sided person has the energy which is frozen. Right-sided person has the energy which is exhausted.

So you need an outside [replacement] for the right-sided person. For the left-sided person, whatever is stored in has to be [heated up].

Sahaja Yogi: So what did you mean when You said sugar digest the fats?

Shri Mataji: Sugar digests the fats, that means it accumulates. See, say if you take to carbohydrates...

Sahaja Yogi: Should be, should be exhausted.

Shri Mataji: *[UNCLEAR]* you put little fat, all right? And put water in it. It will not go. But you put little fat and put some sugar...

Sahaja Yogi: Yes, I understand, it is [accession], it multiplies it.

Shri Mataji: Yes.

Another Sahaja Yogi: So Mother, they've just left...

Shri Mataji: Who?

Sahaja Yogi: C.P. and *[UNCLEAR]*. Now it's twenty to eleven.

Sahaja Yogi: Do you think [how long is] about? Another Sahaja Yogi: Three hours or so...

Sahaja Yogi: 1:30 or 2 they will come.

Shri Mataji: Aā?

Sahaja Yogi: 1:30 to 2.

Shri Mataji: [Hindi.]

Sahaja Yogi: [Hindi.]

Shri Mataji: You see the thing is, the question, you should try a balance. C.P. is too formal. You see, to him, if you cook for him, it's a burden. He himself is cooking. He's worried himself, you see. That sort of a man he is.

So it's better not to cook for him. [Hindi.]

Sahaja Yogi: One meal. Tomorrow lunch time then?

Shri Mataji: As general cana is not so important. You see, today, you want to give him something.

What you can give? [Hindi.] I can give it Myself.

Sahaja Yogi: And we can help You. [Hindi.]

Sahaja Yogi: [Hindi.] But if you just remind me.

So Sadhana gharam masala likes. [Hindi.]

Shri Mataji: Give us chicken.

Sahaja Yogi: Chicken we'll have. Yes.

Sahaja Yogini: Yes, Mother, I've got two for You and the family, of course. I've got something for You.

Shri Mataji: [Hindi.] Chicken. You get yoghurt. Keep it for an hour or so. [Hindi about food and masalas].

Sahaja Yogi: Achha, ha, ha. That is I remember, yes, that was also part of it. Then tandoor may finish and no

problem. [Hindi.] When You come back to give the dinner first. [Hindi.]

Shri Mataji: Sarsun is different.

Sahaja Yogini: I could get it.

Sahaja Yogi: Actually, I hardly [get] to have these pomegranate seed, [Hindi.]

Shri Mataji: [Hindi.]

Sahaja Yogi: [Hindi.] I never used that.

Shri Mataji: Punjabi is using.

Sahaja Yogi: Achcha, beautiful. The U.P. don't.

Shri Mataji: They know, they use it in [Hindi]. That's all India. But remember now do it. Otherwise I'll make it.

Sahaja Yogi: [Hindi.] I'll do the, the chicken, everything... [Hindi.] Another Sahaja Yogi: Esther does a lot of... You have all the masalas, isn't it? [Hindi, speaking about spices].

Sahaja Yogi: You have no mint, isn't it? The green one or the dried?

Sahaja Yogini: Dried.

Sahaja Yogi: OK, dried. [Hindi.]

Shri Mataji: [Losers] are. They cannot. This is the Christ has committed.

Sahaja Yogi: Achcha. This one is the power of will as known.

Shri Mataji: Animals, whatever will power they have, it's more sort of responsive. That willowy power is the will power which is controlled.

Sahaja Yogi: That is to be exercised by all of us.

Shri Mataji: That is to be exercised.

Sahaja Yogi: That is the thing that is lacking, you know, the control.

Shri Mataji: So now the reaction through this Āgñyā that you [doom or know] produces the *[UNCLEAR* jaḍa/journey]. Animals are innocent. They are absolutely innocent. They are just responsive.

[UNCLEAR] to see the food then they want to eat. If they are not conditioned *[UNCLEAR* they will not do it/like human being], they will go all out to eat. They are not bothered or like one [would] say of however they eat, like, like this, like a hog. They don't have the tidiness. For them, hog and all, there's no problem. That is, they live. They live with the nature. Their nature is such, they have no problems.

They don't have to fight persons, as we fight ourselves. But that's what happens when we assert Āgñyā.

The reaction starts building within us which is actually the innocence, which is the jaḍa, is the material thing. Jaḍa is matter.

So we produce that within ourselves as a reaction.

Sahaja Yogi: So there is always this conflict in human beings between innocence and ego?

Shri Mataji: Conict is always. They don't have any conflicts. Animals don't have any conflicts.

How can they have? Because they don't have two things; they have only one.

Sahaja Yogi: Rather this conflict we evolve.

Shri Mataji: Is to begin with.

Sahaja Yogi: To begin with?

Shri Mataji: You see, this decision making there's not problem as for *[UNCLEAR* human beings/ animals as they have animal's mind]. They don't have to make decisions. All right? *[UNCLEAR* There's/they are] all instinctive, instinctive. And the guiding factor within them and all the animals are guided by nature. Like a bird can feel the magnetism. It has a magnet, you see. There's auricular magnet in so many birds and must be in the fishes, the way they know how to go up and down, up.

So there's a magnetism, which is the, we should say Mūlādhāra.

So what happens, that reaction to this Āgñyā, that Āgñyā dissolves these matters.

Sahaja Yogi: Achcha.

Shri Mataji: And to react to it, is produced again.

Sahaja Yogi: This, this prostate gland.

Shri Mataji: That is, you retain the innocence, you say.

Sahaja Yogi: But there's no doubt that the prostate glands have a very powerful protective effect on us.

Shri Mataji: When? See, the best is to give you an example. A man thinks what's wrong if he sleeps with ten women. He will have a disease.

Sahaja Yogi: In the prostate gland.

Shri Mataji: Prostate gland is a cause of mind who is ego-oriented, specially adulterous eyes. I mean, one of the symptoms. I am not saying that if you have adulterous eyes you will get the prostate, no doubt. But if you have prostate doesn't mean you have adulterous eyes. These adulterous eyes can give you prostate gland.

Sahaja Yogi: I've noticed Mother, in London, in London there is all rubbish everywhere on the street, everything. Even if you just look in the front, second you can feel it is sucked into Mūlādhāra immediately.

Shri Mataji: So, that's why Christ has said, “Don't have adulterous eyes” because He will protect you. Yes? The prostate gland starts overact, being overactive. Because once you start becoming adulterous it starts reacting and the body, you see, secretes more and more of this jaḍa into the prostate gland to fight. *[UNCLEAR]* you get again prostate gland.

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: Jaḍa is here and here. Jaḍa creates the...

Sahaja Yogi: This is the prostate gland. Then checking here is the subtle, that suction inside.

Shri Mataji: When it's inactive that is *[UNCLEAR]*, inert, jaḍa. You see, matter is not matter, I mean matter.

Sahaja Yogi: Mother, is getting [Hindi]. Tula means jaḍa.

Shri Mataji: Tula that is settled on.

Sahaja Yogi: Ah, that is not the jaḍa.

Shri Mataji: Jaḍa is, this is jaḍa, this is jaḍa, this is jaḍa.

Sahaja Yogi: *[UNCLEAR* Matter/Made] inert.

Shri Mataji: Inert, inert, inert is jaḍa.

Sahaja Yogi: So there's a quick inertion to...

Shri Mataji: So the innocence is inert, is inert.

Sahaja Yogi: Yes.

Shri Mataji: What is it?

Sahaja Yogi: Yes, I, I think I'm...

Another Sahaja Yogi: You see, once you are driving at, Mother, you are getting this release as a result of this development in man of this inert material which has a fight with the ego.

Sahaja Yogi: Counterbalances that.

Another Sahaja Yogi: And and accordingly so the prostate, the active part materialises or does not materialise. And so you get this pro hypertrophy on, or the opposite of the prostate gland itself.

Shri Mataji: Anything that goes into *[UNCLEAR]*. Say now *[UNCLEAR]*. Stomach. Stomach uses energy out of food and the inert goes in the Mūlādhāra.

Sahaja Yogi: The *[UNCLEAR]*, Mātājī, of...

Shri Mataji: You see one question is...

Sahaja Yogi: Yes.

Shri Mataji: Whatever charges you energy anymore is the Mūlādhāra.

So everything that is inert, created, where the energy is being used, go into Mūlādhāra.

Sahaja Yogi: So if Mūlādhāra is over-developed you become inert. Is that true [meaning].

Shri Mataji: Aā?

Sahaja Yogi: In human beings when Mūlādhāra is over-developed, Mūlādhāra Chakra...

Shri Mataji: So can we go through? If it is over-developed or underdeveloped?

Sahaja Yogi: Overdeveloped.

Shri Mataji: That is the general principle for everything. You see, if it over-developed then it's a hot Mūlādhāra. If it is underdeveloped it's a cool Mūlādhāra.

Sahaja Yogi: Achcha. Hot Mūlādhāra what? Hot temperature?

Shri Mataji: Hot Mūlādhāra is the Mūlādhāra which is overused or too much of heat and all that, overactive.

Sahaja Yogi: Constantly the sympathetic and much release in.

Shri Mataji: [Guiding].

Sahaja Yogi: Release in.

Shri Mataji: Mmm?

Sahaja Yogi: Overuse, leading to the overuse of the sympathetic part which drains the parasympathetic of...

Shri Mataji: Overuse it. You accumulate by that overuse the jaḍa, the inert thing, the residual of the thing that [satisfies], that precipitates. And then you become malignant or you become jaḍa as a reaction.

Sahaja Yogi: Then, one thing they discovered about these glands is that they protect against stomach ulcers.

Shri Mataji: Mmm?

Sahaja Yogi: Prostate glands.

Shri Mataji: They protect against?

Sahaja Yogi: Stomach ulcers. And the other thing is they cause arthritis. Another [thing], is the latest thing that the arthritis...

Shri Mataji: Prostate glands cannot be.

Sahaja Yogi: Let's see... You said that *[UNCLEAR]*...

Shri Mataji: Is jaḍa.

Sahaja Yogi: And produces that ceasing up.

Shri Mataji: Mūlādhāra is jaḍa. And over-activity creates jaḍa more. Like carbon dioxide or anything like that, you

see, as the waste products. All the waste products become inert and that inertness gives additional size to the prostate. And then this jaḍa can go into arthritis also.

Sahaja Yogi: `Cause You were saying many times that arthritis is just caused by this accumulating...

Shri Mataji: Because whatever is jaḍa, inert, is actually vibrations, frozen. They are frozen type.

Sahaja Yogi: This, this is what they have discovered in modern physics, Mother. Matter is nothing but frozen vibrations just held by *[UNCLEAR* force-feeds/force fields].

Shri Mataji: Is it?

Sahaja Yogi: Yes.

So the book which is being written is called the Tao Physics, which goes by side to them.

Shri Mataji: Now what do you say?

Sahaja Yogi: As no such things is matter. It is just frozen vibrations.

Shri Mataji: And then?

Sahaja Yogi: That is how You [demonstrate].

Shri Mataji: Frozen energy is inert.

Sahaja Yogi: And that is how they produced atom bomb. Because they produced the unfreezing little of the energy using these various techniques they have discovered and that produces so much energy.

Einstein equation was equal to empty square which is the amount of energy that is released by a mount of matter that becomes pure vibrations and equivalent to the mass of that energy times of square of the speed of light. Such a tremendous increasing.

Shri Mataji: But this is what it is.

So these are vibrations which is electromagnetic.

Sahaja Yogi: Ha. That's right. They call it first...

Shri Mataji: These are not Chaitanya. Only electromagnetic. But they are part of the Chaitanya.

Sahaja Yogi: But at the subtle level they must be Chaitanya which [we haven't seen].

Shri Mataji: You see, what happens is that first the Chaitanya lahari, we can say, is the desire power; then it becomes action power and thirdly it becomes the evolution.

So all these three things put together is actually the All-pervading Power, out of which electromagnetic comes from the right side.

So all electromagnetic powers which become inert get settled into Mūlādhāra. All right? I'm such clear-cut.

Sahaja Yogi: Then what? There must be some effect, Mother, on one's living in this environment which we live in, in the modern age, where the whole air is full of the electromagnetic radiation because these power lines are giving out electromagnetic radiation.

So they must, these ones must settle down also in our [system].

Shri Mataji: You see, everything that is inert becomes... or say you take plastics are, nothing bud jaḍa, plastics are jaḍa, inert.

So all inert things go to the Mahāgaṇeśha.

Sahaja Yogi: I used to notice that in this village where I was staying in India we had no electricity.

Two hours a day we would get. And all the inertion you had [doped up] was slowly releasing. Because there has

been, we lived near a place where there is a heavy power line we feel very *[UNCLEAR* tricky feeling/field in] thing going.

Shri Mataji: No, actually in India, they have started an [ordure] gas. Now they want to use feces for that.

Sahaja Yogi: That is useless.

Shri Mataji: Just to convert.

Sahaja Yogi: [That it won't work].

Shri Mataji: For the gas.

Sahaja Yogi: To burn?

Shri Mataji: Yes. Just have to use that feces. They put all this ordure whether is cow dung in a plate.

Sahaja Yogi: But what about?

Shri Mataji: After some time.

Sahaja Yogi: The gas is produced.

Shri Mataji: It produces gas.

Sahaja Yogi: But are the vibrations all right?

Shri Mataji: Mmm?

Sahaja Yogi: The vibrations from this?

Shri Mataji: [Ordure gas is all right] about I don't know, among gas.

Sahaja Yogi: But feces, You see, it will produce awful vibrations unless you burn it only. First they used to burn it away in the sun.

Shri Mataji: But these gases only are the part of the Prāṇa. See. [Pass] negative, [pass] that Prāṇa.

Sahaja Yogi: Dhyāna, Prāṇa, uDhyāna.

Shri Mataji: So, this is one of the [dead] style.

So all of them are part of the Prāṇa.

Sahaja Yogi: So would you say Mother that Prāṇa is that sukshma of, of the electricity, electromagnetic radiation.

Shri Mataji: Of course it is the sukshma of all the [causes].

Sahaja Yogi: Or because of Viśhuddhi, we can say.

Shri Mataji: Ah, [that is].

Sahaja Yogi: Or Prāṇa is the cause of all the elements *[UNCLEAR]*.

Shri Mataji: No, no, no, all the elements have a cause and Prāṇa is the essence of this cause.

Sahaja Yogi: Achcha.

So when we do this Prāṇāyāma Pūjā then we are awakening [this cause].

Shri Mataji: From Prāṇāyāma when you do it, then you try to control your right side, but not necessary for people who are already right-sided persons. Which is meant Prāṇāyāma is meant for people who are, who are in *[UNCLEAR* inertion/inertia], see, who, who are nothing but frozen gases. And release their gases make them subtler is the idea. But not for people who have already released them to the maximum.

Sahaja Yogi: Should I notice that in the Easter Pūjā that we have one of the things they will do is Prāṇāyāma.

Shri Mataji: So this jaḍa sets this singha or [stifiness] and also where *[UNCLEAR* they did/does it] settle down.

Sahaja Yogi: That is right. This is you can see one more difference, it's subtle. It's very important.

Shri Mataji: Looks like if you put something coloured in the hair it settles down. Whatever, you think of the eyes,

whatever jaḍa you catch in the eyes, settles down. And if this gets spoilt then the prostate goes out.

Sahaja Yogi: How to release this, Mother, because this is the thing that catches and all my patients have this very [headache].

Shri Mataji: This has come because of over-reading, of seeing bad things, of *[UNCLEAR* colouring] all sort of things.

So best thing is for this, put on Mother Earth. Sleep on the Mother Earth for this and see the Mother Earth itself.

Sahaja Yogi: Mother, as well as prostatic problems is a disease You also mean there are others diseases, don't You? A wider category of, of Mūlādhāra *[UNCLEAR* tough/type] diseases and that the venereal diseases.

Shri Mataji: *[UNCLEAR* Ahha/Maha]. All are...

Sahaja Yogi: Related.

Shri Mataji: Related.

Sahaja Yogi: It's not only prostatitis. It's, it's the whole range of those dirty diseases and things.

Shri Mataji: *[UNCLEAR]*. Dirty diseases come from the sense. All the [out] dirty diseases they got.

All is a circle. Now I'll tell you a good example first of all. Say our, what's that Pune gentleman?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: Not that one. Old man.

Sahaja Yogi: Oh, Rājavari.

Shri Mataji: Rājavari. Rājavari was a worshipper of Shiva, Śhrī Gaṇeśha. And he got this prostate.

Can you imagine? I mean, he was straightforward, nothing to do with sex business and a very simple,

straightforward married man. He never had any idea of all this nonsense going on. He gets prostate.

Sahaja Yogi: Before realisation, Mother, is this so?

Shri Mataji: No, no. After.

Sahaja Yogi: After?

Shri Mataji: I mean, as it was shown. I mean [looks like] he had it before but it wasn't shown. And came to Me. He was not cured, at least this much I had the chance even if he had it.

So I've asked him, “What do you do with your Gaṇeśha?" He said, “No, I'm a Gaṇeśha this thing, worshipper, this, that.

Mother, You are Gaṇeśha." All these things he has said. That was a day of Shañkar Śhrī Gaṇeśh, this God on the fourth day, fourth day of the moon. I gave him some chana. He looked at Me. He said, “Mother, today is my fasting day." “What?" He said, “Today is [chandran]." From the subtle it worked. “Now the day when He is born you are not supposed to fast. That is the day you must celebrate." And he had this prostate. I said, “All right, you eat this chana, finished." By the time we went his prostate it was absolutely all right. Collapsed. He's [cleared]. Now see how subtle it is.

Sahaja Yogi: Very subtle.

Shri Mataji: Is too subtle for doctors. But take the gross side. Gross side is important. The man who has his rolling eyes [and steps like this]. Then he collects, you see, that bhoots from around. Because these are done mostly by bhoots, you see. Once you start it, then look at one woman, at another woman, at another person. In the

beginning it just starts as curiosity whatever it is. Then it starts improving.

The end of it that is captured by the bhoots and these [are moved in]. And you are catching this, catching that, catching that. All it is going back here. All the bhoot's staff. Now because this is a such an important thing for Mūlādhāra or it is Mūlādhāra here that has an effect, has an effect and is a problem.

Sahaja Yogi: Is it almost, is it bad to get sucked down by another?

Shri Mataji: Oh, it's so subtle. But when you actually get into some series of women sort of thing then what happens that the reaction is built in the Mūlādhāra itself.

Sahaja Yogi: And then this inert material starts releasing.

Shri Mataji: Then this inert material starts accumulating and that's how you get this.

Sahaja Yogi: This inert thing has to grow.

Another Sahaja Yogi: Then if You, only You get these people who already have this accumulation.

Shri Mataji: Mmmm?

Sahaja Yogi: People who already have the Mūlādhāras become very dry. How to release that?

Shri Mataji: Those who have? Mūlādhāra which mean overactive or inactive?

Sahaja Yogi: Overactive, let us say. I think let us say that they have too much jaḍa in that Mūlādhāra.

Shri Mataji: Jaḍa? If they have too much of jaḍa?

Sahaja Yogi: Would you like some tea or something? Tea, chai pina?

Shri Mataji: Achcha. Or coffee?

Sahaja Yogi: Coffee, ha.

Shri Mataji: No, we don't take that. Chai, yes, thank you. Little sugar and little milk, all right? Thanks.

Sahaja Yogi: How to release it Mother?

Shri Mataji: Mmmm?

Sahaja Yogi: This jaḍa.

Shri Mataji: Jaḍa. Now, what I am saying that when you have your Mūlādhāra attacked in this way that it is all clustered into jaḍa. Now how to release the Mūlādhāra is the problem. Now the best thing would be to sit on the Mother Earth when this is our Sahaja Yoga. Nirmalā Vidyā, you see. To get Nirmalā more. And you put your feet up from the Mother Earth. Put your Mūlādhāra absolutely there and ask Mother Earth to suck these problems. Just do like that. This thing, one thing. Then there's another way that you lie down on the Mother Earth. Lift your hands, lift your body, lift your legs and just allow your Mūlādhāra to touch the Mother Earth, even for a short time. And then try to rub it. It sucks all the problems.

Sahaja Yogi: Like this, you mean, by agitation.

Shri Mataji: Yeah. By agitation, you see. First of all take a [pardon] that we have done these mistakes and we have done in ignorance and we have accumulated lots of inert thing.

So better take them away.

Sahaja Yogi: I used to find one thing, Mother, when I used to meditate, this was in India not here, because there the Mūlādhāra releases more. But when the Mūlādhāra was

releasing then everything would go to the Void like [smoke].

Shri Mataji: That's it.

So the Prāṇa, that one which is the udan just to rise higher comes into Void.

And that is the one that is in at the ultimate when you have to combine a Prāṇa and the mana Shakti that [union] rises. Then this udan which is the subtler type of Prāṇa comes [with that].

Sahaja Yogi: That's why, the other thing, I don't know, Mother, it's a incense stick, a doop, Indian doop, if you to meditate with doop. It's how it releases this.

Shri Mataji: Dooptas.

Sahaja Yogi: Yes. But small.

Shri Mataji: But too much of doop also is not good. Means there's a kind of bhoot there. They are not using the [guṇatīt]. Actual doop comes from the Mother Earth. All the fragrance comes from the Mother Earth.

Sahaja Yogi: *[UNCLEAR]* You were saying, Mother, the [causal] of the earth.

Shri Mataji: Yes, [causal], the fragrance is the [causal] of Mother Earth.

So doopas if it is real, chandhana, doopa, anything like that.

Sahaja Yogi: Mogra we have.

Shri Mataji: Aā?

Sahaja Yogi: Mogra we have.

Shri Mataji: Oh, yes, any flowers, any. These are innocent. These are the subtler element, subtler expression of the innocence. These can be jaḍa. The

seed, if then they are seeds, they are jaḍa. Then they become *[UNCLEAR* Chaitanya/Chitta]. And then they become fragrance.

Sahaja Yogi: And human beings are also like that. Before realisation, they are jaḍa.

Shri Mataji: They are very much jaḍa, *[UNCLEAR]*.

Sahaja Yogi: Mother, when, when people lead a Dharmic life, when they don't overuse sex? This releases the jaḍa?

Shri Mataji: It's much less.

Sahaja Yogi: It's much less. Therefore the reaction aspect is minimum.

Shri Mataji: They have a very light body, you see, even if they are fat. Say I am very fat but I can walk very fast.

Sahaja Yogi: I used to notice that in India you never felt the weight of your body but now I feel it tremendously [inert].

Shri Mataji: Because you see, the gravity, the Mother Earth. See, you have too much jaḍa in you.

So the Mother Earth [you feel it]. Otherwise you are very light. You don't feel much weight there. You see, supposing I, I will get very heavy, that's due to My vibrations sometimes. See, Mine it's the *[UNCLEAR* opposite/other side] side of it. Too many vibrations. I feel very heavy. But when there's a release I feel all right. In the same way when you have jaḍa within you I feel heavy because My vibrations start fighting against.

Sahaja Yogi: Yes, yes. Another way to release jaḍa is foot-soaking, isn't it? Another Sahaja Yogi: In the ocean is great.

Shri Mataji: Yes, but the best would be I should say to sit in the sand, put your feet up to this much inside, make a hole.

Sahaja Yogi: Hmm. That's what we do on the beach. We dig a hole and we sit up to here in the water.

Shri Mataji: That's a good idea.

Sahaja Yogi: It only [pricks] a little bit.

Shri Mataji: Do everything. This is all external. Internal is the sin type. They should desire, desire, `Let me be absolutely clean.'

Sahaja Yogi: That is the big thing.

Shri Mataji: Because that is the Kuṇḍalinī.

Sahaja Yogi: Pray to Gaurī, Gaurī is the Shakti.

Shri Mataji: Actually, you see, the movement is that from the subtle desire you then come back [so you nourish it] and then you become the desire. That is the subtle. What is that Kuṇḍalinī?

Sahaja Yogi: You said that the Kuṇḍalinī, last night you said, Mother, a very important thing which was “The Kuṇḍalinī is Your desire."

Shri Mataji: Gives you?

Sahaja Yogi: Kuṇḍalinī is Your, is the reflection of Your desire.

Shri Mataji: Of course.

Another Sahaja Yogi: That's the basics.

Shri Mataji: That is the basic. But then you become the subtler desire. The subtlest desire, the [subdued] desire, the desire that *[UNCLEAR* is/think] The Desire, rest is all un-, whatever it is not desire is all a darkness.

Sahaja Yogi: [Anecha].

Shri Mataji: Disappears. Only what remains is this, is the Kuṇḍalinī. And the Kuṇḍalinī is the desire to be one with Me.

Sahaja Yogi: That is the very start of it.

Shri Mataji: So it starts with one, which, which is in the gross, inert state. Then it goes into action.

Then evolution takes place. Then it becomes subtler and then ends in Divinity.

Sahaja Yogi: It's reflected in creation itself.

Shri Mataji: All right? [Divinity] is the enjoyer of the things.

Sahaja Yogi: It's reflected in creation itself, isn't it, Mother? Its reflection is...

Shri Mataji: Of course, of course, of course. The whole creation, the story of creation is like this.

That the desire of God becomes the creation, human beings are created, out of human beings. Then they are made into that higher [nature] that is God Himself.

Sahaja Yogi: And that desire to be that, is [in us].

Shri Mataji: Desire? That desire to be is the only desire. The rest of desires is just a joke.

Sahaja Yogi: Excellent.

Another Sahaja Yogi: Gñyāna also, the knowledge is a very important in achieving the evolution.

Shri Mataji: Gñyāna? Which one? The book?

Sahaja Yogi: No, I mean, the, the...

Shri Mataji: Awareness.

Sahaja Yogi: Yes, that, that knowledge.

Shri Mataji: Awareness, awareness. Awareness is the main thing. You see, awareness, as gñyāna is.

Sahaja Yogi: Chitta, you are talking, Mother, of.

Shri Mataji: Chitta. Enlightened Chitta. Enlightened Chitta is that one. See, Mine is an enlightened Chitta. You need decoding. I don't need any decoding.

Sahaja Yogi: Yes, yes.

Shri Mataji: I don't have pressure at. I don't even think.

Sahaja Yogi: But, Mother, as we grow, we become.

Shri Mataji: Mmmm?

Sahaja Yogi: As we grow more in You...

Shri Mataji: Yes, then you become like that.

Sahaja Yogi: We don't need those gross...

Shri Mataji: No, no, you don't need any gross methods or anything. You don't have to go through that long way if there's a straightforward [modus]. It's just there.

Sahaja Yogi: Yes, You know.

Shri Mataji: Straight there, you know, I know. You see, like this I know.

Sahaja Yogi: I know. That's a different one, Mother.

Shri Mataji: That's a different one.

Sahaja Yogi: That's a different category.

Shri Mataji: I say, “Do you know there's a bhoot in you?" “I know." “All right." “And that it is telling you all things against your Self and you are destroying everyone?" “I know." “You are destroying Sahaja Yoga." “I know."

Sahaja Yogi: Then what do they do about? Another Sahaja Yogi: Then the other day they come to the first place.

Shri Mataji: I know. He just thinks. [He's angry.] Ha, so now we have done this prostate. Did you follow, prostate?

Sahaja Yogi: Yes, that's a very subtle one that, Mother. You started with the most subtle one of all.

Shri Mataji: Aā?

Sahaja Yogi: You started with the most subtle one of all.

Shri Mataji: You started that way. I mean, you said, “You start with this Chakra as it's down, at least..."

Sahaja Yogi: No, no, no, no, no, I'm saying, how beautiful.

Shri Mataji: Is it?

Sahaja Yogi: I'm saying how beautiful.

Another Sahaja Yogi: So then, then the endocrine glands of the Āgñyā are all of Chaitanya. Is that what You were saying?

Shri Mataji: No, no.

Sahaja Yogi: No.

Shri Mataji: You see Āgñyā and Prāṇa again, I say.

Sahaja Yogi: Prāṇa, ha.

Shri Mataji: You see, anything that is produced by Chakras is not the Chaitanya, not. Is only Kuṇḍalinī.

Sahaja Yogi: Is it Chaitanya? Another Sahaja Yogi: Prāṇa.

Shri Mataji: You see, now see. Kuṇḍalinī is the Chaitanya. This is Prāṇa, that is mana Shakti and there's a Kuṇḍalinī is the combination of all these.

Sahaja Yogi: From this, Mother, if You follow that, the whole Universe is created by the Chitta, the Divine, is held, because Chaitanya comes from Chitta.

Shri Mataji: That is Brahmā. You see, the Chitta of the Divine is nothing but Brahmā.

Sahaja Yogi: And it is held by the Chitta. It is [get owned] by the Chitta.

Shri Mataji: But there's nothing like held or anything, I tell you. It's just there. What do you call? There's no language for that. Then just say, it's, it's a built-in process, you see. Do you say that the green colour held is held by leaves?

Sahaja Yogi: The held in different sense, Ma.

Shri Mataji: But that is what I am not able to express Myself you see, that it is part and parcel.

Sahaja Yogi: In Sanskrit could we use it, Mother?

Shri Mataji: Gñyāna, *[UNCLEAR]*.

Sahaja Yogi: It's just think to *[UNCLEAR]* of the whole thing.

Sahaja Yogi: We could say…

Shri Mataji: *[UNCLEAR]* is adharma. Dharma.

Another Sahaja Yogi: Dharma also is the same, You say.

Shri Mataji: Dharma is the same thing. Permeating. It's the same thing. I mean, still the duality remains in English language, you see.

Sahaja Yogi: So You can say *[UNCLEAR]* sarva, Chitta, bhakta.

Shri Mataji: Dharini.

Sahaja Yogi: Yeah, but something that is contained by, held by we *[UNCLEAR* should/issue]. Because for You it is sarva Chakra dharini, but we are sarva Chitta bhakta. We are the ones are held by that Chitta.

Humble one. You are sarva Chitta dharini.

Shri Mataji: Sarva Chitta dharini, that's all.

Sahaja Yogi: Aap hai.

Shri Mataji. Ha or kya?

Sahaja Yogi: Hamlog.

Shri Mataji: Aaplog kya ha?

Sahaja Yogi: Sarva Chitta bhakta.

Shri Mataji: Ah, yeah. That's the way. Take an employed and employ.

Sahaja Yogi: That's why.

Shri Mataji: But this duality doesn't give you any sense, whatever it may be.

Sahaja Yogi: Ha, that is there.

Shri Mataji: This duality has to act. Achcha, so we come now to...

Sahaja Yogi: Nābhī or Swādhiṣhṭhān?

Shri Mataji: Now you see, the thing is first is jaḍa.

So from the jaḍa first thing starts is jaḍa comes from all the five elements. What I was trying to tell you that even from mana the jaḍa comes in. Even from mana, from the mind, jaḍa comes in.

Sahaja Yogi: Mana is the left side.

Shri Mataji: Left side.

Sahaja Yogi: Desire.

Shri Mataji: Emotions. From emotions also the jaḍa comes in. Emotional energy is also from the matter.

Sahaja Yogi: Oh, I see.

So I's, it's the totality of, of the whole sympathetic system, of left and right.

Shri Mataji: Achcha. Comes from. No, it becomes.

Sahaja Yogi: Yeah, it becomes. Yes, it, it, it has its source.

Shri Mataji: Inertness, it's inertness. But you see, you say matter. Matter is very, is very scientific.

Too much divided.

Sahaja Yogi: Then we shouldn't use it, sounds [very odd].

Shri Mataji: Inert, inert.

Sahaja Yogi: So jaḍa don't say they won't understand.

Shri Mataji: You see, your emotions can become inert.

Sahaja Yogi: Oh, yeah.

Shri Mataji: From inert emotions... Now what has happened in these mad people? Emotions have become inert.

Sahaja Yogi: That is why.

Shri Mataji: If you can make them alert there will be normal people.

Sahaja Yogi: So for them, they need Prāṇa, Mother, these people.

Shri Mataji: Absolutely, nothing but Prāṇa.

Sahaja Yogi: How to give them Prāṇa, Mātājī?

Shri Mataji: This is what?... If you teach them Prāṇāyāma.

Sahaja Yogi: Prāṇāyāma. But they are not realised. [Their jaḍa] is not *[UNCLEAR]*. Another Sahaja Yogi: They could get the awakening even with your person.

Sahaja Yogi: Some [I've given], some miss a lot to action.

Shri Mataji: See if you make them run.

Sahaja Yogi: Exercise.

Shri Mataji: Exercises. All these things.

Sahaja Yogi: Jaḍa, do You spell like this Mother?

Shri Mataji: J a d a.

Sahaja Yogi: I think that in Sanskrit is *[UNCLEAR]*. One d or double d?

Shri Mataji: [One of it]. Jaḍa.

Sahaja Yogi: Jaḍa.

Shri Mataji: Ja means which is born and da. Da means inert.

Sahaja Yogi: It's, it's the sort of totality of the precipitate, if it is the word of the inert material from these five elements on the right side and from mana Shakti on the left side.

Shri Mataji: But one of the five elements is in the left hand side.

Sahaja Yogi: [Ether]?

Shri Mataji: Yes, of course. Emotions come from ether.

Sahaja Yogi: From?

Shri Mataji: The ether.

Sahaja Yogi: Really?

Shri Mataji: Of course. Where is ether within us?

Sahaja Yogi: Ether is here, Āgñyā.

Shri Mataji: Not Āgñyā. Left side.

Sahaja Yogi: Not, not Viśhuddhi?

Shri Mataji: Mmmm?

Sahaja Yogi: Not Viśhuddhi. Āgñyā.

Shri Mataji: Viśhuddhi is left side. You see, Kṛiṣhṇa was, was a left-sided fellow, you know?

Sahaja Yogi: That's why He's dark.

Shri Mataji: Born at twelve o'clock in the night.

Sahaja Yogi: On that Kṛiṣhṇapaksha.

Shri Mataji: Kṛiṣhṇapaksha.

Sahaja Yogi: So ether is here.

Shri Mataji: Ether is at Viśhuddhi.

Sahaja Yogi: Ha, absolutely.

Shri Mataji: Ether is at Viśhuddhi, we should say.

Sahaja Yogi: Yes, that's right.

Shri Mataji: But actually we call it, it's a combination done. The ether is at every Chakra, on the left hand side.

Sahaja Yogi: I see. But predominates at Viśhuddhi.

Shri Mataji: So it is at every Chakra, ether. It's the counter action.

Sahaja Yogi: Ha.

Shri Mataji: Of all the four elements, at every Chakra.

Sahaja Yogi: That's interesting. Does this mean, Mātājī, that the amount of shravan means the...

Shri Mataji: Aā?

Sahaja Yogi: Shravan means left-sided Ma? Kṛiṣhṇaji's month?

Shri Mataji: Which one?

Sahaja Yogi: Shravan.

Shri Mataji: Shravan.

Sahaja Yogi: Shravan month, *[UNCLEAR]*.

Shri Mataji: Shravan month?

Sahaja Yogi: That is the left-sided in [the whole year].

Shri Mataji: No, no, the whole month you cannot say so. But it stays in a way because it is with rains and this and that.

Sahaja Yogi: In the monsoons people get very left-sided.

Shri Mataji: Ha, very left-sided. But you see now, you can see ether becomes the left-sided, all right? And carbon is

the central one. Oxygen right hand, hydrogen we develop these things.

So the ether...

Sahaja Yogi: Carbon is in the center.

Shri Mataji: Carbon is in the center.

Sahaja Yogi: Oxygen on the right.

Shri Mataji: And hydrogen on the left.

Sahaja Yogi: And helium, so giving the ether. Thank God, it's all so simple.

Shri Mataji: As *[UNCLEAR]* as that.

So hydrogen comes to us from moon.

[Aside:] He's going to Arneau.

See *[UNCLEAR* now/how], the earth was created and was first taken close to the moon.

So it froze.

And when it froze then they brought it *[UNCLEAR* up/away] because the moon is the cause of freezing, brought it closer to the sun. Then it got the oxygen in it. When it got oxygen it was brought in the center.

So it had oxygen and hydrogen according to the proportions needed to create the life.

Sahaja Yogi: Mother, they say the moon was ung out from the earth.

Shri Mataji: Flung out from the earth? In a way it is ung out, but that part of moon was frozen.

In a way, I mean, you see, unging out also is a relative term.

Sahaja Yogi: Which was ung out of which we do not know.

Shri Mataji: That's the question. Which came first is the `but', that's...

Sahaja Yogis: Yes, yes.

Shri Mataji: So the moon, the earth was closer to the moon first and then it separated. Very close.

It sucked actually hydrogen and that's how it has no temperature. Or where is the hydrogen coming from? What is the source of hydrogen?

Sahaja Yogi: You said the moon, Mātājī.

Shri Mataji: Hmmm, moon because I said it. It's the earth because earth has sucked that hydrogen from the moon.

Sahaja Yogi: They said that the sun is ninety per cent hydrogen, Mātājī.

Shri Mataji: It is. It is ninety per cent. But the hydrogen that is on the Mother Earth is from the moon.

Sahaja Yogi: And then likewise is the oxygen from the sun?

Shri Mataji: From the sun.

Sahaja Yogi: Then water is a combination of left and right side.

Another Sahaja Yogi: And the evolution is a combination of all four.

Sahaja Yogi: And and proteins are...

Shri Mataji: No, no, carbon. First the Mother Earth creates carbon. You see, [if She puts]... How carbon is created by Mother Earth, it's very interesting. She does it and producing carbon within Herself and that carbon becomes the holding bondage between hydrogen and oxygen. And that's how the life starts.

Sahaja Yogi: Then Mother Earth, Mātājī, must then be like the Ādi Devī.

Shri Mataji: Of course.

Sahaja Yogi: And the other Goddess, how do you say? [Ādi Sanjuni, Ādi Sanjuni is there].

Shri Mataji: This is, is the first Yogini, we should say.

Sahaja Yogi: Ādi Yogini.

Shri Mataji: Sahaj Yogini.

Sahaja Yogi: No, no.

Shri Mataji: Now, but I must say, I must give, I have given a name to, to Tony's mother or to Tony's baby. And what is the name I gave? That `a' are for him, Anthony and `d' for [Dolly]. Now tell Me what name is the best?

Sahaja Yogi: I, second one.

Shri Mataji: And he is the first Sahaja Yogi.

So...

Sahaja Yogi: Aditi name. Ādi is something.

Shri Mataji: Ha, Ādi is something.

Another Sahaja Yogi: And is needed.

Shri Mataji: The first name of the Goddess.

Sahaja Yogi: Aditi is the first name.

Shri Mataji: Aditi is there, the Mother one.

Sahaja Yogi: Durgā.

Shri Mataji: Adya.

Sahaja Yogi: Achcha. Oh, what a name [it is].

Another Sahaja Yogi: [Must give] some names from the Mother Earth, Ma.

Shri Mataji: Tell Me from, from where to where is going? We have started on what?

Sahaja Yogi: But You see, there's a reason Mātājī. We are supposed to be doing Pūjā to Mother Earth on Monday. That is why is necessary.

Shri Mataji: That is your own idea.

Sahaja Yogi: There wasn't mine. It was their idea. I told it.

Shri Mataji: On the [Hindi] we are here, we can have.

Sahaja Yogi: Then we are doing something else.

Another Sahaja Yogi: Mother, Mother, you are coming to the next Chakra after Mūlādhāra. It seems to be introduced this idea of ether.

Shri Mataji: No, you developed on this. I've given you the basics. I mean, if I go on to talk to on one Chakra I can talk for the whole day in this house.

Sahaja Yogi: Yes, yeah, sure.

Shri Mataji: Now, Swādhiṣhṭhāna.

Sahaja Yogi: Not, Nābhī, surest thing.

Shri Mataji: Swādhiṣhṭhāna. Let's see, the Swādhiṣhṭhāna. There's another element. Now you started with [two, three element], the Mother Earth element. And it started. Swādhiṣhṭhāna it started.

One side, another side more. You see, in every Chakra there's a...

Sahaja Yogi: There's a, a place for each Chakra.

Shri Mataji: There's a, a, what you call the, we can say the juxtaposition. But only one thing is in juxtaposition. Is the moon. And the subtlest of the moon is the Ātmā, the Spirit. Because it is the witness. Moon is the witness of the Mother Earth.

Sahaja Yogi: *[UNCLEAR]*.

Another Sahaja Yogi: Yes.

Another Sahaja Yogi: In vibrations.

Shri Mataji: In the vibrations. He's just enjoying.

Sahaja Yogi: *[UNCLEAR* No matter/For a doctor] is a very subtle thing.

Shri Mataji: No, no, I am not for doctors. But for Sahaja Yogis I am saying.

So in everything whether it is earth, it is a moon, there's a... When the moon comes, you see, the Mother Earth goes into [joy].

Sahaja Yogi: She rejoices.

Shri Mataji: She rejoices. When it is a, any moon has big [influence] on Mother Earth, on water, on every condition.

Sahaja Yogi: On [assi].

Shri Mataji: Everyone. I mean all these lunatic asylums and all that.

Sahaja Yogi: That's the opposite.

Shri Mataji: Opposite.

Another Sahaja Yogi: But I, it was very few.

Shri Mataji: Too much of it.

Sahaja Yogi: Bring here the other ones.

Shri Mataji: Like there are too much of lunatics. I mean, when lunar comes on the [earth]. You see, people knew about it, definitely.

Sahaja Yogi: When I was a young registry, Mātājī, the person who was on duty on the full moon night, all had a very bad time. Used to avoid, used to change rather duties in order to avoid full moon.

Shri Mataji: Full moon. On, on also the Amāvāsyā.

Sahaja Yogi: Ha, Amāvāsyā, another bad night, that is true.

Another Sahaja Yogi: Amāvāsyā.

Shri Mataji: That is one of the worst. It is again the both sides. Everything has two sides, you should see. Full moon is as bad as Amāvāsyā.

Some people have bad effects on Amāvāsyā and some have on full moon.

Sahaja Yogi: On Amāvāsyā, Mātājī, we want to do a Kālī Pūjā.

Another Sahaja Yogi: This thing I was saying. All to bath in the big Yamuna.

Another Sahaja Yogi: Yes, yes, we are laughing with you not at you.

Shri Mataji: Yes but instead of Kālī Pūjā, Bhairava...

Sahaja Yogi: Because that is... Bhairava.

Shri Mataji: But you see you can do Bhairava's Pūjā and then Kālī. *[UNCLEAR]* the central nervous system.

Sahaja Yogi: The another worshipped it was Kālī. Right?

Shri Mataji: I don't have any objection to attend it if the Param-Chaitanya is ahead. Bhairava, to worship Bhairava, means to be a complete...

Sahaja Yogi: Pure.

Shri Mataji: Only children can do it.

Sahaja Yogi: Only thing Bhairava, He [was] simple and wise. For Pūjā there is a very beautiful environment propitiating the, the act of Bhakti ? Another Sahaja Yogi: But I, but I used to feel the vibrations lift a little when I

used to do the Kālī Pūjās here. I must say there was tremendous joy which come up here because there was something tremendous here.

Shri Mataji: He's the killer of all the anti-joy.

Sahaja Yogi: Tremendous joy.

Another Sahaja Yogi: So it would be good for. It's right Mūlādhāra coming.

Sahaja Yogi: Mother what is the element of Swādhiṣhṭhāna please? You said that it is in juxtaposition with?

Shri Mataji: No, no, all elements.

Sahaja Yogi: All of them are there?

Shri Mataji: Yes, have to.

Sahaja Yogi: Which are predominant?

Shri Mataji: Sūrya and moon. One side is Sūrya; another side the moon.

Sahaja Yogi: And in the center?

Shri Mataji: In the center is the subtler side of the Mother Earth. [Hindi.]

Sahaja Yogi: What is the element that protects the moon, Ma? Another Sahaja Yogi: Moon is the *[UNCLEAR]*, it controls all of them.

Shri Mataji: All right.

So now we come to the... what is the Arneau called this?... I told you yesterday was [Hindi].

So left and right. [Hindi.]

Sahaja Yogi: You can go on distribute, supply anything, yes or no? Another Sahaja Yogi: Paul said to me I will supply the *[UNCLEAR]*.

Sahaja Yogi: What do you produce, what do you produce in the winter? What do that [whole] moon that is produced giving the [words] of the? Another Sahaja Yogi: A beautiful moonstone is produced.

Sahaja Yogi: In the word of *[UNCLEAR]* manner.

Another Sahaja Yogi: Namely in the art of *[UNCLEAR]*.

Shri Mataji: And is...

***Contents: 1982-07-11*, Public Program, Day 2, From Heart to Sahasrāra, Becoming the Knowledge, Derby, UK**

I'm happy that DoctorWarren could explain to you those Chakras about which I told you yesterday, because in one short lecture you can't cover all these points. And if you get your Realisation and you progress well, then you can listen to My tapes which are in hundreds and you can understand the knowledge is vast like ocean. As I yesterday told you that when you get enlightenment, you become the knowledge. It's a very confused statement; people don't understand what does it mean to `become the knowledge'.

The other day a gentleman came to Me and he told Me that “My Guru has already given me the knowledge." I said, “How?" “Because he told me, `I've given you the knowledge.' " I said, “But still, how is it, it is knowledge? How do you believe that he has given you the knowledge?" So he said, “No Mother, he touched me on my forehead and I saw a light." I said, “Then still, you can see the light otherwise also. How is it you have got the knowledge?" So he started thinking about it. He said that “What should happen If I get the knowledge?" I said,

“See, this is another person sitting next to you, he is a Sahaja Yogi. He knows what Kuṇḍalinī is; also he knows how to raise your Kuṇḍalinī. He knows what is your problem, what your Chakras are catching. He also knows what are his problems." So he asked Me, “How does he know?" I said, “He has become the knowledge." As I yesterday I told you, that on your central nervous system you should be able to feel others and yourself which is inside.

Now for example, a person who is mad. When he started becoming mad, he did not realise. He did not realise that he's already possessed and that he's getting mad and that he should have treatment, nothing he realised. Gradually he became mad and he is in the lunatic asylum. Or a person who gets cancer doesn't know he has developed a cancer, till they say that “Now it's hardly fifteen days you have to die." This is on physical level, mental level. A person who is egoistical does not know that he is egoistical, that he's oppressing others and others are part and parcel of himself. Like Hitler never realised that he was such a horrible devil, that he will go to hell and those who were around Hitler that time did not realise that a devil is growing in this society. That a devil is going to come. Nobody realised everything and suddenly after eleven years he comes back as a horrible, destructive, Satanic force.

So if you read the books written before his regime, they were actually supporting him. Because they said that “We are getting decadent, our society is decadent and we need a person who'll take us to austerities and who

will make us little discipline; we need discipline, we must have discipline” and so they liked him.

Even the young students liked him, when he went to the universities he charmed them by saying, “We must have discipline, we should be austere, we should not eat this food, we should not eat that food, we should become very austere." And that thing was very much appreciated by the young people. They did not realise whether this man was a devil or not.

Now knowledge is such that in that you see the subtle of yourself and subtle of others. And the subtle of ourselves and the subtle of others resides in the Chakras. These are the Chakras which reside within us and these Chakras are the ones who cater to the need of any emergencies we have.

For example, if we have to run very fast, we can run very fast. Our heart starts beating, the sympathetic goes into action, then these Chakras bring it back to normal by supplying proper energy to that part which has been overused. They bring it back to normal.

When, say, on the left hand side and the right hand side we have two extraction of the sympathetic nervous system.

When this extraction is too much on the Chakras, these Chakras get separated and there is a deity in every Chakra. And when that deity sleeps off, there is a separation from the whole, because that is how we are connected with the whole. You see, supposing this is the vertebra, it's like this, once it is broken off, you are broken off from the whole, the control is lost.

Once the control is lost, then you start working on your own. Once a cell starts working on its own, it becomes malignant. It loses that relationship with the whole which gives it balance, a sense of proportion and coordination, how much to grow and that's how cancer is set in. In the society, also, nowadays because the society is becoming ego-oriented, we go on saying, “What's wrong? What's wrong in this, what's wrong in this?" As today, just now Warren was telling you that there is a Dharma within us. We have got ten Dharmas, the ten sustenances within us, Ten Commandments that we have to obey. Why? Because if you go out of them, then you go into an imbalance. And if the imbalance is set in, then you can develop any one of these problems which come out of the imbalances. That is how we cannot cure cancer, because we cannot make the cells go back to its normal condition. At the most what we can do is to remove the cells from the body who start attacking others and making them also ego-oriented. But we cannot make them again normal cells.

Only through vibrations you can do it, because when you vibrate these centers they become more powerful, they expand their aura so the circle that was small becomes bigger, engulfs both the sides and bring them together and again the deities are awakened and the cells start getting the message from the whole.

This is a simple principle, which is a subtle principle, but a person who gets the cancer, how will he know he's got a cancer or not? Because there is no way of knowing it. But when you become the knowledge, you start developing this sensation on your fingers and there are

decoding words, decoding language which tells you which are the centers catching and how to cure it. Immediately you are on the alert, because you know it's happening. Now people who have, say, mental problems, they don't know they have mental problem.

Some of them they are not at all aware, but then they realise they have a mental problem. A psychiatrist came to see Me, today only he was with Me, he is a Sahaja Yogi and he treated some mentally handicapped person. He's a psychiatrist, so he finds always this finger shakes before Me.

This finger [left ring finger] and this thumb [left thumb]. If this is burning and this is shaking that means there's a possession working on you, a simple thing like that. Now this person can clear it out because a Sahaja Yogi takes hardly two minutes to clear it. But the person who has got it can be also cleared out, because once you know what is the center and if you know the deities whom to awaken and if you know how to awaken them, you get it cleared out. That's how mad people can also get cured.

Now here there's a mad man on the road, just now when he was speaking I was in the room, he was saying, “You must seek Christ, you must seek God" and all those things on the street. He is himself mad, you see. A mad leading others into what, a lunatic asylum? He's talking like that loudly, “You must seek Lord, you must seek God." How? How do you seek? Just giving lectures, “Seek the Lord, seek God” is this the way? If I say now, “Put your attention inside." Just now you are sitting in front of Me, a simple thing, your attention is towards Me, now turn your attention inside.

Can you do it? You can say, “Yes we are doing it." That's not. That you are not doing, at all.

Something has to happen within. Unless and until something happens, your attention cannot go inside.

Many people just believe into something false, go on believing into it till they suffer from it. I've seen people who have been like that. Fanatics. In their old age they become, absolutely either violent people or useless or aggressive or boring.

Some of them become really half mad and some of them full mad.

So believing into anything without the knowledge about it is a very blind game; now sustenance has to be there.

Now we can say in India we have Sikhism which is a very great religion. But the people who belong to Sikhism are not supposed to drink at all. After all, Guru Nanaka when He said, “You are not to drink” because He knew about it, He knew what He was saying about it. He was an incarnation of the Primordial Being. He was the Primordial Master and when He said that “You should not drink” now I'm told that in England the Sikh people drink more than the, even the Scotland people. It's most surprising. Imagine! See about Islam because Mohammed Sahib and Nanaka Sahib are the same, same persons, He said the same thing. Moses said the same thing, ask the Jews, what are they doing? He said, “Strong drinks, alcohols, all must be avoided." At the time of Mohammed Sahib there were no cigarettes, so He didn't say about cigarettes so Moslems say, “Oh, cigarettes are all right, doesn't matter." You see these things are so, there are so many loopholes. In India we

have communities and communities like that, where you go and see, you'll be amazed. Like Jains, they won't eat meat but they will drink. Can you imagine? Drinking goes against your awareness is a fact, while Mahāvīra has talked about nothing but Chaitanya. Buddha never said, “Don't eat meat." That doesn't mean that you should eat meat, but what I'm saying He never talked on that, that's not so important. He Himself, Buddha Himself died because He ate a raw pork. He went to a house, you see Buddha was a realised Soul, a great personality, He was an incarnation and He went into a house where, as a guest.

Suddenly He appeared there and the person was just a hunter and he said, “Oh Buddha, You have come to my house, what should I give You, what should I do?" He said, “I have very little time, whatever you have, you give me." He said, “I've killed a wild boar, but the food is still to be cooked and it will take some time." He said, “All right." He said, “Give Me half of it” and He died of that.

Even in Jainism, you'd be surprised, that Neminath is the first one who was the cousin of Śhrī Kṛiṣhṇa.

In his marriage there was a big function and lots of birds were bought. I mean they were Jains, imagine! And the birds and all that, when he saw so many killed, he got a kind of feeling against it and he said, “All right, no more of this." But they have gone to another extreme of vegetarianism, I mean they can be very cruel themselves but they don't mind that, they can be vegetarians, to such an extent that you can't imagine.

So this is the problem with the religion has been, that you go to extreme of things. First thing about religion is

not to go to extremes, that's the basis of every religion. For Christianity you know Christ has said, “Keep away the dead, have nothing to do with the dead” He took out the dead spirits and put them in the pigs and put the pigs in the sea. You all know that story, but every church has got all the dead lying under their feet.

You don't know how to walk in the church, they're all lying down there. Luckily I have been living or unluckily, I should say, living next to the church all the time I've been in London and in the night I see all of them coming out of the graves and I say, “Oh God." And here the children sit down, pray to God and everything. Now, what do they get? No wonder Catholicism is bringing such a catastrophe, all these so-called Christianity. I mean the basics of every religion has been contradicted by the disciples. Because Christ is the One Who controls the dead. He's the One Who sucks the effects of the dead and He absolutely banned them everywhere you go, any church. Only in India they don't do it somehow, I don't know how they have managed it.

But here every church you go there's dead bodies hanging around. Sahaja Yogis now don't go to church, because they are frightened. Once a Sahaja Yogi is caught up by a spirit, immediately he knows, he gets headache, he doesn't want to go there. But a person who is not a Sahaja Yogi, he goes to a church, he catches the bhoot, he does not know.

One of My disciples had a mother who was a Catholic lady, very staunch Catholic and she was M.A.

in mathematics and things like that, you see, a very staunch Catholic. She came to see Me and I told her that

“You should give up all this fanaticism about church-going, because in the church there are all these dead bodies placed there." But she wouldn't listen to Me. Now then after old age, about sixty years they go mad actually, really and she started using her bidet for W.C. and all sorts of things, problems arose.

But she would get up in the morning of Sunday, get ready and go to church and come back very nicely.

Every time it was Sunday, she would get up, she would dress up well, go to church and come back. As if somebody was taking her down there and somebody was bringing her back. But one day it happened that she got lost and this lady telephoned to the police and said, “What to do now, this lady is lost and my mother is lost” and she got very worried. She telephoned to Me I said, “You'll find her, she's all right, but she'll come [back]." After three days she came from somewhere, God knows, came back and again she started the same things, using this for that and that for that and absolutely like a mad person, but the police said, “Nothing doing, now you better put her in the old one's place." So she put her in one of these places where the old people live. Now this Marie, My disciple she told Me it's most amazing, the people who are there are mostly Catholics or Christians. They are all mad like this, the nurses are having a bad time, but all of them get ready on a Sunday and go to a church which is specially made for them. Can you imagine? Just look at this obsession, it's an obsession with us, we must know these are obsessions, we are not free people; we are slaves to these things.

Now once you come to this side, the other side of slavery are our habits, they enslave us. They enslave us, I have seen now people, we once had a minister sitting with Me and Russian minister, very powerful man otherwise. And suddenly he got up, he was the host, suddenly he got up, “Oh I must go." I said, “What happened?" He said, “I am a sick man." I said, “What's the matter with you?" “You see, I am a football fan and I can't sit any longer, the football match must have started." Imagine, he was the chief host and so many people were there, he just couldn't sit. I mean, he could not glue himself to the chair and he wanted to get up and walk and he just didn't know what to do. I was amazed, he had no poise, no control over himself, I mean I just thought must be some possession from this football is coming to him, or what is it? But such a grownup, mature person behaves like this! This is nothing, other habits that we have are much worse, are much worse and they all enslave us, we can't live without them.

Anything that is in this world is for us, we are not for anything. If anything can enslave us, we should know that we are the masters of everything. If a chair doesn't make you comfortable or uncomfortable, it's not important. What is important is that this doesn't enslave you. Nothing should enslave you. The one who is a king, who is the emperor, is least bothered. If you put that person on the street, he'll sleep well. If you put him anywhere he'll be happy, that's the person is the real emperor. But not the emperor who cannot live without complete comfort. If he's slave of the comfort, then he's not an emperor.

All these things we can learn when our center here, Nābhī Chakra, is awakened. When the light spreads in that area, in the Void, the green colour you see, then what happens immediately in that light you don't see anything but the light works. Enlightenment is such that it goes into action, the light itself acts, can you imagine? The light itself act in you.

We had a doctor who was very fond of wine, drinks and all. I never tell you, “Don't drink." I never say that, because I don't want people to run away. No, no, nothing of the kind. You sit down comfortably, just take your Realisation, then we'll see about it. This fellow gave up his drinking next day, but then he had to go to Germany and he thought, “I better try some special type of wine” that he had liked.

So he tried it and then he vomited, vomited, vomited, couldn't bear. He said, “The taste was so bad; I never tasted such a dirty thing." I never told him, it just happened, he saved money, he could buy things out of the money he saved, he was a free bird.

But I don't have to tell you this, because we are so addicted and identified, that even if you say that “This can happen with Sahaja Yoga” many people will refuse. Our identifications have gone so deeper into our beings, so deeper into our being, our hangs-up, as we say, that we are not free people at all, we might be free politically all right, but this is so superficial.

The Spirit is the only thing that is free within, which has no hangs-up, which has no habits, which does not stick on to anything, is completely detached and emitting joy to us. It is a thing that makes our Spirit, our attention so

enlightened. Now enlightened attention, as I said, is not the attention that we understand, that “There's a light, we see the light” nothing of the kind. But with this enlightened attention our awareness becomes enlightened, so that we start feeling other people on our hands.

Like the other person here sitting yesterday you must have seen. The other day one gentlemen was here and he told Me that “Your energies are different from mine” nothing of the kind. If you have negative energies for the time being you will shake, definitely you will shake for a while, no doubt, if you have too much negative energies. Like once we had a program and some people were there, some Brahmins and they were very much against Me because I'm not a Brahmin. They said, “We'll not have Mother's program." I didn't know all these stories, they never told Me, but they came before Me and started shaking like this, so I said, “Why are you shaking so much?" They said, `We are Brahmins and we understand you are Shakti, so we are shaking." I said, “But why are you shaking? Nobody is shaking here." So they pointed out to other four people, they said, “See, they are also shaking." So I said, “Go and find out from where do they come." They went and found out that they came from lunatic asylum. I said, “Relatively you should see who are shaking, you and these people, nobody else." So if there are negative forces you do shake a little bit, but we should see again what's the use, what's the use of getting this energy within us? That is very important because we are utility-oriented people. Everything must have a utility, as it is what do we have which has utility in

this world? Nothing. If we had something which had real utility we would not hanker after anything else. The hankering is still on.

So we should conclude that whatever we have got now is not the ultimate. The utility of the ultimate is that once you get the ultimate, everything becomes relative, everything becomes relative. That is, what becomes relative is all these changing things, all those things which are perishable, all those things which try to enslave us, all those things they are attractive outwardly, but inside they are like snakes and what we become is a detached personality.

Now, our idea about any understanding about religion is that we go to a limited church and a limited society, a limited club, do exactly the same, wear the same sort of dresses, wear the same sort of cap or things, we belong to one religion. There is nothing like that, it's all manmade, you see it's all artificial.

Whatever is manmade is artificial you know that. They write it down for, see, also for all the clothes that are made by man, they said “manmade material” so it is not God made. It's we have made our own religions and we are fighting for it.

The religions have something within yourselves, within your being. It has nothing to do with what sort of nonsense we have made out of it.

This is the quality of a person, like carbon has got four valences, you have got these ten valences and if these valances are missing then what happens, that as in the combination of chemical combinations you have seen, if one valence is missing, it becomes a negative and then it

combines with another so there are negative and positive valences.

So if you have some additional valences with you, then you will jump onto other people; if you have less, then you catch some other people. It's exactly the same as it happens in a chemical compound.

Now these valences within us are to be there to give us a balance and that's what Warren has told you what it means. When you get your Realisation, your Dharma, your Ten Commandments get enlightened.

Means you get empowered, you become that. You go beyond religion; you don't have to follow it, you just become. You become so integrated. For example, some people it doesn't suit to have, say, potatoes, they will just don't like it, just don't like it. Before Realisation it is just the other way round, if they are not suppose to eat potatoes, they'll eat potatoes more. After Realisation, you just won't have it, you won't have it, you are so integrated. The sustenance within us gets so enlightened that our priorities change completely; we start judging everything on vibrations. Now, we have a little girl you have seen, Olympia, she eats very little, practically solid food she does not eat.

But if I give her anything to eat, she will eat, from nobody else; but if I give her anything she'll ask for more and eat. It's surprising, she understands vibrations. If you understand vibrations then it is very easy to retain your valences intact, because you are empowered.

Not only that, but you just don't like anything else, because you like the vibrations to flow. When the vibrations are flowing, the Spirit is emitting through your

central nervous system the joy that is the quality of your Spirit. The joy you start feeling and when you start feeling the joy, then you don't want to give up for anything, just don't want to give up. You want to enjoy it.

So you become the knowledge and the attention which is actually placed in this area and sustained by your liver becomes enlightened.

As I told you yesterday, sitting down here, if you want to feel about anyone you can find out. Like just now I saw one gentlemen sitting a little awkwardly, I thought, he is not sitting properly, I said, “Sit properly." But then I paid attention to him, I knew he is not well so I said, “Have you got any problem?" “Yes." I said, “Then it is all right." So with attention you immediately understand a person, what's the problem with that person is. Sitting down here you can find out the vibrations of anyone. For example now we can say... if there is no Russian... that... should I say or not?... Brezhnev is possessed, he is a possessed man, just like *[UNCLEAR* that]. I'm going to Russia, I hope I'll take out his possessions. He's a possessed man. They are dealing in these parapsychology. Same in America it's going to happen, it is going to happen everywhere where you try to practice these spirit, spiritualist and all that what you call Preta Vidyā, Shmashāna Vidyā and all that which is absolutely horrible things, calling them with sophisticated names like parapsychology and call it by, what other names do they call it? Charismatic movements and all sorts of... it's nothing but spirits, nothing but spirits. All these people are practicing nothing but spirits. They bring out the dead spirits and call it the Holy Ghost, imagine? This charismatic

movement is another horrible thing, I don't know how to tell you about it, but I must say that the whole science has become so subtle that nobody knows that this is the scorpious, horrible, Satanic force that is working through us and attracting us to these spirits.

Some people said, “Mother there are good spirits and bad spirits." But why, why, why go to the dead? You don't know which is good and which is bad. How will you know? Why go to the dead? We have to be in the present, we don't have to be in the past.

So that's one thing happens when you lose your valences that you go to the left. When you go to the right, you may be very austere, you don't eat that food, that food and this and that, you may become a very ego-oriented person. You go to another side, called supraconscious, the collective supraconscious.

The left side is the collective subconscious and the right side is the collective supraconscious.

When I started My work I decided not to talk about these dead spirits. I said, “I'll manage without that." Was not possible.

For three years I never talked about it. I didn't talk about the deities, I didn't talk about anything.

For three years I managed it, but then among us a lady came who was practicing all these things and she possessed so many people. And thousands of people used to go to her. She would tell them which horse will come first, where is the money lost. All sorts of things and thousands of people used to throng, you know. Here we have so few people but let some Tāntrika come in, you won't be able to control your traffic.

This will be the condition, with any one of these horrible people coming in. And this lady really made Me talk of these things and that's what it is. They exist.

So going to the left or to the right, you go into a problem, because you enter into an unknown area which is very dangerous, very dangerous.

For your information cancer is caused by left side movement. I've not seen one patient of cancer who has had no such experiences. For example, these fake Gurus, or these initiation by these horrible people, or reading the books of these left-sided things like what's his name, Rampa Sampa and all these so-called Buddhist, any one of these things can cause cancer.

And recently I saw a very good film on this, by your television here, English television. They showed where some doctors had made an investigation and they said that they have seen that the cancer is triggered by some proteins which they recognize; they call them as 52, protein 52, 58, that's the name they give. But they recognized that they are coming from the area which is built within us since our creation.

So it is the collective subconscious and they have pictures also, photographed.

So now, though I mean what I have said about ten years back, they are saying now. But they are reaching that point they have to just cross the limit. They have to just get their Realisation. And because the doctors cannot reach that area themselves, they cannot cure cancer, at the most they may stop it, they may try to reduce the possibilities and all that, but complete cure they cannot give, because they cannot extract people from that area

altogether. They can always be drawn into it, if that area is going like this. It's very interesting to see how these things are caused within us.

This center is one of the most important center because it gives us our seeking and our pure seeking should be for Spirit, for nothing else.

But those people who go wrong, all that you see in such people who have bent their forehead before wrong people, they develop a ridge on their head and there are eleven centers here which just come up, like a ridge.

And these are the eleven centers called as Ekādaśha Rudras which are responsible for the destruction, the ultimate destruction. The Kalaki as called as, or what you call the Maitreya or the coming Christ on the white horse. That ridge once set in, it starts developing more and more and destruction is made. I must say from the unconscious many people get ideas. I've seen people drawing or showing some pictures where they show a very devilish person with a horrible this thing coming out and a squarish thing. I don't know how they get these ideas, but that's a fact.

Now the destructive forces are also on action. They are also working out their forces, we have to be very careful, we are very precariously placed. Formerly if you had gone too much to the left and right, you would have been not so badly off and people didn't care also so much. But today you are so precariously placed and you are so sensitive and vulnerable that you have to be extremely careful. The rate of destruction is set in very fast and the rate of construction has to be set in much faster.

If you see along, I mean when I see what is constructive, nothing. If you read in the newspaper morning till evening one good news will come, that the princess has delivered a beautiful boy. The rest is horrifying.

You ask them to publish something nice, I told them to publish about Sahaja Yoga, they are not interested.

They are interested if there's a mishap, an accident, some people died, some people killed, they want to put all these photographs of how the people were killed and what wars took place, this and that. They have no time for some good news.

Some good message, something of hope, they don't want it. That's how... you see any organization that is working out today, how they are building up ego-oriented organization.

Every even charity organizations are nothing but ego-oriented ones.

I have, Myself, been with many organizations like that and worked with them. I was amazed! These people had no charity in them. Charity is something that should come as compassion, should just flow from you, but it is some sort of a camouflage for earning better position or a better status. All nonsense going on.

A person who is charitable is actually a person who just flows. Who is the other to be charitable? If they are the part and parcel of Me, whom am I going to be charitable? If this finger is paining, am I going to be charitable to this finger? I must look after it, jolly well, because it's paining Me, I have to rubbing of it, whatever is necessary, I have to do it. And that's what people don't understand. All these kind of our faficade will one day fall down and we'll

find out that we have been wasting our energy over something very, very trivial. Actually the All-pervading Power does everything. We do not do anything, believe Me, we do not do anything.

How many flowers are turning into fruits just now? Who is doing that job? How many seeds are sprouting at this moment, just now? Who is doing all that? How many children are born at this moment? In the human body, no foreign matter can stay, no foreign matter.

It tries always to expel it, but when it comes to foetus, not that the body only keeps it there, but sustains it, nurtures it, looks after it, makes it grow and when the right time comes, it throws out. Who does that? We take everything for granted. Take our eyes, if you are a doctor, you can see what an intricate thing has been created as eyes, that we see people through these eyes. Who has done all that? Have we done it? Can we make even one eye? *[UNCLEAR* And] we see so many different types of eyes. This is the compassion of God, this is the power of God that is all-pervading.

First time when you get Realisation, first time, you feel that compassion, you feel those vibrations, you feel that All-pervading Power. You can now know that the All-pervading Power is there and then you can see the manoeuvreing of it. You can work it out, you can work it out. Use it; you are the instrument, as I say. You are the master, only you have to become, assume that power.

Warren, I hope, has told you how he came to Me. I don't know if he has told you, he just came with a phone call. He had My phone number and the person who sent him gave a big idea about Me, that She is not available, this is

that, all nonsense, I'm the most available person. “You just tell him to call Me." And I said: `Come along." He came to My house, he got his Realisation. And now in Australia he's transformed so many people. We have ashrams in seven cities of Australia. England is the most lethargic, I must say. Seven cities of Australia are now there, ready to get it. There are so many people working it out because once you get the light, you give it to others.

So now we move to another center above that, is the center of the Mother of the Universe. The father resides in this center, previous center, the Nābhī Chakra and rises above and then settles down onto the right side, this is the fatherhood.

Say a gentleman yesterday told Me that he had a trouble with his asthma. I don't know if he's come back or not, is he here? Na, doesn't matter. Now, this gentleman has asthma. Of course I told him that he had trouble because of too much bathing systems of India, Indians you see, we bathe too much. Apart from that it comes from the father's grief. His father had died and the father himself is not willing to leave him, he is worried about him. It can happen to any one of us, if a man is unkind to his son, is the father principle. If the son is unkind to the father, so the father is hurt, is the father principle, if it is disturbed by any chance, or if suddenly father dies and you feel the pinch of that all your life, all that can work out here and you get this right Heart catch, with that you get asthma. It is said that in homeopathy they believe that with more tension you get it, because when you are more tense, you see, you remember your father, if he was here he

would have helped you. In the subconscious sometimes it works out and that's how it adds to the problem.

It is so simple to work out, that you'll be amazed that if you are to just raise the principle of father in a person like that, who might be a dejected father, who might be a cruel father, who might be a son who has lost a father, can be anything, that you have to just put your hand on that part and just say a mantra, a chanting which will raise or which will awaken the fatherhood in a full bloom and you get cured. It's very simple.

The Center Heart is governed by the Mother of the Universe. She gives us the sense of security. When you are at the age of twelve years, you see, the bone that is in front here starts emitting antibodies, it creates antibodies within you till the age of twelve years and then these antibodies are really the soldiers of the Mother of the Universe. We call Her Jagadambā in Sanskrit language and they spread to the whole of the body and wherever there is an attack, they inform each other and they fight it out. These antibodies are created in the sternum bone in the front side of the, we can say, the ribs, where the ribs meet, thoracic region, that part, they stay there, are created till the age of twelve years. Now what happens in ladies specially, they are the mothers also. When their motherhood is challenged, they get a problem. Like a woman, say her husband is a flirt, he has a roving eyes or sort of a thing and she is insecure. Then this motherhood is challenged and when it is challenged, she gets a problem there and she gets, then she gets a disease of this breast, breast cancer and all that is caused by the insecurity of a woman. If a

woman is insecure, she may be with any reason insecure, she gets this breast cancer.

There was a girl who was married, she was married to a Catholic or someone like that, there was an inter-religion marriage. And the people of the boy's side tried to trouble her a lot. It's very common in India, but here also I see it is so. And they tried to sort of say these things to them, that thing to her and to her parents and things like that and she developed this insecurity within her heart, that she developed breast cancer. Now when we are cruel to others, we don't know we are giving them cancers. What does it take for us to be kind to a girl who's married in our family, who has come to us? We are experts in saying things that hurt others. We learn from childhood how to talk to people so that they are really hurt. By hurting them, we give them cancers, but this only one realises when you get your Realisation.

Then you really understand that how much a person is suffering, because you also feel a little pain there, your whole style of talking, your whole style of behaviour, of commuting with others completely changes.

This center is very important. On the left hand side is the mother's side and the mother itself, if the mother is a lunatic, you get a problem there. You might get it, we call it a Heart, there are two Hearts, one is the Heart of the Spirit and one is the Heart Chakra. If a mother is a fanatic, she is a woman who is very fanatic about her food, things like that, then the children get it. It's a dangerous thing to play with children like that, to have complete discipline on the children and just keep them, “Must walk straight like a horse, put two things and”

Children should be allowed to have their freedom. Actually when we suppress them too much, they become hooligans, that way Indians are better, they know how to bring up their children. They allow their children to have all the freedom. Just give them the idea of dignity and when the children are so free with the parents in childhood, by the time they are about four or five they become extremely dignified.

Like I see children saying the words like, “Get out, get away." From where do they learn these words? They learn it from their parents, or learn it from friends, or someone they must be learning, because these words are normally not spoken by children. “Get lost." I've seen a little child saying that, “Get lost." I mean it's too much to say to someone. But it happens like that, because we do not understand what we should talk before the children, how decently. We may be most indecent people, doesn't matter. We might be absolutely rotten people, even a dacoit knows that he should behave properly before his children, because children will become dacoits. Even a prostitute, even a prostitute will understand that she should not behave in a manner that the child takes to prostitution.

It's a common sense, that whatever we do the children take so easily, so whatever you want to give them, whatever you want to impart them, that's how you should behave before them. But now as the society is today, people are not paying so much attention to their children, at all. They're so, I mean still the ladies are, the mothers are still like brides, you know busy finding new husbands. Husbands are still like bridegrooms, finding

new wives and the children, poor things, don't know where to look. God knows in what orphanage they have to end up their lives.

Even the industry is like that, I wanted to buy yesterday a pure cotton frock for a little child, couldn't find anywhere, not one frock I could get in the whole of Derbyshire and also in London for your information, which was pure cotton. I mean we don't think that children can't bear these artificial manmade fibre.

It's very dangerous, it's very bad for their skin. When you were young you used cotton, you had mills of cotton here and why give this horrible stuff to your children, which you never had? By the time they grow up to your age they will have all blotches on their faces. They'll be... I don't know what diseases they may have of their skin, no one realises this is the kind of panties you are using, the kind of things you are using for them, it's very dangerous, I don't know what's going to happen to them. The things they are using, you never used them when you were young, believe Me and these are the times when they really require complete attention and these are the times when they are absolutely tortured.

Even the industry is not worried about them. Why not make some cotton clothes for little children? Actually, I would say the government must pass a law that `No children's clothes should be made of any artificial things.' You can have the elders with that, doesn't matter. But for the young children, you can't give them atomic bombs to wear. This is too much and these modern times I think are the cruelest for children, that's why very few children

want to be born in these advanced countries. We have to bear the load In India.

If you are not kind to children... imagine, two children are killed by their parents, what sort of a society we have? Every week in London city itself, I used to think in England, but they told Me it's in London city, two children are killed by the parents and I have not heard a single case like that in India.

With this cruelty towards children, I don't know what women are up to. Where are they going to take their figures and their beauties and everything in front of God? Such cruelty exists, such self-centeredness, then with all this the children develop this struggle and they have palpitations. They have very weak hearts. They are in your trust, God has given you such beautiful children that you should thank Him for that. They are not some surplus quantities have come to you; it's a blessing to you that God has given you children.

If one woman in India doesn't get a child, she will go and weep and ask every god and every prophet and everyone that she should get a child. While in Germany it is going toward minus five percent growth now. They pay to a women who has five children as much as the Prime Minister or even more than that, but she won't have, she says, “I'll lose my figure." Where are you going to take these figures I don't understand. What are these figures for, who's interested in your figures? Why, why, why should we make ourselves so cheap? We are mothers and we should be proud of our motherhood. Motherhood is the highest thing a woman can achieve. I mean, I have achieved it, because I am a Mother for thousands. And I

think that is the greatest thing that can happen to a woman is to be a mother. And Mother and a Guru, you can imagine My plight? It's much worse that you have to tell your children something to be done and you love them so much that you don't want to say that, then you have to play some little sweet tricks with them to bring them round.

It is such an interesting and a beautiful life to be a mother, we should be proud mothers. But I would say the men too are to be blamed, because they are not interested in mothers, they are interested in younger and younger girls, is a sign of perversion I tell you, it is a sign of a complete perversion.

At the time of Mohammed Sahib there were many, many women and very few men because so many were killed, so Mohammed Sahib didn't know what to do.

So He thought, They were pragmatic, as I told you yesterday that with the society one has be pragmatic, so He said, “All right, we have to have marriages” because without marriage any relationship of any kind is adharmic, is against the valences.

So He said, “We must have marriage. All right, now we have many women so let us have distribution of women according to the men we have. If you have more men then we'll have the other way around. But we have to marry” means we have to take a collective sanction, a collective sanction has to be there, to be blessed.

So He said, “All right, marry five [women]." But He, Himself, you see, was surprised that at that time people are so sensitive, they would not marry young girls, the

old men would not marry young girls. They said, “How can we marry these young girls?" you see.

So He said, “No, all right, I'll marry one, because where will these young girls go, there are no young men left, so what to do?" But these days, if you ask an old man of eighty years, he would be very willing to marry a girl of eighteen years. Stupid old fool I call him, because he doesn't understand. He doesn't understand that this girl is not going to respect him as a husband and he cannot enjoy the life of a husband. He's a grandfather, or call it a great grandfather, he should behave like a great grandfather; that's an ideal relationship he should have with a young girl. All these ideals are confused today, our relationships with others. Every woman has to be attractive, why? Every man has to be attractive, why? For what? What are you going to achieve out of it? What is the utility? Attractiveness is all right as long as you are not repulsive, as long as you keep the ideal relationship with others. If the relationship becomes nothing but like a dog and bitch's one, it's better not to have this kind of an idea. It's absolutely wrong to run after something which is not our way. Human beings have to live with dignity and with complete sense of idealism as far as their relationship with each other is concerned. If you just say, “What's wrong?" then it's an argument, everything is wrong and everything is wrong, it is not one wrong but all, everything. But if you want to have a flowering society, then you must keep to your ideals of your family life, that's a very important thing, but it happens to you as soon as you get Realisation. I don't have to do a lecture on that, you just do it, you just become very nice

husband and a very nice wife. Beautiful families can come out of Sahaja Yoga, there are so many, you'll see them.

There are so many beautiful families now in Sahaja Yoga and now the great children, the great sages who wanted to be born are being born to them.

Many great children want to be born in this England. And there are many who are born, but I don't know how they are treated, if people understand them or not. They have no vibrations to see if they are sages or not. But born realised children are so many in England, that I'm regretting sometimes the way they are treated. Nobody knows they are born realised, the way they talk, they talk nothing but wisdom.

All these children are being insulted and humiliated by us who are so ignorant about them. I must say they are very brave, they're very courageous to take birth in the countries where they are not appreciated and looked after.

Another extreme is in our country, I should say, where people will sell their whole country for the sake of their children. I mean, that's going too far, that's another nonsense we do. But something in between is that you love your children, respect them; they are your trust, they are realised Souls, they are sages.

They are the foundations of the new world that is going to come and this is what it is a mother has to learn.

The dignity of a mother must be respected. I'm sure you all must have respected your mothers very much. But now as mothers I don't know if you will be respected. Once this is established, that a mother itself is the

highest position a woman can reach and she is to be respected, all the priorities will change among women also. Because what can they do? They have no place as mothers, so they just get fed up of their children, they think, “What's the use of this motherhood? It's a thankless job." All this can only change when man changes within himself, when the transformation takes place.

Just now it is just one of the sermons that you could hear somewhere in a very, I should say, orthodox place. But the whole of this orthodoxy becomes part and parcel of you and you become so much tuned with it, absolutely tuned with it. You like it. You like to love your wife and nobody else in that way. And the husband likes to love her in a special way, while the wife wants to love the husband in a special way. It happens. There's no insecurity. Otherwise, you come back home and you find your wife has eloped with somebody. Imagine, what a situation it is! Since when I came in the first year I got such a shock. We had a neighbour she was forty-eight years of age and her son was about twenty-two and he had a friend about twenty years. This lady eloped with that twenty-year-old boy and she had three other children whom she left. The house was sold, the whole household, because under law she gets half, half of the property or something like that and the three daughters are now on the streets, the younger three children were daughters are on the street, who is going to look after them? The lady, forty-eight-year-old lady, still a bride, do you know? Going to the church and getting married. There's no dignity in this, no love, no affection. Christ we

follow, Christ has said,you say, “Thou shall not commit adultery” I say, “Thou shall not have adulterous eyes." He's gone up to that subtle stage. We follow Christ, we wear cross, we go to the church. Where are we? So I come to another center now, is the Viśhuddhi. This is a very important center in human beings, because when this center is awakened you become the witness. You become the collective. This is the center of the collective being. You become, again I say, you become the collective being, when this center is awakened. Is a very important center and now as I'm with you I must tell you about what we suffer from and what Indians suffer from, or the Eastern people suffer from is another thing.

For example Eastern people suffer from too much talking, right side Viśhuddhi we call it and the Western suffer from not talking at all, specially English, they never talk.

Actually you have to pinch them and they never laugh, that's the problem with them, just smile and it's regarded good manners but it is sometimes very boring.

Now the left Viśhuddhi is a thing which is much very much more subtler than what we think of, is a very funny sort of a situation where you get a left Viśhuddhi and that you get very commonly among the Western people, because they have developed a new sense of guilt. I mean everybody is guilty. Without going to the courts, without committing any guilt, everybody is guilty all the time.

Like a lady, “Oh, I'm so guilty." “What happened?" “I didn't say `thank you' to her." So it doesn't matter. What is there to be guilty after all? “Oh I'm so guilty." “What happened?" “I spilt some coffee." So all right, doesn't

matter, it can be cleared out, what is there to be guilty? But it is an unknown guilt people have, they don't know why they are guilty, why they are getting all the time this feeling. “Oh God, I should not have done it, I should not have done that." What? What guilt we can have and this guilt is a horrifying thing. I have seen start from America, England, Portugal, Spain, Italy, all that, Switzerland, all these places nothing but left Viśhuddhi is the first problem and the last which I have to conquer.

One lady got up and she said, “Mother I am guilty because of Vietnam." I said, “Vietnam? It is finished long time back now, what are you going to do about it?" “No, but I'm guilty about it." “But why? What are you going to do about it, how are you concerned with it, what is your relationship with it, why are you guilty?" “I just feel guilty." I said, “It's nonsense." Like that everybody has developed this, now from where does it come. Let's see the source, the first source comes from Bible, which is very wrongly interpreted, saying that, “You are a sinner, a born sinner." I mean absurd! What it means is that, that you are the one who is only aware of the sins, not the animals. You are the one who is aware of your ignorance, not the animals, you are the one who is aware of your blindness, others are not, animals are not.

Why? Because within you is developed that `I'-ness. That `I'-ness as I told you yesterday is developed because of the ego and the super ego meeting here, because you raised your head, because this Chakra was to be enlightened.

You raised your head and this ego and super ego went and met here, it calcified, you got your `I'-ness and that's

why you think, `I've done wrong or I've done right.' Animals don't think like that, they are not bothered, they have to do what they do, they want to do it, they never sit down and say, `I am guilty.' Have you ever met any animal who says that? Except for the human beings, all the time.

Now this has come to, it's a myth, it is a very big big myth with which you are living, is absolutely, believe Me. There is nothing like guilt and this guilt is eating you off all the time, it is making you an inertia, it is making you feel so much lost. And this center is very important to be opened out.

So first of all before I start any program I tell them, one mantra should say, `Mother I am not guilty, Mother I am not guilty,' sixteen times, that's the punishment for being guilty. If you are guilty you must go into punishment, all right? So this is the punishment for you, is to say, `Mother I am not guilty, Mother I am not guilty.' Say it sixteen times and that's how you get rid of it. It's so practical, it works out. With that you get spondylitis, you get pain in the heart, you get this hand what you call frigid hand, all problems you get with that and that is all because of this mythical guilt you are working out.

Now, the another myth comes, the source of it I think is the psychologist, the so-called psychologist.

They have no sense of psyche, because they have no way of entering into psyche, what they are doing is recording, finding out and trying to cure people. How many mad people have they cured? Sahaja Yoga must have cured hundreds. How many mad people have they cured? They have not cured anyone. On the contrary, if

you go to a psychologist, you might become more mad, the way they are mad themselves; because these psychologists, when they talk to people, they don't know they are dealing with pathological cases, abnormal cases. And when you deal with the pathological cases, you yourself get intoxicated by that, or you can say that there is contamination. And you don't know how to protect yourself. Jung is the only psychologist, I would say, because he was quite a prophet person, after he got Realisation, he talked of it, that a physician can get sick. Now, they start becoming pathological like poor this Freud, half-baked.

He is the one who started talking about sex and things like that, but he himself was a perverted man. He died of cancer, what did he get in his own life? He was such a perverted man. I mean, imagine, he was a wretched soul who died of cancer. How can he guide anyone, any point whatsoever? Now whatever he talked we took him as Bible, more than Bible, people believe in Freud. More than Christ they believe in him actually and if you reduce it to a minimum sentence you can say he made everyone a sex point. You are nothing beyond it, nothing more than that, nothing else but that. Imagine, to reduce your dignity to that level! As a mother I just give him a grace mark by saying poor fellow must have dealt with pathological cases and he was caught up and he gave these wrong ideas to people.

He dealt only with the psyche, with the left side which is also starting from there, but ends up there, ends up into your super ego.

So sex addiction takes you to super ego, means it takes you to your subconscious mind and to your collective subconscious. Now all your problems you are having by sex are because of this. Emotional behaviour and all perversions take you to collective subconscious.

There was a girl in India, which is very abnormal, she came to Me and she said that she wants to be with girls and she wants to marry a girl, she wants to dress up like a man. I said to her, “Really?" So I gave her some Sahaja Yoga treatment and I found that there was a man in her. She was reduced to nothing, this was a man who was possessing her and she was given these ideas through that man and that's was how she was talking, she was a possessed person. All these abnormalities come because you get possessed.

There was a girl in Cuba, came to see Me. From Cuba, in America, a short girl, very petite, small, good looking girl and she told Me, her husband told Me, “Mother, surprising, my wife can take whiskey bottle neat like that, one she drink it down." So I said: “All right, sit down." I give her a bandhan as we call it and I saw a big, huge like a Globe Trotter, really a very huge negro coming out of her and I looked at her.

I said, “Do you know any negro?" She said, “Mother, do you see him? Do you see him? He is the one who drinks, I do not drink” she said to Me and when he was distracted from, she became such a sweet wife to her husband. All these abnormal behaviours when you over-do it, lead us to that collective subconscious, where you catch all these horrible people, also it can lead you to collective supra conscious if you become very, very egoistical. Then you

can become Hitler. “What's wrong? What's wrong? What's wrong with Hitler?" Nothing wrong, he was perfectly correct when he said that he has come to save all the Aryan race and his nose was a specially made one. I mean God must have been surprised to hear all that, I mean you have to create some variety, isn't it? But this is what it is, I mean these absurd things that we do in our life as saying, “What's wrong?" We jump into those ditches where you cannot return without some load on your head and those loads work out all the things and you become such abnormal people.

Then on the street you'll stand and shout like a madman and if you provoke them they are even worse, so better not talk with them and argue with them. Forget them. All those fanatics that we see are nothing but possessed people.

Most of them are possessed. I would say so many of presidents and these despotic people, most of them are possessed. I meet them, I shake hands with them, they shake before Me and I know that they are possessed people, how are they there? They should not be there, they are possessed, they possess other people, they make them work out and all this aggressiveness starts through their possessing powers.

So this center is the one which brings you back to normal and then once the Kuṇḍalinī rises and touches your fontanelle bone area and opens it out, then from your hand, through this center, that collective personality starts manifesting. You become the collective personality, you become, again I say is the actualisation, it is not that `We are brothers and sisters, let us form

United Nations and make good money out of it.' It is actualisation that you feel another person within yourself. And this is what is most important.

This center, I mean I can talk about this I don't know how many hours but, this center has sixteen sub-plexes and it looks after your eyes, nose, ear, nose, throat, everything, neck, even your face and all that, is governed by this. A collective person, a collective being has a face which has a coefficience that even the face can emit vibrations, but this is to be seen only through vibrations, you will know who is the collective being. The most important is this part of the head where I told you that when you bow yourself to wrong things this is the biggest obstruction, is the lower plate of the brain which is called as Murdha in Sanskrit language. It is very important, it gets swollen up and a big barrier is built and you become a person completely cut off from the All-pervading Power. Means all the protections, all the guidance, all the nurturing things, everything starts disappearing from your life.

Now we go ahead with that center to the center here, which is very important and which I must tell you, though, it's time to finish this lecture, is the center of Āgñyā which is placed in the center of pituitary and pineal body which controls our ego and super ego, between the Optic Chiasma, a very subtle center exists.

Some people call it a third eye but the third eye they see is not the one I am talking about. The third eye means the eye we see it inside not outside.

This center is very important and is adorned by the deity of Mahāviṣhṇu according to Indian name and English name is Lord Jesus Christ. This is a very important center.

“Now seek your Lord." Where do you seek, where does He exist? He's to be awakened and He resides here [points to Āgñyā Chakra], because most of you are coming from that background I want to talk about it, though Mahāvīra and Buddha both of them also resides within us. Mahāvīra resides here and Buddha resides here, but Christ resides here in the center, inside the brain.

Now this is a very important thing which all the Christian institutions have missed about Christ. That Christ is to be born within us. That He's to be awakened within us. That is only done through Kuṇḍalinī awakening. And once He's awakened, at that point, ego and super ego both are sucked by Him, as a result of His awakening and this is a very big thing.

That's why He said, “I am the door." But very nice, they crucified Him. But that crucifixion was also a drama, because ego and super ego has pressed these points so hard, that to pass through that you needed somebody to be just Divine and He was Omkāra Himself, a Divine personality Who never died and passed through that.

Kṛiṣhṇa has said, Who is at this point, has said that: “Nainam chhindanti shastrāni, nainam dahati pāvakah." He said: “This Divine Power, this Omkāra, never can be killed by anyone, it cannot be destroyed by anyone." And this itself took the birth of Jesus Christ. To create that passage for us and that is the thing He proved, that it cannot be killed.

But They are all One and related to each other. This you'll discover in Sahaja Yoga itself. Because when the rapport is established, you have to ask questions. What is the

relationship between Jesus and Kṛiṣhṇa? And you can discover it on vibrations: They are all related to each other, very closely. Christ has said, “Those who are not against Me are with Me." Nobody has tried to find out who are those. It is said in the Bible that “I'll appear before you like tongues of flames." Nobody tried to find out what is that, or Tree of Life. This is The tree of Life [points to Chakra Chart].

So He is to be awakened within you, that's the main point that He said that “Somebody will come and awaken it, so that you will know My Father forever." Now which one of the institutions which are running in the name of our Lord Jesus Christ are doing that job? What they are doing is having a fete, or a carnival, collecting money, building churches, this, that.

You have to build every human being as a church by awakening Christ in them. That was what was meant by baptism. But who did baptism in the real sense is the Kuṇḍalinī awakening when it comes on the fontanelle bone area which is called as Brahmarandhra and breaks through that. Who has done that? None. I went to a church called Unity Church, they have united all the churches I believe and also united all the ghosts of the world. All kinds of fake Gurus are there, all kinds, they have no discrimination of any kind.

I am so amazed, you know. Christ, He was not so diplomatic I should say because the way He lashed at these people and then He said, “If they are hot we can manage them." Means if they are hot, means they're caught up, we'll manage them. If they are cold, we like them. But if they are half way, “I spit them out of My

mouth." These are His words. Because these half-baked people compromising with the devil and talking of God. How are they going to deliver the goods? Why not awaken your Christ within yourself and see for yourself? You'll be amazed when you raise the Kuṇḍalinī and Kuṇḍalinī comes up to this point and it cannot go further, among all the Christians this is a problem. You have to ask them to say Lord's Prayer and it works, that's a mantra. At the time when your, this center is catching, because Kṛiṣhṇa is a Collective Being, `Allah ho Akbar' means the same. You have to put your fingers into your ears and say, `Allah ho Akbar', realised Souls and you'll get the Kuṇḍalinī rising. You can see the pulsation of the Kuṇḍalinī at the triangular bone, you can see the rising of the Kuṇḍalinī, you can feel the breaking of the Kuṇḍalinī at the Sahasrāra, at the point where it comes and breaks.

So you enter through the gate of Christ who sucks these two institutions and makes the way here and once the Kuṇḍalinī rises above the Āgñyā, you become thoughtless.

The limbic area is the kingdom of God from where you are guided and the Kuṇḍalinī passes through.

That's the last job that is to be done and now it is done. That is done now en masse. It has to be done, it was to be done, it was promised, the time has come. But where are the people, sometimes I wonder? I am in England now with you; you'll be amazed that in India, these people have seen, thousands and thousands are there to receive Realisation in the villages. Here I find people don't want reality, you should have a circus. At least English people come but Indians very few and they never

stick on, is so amazing that I can't understand. It's amazing how things work out. When are we going to take to it? I mean it's free, you don't have to pay anything, it's your own, it is spontaneous, it is there. But still, they get Realisation, they get lost.

It's something so surprising, I've been working here, you won't believe, ten years now, eight years, eight years. For four years, in the first four years I had six people, they would come up, go down, come up, go down. I said, “What sort of people?" Four years, can you imagine? In India, I go for three months and I get thousands. Is it that there are very few who are going to be saved, as told by John? He said only a few thousands are going to be saved, is that what we are going to do in the West? But England is the minimum, you'll be amazed even Italy is better, Switzerland, Geneva, so much better, what's happening? Here they run after a man who is asking for a Rolls-Royce, a fellow who asks for a '59 Rolls-Royce, they starve themselves and made a Rolls-Royce for him and when he came, they gave him the Rolls-Royce, imagine? And they said he's a perfect master. There is no pure intelligence left in the mind to understand that how can you get Spirit for this nonsensical Rolls-Royce? At least Derbyshire are not, people from Derbyshire should not be impressed by that very much, because they make it here. You cannot make God, can you? You can make Rolls-Royces, all right, can you exchange Rolls-Royce for God? They are running after such horrible things, like horrible another thing that somebody is trying to teach you how to fly. The wife of the director is sitting here who started suffering from epilepsy, her husband got

epilepsy, her daughter got epilepsy, they all were epileptic and they were paying thousands of pounds, three thousand pounds to fly and they starting hopping themselves like a frog. Imagine! With pure intelligence you must ask that Guru to drop himself from the leaning Tower of Pisa, I think it was made only for that and see if he can fly even one inch higher. Why not use your intelligence? You are supposed to be the most balanced and intelligent people. Yesterday I told you that you are placed, the most important place in the Universe is the Heart, England is the Heart of the Universe and the Heart is lethargic. What can I do? You have to tell Me, what am I to do? To pump this Heart into reality. There are seekers, I would not say there are [not] seekers, many of them came to hippism, thousands became hippies. But all absurd things they accept very easily and why not the thing that you are seeking? It's beyond My mind. I cannot understand.

Now I didn't come to this place as an immigrant, as I told you, I just came here because something happened and My husband got elected to this country, which was important, which was, I think, was preordained. Was to be. But I have to implore you now to take to this and understand that this is what William Blake has told you that “The prophets are going to be in this country, that the God of men are going to become prophets and they are going to have the power to make others prophets." That is Sahaja Yoga, there's nothing else but this. He has promised so many things, he has even described the house where I live, he has described the house that we are occupying now, exact position. He has described the

ashram where we'll lay our foundations, too, into such details that I'm amazed such a great sage and a seer was born in this great country and nobody wants to see it through. Now what am I to do? I hope very soon people would realise that they have to take a very big role, a very important and vital role in the transformation of the whole humanity and saving of this disastrous time. They are the ones who have to lead people into the Kingdom of God. I can hope and bless that.

May God bless you all.

Luckily we have a very good standard of the Sahaja Yogis in Derbyshire, really it's surprising and Blake has mentioned Derbyshire very much, they wanted Me to come to Derbyshire. I said, “Birmingham has been sufficient for Me and I'll not go to Derbyshire." They said, “Mother, please." Then he said, “Blake has mentioned You come to Derbyshire." That's how I am here and I hope that this center will create definitely very good Sahaja Yogis. Great prophets can be created out of this, after all Blake has mentioned Derbyshire very strongly, recommended it. But what I find today when I went for a drive, there's a lot of black magic, people are indulging into horrible, horrible things. I was worried, quite worried. It's a very dangerous thing. It's dangerous for you, for your children, for your families, for everyone and I found those pockets, I was amazed how they are prospering here.

May God give you strength and proper wisdom to understand how you are placed in relation to the great work of God.

If you have any questions, you can have for about for five minutes, yesterday many people asked many questions, actually first day only I allow people to ask questions because second day it is quite a waste of time. Now don't ask personal questions for heaven's sake, don't ask any personal question. That we'll attend to them later on, personally, they can be attended to, but anything general if you want to ask, please ask the question general.

Audience question: Have You seen God Yourself?

Shri Mataji: He's an Indian.

Sahaja Yogi: [Repeats the question to Shri Mataji.]

Shri Mataji: Why do you ask this question? Are you authorized to ask that question? First you see your Spirit and then we'll talk about it. Why should you ask such a question? Are you an Indian? Then at least keep some manners. Please be seated. This kind of an arrogant question should not be asked, “Have You seen God?" Why should you ask Me such a question? What authority have you got to ask that question to Me? I have to ask you question: have you felt your Spirit? All right, first feel your Spirit, that's why Buddha never talked of God, I yesterday only told you, because suddenly you want to see God, have you got eyes to see God? You can't see Me even, how can you see God? First of all become your Spirit, then we'll talk about it. A little child won't go and talk to a king and slap him on the face, will he? Is he supposed to do that? We must know our boundaries, our Maryādās.

Especially Indians must know, I'm surprised sometimes. To ask such a question like that: “Have you seen God?"

Whether I've seen Him or not, why should I tell you? What is he saying?

Sahaja Yogi: Leave it please, let's have another question.

Doesn't behove, doesn't behove... Is very arrogant. I am surprised that you've learned such ways here, is never done by an Indian, is very embarrassing. Just imagine, if I have seen Him? He's going to believe Me? Or not seen Him. I mean, what a question it is, have You seen or not? But he's a Master of Philosophy from Benares University and all that, maybe that one, but in India you won't find such people, I don't know from where these materialistic, absolutely gross people are there, I mean what a question to ask Me? It's never done. I'm here to give you Self-realisation, that's all. And you should get it, that's your right. This is a bank I should say and I have to sign your checks, that's all.

If you get your checks signed, that's all, finished, that's My relationship with you, I'm not going to tell you about Myself to get crucified again. Christ tried to tell something about Himself and they crucified Him.

Now if I tell him, “Of course I know about God” he is not going to accept. If I say, “I don't know” then he is not going to accept. Stupid. Indians are not stupid at all, they are very wise people, I must say. I am surprised from where this stupidity has come. Very wise. Indians are very wise because you see Yoga Bhūmī; it's such an ancient country of ours, you don't know the praises of this country I cannot *[UNCLEAR* give] you. Do not judge them by the people you see, no, no, no. It is a very great country, it's very great, spiritual, absolutely spiritual country. See these are I don't know what's the matter

with them, very superficial people have come here, extremely superficial, there are some great souls also I say, but don't judge, don't judge that great country.

Once I was going to India with My husband and I told him, “We've touched our country." He said, “How do You know?" I said, “See, the vibrations! The whole country is vibrating, the atmosphere is vibrating." He said, “Really?" I said, “You go and ask the pilot." We were in the first class, he went down and he asked him.

He said, “Sir, we just touched it about a minute back." Such a great country like that, the whole, the Kuṇḍalinī of the Universe resides in that country, can you imagine? The Kuṇḍalinī! And they have no desire to seek, that's the power of desire that resides there and they have no power to seek. [Hindi.] I am Myself surprised and those who have come also like Gurus, horrible people making money, I'm ashamed if I am an Indian by any chance or if, as I'm ashamed I sometimes feel, “What have they done to what we had?" We have such a tremendous heritage, you are just a shoot, you are just the outside, you are the tree, we are the roots, you can't live without us, we are your roots and these roots I see I can't understand.

Still it's all right, is the concern of a Mother.

Let's have it now, put your hands towards Me please, all of you take out your shoes, you must have seeking, if you have no seeking what's the use of coming to My program?

Contents: 1982-07-12 **Śhrī Bhūmī Devī Pūjā, Derby, UK**

[The Pūjā is celebrated outside, on a very windy and cool day. When Shri Mataji arrives, She looks upward towards the sky. Then Shri Mataji sits down on Her chair and takes a small girl in Her arms. She will keep her on Her lap during the whole talk.] Today I was telling Rustom that we should do of course the Pūjā of the Bhūmi, because She's angry actually, because She has produced such beautiful scenic beauty in this part of the country and while the people who lived here have not understood the beauty that She has given them and have tried to take to ugly and very sinful methods of invoking the Satanic and negative forces. And this has made Her very angry, I felt it the other day when we went out. And it is done through the ignorance of the people, no doubt, but still, some of them, even knowingly, are indulging into things like these. Is a very serious thing, because you are inviting, inviting the Satanic forces to work out your destruction. These forces are never your friends, they're destructive, they can never be your friends, because you came out of the construction of God and they are the destructions and they can never be your friends.

So the nature has to be annoyed about it [looks upwards] and they think that this country doesn't deserve a Pūjā [smiles].

It is their own decision about it, that they are suggesting that this country doesn't deserve... But I am thinking *[UNCLEAR]* I don't know what this country has turned, this part of the country and that what I should do about them. To punish someone is very easy and to get angry is even easier. But to have poise and understanding and compassion, is difficult. The patience of a mother they

cannot have, it's alright, I can understand them, but they have to obey.

Something has to be done, has to be done. We have to work out. Even if I go to hell, I'll have to work it out. That's My job. That's what all of them and you, all put together, have to help Me. Because all this anger, everything, will pass away. What will remain is the achievement, the achievement that we have accomplished by our perseverance and our patience.

So once we realise the achievement and the importance of the achievement, we do not give way to these temporary moods [looks quickly upwards], we have to be absolutely tranquil and understanding about it.

Also in this way we play into the hands of the negative forces, because they want to be disturbing and we play into their hands in the anger.

So actually, when we are angry, actually we are going against ourselves. You are playing into the hands of the negative.

So what's the use of getting angry and showing temper? It is addressed to these angry natural things that [looks upwards and laughs]. Alright. Now, we should start our Pūjā because I think we should start it and it will settle down then with the Pūjā.

As it is, when I first came to England I said there is a big curse of the Goddess on this country. Really.

That time the climate was just like this. And you could not even step out of your door. We were staying in Alwich, I remember. And the car was hardly about, say, ten feet and we didn't know how to reach the car, it was

so windy. And we were wearing coats and everything, but everything was absolutely in a windy state. And then I said that this country is really under the curse of the Goddess. But the one who curses also can take back the curse, isn't it? [Smiles.] But this is Viṣhṇumāyā, always very angry. Actually she's very, very angry person. When she gets angry, she tries to show her anger.

So as it is, you know, it is part and parcel of Me, but My own part and parcel suggests, like, supposing there's something burning and I put my foot on that. It suggests, my foot suggests me that this is hot, better not put your foot. It's like that.

So let us see how the Pūjā works out today. It's a great challenge to all of us. Let us do it with Śhraddhā, don't have aŚhraddhā, then it will work out, I'm sure it will work out. You are My better children [laughs].

May God bless you.

Contents: 1982-07-30 **Visit, Cottage of Rita Davies, Mytholmroyd, Yorkshire, UK**

[When invited to Yorkshire a few days earlier:] For one person I will go anywhere.

[Arrival by train with two granddaughters and eight Sahaja Yogis.] [As Shri Mataji comes up the path to the front of the cottage, referring to the patch of all white marguerite daisies on the right hand side:] They are lovely.

Rita Davies: It's a pity the smell so pungent.

Shri Mataji: They're all right now, daisies everywhere will never smell too strong again, because My sari brushed against them as a I passed.

***Contents: 1982-07-30*, Public Program, All that is Vital is Extremely Simple, Community and Leisure Centre, Mytholmroyd, Yorkshire, UK**

I think some of the Sahaja Yogis were rather amazed that I accepted Rita's invitation to come to this place! Rita has been very kind to call Me here.

Every place has its own attractions, as far as the Divine is concerned.

And I knew there must be some very deep seekers in this place who could be really benefited if I could visit this place. And I was overjoyed to arrive here.

Now the question about Sahaja Yoga is very simple to understand. All that is vital is extremely simple.

For example the way we breathe is so simple. We don't read any book, we don't do any exercise for that.

We don't have to go and learn from anyone, we just do it. In the same way, if our seeking has some meaning and if we have to find out something it must be the most vital thing offered. It's not just an alternative life. Many people have a feeling that the seekers are nothing but they are finding alternative theories and to alternate, with the present norms and conditions, it's not so.

The time, that is today, the modern times, are special times described in the ancient scriptures in India and also in The Bible and Koran. In all the scriptures they are described. In the Koran they are described as the resurrection time. Christ has many a time talked about it that: you have to know My Father forever. That your hands will speak. Lots of descriptions he has given of this state which you will achieve at a time. As in life you have

seen [that] a tree has to grow. First it may have just one or two flowers but when time comes when the same tree which has only one or two flowers, about, say, two years back [or] three years back, suddenly gets into a blossom time and has lots of flowers. Like that, today is the time of blossom time of all the seekers.

So many seekers have taken birth today on this Earth. Especially England it's described by William Blake that these times are going to come when England is going to become Jerusalem. `Jerusalem' means `where it will be pilgrimage'. For people will think this is the Holy Land of God. That people will come to this Holy Land, to visit this place.

So the people have to be holy, they have to. It's not the trees that are going to become holy, it is not the land that is going to be holy but it's the people. Their hearts are going to be holy.

Then how do they become holy? What happen to a person when he really becomes holy? We talk of saints. We talk of prophets. What is the difference between these revered people and ordinary people? There's only one difference. The difference is this: that in their attention, in their central nervous system, there is the light of their Spirit. While for the other people, they live in ignorance without this light of the Spirit.

The Spirit exists in every one of us. It is always there, present, all the time. It's Omnipresent. It's all the time present within us. But the problem is that we are not aware of it, that it is not shining in our attention, in our awareness.

When Gavin told you about the new awareness it means that the awareness that we have, the human awareness, becomes enlightened, a new awareness and in that awareness what happens is that our Spirit manifests.

Now one may say, Mother it must be a difficult thing. People have to do so many tapasya, they have to do so much penance and they have to go to Himālayas and do all kinds of things, stand on their heads for days together and how is it that it is working so easily now? Actually that kind of thing is not needed today because the time has come.

When the time has come it just work out fast, it works out en masse. Now I am with you here but in India, those people who have visited with Me know that there are thousands of people for every program I go [to] there. And all of them get realisation. All of them get realisation. Means they started feeling the All-pervading Power for the first time on their hands. “Your hands will speak." First time the All pervading Power about which Christ has described, every scripture has described, you start to feel it as Cool Breeze of the Holy Ghost.

Now this feeling, somebody can say, “Could be due to this, could be due to that” because we are doubting Thomases sometimes and we start doubting it. But the thing is, you can see, in so many people, the rising of the power from the triangular bone which is called as `sacrum'. Surprisingly `sacrum' means `sacred'. That means that Greeks knew that it is a sacred bone, it's a sacred bone. Nowadays this word has no meaning but it will come back when people realise what is sacred.

In this bone, the triangular bone, we have this power called Kuṇḍalinī settled down. This residual power which creates us, which creates the whole being, is still not manifested, it is still sleeping. Because it is the power of our desire which is the ultimate desire to become one with the Spirit, to feel the All-pervading Power, to be the instrument of the God.

Until this power, or we can say this power of desire has manifested itself, we are not going to be happy people. We can try anything we like [but we will not].

Now, in the beginning you may say, that so many prophets came in: Christ came in, all of them came just to make us ready for this day when we can be born again. Christ has clearly said you have to be born again. Now who is bothered about it? There are people I have met who have certified themselves `born again', but you can't certify yourself as `born again'. `Born again' means a person who has felt this All-pervading Power. Who can make this All-pervading Power flow through his being and can manoeuvre it and understand it.

Now this All-pervading Power is the power that has all the powers that you see: all this electricity, everything is a part of that power. That's the vitality of the whole Universe, that has created this Universe.

This All-pervading Power that flows when you get your realisation, gives you tremendous powers. But the biggest power it gives you is to love. God is love and His power is the power of love. He really loves us.

He loves us so much that He is the one who wants to save us. It is He who is anxious to save His creation.

He doesn't want that His creation which He has created with such love with such attention, with such delicate help, out of which you are the epitome of His creation. The human beings are the highest and [for them] to be destroyed, that He cannot bear. And it is His desire that is flowering today as Sahaja Yoga and that the people are getting Self-realisation in such a mass quantities.

But the main problem today is that there are so many in the market that people don't know what to do. To begin with, we have churches, we have mosques, we have temples, we have all kinds of people selling God, or maybe talking about God, or saying that, “This is God." Now these religions came on this Earth, all the Prophets came on this Earth, to establish a balance within us, as I told you, to prepare us for the ultimate. But I have noticed that without enlightenment whatever is the belief, whether it is Christianity, Hinduism, Sikhism, all any isms or Communism or Capitalism or any sort of thing, it is fanatic belief.

The reason is without the light, you can not see.

For example, I come upon this table, I feel this table [when] there is no light [in the room]. To Me this table is the main thing, the rest doesn't exist. To another person comes here and sees a chair, to him this chair, nothing [else] exists. Now this myth that he believes into, he has to establish it. It's a myth because he's not yet enlightened and he cannot enlighten other people so it's a myth. And he has to adhere to that myth with such glue-like tenacity that created a great barrier between him and the Truth. Because he has not known the Reality

yet. Reality is very different from what we feel today as human beings.

For example, I will tell you that this Gavin [Brown] who has today spoke to, met Me about six, seven years back or we should say more than that.

And first he got his realisation I told him, “This is All-pervading Power." He started feeling the Cool Breeze. He said, “Mother how are we to know that it has got telecommunication, it has every way of informing us?" I said, “Alright, what do you want to find out?" He said, “I want to find out about my father." I said, “Alright, you put your hands and just ask `how is my father?' " And he asked this question: immediately he started getting the burning on his hand, on here. Now, these are the centers of your father.

These are the centers of your mother. When he started getting the burning here, he said, “Mother what is this?" I said it means you father is down with very bad bronchitis. His father was in Scotland. I said, “Why don't you telephone to him and find out? It's very easy to find out." And when he telephoned, he found out, his mother told, that, “Your father is down with very bad bronchitis." So that is how the information comes to us from this All-pervading Power.

Now before that, whatever we do, say we talk of capitalism, we talk of communism. I would say I am the greatest capitalist because I have all My powers within My control. I have all My powers within My control And I am the greatest communist because I cannot live without sharing. I have to share them because otherwise I cannot enjoy all those powers that I have.

I really cannot enjoy My own life unless and until I share it with all of you.

I have lots of joy within Myself but unless and until I share My joy with you all, I am not going to enjoy it.

So I am a regular communist.

So all these things you have done, like communism, capitalism, communism, democracy are nothing but the myths of the Reality. Like, sometimes you say, “I am my nose, I am my ears, I am my eyes." They are all one! You do not see the integration. Why? Because you haven't yet awakened yourself.

Once you are awakened you find “Oh! I am the whole body." All this whole body has all these different parts which we consider, “This is good, that is good” but none of them have proved to be really perfect.

They are good, but they are not that good.

So there must be some way where all these things integrate and they integrate at a point where you become the Spirit because Spirit is the thing within you which is the Collective Being.

Now My husband, as you know, is at the UN system and you have an agency here called the `Maritime Organization'. And he also feels that, whatever they are doing on a global level, on an international level lacks something, lacks something, in human beings. Because rationally they understand that the whole world is the same, that you are my brother and I am your sister this sort of things but in their hearts there is still something lurking because the heart and the head are not

integrated. We believe into so many things but the heart and the brain, they are not integrated.

How do you find, that the person who is believing into something but is not doing that? Because they are not integrated. When the heart and brain both are absolutely integrated then you do what you believe into and [if] you believe into something, then you do that. Both things go hand in hand and that's how these things that we feel look so funny with people. They talk so big! They say they, “We'll do this for you” and, “This is what we feel." They make all kinds of drama. And ultimately you find they have no feels about it. But I do not blame them because they haven't found their Spirit, which integrates you completely. And this is the time when you will get your complete integration in life.

Now coming to absolute mundane level of things: the other day, a gentleman of the radio came to interview Me and he said, “Alright. You tell tell me that physical, emotional and also mental problems can be solved through Sahaja Yoga." It's true. We have cured cancer. There is one girl today, who came today from America. She has cured a blood cancer [case]. Of course it's true. It can be cured. With this happening, with the awakening of Kuṇḍalinī you can cure all these diseases. Heart troubles, all these can be cured. Then mentally also: many mad people have become sane people. Many addicts and all sorts of things have become alright. No doubt! It can be done. But you have to first of all get your realisation.

Without that, without that first step, nothing can be achieved.

First step is that you get your light in. Now some people think that we should work very hard and we should cleanse ourselves, we should do this and we should do that and then we should take realisation.

But why? Unless and until you get out of yourself you cannot cleanse yourself, you cannot see yourself and you cannot understand because you are so identified. For example, if you correct somebody, “You have got ego." He'll just punch you on your nose and say, “What do you mean by such a thing? What do you mean, `You have an ego'? You are the one who has the ego! What do you mean by saying such a thing to me that `You have an ego'?" But when you get your realisation, when the Kuṇḍalinī rises, here at this point, where you see this red mark, behind it, on the Optic Chiasma there's a very subtle centre called Āgñyā Chakra. On this centre resides our Lord Jesus Christ. And He sucks in your ego and superego. And when your attention is there, you can see your ego bloating up like a balloon. You see it and you say, “Oh God! This is me? Alright." Nobody minds then if you tell them that, “Your Āgñyā Chakra is catching." Nobody minds it. Because they don't like it [to be catching]. They want to have these vibrations flowing into you.

Then there can be a person with a superego. A person who is always frightened, who has fear and who always keeps quiet and goes into some sort of alcoholism or something, shuns the society. There could be person like that. Such a person, also, when he sees light within himself he becomes normal. Sahaja Yoga is there to normalise you completely, to make you a normal person.

But coming to the absolutely mundane thing like this gentleman asked Me a question that, “What about our unemployment in England? What do you say? What is the solution you give for our unemployment if through Sahaja Yoga?" I said, “That's a very great employment for you?" He said, “How?" I said, “Let's see how you got employed. Let us be very practical about it." You are over developed people. You have got your railways done, you have got your aeroplanes done, all kinds of machineries you have finished with.

I mean, you have done everything and to add to it now you have computers! Sitting down here you can move everybody's nose and eyes and everything, you don't have to move out of here. You can even destroy the whole world sitting down here. You don't have to do anything.

So you have reached that state where, now, you must rest. You have had too much development.

So, as a holiday, now you are resting. And that's how you are unemployed. But, in the subtle way, it is a Divine's working. How? Science and all these powers have been given to us, exposed to us because we have to finish our every day-to-day work and save time. We have been wearing watches. I don't think My grandmother wore any watch all her life. Nor could have been yours also. That time nobody bothered about time. Time was passing, nobody bothered about that. But now we are all the time, “Save the time, save the time, save the time." But save for what? Save for the pub, or save for the ballroom dancing, or for the quarreling, or for hitting others or

talking ill of others? Save for yourself. Save for your meditation.

Save for your ascent. And this saving itself, the time that you have saved, has brought in the birth of so many seekers on this Earth.

Now this is the time [that] you have got such a lot of spare time to you. Why this spare time has been awarded to you? Is to ascend. Now you have been employed for worldly things and worldly materialistic things and all that but now you are to be employed by God. You have to seek His employment. Once you get your realisation, now we have Sahaja Yogis, first I first said all Sahaja Yogis must seek some jobs.

They should not be unemployed. But just to make it look normal I told that. But they are so employed now, they have no time, they are so busy. They are giving realisation to people, they are curing people, they are going round telling them about the message. They are so busy, they are doing God's work.

Now you are no more employed with the government. You are not employed by any private companies, but you are employed by God.

So, you are free, you are getting your food alright, you are getting your pensions alright. Now you work. I have seen people who are even eighty years old, ninety years old [that] are doing God's work. From India, recently when I went to America, a gentleman who is about seventy-six years of age came down to get Me from India, all the way. And he said, “Now I am doing God's work, so I am not at all tired, I am not at all afraid." He

and his wife, both of them, came to Los Angeles to help Me down there.

So now the new employment has to start and that is the employment of God.

You can meet the Sahaja Yogis and ask them. They are very busy people. They have no time.

Now My grandchildren who are here, they are also born-realised people, they are very enlightened people. And they are very busy. They have no time for anything. You see, since we have come here they have been busy going round and trying to see wider people. Now, we went to the airport one day and this girl was tying up like this, very fast, she was doing like this, very fast, like a machine was on.

So her mother asked, “What are you doing?" She said, “I'm trying to tie up the whole of airport. You see, they are running helter-skelter they are all getting mad!" And this action works out because the hands are flowing [with] that Divine Power.

So this action has a meaning. And she was working it out like that and she was going on and she said, “I have to tie up all these people, they are so speedy, so crazy, they are running fast for nothing at all." And she was just trying to do that. They are all the time busy. [If] you talk to them, “No I'm just I'm busy!" They will do something here and there and they try to correct it.

So the new employment one has to take. But the first of all, the first criteria of this new employment is that you should become the Spirit. If you are not the Spirit, you cannot do it.

So you become the Spirit.

Then you must learn the methods of how to use this Divine Power, how should it be done.

That's all! It's so simple. It's all made for you. It's very easy. Nothing to work out. But one should not go on thinking about it. Because it is beyond thought. By thinking you have built up all these things, by planning you have done all this. But now you have to enter into the Realm of God, to be the citizen of God Empire where he gives you powers by which you work out the world. But the whole. And then you really feel your generosity and your giving powers which are so great, your forgiving powers, which are so satisfying. All the great powers will start feeling once you become that Spirit. And that is very important, to become the Spirit.

Now of course, you can say, there are many who talk like this. They have to! They have to talk like this, but there are ways of understanding how to make out a person who is real and who is unreal.

First of all, it is a living happening. It's the happening in your evolutionary process. As you have become human being you have to become a higher being. You are still in transition. You do not know why you are here. You don't know your meaning, that's why you are frustrated, that's why you are unhappy.

So this has to happen to all of us.

Now for this, everybody can say, “Alright, I'll give you an experience." The other day one girl told Me that a gentleman came and told us, “I'll give you an experience." And what experience did he give? She said, “We became dumbfounded." I said, “What is there [so

special] to be dumbfounded?" Supposing you go to a pub and have a big drink you can be dumbfounded! What's so valuable [in that]? What is an experience? Supposing you are pricked you might get the experience of pain or something. Experience is not the thing, it's the awareness. What happens to your awareness is the point. Is your awareness is enlightened? Has your awareness got the new dimension by which you understand other people, the collectively consciousness? Did you become collective? Are you collectively conscious? Ask this simple question to yourself.

But it's very easy to scan out these people because everything they do is for money or for women, or something very, very low level thing. I mean, everybody who is trying to do something is nothing but money or buildings or all these things which are not important.

In the realm of God, what is important is the joy, is the peace, is the love. And when we can achieve that Spirit then only we can talk about it. Before that, if I tell you a big story, what's the use? It has to happen, it has to work out. It's your own right to get it. You cannot sell it in the market because it's a living process. For example, supposing there's a seed which has to grow, sprout and it's a living process, can we pay money to the seed? “Now you please grow?" Or a flower which has to become the fruit, can you pay money to the flower? “Alright, come along now, become a fruit!" Will it become? It's as simple as that.

All these living things are done by this All-pervading Power. We have become human beings also through the

grace of this All-pervading Power. Even you have to become higher beings it will be through that.

`Sahaja' means `born with you'. Also it means it's `simple', `spontaneous'. Everything living is spontaneous and that's why you cannot pay for it, you cannot sell it in the market. It has nothing to do with money.

God doesn't understand money. He never saw money. He doesn't know what it is you human beings have created, this money, this poverty, this richness. He has nothing to do with it. He has created a beautiful world, a beautiful place for all of you live and He has created you to enjoy it. But if you have made complications and hangs-up and you are so complicated it's better to get out of it and become a simple personality. To become a simple personality also you have to get to that level which is the Spirit.

And that is what Sahaja Yoga is today.

As Gavin has told you that you have to put hands towards Me.

Now I must say, I must confess that that's My job. I have to accept it. But it should not in any way hurt your ego. Because the other day somebody told Me, “Why you Mother?" I said, “Please come along! I'll be very happy.

If you can do it nothing like it! I'll be very happy. Now see, I have a good family, a very good husband, my family, my children, my grandchildren and they are happy people. Actually yesterday he was not well also so much and he didn't want Me to come here but I said, “No I must go to this place. It's definite I must go." And I managed to come here. And he also realises how important it is to transform people.

But it's My job what can I do? You see, if it is My job are you going to crucify Me for that? I have been really asked to do this job and I am doing it in My own humble way just to give you something. I have to just give you. I have nothing to take from you. I am standing at an end where I cannot take anything. I can just give you My love and you should just accept it. Is there any harm in accepting somebody's love? Which you cannot pay for.

But once you get realisation, once you are enlightened, you can enlighten other people. Like one light which is enlightened can enlighten another person and when that person is enlightened, can enlighten another person.

It's simple as that. I was born as an enlightened personality. And I was aware of it. And then My father told Me, very frankly that, “Now you find out a method by which you can give a en masse realisation.

Because otherwise if you speak it will become another Bible and people will fight; it will be another Judaism and they will fight, another Islam and they will fight. It's better that you give them realisation.

Because [if] somebody is born on the tenth story and he talks of the tenth story and people on the ground do not rise. First they are jealous or they are angry or they think the man is mad and they will do all kinds of things like crucifixion, giving poison, torturing the saints and all that." He said, “Nothing doing! First of all you make them rise at least two stories or three stories. Let them feel that there is something beyond. Once they start feeling there's something beyond that they have to achieve it in their awareness then only they will understand that there is God and there is Divinity." Blind faith is no use. In the

same way, denying God is also no use. You must see and witness this happening and then, once you become the Self, you will understand God. Before becoming the Self you cannot understand God, that's why even Buddha didn't talk about God. He said, “You better not talk of God. Once you talk of God, again hypocrisy starts." So he said, “Let's talk of the Self-realisation only.

Once they get their Self-realisation, then I'll talk about God." But you know, he didn't live that long to tell people. Actually, in his life time, he couldn't give realisation to many people.

Luckily I am in England. It's all arranged, I think. I have to be here because this is going to be the Jerusalem. And I have been struggling with English people quite a lot! And I had six people with Me for four years, you won't believe and I was struggling with them, with the six people. But they were managed and they are now the foundation of Sahaja Yoga in England.

English people are wise people. They are scholarly people. They don't rush to conclusions. They are sensible people. But a kind of an inertia is settled because of the experiences of the past. Experiences of the religious people, experiences of the fake Gurus, experiences of the other experiments that people have done and they are really now fed up and fagged out that, “We are not going to go in for anything more!" But supposing you are seeking a diamond and ultimately find it.

Won't you ask for it? Because you have been seeking that only.

So why not get to it and do it? No use identifying yourself with something: with some organization, with some cult,

with some sort of a misguided religion, or religious behaviours.

Best is to be your Self. And then, you will be surprised, your hands will speak. You yourself will know who is the real who is the unreal.

Now there is one drawback that people feel that, if you start jumping, you have become, you are, blessed by Holy Ghost! If you start talking something non-sensical, you have been blessed by Holy Ghost.

How can that be? We can always jump. It's not difficult. Is it difficult to jump? Anybody can start jumping. Anybody can start saying something like that. Now, this misunderstanding has come, because `Saint' Paul I think said something, which he should not have said because he was not realised Soul.

And he had no business to say that the Holy Ghost made them jump. Actually this is done by the [dead] spirits. People can mesmerize you and can make you jump. They can mesmerize you. You have seen so many cases where mass hypnosis has taken place. People are just hypnotized to become the slaves of these people, to give them money, to give them Rolls Royces, to give them all kinds of useless things.

So we must understand that this happening is a living happening. You cannot pull out your Kuṇḍalinī like that. You cannot pull out the primule, the germinating seedling from the seed. You cannot pull it out [and say], “Now come along now! You grow." It has to grow by itself. In the same way, the happening of the Kuṇḍalinī, in so many people you can see. If you come to My program later on, you will be able to see. That you can see the

pulsation of the Kuṇḍalinī in the Sacrum, you can see the pulsation rising. You can feel it on the fontanelle bone area. And once this opens out, you can feel the Cool Breeze coming out of your head. You can feel it, the Cool Breeze, coming out. And also then you start feeling the Cool Breeze in your hand.

Now this you cannot do! No one can do it.

Something has happened to you. And then once you get it, if you start practicing it, you will be amazed what powers you have got. Because, supposing, even if I have powers, or if I have money and I don't know how to spend it, I don't know what the money is, what this paper means, what's the use? In the same way, when you get this, you have to give it to others. You have to look after others. You have to impart this beauty to others. In doing that you do not get into any trouble, you do not suffer from anything. On the contrary you feel so elated. And the fulfilment of your being comes into you that there's some meaning to our lives.

Something that we are doing which is so substantial, so living. We are doing the work of God.

May God bless you all.

It's such a big subject that, in this short time, I cannot explain every aspect of it. It's a very, very wide thing. But now I can only say that there are about six [to] severn hundred lectures I have given only in England and I don't know how many in India. Still they say, “Mother, always you say something new.

I just don't understand." But whatever it is, knowledge by words is of no use. Knowledge should be your own which should come to you as light. For example, in a library, if

you get a way of knowing every book, just by the subtle entering into it, or penetration into it, you [will] become the knowledge.

So best thing is to become the knowledge instead of just knowing through Me and understanding it through Me, which you can do it. You are quite capable of doing it and it can happen to all of you.

I wish this evening especially it should happen.

They say it is a small village. And to Me, small or big doesn't matter. It's how many are there [who are] genuine seekers, who are genuinely seeking God, who are seeking their Spirit? That's the most important thing for Me. Even there is one person like that I'll go to that place. Whether it's one house, or one village, or a big city, makes no difference to Me.

May God Bless you.

And I would like to have some questions from you if you have any and they you try this process of Kuṇḍalinī awakening which doesn't give you any trouble. Doesn't trouble you. If you have any sickness you get cured. If you have any mental problems, the hangs up, they fall off and afterwards you do feel the Cool Breeze coming out of you. But, after that, you have to practice it a little bit and establish yourself.

That's very important is the establishment.

Can I have any questions from you please if you have any questions.

Seeker: Can you give me any ideas which would help my own particular problem, that many years ago I wandered away from Western established religions towards the

Buddhist ideas and now and Buddha as I understand, as you've just repeated, did not deal in problems whether there's a God or not, he put it on one side as I understand it and so I am not in a position to take advantage of the ideas of going through God to a fuller life.

Shri Mataji: So, about the Buddhists you see, as in every religion it's also in Buddhism. They have lost the essence of it. We think that if we give up Catholicism [and] we become Protestants, we'll be saved, is wrong. If we think [that, if] we give up Protestantism and become Buddhists we'll become alright, it's not so. Supposing we think we'll become Islamic, we'll be alright, is all wrong. Because all of them are playing the same game. And the game is this: none of them are enlightened people, none of them are realised. Even the Buddhists, I was surprised that the head of the Zen system fellow who came to India, he has no realisation of any kind. And I was amazed how this man is heading the Zen, in which religion it is definitely hundred times, this Viditama, the founder of that, he has said that, “Unless and until you are a realised Soul you are not a Zen." I mean he said it so clearly, I mean more than anybody else he said it so clearly, even they [are the same]! I was amazed that, all of them have got this kind of a self-opinionated religion. I was amazed! Even this man, the one who said so clearly, Viditama, if you read Zen and his preachings, because he was the founder, you'll be amazed that he's said that, “Unless and until you are a realised Soul” it's called Kaśhyapas, “Unless and until you are a Kaśhyapa, you are not a Zen." They are `followers' of Zen! How can you be

followers of something? They are blind following the blind. And that's how they all fall into ditches. All of them are like that. They do not have humility to say that, `Alright, we are not realised Souls.' But as Buddha has said, we have to keep to the middle path. Every religion has said that, “Keep to the middle path. Keep to the central path, keep to the normal life." These Buddhists are they in the normal path? Some of them I have known are horrible people. One disciple who came to Me, his name, he called himself `Omkar'. He was an Englishman. All his bones were broken. Can you imagine, the backbone, the whole backbone was broken by these lamas! Hitting them on every bone to `raise' this Kuṇḍalinī! Can you imagine! Such cruelty these people are doing. What do you think of these dalai lamas and these lamas and those lamas? I have been next to dalai lama once, it happened, My husband was secretary of the prime minister of India. And the prime minister's wife and we used to go to these parties so I had to go as a hostess and all. This fellow was sitting next to Me. He was burning hot and I said, “This fellow is `dalai lama'! I can't understand how is he dalai lama. I mean he's burning hot!" You see, these lamas lived in Tibet, which is a very poor country. After going there only, we realised how they exploited these poor people. They are so poor. These people are one of the poorest people you could think of, poorest countries.

So poor! And these lamas lived there in palaces! They drank their wines in golden cups. By wearing only these yellow dresses you do not become a person who is concerned about poor people there. These were just like

parasites! Parasites of the worst type! I have seen these people who follow Buddhism, that you try to wear this dress, make people sacrifice everything; for whom? For these lamas? For whom are you sacrificing? God doesn't want you to sacrifice. He doesn't want you to suffer. He doesn't want you to suffer at all, believe Me! He doesn't want you to suffer. But you have developed this idea that, “We must suffer for God!" Why? Christ has already suffered for all of us. Or is it anything left for Him to suffer? He suffered so much didn't he! Do we believe in Him or not? If we believe in Him then we should know that He has suffered. He has suffered so much and now we don't have to suffer. The only thing [is] we have awaken Him within ourselves. He said that, “Once I am awakened in you everything will be alright." We have to just awaken Him within ourself. He has done the job for us.

Actually I would say the missionaries from here have never told Indians that such and such [great] person is born. They didn't. They gave such a bad picture of Christ, you can't imagine! What they said about Christ was that, “You all should become converted and you'll be all saved." And they forced people to be converted. They used to carry Bible in one hand and pistol in another hand and converted people.

Now, by branding somebody as `saved' will you be saved by these people, these missionaries? Did they have any power to brand somebody as `saved'? They did not! How could they? How did they get their authority? From where? These are all unauthorized.

All of them have been doing things like that. I must tell you, the new generation is now revolting against it. Of course, by revolting against these people, you should not revolt against Christ, not revolt against God. He exists in you. He exists. He exists. When these people gave such a wrong impression about Christ, all the menial castes, all the rotten people, the scum of the Country became Christian. Because they thought, “We all are becoming English people!" Actually people believed in India that Christ was born in England! They all started wearing suits and the way they started wearing frocks and they thought they have become all now English, means Christians. You see this was the problem! But nobody told that Christ was born the way he was: that he's the one who came and sacrificed his life to save us, to wash our sins. This point nobody said! If they had said that then it is described in the ancient Indian scriptures that Mahāviṣhṇu will be born and he will be born and he will be crucified and he is the one who is going to wash our sins and he is going to be established in the Āgñyā Chakra. There was no relationship established.

So when it was said that, “Mahāviṣhṇu will be born, He will suck all your Karmas, all your actions.

And unless and until you pass through him, you cannot get realisation." It is said so that, “Through this part you have to go. He's the door." All this is described, “He is the support. He's the support." Every time he's described in our scriptures, in the Devī Māhātmyam. But nobody gave us the proper report then [of him]. Now the thugs as they are, they said, “Alright, your Karmas are still there because Mahāviṣhn. u's not born.

So you give us money and we'll recommend to God that your Karmas must be sucked in. Your actions must be sucked in." So the bribing started to God, you see.

So all these brahmins started making a lot of money out of poor people, thinking, “Oh for our bad Karmas let us give some money to these brahmins. At least they will recommend our case to God and we might be saved." All these kind of wrong impressions because nobody went into the clear life of Christ. Then the Jews! Jews denied Christ. They said, “We don't believe in Christ, we must suffer." Alright, suffer! They had Mr.

Hitler coming down there to teach them a lesson. Now they are making others suffer! Wonderful people they are! It's all a mess I tell you! One better than the other.

Now it's time for us to face it clearly. Whatever mistakes are done, whatever disturbances one has created, can be all forgiven as long as we seek and we find our Selves. Everything can be forgiven. It's like this, that you are in the water then there's the fear of the sharks and the waves but if you are in the boat, you are out of it. You have to just get out of it that's all. Whatever has happened has happened.

All the mistakes were committed in ignorance. These people who talk about Buddhism and Buddhists, they are all against Buddha. There centre that is catching is of Buddha, you will be amazed. Buddha's centre is here [pointing to the right side of the forehead]. It is catching. All those who go to Buddhists, our Rita was one of them and there were many just like that, they all had this problem and it was to be corrected. It's true. We are following them in a blind way I can understand, but at

least we should not assert it. We should be in a humble way that still we have not known it. We have to know it. And that's why these problems are created that: is Buddha greater than this one or Mahāvīra greater than that or Viṣhṇu greater than that? These are one part and parcel of one body. They are the aspects of one body.

Christ Himself has said, “Those who are not against me are with me." Who are those? They didn't even allow Christ to talk. He was crucified within three years time, if you see his life with those people, terrible people! Absolutely nonsensical! What was there to crucify Him? But they couldn't bear that Truth would come, those Satanic people. They crucified Him.

So it is the duty of the Christians today to get enlightenment and save all the other Christians. It's the duty of the Jews, here also there are some Jews sitting, who came from Jew's land I should say, but now they are Sahaja Yogis, to save the Jews. There are Hindus who must save the Hindus. And all of you have a duty towards all others who are following the same kind of a blind faith. Because there's nothing wrong in the religions but in the `religiosity' that followed after it.

Alright? It can be corrected. Don't you worry. Any problems that have arisen people can't understand when they are Christians, Hindus, Buddhists. How is it their health is so horrible [and] they have all the problems of the world when God is there [and] they are praying to God? How is it that... at least health must be looked after, [but] even that is not alright! Then what's the use of going to church? And what's the use of remembering God? But nothing is wrong with God. God looks after us

all the time. Only thing is we have gone into wrong hands.

Any other question?

Sahaja Yogi: How can we Sahaja Yogis work it out when spreading your?

Shri Mataji: The right to the left you have to put [for] him. It's gone into imbalance. We'll work it out on him.

Seeker: Should we read The Gītā, The Upanishads and should we also read the Gospels as well? Christian Gospels.

Shri Mataji: You see, everybody should read everything, there's no harm in that. There's nothing wrong in it. If we can read pornography, we can read [spiritual books] definitely [laughter]. But as you said, whether the Christians should read it or not, whether the Hindus should read it or not, I do suggest that these taboos are given by people who want to make money out of you. There's nothing wrong in The Bible, not a word. I do not find any dissimilar thing, or there is no contradiction or in the Gītās or Vedas or anything. Now Vedas, `Vida' word means `the one who knows, the one who is enlightened'. The one who is enlightened is the one only who is the speaker. Now the first verse of the Vedas is that, “If reading this book doesn't give you enlightenment, better not read it. It has no meaning." Christ, what he has said, who is following Him? He said, “You are to be born again." Alright? Didn't He say so? Who is following that point that you are to be born again? Who is bothered about it that, “I have to be born again"? Koran has said [that] there is going to be a resurrection, you are to be

resurrected. Muslims, are they following resurrection? Now they are bent upon destroying each other.

For Jews, whatever is said in Judaism is the same thing. I mean if you read any one of these books and anything, it is said that, “You are to be enlightened." All this is for enlightenment. Because people would have asked, “Why this religion? Why `don't eat this,' `don't eat this,' `don't kill anybody,' `be a good person'? Why?" Because you should be a human being. And a human being he has these Ten Commandments as his sustenance. That's why all these religions, Judaism, Christianity and Islam, all of them believe in the Old Testament and in the Ten Commandments. But to what extent they are going now, if you go and see their Ten Commandments you will be amazed! But to see to the subtle side of Ten Commandments you must be a realised Soul. For example, there is this commandment that, “Thou shalt not reproduce or recreate whatever is created by the Mother Earth and the Heavens and worship it." Now what is created by the Mother Earth? Do they find out? They will find out what is created by Mother Earth. You know when a campus is own through, you find at different points [that] it just bends. Why does it bend there? It should go straight forward. It bends at one point. They found these two lines going in like that, which goes from north to south and one from west to east. Two lines they meet up. Now what are these lines? What do they mean? Why does it bend? They can't explain it. They can't even explain from where do they get the magnetism in the Mother Earth. They cannot explain. They cannot explain many things. Alright. Now, Stonehenge, what is that? I

went to Stonehenge. I said, “This is the one which is created by Mother Earth." You could feel the vibrations. Now these people who go to Stonehenge and do all kinds of this rituals, they don't know why they go there. In India we have many places where we have these vibrations coming from the stones. And these stones have a form, absolute forms! They have never been chiseled out and you can see the forms there and you are amazed at the forms, how these forms are there. And they give vibrations. For example in a small place called Musalwadi [in Maharashtra] they took Me down there to find out if that place is vibrated. The question came in about say fifty, sixty years back when a gentleman from England, an engineer, went down there and built a dam. And the dam, at a point, would not stand. It was just exploded. Every time they tried to put a dam there it all exploded.

He couldn't understand.

So they called a saint. And the saint said that, “This dam cannot be built this way, you have to go around it, because this place is vibrated. Vibrations are coming out of this place.

There's some sort of a thing that has come out of the Mother Earth." So, imagine, the dam is like this and it goes round and then straight. It's a clever dam, never in My life I've seen a dam like that. Now, when I went there I found that it is true. We opened it out and there was a beautiful rock giving Cool Breeze even in the worst [hottest] summer you get the Cool Breeze coming out of that place, you can see it. Such a Cool Breeze! Only a saint can say that because you must have vibrations to feel it. If you are not sensitive enough how can you say?

It is [through] vibrations you can say who is a saint, who is not a saint. Because you have not reached that point of absoluteness, still you go by relative. Supposing I come in a sarī you may say [that] I am a saint, may not say. You may not be that sensitive to understand. You may understand Me as a genuine person. You may say, “No, she is hocus-pocus." You can say that. But a realised Soul will know who I am. Even if he has never met Me he will know who I am. Even [if] I have not met the realised Soul, I will know whether he is realised or not. For example William Blake. The first exhibition I saw and the last, I have not seen any other exhibition, was of William Blake. And the Sahaja Yogis were surprised why I was so anxious to see William Blake. Because I know who he was.

He was a very great soul, very great soul, born in this country to give you a great idea about these great times. But many people don't like him. He's gone into such details of the description of Sahaja Yoga that he's said that, “Men of God will become prophets and they will have powers to make others prophets." He has used vibrations, the sinews and everything. He's described it in such details that you can't imagine! He came to give you a warning. But people think he was mad. Many people think he was mad. I mean, you talk to them, “Oh William Blake! Oh!" They'll say to Me. Because they are not sensitive. They are so gross, so complicated. And this is what he did.

To understand all these religions, to understand the subtle side of what they have been saying, we have to have vibrations. If you read them before you will become

confused, it will be contradictory. You will be surprised. You will say, “How can this be? This is not written in The Bible, this is written in The Bible." They are describing that area which was necessary at that particular time. Then they described another area which was necessary at that time. For example, at the time of Moses it was necessary to establish the religion. At the time of Christ it was necessary to establish the idea of Spirit. And that's why there's a difference in what they were teaching and what he was teaching. Because they came at a time when that was needed. At the time of Mohammed something else was needed which he tried to preach. And today is the time of realisation so I am talking of Kuṇḍalinī and of realisation.

It all is, one after another, we can say, is the opening of the petals of the beauty of Divine. And because a fruit has appeared on the tree will you deny it because last year there were only flowers and today there are fruits? It has come out of the same flowers. These all flowers grew on the same Tree of Life, but at every time they plucked it out [then] they were dying, then they became ugly. They started saying, “This is mine, this is mine, this is mine” and they are fighting with the dead, nothing living. I am talking about the living God and not of the dead.

So reading any book is just the same, makes no difference. But after enlightenment you will understand that there is no difference in any one of these books. There's nobody as just chosen by God and the others are discarded. Is a wrong idea we have got. These are all mythical ideas. Our forefathers have lived with it, their

forefathers have lived with it. And they cut each other's throat on this point, what have they achieved? Nothing. This whole world is created by God not for fighting with each other in the name of God! How many fights we have had so far thinking that we are better than others. These are all wrong ideas.

First of all you get your realisation then you will know that they are all part and parcel of one God.

So reading all these books is not going to help you till you get your realisation. Alright? So first you get your enlightenment then we'll talk about the books. Books do not give you the real knowledge, they do not give you realisation. Everybody has been reading books. Anybody can write books. I tell you Christ never wrote any book. Very easy to write books. Anything you want to write, you just have to have little money, that's all. People have written about witchcraft, about Satanic forces. Everything they write. If they have money they can write about anything.

So how will you know this is true? Unless and until you have that absolute being awakened within you which gives you absolute values of these.

Now any more questions?

Seeker: Would you say that everybody in the world now is a reincarnation or are there still original souls coming into the world?

Shri Mataji: No, no. They are all reincarnations. No doubt about it. And there are great souls which are being born, who are realised Souls. Many children in England are born as realised Souls. This is the time of what we call The Last Judgement. You are going to be judged by your

Kuṇḍalinī, by your awakening [and] by nothing else. Nobody is going to put us on a weighing machine to see. It's how far you go with your realisation. This is the judgement time that has come. All of us have to get it. As many as can but I don't know, [the Gospel of] John says that only 144,000 in this whole world! It's not even 0.000001%! That's not so. How can it be?

Seeker: Is it not possible for 144,000 mahā-mahatmas?

Shri Mataji: Mahā-mahatmas? There are so many. Many, many more. They are doing their jobs alright. There are thirty-five crores of devas. But they are all busy doing their job. But you are on the stage. They are working out for your realisation. You are on the stage. Like on the stage when actors enter, they are helped by everybody around, they are in the background. Like that there are so many.

That's what I said that the Divine Itself is anxious to help. That you will realise very soon, as soon as you get your realisation, how you are helped by angels every moment, every minute. Now there are Sahaja Yogis who are smiling because they are all being helped like that. Every second you will find that you are being helped by the Divine. It's true. I'm not telling you fantastic stories. It's a fact. Believe Me. We live in a world where we have no light, so we believe that way, but once the light comes in you'll be amazed how you are placed. Just they are ready to do anything that you want. Actually your wantings change, your priorities change. You start wanting something that you never wanted before.

Should we start now? [To the children:] You sit down here quietly. All of you sit down here quietly. [Children are laughing and playing.] You work on him?

Sahaja Yogi: He's blind Mother.

Shri Mataji: He's Blind?

Sahaja Yogi: He comes to the meeting in Manchester.

Shri Mataji: When did it happen? Blind Man: One eye forty odd years ago and the other eye fairly recently, but I can still see just a little.

Shri Mataji: Can you come to London? Blind Man: Actually my youngest son is married and he's living in North London and I'm hoping to come down and see him in a few weeks time.

Shri Mataji: You do come along there, now! I am in London these days and we'll work it out. Alright? Please come, because we'll have to work it out. It will take some time.

Where did you go for this Buddhism?

Seeker: Well, the story's much more complicated that and I think it would only confuse the meeting if I were to tell it.

Shri Mataji: Alright, so you come along. Best thing would be [that] you come along. But first of all you write to us and then they'll let you know. And whatever is the best time, do come there. It's not difficult. His Āgñyā's caught up completely there. That's all. And let us know your story also if you don't mind, when you come there. I'll have to give you some time. Alright? And you'll have to give some time to yourself.

Yes My child?

Seeker: I've got a much more physical fault with my sacrum joint and I wondered if it actually did any damage to the Kuṇḍalinī? Would it damage it at all?

Shri Mataji: Alright, we'll see about it.

[To a small child:] I don't know what's the matter with her today she's over dynamic. Go and get some flowers for mana. [Child runs off to get flowers, Shri Mataji laughs.] How free they are! Such a source of joy isn't it? Alright.

So should we start? I think lights are too many here. Could you put off some of the lights? Is he from some magazine? Which magazine? Journalist: I'm freelance.

Shri Mataji: You have a magazine of your own? Journalist: No, just freelance.

Shri Mataji: Recently there was somebody taking My photographs in Delhi and I didn't know what he was doing. And then they had a very big article, it came in one of the magazines, you see, which we received in London and I was amazed, the way he was going round I didn't know he was going into such details about our programs. And he really wrote very beautifully. You saw that one? Surprisingly I didn't even know the fellow who he was. I wish I had asked him I thought, who he was. He had written very beautifully and in a very well known magazine which actually deals with more economics and economic affairs. Imagine to put God in there! But he did it. He did it and they published it and it was a very `wrong' magazine. And to support it he got something from other Sahaja Yogis and some scientists and all that. And from them also he got one or two articles to be published. And I didn't know how he was working it out. But when I saw the magazine I was amazed how he could

write all about you! But why I saw this [is] because he was also taking My photographs all the time so that's why I asked you. I hope you don't mind.

Journalist: No Mātājī.

Shri Mataji: Alright. Close your eyes now. Because he got his realisation and then he did [the article].

After realisation he worked it out. He was a very genuine man, quite old. I didn't know really that he was from the magazine but when they wrote to Me, the report about him and I was amazed [that] he was above seventy years of age! And he did so well.

If you can close your eyes. Just please close your eyes.

You have to trust yourself and not to doubt yourself. It will work out in all of you, I promise it will.

But don't doubt yourself.

Also one should not feel guilty. That's a very bad habit of feeling guilty. All the time, “I've done this wrong, that wrong." In the presence of God you are not guilty at all because He is the ocean of love, the ocean of compassion, the ocean of forgiveness.

So give up all that. Just, to begin with, I ask, request, all the people to say, in their hearts, that, `Mother I am not guilty.' Now, you have to forgive others. Forgive everyone. You might say that, “Mother how can I forgive? I can't forgive." But really it's a myth that we don't forgive. What do we do when we say we forgive? Nothing! Actually by remembering all the horrible things done to us we ruin ourselves, we trouble ourselves, we torture ourselves. Just to say, `Mother I forgive.' We have to forgive, as in the Lord's Prayer, “Forgive us our

trespasses as we forgive them, those who trespass against us." First we have to forgive those who trespass against us so that our God, God Almighty, will forgive us for our trespasses.

These are one of the loads that human beings carry, that they find it difficult to forgive others, that they feel guilty all the time. As I have told you that Christ came on this earth to suck in all our sins and our mistakes.

Now put your right hand on your heart and say in your heart, `Mother I am the Spirit.' You are the Spirit. Just you have to assume. Just say. Say it thrice, with full faith that you are the Spirit. You are the Spirit.

Say it and you will feel the Cool Breeze in both the hands. In the left hand you will feel the Cool Breeze. Or ask the question, `Mother, am I the Spirit?' Just ask the question `Mother, am I the Spirit?' You will find the Cool Breeze in the hand flowing.

Now, if not you put your right hand on top of your forehead with the left hand towards Me and just say, `Mother I forgive everyone.' Put it on your forehead because Christ's place is there. `I forgive everyone.' Just on the forehead.

`I forgive everyone.' Please say it.

Now you must know that God has given you freedom. In your freedom you have to ask for your realisation. I cannot force it on you. I cannot say that, `Alright, you can get your realisation just like that.' You have to ask for it. If you don't ask I cannot get over your freedom, that's given to you. God cannot take away what He has given to you.

Now put your right hand on top of your head at the Fontanelle bone area, higher than your head and say, `Mother, please give me my realisation, I want my realisation.' You have to say that, otherwise it's not possible for Me. I cannot cross over to your freedom. You have to come forward to get it.

You'll find a Cool Breeze coming out of your head. Now if you are tired put your right hand towards Me and left hand [above] and you should get it [on that hand] also again.

The Sahaja Yogis can go and see now if you are getting Cool Breeze and if you are realised. We have some of them here and they can look after you. Don't get upset with them. You can do the same tomorrow.

I request the Sahaja Yogis to find out.

Contents: 1982-07-31 **Very Early Morning Sightseeing, Yorkshire, UK**

[Referring to the ruins and rubbles of an old asbestos mill which was giving cancer to many local people:] No one will ever get ill from the dust. [She waves Her hand over it in blessing.]

Contents: 1982-07-31 **Talk to Sahaja Yogis and Round Setting Questions and Answers, Afternoon, Seminar, Cowley Manor Seminar, Cheltenham, UK**

Please be seated. [Pause.] So nice to see you all here. *[UNCLEAR* That's now My ideas is] to have a very informal talk between the Mother and the children we can say. And for that I was thinking of getting about.....

Contents: 1982-07-31 **Talk to Sahaja Yogis, Dedication Through Meditation, Evening, Seminar, Cowley Manor Seminar, Cheltenham, UK**

Sit down. [Hindi.] Alright? [Hindi.] Today, for the first time, I'm venturing to say something which I should have said much earlier.

As today I told you that it is necessary that you have to recognize Me. And that recognition is fixed, that condition is fixed. I cannot change it. As Christ has already said, that “Anything against Me will be tolerated, will be forgiven, but anything against the Holy Ghost will not be." It's a very big warning...

very big warning. Perhaps people don't realise what it means. Of course none of you are against Me, that I know and you don't do anything against Me, that's very true. After all, you are My children, I love you very much and you love Me. That's only the warning that Christ has given you. But one must think why we are not progressing so fast as we should have.

When people are mesmerized, they fall completely at on the ground in front of their Gurus, absolutely.

They give up their money, they give up everything, homes, houses, families, children and just go at, when they are mesmerized. Without asking any questions, without going into any detail, without trying to find out the life of their Guru. All such people also go very fast into darkness, into greater darkness and into complete destruction.

But you are Sahaja Yogis and you have to construct yourself. I didn't want to shatter your egos before, never to tell you in these words. Perhaps this is the first time I

am saying this to you, that you have to dedicate yourself completely to Me, not to Sahaja Yoga, but to Me. Sahaja Yoga is just one of My aspects. Leaving everything, you have to dedicate. Complete dedication, otherwise you cannot ascend any further. Without questioning, without arguing. Complete dedication is the only way you can achieve it.

People still get caught up, still get into problems. What's the reason? So many people ask Me that, “Once we have got realisation, how is it Mother we go down?" The only reason is, the dedication is not complete. Complete reverence and complete dedication has not been established. You still do not know that I'm Divine, to that extent as you should. I don't say all of you. But still if you look into your heart and look into your mind, you'll find out that, the complete devotion that you had for say, Christ, or for Kṛiṣhṇa, or for any one of those, who have been, is not there. Kṛiṣhṇa said, “sarva-dharmān parityajya mām ekam sharanam vraja” “Forget all the religions of the world." He didn't mean the religions like Hindu, Christian, Muslim, but he meant all the sustenances.

“Forget all the sustenances and completely dedicate to Me." That was six thousand years back. And there are many who would still say that “We have completely dedicated ourselves to Śhrī Kṛiṣhṇa." Where is he now? Even those whom I have given realisation, they say like that. Of course, there is no difference between him and Me, but today I am the one, I am the one who has given you realisation. But our first consideration could be our jobs, our own problems, our family problems, our

financial problems and dedication is the last. I'm illusive, it's true. My name is Mahāmāyā. I am illusive, no doubt. But I'm illusive just to judge you.

Now the dedication is a very important part of the ascent. Why? Because when you are precariously placed, when there is immediate danger to your existence; at this time, when the whole world is standing at a precarious position where it is going to be destroyed completely, it's very important that you cling on to a thing that is going to save you with complete might and complete faith. Like you are getting drenched in ordinary water, doesn't matter. But if you are sinking in the sea and there's a question of this moment of existence and that moment of destruction, at that time, if a hand comes forward to fetch you out, there's no time for you to think anymore but cling on to it, with all your might, with all your faith. When we have badhas, when we are surrounded by negativity, we get aware of it and little bit we get confused.

And that's the time we want to cling on. But the badhas give you ideas which are detrimental.

So a big struggle is set in. At that time, what is the best way? The best way is to forget everything else. Forget that you are possessed, or there's a badha or anything. With all your might, whatever is there, you have to hold on to Me.

But our style of dedication is very fashionable and modern, in which Sahaja Yoga is by the way and Mother is very much by the way. I'm sorry it's not going to work out. I don't have to tell this to Indians, because if you read Devī Māhātmyam it's sufficient. Even if you read Her

thousand names, it's sufficient [to understand] that she can be only achieved through Bhakti . She can only be achieved through dedication.

She's only fond of her bhaktas, the devotees... it's nowhere written that she is fond of people who can talk better, who can argue better, who dress better, who live better, who have better surroundings, but her devotees. And this devotion and dedication should not be a frenzy or anything, but should be sustained, continuous, everowing, ever growing. That's the only way, now, for further development.

For us, so many small problems are important.

Somebody has a house, somebody has an admission in the college, somebody has some job to be done. All these considerations are Dharmas which Śhrī Kṛiṣhṇa has described as “sarva-dharmān parityajya mām ekam sharanam vraja." Give up all the Dharmas, all the so-called Dharmas. Like the `patni Dharma' is the duty of a wife, then the `pati Dharma' is the duty of a husband, then the `putra Dharma' is the duty of a son, the `pita Dharma' is the duty of a father and duty of a citizen and a duty of a world citizen. All these Dharmas are to be given up entirely and you have to surrender fully from your heart.

I am what I am, I've been that, I'll be that. I'm not going to grow any more, or less. This is an eternal personality. It is now for you to get out of Me whatever is possible, to make the best use of your birth in these modern times, to grow to your full maturity, to be able to work out the complete design that the Divine wants to do through you.

As soon as the dedication starts, you become dynamic. Clinging on to that.

For this, meditation is the only way, I should say. Of course, rationally you can do many things. You can rationally accept Me. Emotionally you may feel closer to Me in your heart. But through meditation, surrender. Meditation is nothing but surrendering, is complete surrendering, which is a difficult task for a modern man in the Western countries. He only surrenders to people who mesmerize, who fully mesmerize them. They become slaves of people who mesmerize them. But in their own freedom, their ego is more powerful than their Spirit, in their own freedom. That's why all the free countries have gone to dogs.

Because ego plays part, not the Spirit. They cannot master their ego when they are free. Only if somebody can just entangle their ego and mesmerize them, then they are alright, they are shut, completely they surrender. And it's so obvious from the way these false people have mastered their art of making slaves out of you.

In your full freedom, complete freedom, you have to surrender. Freedom does not mean ego, one should understand. Freedom is killed by ego. Not only killed but is disfigured and disgraced, is made ugly.

Freedom, in its subtlest form, is complete egolessness, no angularities, complete hollowness, just like the flute, so that the melody of God could be played well. That's complete freedom, no hang ups.

We have to realise that we are in the mire: mire of ignorance, mire of sin. Ignorance brings sin. How are we

to get out of the mire? Anybody who tries to pull us out will also go in the mire. Anybody who wants to come even near the mire, gets into the mire. He becomes part and parcel of the mire. The more we try to take help from others, we pull him more in the mire and we go more down, deep down, into it.

So the tree of Kuṇḍalinī has to grow and from that tree, the Param'ātmā himself, the Parabrahma itself has to pull you out. It grows out of the mire and the Parabrahma has to pull you out, one by one, take you in the hand and swing you outward. But still when you are pulled out, your catch is not sufficient, you slip down again. You come up partly, again you go down. It's very enjoyable to be out of it, but still the feet have not come out fully. Still you are not completely cleansed. Unless and until you are cleansed how can you be completely blessed? You are to be fully blessed by the Divine, clothed by the Love of God.

It is surprising to see how the people who go to these false Gurus stick on to him, or stick on to her, in such tremendous dedication, that you are amazed, they become just like cabbages! Till they are completely ruined they just go on surrendering everything that they have.

But in Sahaja Yoga, when people come, they do not surrender, but they are nourished, they are looked after. Their health improves, their wealth improves, their mind improves, their relations improve, in every way they feel better, their conditions improve. They are all the time getting the benefit. We have ashrams which are beautiful, which are the cheapest and the food. Every

advantage that is available is the best possible. Everything is there but we don't realise that all this nourishment is for what? All these blessings are for what? For your higher ascent. For getting out of the mire completely.

Now, you have to adhere, you have to be dedicated, you have to be devoted. We have reservations, we hide things. We try to be smart. That's a dangerous situation. You all should, within yourself, try to see what part is so sneaky? What conditioning is keeping you out of dedication? What is making you have reservations? What fright? Which ego? What angle still sticking out into the mire? What attachments? What relationships? You have to get out of it. Unless and until you fully get out of it, it's not going to work out. There's no place for half way things. It's a question of now or never. Christ [Śhrī Kṛiṣhṇa] has said it. He has said, “You give your devotion and dedication and then leave the rest to Me." I know who are progressing in dedication and devotion. I have seen people improving so much. You need not face Me, you need not see Me. In person I need not be there. It's all in the All-pervading Power.

That's all My light, which knows each and everything about you. And only through your Bhakti , through your devotion and dedication, you can achieve Me.

My achievement is the complete manifestation of your Divine power. It's very simple, made so simple.

I'm only pleased by people who are simple, innocent, who are not tricky, who are loving, affectionate to each other. It's very easy to please Me. When I see you loving each other, talking good of each other, helping each

other, respecting each other, laughing aloud together, enjoying together each other's company, I get my first blessing, first joy. Try to love each other, in dedication, because you are all My children, created out of My love.

In the womb of My love you all have resided. From My heart I have given you these blessings. I get disturbed, My hands shake and you fall back into the mire again, when I see you quarreling among yourselves. Jealousies and petty things which belong to your past life. The help is not so much gross that it's felt, but is a very deeper sense of security, that is given to your brothers and sisters. A deep love should exist. Selfishness has no place in Sahaja Yoga. Miserliness has no place, has no place. Miserliness is a sign of a very small mind. I'm not saying you give Me money, of course, but the way we look at money, the way we cling on to it, the material things, the material wealth, the material objects, the possessions.

The greatest possession you have is your Mother. Through Her you have your brothers and sisters. Get out of that past life, that past is the mire. That should be over now. You are quite aware how, with My power of Love, I have protected you all. You know how, at every moment, I've helped you. At every point of your desire, I have come forward to fulfil it. That's one side, as I said, the nourishment. But now your ascent has to come from you. Your rising has to come from you. That has to be worked out by you and you alone. Not by any other Sahaja Yogi or by Me. I can only give you suggestions. Not only the suggestion, but the warnings. And everything is at hand. It's all worked out so well. I'm in form.

I'm in form before you. You don't have to go anywhere. The whole thing is within yourself. You don't have to give money, you don't have to give anything. But develop that dedication within yourself. You see, this man, who interviewed Me, said that the unemployed are manoeuvreed by the politicians. Let God manoeuvre you! But how? Supposing I have a brush in my hand, I want to paint something and the brush I cannot manoeuvre. The brush is angular, it's troublesome, it's inconvenient to use that, or, you can say it's uncomfortable, it's awkward, it's clumsy. How can you use it? Dedication is the easiest way to get rid of all your angularities, all your problems, all your badhas. Now watch and see within yourself: are you dedicated? Those who are fanatically adhering to Me are also not correct. There should be no fanaticism about it. The whole thing becomes a complete logical thing. There is no fanaticism about it. Like, somebody has to go to a doctor, to see a doctor, then a fanatic person might say, “Ooh! I'm not going to see the doctor. I'm not going, because Mother has told me that she's going to look after me." And when she gets sick, she'll come to Mother and fight, “Mother! You had told me that You'll look after me and how is it I've got sick?" This is fanaticism.

What is surrendering? Deep down you should say, `It's the Mother, She's there, She's my doctor.

Whether She treats me or not, whether She cures me or not I've nothing to say. I only know Her. I don't know anyone else.' It's very logical. The logic is, that, Mother is the most powerful thing that you know, logically it's true. “And if she is so, she'll cure me. But if She does not cure me, it's Her power, it's Her whim. If She wants to cure

me, She'll cure me. If She does not want to cure me, how can I put my will upon Her?" Like the dedication of Śhrī Gaṇeśha. That when his Mother said, “Alright, between the two brothers, Kārttikeya and him, the one who will go round the Mother Earth first, will get the first prize." Now poor Gaṇeśha had a little rat on which to move, but wisdom he had. And Kārttikeya had a very quick-moving peacock which used to fly. He looked at the peacock and he said, “Who is greater than my Mother? She's Ādi Shakti! What is this earth? Who has created this earth? It's my Mother has created her. Who has created this sun? The Mother has created it. Who is greater than my Mother? No one. Why not go round my Mother only? What's the need to go all round the whole earth?" And much before Kārttikeya arrived he was sitting with his present in his hand! His innocence gave him this wisdom to understand, that's what logical is. It's very logical. And it is also logical that `Mother feels my pain more than I feel it.' What will you say when Christ was crucified for his Mother? She was Mahālakṣhmī herself, so powerful. She made her son sacrifice his life, suffer like a human being. It was too much, to make your son sacrifice, when you have all the powers in your hand to finish everyone there. But it was a very delicate job to create this Āgñyā Chakra. What does that mean? Does that mean that He lacked something in his devotion? On the contrary, she was so sure of him, of his devotion, that she could ask him to do that.

So when we expect Mother to do something for us, the people who say, “Alright, Mother I'm giving this thesis. I must get through." Alright, give a bandhan, you get a

thesis. “Mother, I'm trying to discover this." Alright, you have it. “Mother I'm trying to get this job." You have it.

Now, it's the other way round. How many have dedication like that of Christ? None. It's a fact.

Why is he the eldest brother? Because there's no one like him. He went through all that, those horrible sufferings, because He was part and parcel of his Mother. She suffered much more than him. He also went through that suffering for a greater goal, for a greater happiness, for a greater life, for a wholesome life.

That is real dedication. But the false people can take advantage of this.

When they make the people suffer, they say “After all, you have to suffer." See how they make it up. “You must suffer because, after all, you must suffer otherwise you cannot rise." It's a very subtle understanding, very subtle it is. That will make it clear to you, that, in Sahaja Yoga, first you are nourished, you are brought up, you are trained, you are made alright. And all the things after that, the sufferings, are no more sufferings to you because you have become the Spirit. It cannot be killed by any instrument, it cannot be thrown away or blown away by any wind, it cannot be burnt by any fire. There's no way you can destroy this. That is the Spirit that you are.

So the nourishment has been given now.

You have grown up. You are nourished. People, when they see Sahaja Yogis, say “Oh, they're like flowers! See their faces, they glow. How confident, how dignified, how beautiful." But for what? To be the wheels of the chariot of God. You have to bear the brunt and the sacrifice,

which are no more sacrifices to you because Spirit gives, it never sacrifices. It's quality is to give.

So you don't sacrifice, you just give. First the mother has the labor pains, alright, she has all the problems, alright. When the child is grown then he stands by the mother. He is the proud son. She is proud of him and he is proud of her. They stand together, they fight the battle together. That's only possible if complete dedication and preparation for the future life of a Sahaja Yogi, you accept. A life which outwardly looks to be a struggle, a problem, but inwardly is most fulfilling.

Once upon a time, when Sahaja Yogis come to Me, to them even to sit on the ground is too much of a sacrifice; even to take out shoes is a big sacrifice. Yesterday, in a program, three people walked off because they were asked to take out shoes, as if somebody was making them bald-headed! They just walked out.

But why to grow in Sahaja Yoga? To grow, to stand up like great children of a great Mother. The work is tremendous. It's not for medium, mediocre people to do this job. Frightened, fearful, arrogant, cheeky, they cannot, they have no metal.

So, the dedication in meditation, complete dedication in meditation, must be practiced. It's not for your good now you are doing, so-called `your'. First you were a little baby, a small thing; now you are that collective being, so you are not doing anything for yourself, but for that collective being. You are growing to be aware of that whole which you are going to become. Your jobs, your money, your wives, your husbands, your children, your father, mother, relations, these considerations are over

now. You all have to take up the responsibility of Sahaja Yoga. Every one of you is quite capable.

You are brought up for that.

Do whichever way you like. Whatever are your capacities. With full dedication you'll get it. Dedication is needed. Complete dedication is the only way you can go further. There are some Sahaja Yogis, who are half-baked, we have to drop them. We can't help it. You don't have sympathies with them. No good. If they prove alright we'll bring them back again, but you leave that to Me. You don't put your effort or put your attention to them. You have to come up. You were seekers, then you have found it, now you have thrived over it, now you are grown up. For what? Is to stand up. As I am facing you today, you have to face the others, you have to face the people. Dedication doesn't mean that you don't talk of Sahaja Yoga. Many people think that keeping silent is the way you are dedicated. Only in meditation you should be. But you have to get out of that shell. Tell all the nations and tell all the people, all over, the great message, that the time of Resurrection `is here, now, at this time,' and that `you all are capable of doing it.' If somebody tries to sneer at you for that, with understanding, wisdom try to say things.

Individual likes and dislikes must be sacrificed. `I like this' and `I like that' must be given up. It doesn't mean that you all become like machines. No. But the enslavement to this `I' must be given up. Enslavery to habits must be given up. You'll be amazed! Once you are dedicated, you'll not eat much. You may not eat at all sometimes. You wouldn't even remember a food. You

wouldn't even remember what you have eaten. You wouldn't even remember where you slept, how you slept. It's a life that will be like a telescope, expanding! You will create your own visions and complete them, fulfil them. You look so simple, ordinary people, but you are not. In dedication, in complete devotion, you have to do it now, not for your own gain, for your own achievement, that's over now. It's for completely getting out of the mire and standing on the land, singing aloud the praise of your Father. Those who are in the mire, what music can they give? What songs they can sing? What security can they give? What help they can render to others? You have to be out of it, completely. Steadfast wisdom is needed for that, steadfast! Every moment.

You need not blame your left side and right side for that, nothing, you just get out of it. Cling on to it.

The Parabrahma has come to look after you. Cling on to it. Even the death has to go back. Then what about these minor things? Now the name of your Mother is very powerful. You know that is the most powerful name. Than all other names, the most powerful mantra. But you must know how to take it. With that complete dedication you have to take that name. Not like any other name. You know that in India when they take the name of Guru, they pull their ears, for taking the name of the Guru. [Which] means, `While taking the name if I am making any mistake please forgive me', it means that. This mantra is a very powerful mantra. Only what you need is the dedication, the dynamite of dedication. Today I told Rita that all the daisies in England have fragrance now. She couldn't believe it. She said, “I have never known

that. On the contrary I always felt that daisies had no fragrance and they were very funnily-smelling flowers." I said, “Alright these daisies you have, just go and smell them." When she smelt it, she was surprised! The Name! How subtle it is. They are the most fragrant flowers of England today. Just the name! Which means Nishkala finka, which means Nirmalā, which means completely without any mala. What is this, mala? Is this mire. Without any mire, Nih. Absolutely! The joy at the Sahasrāra is called as Nīrānanda, since long.

Since ancient times called Nīrānanda or Nirmalānanda.

So many call it as Nirmalānanda or Nīrānanda.

That joy is the joy that you enjoy even when you get crucified. That joy, you enjoy even when you are poisoned. Even on your deathbed, you enjoy that joy. That joy is Nīrānanda.

So be prepared for the second phase. You are in the front. It's very little time I need. But I need really people with steadfast wisdom and dedication; steadfast. Even, for a second it should not go this side or that side. Then, we can progress faster, we can go ahead to fight the battle. Perhaps now you are aware of the subtleties of the negativities, how they work, how they use their power, of course which is limited, to destroy God's work and how you have to be alert, equipped and dedicated. This I can only talk to you, I cannot say to the people who come to Caxton Hall.

Some of them are half-baked, some of them are absolutely new, naive and some of them are absolutely third-raters. But here, as you are before Me today, I want to tell you very frankly, as Kṛiṣhṇa had told only Arjuna,

“Sarva-dharmān parityajya mām ekam sharanam vraja." There's no other way out. `Vraja' means the one who is twice born, like a solid, solid personality. When you are solid then you must dedicate. When you are perfected then you must dedicate. It will help you to get out of the mire and then it will help the great cause. No one understands that, why Mother is trying to help us? They think she's too generous. I am not. I've a lot of common sense. Because you are the ones who are capable of manifesting God's joy on this earth.

You are the flutes which are going to play the melody of God. You are going to be used and manoeuvreed by God. I am doing all this to perfect you, to be the most beautiful instrument of God. To be the right instrument of God. I don't know if you understand how sweet, beautiful life it would be. The life of dedication, with understanding, logical, completely dedicated, extracting all the nourishment and dedicating it for a higher purpose.

Something like the leaves extract the sun's rays and give colour, achieve colour for themselves, for a higher purpose, that they can be used by human beings later on. Nothing on this earth works out the other way round. Everything works out for a purpose; but such an unselfish, such a wide, such a great, dynamic purpose.

You become the ocean, you become the moon, you become the sun, you become the earth, you become the ether, the firmament and you become the Spirit. You work for all of them. All the stars and universes you become and take up their work. That's what it is. Because you have jumped onto your principle, onto your Tattwa. That's how you jump onto everybody's Tattwa.

But be dedicated on that Tattwa, because I am the principle of all these things. I am the Tattwa, TatTwam asi, I am the Principle. Keep to your principle. I am the Kuṇḍalinī. I am the Essence.

We can only understand dedication of something which looks bigger in gross ways, which appears bigger in a gross way. But we cannot dedicate ourselves to something that is so much subtler, which is so much minuter, which is so much deeper, which is so much effective, which is so much dynamic, so universal and so eternal. We cannot think of dedicating ourselves to that. We can surrender ourselves to somebody who looks like a mountain, who comes to oppress us just like a mountain, who is like Hitler, who is like false Guru. But to surrender to your subtler being, which you cannot see with your eyes, which is not audible, but, in effect, is so powerful. Like the atomic bomb, when the atom is split. When it is not split, it is everywhere. But at the subtlest point it's so dynamic that, when you separate it, it becomes such a dynamic force of destruction. As your attention has now penetrated into the subtler side of this universe, you get deeper and deeper into it. The urge that takes the end of the root to the source of water, is the same as the source. Your Kuṇḍalinī is the same as the Ādi Kuṇḍalinī and its power, the Parabrahma.

All these things are to be understood after realisation and after maturity. Before that it's not possible.

That's why for the last eight years, I didn't say these things to you. I was always on a very patronizing and a sweet terms with you. And always, I made you feel that you are obliging Me. There's no obligation.

But beyond all these conceptions, you have become your Self. Now ready to be responsible, to be what you are made for. Like the ship is built, is brought to the sea, tried and found out to be sea-worthy, to sail out now, into the sea.

So this is the second phase, where you have to sail out, when you know everything about the ship, everything about the sea. With complete freedom and wisdom, you have to sail now, not afraid of any storms, or any hails, or any typhoons, because now you know, your job is to cross through.

May God bless you.

Contents: 1982-08-01 **Śhrī Ādi Shakti Pūjā, Cowley Manor Seminar, Cheltenham, UK**

Shri Mataji: Just help him, one person can't do it, somebody else. Marcus, Nick, anyone, just help him out, it's too much for one person, just help him, please. Alan, go and tell Bai to bring My handkerchief from My... I've got My pur, No, no, it's all right, it's here, with My purse have you brought it? Yes, it's here. Don't worry, don't worry!

Sahaja Yogi: Here's Your purse Mother.

Shri Mataji: Have the Americans come, those who have done the Pūjā, have they come? Are they here?

Sahaja Yogi: Yes.

Shri Mataji: Oh, they are here. Then it's all right. And, in these new centers, have you started with Pūjā anywhere? No, yours [speaks to a specific country leader, maybe from India] is all right, I'm asking about England.

Gavin: Any centers in Britain, where there are new people...?...

Shri Mataji: Cheltenham, for example, where is Alan, ask him.

Sahaja Yogi: He's just gone out for now.

Gavin: Any centers in Britain any new people here, right now?

Shri Mataji: If you have introduced them to Pūjā I don't mind, but if they have never been introduced to Pūjā then you have to be careful. From their good point of view. I am sorry I had to say this, because yesterday the load was too much, you know I couldn't speak even and, lifting the Kuṇḍalinī was like raising hundred donkeys on your head, it was too much. And all these half-baked people are such that they are like dog-in-the-manger, they won't have it and they won't allow others to have it. They'll argue before the program, before the meeting starts, before the Pūjā starts, specially. Because they won't want you to enjoy the fruits of the Pūjā; they'll spoil your attention, they'll argue, discuss, [Aside:] *[UNCLEAR]* just sit down.

What is there to argue in Sahaj Yoga? You have to take, that's the point is, you have to take, there's nothing to argue. How much you take is the point. And the worst part is that they don't want to grow and they want to pull you down.

So, unless and until they are introduced to the idea of Pūjā beforehand, then they start understanding the worth of Pūjā, otherwise they do not, how will they understand? You see, it's beyond them.

So, you should not make them attend any Pūjā, minimum and also seminars I would say.

Because seminars are meant for people who are intensively in Sahaj Yoga, to intensify their awareness, not for people who are half-baked, who are Doubting Thomases; all these kind of people are absolutely useless, you should never bring them to seminar! Whether it's your son, father, brother, mother, sister, husband, wife, nothing. You shouldn't bring anybody who is not fully awakened Sahaj Yogi, because seminars are meant for very intensive work.

And what I find, always these people will argue with Me, they are the first to question, they have something to say [laughing], they are the ones, Sahaja Yogis are keeping quiet and receiving... I don't mind even that, what happens in the seminar, you have to receive more and they do not receive, their attention is outside, they are disturbing everyone.

So, seminars are even, in a way, more important than an ashram, because in ashram there's no other problem but to fight them out. But here, in a new place we go, we have to fight out all surroundings, the place itself has to be cleansed, everything has to be done.

On top of that you have these terrible people around you, whom you have to convince. If they are not convinced, why are they here? Why did they spend so much money to come down? Be sure, they have come here to disturb us. I'm sorry we had to do that way. I wish people could be simple, straight forward, uncomplicated and sensitive, but they are not. They are not sensitive people. They don't understand what are they up to. By that they

destroy themselves, no doubt, but they destroy part of you also... and also trouble Me. Yesterday, it was too heavy, you know that. Such a deep subject and it was too heavy for Me. If they say they feel bad, all right, tell them: `We are sorry, we can't help.' See, there are certain points where we have to have our freedom to allow those who can come in. That's the point where we close the door. And there's nothing wrong with it, because you have to equip more to pull them out. It has been always our practice, since long, there's nothing new about it, everyone knows, not only in England, or any other place, even in India: we never allowed anybody to come for the Pūjā who was not a realised Soul and who was not a Sahaja Yogi. From the very beginning, wherever we tried that we found it was very difficult.

So I hope there's nobody sitting here with a doubting mind. If somebody's there he should with all sincerity leave the hall and leave us alone, for the ascent. Anybody who has doubts should be kind and generous about it. It's a very serious work we are doing. It's not of making money or of throwing an enterprise or building a house or something like that. It's not even just making creations of worlds, it's much more than that, it's a very serious work we are doing and we don't want anybody to cut our attention. Even some of the Sahaj Yogis I know, are half-baked. They must be corrected, all right, doesn't matter, but they have been exposed to Pūjās so it will do them good not bad.

But some people are just anti-God and they have allergies for God, any work you'd start doing in the name of God, they are so allergic, they react. These are anti-

God allergies and they express themselves by different, funny methods. Now, all the Sahaja Yogis must know this, then you will not go too far with them. You will, you should discover this in anyone this allergy existing. You should say: `Sorry, we have nothing to do with you." So that is for the people who have to have the privilege of this worship. Today is specially a great privilege because it was not so planned but it worked out, just worked out. Yesterday, we did lots of cleansing. Now today tell your mind to rest for a while. Tell your thoughts to stop for a while and receive, receive more of it. Everybody has benefited by this reception but you have to receive more. There's a capacity within you to receive.

Pūjā, as I have told you many a times, is not for My benefit, by any chance, take it from Me. I am much better off without it. Because when the enthusiastic deities start emitting vibrations with your asking because you are saints. You see they just, they are overenthusiastic. And they are sitting there, busy bodies, you know, they are sitting quietly waiting for a chance, you see. To emit vibrations, to save you, you see they want to just rush. They emit so much that they lose, just wait, just wait. They want to save you, they want to give you, they are so anxious, in their anxiety you see? I like it, to see the way they are anxious. But you don't suck it, I have a problem there. Once they have given they don't want to take it back. You don't suck it so it has to go to the atmosphere, it has to disappear somewhere. Is directed towards you and you don't take it; so where does it go? It hanks into My tissues, it pains Me.

So, sucking should be more. Sucking should be more. And just before the Pūjā you should say: `Mother, make me such that I suck more of the Divine!' Just pray that, with sincerity from your heart, just say that.

There's another beautiful gesture I have seen, in Uzbekistan, it's very good. They put both the hands on their heart like this and just press it, bending their head, asking. See it creates a vacuum. That's how they bow. [Long silence.] It's beautiful! That's very nice today.

So, let the children come here. Aja,... [Hindi].

Now, sit there, all of you sit down, all right? Sit down now, sit down, sit down! Now, come along, Mathew is also coming, sit down there, sit down, come along, let's see, sit down. Now all the children are very sweet, they are going to sit down. Come along, sit down, sit down, nicely.

[Hindi words with a child, kind of joking.] [In English to the child:]... All right, now, should give Me the flowers now, so would be better for you to have vibrations, thank you. Thank you very much, thank you very much. Poor Nishi has none. Now, you give Me these, to Me, give Me now. Give Me? Give Me, to Mother. All right, give that also! Child [indistinctly]: But you have the one.

Shri Mataji: Also give. Thank you, thank you, thank you very much.

[Aside:] *[UNCLEAR* Ah, the system].

All right, so now what should we do Pūjā is it? Just put a Thika to him. Put to everyone, not to the Pūjāri....

All right. That's kajal? No, don't put kajal. He'll be like Bhairava! [Laughter.] Give it. May God bless you.

All right. Now, the children should sit like this, all right, on the sides, for Gaṇeśh Pūjā, like this, straight.

So everybody can take photograph also, sit like this, all right? Ah. They have to take photographs. Yes, good, good. Oh, now sit here. Sit, sit, all right. Very good, it's very good. But, you have to take out shoes! That can, cannot have shoes here, take out shoes. Take out shoes, everybody's taken out shoes, take out, take out, take out shoes. Ya.

All right.

Sit like this, on the sides! *[UNCLEAR* Shuddhi mein Gaṇeśha Pūjā?] Pūjārini [in Hindi]: Ha, Ha, Śhrī Gaṇeśha Pūjā.

Pūjāri [in English]: To begin with, we will do first the invocation of the Pūjā, then the Pūjā to Lord Gaṇeśha. And this would be followed by the Pūjā to the Ādi Shakti, Mātājī Śhrī Nirmalā Devī.

“In the Devī Bhagavad Purāna it is written that the Pūjā to the Ādi Shakti is the greatest Pūjā that can be done by any being."

Shri Mataji: That's why you are privileged.

Pūjāri: “Even the Gods, they do it."

Shri Mataji: None of them. They just touched My feet. None of them did Pūjā to Me. Believe Me.

[Some children are laughing.] Shri Mataji [softly to a child]: All right, sit down.

Pūjāri starts and Sahaj Yogis join in: Om Twameva sākṣhāt, Śhrī Gaṇeśha sākṣhāt, Śhrī Ādi Shakti sākṣhāt, Śhrī Bhagavatī sākṣhāt, Shri Mataji, Śhrī Nirmalā Devī namo namaḥ....

[Most Sahaja Yogis start to repeat the Śhrī Gaṇeśha mantra while a few begin the Mahāmantra.]

Shri Mataji: One person should say, then you can repeat, that's better. What about Aradhana, where is she? Has not come? Child: She's upstairs nanny [maternal grandmother].

Pūjāri: We'll start again. First Lord Gaṇeśha, then Mahālakṣhmī, Mahāsaraswatī, Mahākālī. Then Lord Kalki and then Lord Kalki and Sahasrāra Swāminī.,

Sahaja Yogi: Three times Śhrī Gaṇeśha? Each how many times the Gaṇeśha mantra? Pūjāri: Each once, I meaṇ...

[Everyone recites the Śhrī Gaṇeśha mantra followed by the Mahāmantra.] Pūjāri: Now the names of Lord Viṣhṇu.

`Om, Śhrī Keshavaya namaḥ, Om Śhrī Nārāyaṇaya namaḥ, Om Śhrī Madhavaya namaḥ, Om Śhrī Govindaya namaḥ.....'

Shri Mataji: Why these twenty-one names are taken, before every Pūjā... Even before the renovation of..., first you have to worship Śhrī Gaṇeśha. But even before worshipping, why these names are taken it's important to understand. Everything has a `why'. Because these are the twenty-one channels within your Suṣhumnā.....

Now, the central part has got twenty-one channels and has got twenty-one powers and their deities are named according to the twenty-one aspects of Śhrī Viṣhṇu. And that's why these twenty-one aspects are first said so that within you all these twenty-one channels are awakened, within you first of all.

Pūjā is a double thing: that a cup has to be made and then the source has to be opened out.

So you are the cup. The Suṣhumnā is the channel you have by which you suck in.

So to open the Suṣhumnā these twenty-one names are said.

Now why first Śhrī Gaṇeśha? Because Śhrī Gaṇeśha is the beginning of the desire and the end of the desire. You start with Gaṇeśha and you end up with Gaṇeśha.....

Contents: 1982-08-01 **Havan, afternoon after Śhrī Ādi Shakti Pūjā, Cheltenham, UK**

Shri Mataji: Now, let's understand the significance, all right? Now, he said a word `Swāhā'. `Swāhā' is the capacity of the Nābhī Chakra. That is, it burns everything. The capacity! You can say `the essence'.

It burns up everything. Whatever you put of the fire, it burns up. That's one. Second it purifies. Say, if you have got mixed up gold and you put it in the fire, it glances. It burn something, it does not burn something, discriminate. It has got discrimination. It has got brilliance. Fire has another great capacity, that it goes against the gravity. And when it goes against the gravity, it suggests that there can be another energy that can go against the gravity and that is the Kuṇḍalinī. Many people confused with Kuṇḍalinī the Prāṇa Shakti. They thought, because Prāṇa Shakti is the child of fire. They could only related to Kuṇḍalinī. They thought that Kuṇḍalinī and Prāṇa Shakti are the same, because Kuṇḍalinī also goes against the gravity. Then it has capacity to give you brilliance. A person who do this fire can use it to polishing things into brilliant, to its brilliance. It has capacity to join by melt it. Like human

beings are like steel, worse than that sometimes. Then it's this part in a subtle way for heart, melts their heart and joins them.

So the significance of fire is expressed here and that's why fire is worshipped. Fire has been worshipped since very, very long time by many Gurus, prophets, they worshipped fire. And the essence of it was that we should have the quality of fire. Now, when the saints like you invoke the fire, you invoke the essence of fire. Essence of fire is `Swāhā'. And this essence of fire gives you all the subtle qualities of the fire. First of all, it burns away your negativity. You have seen that on the photograph when you have a candle and if there are negative forces it flickers, it dances. Because of you and My photograph the fire of the candle has been enlightened.

Sort of it has reach this `Swāhā' stage. Where it is Swāhā it assumes it's Swāhā stage. And when it assumes its `Swāhā' stage then it burns. Now many, no fire can burn, you know that, but you have seen it, it happened.

When the fire in the stomach, that is within us, when it is enlightened, then it enlightens our attention.

We get the capacity to rise against gravity that is Mana *[UNCLEAR]*. Then we understand the discrimination that the fire does that it burns certain things and it not burns certain things. When we have that capacity we also discriminate, we know. It also has got digest, it has got light, it gives you a face which is brilliant, which is shining and also gives your eyes the capacity to see right things and right places. Eyes become brilliant and when in the eyes this fire is enlightened, there is a glint in your eyes. Sahaja Yogis have a glint in their eyes, a shining,

like a *[UNCLEAR]*, like you can say a flame. And you can go on adding to it and can go on working.

The food is digested by this fire within us. But when an enlightened person digest it, then whatever is produced out of that fire becomes *[UNCLEAR]*, means it becomes *[UNCLEAR]*. When you vibrate the food and eat it, it goes in the stomach and makes the fire of the stomach that `Swāhā Shakti', that Swāhā power. And then this power makes the food act like a medicine. That's why we put vibrations in what we eat, because once it goes in the stomach, it will excite that Swāhā power in you. Like this, all the powers of the fire, which are good powers, whatever are auspicious are good powers, the good side of it, they get enlightened and *[UNCLEAR]*.

That's why Havana is.

So this is the Nābhī Chakra and we putting everything to the universal Nābhī.

It uses this discretion, burns off all this which is bad, then it clears the atmosphere by throwing it's flames around, by charging the atmosphere with its capacity, or say the atmosphere ether, is ākāsha. It also has got its subtle being. It excites the ākāsha, the ākāsha also gets cleared out. Most things cleared out, all the bhoots and badhas and Pishāchas run away, all negativity runs away. All lethargic inertia goes out.

It excites also the *[UNCLEAR]* that is there, the vegetation, *[UNCLEAR]*, animals. Every sort of thing that exists, whatever has created. Whatever has created has been enlightened by this fire. But of course it depends of your capacity also to excite the fire. How much you can excite that fire is very much important.

Supposing you are an impure personality and you are not yet there, your link with the Divine is poor, you are a doubting Tomas, some of them are inauspicious, all nonsense there are. They can't do this.

Only a person, who is a realised Soul and who has given realisation to many people works it out better.

So, all those who are sitting here must remember that the responsibility is very great. Just now, put all you nonsensical doubts on one side and please work it out. Otherwise if you cannot do it, you better give up, because it's like a dog in the manger, as I told you. You can't do it, you don't won't others to do it.

It's no problem. At least let others do it, because we want atmosphere to clear out. We want everybody should be helped, we want Sahaja Yoga to be established, we want the emancipation of human being, we want peace descend, we want blessings of God to come. Those who don't want to do it or think that they are doubtful, they should not do it. Absolutely *[UNCLEAR]*. Because they don't realise just now. They will doing when they realise. It's a very open offer to all of you not to feel insulted or bad, but to do it with your heart. If you cannot do it, you should not do it, because this is a very great tusk we have taken over, it's a tremendous tusk. Is not just having some people around you and having *[UNCLEAR]*, it's a very deep tusk and those who are capable of doing it, should only do it otherwise they spoil it again *[UNCLEAR]*.

First of all, we always worship Śhrī Gaṇeśha, who came as our Lord Jesus Christ on this earth.

Because He is the Vignanasha, He is the one who takes out all the *[UNCLEAR]* that can come on this deep *[UNCLEAR]*.

All right? Nobody has the authority to do a Havana *[UNCLEAR]* the Brahmins, they can't do it. One develop a problem. *[UNCLEAR]*.

All right! So now this is the beginning.

Do it very carefully. You have to put it round because you are realised Souls, you have your own powers. When you put it round, what you do, you give a Bandhan yourself and whatever is there within you, goes into it and you put it.

So the fire discriminately does everything. It solves all the problems at one time. It burn out whatever is bad, it give you whatever is good. It will establish the gold in you, it give you the lustre, everything works out simultaneously. But you have to awaken the subtleness, for that you have to be subtle yourself. If you are gross and if you are mundane and if you are on that level, then rather difficult. You can understand that. You have to have the level.

[Start of the Havan with mantras.] Sahaja Yogis: [Śhrī Gaṇeśha Mantra].

Shri Mataji: Now, you have to say `Agni Devta', because `Agni Devta' is the one, which is `Swāhā' and you have to say *[UNCLEAR]*.

Rustom: *[UNCLEAR* Now we will say the] three Mantras of Shri Mataji.

Sahaja Yogis: [The Three Great Mantras.] [Śhrī Agni Devatā Mantra.] Rustom: Now, take the names of the seven flames of, Shri Mataji [interrupts]: See, Agni as I told you is the seeking, all right? Is the water. Now, today

you are going to do Devī's names, means that is the desire. The most powerful thing is Devī's names.

What you are doing, is to now, trying to purify your desires, the basics, absolutely, where you have to return of.

So, that's what you have trying to do. Supposing we want to have more action, then you should do *[UNCLEAR]*, Saraswatī's names. Now if you want to have more evolution, Viṣhṇu. We are quite evolved, but they're find a gap to between the others, so let us create more desires, all right? Because if we only evolve, only we few will left in the air, the rest will be all belong. Take the Vedas, look where they are [people laugh]. They have to work it out, there are all blind people. They don't understand. We have to go slow and to make it slow and to make them, mhh, come of, this is the Pūjā we are doing to desire. Mahākālī Pūjā to desire, is the Devī's Pūjā, the primordial mother, so Ādi Shaktis Pūjās is there, that so the desire is created.

Rustom: Mantra [the seven tongues of flame]: Saptajihvah, Kālī, Karali, Manojava, Sulohita, Sudhumravarna, ugra cha sphulingini netra dipteshvari namaḥ. sākṣhāt Śhrī Ādi Shakti... [Saptajihvah = the Lord in His manifestation as Fire is conceived as having seven tongues of flame.] Mantra: Om Śhrī Agni Devta, Agni Shakti, Agni Mātā namaḥ. - Om Swāhā.

Shri Mataji: See, it doesn't burn. It's a living thing. It doesn't burn [GAP] All what you have in your hands, all the fragrant things come from various sources, meant to be put the fragrance of the Mother Earth and put fragrance for this fire.

So, it burns away all that is nonsensical and keeps to fragrance and makes the whole atmosphere fragrant. Fragrance is the essence of Mother Earth.

The `Bhū', that is called as the `Bhū', but is the fragrance.

So, first we are going to say a few names of Shiva.

Sahaja Yogis: Name of Śhrī Shiva, Swāhā.

Shri Mataji: For Shiva you need not. *[UNCLEAR]*. Just now we will do it. This is the gold we have to give. You have to burn ourselves, because Shiva is Sadāśhiva. What is there to burn anything? [Rustom recites the names in a row without `swaha'].

Shri Mataji [interrupts]: Virāta-Ātmā you see. In the Virāta it resides in the heart. See the relationship.

Rustom: [continues the names.] [Rustom recites the names, Sahaja Yogis say `Om Swāhā' and offer rice.] [A Sahaja Yogini aligned her left to Shri Mataji, stretched her left hand to the fire and put her right hand to Shri Mataji's back Āgñyā. Later on the right Āgñyā, left side of the head and the left Viśhuddhi.]

Shri Mataji: By thought of the digestion, is the Swāhā, is digest. That's what you get with the word digest, is better Swāhā, that digest, whatever is good for the body turns out and will be the best.

All right? Whatever is not good *[UNCLEAR]*. Swāhā is a digestive power of fire, is Swāhā.

Somebody asks: Is Void?

Shri Mataji: It's all Void.

Somebody says: Intestines, *[UNCLEAR]*?

Shri Mataji: Intestines *[UNCLEAR]* liver, thoughts *[UNCLEAR]*.

So, that's what it is. Ingestion of the good and expeltion [expultion] of the bad.

[Rustom reads another Name, Sahaja Yogis say - Om Swāhā.]

Shri Mataji: All this people worship fire for the same reason.

[Rustom reads the name `Vivekinye', Sahaja Yogis say - Om Swāhā.]

Shri Mataji: These are all Viveka, attention, to the Angi again. The Agni, the fire of your Chitta.

You see, when it gets enlightened it becomes Chitta. That's why when, I cannot explain why, how I this things, because My *[UNCLEAR]*. First you have to become clean and then `Chittis'.

So, this is a little gap in between.

[Rustom reads the name `Shuddha Chitta Pradāyinī', Sahaja Yogis say - Om Swāhā.]

Shri Mataji: Means the Agni, whatever you put into an enlightened persons Chitta, he knows how to sort out.

[Rustom reads the names of the ten Primordial Gurus and adds Shri Mataji Guru Maitreya namaḥ, Śhrī Sarva Guru Maitreya Shri Mataji Nirmalā Devī namaḥ and Śhrī Sarva Sahaja Yogi Guru Maitreya Mātājī Śhrī Nirmalā Devī namaḥ.] Shri Mataji [interrupts]: That is the Guru Shakti also, because only if you have the Guru Shakti you can discriminate. You know who to burn out.

[Rustom reads another name, Sahaja Yogis say - Om Swāhā.] [Rustom reads the mantra Parama Viveka Pradāyinī Mātājī Śhrī Nirmalā Devī namo namaḥ.]

Shri Mataji: Now, for example Rajneesh was burned by fire. Fire means that Ahaṁkāra can be burned by fire. So many things can.

[Rustom reads the mantra Om Śhrī Sarva Dushkripte Nashinye namaḥ.]

Shri Mataji: And you appear like, you see when this flames you see, actually your Chakras appear like this, only like flames, but they're very silent, there a beautifully burning of different colours.

[Rustom reads another name, Sahaja Yogis say - Om Swāhā.]

Shri Mataji: All right. Now, you have to take out all the Badhas, you see. That better do it now.

[Offerings of different Badhas to the Fire with the `Swāhā':] All the Badhas of Bristol, of London, of the English centers, of our Ashrams, of lethargy, of false Gurus, of insincerity, argumentativeness, selfishness, uncollectivity, miserliness, from families; Shri Mataji [comments]: very true! [Offering:] Attachement;

Shri Mataji: All the badhas of *[UNCLEAR]*; [Offerings:]... that prevented from surrendering, that give us heat, delusion, illusion;

Shri Mataji: all the badhas of psychologist; [Offerings:] analyzing, anger, sympathizing;

Shri Mataji: and also borrowing and lending, in Sahaja Yoga it is not allowed.

[Offering:] Ego; Shri Mataji says: Oh, Baba, do it trice.

[Offering:] Liver;

Shri Mataji: [All the badhas of] physical illness, mental illness; [Offering:] drinking;

Shri Mataji: Punjab, speaking too much is very important. Speaking too much is not good; [Offering:] all the badhas of all the doctors;

Shri Mataji: And the hospitals; [Offering:] impatience;

Shri Mataji: of the politicians and strikes and all the destructive things; [Offering:] all the churches;

Shri Mataji: moreover whatever is anti-peace and anti-bliss, money making propositions in the name of God, all anti-God activities, everything which is against love, against collectivity, against *[UNCLEAR]*; [Offering:] all the Badhas of the seekers coming to the meeting tonight;

Shri Mataji: Oh, very important! [Offerings:] Inertia, media, that prevent the advertisement of Sahaja Yoga;

Shri Mataji: very good! [Offerings:] Accumulated Jaḍa, Badhas of Cowley Manor;

Shri Mataji: very practical people *[UNCLEAR]*, all the people which makes rules and regulations, advance *[UNCLEAR]* which is against God; [Offerings:] daydreamers, all the planners, competitiveness;

Shri Mataji: all the Sahaja Yoga Ashrams in India; all the Badhas which prevent us from possessing our own land, *[UNCLEAR]* petty-mindedness, jealousy;

Shri Mataji: All the Badhas in the negative *[UNCLEAR]*, in your relationship with God, in the relationship between you and your Mother, in the dedication to *[UNCLEAR]*, in the dedication to your mother, in understanding the dynamism of Yogi, in understanding the dynamism of *[UNCLEAR]* God work; [Offering:] in the left Nābhī [3 times Om Swāhā], Badhas of the half-baked murmuring souls, all Badhas in the work of God, in Spain and Portugal; all

Badhas in Australia, America (3 times On Swāhā), Canada, other countries, the Jewish ego, whatever remains...

Shri Mataji [as the havan ends]: May God bless you all!

Contents: 1982-08-02 **Departure and Visit to the Source of River Thames, Lechlade-on-Thames, Gloucestershire, UK**

[Shri Mataji thanks all Sahaja Yogis for a lovely weekend as they prepare to leave for an outing. As Shri Mataji sits in Her car, all Her children see Her off with music. The cars began their journey with Mother.

There are thirteen Sahaja Yogis and Sahaja Yoginis with Shri Mataji which later on She says represented the thirteen crore powers of the Devī.] [Upon arrival, Sahaja Yogis help Shri Mataji to walk down to the stone area where there are seven sources, small almost puddle areas, like the beginning of a stream.] [A Sahaja Yogi takes a little water and places it in Shri Mataji's hand. Shri Mataji stands on a stone where a Sahaja Yogi offers the water to Her Holy Lotus Feet. Everybody is explaining to Shri Mataji how part of the river is called `The Isis' which flows through Oxford.] [Shri Mataji is walking barefoot over this whole area placing her Divine Lotus Feet in the water. Sahaja Yogis also join Her.] Sahaja Yogis: Śhrī Ganga Mātā Śhrī Nirmalā Devī ki Jay.

Shri Mataji: Are you feeling the Cool Breeze now? Sahaja Yogis: [reply in agreement].

Shri Mataji: [explains that we have said Jai to Her so she is happy... nobody has respected her...].

Sahaja Yogis: [reply that now She will be respected].

Shri Mataji: See now the Cool Breeze is coming.

[Everybody stands with Shri Mataji receiving the cool vibrations for a while.] [As Shri Mataji and the Sahaja Yogis head back to their cars, Shri Mataji walking barefoot, She speaks in Hindi to the young ladies with Her:] This a very pure place, the birth place of River Thames, so clear and cool... go and put your feet in the water.

So cool and very soothing... all the left is clearing...

[Shri Mataji is taking bandhan on Her left hand while talking so lightly and joyfully.] [As Shri Mataji settles back in Her car, the Sahaja Yogis and Sahaja Yoginis are taking a little time at the source bowing and honouring the earth and water. They try to decipher words on the wall which include the words `Father Thames'...] [Everybody returns to their cars and prepare to continue the journey. The convoy travels through the country roads until they reach the town. They go into a beautiful building and sit together in a room with a dome ceiling made in the pattern of 36 flowers, which Shri Mataji is admiring.]

Shri Mataji: [is saying it is very meditative and vibrations are coming].

Sahaja Yogi: [this was the hall where they were going to have a meeting but they couldn't].

Shri Mataji: [is so happy to hear this and says that would be great, maybe next time... (machinery sounds as it seems there is work in progress)].

[Shri Mataji and the Sahaja Yogis are talking about the effects of going to false Gurus. She mentions how they mesmerize people:] There must be some reason, I asked

Raktabeeja, how were you so much subjugated? You should have asked questions. She said no, they say this is to kill your ego.

[They continue to talk and Shri Mataji explains a saying in Marathi which when translated means that when people go into the temple, they have to take shoes off outside so they will be in the temple but the attention is on the shoes outside!] [Shri Mataji and the Sahaja Yogis are enjoying the children and the little Gaṇeśhas...] [The building administrators were asking a Sahaja Yogi why everybody was sitting there and Shri Mataji asks what he replied. The Sahaja Yogi told them that they were waiting to see the water...] [While waiting, a Sahaja Yogi offers Shri Mataji a little water from a small tap and She confirms the sulphur quality in the water. Shri Mataji continues to explain how sulphur is good for the liver and allergies. Calcium is very good especially for children with allergies. Shri Mataji continues to discuss the left and right... cool and warm effects. Yellow flowers and teas are good for the left... sulphur is also good for gallstones. This water would not ferment.] [Shri Mataji also put Her attention on Scotland and says that they were enjoying their own destruction and what to do. She said She will create some disaster. After this, there was an article about the water that was used to make a particular whiskey in Scotland, now contained sulphur so could no longer be used to make that alcohol.] [They talked about the River Ganges... the water will always stay pure and clean, whereas other tap water etc. will start to spoil after a while... as can be seen when you fill up a bottle. The Ganges comes from the snow of the

Himālaya and passes through many elements. Shri Mataji adds that it comes from the Sahasrāra and Shiva.

Shri Mataji and the Sahaja Yogis leave the building and the day ends with talking about havan plans as they see Shri Mataji to her car.]

Contents: 1982-08-06 **Talk to Sahaja Yogis, The Importance of Dedication and Devotion, Nightingale Lane, London, UK**

The other day I talked to you about the importance of dedication in Sahaja Yoga and the devotion that one should have.

Actually, when we are close to the mountain we can't see much of it and that's why we don't realise the volume that is so close to us, the greatness that is facing us. This is one of the illusions that works out for people who do not realise it mentally, what they are in for, where are they, what have they found, what is Self-realisation, what is its magnitude, how far they have to go, why are they chosen, what is their purpose of life, how far they have come up, how far they can understand. All these things are beyond the grasp and one gets stunned, one doesn't know what has happened to him when he got realisation actually.

That's why to understand this is only possible if you can understand how to dedicate, how to devote yourself. If you want to analyze anything on the basis of your rationality, you are too stunned. It's too beyond you, it's fantastic, it is too much. It's really beyond you. Now think of it, you have got realisation, can you believe it? That you can, in your life time, if somebody had told you this,

you would never have believed it, that how can you get your realisation in this Earth? Of course you were seeking, because people were saying you have to seek, also you felt you have to seek, but you never thought that this will materialise like this, that you will get your realisation.

Then after getting realisation, you could not feel what it was. As if you have dropped into the ocean and you don't know what is the dimension of this ocean. How far you have gone into it? What is it? Where are we? What is our purpose? To add up to all the mess, we become thoughtless.

So you cannot even find out as to rationally what it is.

So the immensity of this experience, the glory of your Mother's coming, or the precious gift of your Self-realisation, nothing can be realised through your understanding. Try to think, what have you got? Can you measure it with your understanding? Can you understand what has happened? No, you cannot.

Because rationality cannot give you the dimensions into which you have fallen. The rationality is actually broken up. There is no rationality left now anymore to even communicate as to what you have been seeking and where have you landed.

So the only method you have got now, or only way is left to you, for a drop which has become an ocean, is to dissolve more in the ocean, so that you feel the ocean at least. And to communicate with other drops in such a way that you know the whole through all of them.

So first is a complete devotion. It's very important. In this incarnation only it is so very important, because you

have got realisation. If you did not have realisation, all right. Murmuring souls, all right.

Half-baked people, all right. Little bit misbehaving, all right. This can be forgiven, that can be forgiven, everything is forgiven. To look at it, everybody thinks that, `Mother is forgiving us.' That's not the point. I am forgiving because of My own nature. But you do not take it for granted. You are harming yourself by accepting that forgiveness. If you all the time think, `Oh Mother, You are so forgiving, please forgive me.' You are already forgiven, as it is. Once you call Me `Mother', you're forgiven. But what's the advantage? You don't have any advantage out of it. You are a loser. And this point at least rationally if you understand, then you will understand what is a devotion.

So in devotion of Sahaja Yoga, one has to realise that the things that are in Sahaja Yoga, that you have seen in Sahaja Yoga, are beyond your mind, first thing. Definitely they are beyond human conception.

So on human level you do not discuss them and you do not talk about them. But on the collective level you can talk. And when you come to the collective level, then you have to understand that relationship with Me is more established, better established, if you establish your relationships with others, in a very collective and homogeneous way.

As I told you, the drop becomes the ocean and the drop has to become the ocean by dissolving all its drop-ness with other drops. And all the drops dropping their dro[o]piness become the ocean ultimately.

So we'll see that devotion is double wedged: one is to each other and one is to your Mother.

In Sahaja Yoga, whatever I see, you cannot see. This is proved or not, to you people? Or you want more proofs? Now it is proved that Mother sees much beyond us and whatever She sees, happens.

So anybody who tries to play tricks with Mother is actually playing tricks with himself. Any tricks you try to play with Me, or you think that, `Mother is very forgiving, so She will forgive us,' is really you are torturing yourself, you are, it is detrimental to you. Many people are there who will say that, “It is my left Swādhiṣhṭhāna." Some will say, “I was possessed, there was bhoot." Somebody will blame something else. Whatever you are blaming, actually who is asking you the explanation? It's only you asking yourself.

You are not facing yourself.

So the devotion to Me means actually facing to yourself. You face yourself first of all and see for yourself what are you doing. You are your own enemy. Nobody is your enemy. Your Mother is not, definitely. She's not your enemy by any chance. And no bhoots are your enemies, in the way, if you do not allow them, they can't be there. No evil person is your enemy, because he cannot be effective if you are spiritually equipped.

So you are your own enemy, is decided now. The only way to get rid of that enemy of yours, you have to dedicate.

Supposing you say that, “I have faith in Mother” or in God.

So you are holding on to something, isn't it? And you are discarding something. But this hold has to be very strong. Rationally if you at that time when you are sinking, will you rationalise, “Whether I should hold the hand of this person who is saving, is correct or not?" No, you'll just, your grip will be very strong. It will be extremely strong and you will grip it with full force, with full faith that “Somehow or other, save me!" And that kind of a feeling should be within us that, `I am a person who is sinking because of myself. And if I am to be saved, I have to be absolutely, completely submerged in Sahaja Yoga. Absolutely I have to become one with it, then only I can be saved.' Because at this level, where you are realised Souls of a higher level, now for a next jump, as I was saying to you, is devotion. Anything else has to be secondary, under the circumstances. If it is primary and your attention is still on that, then you cannot have this second jump. First jump you have already done, you have got your realisation. But from first jump to second jump, you've worked hard, you have come to the second jump, in the second jump you have to face it up. You should not feel disgusted with yourself, nor dejected with yourself, or nothing. But treat yourself as a separate entity.

And dedication is actually turning back to yourself and looking forward towards the Divine personality in you. Once there is Divine personality in you, there's no problem of devotion. You'll just become one with it, you'll start enjoying it.

But this rationality is the worst thing that plays tricks with you, which deviates you from understanding that

whatever life you have led so far has been on a very material, gross life. You came out of it, you have grown out of it, you have come up. Now to blossom, to become fragrant, you have to give up rationality.

That's a binding *[UNCLEAR]*. Try to avoid rationality, try to avoid arguments, try to avoid giving reasons and... even now I find sometimes Sahaja Yogis give an explanation of psychology, “She might be insecure, Mother." This is typically somewhere read in the book, “Because of insecurity somebody does that." Actually now we have seen in Sahaja Yoga that most of the so-called insecure are the most aggressive people. They play tricks with others, spoil their lives and enjoy it. They are the greatest sadists ever born. We have seen these people. And that's how they play tricks with themselves. Now once you understand that you are not to play tricks with yourself... why do you want to play tricks with yourself? You have to be your Self, that's all. We should not be our own enemies. Are we? So once you start facing yourself, you will like yourself. You won't feel disgusted. Because that what, your Self I'm talking about, is glorious, is beautiful, is without any kalank [blemish] on that, is absolutely detached. But first of all, your attention has to accept it that, “This detachment is my life, I'm a different personality, detachment is my nourishment." Detach yourself.

One gentleman came to see Me in My house. I had a very beautiful lamp and he liked it. I said, “You have it." He was so amazed, you see. His wife telephoned to Me, “How could it be? How could You give away such a nice lamp?" I said, “What's there? Am I going to carry it with

Me when I die? Is it going to go with Me?" Just see rationally. If he has liked it, better have it. I have so many lamps in the house, if he takes one what does it matter? She said, “But You see, I asked my husband, `Will you give this lamp like this, if you had, to Her?' He said, `No, I would not. I'm really... I would not,' he said." He was very honest. He said, “I would not." But still I can't understand, why not? So, you know till the last end we are holding on to something very little there.

This... even a little bit is holding the sarī, you know that, that can hold the whole sarī. Even a little bit is attaching to this sarī, the sarī can be held back. The whole thing you can hold it with one little pin.

All these small pins that are there, the hangs-up, are to be denied, to be seen going further [away, as Shri Mataji indicates with a gesture]. Look at yourself. “Oh that's Mister Ego? All right, now recede; let me see how do you go back?" To see all those things, you see, as a play you should see yourself. And then play tricks with your ego and super ego. Actually, they're playing tricks with you. Once you are a master, you play tricks with them.

So many times I have seen, I've said so many things and they are again, then after some time, people start talking about it. Within one or two months after that, it comes as a scientific proof or things like that. You have seen that, many a times it has happened.

Now when I say something I'm sure about it. What I say, I never say anything but the truth. I know that I am saying only the truth. But I do not go inside and find out whether it is the truth or not. I don't read a book to find out. I don't ask you. I have faith in Myself, full faith in Myself.

Whatever I say is the truth, I know for definite that I, whatever I say comes out truth. But that's not your case. That's not your case, that whatever you say is the truth.

So first you have to establish this state that, “Whatever I say will be the truth." Now how do you do it? The tongue should be such that whatever you say should be the truth.

Ultimately it will come out as truth. And that is why the dedication should be there. What dedication? Why should I tell lies? There is no need to tell lies. Even if I tell lies, it will come truth, in My case, so-called lies. They are never lies. If I say to somebody, “He is a bad man” apparently to you, “Oh Mother, he is such a fine man! How can You say such a thing about him?" We had one Mister Michael like that. “Oh, he is such a loving person, Mother." Somebody said, “Mother, are you jealous of him?" Up to that extent, you know. But when he showed his real teeth, you see, then people saw.

So to develop that kind of understanding about the truth, first of all you should absolutely fix yourself on the truth. And the truth is that you are the instrument of God, that you have got realisation, that you have got a special awareness which people do not have. Stand on that. And proclaim it. You are not to be afraid of it. You have got realisation, no doubt. You have felt it. Say it, “I have got realisation.

Nothing doing, I know I am realised." Firm on that.

In this expression of truth, you have to be like the light. The light asserts. It not only asserts, but it shows others also that it shines. It shows others that `I'm the light,' that “you walk in my light and if you don't try to do it, I

may burn you.' So they have that, what you call that tejasvita. Tejas, sharpness of light. That tejasvita is there, that sharpness of light. That is the proof of your truth. You are not afraid of any prime minister, or any minister, or any king, or anyone. But, “This is the fact. That's the thing. I know I am a realised Soul, I am the truth." If you say, “I'm the truth” whatever you will say will be the truth, no doubt about it. Whatever you will do will be the truth. But say, “I'm the truth." But for that a real purification is needed about facing yourself fully, in dedication. Means you are holding on to your Mother, you are holding on to Sahaja Yoga, you are holding on to that truth which you have found out. And here you are facing others. Without that you cannot do it, your source is that.

You're standing on the truth. And that is such a power, such a strength. All of them if you see, Christ had that power, Mohammed had that power, all these great people had that power to say the truth, with full courage, with that assertion that people will accept it. And they would suffer even for that, they wouldn't mind. But whatever is the truth has to be said.

That's the first point one should know about dedication, that you are dedicated fully, that you are not afraid of anyone. You are not worried about your losses.

Some people have lost their heads, also, completely cut their heads. People have tortured them.

Some people have been... taken away all their money, have been tortured in every way, but they thought this was the truth, they stood by it.

Some of them were stupid fools, they stood for something that was not truth. They did. But now you

know that you are standing on the truth and for that you should be willing to sacrifice anything, so-called sacrifice because you are not sacrificing the truth. What you are sacrificing is untruth.

For that you require people of strength and courage and not these half-baked people. You see, morning till evening asking for forgiveness from Mother. What is it? What is there to ask for forgiveness, because I am forgiving you every moment. But what are you doing to yourself? What sort of a person you are? You think about it, that you have to stand on the truth. For that you have to be a strong, courageous person with that sharpness, that tejasvita within you of the light of the beacon. But at the same time you have to have complete dedication. Supposing there is no oil in this, it will all go off. It has to have oil. It will go off.

So the dedication part is the oil in you, is the attachment, complete attachment to your source. That's the dedication. But that dedication should not give you any other ideas but of a light which shines, which corrects others, guides the path of other people. If that is not so, then the source that you are tapping is not coming to you fully and that your light is not burning properly.

So into dedication when you go, you must not think that it is any surrendering, the so-called surrendering, that you become like a cabbage. That's the idea people have, that you become like cabbage. But you become dynamic. You become real power; not of destruction, but of construction. I mean, for destruction you don't need much power. Only for construction you need power. For destruction how much do you need? Very little. You can

destroy the whole thing in no time. But, for the construction you really require great power. And that power, sustained power, flowing power, has to be there. For that, dedication is needed. Holding on to your source of power, you have to stand firm, courageously, without any fear.

That's the truth. That's the truth you have to achieve. That's very important.

But this is only one side of the story. That's not sufficient. Just being the truth, the aspect of one side is there. But the other side of it is that when this source comes to you, you become the compassion.

The truth and the compassion are one thing. You won't believe, but it is so. Like, the wick and the oil combine to form the light. It is the burning of the oil gives you the light. In the same way the compassion gives you the truth. There's no difference whatsoever. Only the state is different that you cannot see the light which is oil and oil which is burning.

So compassion is the one which is the source as well as your store.

So from the source of compassion, you get your compassion. You see, I have seen people they want to have compassion from Me, they want that I should love them. But, reflect it back, do they love others like that? I have known people, say, for one person says harsh things to the other and comes and asks Me, “Mother forgive me for that” or does something harsh just for the whim of the mind. “Mother, forgive me." But when you ask for that, I would like to know: have you given compassion to another person? Even after getting

forgiveness from Me, that Source of forgiveness, that Source of compassion, have you given compassion to others? Have you been compassionate to others? You see, it should not be one-sided. If you are taking the advantage of My compassion, it should not be one-sided that you use it for your own benefit and forget about it. Then you will never grow. You will never grow.

If you have to grow, then you must store that compassion within you. Whatever compassion I have given you, love I have given you, you must store that within you. And give that back to others. Otherwise you'll be finished, you'll be nowhere. Is the growth which is sustained only, not only by sucking from one side, but by giving to others. Otherwise you'll be stagnated. There has to be outow.

But that is a very hard thing, because people are very good at taking compassion from Mother. Or even if they are compassionate, they will be mostly compassionate to people who are, say... in say, Vietnam, not in the ashram. They are more worried about Vietnam people, you know, “Oh Mother, we are worried about Vietnam people, we are collecting money for them, we are trying to send money to Vietnam." And here among ashramites, fighting. This is not compassion by any chance.

Sahaja Yogis among themselves are a different race and they are to support each other all the time and look after them. When I find Sahaja Yogis criticising Sahaja Yogis, I am amazed. I'm really amazed because you are part and parcel of the same. How can you criticise? One eye criticising another person, I just can't understand. I can criticise, all right, but why should you? Why should you

criticise each other? Only thing that you have to do is to love each other. Christ has said it thrice, I must have said it a hundred and eight times already that you have to love each other, that is the only way you are expressing compassion. If I have given you any love any time, you have to have patience with others, love for others.

I sometimes try to coax people and I find that people immediately come out with some sort of a criticism of others or something like that.

Now the basic thing is that our compassion, if that is flowing, then only we can get compassion from Mother. There is no place anymore, I have done too much compassion business and what I find that now unless and until you flow it, how am I to give you compassion? I mean there is no space left now.

So better give it away, empty yourself a little bit, then I can give you more compassion. It's simple business.

In this respect, one has to understand that the source cannot flow unless and until it expands the flow of it. Like the river Thames. We went to see the river Thames, the place from where it starts. It's a small, little stream from seven streams, little little, very little little, we can say trickling down. And it has become a river Thames. Supposing it does not widen, that will stop at the beginning only. It cannot come out, it cannot flow. It's not because it is angry or upset or anything like that, but by of the nature of its flow only it cannot flow, what to do? So that is what it is, that one has to give compassion to others. It should not be formal compassion, or affected one, but should be a natural one, very natural, spontaneous feeling from within. It's not an expression of

your ego, or superego or oversentimentality, but is a kind of a understanding that he is a Sahaja Yogi, you are a Sahaja Yogi, you are brothers. Not the way the brothers have been, but a different type of brothers who are spiritual brothers. You are spiritual people.

So this compassion has to be there and unless and until you develop that compassionate, fatherly or motherly feelings for others, I mean I am a Mother of a person who is about hundred and eight years of age. You have to really mother others and have that feeling of compassion and love for others. You don't have to think about your own comfort, you don't have to think about your own advantages, but you have to think about the comfort of others. You have to think what you can do to make others comfortable, than to see what will make you comfortable.

So this flow of compassion when it starts, you see, the dedication is complete because “whatever we got from You, Mother, we are giving it to others." That's the dedication.

So the flow of dedication is not one-sided. It is double-sided. You stick on to something, you get connected with something to get something out of it and you give it to others. And ultimately that reaches the collective being, means it reaches the source. It is in this light we have to understand.

Exclusiveness, or “We should now marry, we should have separate place, we should live separately", it's all right, you must have little privacy as a married people, I am not saying that. But as far as compassion is concerned, as married people you have to be much more

compassionate. But you'll only worry about your own children, about your own comfort, about your own husband, about your own wife.

In Sahaja Yoga, there is no place for such people. It's all collective. When you bring sweets for your own child, bring for other children in the ashram. You are one family and all the family has to move with the same waves. I had told you before that we cannot have separate food arrangements, separate this and separate that. In the same way, we cannot have separate standards of living for different people.

We all have to enjoy whatever is enjoyed by all of us. That should be so. And that should be achieved on material level. On emotional level, any marriage which is absurd, which makes everyone unhappy, is useless. But marriages are made to make everyone happy.

So before you decide to marry, think that you are not playing tricks. Playing tricks in Sahaja Yoga is very, very dangerous. You are not playing tricks with your marriages; you are not trying to involve somebody else, thinking that Mother will forgive you and all that. I will forgive. But your ascent is difficult.

So don't try to play tricks with anything that you have been doing before, but change yourself completely, transform yourself completely.

Now you change your attitude towards life. You can, because it is changed already. If you try to be the other person, you cannot be. Now you have become a flower, now you can't become suddenly the leaf.

Now you are a flower and you have to live like a flower. And that's what you have to remember, that compassion

is such an outow, is such a natural thing for a Sahaja Yogi. It's not natural for anybody else.

Other people who talk of compassion, or this and that, are actually are not at all compassionate. They are doing it for money; they are doing for position, they are doing for ego satisfaction. But you are having compassion because you have to have it, jolly well. It is flowing, the compassion, because it has to flow.

And you are doing compassion because of compassion. There is no other purpose behind it. Only this will give you something that is of permanent nature, of a sthayi nature.

I have seen people, as I was telling in the morning, who have gone to an organization, made a beautiful organization out of it and once they leave, the organization is finished because they do not give anything substantial to that organization. And what is to be given is a large heart of compassion. If you do not give that, once you go away from that, the rest of them are again barren. It's not growth. Like if you bring water and plant things and give water to that area then it becomes very beautiful and you can say it's a very lush growth. But as soon as that water source is removed, it gets again dried up.

But Sahaja Yoga is different. In Sahaja Yoga you not only grow as a plant, but also as the source of the plant. If this plant is removed from here, put somewhere, it will give water to other plants. Do you know this new dimension that you have within yourself, that once this plant is uprooted from here and taken out, it will not die. Not at all. It will grow, but it will make others grow. This is

another type of a growth that we have. And it's a very different position we are in and that's what now I want, that all of you, even if you are uprooted and put into any other place... I've seen, when I ask people that you better shift from here to there, they just get frightened. “You better go there and do this." They get frightened.

You are a plant which can not only go and prosper in any place, but you will give the necessary nourishment to other plants. That's what you are.

So do not stick on to one place. If you stick on, then think there must be something wrong with the place. Like a glue, if you are sticking to one place, it's very dangerous. And be sure, that you must turn away from such a place which glues you. That does not mean that as people are here, they never stay in the house, all the time running out. It doesn't mean that.

Again I have to strike that point. Because otherwise the people are here, are all the time running away from their houses. That's not the point. The point is that you should not be glued to anything and not afraid of leaving any place, because now you are Sahaja Yogis. You have joined the ocean and ocean can take you anywhere.

So just prepare yourself to move into any place, because you have to take this compassion everywhere and to prosper the Kingdom of God, you have to serve Him. And this service only possible if you know that you are here for a very great universal task. Not only for England, for India or for America, but you are here for a global task which is the epitome of our evolution. This is the highest thing we have to do for our creation and for our Creator and you are chosen for that.

So don't divert your attention to anything that is not fulfilling your own manifestation. Discard all that. Don't waste your energy. And your manifestation is your compassion, your love.

But still it should not remain rational. Whatever I have said to you is just to put you into a condition where you start sucking the vibrations as well as giving the vibrations. It is an action, which is a happening that should take place within you. It's not rationality, it's not thinking about it. Only by saying these things I really stun your thinking. You should allow this to happen to you. Just with the vibratory awareness you should judge yourself, `Am I the one who is giving vibrations to the others? Am I the one who has stored these vibrations or am I getting ruined?' All this will give you a great meaning and an employment, as I said, “Employed by God." If you have any questions, ask Me.

Question: When we get angry, is our anger just our tendency to react like this?

Shri Mataji: You see, if you get angry within yourself and if you are sure that you are not doing anything wrong, for a Sahaja Yogi there is no need to say `outside you are angry.' There's no need. That anger itself is a power. And you should do your bandhan and anything that you want to do. But you should not show that you're angry. You should be absolutely silent, because you can be, you are in the axis; you are not on the periphery. Actually the anger is just to see your anger and use that anger for that purpose. And once you start doing that, that anger will itself work out. That anger will itself work out the

person. And you'll be amazed, how it... But you must learn to see your anger that is working.

All these things are important.

You have seen that sometimes only shouting at the bhoots they go away and many mad people have been cured like that. But you don't do all that, that's for Me. You must be always decent, with decorum and all that.

But if the anger is because of your nature or a tendency or out of control, then it's a bad thing. If it is out of control, then it's a bad thing. If you get into a temper because it is out of control, then it's a bad thing. I can get very angry but I am completely under control. I know why I am angry, where the bhoot is, how he's running away, I can see that. But you can't see the bhoot, you can't see anything.

So there is no need for you to get angry, show temper.

But if you have an anger, say for example which makes you uncontrollable, then there is a mantra for that: Shanti. “Ya Devī sarva bhooteshu, Shanti rupena samsthita." You must ask for that bliss, for that peace. This is a mantra for you. For controlling your temper, you have to tell yourself, “Ya Devī sarva bhooteshu, Shanti rupena samsthita." So Shanti is the point, the axis point is that from where you witness everything. You are in Shanti, you are in complete peace. You are not in a turmoil, even if you are angry.

You are not in a turmoil. Whatever is angry is the power and the power is taking charge.

But unless and until that is achieved, what you have to do is to put yourself in a position that you are peaceful.

So I think that's a very good mantra is to say, “Ya Devī sarva bhooteshu, Shanti rupena samsthita." Can you say that? [The audience recites the mantra.] So the Shanti is your fort. But peacefulness never means cowardice. Never call cowardice as peace. A person who is peaceful is never coward, because nothing can transgress it, nothing can overpower it. It is never, never possible that cowardice and peace can go together.

But your power is inside, not outside.

So you don't show your power of your anger outside. But just a little anger with anybody, you will see it will work out. But first establish that position within you where you are the axis, where you do not allow anger to sit on your head. That is the growth. That's the growth that you are at peace.

Also, another question? All right? Satisfied now? Both ways you should know, that one is the anger that is detached, is perfectly all right. Anger which involves you, work it out.

So judge yourself, as to what it is.

Good question.

Ask some questions. I mean such intellectuals are sitting here, ask Me some questions.

Question: What are Your plans?

Shri Mataji: What are My plans? I don't plan. You see, I don't plan, because I don't know how far My instruments are ready, you see. First now My only plans, if I have any, is to really prepare My weapons all right. Once they are done, then we'll fix them up.

You see, unless and until you know how far your bomb can fall, how can you plan it? So, first of all I must measure up the power of My children, how powerful they are. That's what I'm trying to do now, is to make them aware of their powers, to use.

Like you see Hanumāna when He was born and when He grew up He forgot that time, He forgot His powers.

So He was to be reminded that, “You are such and such powerful person; You don't know what Your powers are. You ate off the whole of Sūrya. This You did in your childhood. You are born with this power, but now after growing You have rather sort of forgotten it and also You were afraid of using them and it sort of looks like in a dominant position. But it is there. If You just try to remember them, it will come." They have tremendous power these people have, tremendous powers. But they have to assume and stand on that. If they do not do it...

You see, if I tell them, “Now go to this house." “Oh Mother, there may be a bhoot there sitting." [Laughter.] A person comes possessed in the ashram. They all shut their doors. “Oh God, this bhoot has come" or something, then what's [the use]? Question: Some Sahaja Yogis use their devotion to You to oppress others.

Shri Mataji: Then again the same thing, Jamil. It's the same thing is. You see it is: you have to do it. All those who are doing that way, I am just pointing out to all those. It you are using, say, your devotion to Me for the oppressing of others, all right? So it is for you to see. There is nobody who can be oppressed, because your Spirit cannot be oppressed.

Say, there is X and Y. Now Y is a person who is trying to oppress X, all right? What will he oppress? He can't oppress his Spirit, can he? First point. Clear.

Now, this fellow, if he has to have attachment to Me, nobody can stop him. You all have direct relationship with Me, not through anyone. If you want to accept somebody's agency, then I can't help you.

But otherwise you all have a direct access to Me. You all can grow your Spirits; nobody can dominate you.

Everyone has complete freedom to know their Spirit. And the Spirit is something cannot be dominated by anyone.

Now supposing somebody tries to oppress you. What will they oppress you, in which way? They'll say, “All right, we'll not have this carpet, we'll have that carpet." Now have it! Somebody will say, “I'll jump in the sea." Jump! Just now you jump. What will they oppress you in? You see, just see that. Not in your spiritual growth, can they? And that's how the problem starts. You see, in material thing, say, in an ashram now, somebody says, “All right. We would like to have a photograph of Mother put there." The other will say, “No, we're going to have it there." Whether you put it here or there makes no difference. My photograph is going to work it out.

Even in Pūjā matters I've seen people will say that, “No, Mother is sitting there, don't put your feet towards the Mother." It's a common thing, everybody knows one should not put it. But still they'll say, “No. We want to put it." All right, let them put it. Next time they will not, because they will know it is wrong. They'll find out.

So, you see, nobody can oppress anyone. I'm here to correct. Once you understand that you are not perfect,

the other is not perfect, we are all perfecting ourselves, we are all coming up, Mother is there to look after us, then we will never think like that.

Now, I have also seen people will say that there are two Sahaja Yogis talking to other Sahaja Yogis.

Now one is a very oppressive one, the another one is upset to see that this one is oppressive. Now, for that purpose, if you are quiet, silent, you will always dominate him. People will listen to you, not to him. But even if you start saying, “Oh, you don't say like that and this” they will think these are fighting cocks.

Then, at that time, your wiser this thing will even give him a chance to understand.

But what happens, one person dominates, the another tries to dominate them by outward things and the whole show is over. There is no need to dominate another person by outward things, he will settle down by himself, if you show your dignity of your silence and of your understanding of Sahaja Yoga. There is no need just now to say, “You shut up, you sit down, you don't do!" [Laughter.] It's absolutely wrong.

They do it; I have seen it. In My presence, I have seen it.

Because we still live half way there and half way here. The way we solve the problem, say, you have to do some business. There are two people doing the business. One person says something and the other one says, “Why did you say like that? You shouldn't say." Then this person says to that person, “You shouldn't correct me." Like that, the fight is on. But that doesn't help anyway, there also.

But in Sahaja Yoga it will never help. The other person can only win over by his dignity, by his quiet methods, by approaching a person properly. That's how the leaders will come up. They won't come up by shooting another person down. Not at all by any chance. That's not possible. Is not good leadership.

Good leadership is judged the way you handle the situation. Not the way you fight another man down.

So many times you have seen I just keep quiet. It works out. Not necessary, that you should at that moment shout. There's no need. And it creates a very bad impression and very bad leadership.

First of all, you cannot be dominated, this is one fact, is a truth. You can grow in your spirituality, whatever people may try to dominate in the worldly things.

Thank God we don't have any organization. Thank God we don't have secretaries, assistant secretaries, under secretaries, vice secretaries, upper secretaries, lower secretaries, we don't have any nonsense.

Otherwise even that would have been dominating to people. Then they would have fought that.

So we don't have that problem. We don't have any money problem, because we don't have all these nonsensical ideas. I have solved these problems by having no institutions, no positions. Everybody has position.

But the greatest position is of your Spirit, which you establish. The attention is not there; is more ego-oriented. The whole stuff is ego-oriented. You can't fight

ego with ego. You cannot. You can only fight ego or super ego with Spirit.

How much do I dominate you? I absorb all your aggression also and how much do I dominate you? If I have to correct you, I go forward and do it and tell you that I am correcting you, whether you like it or not. And you see the result, it's all right. But if you have that capacity, do it. Then there is lacking in you that you cannot do that way, so be prepared not to at least spoil the show of Sahaja Yoga.

One person is talking too much, all right, the others will say, “He is good for nothing, but another one is a sensible one." But if both are fighting, then I don't know. That doesn't show any wisdom or growth, isn't it? Does it? Those who think that by dominating in small, small things, you are going to achieve anything, are wrong. Actually I have seen, My grandchildren are realised Souls, they are not bothered about these things. They don't do this. This kind of a fight they don't have, that “where to keep this, what to do", this they don't have. Nothing. At the most they might fight for a chocolate or something, at the most. But in spiritual matters they never fight. In spiritual matters they never fight. That's the place one should not fight. One should not argue. That's the point not to be argued, because truth is one.

What is there to argue? You have seen all these saints, you see, those who have talked about Me. What do they say? Everybody says the same thing about Me. There cannot be any fight between saints, can there be? If the truth is one, how can there be fight? But because one is inadequate, another is dominating, both must achieve

that state. But the best is to behave more dignified, more grown-up, more patronizing. People will definitely take to you, because you will become the leader.

Arguments are not going to lead you anywhere, I can tell you this much. No use arguing among yourselves. If you have to argue, you have to argue with others, not among yourselves.

Otherwise, now what else? Any other questions? Question: How do we fight the ego?

Shri Mataji: How do we fight the ego. See, you should never fight ego. If you try to fight it, it will sit more on your head. That's not the way to fight it. That there is ego and you fight your ego, “Oh I am going to box you” then it will grow more, you see. The more you box it, the more it will grow. Never fight your ego. Only way is to see it.

Your attention is very important. Your attention is now enlightened. Whatever you see, it comes to its right size. It comes to its right size. Say ego, if it is overgrown, you just watch your ego. Best is to watch yourself in the mirror and you say, “Oh Mister Ego, how do you do?" [Laughter.] Then it will come down. But don't fight it. Just to be seen.

All kinds of egos could be there. If you are overeducated, you are egoistical. If you are uneducated, you are egoistical because you must try to show that you are something. All sorts of egos are there.

So best thing is to see for yourself. That's why I say” Face your self." Your self means your Spirit.

Question: Mother, is it the same for super ego?

Shri Mataji: Yes, very much so. For super ego also, not to be frightened. You should just say, `Get out! I can see you very clearly, you are there. You get out from here. How dare you frighten me, I am the Spirit. I am the Spirit. How dare you can do that.' That's how.

You see, ego makes you idiotic, absolutely. Ego makes you idiotic, makes an idiot out of you, absolutely.

And the super ego makes you a coward. It makes you a coward. Now how to fight it: “I'm not going to be an idiot” if you say that, ego will go away. If you want to be an idiot, then he will be there to help you.

If you want to be an idiot, all right, call Mister Ego. You'll become an idiot straightforward. Is the easiest way. Easiest way if you want to become an idiot, simple thing is to call the ego, “You come, Mister Ego and settle down in me” and immediately... This is a very simple composition.

And super ego, if you are a coward then it sits on your head. Say” I am not going to be." Ham, Ksham, as I told you, the mantra on the Āgñyā. Either you have to say, `I am.' The other I say, `I forgive you.'

Sahaja Yogi: [tells Shri Mataji that he is preoccupied with food and is afraid he is going to become fat.]

Shri Mataji: All right, you do one thing just now. You put your left hand towards Me and right hand outside.

He has the Haṁsa here, caught up. There, you see the Haṁsa.

[Shri Mataji greets some people who have just arrived and tells them to come forward.] That relationship with yourself should be tyrannical. You should lash it up. You

should absolutely make it clear to yourself that `I have to perfect myself if I have to give this, my being, to God. It has to be perfect.' Secondly, if you have to have relationship with others, it has to be ideal relationship. Sahaja Yogi with Sahaja Yogi, means something great. The greatest relationship is that. With your sister, with your brother, it should be ideal. And in collectivity we have to be pragmatic. In collectivity we can change our course, we'll take the way we like, the way it moves, we will manage it. But otherwise...

You see, for example, take a plane. It has the same thing. Plane, when it is in the air, it can go wherever it likes. But the screws that are fixed in a plane, are ideally fixed. They cannot just start. Like a pilot seat doesn't go to the back and the back doesn't come to the front. You see, the relation is maintained.

All right? And the screws which are made, or anything that is made, is perfect. But the aeroplane is not fixed. Aeroplane can go southward, northward, anywhere it wants to. Only the things that are in it are correlated with each other in such proportion, that they cannot budge from their ideal positions.

I'm giving this example because you are here. You'll understand it better now.

And these things that you have produced are themselves are perfect. If they are imperfect, there will be a problem. It's like that. If you understand this very simple thing about relations and attitudes, you will never have problem.

Your relationship with the Sahaja Yogi has to be absolutely ideal relationship. Otherwise some screw is

loose. Try to make it ideal. Say, there is one person. You find the person is too egoistical or something.

Try to see what's wrong with you, first of all. `Am I perfect? Am I all right or am I equally dominating? Am I equally egoistical? All right, if I am, then I better correct myself. But if I am not, if I am a good person, that way I am not dominating; then I should try to bring down his ego by making sweet things to him, making nice relationship with him.' Try to be kind to him, so that his ego comes down. Manage, somehow or other, to establish ideal relationship. Is absolutely simple. I mean I don't understand what have I to tell in this thing, you know everything, that it has to be proper.

Now see, the relationship between that [ame] and Me has to be proper, so that it does not burn Me, isn't it? It's absolutely in lifetime also, we have to do the same thing. That relationship with each other has to be ideal to create the best results. It is so practical, I don't know what is there to tell in this. And you have to be perfect, because you are the unit. And the whole thing can be pragmatic, then only it can be. But here, just the other way round. The screws are pragmatic, the relationship is imperfect and the collectivity is absolutely static. Doesn't move. The collectivity, after all we are collective, bound to each other. “How can we move, Mother? We are static now. We are bound to each other, we can't move, You see." Just like rock of Gibraltar.

Now you being an aeronautic engineer, you should understand this better than anybody else, this example.

What else is the question? How are you? All right? What other question? Question: Shri Mataji, could You say

something about maintaining our attention so that it stays where it should.

Shri Mataji: Rustom has asked a very practical question it's true that “to keep the attention where it should be." You see, for everything you have to do some exercise, abbhyas, not before Realisation, after Realisation.

The best way is to learn how to watch yourself. Just now, sitting here, just put yourself into a position from where you watch yourself. `Now what am I doing?' This is the abbhyas, this is the study. Apart from mantras, apart from anything, the abbhyas is the practice, practice of becoming a witness. And the witness is the Spirit state. There attention will not go. I mean you will see everything, it is there, but attention will be inside. Try to practice this: `Am I a witness?' Now, say some people say” Oh God! I had a horrible time, Mother. This happened, that happened." See, you are not a witness. How can you have a horrible time if you are the Spirit? You only have a horrible time when you are not the Spirit. If you can watch the whole thing as a drama that is played, then you are not having a horrible time, but this outside of you is having a horrible time, which you are watching.

That's how the attention can be fixed very well if you practice abbhyas, practice all the time to be witness. Say you go out, you see something. You just try to see it, not to think about it. Be a witness of the whole thing. The joy will be complete and also you will become absolutely peaceful. Your attention will be completely enlightened. And then the inspiration you will get will be tremendous.

[After a long pause:] See, it's working out. Working out. Try to watch.

And it has such a tremendous memory, if you know how to watch. I mean, to Me, if I see something, I mean, to Me it is just like a film in My mind. If I have seen this room, now I know what is in this design, everything I know. How you are sitting, what pose you have taken, how you were, what was it, everything is like a design. You see it comes to Me, just like a picture, absolutely. Not of this life, but of lives.

Because that's a recording system that records best. If there are thoughts it's like something in between.

You see, now he is trying to record Me on the film and if there is something in between moving, nothing will come in it. But when there is nothing in between and you are just seeing through, you are recording everything that is important.

Moreover you will be amazed, you don't record unimportant things. Like for people now, they go to a village, or any place. They will be recording, “Oh God, it was very dirty and this happened and we went there and there were cement to sleep, for example. [Laughter.] And then we went inside and there was no proper chair to sit down. And the chair was so hard and my back started aching." All these things they will remember. And then what happened? “Oh God! I couldn't get Realisation." Everything that bad, you see, just like newspaper, all bad news.

But to a person who is a realised Soul in a real way, he doesn't see, I mean, you don't smell anything dirty. You always smell something good. You never smell, you do

not think of anything dirty. Everywhere you go, it's beautiful. Even if you see just the sand, you see the pattern. Even if you see a barren hill... I saw some people who had gone I said, “Look at the beauty of these hills, in Maharashtra." They said, “Mother, what is the beauty? It's not covered with trees." I said, “That's the beauty, just see the patterns." They couldn't see the patterns that I was seeing. But if you ask Me, “What is this hill?" I also know that. Because I know the patterns of all the hills, how it has moved, how it has made patterns and things like that.

Because they don't see that, you see, they cannot see the beauty because they are looking out for defects. Or relatively, you see, “English trees are better than say X, Y, Z trees.

So then this is not better." The relative they start. But you are at absolute point, you are getting the absolute of everything.

Everything is your own. What is there to judge? Unknown [comments]: Mother, perhaps You can see the beauty because You are the artist.

Shri Mataji: I am the artist and I am the art. But what about you? Who are you? You are the one who is created and you can create and you can become the artist.

That's what I am saying: that you are not only the light, but the light that will give light to others.

And also you will sustain that light which you have given light. This is the difference now, between you and other people. Not that only you will be the artist, but you'll enjoy the art of the artist. This is what you have got, you don't know, you are not aware of your powers. It's a

dynamic thing which has happened to you, which you should take to. But our attention is on from where the dirt is coming, where the filth is coming, you know, where the ugliness is there. If your attention is on ugliness...

People tell Me, “There was, this was ugly." I said, “I didn't see. I just saw the way the elephant was standing, you see. The way he has pulled up his leg and he was raising his trunk. I never saw the dirt part of it. Where was it?" “At the back of it." I said, “I never went on the back." If your attention is on... even description of a person. I ask a person, “How is he?" All his little funny points will come to your head. Even the photographers I have seen. They will only take photograph when you are in a funny way. See, when your face is a little turned round. I mean it's a seeking after ugliness, seeking after mistakes, seeking after something wrong. All the time if you do like this, you cannot be a happy person, all the time trying to find out defects and faults and mistakes and dirt and ugliness. I mean you are in for trouble. You are asking for it.

Like a person was saying, “There are three-four ditches in this place." I said, “Did you jump into one of them? Better jump in, so that once for all you do not see any other ditch. You don't see the plain grounds, you are just seeing the ditches. For what?" The same thing can look ugly to a person who is of that kind of an attitude who wants to see everything ugly.

Try your attitudes. Try to see good in others. Try to see. I am not saying for other people, but I am saying at least for Sahaja Yogis you can do it. Try to see good in them. What good they have done to Sahaja Yoga. What you

flowe to them. How to get along with them. Why not see the good of them? By giving them encouragement by being good to them you are helping Sahaja Yoga. But you want to help your ego, because you are very wise.

So then only, by appreciating another person only, you have better relationship. This is a very simple fact.

You see any film, there the two people are talking to each other as if they are barking at each other.

What does it take to be kind, to be gentle, to say pleasant things? As soon as they will see a person, “Oh God! You have become very ugly." This is the best compliment. That's human nature to see to the faults of others, to see to the wrong things of others. You see, they will find out in anything.

Somebody is very tidy, then that person is bad.

Somebody is very untidy, that person is bad, every sort of thing. But why not you do something about yourself that there is something inside you which is not tidy? And it is inside you that is very upsetting.

To Me it makes no difference, you have seen it. It makes no difference. If you say, I will sleep here. If you say, I will sleep on the grass there. To Me it makes no difference. To what bathroom I go, I don't even remember all those things. What is there to remember in a bathroom and this and that? All nonsense it is. I have no memory for all this thing. Even if you want Me to know, I will not remember.

If you ask Me, “How did you go to that bathroom?" “Which one?" “That one." I said, “It is all right, I have been there." Then food. What sort of a taste it was and what food it was and all sorts of things people go on

thinking about. What's the use? The whole food is going to just be digested in the same stomach. What is there to be so much worried about all this? We are wasting our energy.

I don't waste My energy. I have no energy for wasting. In the same way, why do you waste your energy? Why not see to the better side of man? By seeing bad side, if you can cure it, well and good. But if you cannot cure it you are going to get yourself bad. If you can cure it, nothing like it; but you can't.

Also, once always person says, “I do not, I would not do that." But you would do something else that the other person would not do.

When judging others, one has to know one should judge oneself first of all. Because with what are you judging?, with your ego or super ego. I have seen it's a very common failing, which should not be there anymore. Now you are realised Souls, you are saints. And the saints, though olden saints might be doing whatever they did. Forget them. But you people are not going to see the faults of each other, but to the good points of everyone.

Simple things I have seen.

Somebody says a wrong English word, or a Sanskrit word, or a wrong this, immediately you will catch on that. But he gives a big lecture, it's all right, that nobody listens.

Your mind is working, “What wrong thing he's going to say?" Attention should be onto what he said so beautiful. And then you will develop an attitude as Mine is. You will never see to the defects of others.

Never. Never known that. You will have no eyes to see.

I mean Mine is like that, condition is like that, I tell you. It will be like that. It's very difficult. Like somebody says, “You come and play those cards with stakes." I never remember. I'll always lose, so I said, “What's the use of playing? I don't remember." See, everybody says, “You have so many brains otherwise, so can't You remember these three cards?" I can't. I can't. Just My brain goes off. I forgot them all. I don't know. I look like a stupid fool when I play that game. Why should I play? Anything like that, I am absolutely good for nothing.

So it's a thing people know, “Oh She's useless, forget Her." But it should become automatic with you also. Then it's so enjoyable, how beautiful we are that everything is so beautiful around us, to see such beauty exists and we do not see it. Such tremendous joy.

Every bliss is there, flowing within us. And we don't know, we don't notice it. It's such a happy thing; it's such a beautiful thing.

“Oh God! Such a source of joy was just standing next to me, I never knew. And just I turned round and saw that force. Turned round." Turn your back, all conditionings of yours, the ideas that you have, do not pass judgment, first thing.

Great art critics and all that, please, I beg of you that do not pass remarks at anything all the time. It's ego playing the trick. Just watch it. How it is making you feel that you are something very great. Be careful.

[After a pause.] There were some people coming from America, have they come? They haven't come.

So then we'll decide when they come here what is to be done.

[Shri Mataji advises a Sahaja Yogini about her relationship with her mother. Only Shri Mataji's words can be heard.] Linda, for your problem, what is the thing to be done? Will you get out of your personal problems or not? Now I'm talking to Linda now.

I would suggest you should stay with your mother. She needs you. She's an old woman; she needs you. You must serve her. There's nothing wrong in it. No, no, no. You are inadequate. Not that she is inadequate. You to serve her. Give her love, affection. She's lonely. She behaves like that because she's lonely. You are inadequate. I wouldn't say to her anything. She never had love and you are the only child she has. You should love her. Give her more love, more affection and also what she says about Peter, you should do that. Will give her consolation. She's going crazy because of that.

Let her say. Her saying, nothing matters. You see that's nothing. That's just an escape. Because you are crazy, that's why she thinks like that. But you should establish yourself with more patience, with more love and affection. She said do a hundred times Sahaj Yoga. How has she changed her attitude because when you went there you went crazy. And you are quite crazy sometimes I've seen. First of all you must be a tidy person, neat person, must look after her. You must take up her responsibility of looking after.

She's an old woman who has had no love all her life. What she wants is love; and as a child, daughter, you must give her love. Whatever she is, you can't leave her alone. If you give her love, I'm sure you can cure her.

Take it up as a challenge and give her a bandhan. Everybody can give her a bandhan and put her right. You cannot be helpless like that to run away from your duties towards your mother, I will never allow it.

You can go to Chelsham start a center there, attend it, do it. You have to.

Question from a

Sahaja Yogi: Should she live with her, Mother?

Shri Mataji: Yes of course, why not? She's your own mother. She's not such a cruel woman. I don't think so. I've seen her. But you get crazy, yourself. I know. I know that. This is how you will test yourself.

You should live with her, after all she's so old now. What's her age? See now, at sixty-three she's left alone in that house. What will she do? You tell her that I've decided to do what you have told Me about Peter.

She'll be all right. You see, you try to tell her these things, she'll be all right. You tell her just like this, `And now I'm going to look after you, you are very sick, you're not well. Take care.' Did you talk to her kindly sometimes? No, you did not. You did not, that's what it is.

As a Sahaja Yogi you have to be extremely kind and compassionate towards her. She's an old woman, had no love from her husband. She has tried to do something for you always.

So as a daughter, you have a duty.

Linda: [says she is worried about her child named] *[UNCLEAR* Bumble].

Shri Mataji: If you finish off from yourself, she won't be finishing off like that. See, when you create a problem

between you and her, first of all, there should be no gap. If there is no gap, then there won't be any problem. The problem is because you are a problem and she's a problem, so the child suffers. But if you just have nothing, if she tells, on the contrary, if a child tells anything about your mother, you should say, `Don't say like that to her. She's my mother.' Tomorrow she will turn back and tell you that. Take it from Me.

She's much more sensible in this than you are. You should not tell her anything about your mother.

You should say, `She's been very kind to me and nice to me.' If it is communicated to her, if through Bumble, things will be all right. See, how long is she going to live with this kind of life she has had. All right? Where are you going to try your Sahaja Yoga if you can't try on your own mother? No that's not the way. It's not outside; it is inside. You don't have to do it outside, you have to do it inside with her. Be kind, be gentle, be of service, at the most she'll shout sometimes, doesn't matter.

Forgive her, forgive her.

Linda: [says her mother can't sleep at night, wanders around talking to herself].

Shri Mataji: You see, it's all right. If she doesn't sleep, then you can say some mantras in your heart.

You know there's a mantra of nidra and all that. You put her left to the right, she'll sleep off. You do it all that she'll sleep, you should say that three times heavily you'll sleep off. When she's talking also if you sleep off, she's not going to wake you up again. You just doze off there and she'll say, “All right, you go and sleep now formally." It's very simple to fight out these things. I mean she

needs you, very much. She can't sleep. Just imagine, a mother can't sleep. How can you run away from her? Just see her condition.

She's your mother.

Then how can you leave her? You can't. You can't leave her. No, I wouldn't say that. You can't leave your mother.

You know, Kathy wanted to come with Me. Remember Kathy? I told her, “You can't leave your mother in the hospital, come with Me to India. No, you can't." She missed that thing completely, I told her, “You stay with your mother." She's here, just ask her. I did tell her. And she was cancer, this thing with the Sahaja Yoga and all that and she used to attend to her. She stayed back. No, you can't leave your parents like that, you see.

Parents are very important things. After a certain age, you have to look after them. Whatever they are, you must look after your parents. That's very important in Sahaja Yoga.

Your right Heart cannot be all right, Śhrī Rāma cannot be all right if you don't look after your mother.

She's not such a bad woman. I've seen her. If she were a very cruel, horrible, this sort of thing, then I would have said, “Forget her." She's not that way. She's not either so much...

She's drinking because she has no company, she doesn't know what to do with herself. See, she is trying to run away from herself. It's very simple to understand.

You be kind and gentle. Give her some value that she's something to you, she'll be all right. I've seen she's not a

bad woman. Lot of hers has come into you also. Her goodness.

Linda: [tells Shri Mataji something about her mother's brother.]

Shri Mataji: That I have heard of already. That story I know, whatever she has done, whatever it is. Doesn't matter. By leaving her, are you going to help her by that? You should fill the position of that brother. You should say, `Doesn't matter, if the brother has died, I'm here to look after you, mother.' Why she hankering after the brother, she think if the brother had lived he would have looked after an old lady? But God knows if he had looked after, he would have run away, too.

Why can't you fill the place of the brother? You can. Why not? You take it up upon yourself. You can do it. I know. All right? You look upon her as you look upon Me. Why not? Just try. It is worth it.

It's worth it.

Be nice and gentle. Say nice things, pleasant things to her. Show interest in her life.

Actually you see all of this has come from these psychologists also. Horrible ones. [Laughter from the Sahaja Yogis.] No, they always say, “Mother did something." Everybody I saw they said, “My mother is like..." I said, “How can everybody's mother be so cruel?" Could be some people's, but not everybody's.

And also if they have deviated from right path it is because they never got their love, they never got their place in life. See the husbands must have ill-treated them, tortured their lives and must have been after

them, or maybe they had some other problems from their parents or something.

Everybody's mother has tortured. [Shri Mataji laughs.] It's a psychology, I think. That way a mother is in a way always, if you look at her from a wrong angle, she will look like your enemy. In the West, the mother picture is horrible. Also wars, things have come in that generation. People have been shattered of their values. You must understand what kind of life this horrible Western society can give to women who are good. Good women are really tortured in this society.

Only the smart ones and the ones who are very arrogant and who know how to put men right and women right in their places can exist, you see, this is what it is. It's a regular struggle here. Any good woman is tortured in this society. I mean, if she exists and she really lives, is something surprising. Ask, Maria will tell you. You ask her how they put them down, how they insult them, how... I mean, everybody has seen this happening here. But don't blame the mother all the time. At this stage, you must look after her.

Now what is next?

Sahaja Yogi: Could You marry me and my girlfriend?

Shri Mataji: Who is your girlfriend? She's not a Sahaj Yogini? She's a Sahaj Yogini.

So you want to have a marriage on Kṛiṣhṇa Ashtami? Some of the marriage to be performed? Now when is the Kṛiṣhṇa Ashtami? Another Sahaja Yogi: Next Sunday. [Lots of laughter.] Sahaja Yogi [who asked to be married]: Some time in the future, not...

Shri Mataji: You see, the best place to get married is in India. Very easy and you have a real feeling because you come on a horse and this and that, you see? But even if you want to have in Kṛiṣhṇa Ashtami day, I don't know if you can get really somebody to do it, if somebody we can get, we should do it.

There are people who want to get married, but you see Sahaja Yoga marriage is taken for granted. I've seen people do not have that understanding and it's very dangerous to play with; it's very dangerous.

See? So I think if you have some time given to yourself, I will definitely marry you. Best thing I think is let people take some time and decide, because you see it's very funny, nobody feels responsible about it.

They'll come out with a explanation, “Oh, I didn't understand and I was not in a position to do it, I was still possessed with a bhoot and I married another bhoot" [laughter from the Sahaj Yogis].

Same

Sahaja Yogi: [tells Shri Mataji that he will introduce his girlfriend to Her.]

Shri Mataji: You see, you have given sufficient time now. But you see one thing is they, living is, in the West, is simple people; but if you tell them “marriage” oh God. They go amok. They go amok. You see if it's a marriage, “Ahhhhh." Ask David Prall, he'll tell you [laughter].

You see because the life is so horrifyingly funny here, “Marriage, oh God, it means horrible things. You have to separate. If you have to divorce... first thing about a divorce, you'll have to give so much money.

Half money the wife will take away. She'll murder me." You see, they' show husband murders wife, wife murders husband, all sorts of things you know all the time it is like going on in this country. It's madness about marriage.

So I think it's a good idea. I would like if you can arrange, because Kṛiṣhṇa Ashtami's a good time to marry people. Our sixteen marriages, which one has failed? Last time. For the sixteen. No, sixteen here in London. Who were the sixteen people, let's see. All first class? All first class, yah? Yah. Good.

So for next marriage lot.

Some will be lagging behind like Nick, I would like him to marry. Now you're not so frightened are you? Nick? On the Dussehra Day we can have marriage. The Dussehra Day, that's another day one can marry.

Now Kṛiṣhṇa Ashtami, the Dussehra Day. Of course after the Diwali, after the marriage of the Tulasi, then only people start but the Dussehra Day is very, very good. It's very auspicious.

So we'll have marriages on the Dussehra Day. Till then prepare people for marriage. All right? The Dussehra will be say about... end of October, about. All right? Let's find out where will I be.

So that's all.

Gentleman [who has been in Sahaja Yoga for some time but still cannot feel the Cool Breeze or the catches]: [about what he and others like him can do to feel vibrations.]

Shri Mataji: No, no. You see, to begin with, you see, it has something to do with your nervous, all right? So if your

nervous system is disturbed, you may not feel it, at all. For the nervous system, best thing is to do message. You see somebody should massage their back, hands. Also I have told many a times that you rub your hands with vibrated olive oil quite a lot and rub these things so they become sensitive. Could be with insensitivity; but if they can feel the catches in the body, that means they're all right, only their Viśhuddhi is not all right. Rub the thing on the Viśhuddhi. Work on Viśhuddhi, clear it out. And for Viśhuddhi, if you can use, say, butter, to rub on the here and rub all these muscles, you see, with that, all these things will work out for your hand.

But supposing there's no Cool Breeze coming out of the head, possibly, then the Realisation is not yet established. See, other people should say whether there's a Cool Breeze coming, because the person who is not realised may not feel it. Supposing he does not feel it and you feel it, then he is realised; only thing, his Chakras are to be cleared out.

It's a different, different category of people. Then there are some people whose Kuṇḍalinī has not risen, they are still Sahaja Yogis like that. Maybe, I don't know if there are any. Those people who are unmarried for long, they are very difficult people, because they never feel the Cool Breeze in the hand, quite a lot, like that. But you see it is not so, they are realised Souls. In any case, they may not feel it, but they are realised Souls, you see, because a kind of a softness, a kind of a balance is developed after marriage which is not there. And that's how some people don't feel it.

There are various reasons.

Some people who are ego-oriented more, they should turn their left to the right many a times. They should find out, from the hands, you see. One hand is bigger, one hand is smaller, that means the left side, if it is smaller, that means you have to raise left to the right. You see, from the size of the hands and all that you can see. Putting one hand towards the photograph, another hand outside. Work it out in so many ways, because you have permutations and combinations of certain mistakes. But that doesn't mean you develop this left Viśhuddhi by any chance, because that's the worst thing that can happen. If you develop the left Viśhuddhi, then it's a very difficult situation *[UNCLEAR]*.

Now, for this kind of a thing I think I'll give you a complete lecture on one day, complete, as to see what permutations and combinations of different Chakras can create. All right? But symptoms are outside. Symptoms are mostly outside. There's no need to... from a personality you can see what it is he is catching.

Is a very big problem with people, that they don't feel the vibrations.

Some people just don't feel.

How many there are like that, who never feel any vibrations, never felt? Raise your hands. I know Kevin.

You have felt it sometimes? All right.

Sahaja Yogi: [says that when he was doing work in the ashram, his hands were hot.]

Shri Mataji: Which one?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: Both the hands are...

What work you're doing in the ashram?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: All right, you had a left side catch. All right, you can see clearly your right hand is very shiny. The left, there is a problem. You see these fingers are not so shiny as the things are. You had a left side problem, if you remember it. All right? So, that's fighting. In the ashram the vibrations are fighting, that's why you feel hot. There's nothing wrong with it. It will correct; it will have Cool Breeze. Put your right hand always up and left hand towards Me. It will correct.

When did you come?..... [About 20 minutes still to be transcribed.]

Contents: 1982-08-13 **Talk to Sahaja Yogis, America: Its Future and Problems, Brompton Square, London, UK**

(other date 08-31) And I found Russian people extremely helpful in Sahaja in a way, very indirectly. The thing is they are very simple people, extremely simple people. I went to Uzbekistan, the people of that place are extremely generous, very simple and their self-esteem is absolutely correct, most surprising Sahaja Yogi or Sahaja Yogini [interjects]: It's tremendous.

Shri Mataji:... yes and the people who were very highly placed sort of the Prime Minister, Deputy Prime Minister of Uzbekistan, sort of people there, they told Me that they are seeking their spirit, this is not the end of that, just imagine and practically everyone at that level said that they are seeking their spirit. I warned them about this parapsychology that they are indulging into, it's a

dangerous thing and they are amazed and they said that “yes, we know about it” they have so much idea about the negativity and all that, most surprising. I was very much impressed, I knew their sense of administration will be different, their attitude towards people may be different and their administrators may be different and all these things are wrong but in way, you see, these people have taken all the badness to themselves and have saved the rest of the people at least, the administrators there and they could burst into stars in there, it will take off just like that, I know. Sahaja Yoga will work out in Russia much faster than I ever thought of, really.

Question by a

Sahaja Yogini: And what about America Mother and the American people, what is their future in Sahaja Yoga?

Shri Mataji: You see American people think no end of themselves. This is the biggest problem.

They think they are always right. They insisted on South Korean war, Vietnam war, this and that. And everywhere they thought they were the right people to do right things, they are very right and their sort of kingdom, this and that and all that. They've always made mistakes, always made mistakes. That's the problem.

They are so confused, so complicated, they are extremely complicated, in everything that they do there is a disgrace. Like they will help a country, they will try to show off, that the, they have got the grace of the tradition you see; a traditional country when it helps other country it understands that if it is helping other country it is helping themselves because they are, they can't bear the poverty of the other country. That's how

they are. I think even the President Roosevelt said that “poverty anywhere is threat to prosperity everywhere” you see, he could feel the collectivity, he said so, but Americans thinks, you see, no end of themselves and they think they are very great and they won't make mistakes and always side with wrong people, because they are so confused and so complicated, always side with wrong people, they have compromises always with negativity. It is a very difficult country. I learnt it first time I went to America I said “nothing doing, I'll not go back” because they are so confused, you know. Now the confusion comes to them because they are at the Viśhuddhi, see America is the Viśhuddhi Chakra and that is the place where the confusion starts, you see, ego and the super ego get stuck.

So either they'll be on the super ego trip if they come out of it they'll be on the ego trip and that's why there are extremely confused people and they have so many compromises, you see. In Sanskrit language, for example, there is truth and untruth, there is nothing like truth, semi truth, half-truth, as you have in your language, it is just Satya or aSatya, there is not two things.

So whatever is truth, if you are to be identified with truth, you have to stick onto it and all that is false has to fall out, there cannot be compromises with untruth, if you compromise with untruth you'll stick onto that, but you cannot get truth if you are in that mire of falsehood and they don't realise that in the mire of sin. And they have to get out of it it's a very, very dangerous thing they are into it. You see, apart from the nature that will be against

them I don't know what's going to happen to them in future because they might be just shunted out of the whole program of emancipation one day, though there are great seekers born here.

And now, just see their foreign policy I mean they are so funny, they are giving their armaments to all the countries, can you imagine? Sahaj Yogi [interjects]: that's true.

Shri Mataji: And they are creating problem, I mean this is, I don't what to call this, this is such a anti Viśhuddhi work, it's anti-God, completely anti-God, because you are going to create good relationships, you are there to create such governments which will work out with love and affection and give people freedom and all that, here you are, you are giving them a weapon of destruction and making them strong in destroying each other. I mean, this is what they've been doing always identifying the wrong type of people, always, now say they are more sided with Pakistan than with India. You know that India is the country for spirituality, you see. And all Americans are in India seeking God, but their government is supporting Pakistan against India, I'm not saying that because I'm an Indian, but as a Mother I see this very clearly that in spirituality one day India has to come. Now they, why they are confused? Because you see as I described to you before, that, you see, the development can be divided into two halves, one is the development of the root and the development of shoot, now these are the Western people who are at the shoot end, now they go on increasing, increasing like that and they have no roots, you see because traditions are missing firstly

that's how and that makes them feel guilty also about it, but traditions are not there, doesn't matter, you can learn from others, but they don't want to learn from anyone, the roots are missing also because there's no attention on the spirit in the whole working out, they have dollar, you see, they have dollar, dollar and so miserly and disgraceful, you see with money nothing can go into them because there is no connection, they haven't got connection with God, they haven't got connection with their spirit, they haven't got connection with religion which is within themselves.

So what happens, they are uprooted type of people and those uprooted type of people when they start expanding nothing goes into them. I mean a culture of a very highly-placed American is the same thing as that of a laborer; they will lead and they'll have a huge house and a swimming pool and this and all swankiness but if you see basically they have dirty jokes, they will, the same things that an ordinary laborer does is done by an American, you see. I mean there is, nothing goes into them, I think, nothing goes into them. For example in India people who are educated and elite and say. They can never become violent, they can never become angry, they cannot behave in the way a laborer can act, they cannot box people and go about or take a pistol and kill somebody, but there is nothing like that in America, anybody can do any work, you see, there is no understanding that you have to grow into culture, there is no cultural imbibement into their characters, you see, it's all superficial. The reason is they have not touched their roots, the roots are their spirits you see and that's why

sometimes I am amazed the way they behave like, you remember we had a program there and a gentleman came and he just quickly gone...

Sahaja Yogi or Sahaja Yogini [interjects]: Yes in California.

Shri Mataji: in California, I mean this has not happened anywhere else but in America. I mean just see there should be certain cultural growth in them, it's so superficial, they try to copy English, they try to copy this, copy that, but why don't they become themselves what they are because you see, they have a big balloon on their head of their ego and once they finish with that, they go into super ego balloon, like people getting into all these Gurus now, all the Gurus have landed in America, nowhere else, why? Because that they are supported, you see people are so confused they are still carrying on with Rajneesh, imagine Rajneesh has been ousted completely from India, TM is ousted quite a lot from India but not from America. They are settled down there, now Rajneesh people have gone and settled down there, TM people have gone, settled down there. All those who are thrown out of India have gone settled down, as if it has become a receptacle of all the discarded ideas and all that, you see, because that's the place where sin can go on, that's the freedom, where sin can go on is the freedom.

So, this confusion comes because they are lacking in the wisdom that you have to reach the spirit which is truth and you cannot compromise with another. Like they do not mind having a one Guru here and a one Guru there and a Guru there and a Guru there and also the Sahaja Yoga. See that is how you cannot grow. They will have

aura system, they will have, I went there, parapsychology, you see parapsychology is a very big official stuff there, you know nonsense and they are so confused that they don't understand that the fear that they have is not from outside, from within, the nature is of course is going to be dangerous, but within themselves cancer all these diseases are much more in America than anywhere else, impotency among men all sorts of things, this other disease homosexuality all sorts of these nonsensical perversions they are coming from all the Chakras getting ruined. They don't understand, they have, they don't want to see, they live in their own imaginary world and it is very difficult to tell them, because they get punctured.

You tell them something and they will not accept. They think they are doing the right thing. One day Gregoire asked Me, “Mother are You going to cancel them from program?", I am not into say that I'll cancel them, but then when I went there first time I was amazed at their understanding of God, amazed at the understanding of reality, very much amazed, because you see, first thing they told Me “Oh, what are you doing? You must charge some money” nowhere else people suggested this to Me “You must charge some money for your work, you must charge some money because you see this Guru has come." This Raktabīja went there and he is charging so much, the fellow went there and this that. And I was amazed that the white people and the second thing they told Me was another thing was that, “No, you should not be, you are very might and you are very kind and you don't come up with the truth, immediately, you see,

gradually you have to know You, more and more and more and then you get to Me" especially in Portugal and Spain people told Me that “Mother, we were amazed, you see, they came and they just told us. This Raktabīja come and told us" “I'm a `perfect' master" see, copying the `perfect', because you see, he couldn't say perfect. You see there is a gentlemen who knows English very well and he used to tease a lot. He said “I am a perfect master" and translate him a little spoilt also his English, because he was quite good at English also. The way he was pronouncing and he said so. And when he said it, I was about to translate. And there will be, all kinds of things are going on in that country, you see, they use all kinds of things. Now when I told the Russians they got a fright, it's parapsychology, they want to listen, they want to understand, because they are worried they are not such a venturesome that they get into hell to find out what's in the hell, but that's Americans style of doing things. You see, they are very, very venturesome of things and they think no end of themselves. You see and this is the big problem they have.

Now if you want to know about the future of Americans I would say there's a very big potential because they are at Viśhuddhi. You see, if they take to collectivity in a big way, not that only Sahaja Yogis are working out 3-4. You see, I can save all the Sahaja Yogis, it's alright, they are all, will be safe no doubt but your own country is running into a very anti-God activity, because they are supplying arms to other countries, I mean this is something anti-God, absolutely anti-God activity because you are suppose to create better relations, in the unconscious

they are, from the unconscious they got the idea they started U.N. and even the first one they had, the same international organization and now another one, but in these organizations also there are bhoots working out. You know there are wrong types of Gurus have entered, even into these organizations, apart from that they loose their name because if they start giving arms to people to fight, this is absolutely anti-God's, absolutely you can call this is anti-God's activity Satanic, absolutely Satanic, instead of giving the wisdom, the sense of discrimination, just the other way around, they lack sense of discrimination. And this is how, this is how, you see, the confusion has started in that country, as I've told you that the East is the root and West is the shoot and the shoot is increasing size, is manifesting itself, is growing big and the East has to look after the root side of it, to begin with, then it is also thinking of becoming the shoot. Now the shoot is the one which has lost its connection with its source.

So you'll find that those people though they have advanced, so-called, in affluence and in so-called education, science, technology, everything has happened, but nothing has gone inside them.

So when they are growing out as shoots they are loosing their morals. They are loosing their absolute point.

So relatively they live and that's why they are so confused, in relativity you become confused, there is nothing absolute to judge whether you are doing the correct thing or not.

Now the brighter side of America is something else, this is the background, this is the confusion, for them money

is very important, with the money they become ego-oriented, they think no end of themselves, they think whatever they do that's right, everything is there, but the good side of America is that maximum number of seekers are born over there and people of very high quality should be there also, we have to find them and they haven't yet known of Sahaja Yoga maybe that we have not made full effort that's why we have not been able to get more. I've full idea that there must lots of really good deep seekers in that country. Now we had one coming from America somebody who came to be in India. Now he's supposed to coming from a rich country, came there and he said he had no money to pay for it, why did he come? And who's going to pay for him? And he didn't mind at all, I mean he had no self-respect that time to think that we should, he should pay, on the contrary he said that, “Why? America is giving so much loan to India, so why should I pay?" Such absurd things you talk, you see.

So that shows that they've lost because ego has blinded them too much, but the good point about them is that they are seekers of ages born there, to reap the fruits of their good doing. Like it is said that when you do good work you go to heaven and enjoy the fruits of it, but while enjoying the fruits of it if you don't keep yourself on a, in a discrete level then it is possible that you will loose all those things and you will go down into hell, it is possible.

So the interest of Sahaja Yoga in America is that maximum number of seekers are in America, there are some very great high quality seekers and I am sure very

soon we will be able to locate most of them if I persist, if My attention allows Me to be there but they are so mixed-up, when we get the real seekers they will not be mixed up with other things, they will just give up and they will just join Sahaja Yoga, immediately as so many of them have joined in England and America and in England and Australia and in India that they give up all the rest of the things and they just jumped into Sahaja Yoga. Now this kind of a thing when it happens that there are seekers, there are so many seekers, such good seekers are there, naturally all the negativity is directed towards that, you see. Now, all the bad Gurus, all the horrible false ones have settled in America. All the goods ones are still in India, they don't want to go to America.

I asked one gentleman he just went up to New York and ran away.

So all the good people are, be lifted one day I think and all these horrible will be settling down. That means that is a place where everybody can be accommodated, you see. This kind of a accommodation is no good for the Viśhuddhi Chakra, if you have such a bad Viśhuddhi where all the bhoots are accumulated, then what is going to happen to that, to the people? But to come to Sahaja Yoga these people have to have more discretion, more scholarliness, or we can say more understanding.

So all this is lacking, they have much less understanding that English have about Sahaja Yoga, because English are not easy to deal, they take time, they are not mobile people like Americans are, but once they come to it, they understand it, while Americans are very mobile people. Now the advantage of mobility is that if they start

growing they will grow much faster, there's no inertia, there's not looking forward, backward, they jump into it, but they can jump into wall also, as they have told, so many of them have become say disciples of Raktabij. Now, he is one of the most difficult Gurus you could think of so-called the false one than anybody else, because he hits your left Nābhī so badly that he causes a terrible distress inside that they become ego-oriented with the bhoots, such a combination, they are ego-oriented with the bhoots, normally it is superego, but with this gentleman they are ego-oriented with the bhoots and they cannot give up the bhoots, moreover the afinity is so great that if there is one Raktabij fellow, he will always support another Raktabij.

Now I have not been able to do much about the Raktabījas in London, they are poor things still collecting money for his 60th Rolls-Royce.

So this is another stupidity going on. Now surprisingly those people who are going to Raktabīja in England are not educated people. They are people of a little lower levels you see. But we have had some people from Raktabīja in England because of their English character like Jason, just immediately left, completely, 100% he never talks of him, he doesn't think of him, thrown all the books, burnt all the books, he is done it. Just that thing is, is the calibre, he is a man of calibre, so that calibre we'll have to get in America to establish, we have some people but very few, alright.

So this kind of a thing when you do, then only Sahaja Yoga can mature and the quality of people that come from Raktabīja have to be of a calibre otherwise they

can't get rid of him, because it is a very deep seated bhoot and he will take you to all other things, you see, it will be Guru shopping will be on and this thing. One is scientology and the another is this. Scientology is nothing but is Satano-logy and this Raktabīja is another fellow, is a very very difficult thing because it has nothing to do with your mind, at all, so what happens, that you are completely on the left side and he gives ego to you, because he hurts your ego so much that you cannot take it any more, so you become ego-oriented.

So those people who are from Raktabīja when they come to Sahaja Yoga, they become suddenly, overnight, great leaders of Sahaja Yoga, they become in charge, I've seen like a friend of yours who came recently, see, she started giving suggestions about Sahaja Yoga and people were amazed but nothing to be amazed for Me, because I've seen them. They behave like they suddenly become very great experts. They don't know anything, what is vibrations are, how to raise the Kuṇḍalinī, they don't know, they've, they've given no realisation, they have not been to India, they have no idea as to what they are but immediately like a little boy coming into the school, starts giving lectures on M.A. classes like that they start, so up, up, up-startish nature and so bumptious, you see they think they are very clever, they are very intelligent, how to say, they don't know what are their problems, they don't know what they are up to, they have no powers. They think. They are very weak, their left Āgñyā is very weak, their left Nābhī is very weak, could lead them to horrible diseases like blood cancer and all that is not a easy thing, no? Could be in the eyes, they might

suddenly become blind, they don't know, within five minutes, it might happen to anyone. Today it's a very serious thing, but how will they know till it happens to them and how will you warn them? So I think this has to be done very carefully always a Raktabij person will have afinity for another person. For example one Mister X is already with you, there are two Raktabījas are coming, he will have more feelings for that always.

So best thing is to tell this person, already warn him, that be careful, if you have to save them you must cleanse yourself, otherwise you cannot cleanse, you cannot cleanse them, you can not pull them out of that mire, you have to be strong, so you be strong enough to do it, it is a very delicate work with Raktabījas and we have to see to it that you work it out properly, because unless and until it is done that way, you see these Raktabījas are to be told about it and they should be cleaned by keeping them out of bounds of other Sahaja Yogis, you see, who gradually, you see, can have a parallel organization for Raktabīja's people coming in, cleansing them as we did for these Maheśh yogi's people, you see. Let there be a parallel thing, that let them not mix up with new people because they'll confuse them, they'll talk, they'll argue, they'll fight, that's the way to deal with the Raktabījas. He said, “I'm a perfect master” nobody is going to ask him whether he is perfect or not, then they went head long, you see. And here I think you made a big mistake, a very big mistake, I must say and I don't understand why you did it because you know for definite that in Sahaja Yoga I don't want anybody to know who I am till they have come to a point, never we try to tell them and then

[UNCLEAR place] seminar was another very big mistake because all such half-baked people who've been to seminar, the people who are higher get disturbed, upset, not only that but they get affected because they come with the great idea that “they are going to the seminar and is going to be lifting up" but all thing pulled apart, they are argumentative, I mean it is so cheap, the whole thing was so cheap.

And I was very unhappy when I learnt that they have been behaving like this, that everybody got upset, the vibrations were spoilt, they don't understand anything, they are blind, they don't understand what they are doing. They are playing into the hands of their bhoots and they are acting in a way that is harming everybody and everybody's vibrations going down, you would be feeling so bad, they had right Viśhuddhi, they had left Swādhiṣhṭhāna and even in My Pūjā. Even some of them were not there, they were some not such good people, little half-baked type, I told them “don't bring them" and the Pūjā was so strong that I had to lie down for at least one hour to take out the vibrations, you know that very well, so you must understand that when there are people, I do not discriminate but those people who cannot bear My powers, I didn't want to put them under pressure and nor do I want to suffer unnecessarily because if they can't get it I cannot just force it into their mouths, so such people who are half baked, who are just in Sahaja Yoga, coming to seminar has no meaning. It is not a seminar of intellectuals or some sort of a mesmerizers, who'll just come and mesmerize some more, put some more bhoots into people but it is the

seminar of people who are free, who are independent, who have become Sahaja Yogis means they are standing on their legs and they know what they are doing, they know how to become and how to make others become, they are not cheap people that they are just mesmerized by somebody like mad and singing song of their Guru's style, only those people are to be told about surrendering and all that. I don't want to talk to these people about surrendering and this thing. What will they do their surrendering? I mean, how, what will they surrender? What do they have? Except for their ego and superego? I mean, I would never like to talk to them anything about My life, or anything who I am. I never talk to them, I never said these things openly you know very well. I could have said like these Portuguese peoples told Me, “Mother, why don't you say like him the way he said? That I'm the Ādi Shakti, I've done this." Why should I say? Can you bear it up? I am not a mesmerizer to make your bear, what nonsense if I say it has to be known only if I know mesmerism. And this is something that this is the most sensible thing you know, that recognition in this incarnation is important, but that has to be done gradually, they cannot recognize Me, they are not sensitive. I've seen some people very sensitive, we went to a shop the other day for ties and the fellow, who was there, immediately recognized Me and he said “I find the complete majesty walking into my shop." He was so respectful. He said, “Am I alright? I hope I haven't said something more. Have I done any mistake? Did I say something more? Should I get?" like that. And I was amazed he was an Englishman, not that an Englishman

had recognized Me that way, the way he had I mean his question of their sensitivity and previous lives, good, good work and all that. But he had such confusion. You don't know whether to love a woman or a man. You don't know whether to love a dog or a horse. It is sort of a confused state of your mind, how can you recognize such a camouflage like Me? So this is the thing, so next time please don't bring anybody who is not a Sahaja Yogi according to you. Then there are no arguments, then you have found the answer, you start doing the work, you know what is vibrations, you become the Guru, you yourself know what is happening and everybody was stunned the way these people were funny and argumentative and very unhappy.

My own opinion is this, that America must be saved, that's a very important part of the body of the Universe and that is the Viśhuddhi. We have to save it and to save it only thing what we have tell these people in a proper way, that still you have not known what is Sahaja Yoga is, it's not like any other Gurus, or anything, on the contrary just the opposite it is. It doesn't take any money or does not do, it's not the main thing, the main thing is that here everybody becomes alert and awakened, that everybody knows what is to be done, what is not to be done and once they become awakened I don't have to tell them that to `do this or do that', immediately they know, “This is what Mother says is absolutely true, 100% true." In even small things they start accepting Me then they start understanding Me better, so in the beginning I always take another role and always say, “Oh you are correct." So many people tell Me, “Mother, we have felt the Cool

Breeze, we have felt the cool in the hands, everything." I said alright, alright, I just don't want to have any quarrel with them, because actually they are quarreling with themselves, they are cheating themselves, why should I say anything to them? Let them understand that this is for your good, for your emancipation, for nobody else's. Why are you arguing? What are you going to save people from? What can you do about it? See, the way people argue with Me as if I've taken their money or I've done something. I don't understand. They can't argue with their Gurus, their Gurus they will close their nose and mouth and everything and go at their feet, pay all the money, they are alright then, but with Me they start arguing. This is very wrong, actually I really pity them, in India it doesn't happen. We've seen thousands of people get Realisation, because they know what is realisation is, what to expect. Here people are so naive, so ignorant, they have no idea, experiences, anybody gives them a pin prick is an experience, anybody who shoots a, what you call, a gun at them is a giving an experience, all *[UNCLEAR* limited or they live with] their imaginations of some sort of a nonsensical thing. This is as an experience we got, “We saw a light." It is an experience, what is there to show a light? Bang somebody you can see a light, it's very simple, but what to do? They are so ignorant.

Now being My children and seekers, I have to say that at any cost, whatever they are doing stupidity I know, but doesn't matter, I forgive them, I know they are stupid that is why they are so ego-oriented and they still some of them do think they are great leaders of Sahaja Yoga

this that. And otherwise they don't understand much of vibrations, much of things, but they don't understand that they are seekers of ages, apart from anything else. First of all let them establish themselves as Sahaja Yogis and they have to really understand Sahaja Yoga in its full essence. Like some people say “Oh Mother, I'm smoking, so what does it matter?" So to Me, what does it matter, nothing, you are smoking well and good, go ahead.

If you want I will give you some more cigarettes, but the point is that one has to understand in all wisdom that smoking spoils my Viśhuddhi Chakra and then that spoiling is going to ruin my ascent.

Like somebody says “I have got bad habits of looking at women, I want to run away with women, this thing, that thing." Go ahead, but that means your void is finished, your void is ruined, by that your attention becomes ruined and you cannot reach that height where you have to reach. Actually it is something like having a car which has got problems, all right? Now you don't go on fighting because you have problems in your car that I have these, you don't say that I have this problem anything. You don't say that “I'll bang this car because I want to bang it." Don't do that.

So that is what it is. That kind of a wisdom one has to have, this body God have given you, this mind He has given you, everything He has given you, not to destroy, that's not your job.

So you please look after it, love it and understand it, but don't put ego on top of it, this is somehow you must tell them, talk in a sweet manner as I do, need not tell them who I am, they will not like it, don't tell anything about

Me, that's the best way. For quite some time we never tell people, I don't like it, even some people say in the opening in introduction letter, I just correct them and say “don't talk like that." See because people don't like it, you see when it is the truth they don't like it, when it is untruth, it is all right, because they are already mesmerized to undergo untruth, you see and there is no need to be that honest, in the sense that everything should need not be told today. If you tell today then it becomes dangerous and you must understand to give up these ideas of honesty that you should come out in naked truth, every moment. You need not talk like that.

You have to be careful, because these people are there, I am very much concerned. They are My children. They'll be all lost. I'll be very sorry for that. The first place I went to was America, I knew that there is where I have to go and it has to be worked out there. But when I saw the quality of people who came, I was shocked. Also for My Pūjā I do not allow everybody to come in nor do, we don't even tell Me we are doing puja, even My photograph I was feeling better not give, because you see these wretched people who take photograph, they have no value, they don't understand what this photograph means, they don't understand anything, so you give them the photograph and just ruin the value of the photograph and it doesn't help them. You see, it is a very funny precarious thing. They still don't know what to do with them. It is such stupid atmosphere that I really don't want to sometimes thinking of doing anything for such people, but Americans should understand that their, all this arrogance and all this stupidness and high-

handedness in which they live, is not going help them, what is going to really help them is how much they develop, this is the basic thing they must understand, if they don't want to understand it, what is there? Nature is already against them, absolutely against America, they don't know what nature is building up against them, they have to be very, very careful you see, they'll all have to go to moon and settle down there. In moon even if they have to exist that may be the condition.

So they have to be careful and you have to warn them and tell them that take things in a proper shape and try to understand everything in such a way that it becomes a part and parcel in your being, that it becomes your own knowledge, that you can manage it, it is not the knowledge some bhoot goes into your head and you become the knowledge. That sort of a knowledge which is not.

Every moment to moment you have to learn, you have to, see how many years back you came to Me.

You took so much time to grow, but you had that English understanding you see, with which in one day you can shoot off to moon but not to your spirit like that. And even if you shoot off with Sahaja Yoga you don't stick on there. You have to make these mobile people stick on, you see, you have to be realistic bombasters, it not easy, but they are the people who are in very large number, I have every love for them. I'll go all out, everything I'll try to help them. I know they are lost because of the atmosphere there, everything and they are to be saved and I love them very much and they are the first I visited. We must use every sort of method to see that they come

to Sahaja Yoga, become humble people first, settle down understand the traditions of Sahaja Yoga and then go ahead, just by just doing things on their own high-handedly, you cannot manage Sahaja Yoga. Sahaja Yoga cannot be managed by you, it is done by God, you just cannot take it into our hands, it will work the way it has to work.

I have had Indians who went there as Sahaja Yogis and they started programs and horrible things they did. See, so I have departed. They first they said “we'll have our own Sahaja Yoga center” *[UNCLEAR* they not or they wanted], they lost them, other people have gone there and using them, that so-called Sahaja Yoga center, is nothing but one Mister Rammoorthy is going there, one Mister Kṛiṣhṇamoorthy going there, all of them making money. It's a money making practice. If you, they want to still make money and things like that it's a very difficult thing.

Now in Dharma, you have to be all right and all these things you can tell them later. But when you'll get real quality people you'll find they will be very Dharmic, they will not question Sahaja Yoga, they will just settled down in it and they'll just like an arrow straight forward go onto Sahaja Yoga, that you should pray that `Mother get us those people from America, they are somewhere lost, maybe Arizona, they might be somewhere, lost like that,' we had one young girl, that new girl, who travelled with us...

Sahaja Yogi or Sahaja Yogini [interjects]: Tracy?

Shri Mataji: Tracy, Tracy, her husband, both of them, Tracy is like a shot. She got it, she there why, even this girl, what's her name is? One who was born recently to...

Sahaja Yogi or Sahaja Yogini [interjects]: Marsha?

Shri Mataji: Marsha and her husband Danny, both of them. Marsha and Danny, you see Danny is one person, I must say, he's not, he's not American, he met Me in Leicester, he got his realisation, he said “this is it." I said “you are living together” he said “yes." Thank God. Don't do it. And he can't have divorce or anything this one and left, he got married. He came all the way, he got married. Then he stayed in the Ashram and paid every money and he came to this house and he helped Me here, in every way I should say he was so sweet and I mean, he is so nice to Me, I mean he had no job, so C.P. offered him a job, he took up a job and he was very, very nice here and we were very happy with him, the way he worked and helped Me and I helped him in every way, is a very mutual, loving situation. No problem.

Then he went to America I thought he will be a good help to Me, but I don't know where he is roaming about *[UNCLEAR]*. He is not yet coming but I'm sure he will join you sometimes, he is very dynamic but to him Sahaja Yoga is a very big thing and for him it is the last thing. Then we have another Steve, who is an American, I saw, he is a remarkable American, Steve met Me once, you won't believe and just he got his realisation. Next day, he came to see Me in the morning as they always do. He was there. I knew this was the one. He said “I'm going to Toronto” no I'm going to...

Sahaja Yogi: Boston.

Shri Mataji:... Boston, Boston sorry, he went to Boston, there started a program he sent Me a telegram. If you know Steve, people said “Who is Steve?" I said must be the same. Can you imagine I met him once and I meet so many people in England and he must be the same Steve, because he told Me, he was going to America, he didn't tell Me the name of the place he was going, he told Me he was going to America to study music, I said “must be the same Steve, I'm sure" because he was so sure shot fellow, so such sure shot people about whom you don't have to worry anything, they are just there, because their quality just they settle down. They know what it is their character you see, that is a beautiful thing you have to have. You'll get some people like that and when you work it out with them, I'll be very happy.

I bless you that you get such people around you, get such nice people, not these half-baked useless people, that will come and go away but I'm sure we'll get people of that quality and of that superior, evolutionary understanding. I'm sure you will get it, but that day will come you will get all these people from India to work out this thing, you have already some of those people with you, to work out with you and don't argue with these Raktabījas, no use arguing, you can't argue with them, you can not find out what they are up to and what they are doing.

So best is that don't argue, tell them, that you raise your Kuṇḍalinī, you cleanse yourself, don't argue, argument is not going to help. I'm sorry you should say, that there should be no argument, please sit down and cleanse your vibrations and don't say these are vibrations, this is

wrong, just try to do it well, try to give realisation to people, then start talking on Sahaja Yoga. How many people have you given realisation? All right? Now this kind of a thing if you tell them, they'll be very happy and tell them that “Mother wants to come to America, She wants to do work, but it has to be done in a way that is just the opposite of what other Gurus have been doing." I do not want to profess anything big, I don't want say anything big, because let us see what sort of the people there are, how they are coming in and prepare them, then I'll come. I don't want to come just to waste My energy. One day in India I give realisation to at least two thousand and here I spend months together give realisation to how many? So why should I do it, you see, in the wilderness, I feel I'm moving in the wilderness of the jungle of concrete. You see all over.

So this is what it is. How many people got realisation last time? How many are there? They are very slippery people.

So there must be with their slippery nature, try to understand it and stop for a while and see for themselves what is this.

Question: Mother what's the reason, could you tell us the reason for your postponement of your trip to America? Shri Mataji: I would say that there is any much reason but you see, My attention gets little bit receded, that's what happens to My attention because Americans, I found them to be rather compromising all the time, with their values, you see they don't want to stand four-legged. I had such faith in that man and read about him. I said, “Where is that?" This kind of this people you see, these

like sugar candies, all the time melting away to this and melting away to that. And really, I must say, I was rather disappointed last time, I went to Houston was good but the fellow, you see, from whom I spoke in the Unity Church, I found all the bhoots are united there, they are selling their books, to them everything is business propositions of the thing, you see and I thought that first you should all prepare something for Me, some grounds then I should come. Last time again we spent some much money there and My Husband also went with Me and we did everything that was possible under the sun but nothing came out of it, you see, we know that and this time again to spend so much money and it has cost us sometimes pounds, for not even a single person turning up, this is a sort of a thing, I mean it is too much, isn't it? That shows also the kind of people, even that horrible fellow Deva, who was a nonsense, absolutely, you see, he was having a bigger group of people than we had, I mean just think of it, who doesn't understand from A to Z.

So also it's the quality of people, there's something wrong I think, I mean, they are very violent people and rather difficult to understand better. I know it is a very difficult thing Christian, but we'll work it out, we have to work it out for them. If they don't understand their well-being, we have to tell them, slowly I know they get upset if you talk to them, but you have to be very patient with them, because they don't know you are so grown up compared to them and they will never accept this position. They think they've been to Raktabīja, they've been to this Transcendental Meditation, they have grown

in any way, they don't to know they have to come back to the main lines and then crawl across, you see, so they don't understand that.

And they don't also give up easily other thing, how will they grow? You see, their growth is not possible.

So it's a very big load on them, you see, they are carrying all the time all these loads which was sinking them and they want to come out of the water to be saved and then though the stable they are, for them *[UNCLEAR]* so you see this kind of a thing. I know a few are those, I know what hard times they must be having with that, but for the time being you must know you have to save these people specially people in New York are the worst of all, because the whole atmosphere is so funny, we were there, the vibrations were pretty disturbed and the Sahaja Yogis of very high quality are to be there, it proves that God must have created lots of them I'm sure that we will find them very soon, so you work out that way, that you convince the people who have come to Sahaja Yoga to be silent, to go deeper into themselves, don't be frivolous, don't be cheapish, work it out in a deeper way, try to find out meaning of your life.

How many people you have given Self-realisation and all that? You grow and after growth, after a year or so, you'll be better off, for one year at least they should try to stick on in a proper way, because in a moralistic way we do not take money, we don not want Rolls-Royces. We don't want anything.

So what is the way they are going to stick on? Which is the way they are going to stick on, this is the point. Only through their desire, through their understanding,

wisdom and insight and that spiritual quality, which is, it should be a special gift to Americans, I think should, they are born on the land of Viśhuddhi, Gokula, you see but what they have made out of Gokul just see that. It is a beautiful place. Must be turned into a land of these cinema makers and this and that, I can't imagine. They don't understand auspiciousness, *[UNCLEAR* swadiness], nothing of that sort. You can't talk to them. They are living in another world, so people who come to Sahaja Yoga you have to talk to them with very sweet, sweetness and tell them that Mother has requested me to be kind to them, nice to them and don't argue with them, tell them gradually, you will know, you have to know, your hands have to speak, your hands will be able to do it.

Let's see gradually we should build it out.

But I tell you one thing more also that these Sahaja Yogis in, in America so far I've seen, are people of average, average type of, not of very big prominence somewhere there, you see, they take to all these horrible people, now when but not in England like that. In England we have people of great calibre, you see, things like that. In India especially we have lots of them, like here the High Commissioner himself inaugurated My book, there whom will I find. Even the people from India there are ruined like you. I don't know whom will I find there but that time they will come to Sahaja Yoga. That also we should pray that the people at the helm of affairs should see the beauty of Sahaja Yoga and should achieve something so that we can save that great one. All right? May God bless you.

Contents: 1982-08-15 **Śhrī Yogeshwara Pūjā, Complete Purity, Chelsham Road, London, UK**

Today is a great day for all of us to be jubilant that the primordial being Himself incarnated on this earth as Śhrī Kṛiṣhṇa.

So many aspects of His being have been described in so many of My lectures to you all; but the greatest and greatest of all the aspects of this primordial being was that He was the Yogeshwara.

He was the" God of Yoga", Yogeshwara. He was the Lord of our Union with the Divine. Without His permission and without His sanction we cannot be Sahaja Yogis. He was Yogeshwara and a real Yogi is a person who gets this Yogeshwara awakened within him. The word `Yoga' that we understand is the union of our attention with the Divine. But still we do not realise the implications, what does it mean? What should have happened to us? Of course, you get powers. As soon as you become the spirit, you get powers. One of the powers you get is of `collective consciousness', that is also the gift of Śhrī Kṛiṣhṇa and that you start feeling the collectivity. Your ego and superego are sucked in, so you get rid of your Karmas and your conditionings and a new sprouting of the new life of the new age starts. But still what is the speciality, the greatness of Yogeshwara? Because He is Īshwara for you. He is the Īshwara of all the Yogis and what is His capacity, what is His nature that for Him everything is a play, `Leelā'.

For Śhrī Rāma it was not a play. For Him life was a platform on which he had to demonstrate how to lead a

very Dharmic life as `Maryādā Purushottama'. But Śhrī Kṛiṣhṇa came up to show, that He is the `Leelādhara', the one who plays the Leelā, the play.

The whole thing is a play, the whole universe is a play. All that is created by Ādi Shakti, all these three Guṇas is nothing but a play. And that is what He manifested in His own incarnation. But still what is Yogeshwara? `Leelādhara' is the one for whom this whole universe is a play, that He is at the axis and for the whole periphery is nothing but a play. Because everything is false, except for your spirit everything is false. It's all a joke going on, you can say, a drama going on, nothing so serious. Spirit is the only truth within us, the rest is all untruth. There cannot be many types of `truth'. In Sanskrit language there is only truth or untruth, Satya or aSatya, there are no ten words for truth.

So when this happens, when this great happening takes place within you, when you become one with the spirit you get powers, without even your maturity reaching that stage, your understanding reaching that stage and your heart opening out. You get the powers, all right, to begin with.

So that you have faith with open understanding. If you have faith with experience of it, so it starts on. When you start using your powers you see it is manifesting, you are sometimes amazed, how you raise Kuṇḍalinī of people, how you tie them up, how you give them realisation, how you cure people. You are amazed, how it has happened.

So we can say it is all built within you, which has started manifesting. But there is so much more that has to still manifest, which has to establish and make you grow.

One of the very important points is the Yogeshwara and that point we must understand that unless and until you follow the path of Yogeshwara, you cannot establish yourself fully.

So Kṛiṣhṇa has said that: “Sarvam Dharma na pari tajya name kam sharanam pracha." You give up all your relationships, Dharma is relation, ship; like your sister, your brother, you see these are Dharmas, like `stridharma', a woman's job.

Then we can say also there is `rāṣht.ra Dharma'. Today is the day of India's freedom.

So we have rāṣht.ra Dharma, we are patriotic people. Patriotism to your own country is rāṣht.ra Dharma. Then you have got `samaj Dharma', that is duty towards your society, is samaj Dharma. Then you have got `pati Dharma', that is husbands' duties, wives' duties. Everybody's duties are called as Dharmas because this is what you have to do. You are duty bound, they form your Dharmas. But He said, “Give up all these Dharmas, give up all the duties, just surrender yourself fully to Me", “sarwa Dharma na pari tajya name kam sharanam pracha." Because you have become now the collective being, now you have become one with Him, now He looks after your Dharmas, He looks after your relationships, He glances them, He purifies them, so you just surrender yourself to Him fully. He said it to Śhrī Arjuna only, not to everyone. He didn't say to everyone, they didn't deserve it. Or He didn't think it proper to say to them, but I think you are proper people to know.

So I'm telling you that forget every other duty to every other thing but do your duty to your collective being, to your collectivity.

But He is Yogeshwara. That's the main point. And to do duty to Him first and foremost thing is you have to develop that purity of a Yogeshwara. For Him sublimation was not needed, He was sublime. He was the source of sublimation. He did not need sublimations from the baser instincts of human beings.

He did not need anything to do, to be done to Himself to raise Himself out of the māyā as they call it.

Specially in the West, as you know, we have created a hell for ourselves, a real hell. All kinds of perverted ideas are within us. For the Yogeshwara this is nothing but Rāmāyaṇa, absolutely filth, it never comes into Him that such things are possible. They are shocking.

On His birthday I would say if today is His birthday and if He was born as He was at that time, He would have gone back immediately. He would have said, no sorry, I've nothing to do, I've had enough.

And that too, if He had met the Western culture, He would have been shocked, oh God, no, nothing doing.

I'm not coming here. Despite the times when He was born, where there was Dharma, there were people who understood what was right, what was wrong, when none of these nonsensical things were there, He came as Yogeshwara, pure.

The story about Him is that one day His wives wanted to go. To Him what was wives? Nothing, just look at it. To

Him no sin can be attached. He married because He had to marry His five principles or the five elements.

So He made them into women and married them. He had to marry 16,000 women because He had to have 16,000 powers and He had to channelize them through some bodies.

So they came as women. To Him it was not a relationship of a wife, but a pure relationship. To Him sex had no existence at all. He was beyond it.

So no question of temptations and perversions; it is out of question.

The story is that once His five wives wanted to go and pray to some saint who had come, a great saint. But he really stayed across the river, so they wanted to go and worship him and they found a very good time when they could go and see him.

So when they went near the river they said it is in spate we cannot cross it, it's not the time that you can cross it.

So they felt it was very inauspicious, if they did not go and that was such an auspicious time. They wanted to go at that time and worship this Guru.

So they went to Kṛiṣhṇa and said: “Now, how can we cross, the river is in spate?" He said: “Really? Doesn't matter. You go and tell the river", that is the river Tapi, they were crossing, he said “go and tell the river that if we have a husband who is Śhrī Kṛiṣhṇa, who is `Yogeshwara'“ that means who never indulges into any sex activity.

Yogeshwara means a person who never indulges into any sex relationships. That's not possible. One cannot think of

such a thing, means though He indulges, He never indulges, though He was in it, still He was not there. Like a lotus. If He has not indulged into any such action, it was only possible for Him nobody else. That's why He is an incarnation, He is not a human being. Only incarnations can do it.

If some human being starts saying that I'm Śhrī Kṛiṣhṇa, so I am doing this and I am doing that, you see, there are very bombastic ones, you must have heard about them. They do not become, is only an incarnation can do it. That means Yogeshwara is the one who had incarnated.

So they went and told the river: “If He is the Yogeshwara, then please you subside." And she went down.

So they went to the other side, did the Pūjā to the Guru and they came back. Again the river was in spate and they could not cross.

So they went to the Guru. You see, the sign of a good Guru or a real Guru, is an incarnated Guru and they said: “See, we cannot cross, the river is in spate." So then he said: “Really, how did you come?" They said: “Śhrī Kṛiṣhṇa asked us, that if I am the Yogeshwara, it will go down, you ask the question." So he said: “All right, now you go and ask the question, that if I, the mukta, that means if I have eaten all the food you've given me, but I've not enjoyed it, I've not indulged into it, then let the river subside." Then they went and told the river, I mean they could not believe it because they had fed him, that: “Whatever food we offered to him, if he has not eaten any food, then you subside." And the river subsided! So the moral of the whole thing is that your ideal in this respect, is Śhrī Kṛiṣhṇa. Not that you think you are the

ideal of the rest. This is the big mistake Sahaja Yogis do. They think immediately they have become now Śhrī Kṛiṣhṇa. Or they think they have become something greater or that there is an ideal that they have imbibed within themselves. It is not so.

There is one thing one has to know, that that is the ideal you have to reach. And your eyes should be towards that ideal and the movements should be towards that. Before that, if you fall into any such things like perversions and nonsensical sexual things and all that, you must know that you are falling down very badly. It's a possession that is working on you. That's an ideal, they are incarnations. You are not incarnations, nor can you become incarnations. But they are the light, which are enlightening your path, on which you are walking. They are taking you to the realm where they are the Kings and they are the Lords.

He is the Īshwara, He is your Īshwara. You are not Īshwaras. But you are at least the Yogis. We have to be the yogis first, then He is our Īshwara, now otherwise He doesn't want to rule you.

So what we have to do, is to become the Yogis first. And one of the signs of a yogi is, that he is in his sex life extremely pure. Absolute purity must exist and after some time, one should get beyond. Your relationships with other people, whether it is your sister or a brother or any other woman or any other man, there should be complete purity. And this is extremely important.

Now in the countries like India, people are extremely corrupt, very corrupt, extremely corrupt. You can give them five rupees and you can buy anybody there. It's

really corrupt, money-wise. But people are not so immoral, they know it is immorality, I mean they know, if they do immoral thing they know it is not moral.

In the West the immorality has become a general rule. For them the word morality should vanish now, I mean there doesn't exist anything like morality. Do everything whatever you like, people don't think of immorality. They don't want to talk of it, it is Victorian. And if somebody says that one should be moral, they start thinking he is a hypocrite. They cannot think that there can be any connection between human being and morality in a genuine way. This is a big problem here. It's the biggest problem we have.

Now corruption is something you can avoid. Because if you are not corrupt, it is all right, you can be.

But immorality is such a thing that, if you live in an immoral world, it has an effect on everyone. For example, a moral woman is walking on the road and there is a man full of lust and all that looking at her.

In any way she looses her chastity. She doesn't mean to attract him or anything, she doesn't want to loose her chastity, but the way he is looking at her, you see, though her simple methods are there, she may be responsible in a distant way to ruin his chastity, his morality. Even a little child, who is a simple, innocent child when there is a dirty man with dirty eyes, he can have very dirty feelings for the child.

So, though of course that person himself is dirty and all that, we cannot say the child is not affected. But in a way, that becomes an object, a sort of a... as you call it, a

thing which makes another person even lower than what he is.

Even an ordinary picture which has nothing to do in this place there, any funny thing, can give some dirty feelings. Because these days I have seen so many symbols have started, which to My eye I don't even see when there is anything wrong in it, that to My eye I can't see because I'm too innocent, My eyes can't see there is anything wrong, but if somebody, who is an expert on these things, will immediately say, oh look at this! I mean really it is impossible to understand, how the human mind has really woven the yarns all around and made these patterns to ruin themselves and ruin others.

To worship Yogeshwara, we must know that our relationships with everyone in this world have to be pure. He played lots of things in His lifetime. The time when He came, the whole country was absolutely drowned into fanatic ideas about religion. If Freud was there, he would have said, oh this is all nonsense.

What's wrong? Go ahead. Kṛiṣhṇa did not do that. He wanted to break all the nonsensical shackles of traditions and shackles of false fanaticism. But He did it in a very beautiful manner keeping the relationships absolutely pure.

Now people ask questions, Mother, was He married to Rādhā? He is eternally married to Her, doesn't matter. But He actually performed the marriage, just the day He was born. He was brought by His father across the river and put down on the bank of the river, when Śhrī Brahmadeva himself came on this earth.

That's why He wears a yellow thing, always, as a blessing from Brahmadeva to cover His lower part, lower than the waist with a cloth. That's the sign that's why He always wears yellow.

He himself came, made Him into man and married Him to Rādhā. Then again He became a child, just to appear to be a child.

Somebody may appear to be a child. To some of you, I appear to you to be a sixteen year old girl as you say, but I'm not. I may be according to some sixty years of age, but I'm not.

My age is eternal. I can't say what age is Mine. It could be two years old or it could be absolutely ageless, it could be anything.

So in His whole life, whatever He did, He did with the purity of understanding.

So Rādhāji was married to Him first. And afterwards when He came as a child, when He was a child, He did all kinds of pranks and things, was not sitting like this and seriously telling about things, but with a little bit here and there, He tried to improve their Chakras and raise their Kuṇḍalinīs. Of course, realisation was not possible in a game. You cannot do it. Supposing I just play about with you, you cannot get your realisation because at the Sahasrāra stage you have to completely recognize.

It has to be a `game of serenity'. Of course, you can just raise your hands and give realisation to them.

But you have to bring them to a serene level. You just sit and you say, alright, you just play about, it would be all

finished. You have to sit down and meditate, you have to do it.

So one could not say that all the time if you are playing, if you are just singing songs, or if you are in a very happy mood, a mirthful mood, then it's the end of Sahaja Yoga. It's not so. It's a serious matter.

So He did not give them realisation, but He reduced the tension on their minds of this so-called Dharma and its shackles of fanaticism and He made it loose and He wanted them to understand that Dharma is not going to enslave. You have to rise above the Dharma and become Dharma itself. But Yogeshwara is to be worshipped with pure heart. In this atmosphere it is difficult, I know. You just go out and you see a horrid thing there. You open any page of the magazine, there is another horrid thing. Anywhere at the advertising, I turn another page and I find a discotheque nonsense going on there. What can you do, you just cannot help it. All this is all, I mean, if you look at it, how gross, dirty, filthy the whole thing is. To add to problems, psychologists have come forward. They themselves are affected by their methods and everything, they are so possessed and their sense about morality is absolutely in complete confusion, no doubt about it.

You know Freud, what happened to him? He was having relations with his mother. He could not even understand, I mean imagine what a adharmi he must be, horrible wretched fellow, he did not even have that purity to understand relationship with a mother. I mean, imagine. It is such a clear-cut background of this man which shows, how wrong he must have been. Because what

was in him, such filth, such dirt, that he could not even look at his mother clearly. Must have been all mud in his eyes or I don't know what he must have been, to see things like that.

You are shaking with My vibrations already. Now when we think of Him as Yogeshwara, that means we are Yogis and He is our Īshwara. Īshwara is to be praised,..., you have to praise, you have to praise Him for his quality as Yogeshwara because He is your Īshwara.

So you have to praise Him. Now what praise can we give Him. Today He is born. What should we do on such a great occasion when He is born? We have to decide that He is our Īshwara. He is the Īshwara aspect and if He is our Īshwara, then we have to cleanse our attitude towards sex, toward the gross way of life that we have developed. You just shun it and throw it away. Absolutely. There cannot be any compromise on that. Otherwise you cannot be a yogi, you cannot be a yogi. You may become very powerful, maybe for the time being because I play with you. You get ideas that you are very powerful and all that. But that's not true.

As My name is Nirmalā, as My name is purity, you have to be pure yogis. Nobody says you should not marry, nobody says you should not have proper sex relationships with you wives, that's not true. But that's one thing people may avoid and spoil it. But the other thing which is the most important is, your attention to be pure of sex attractions. Any kind. Your attention should never go to anything like that.

You see, to Me, I mean I'm now supposed to be an old lady, I don't see things which normally people see.

This is something surprising. You see, I see something and I don't know what's happening and usually they laugh at Me, in the house, they don't understand, how I did'n see the point. But I don't understand these jokes because the attention never goes into these dirty things, never goes into these things. I can't see till somebody tells Me that this is this. They have to explain it ten times.

So all these sophisticated methods of nonsense and the filth and the dirt that we are accumulating here, please wash off your hands of that. That is one thing which will not be tolerated in Sahaja Yoga, to every Sahaja Yogi I must tell. Itself sex cannot be enjoyed, if you live like this. You cannot. You don't enjoy sex at all in this country. None of them.

Only in a country, where people are innocent, you can enjoy. If you were enjoying, you would not run from one woman to another woman, you would not run from man to woman and man to man and then to all donkeys and do all those things. It is impossible that you could be a yogi with all these dirty ideas.

And then you cannot mature, even a normal person will not mature. In India a person who is about forty years, he becomes a mature father. You leave any girls with him, anybody with him, it will not even get into his head that there something could exist between them. Once you are married it should not. I mean I have seen My two sons-in-law, they never get these ideas in their heads.

So try to put your attention into proper things because your Īshwara is Yogeshwara.

Now the other side of Śhrī Kṛiṣhṇa people do not know. It's a play, all right. But He is Samhara-Shakti.

He is the power of destruction. It's very good He comes with everything to protect us. But He also has got Sudarshan Chakra. Sudarshan, `su' means auspicious, `darshan' is vision. He gives us auspicious visions, you see. You try tricks with Him, that goes round your neck and then you have auspicious darshans of yourself, that you are hanging in the air somewhere.

So Śhrī Kṛiṣhṇa's methods on one side is that He is a `Leelāmai', He is compassionate, He stands by His baktas, He comes on this earth to revive your Dharma. If the Dharma goes down, He comes to uplift it. “Yada yadahi Dharmascha" wherever there is the decline of Dharma. But Dharma doesn't mean only corruption, it doesn't mean only honesty and dishonesty, basically it means Mūlādhāra. That is the beginning of the end.

And He comes to, “sa sahg sthapana artaya", again to establish into the holy state. Again, He comes on this earth to raise human beings to that level. This is what He does.

So if we are Sahaja Yogis, we are part and parcel of His being. We are instrumented into His working.

So we have to establish Dharma, but the one, who has no Dharma within himself, what Dharma is he going to establish anywhere. He has come on this earth to establish the Dharma in its holy aspect. Not like roman catholic church or another Pentecostal church or these Hindu religious activities or these Hindu temples or the islamic state. But Dharma in its pure state we have to establish. But if there is no Dharma within us, how are we

going to establish? So He comes on this earth every time to establish Dharma at Viṣhṇu level, but at Śhrī Kṛiṣhṇa level, He comes at Yogeshwara. This is the point many people have not even thought of. For Viṣhṇu they did not say Yogeshwara, that is He is the Īshwara of Yogis, as Gaṇeśha is the Īshwara of the Ganas. You see, Gaṇapati looks after the Ganas and He is our Īshwara. That is we have to have Him as our ideal.

With the understanding that today is the day, in the night about 12 o'clock, now it must be about 12 o'clock in India also, about that, so it matches, He was born at this time in the night, because it was real night symbolically, under horrible circumstances He came. At a time then, when His own birth was very dangerously placed, He was saved and then in His very childhood He killed Rākshasas. But all this He did because He was an incarnation. Nobody is asking you to go and kill Rākshasas.

In Sahaja Yoga did I ask you to go and kill some Rākshasas? On the contrary I'm just saying keep yourself protected. There was a rākshasin who came, her name was Pūtana and she wanted to put poison through her breast and she took the child and started nursing. He was a little baby. And when He started sucking her breast, she came out in her true form and she died.

Of course, He was after all, He was an incarnation. Can anyone of us do that? I mean the Sahaja Yogis. Then as a child He was very mischievous. He ate some clay, I think whether He ate it or not, His mother doubted, she got very angry and she said: “Open your mouth, I would like to see, did you eat that?" And He opened the mouth, she

saw a complete universe moving in His threat, because this is Viśhuddhi Chakra. She saw because she could see, she had powers to see. Not everybody can see that.

Those who have powers can see. We don't even have the powers as much as she had to see the universe.

So one has to understand that first as Sahaja Yogis we get the powers much before we have past really the test of Sahaja Yogis. Just the other way round it is in the university. They will first give you the degree, the certificate and then you will get a job, maybe you don't get a job also. Here you get the job first of all, you get all the powers you are paid for, but the degree is still not sure. Anybody walks about as Sahaja Yogi, next day I find him coming out with something else. There are certified Sahaja Yogis, I have seen. They become afterwards certified something else, God knows how.

So this is the thing of Sahaja Yoga that you can become a Sahaja Yogi even without having the real certificate. It's definitely so. And the certificate is given, as you know, by Lord Jesus Christ. He doesn't care. He doesn't give certificate easily. That's why He is very, very strict. He is not going to give in. He is extremely strict as far as the Sahaja Yogis are concerned, He is not going to give you certificates, He is going to judge you. And what is His basic nature, it is innocence. He is going to judge you on your innocence. If you are a superego you can say, Oh I got possessed by a bhoot, you see and the bhoot did this.

So He will say: “Alright you go to the bhoot for the certificate not to me.".....

And what were you doing, you were witnessing it like Śhrī Kṛiṣhṇa. With all these things happening, I get a big

promise sometimes, that, “Mother alright, now we are not going to quarrel, there are not going to be any problems, you rest assure, we'll all live in harmony." And suddenly I find that somebody is fighting for a bathroom or for a soap or something like that. That's not for a Sahaja Yogi to behave.

First of all you have to be a satisfied person, a person of great dignity and forbearing, otherwise what are you going to bear? “I love him very much, but he should not have taken my towel." For small, small things if you go on insisting, be sure you are not a yogi as yet. If you are fighting for things, then you are not a Sahaja Yogi at all. Nothing of these things matters, I never say anything about anything, do I? That I must have this, I must have that, how did you prepare this, though it is sometimes really wrong and unprotocolish. I never say, why did you bring these bananas, they are no good, I'm not going to eat.

Did I say so? I mean, even the flowers you use may not be auspicious, I know certain flowers should not be used for Pūjā. But I'm not opening My mouth. If I have to tell you, I just tell you because you have to know it for your own good, not for My good.

So, on a day like this, which is a day of great joy to all the world and happiness, you should know one thing, that when Christ was born, He was born in a very humble place, but when Kṛiṣhṇa was born, He was born in the most horrifying circumstances. It is the same in the case of Sahaja Yogis today. It's a thing of great joy and jubilation, no doubt, that He came and gave us His

Viśhuddhi power, but we must understand that we are born in a very precarious time.

I have been saying this so many times. There is not only one Kamsa there.

So many are there. There is a big fight going on, in that you people are here in charge. You are the ones employed by God, you are the ones, who have been given this great work, you have powers. Like Śhrī Kṛiṣhṇa, when He was crossing, as a child was put in a basket and the father was carrying the child in the basket and when His feet touched the river Yamuna, the river went down. Because she was in spate, she went down. In the same way, you too have all these powers. Kṛiṣhṇa has given you all the powers. Though they will be really known to you, when only Lord Jesus Christ accepts you as Sahaja Yogis. And that's important because you have to be innocent. Purity must be brought in. Last time on this great day we had sixteen marriages. They came out well most of them. Not all, but most of them were very good and I am really very happy that such good couples came on that day. It was very auspicious.

And marriage gives you a sense of purity. And that's why our marriage is important in Sahaja Yoga.

But that's not the last word, like this is not a hunting ground for everyone, I'm finding you this husband or I'm finding you that husband. That must be stopped completely. Leave it to Sahaja. You are not to search out your wives in Sahaja Yoga, no, not at all, nor husbands. Leave it. If you have done something like that, then you will be harmed.

Don't do any searching or any thing. A time will come, when you will find that I will Myself tell you to marry this person, people who just take out people and try courting. That's not needed in Sahaja Yoga, no courting is needed. You see, we have got so many cases, where the marriage was decided like that, they married, they are very happily married. Then are there people who had courting, this thing, selections, nominations and elections and everything and after that you find within two days they are out for divorce.

In Sahaja Yoga it is spontaneous and instantaneous. You don't have to do all these things with all these celebrations what have you achieved? It's just spontaneous.

So you don't have to worry. You don't have to think. You don't have to say, that “Oh Mother, I have to find a girl for..." You don't! Leave it [to] Me, it's My headache. But once you are married in Sahaja Yoga, you must know what it means. And both of you must work it out properly and if it is for the good of everyone, it should be good for everyone.

This is what it is. And I would say that on this day, let us take one vow: To decide that we will be worshipping Yogeshwara. You have to worship Him. Means our relationships about these things has to be cleaned. We should not get involved with this, nothing is important. It's just like having your food or to be with your wife, the need of the body. But you don't eat on the roads, do you? You don't eat from the dirty plates, do you? You want to have a clean plate. You want to have a plate, which you have used yourself, your own plate, that should be clean.

If you could have a cleaner plate, you would like to have, If you can get a silver plate, you would like. Even a golden plate is even better. In the same way, we should also have a very pure understanding that it is the need of the body, the body which can be very subtle.

So let us not just go on shopping for it everywhere, looking out, oh this is that, this one that one, then discard. It has to come to you specially. And all great things happen suddenly always. The more deliberations you will have, the worse it will be.

So don't form ideas, don't plan about it, it will happen, it is not so important. That will give you a lot of purity. Your ego will be perfect.

I know of someone, whom nobody wanted to marry. And when I suggested someone, who agreed with great difficulty, she said, I don't want to marry. It's funny. It is very funny the way our ego is working out. Because when we are looking at another person for marriage or anything, we are not thinking of Yogeshwara. We don't think that it is Yogeshwara, who will do everything for us, we are thinking, we have to do it.

So we go ahead and spoil our attention completely. “Sarwa Dharma na pari tajya name kam sharanam pracha." In this part of your decision, if you can leave it to God, it will be better. I tell you, if you can do that, you have crossed your ego half way through. At least 50% of ego is used in this. In the West specially. In India this question doesn't arise much. Because the parents can't decide here, nobody can decide, you have to decide yourself. It's a big responsibility and a big thing for you.

So 50% of your ego problem will be finished, I tell you, once you just give up this responsibility of choosing a bride or a bridegroom for yourself. Just forget it.

Such a waste of energy, I tell you. When I see people, young people, doing all these things I wish they could understand the value of their lives, the esteem of their lives. Their Īshwara is Śhrī Kṛiṣhṇa. He is not Īshwara of everyone. Only of yogis. Anybody else who tries to say “Hare Rāma, Hare Kṛiṣhṇa" will get throat cancer. Anybody who tries to call Him who is not a yogi gets a problem in the throat, you know.

So He is only available to you, He is only your Īshwara. He manifests only for you. He is your own.

He won't act for any Dick, Tom and Harry. Maybe you might be a prime minister, you may be a queen or king, it makes no difference to him. To him only a yogi, only a yogi can call him. Only a yogi can ask for his help. He is not bothered about anybody else. And if a yogi recommends, then only He can look after someone. Otherwise He will not bother about him.

So He is actually your own king, who is always there, looking after you. When you call Him, He comes with all His powers to support you. But you have to be a yogi. If you are not a yogi, which is of course certified by Lord Jesus Christ, then Kṛiṣhṇa has nothing to do with you.

So before the entry to Śhrī Kṛiṣhṇa, though He is not the one who is going to judge your innocence, in the door resides Lord Jesus Christ. When you get in, then it's all right. But to get in, also is difficult because He is always throwing you out. Śhrī Kṛiṣhṇa has said, that “You will be the...", to Jesus, He said, “You will be the `Adhara', the

support of the universe." Means the innocence is the support. If that innocence is not established in you, then Śhrī Kṛiṣhṇa cannot help you. He is helpless then. Because you don't become a yogi and so He is not your Īshwara any more. When we say, Mother the Āgñyā Chakra is here and He is here, all right. When you cross your Āgñyā Chakra that means He is sitting here and the Virāta is sitting here.

So unless and until you pass your Āgñyā Chakra properly, you can't get to Virāt.

And Yogeshwara is the Virāt. That is the aspect we have to worship, we have to worship! Worshipping doesn't mean that you become that person. You worship Me, you don't become Me.

What does happen, when you worship? You surrender all that is not *[UNCLEAR* light/liked] by Me in the fire, in the water, outside, in the elements you throw them away. And you bring to Me your heart.

That is what is worshipping. In the same way we have to worship the aspect of Śhrī Kṛiṣhṇa in Me, which is Yogeshwara. I am Yogeshwara. Things do not come into My head at all, I don't see things like that.

I don't know what this temptation is, what attraction is, I just don't understand. On the contrary these things repel Me, repel absolutely, I vomit. Even to hear these things, I don't want to open My ears, My ears become deaf. I can't hear this, I can't understand any dirty jokes. I have no brain for this, My brains refuse to understand. I become a dumb person, absolutely, deaf and dumb. People have written books and books on these things, I don't know what they must be writing. What is that to write things.

So today we have to know that our personal life has to be extremely clean. We face ourselves every moment and find out within ourselves, are we really worshipping Yogeshwara within ourselves who reside within us. Let us develop that purity. Then innocence will be established in our eyes. We'll be innocent, the eyes will speak of innocence. What's the use of having eyes, which are all the time shifting, you don't know where they are going, wobbly eyes, you see, like this, like this. You can't trust your eyes at all. But the eyes, which are innocent, receive nothing, they just give. They just give. Innocence is very penetrating, very purifying, very soothing and very beautiful. We have to become beautiful people.

Today I said all these things because I'm sometimes disturbed the way people don't understand that purity of sex life is so important to Sahaja Yoga, specially in the West. People don't understand. For Indians this lecture has no meaning, they will think, why Mother is wasting Her energy so much. Because they don't understand. But to Me it is very important here. Whatever I have seen and heard and see all around. I think today's message should be of Yogeshwara. Let us worship Yogeshwara today with our heart. When you worship Me today, it should be the worship of Yogeshwara and nothing else.

May God bless you.

Contents: 1982-08-16 **Talk to Sahaja Yogis, Talk about Media, London, UK**

Now you've got a good one in Brighton also. I was amazed. How did you manage that? The Brighton Show.

These are the Kathoris they sent you from India? These ones?

Sahaja Yogini: I'm not sure Mother.

Shri Mataji: You've bought them here?

Sahaja Yogini: I think they were bought here, yes Mother.

Shri Mataji: But they had given them some plates I think.

Hello. Come. Come. Yesterday. How are you now? Are you good now? Are you alright? Very cold.

Hands are very cold. Channa. Sit down. Now get Me some water, alright?

Sahaja Yogi: Are the lights alright Mother?

Shri Mataji: What is this, am I going to lecture now?

Sahaja Yogi: In Australia they did like to see you any of the time anywhere.

Shri Mataji: Is it? But what am I supposed to do, I've come just to consult about this journalism. I think, Brian you should come here and let's see what is the agenda, how are we going to work it out. Now better say now how are we going to work it out here, what should we do? First My suggestions are given, then you give Me your suggestions about that. I personally think this way, that we should have a formal body, formal, of people who will deal with the journalistic side, Call it by any name. They are calling in America I have given them a name: Golden Age International.

So you have a formal body, then you must have for that a proper card system you see and a kind of a appeal or something, letter of introduction. It's a very Kṛiṣhṇa's work, very subtle work of Śhrī Kṛiṣhṇa. That's why we have to have very clever people in this, rather

mischievous. Too much honesty, so-called, with this all dishonest world, will not take us to higher goals.

So, to go to higher goals, you have to sacrifice little lower goals, like you see, that we should have only the name of Sahaja Yoga and we should come out as Sahaja Yogis, you may land up in jail if you start that.

So, come as something else. You have a form, with a proper message that we are here to contact all the people who have alternatives, to create the Golden Age.

So on one side you will have a, you will have a face by which people will think you are all neutral people and you can have approach to them directly. And on the other side...

What's that?

Sahaja Yogini: Some biscuits Mother.

Shri Mataji: Did you make them?

Sahaja Yogini: Yes Mother.

Shri Mataji: Beautiful. Thank you. That will do. You're looking very pale, what's the matter? Nothing? Working very hard? Take it easy now. You'd better give her some rest now. Now after having that form, on one side you'll have a face by which you can meet people, you can reach them easily. You'll have your own cards, send them the cards, you are International Golden Age people responsible. Wear a formal dress, don't go like hippies. Because we have tried straightforward methods, they have failed. And we have to save the world, that's our job. That's the real higher goal we have to achieve. By hook or crook you have to save them. Otherwise they'll be all finished. If you can't take them out, out of the

water by pulling with your hand, put a hook round them and bring them out. Useless, blind, nonsensical people, they don't want to see the point. What to do? Alright, so one side you'll have a face, another side you'll be always in touch of others who are trying to form the alternative. Other Gurus, other false people, other thing.

So very cleverly bring them down to Sahaja Yoga. It's a fifth columnist behaviour. You have to enter into them and tell them ultimately, this is no good. Exposing all of them. One by one. Because you will be a body, a form of a body that nobody can ask for your bonafides and when you enter into these alternatives you can just see the point and say, this is this. We did that, Brian did that in Australia, even they brought in Sahaja Yoga into some problem a little bit and they asked for forgiveness and the whole joke was out and the people didn't understand, that's how it brought Sahaja Yoga to a great level. Isn't it Brian? It was a big drama they played. And actually Terrence wrote against them that these people came to Sahaja Yoga this thing and how are they blaming us for something and then it was a big you see drama and then it was said later on “No nothing like Sahaj Yoga" you see? Something like that we have to play.

No simple methods are going to work with these cunning people, extremely cunning. Journalists here are very cunning people, extremely cunning.

So, now when you have immediately become formal, so you can find out all the newspapers, all the editors and go to see them, you must have black suits, yards of them, with white lines you see and with oil in the head. If they're purely English that's the best. I mean a little

mixed blood may be alright, but not too much. But don't take a person who is from Scotland to an English editor. See there are basic bias, differences. Bias is there.

So better take a Scotch one to Scotland, right? And speak with a little accent. These are stupid people I tell you. All this is done, imagine on Viśhuddhi.

Can you imagine? This is the job of Viśhuddhi, so many styles it is. It's not only that you have to speak about it, that is has to go all over through these medias are nothing but Viśhuddhis because they have to be witness and they have to manifest it in enlarging this message. They are supposed to do it. They are placed there for this reason.

So if they don't do it, better use the other side of it. Befool them and use them. Because they are there only for this purpose, why God has created them and put them in this position otherwise think of it, how did they get these medias, why God has given them? Just think of it.

They're doing all kinds of nonsensical things, they are wasting people's energy into all useless enterprises.

They don't want to do God's work, so you better befool them and make them do it. That's what they deserve. Why God has given them all these powers? They haven't achieved anything of their own, can they create even a leaf? Even dust they cannot create on their own. Can they? Nothing can be created by man on his own, can it? He has to use something from nature.

So on one side we have this. Now there was one priest, on his own he did this experiment, he is a Catholic priest.

So he joined an organization which was trying to save people from all other Gurus, false Gurus you see. He tries to save them. And he became quite prominent there. And then instead of sending them to Catholic church he sent them to Sahaja Yoga.

And he said let me behave Mother like a priest, it's a good idea. I don't want to get out from here, because then I can catch real people and send them over. That's how we got Benor *[UNCLEAR]* and all that people, he sent them. And he makes fun of pope, he makes fun of everyone and he is there laughing aloud he said and he's arranging all that.

Somebody met him and he said that I've been to this and that so he said now I think I'm fed up, I'll go to Catholicism. He said: Did you try Sahaja Yoga? Better try, that's the last one, you try that. He's a very interesting, intelligent man and he comes to My program all right.

Somebody asked him that why do you go to Sahaja Yoga program? He said I have to find out there also may be some people lost you see, so I must find them out. He comes to see Me. A very interesting person, very interesting, he's a priest. And also the lady, chief lady who is doing the job, he's made her a Sahaja Yogi. And also this Marie has joined that organization, so there are three Sahaja Yogis, one is the head, another is the secretary and the other is Marie, who are trying to save people to go to Catholic church, imagine, they are actually saving people from Catholic church.

So this kind of a thing you must form. Then you must have a very general appeal and you must also find out how you can approach these people and you should say

we have formed such and such organization here and also in America they are going to form another one, so you can say we have branches in America and also in India and branches all over you see we can form everywhere, such branches. It's not difficult. In Sydney and he's the head of that branch Mr. Brian who's come all the way to see us. You can even have a formal inauguration by the Prime Minister. And give her rhubarb to eat. That revenge I must take on her only. She gave us rhubarb ice to eat, imagine rhubarb ice, can you imagine? Can there be anything worse than that? Must be some sinister joy out of it. I can't understand.

So I would suggest that you form a very good organ, all of you are Sahaja Yogis I hope nobody will give out the secrets, is there anybody who will give out the secrets? Please raise your hand.

So all this has to be worked out very carefully and understanding that we have to do a tremendous work, we have to save so many people and they are also half hearted. Suddenly you find I have lost one child here and a one child there.

So it's a tremendous task and to do this task we have to be very cautious, careful and all the methods that are employed, we have to employ. Only thing you do not do the saonhara, don't kill anybody. That's all you don't do. That you leave it to Me. We need not tell lies but you need not tell everything. Everything need not be told to everyone. That's not necessary.

They do not have right to know everything about us. That's alright.

So this kind of a thing we should form. Now you all should have degrees those who are there.

So put down your mads and pigs there. Frogs and everything. They are enamoured by this you see. You can wear a tie pin if you want, find out all the methods you see. And go to a special hair dresser.

Some people can even wear a wig I don't mind. And take out your rings where you have your Mother's humble photograph. You better take out all such rings and things, inside you can wear something, but not outside. Or if your ring you are wearing by chance you just turn it around, you see be careful not to show the photographs otherwise they'll be shocked you see.

It's all camouflage, but what to do with these stupid fools here? We have tried everything you see. Beaten them with shoes I mean we've done everything that was possible under the Sahaja Yoga regime, but they don't want to see the point. Best thing is that a go straightforward march is over and go in a backdoor thing. You tried with that archbishop of Canterbury. I saw the bishop of London, the bishop, the main bishop of London, was sitting just next to Me. He never talked of God, nothing, just talking about gold prices, this thing that thing, but he drank the most of the liquor and everything that was there, wines the most of all, poor thing may not be getting so much you see in the church. And the biggest cigar, he used the biggest cigar and pocketed two or three of them. It's absolute truth I'm telling you. And he was wearing the scarlet, you see that's the colour suggested already in this, the book of revelation, the scarlet, the scarlet colour. See how they are wearing

scarlet! Absolutely frivolous people. And they are misguiding all these people so we have to also change our dresses and get them into the fold. We'll find some people in there.

Now on these lines you start. Then you have a meeting with all these people here. Get the name of all the newspapers, this thing, that thing. And approach them and then tell them that we have got first class people who have come to us is Sahaja Yoga company. They may be thugs, whatever it is. But this is what we found it in Sydney they did and this is what is the other papers have done it in Geneva, this thing that thing, so why not here? They can't say no to you. Because you are going to give them business. Later on.

I don't know what sort. Is there any other suggestion?

Sahaja Yogini: Mother, should we approach international bodies like the United Nations?

Shri Mataji: What is it?

Sahaja Yogini: Should we approach international bodies like the United Nations?

Shri Mataji: Do anything, you are that. Makes no difference.

Sahaja Yogini: Or in America congressmen?

Shri Mataji: No no congress will be American. Make it United Nations. Better. Whatever you claim, you are that. You are higher than all these United Nations or anything put together. Whatever you say is not boasting at all. Is it? That's right. Whatever I say it never amounts to boasting, except that you get lots of vibrations.

So it doesn't matter whatever you say. Call your... U.N. body you will call it?

Sahaja Yogini: Oh, I meant Mother should we approach them? Should we write to them, talk to them?

Shri Mataji: Yes, yes why not?

Sahaja Yogini: See if they'll sponsor...

Shri Mataji: Tell them that we are working like United Nations only. You'll immediately become top people you know. You know, you don't know? I've known that trick. What do they have? All idiots.

I've seen so many idiots working as great people. Ambassadors, big big people, they are just idiots. They have no brains nothing. I've seen, I go to their house, I don't know how they develop this kind of idiocity.

But the other day we went to an ambassador's place and he started telling Me something. What language he is speaking? Then C.P. came, he was also watching him.

So he asked Me in Indian language: Do you understand anything what he is saying? I said not Me, I thought it's something wrong with Me. He said no not yours. I said then why are you laughing then sometimes? He said I don't know I hope I'm laughing at the right time. And he was on and on for half an hour, he was telling us something and his laughter was neither crying nor laughing sort of an expression you know. You don't know what he was going to say.

So, then another idiot we saw. Idiots are for idiots. They give lectures like idiots, they don't know what they are talking. They are big people and when they give lectures you are so embarrassed you don't know where to look.

There's no sense, there's no dignity, there's no understanding, nothing. I mean you will find only one or two persons in an organization sensible, the rest are all idiots. Top, top rank people. It's impossible to understand how they managed it. I mean these are the days of idiots I tell you. These are the days of idiots. If you are an idiot, then you are at a high position, that must be the thing. Because everybody is afraid of intelligent people you see. I don't think no Prime minister likes, no president likes an intelligent man to be there, because he might be ousted you see.

So they want to have mediocres, but actually in that competition they pick up only the idiots. And that's how you find all this problem is there. You don't know how to talk to them. You don't know what to say. Within five minutes you'll be amazed, you'll be shocked, what's this? That they are holding such a big position you have to remember all the time. Otherwise maybe your driver is better than them. Perhaps they drink too much, all these parties, they are affected by drinks. Or maybe some of them are supposed to be big educated at Cambridge, Oxford, I don't know what what. All sorts of people. Big big positions. I mean Sahaja Yogis are also from there, they don't seem so idiotic as these people are. Like from John Hopkins Institute and all that. See I told Gregoire about somebody I met from the same institute, I said he's an idiot. How did you get him there? I can't understand.

So he said there are lots of idiots there, Mother. Just imagine. I think this must be the reason, that all the heads of the countries must be frightened of intelligent

people so they must be selecting only people who are a little idiotic. And then they can find them on the wrong foot you see and then they can always dissolve them with some weaknesses something, it must be that.

This must be the reason. Otherwise how can you have such a set of idiots all around? So this is how we have to manage and I think if you can really form this organization properly and save these people from the disaster into which they are, that is really the work that one has to do. Very carefully, we can just do it. All of you should give them some ideas. Even locally you see if you go to a smaller place, they'll be so excited that Oh God such a big organization has come to us. And that's how you can impress them you see. You can use My car if you like or we can buy a second hand Mercedes or we can even buy a second hand Rolls-Royce. We can get it on a hire. Just to impress them, if you want I can. We should do all these tricks you know. And how you should talk and everything, you'd better study some people how they talk, how they stop, how long they talk, how they behave, how they impress you. You can give some tips after all.

Sahaja Yogi: Mother aren't we falling into a trap, are we not falling into the trap with the false Gurus, you know a Rolls-Royce indicates that money is being made...

Shri Mataji: Not Rolls-Royce, Let's have something different Mercedes? But you shouldn't take let's say a jeep there isn't it? Something like that. You have to have a sensible car. It may not be a Rolls-Royce is too much for a journalist I think. That you can judge yourself.

Something in between. Otherwise they'll think some false Guru must have given you as a present.

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: So have something in between. Which care you think is best? Which is journalistic? Sahaja Yogis: A jaguar. Like Mr. C.P.'s car.

Someone can dress up as a chauffeur.

Shri Mataji: That looks nice. I don't like that car very much, it's like a horse, with two camels back inside. But see whatever you like. Sir C.P. knows all these things so he must have got the correct things to impress. Jaguar. But that's a very expensive car.

Sahaja Yogi: Mother should we not like executives drive a Ford Granada.

Shri Mataji: So don't use cheap cars, what I'm saying. Don't use if not Rolls-Royce, that we don't have, none of us have, even a second hand and fourth hand we don't have, but don't use any car that would look cheapish type you see.

Something good for a journalist association, something like that. But you should be careful about that. Car is important. Suit is important. Then your gestures and behaviours you see, how smartly you pack things and how you get up and how you knock things and also briefcases you see. Very important. And umbrellas that you carry. Be careful.

So let's have our training center for that. I'm not so good. You can get somebody to train you up.

Sahaja Yogi: Like James Bond, Mother.

Shri Mataji: Who?

Sahaja Yogi: Like James Bond, Mother. The spy. Famous spy.

Shri Mataji: What did he do?

Sahaja Yogi: inaudible.

Shri Mataji: James who Bond?

Sahaja Yogi: Yes Mother. It's fiction Mother.

Shri Mataji: James Bond.

Sahaja Yogi: Double agent. A secret name.

Shri Mataji: What is it? Double?

Shri Mataji: No no but you should not sound queer, you know, you should sound very British. I mean say like that James Bond carrying three women around, you won't be successful. You have to be very British, walk with a... See I think... can teach us that. Paul. Gavin. Who else? Study it, you see, it's interesting to study. The manners, mannerism, little bit to study how to impress, you see. Ask your brother how he does it.

Sahaja Yogi: I think it's just a pose you know, it's just a pose really. You know you just learn the way to talk. It's very easy.

Shri Mataji: But you see Canadian people are different, English are different. Canadian people can be impressed by a hippy look, but not English, they can never be. Best is when they go to Uzbekistan, forty degrees is the temperature, all their three pieces becoming two half pieces. Then they get boiled. But it's true to impress people here. You know these are norms with which they live. They can't understand Sahaja Yoga. But what to do? That's the media, that's the one we have to use *[UNCLEAR]* is good media. We have to know this media. I have taken

half of their bhoots by eating this channa. Now, you tell Me, what is to be done. On a gross level.

Sahaja Yogi: The first article about you in Australia was in a newspaper called Sydney Shout, which the back section of that was advertisements for massage parlors and...

Shri Mataji: I have to go everywhere.

Sahaja Yogi:... a gross level of newspaper reporting. However that article and the advertisement which was placed not by us, was placed in the magazine brought a number of people to the meeting.

Shri Mataji: So let's use that also, doesn't matter I have to be everywhere, massage parlor, anywhere.

What can you do, you will land up into a place like this, where there's not an inch of holy land and you want to create a holy land out of it. Then what do you do? You have to put your feet in the mire, isn't it?

Sahaja Yogi: We worried a lot about that.

Shri Mataji: No, no, nothing to worry. You see your Mother is pure. It makes no difference wherever she goes. Doesn't matter. I have given all freedom to you. You do what you like. Publish Me anywhere you feel like. Like this girl that [Suarno], somebody read about it and told C.P. that it was not dignified compared to Mrs. Srivastava's dignity, it was not dignified. She is a very dignified and a serene lady.

Because in the office I'm extremely dignified. Not with My children maybe I can be very simple.

So they thought that how could it be? And this lady has really taken advantage of Her, sort of thing you know.

They were rather upset about it.

So I said alright doesn't matter. It's alright, whatever way she has seen Me she must have written. I was thinking she should do another article again.

Sahaja Yogi: In actual fact Mother, Sue said they have the biggest mail...

Shri Mataji: Biggest what?

Sahaja Yogi: The biggest response from readers writing into the paper.

Shri Mataji: About Me.

Sahaja Yogi: The biggest response they've ever had.

Shri Mataji: Just imagine. Despite that. I mean though, I mean she made it a little... I wouldn't say it was frivolous but it was a little flippant. Flippant is the word. It was flippant you see. It didn't go into details at all or anything. And she had the biggest response. Just imagine. And what did she do about it?

Sahaja Yogi: She sent some of the letters on. She sent some letters to us.

Shri Mataji: I see.

So she may like to do it again in a proper way. This is one side. Another side is that, you must have seen an article in a magazine, which you were telling Me, Indian magazine.

Sahaja Yogi: Yes.

Shri Mataji: Which impressed you very much. [Kolhi.] Did you see that one?

Sahaja Yogi: No, I didn't.

Shri Mataji: Do you have here Gavin? Gavin: I think some people have copies here, Mother. I've given my one away

but Mr. [Kolhi] wrote to Me and said that if we send him $47 pounds he's going to send us 250 copies.

Shri Mataji: Alright, so better send it and get it immediately, alright? Now, anther thing is his suggestion has come, [Aside:] Yes, May God bless you...

Sahaja Yogi: I have to go and have lunch with my mother.

Shri Mataji: Alright, go and have lunch. Now with Mr. [Kolhi], he wanted to publish a book. He said so. It will cost fifteen to twenty thousand rupees. It's not difficult to get. In which he wants to write about the experiences of all the people from My childhood and this and that. Partly have no meaning. But My idea was that you Sahaja Yogis should compile together the experiences. Say of different... say Bombay [Mumbai] experiences, Bombay [Mumbai] people should do it, Delhi people should do it, Sydney people should do it, the people in England should do it and they should write about each and every person, you see? Those who have to write.

So, those who have to write something about Me should send it, say not from Bombay [Mumbai], those who are in Bombay [Mumbai] should write to somebody in Bombay [Mumbai]. Those who are in Delhi should write to somebody in Delhi, who will compile it, put it together and put it in a proper way.

Some sort of a... you write to Bombay [Mumbai] people to find out somebody who is of journalistic nature. And here also these must be sent to say Gavin or someone. And the same committee that we have you see, should deal with this side. To find out, what you think is proper, what is to be given and all the fantastic things that you have felt, even of sort... they are saying about the petrol

business you see. It's alright, write down everything and all these experiences can be compiled. And we can put the name as Miracles of our Age, or something like that. And then he can put it the way he likes.

We should say we will supply you all the material from here or then he can edit it. And also we can get it published. If he wants to publish it, let him publish it, whichever way he wants to do it, it's alright. We can get it very nicely done for him. But he must publish the book. And the book must be in English, not Indian English, that's the main point. But also we should not use very difficult English you see, because it should be internationally understood. Not very big sentences, complicated and also using idioms from English literature and things, no one goes into that. Now people are not literature students. Most of the people who write are literature students and they use all the idioms from the literature. Now those who are not literature students, how are they to understand this? They try to show off you see, that they have read this book and that book. Best thing is to put directly not using any quotations from any literary books. You can use it from Bible and things if you want, but that is not necessary for giving experiences.

But just you can say that my hands started speaking to me, you can say Christ had said at this time like that. And that book can be done very well and could be sold all over the world. We can send also introduction also, very introduction to the subject.

So all the Sahaja Yogis should sit down and write all the good things. Not like this that half hearted and half baked

things you should not have, like I'm alright but still I have... with `bhoots' and `ifs' you should not write. If you have any buts of ifs you keep it to yourself.

So the half baked people should not write anything. Vincent you have missed a very nice point.

Vincent: Sorry to hear I've missed it Mother.

Sorry to hear I've missed it.

Shri Mataji: We could like to see what happened from there, so that you can see that it's a way we are forming a new organization. Called Golden Age International. For journalistic mischief. But you shouldn't also laugh you know when you are teasing them, you should be very serious. Otherwise you'll be called as giggly people. Giggly Guru he's called you know? Just imagine, they knew that he used to giggle.

Also in this book you can write about people who had a negative approach, like the letter to Archbishop of Canterbury. Expose them. Expose all of them. Like [United church], expose them. That's the time we can expose them now. The responses, introduction first and the responses at the end. First give the responses of the Gurus who are realised Souls, how they have acted, they have done this. [Mahishyogis] is that first you can write that there is nothing like a devil, nothing, no *[UNCLEAR]*, everything is fine.

And as soon as he heard the name of Mātājī Nirmalā Devī he said she is the devil. Otherwise devil did not exist for him.

Sahaja Yogi: Mother, should we reveal the actual true meanings of the so-called Sanskrit mantras?

Shri Mataji: Yes, yes. Why not? We should say I went to this fellow and this happened, that happened. This book should expose.

Sahaja Yogi: Do you remember three years ago in *[UNCLEAR]* you actually revealed what his mantra meant in English, some of the names of demons, some were silly names, should we reveal those as well, do you think?

Shri Mataji: I mean you can say that we had many people, one after another, we had a series of things you see with us. I think Gavin has got some of these things that this fellow from Denmark had sent. Have you got? Gavin: I think maybe Linda may have them all. They went to Peter, they may be out of circulation.

Shri Mataji: Why did Linda burn that also? Gavin: I don't know if she burnt them Mother, but they may be out of circulation.

Shri Mataji: Accha, let us find out.

So you can mention that though there were so many indications you see from people, we could not see. Even this fellow said this is the mantra's meaning. We could not see, somehow or other our mind was like that.

So to prove that there was a kind of possession or a kind of a curtain on our head, that we couldn't see things. Though these were pointed out you see. Nobody bothered, because one gentleman who has outed him a long time back from America, though he didn't understand the subtler side of it, but he gave the gross side, which was really remarkable, that people could get over it. How he made money, how he had to embezzle money for him and how many millions and millions of dollars they had to take away. Everything he had given

that data with that. He himself and he also said that if I have mentioned anything wrong let them prosecute Me. But nothing happened.

And about women, how he had relationships with women and all that, he mentioned it. I don't know if those papers are there or not. The name of the fellow... I've forgotten... but so many things were like that, which were as he says given to Peter, I think Peter kept them. But if you can find, whatever it is, that there were warnings coming all through you see. Anybody who is intelligent can see this you see.

And can warn. But nobody listened to it. I mean you all thought that you were doing for a great cause of you see the world government, imagine. You see, because he made the whole show in such a way. The show was such that you had to believe it. Now you have been to that fourteen year one, isn't it?

Sahaja Yogi: Yes, Mother.

Shri Mataji: Accha. Now this one also, he's got fifteen thousand disciples even now, even now in Spain.

And he calls himself the perfect Guru. One of his disciples came and told Me he doesn't know even how to say perfect, he said perpect, perpect Guru I am perpect Guru. He was repeating that word again and again. And this fellow knew English and he had to translate it. And the Queen of Spain complained to the ambassador of Spain, Indian ambassador of Spain that it's a shameful thing how you can send such a man to our country. He has just finished our young generation, the whole race is lost. Nobody listens you know, that's the trouble. He's a

perfect Guru. He's perfectly made them mad. He turned their Āgñyās, they're finished.

So the whole book would be, where are the seekers? Where are they lost, what has happened to them? Everything can be covered in this in a very good way. The tragedies and the...

Sahaja Yogi: Mother, Mother? On TM [transcendental meditation], some Christians published a book called `TM a cosmic confidence trip' and Kingsley read it and did a review because he used to be a Christian and I think that's probably going in the next, or next of one issue of Nirmalā Yoga, because we sent it.

And it's... I also got some of the words, the mantras translated I asked Gavin, so that's going in as well.

Shri Mataji: What's the name of the book?

Sahaja Yogi: `TM a cosmic confidence trip'. It's by one of these Christian book sellers. It's quite good, very full of, it's got lots of insights about the way he is *[UNCLEAR]*.

Shri Mataji: And who is the writer?

Sahaja Yogi: I can't remember offhand Mother, but I've got the details at home.

Shri Mataji: So *[UNCLEAR]*. Anybody who finds anything like that in writing please get it. In his tapes you see also you can find out. Like we can say that, they said about theta waves and theta waves you only get from epileptic patients. Very carefully without involving people who are dangerous to us, but Gurus you can handle. Gurus are all right. There's no harm, because you can use this fellow's name and all that. But not people like say, we can say the, like say some Prime Minister is involved with TM say

for example. We need not bring his name there, because they won't like it. And they'll try to trouble us you see, such people so be careful on those. The President before this, was... what was he? He was a...

that Baptist church, somebody from the Baptist church was president of America? Sahaja Yogis: Carter.

Shri Mataji: Carter. And also these churches you see, you can point out that I have been, one person can say, like you can talk about these... what seventh day... the Pentecostals... No I'm asking you. The Pentecostals.

Sahaja Yogi: There's an international organization called Family Action Information and Rescue, already formed and it's being run by an MP called Paul Rose and he got mixed up with some Gurus and he's formed this organization and if you've been affected then...

Shri Mataji: Then what do they do?

Sahaja Yogi: If anyone's been affected then they get the people out.

Shri Mataji: You can ask them, you can go and ask what do they have to say about this, about that... you can interview them. Also you can use that information. It makes no difference. Use that also.

Sahaja Yogi: It's very good Mother, they have lots of information, they started specifically because of an outfit that's a bit out of fashion now called Children of God and that's very much like the Moonies, in that they used to take teenager, young people and keep them totally out of contact with the outside world and keep them cut off from their parents and all this sort of thing, starvation

diets and sugar buzzing, all these techniques they used to use.

So it was formed to help the parents who had lost their teenage and young adult children, to get them back and deprogram them and get the brainwashing out of them and they've got lots of useful information.

Shri Mataji: Why not go and see them also? See as an organization you can go and see them.

Sahaja Yogi: Paul Rose is very obsessive Mother, he's very skeptical about cults Mother, very skeptical.

Shri Mataji: You see but they can be quite confused I tell you. Like this fellow I went to see, John will tell you, I told him all I'm against these so-called religions, but ultimately he told John that we cannot have her interview at length, because people don't like to hear about religions. Can you imagine? Is he here, John?

Sahaja Yogi: No Mother, but he left some notes, I'll read them out if you like.

Shri Mataji: Alright, what has he to say?

Sahaja Yogi: He just said he had that interview with London Broadcasting company with Lawrence Spicer and he interviewed Mother.

So many Sahaja Yogis wrote letters to Mr. Spicer out of interest from his previous interview.

So, we can easily build up on what we've already done, on this kind of thing. If a lot of Sahaja Yogis show interest, not as Sahaja Yogis but just as people.

Shri Mataji: But not only Sahaja Yogis, but you should also put non-Sahaja Yogis. See they didn't write at Sahaja Yogis all of them.

Sahaja Yogi: No, they didn't say they were Sahaja Yogis.

Shri Mataji: We should not say Sahaja Yogis wrote we should say there was a big interest. Because he asked him that he should come and deal with the... it's between us, in the secret.

Now you can also write about [Shuarno, journalist], that she had a lot of response all right. We can mention her. All right, what else?

Sahaja Yogi: The 15 minute interview by Lawrence Spicer went out two Sundays ago at 4am on the radio.

I didn't even know there were any radio programs at that hour.

Shri Mataji: 4 a.m.?

Sahaja Yogi: While we were in Cheltenham Mother. Which is a bit ridiculous.

Shri Mataji: 4 a.m.?

Sahaja Yogi: 4 a.m. Which is really a bit...

Sahaja Yogini: We had one man come Mother, from hearing that, he heard the 4 a.m....

Shri Mataji: She got up at 4 a.m.? They must have thought you see Sahaja Yogis are supposed to get up at 4 a.m.

Sahaja Yogi: I bet he wasn't up at 4 a.m. Also Lawrence Spicer recorded an interview between John Plummer and a West Indian faith healing Christian called Cleave Grant. This interview will be broadcast in September and was mainly concerned with our attitude towards Jesus and the ten commandments.

Cleave Grant was not negative, in fact he said in the interview that he thought Sahaja Yoga sounded good,

because we follow and believe in Christ and obey the commandments.

So because his vibrations were tricky, it seemed best to be diplomatic and not confront his ego. The results of this diplomacy may be to make Sahaja Yoga sound rather Christian.

Shri Mataji: Better call it Christian, Hindu, Muslim, doesn't matter.

Sahaja Yogi: That's what he did. And the other thing we wrote a letter to U.S. Naipal, who wrote various articles, books, one article on Rastafarianism in the Observer. We said that we were certain we had found the truth and want a professional, objective, discerning journalist to investigate our claims and if satisfied with our authenticity. We wrote an article, we have yet to hear a reply.

Shri Mataji: Now, he won't work out with you. But with this organization he will.

Sahaja Yogi: And John just suggested a few things as well related to his experience. To write personal letters to people of importance, though it would be better as an organization.

Shri Mataji: As an organization, to all important people better write important letters.

Sahaja Yogi: We have our own letter head Mother.

Shri Mataji: You have to have all that.

Sahaja Yogi: Make our own TV video film. We could have quite fun doing that, TV video film to show TV producers.

Shri Mataji: Are this... Not like this. They won't even allow Me five minutes there, how will they allow a film?

Sahaja Yogi: No he didn't necessarily mean just of you Mother, like we watch your lectures, but perhaps some Sahaja Yogis doing the same kind of thing as you suggested.

Shri Mataji: No, but let it be done by this organization.

Sahaja Yogi: Yes, like that book...

Shri Mataji: But you see that film can be done by this organization and they can show the good points. Let them do it. You have to contact. But not just now, you should not sound that you are Sahaja Yogis.

Sahaja Yogi: It says: Make a press kit.

Shri Mataji: You can take films of other Gurus also, under the circumstances you can't go and see say Hare Rāmas. Alright, under this and you ask them questions. I'll give you the proper things you have to ask them.

Sahaja Yogi: Can we take the video along to their meetings? Take the video to their meetings and ask them questions?

Shri Mataji: Yes, ask them questions. First of all you have to be very nicely versed in Gītā. Then with other Gurus also you should be prepared. As this organization you can meet them. Take their video and give this to these people, that these are what we are going to supply you.

Sahaja Yogi: Including you Mother? Could we include you? We included some cuts of you...

Shri Mataji: No, no, no, no! I'm nowhere. You are just talking in a very neutral way to people from Hare Rām Hare Kṛiṣhṇa. Alright?

Sahaja Yogi: We want to hear what they say?

Shri Mataji: And I'll tell you the loopholes and then you ask the questions on them. Like TM people.

But the people who have done TM should not go. The other people who look very innocent should go.

Because if you go with TM ideas they will know that you are from TM and you are the revolted ones so you better keep out. All this we'll think of many such things now. You see I've put you on the other line.

What else now? Come along.

Sahaja Yogi: Well he said that we should make a press kit of articles, photos, case histories, tapes, much as you were saying Mother and take it to newspapers, in fact under the organization...

Shri Mataji: No, this book should come out. It would be a good idea.

Sahaja Yogi: Also he intended to get in contact with Malcolm Murdoch and talk to him as just two interested people.

Shri Mataji: Who is she?

Sahaja Yogi: He's a commentator and literary critic, a Christian, he's quite well known. He's a Roman Catholic.

Shri Mataji: He's what now?

Sahaja Yogi: He's turned into a Roman Catholic, but he's always commenting on religions and philosophy.

Sahaja Yogi: He's quite a seeker too.

Shri Mataji: Beat him with shoes first of all, give him our treatment, Sahaja Yoga treatment, then we'll see how far he goes.

Sahaja Yogi: Well we could write to him as members of this interested group...

Shri Mataji: With this organization you see because then you are neutral. You can ask him that this is Roman Catholic has done this and that, you see I'll give you everybody's loopholes.

So let us prepare some courses on this. Should we? Alright.

Sahaja Yogi: And lastly he asked the Archbishop of Canterbury, although he was quite sort of negative himself, he did get us in contact with his advisor to Indian affairs.

Shri Mataji: So what did the advisor do?

Sahaja Yogi: Well he said he wants to see us and talk to us. Whose friend he said has written the translation of something I can't remember what it was Mother, some Indian scripture. And also a bishop in Hayverteaf is also interested in talking to us in Sussex.

So again from this organization is sounds a lot better.

Shri Mataji: Sahaja Yoga has advanced Christianity, advanced Judaism, advanced everything. The point where everything meets that's what Sahaja Yoga is. But you must know where they have gone wrong otherwise they'll never advance.

So, that's all.

Sahaja Yogi: Yes and also we put deprogram people who've dealt with all those.

Shri Mataji: How do you do that?

Sahaja Yogi: You say that if anyone's messed up with a Guru then you have an organization, like they have in America, called deprogrammers.

So if anyone's messed up with a Guru then if they contact the police or social workers they put you onto you then you talk to the person whose affected and then you make him better with his parents, but it takes too long.

Shri Mataji: You see you must let this organization also do this work. The same organization.

Sahaja Yogi: Mother if we put outside instead on Center for Sahaja Yoga, perhaps if we had a notice that said Center for International Comparative religions or something.

Shri Mataji: Whatever you like.

Sahaja Yogi: That might also put people off a bit. We could easily invite people here.

Shri Mataji: You see in this world whatever you say it always has two sides, it's a personal jury you see everything has two sides, like if you say this is a place for people to understand religions and their mistakes or whatever it is, all the religious people will be standing against you.

Brian: Mother the aim would be with it to, the people who were the members of Golden Age International they would indicate to the people they were in contact with, that they were employed by Sahaja Yoga for that purpose.

Shri Mataji: That's what I think, you should keep it out. Connection should not be there. But what you can do is to get some people you see, if they come to you, to your organization you should say that some people have told

us that Sahaja Yoga has helped. You can try. But we are not recommending, but if you want you can try. Like that.

Sahaja Yogi: Mother if people will ask what are the credentials of the Golden Age International and if we can't say that we're Sahaja Yogis what are we to say to the people are our credentials?

Shri Mataji: No but credentials are that we are frogs and pigs and all that are our real credentials.

Sahaja Yogi: From all over the world. We just got together as a group.

Shri Mataji: You see you are not to say that it is an organization of Sahaja Yogis at all. Even they won't ask you that you are Sahaja Yogis, they'll never dream of it. You see that's why we have had no dress, no badging, nothing. We are so different. That's why I have never allowed. Many people used to say let us wear kurta pajama, I said nothing to it. Even the mark. You are not to have anything. That's only secretly. Till we reach a certain stage you see.

So you don't have to say you are Sahaja Yogis, credentials is that now this is Doctor David Szpiro alright? Doctor David Szpiro, then barrister, then this, that and also you can add up pigs and all these things to it. Doesn't matter. This is what they respect not Sahaja Yogis. They think Sahaja Yogis means they must be some criminals you see. They cannot think that Sahaja Yogis are some good people, they cannot think of such people who can be good, really they can't think of it.

Sahaja Yogi: It is true though Mother, when we talk to people with full confidence in ourselves about this kind of thing to probe where their seeking lies, if they ask, they

always never fail to be impressed by the depth of knowledge that Sahaja Yogis have got and this itself stands out. They don't think to ask where you got the credentials from, because if you're subtle like you say Mother...

Shri Mataji: You see when a Sahaja Yogi speaks, you know even a little girl, like Annupama, when she speaks people are amazed how does she do all this. Every sentence that you speak has that sparkle if you see. They won't know. You need not say. If there is a beautiful rose somewhere hidden you know because it smells. You know the fragrance is there. They will know it is something great. You need not say you are Sahaja Yogis, by saying that we have achieved nothing with these horrible medias so let us go in another way. You see if you talk of the flower nothing works out, so talk of the fragrance. By flower they are not impressed so better let them have your fragrance. This is another one who can impress quite a lot.

Sahaja Yogi: Mother, can we have part of the organization something research into nuclear aspect, how to...

Shri Mataji: You see even you are international this thing, you can go into everything, no problem.

But you see peace cannot come from without, peace has to come from within you see. If you don't have nuclear weapons you'll have some other weapons. Now Americans are, look at them, they are selling their weapons to all other countries at a very cheap rate you see. What is this? This is even worse than having atomic bomb, because atomic bomb for once for all finishes

everyone you see. But this is very bad you see to make everybody fight.

So they have ways and methods. See you can't just say. It's a temperament, it's an attitude, it's an inner subtle being which is not at peace you see. They are violent because they have no peace within. Actually they enjoy this. They enjoy all this.

Sahaja Yogi: How to deal with people then? Through our connections with them, they come to see Sahaja Yoga and they see us as the speakers. If they've seen us as a representative of Golden Age International and then they see us on the podium doing Sahaja Yoga, how would you deal with that situation?

Shri Mataji: You should get people from outside. You see for example you can go to Toronto and let the Toronto people handle New York. It's better. For example Brian can say I've come from Sydney all the way and you've done so much there in Sydney, so much of research, we have found out this and all that. Who is going to find out about it? Alright? So in New York you work for Sahaja Yoga, in Toronto you work for this.

Sahaja Yogi: What are we to do if we get legitimate clients?

Shri Mataji: What did he say? Brian: Mike was asking what are we to do if we get legitimate clients?

Shri Mataji: Legitimate clients? Brian: Clients who are willing to pay money for the work that we would be doing.

Shri Mataji: You see you have only one client, that is Sahaja Yoga and they don't pay any money.

Nobody will be our client as such. How can they be? Except for these Gurus, because we'll talk against them, they'll never pay us anything. I don't think this question will arise.

Mike: No I mean like regular business clients.

Shri Mataji: Business clients. Who? Mike: Not necessarily involved in seeking.

Shri Mataji: So in this relationship you are... you see what will happen, now we have, let's see. We will either go to these Gurus alright, so they come because we say we are giving alternative this thing. But when you will go and see them alright we'll give you a publicity, this thing, that thing, but we'll tell the truth, you see. You should tell them that we are here but we'll tell the truth because that's what we have written in our this thing and we'll try to see the truth here.

So they would like to have you there because you will have a sort of a position to tell the truth you see.

So you can go there as any journalist goes. And he can say whatever he likes, they cannot stop, so you go and see the aws of that thing and then you can write about them and tell about them in the newspapers. This is what we have seen.

So they won't pay you. I mean if they pay of course I don't think they'll pay for telling all these things but even if they pay you can tell them that ours is voluntary organization and we are doing this voluntary work and like that.

Or you can take the money, what's wrong? And throw it in the Thames.

Brian: If somebody comes along and wants a publicity campaign about soap.

Shri Mataji: Soap? What is soap? Brian: A public relations firm, as well as selling something like Sahaja Yoga could also sell soap or sugar or...

Sahaja Yogi: Or lemons...

Shri Mataji: We won't have any magazine or anything.

Brian: But in the same way that the members of the organization could go to the media trying to interest them in publishing material about Sahaja Yoga, that facility could also be used for other money making concerns like a soap making firm could come to the Golden Age International to employ that organization to give cheap soap a quality image or... you see there is a possibility of a legitimate business, an honest business around the dishonest, the point that Michael is raising. In other words it could be the possibility of some members of the organization becoming totally involved and financially involved.

Shri Mataji: No, no, no, no.

Sahaja Yogi: For alternative lifestyle sort of thing...

Shri Mataji: You see what I am saying, these things again take you to the same. It's a dangerous game. See you can play out certain things, like, something like we can say that... we can have a... I don't know how it can work out but say we can get some Sahaja Yogis to say that this special type of sugar is vibrated sugar you see. It has done you good.

So you can refer to some organization saying that this sugar is available from this thing. Or say genuine things

like genuine food or something I mean more on the genuineness if you can work out say soaps now are made here of horrible chemicals, if you can get something genuine you see. On that it could be done later on. Whichever is genuine thing but we have to test it and see for ourselves. Things like that we can work out if you go to there. But should be genuine stuff which is helpful otherwise you see we cannot go on for anything cheap type thing. Like for liver patients we can say we have a medicine or something alright? How are you? Alright?

Sahaja Yogi: Mother I used to be an illustrator, I've worked within the New York Times and Psychology Today and Selfworth. And I've been wanting to use my artwork in some way. I know it has a potential to be beautiful if I was working for a good cause such as Sahaja Yoga, not just my own feelings. Is there any way that I could help? That I could...

Shri Mataji: We'll make full use of you, I'm going to use all of you for this. I'm already using you alright? We have to find out all the talents in this kind of work you see. But now for example David Szpiro is too honest a fellow I must say. He may give in your secrets. I hope David you have changed a little bit, it's too straightforward, you cannot be with then you see. You have to play a drama. You have to be an artist to play that drama you see. I'm Myself hopelessly bad, so I'm out of it you see. I just can't do it, I'll just laugh you know so don't take Me. But you have to be careful. If you give in the secret then we are out you see. Take few, but those who can keep the secret alright. At least when you are representing it outside you have to be very careful.

Sort of you see all the Sahaja Yogis know each other. Immediately they'll say Āgñyā, all of them sitting there you see and they start giving the bandhan as a habit you see and immediately they'll find out all these people, charmers here. Anybody like that. And a little, you have to use little cunningness I should say with these horrible cunning people you know you have to be very careful. If you start giving out your secrets by any method, I would say if... Phil is another very over honest fellow you see.

So you shouldn't try to be over honest you see. If you are over honest they'll find you out in no time they will know, oh this is the one. You have to little bit do some practice and drama.

Have you ever taken part in a play? Phil: I was Julius Cesar, I read the part.

Shri Mataji: You were doing what?

Sahaja Yogi: He played the part of Julius Cesar Mother so he didn't have to quibble very much.

Shri Mataji: What about you? David, did you? David: Not since I was at primary school Mother.

Shri Mataji: Now better practice little drama, you see. That's a good idea. All those who suffer from over honesty you see because conscience and all that. We are beyond all that. We have to save this world, it's a tremendous task. We can't go on playing with all these few bits of things that we have. We have to have the major thing now. We have to do something about it. Look at the eyes. She wouldn't come to you. Where is Olympia gone?

Sahaja Yogi: She's playing with the children outside Mother.

Shri Mataji: Where is she?

Sahaja Yogi: She's playing outside.

Shri Mataji: I see. Take her? Come and try? She doesn't know you. Who are you? No? Alright? You feel nice then alright you be with Me. Hmmm good. But you've wet yourself, do you know that? Hello.

What's it? She has got her hair like her mother. Always comb the hair of the children backwards you see, so they grow more. Oh, you don't like it? Alright, alright, sorry, sorry, sorry, sorry. Take her. Alright sorry, sorry, sorry.

Sorry, sorry, sorry, sorry. What happened just turned the hair. That means there must be something wrong. That means something on the Sahasrāra she has a problem when I touched her Sahasrāra she started crying. You work it out. Do you use a comb or a brush for her? That's why, you must use a brush and give it to Me for vibrations.

Something must be on her Sahasrāra is the problem now. That's how you discover. You must use brush for children, very important it is.

Brian: Mother there's a popular area of television which is the so-called in depth look at some topic.

For instance a program perhaps half hour program on health. On such a television program would you be willing for instance to talk on aspects of health in a program which would contain so-called medical experts who would in fact attempt to refute the things that you were saying?

Shri Mataji: Later stage we can. Just now you should camouflage. You see if you put Me there, all Sahaja Yoga there everything, they'll be shocked and they'll find you out. But first you have other people you see, build them up. These other Gurus, put them like that, the way you did it in Australia. Later on I can be there, but first you prepare the ground. The I would like to do anything. Any other suggestions?

Sahaja Yogi: Mother would it be advisable do you think if the doctors in our group approached people like the Arthritis Research Foundation?

Shri Mataji: We tried that.

Sahaja Yogi: We've seen a quite successful treatment on an arthritis patient.

Shri Mataji: We have tried it. You see what we did was with Doctor Srivardana, he was there on the cancer research. And he wanted to talk about it. He is doing that job and he wanted to tell to other people, nobody was willing to listen to it. They thought he was gone mad. It's not easy. He was there, he was doing that research. Gavin knows about him. He was doing research in cancer and when he went and told them that this is possible, this is this, they said no, no, no this is all, you are mad, how can that be? Because they cannot believe there is something higher source from where you get all this. You see they all think in their ego behaviour that it is all their own achievements. They do not want to believe in it because their existence will be zero. You see they asked Me in India that if I make this institute for research they will get a big donation from the government. But I said what is there to be researched here, I mean I have

researched everything, I mean I know everything. What is there to be researched in Sahaja Yoga? And what are we going to do with the donation? I mean that time there was no land, nothing.

But even there you see they wanted to research it. And the organization is for research if you said there is a solution, then the organization does not exist. You just see how will they do it, psychologically also.

They are not really doing it actually to find out something, they are doing it because they have to exist.

Gavin: Mother a lot of programs are made attacking the different Gurus and so on but they don't offer solutions. Would it not be a good idea if we were to make such programs again without offering the solutions, but really opening up the loopholes.

Shri Mataji: How will you make the programs Gavin? We already have programs, now where can you do these programs? That would be on the contrary you go and talk to them as a neutral body, alright.

You tell them alright, we would like to study we would like to... this is one of the alternatives we agree, but after all we are journalists, we have to witness the whole thing. Alright you go and see and see their loopholes and put them up as they have done it, they have exposed all the Gurus like this in Australia.

That's very simple.

Gavin: In this way we would sort of break the ground for people to start thinking for themselves and then Sahaja Yoga is there but we don't present it.

Shri Mataji: No, first you do this, then you come to Sahaja Yoga also. Also criticise it in a way which is not really a criticism. Alright it will work out. What did you criticise Sahaja Yoga for? What did you say?

Sahaja Yogini: They don't take any money.

Brian: They don't take any money. No it was related to some of the practices like foot soaking and that is was very time consuming, like people gave a lot of time to it.

Shri Mataji: Otherwise what are you going to do time? When you go to the pub is it time absorbing also? You see what I'm saying, that if anybody wants to refute it, it's very good, we really want, otherwise you are bored stiff you see.

So what you can say, say for example if you want to criticise Sahaja Yoga...

now let's see... I get thoughtless.

Sahaja Yogi: You give up all your enjoyments.

Shri Mataji: That you can't see from the faces. You can say one thing, that there are some people who still are not anywhere near a good person or something like that. You can say like that. But some of them look excellent people, many of them look excellent people.

So maybe there is an inner circle, some sort of a doubt you see and everything is not told. Like that you see you can put it. You see something to say there is something secretive about these people a little bit. Everything is not told first perhaps. It is said that all knowledge will be exposed to you but partly it's known and everything everyone doesn't know. That's what we gathered from some other people who were saying that we are not

allowed to certain functions or something like that so you see a class consciousness is there or something. That will help some socialists to raise their ears. Or...

Sahaja Yogi: Mother I heard somebody say something once which we could even turn to good effect for us, it sound like a criticism is that somebody once said that we seem to be a bit privileged, that we don't take in everybody, the poor, the sick, the weak, the needy, the mad, the stupid. We don't take all of them, we don't sort of...

Shri Mataji: Yes none of them were, none of them were there that kind.

Sahaja Yogi: We could turn that to a good use.

Shri Mataji: That there were no alcoholics among them, nobody taking drugs and nobody was smoking, nobody had a matchbox.

Sahaja Yogi: Except for lighting candles. Except for lighting candles.

Shri Mataji: Candles yes. That also may be in here. For lighting the candles none of them had a matchbox. Can put like that.

Sahaja Yogi: Yes it's a Christian thing, so it doesn't feel to the Christians think that to be a Christian, to be a good following Christ, we have to take like Mother Teresa, dying and sick people and...

Shri Mataji: But you see when I ask somebody he told Me that he came to this place when he was dying. Later on. You see this is the first criticism, then we refute. And somebody can go and say I was just dying when I came here and Mother saved me so I look perfectly alright. You

see that is the second stage. Gavin, we should give them some photographs of when you came. Before and after.

Sahaja Yogini: Mother, may I ask how many should present the evening classes? We were originally going to give realisation immediately, but I'm wondering from our discussion this morning whether it might not be too much for them? *[UNCLEAR]*.

Shri Mataji: First you must educate them what they should expect. First you have to tell them what they should expect from realisation.

Sahaja Yogini: Should we have your photograph there?

Shri Mataji: No, no. You can cover it with a paper or something, with a silk cloth if you cover the vibrations will flow in any case. You need not.

Sahaja Yogini: Can we give realisation at any time?

Shri Mataji: Yes, afterwards you should.

Sahaja Yogini: It's a course for twenty-six weeks.

Shri Mataji: twenty-six weeks?

Sahaja Yogi: One class a week Mother on Friday evening.

Sahaja Yogini: For two hours.

Shri Mataji: What will you do?

Sahaja Yogini: Oh there's plenty Mother, there's plenty.

Sahaja Yogi: We've got 24 titles Mother it's just the various beginnings of discussing Sahaja Yoga.

Shri Mataji: Then 25th you will give them realisation.

Sahaja Yogi: On the 26th Mother.

Shri Mataji: But without realisation how will you make them understand?

Sahaja Yogini: Well this was what we wandered and this was why our first impulse was to give realisation.

Shri Mataji: No, you can say after say half time you can say that let's try if we can work out on you.

Sahaja Yogini: Shall we also invite them to our public meetings in Brighton?

Shri Mataji: If you have public meetings they are always invited. But you have a public meeting every week?

Sahaja Yogini: Yes, Mother. Every Tuesday.

Shri Mataji: And this course is from people who are coming from public meeting or...

Sahaja Yogini: No, hopefully not, hopefully it will be people who are interested in alternatives to education like comparative religions, astrology, lay lines...

Sahaja Yogi: Mother the idea arose because TM was doing an introductory class at the same night school it occurred to us that if they could get away with it so could we. Moreover we can do better. And it seems we will because a lot of people were very displeased with the TM class they thought it was an absolute rip off. Apparently all they did was...

Shri Mataji: But what you can do is to talk to them that you see this is the thing, this mantra, this Kuṇḍalinī is here, this thing, that thing. But a mantra, unless and until it is awakened by a realised Soul you cannot use. The mantra at this stage has to awaken this deity. Like that you can tell them the prepared, but it is to be awakened and this you know will happen to a person and if it happens. And then if it happens... I mean when we'll have a public meeting?

Sahaja Yogini: We have the public meeting on Tuesday, every Tuesday.

Shri Mataji: So what do you do then?

Sahaja Yogini: We have a talk or a tape and then we give realisation.

Shri Mataji: How do you say these people won't come to the public meeting? These people won't come to the public meeting?

Sahaja Yogini: Primarily what will happen with the evening classes is that posters will go round to libraries and all sorts of outlets like that.

Shri Mataji: But how do you stop them coming to the public meeting?

Sahaja Yogini: Well I wasn't suggesting that we stop them Mother.

Shri Mataji: Then what will you do?

Sahaja Yogini: What I'm thinking is how we justify it, because they would be paying for the evening class, that was the point. We've offered our services as lecturers free but the adult education institute will charge people who come on the course for their hall, their lighting, their heating. If we can say to them that the public meetings are more for in depth actual working out and learning how to use.

Shri Mataji: How many people come for public meetings in Brighton?

Sahaja Yogi: About twenty Mother. 20, 25 of us.

Shri Mataji: And how many will be coming for your course?

Sahaja Yogini: We don't know yet Mother. We don't know yet.

Sahaja Yogi: About the same number Mother, judging by the TM experience. Possibly more if we make it look very interesting.

Shri Mataji: Now the public meeting of these twenty people is always twenty isn't it? They don't increase.

Sahaja Yogi: Mother we get say typically two, three, four new people a week.

Shri Mataji: So let us not have it as a public meeting then. You advertise every time.

Sahaja Yogi: Well we have the posters around town Mother, which say it's every week at a particular hotel there's a public meeting, an introductory meeting.

Shri Mataji: You see I would say... this one you'll start at the ashram is it?

Sahaja Yogini: No Mother it's the adult education institute.

Shri Mataji: Alright so it won't be.

So why do you have any public meeting at all? Why I am saying for this twenty-six weeks, if they have a big response you see. What you can do is to have them in the ashram and need not advertise. Let us see if that works out better. If only two or three people are coming every week you see and supposing they get about fifty people for this training center? then best thing would be that they should go for the training center and you should have your thing in the ashram now you've got an ashram.

Just like as you have here. I told somebody has to inform. It's all right we'll inform, I think John will be coming.

Sahaja Yogini: Would you like us to telephone home Mother.

Shri Mataji: What's that?

Sahaja Yogini: It's something Christian cooked.

Shri Mataji: So many things. What's all this?

Sahaja Yogini: They're potato balls Mother, rosemary...

Shri Mataji: And what's this?

Sahaja Yogini: That's lamb Mother, special sauce.

Shri Mataji: Oh I can't eat all that. You bring Me a little plate alright? I'll take it in that and eat because this is too much for Me. You'll keep it here, I'll take out a little in a little plate. I look so big, but I don't... Alright so this is a good idea. Now what we can do is to have this course done there and just like as you are having here. Because in the public meeting now as you'll be busy with Geneva and all that, so, isn't it? You Sahaja Yogis, this twenty or whatever it is, can get some people in the ashram, you can put there Sahaja Yoga center and it's a public meeting and let the people come down there. And also I don't think giving realisation so quickly is a good idea. That's what Christine feels. That Mother if you give them so quickly they get lost also. In My presence it's alright you can always say was Mother who gave realisation so they think it's something precious. Otherwise you know what happens, that they think Oh you can give realisation, you can give, they have no value. You see because the value system is wrong first of all, secondly they have no sense of realisation.

So better to prepare them for and then give Me.

You see if you give it to a madman say five pounds, what does it make for him? Nothing. It's like that.

Sahaja Yogini: Mother quite a lot of us have already decided what talks we would like to study and what talks we would like to give. May we practice them at Nightingale lane? And hopefully our brothers and sisters will come up with questions rightly to be asked.

Shri Mataji: Wednesday.

Sahaja Yogini: Wednesday.

Shri Mataji: When they have this, Public Program there.

Sahaja Yogini: When we have the evening classes we'll start on November the 5th which is the Friday.

And what we were hoping is that during September we could practice the speeches here whatever night is convenient and then we could learn the sort of loopholes that are going to be...

Shri Mataji: Good idea, because you see if you practice with them they will give you ideas isn't it? I saw that what you gave, good. Very good idea I think you can do that here. Will be good idea. Everybody can give you ideas.

Shri Mataji: She's taken away the whole food?

Sahaja Yogi: It's just there, Mother.

Shri Mataji: Oh I see. Otherwise, I thought it's either the whole or nothing. I sometimes don't understand the language of Sahaja Yogis. Thank you, but I would like to have a small plate alright? It's too much you see. If I see too much then I won't eat so better bring a small plate, that I'll take something.

Thank you. That's a good idea, you practice it here so that you'll be corrected you'll know what is to be said.

Sahaja Yogi: Mother perhaps this Golden Age Organization could have one day seminars in important towns, which we could invite people to tell them about Sahaja Yoga. We could invite distinguished local people.

Shri Mataji: No what we can have is Golden Age one can organize a program inviting people to come from all kinds of things and to prepare papers and to read them and then the Sahaja Yogis should be in the audience and they should ask questions you see, with other people. Here in London I don't know what they do but they have been organizing Yoga seminars and things inviting people even from India.

So what we can do for alternative living we can organize one and there we can get Sahaja Yogis to ask them direct questions you see. To these people and also a Sahaja Yogi should give a speech who is not a member of this secret group you see.

Sahaja Yogini: So the aim of Golden Age International is not to promote Sahaja Yoga at all as such, I mean openly to the other people, but just to...

Shri Mataji: Openly not. Openly not at all. Not al all. But it will happen openly also in a way, because when it will come to Sahaja Yoga you see, it's say a dark night and the people from your family are only serving, so have it like that. You see the dark nights nobody sees who is who and your family people are serving all the food so you have the best. It's like that. Yes it is, obviously it is not. Or apparently it is not we can say, but really it is. Otherwise what are we interested in? Not only Sahaja

Yoga but saving of people. I mean we have tried everything else isn't it? We have failed. Nobody listens to us. We are nothing.

Sahaja Yogi: It's not absolutely true Mother, things are tipping over a certain line.

Shri Mataji: We must understand. This is just to be understood. I mean imagine this Kolhi, how far he has gone. I hope you get that book Gavin from somewhere.

Sahaja Yogi: Mother some people get bored you know when we approach them and we talk about religion, about God, most people they get bored.

So if we were to try something and then give vibrations.

Shri Mataji: But?

Sahaja Yogi: Some people when we approach them and talk about God, they get...

Shri Mataji: As what as Sahaja Yogis?

Sahaja Yogi: No, no this is outside people. If we go and tell them that about religion about God normally they get very bored and they said they have heard it all before, but if we were to talk about vibrations or something else, explore that area...

Shri Mataji: I think even the Sahaja Yogis want to teach Sahaja Yoga and spread Sahaja Yoga must undergo a training. What to talk, how to talk, how to handle, it's very important. In those twenty-six lectures that you are going to have here, whenever it is possible I would also like to come and see how it works out what we should talk. We have one of these subjects, somebody should handle it. How should we talk to people, how should we

begin. See let us understand them as they are. We have to approach them the way they are you see. It's true.

Sahaja Yogi: Is it a good idea to talk more on the vibrations, because they can feel it. And if we were to tell them about the power of the vibrations it comes over *[UNCLEAR]*, that there is a system now that we know about the television, at there is a *[UNCLEAR]* network so if we were to tell them more the theories of *[UNCLEAR]*.

Shri Mataji: I mean do whichever way you think proper. There's no objection for that, but you have to understand the whole thing in such a way that it should go into their heads. But on the whole the picture is such, that the people are really in a wretched condition. Try whatever is possible, that's our work. We are not bothered whether we save them or not, because how far can you go with them? Let them then be there where they are. We can go up to a point isn't it? Say the same time if I spend in India we can save thousands of human beings, isn't it? But here you go on pressing them and asking them for this and still their ego is just on their heads standing, what to do? How far can you go? Very insensitive, lethargic and conditioned people. Really shocking.

Brian: The idea Mother, is this right, that Sahaja Yoga approaches seekers but the Golden Age people approach people who can attract...

Shri Mataji: No, they approach media. They are for media. They are for media. Everything has to be worked out through the media. That's current.

Sahaja Yogi: Mother should I finish pursuing the television lead that I have as an individual and do no more except under the *[UNCLEAR]* of Golden Age International?

Shri Mataji: I think so. You see, it's like you see asking a job from someone who is not obliged to you.

But he feels he is obliging you and all the time he'll be thinking: `Oh God, it's such an obligation' and this and that. But as a member of this thing you can do a lot. I'm sure. Because otherwise they'll think they are just trying to oblige you personally. All the time they'll be having that in their mind, so best thing is just to tell them that actually we are obliging them and not they. You see My point? Graham's brother who is not a Sahaja Yogi, he's just *[UNCLEAR]*, but he's managing some public relations thing, can you just imagine? He did the job very well. One person. You get all the details from him.

Sahaja Yogi: Yes, he actually wasn't *[UNCLEAR]* he just goes to companies and tells them how they can promote their own products in the best way possible.

So I mean in a way we can I suppose tell people that with vibrations and auspiciousness they can improve their own business if they actually come around to our way of thinking, we can actually...

Shri Mataji: But that could be done later on, just now we are not to be identified as Sahaja Yogis.

But you can say that that's what the Sahaja Yogis say. *[UNCLEAR]* not that you are Sahaja Yogis.

Sahaja Yogi: How do we actually get to see them? On what pretext do we go and see them?

Shri Mataji: Pretext we see? We just say that we are here as public relations, alright?

Sahaja Yogi: To see if we can help them in any way?

Shri Mataji: For alternative systems. Even for the present ones. If supposing the Catholic church wants us to help them, alright let's help now? With important archbishop of Canterbury wants to have some help, we don't mind helping them very well. With these cunning stupid people I don't know what to do.

Sahaja Yoga: Mother the way that the Christian religion first spread was because Paul, so-called saint Paul was so cunning and that he tricked people and got up and did very similar things, promoting Christ.

And even though we know that he was wrong in many ways he spread it so quickly. He even got put in prison and everything.

Shri Mataji: I mean just imagine how stupid they were to allow him to be in the Bible, how is he there? What are his bonafides?

Sahaja Yogi: They didn't think to ask him Mother because he tricked them.

Shri Mataji: But best was our Archbishop. They asked him: “Do you believe in this?" In the immaculate conception? He said: “I'm agnostic." You see he was very honest about it. Why are you there? Nobody asked him. If you are agnostic, you cannot answer the questions then why are you sitting there, you get out from there. That's what exactly he said.

Somebody asked him “Do you really believe that Christ existed?" He said “I'm agnostic, I've told you already." He was agnostic for everything. But to him Christianity is a social order or maybe a state affair I don't know whatever it is about that. You see, more a question: “How much finance did you get? Where do you spend

them? How many buildings you have got? How many walls you have got? How many bulbs you have got?" You see, like that. It's that level. Christianity is only that level. People are bust counting all the plates in the house, counting cups in the house, that sort of a thing. It's a household.

Sahaja Yogi: Mother, do you think it's any help, Jason could help us on this, the fact that we are about to become a charity? Do you think that the Golden Age International could also be involved?

Shri Mataji: A charity?

Sahaja Yogi: Yes, involved. I mean how we are based, not the company, but we don't have to deal in large financial profit because of the basic of a charity.

Shri Mataji: Voluntary system.

Something voluntary.

Sahaja Yogi: So, the point that they raised before was that what if we...

Shri Mataji: Call it a voluntary organization. It's a voluntary organization, because for charity we have no money. Neither we take, nor give, so no question. Charity goes hand in hand with money. But voluntary work anybody can do. Voluntary organization. Do you know Sahaja Yoga has no organization? So far, so good. I don't know. I hope you people do not turn it into another dead stuff, by organizing it.

Having secretaries and all that... I don't think it would be possible. Now, so come to other problems.

Other problems that you have in the ashram. What's the problem with Hari? What happened?

Sahaja Yogi: There's no problem Mother, because we shouldn't involve you with this Mother.

Shri Mataji: But you see what I'm saying, I'm telling you one thing. You were in India, now they have got something settled down here. Try to appreciate it. Don't try to disturb. Alright?

Sahaja Yogi: Yes, Mother.

Shri Mataji: Now tomorrow somebody comes from Timbuktu, now he comes here and then you say you should not be involved. That's not possible.

So if you want to be kind to Me, just accept as the order is just now. Alright? Now, why I am talking it in open because I always get pestered by one person telling Me another thing and this thing. Now about Nick people have objections, I know that. They have had.

Where is Nick?

Sahaja Yogi: He's gone to hospital Mother.

Shri Mataji: What?

Sahaja Yogi: He's gone to the hospital.

Shri Mataji: Where has he gone?

Sahaja Yogi: To the hospital.

Shri Mataji: Hospital? Alright. Or about Kerry and Nick getting together also people have objection or some sort of a thing. Now, that way you will have objection for everyone. I don't say he's perfect. He must be wrong, he must be hot tempered, he must be trying to organize you. But he's not here to give you realisation or anything. He's just there to maintain the *[UNCLEAR]* place, alright? So you don't have to fight with him all the time and say this he should do that he should do, whatever he is doing, he

is not doing anything to harm you. Maybe a little ego is there definitely. I do not say that. I do not challenge that. There may be some ego, something working it out, but for that you should accept that after all he is doing all this work, he is staying here, he's free, he's very methodical, he doesn't give out Mother any trouble. Let him do it. For you people you are free in any case because you have got your spirit, you can always develop your spirit. What difference does it make whether you sleep in this room or that room? Do not make issues of nonsensical things. For Sahaja Yogis it doesn't behoove. Do I do like that? Did I ever say that I would like to sleep here or sleep there? So one thing you must understand we are Sahaja Yogis, we are not ordinary people. We have to behave like saints. How much the saints bear? How do we know a saint? By the way they are, they have got bearing power. The way they are simple, they way they are living with less things. The way they are sacrificing. We are saints and I don't know what sort of things we are. Alright, I agreed, even if I say that Nick is dominating or he's doing something like that, alright.

Let somebody organize it. Like that you'll not allow anybody to be organizing. If everybody has a say in the matter, how is it going to work out? But, you are free people. You are absolutely free if you want to enjoy the freedom you have wherever you are, whatever room you get, wherever you stay. If you are free people, you'll not create problems. Those who are not free will create problems. It's as simple as that.

So no more quarreling on this point that I want to stay in this room, it's too frivolous and not to involve Me is not so. I am always involved.

So take everything for granted, if you don't want to live in the ashram you can go away. But now let it go on, don't give Me a headache with it, I have too many things to be done.

So nobody should give Me a headache, when I find this is absolutely useless I'll ask somebody else to do it. But I'm sure when the other person comes the same problem will be there. Because your egos are there and if Nick is organizing you think that he is something greater than you. That's the problem. Not at all. You might be a much greater Sahaja Yogi than he is *[UNCLEAR]* but he's the one who has time, who's doing the job, it's alright, let him do it.

So why are you interfering with his job? I'm not telling about you or anyone, maybe that you are right, I'm not saying that you're not right, maybe you are right, but I am told that some people in the ashram believe that there should be no organization about living together. You have not reached that stage, not at all. You have not reached that stage. When you reach that stage where you don't need any organization like these leaves are see. They don't need. They grow according to the laws of nature. Do they dominate anybody? Do they trouble anybody? But when you become that lively in the Spirit, in your Father's domain, then you don't know how beautiful you would be. There won't be any problem between each other. Now supposing say somebody X is very good and the Y is very bad, still it is not alright. The

Y has to be alright. The X should not be satisfied with what he has got, he's something great, he should not. The Y has to be alright also.

So what he has to do is to pray for him, beat him with shoes, do what you want, but you cannot just say “Oh I'm very good the other one is not good." That's not the way Sahaja Yoga is going to work out. Everybody... now say my finger is sick, I won't say cut off my finger will I? I'll say alright, I'll try to improve it, try to save it as much as possible.

So that relationship will only develop if you really work out in that way. But if you don't want to work out in that way then there will be a problem. No more angers, no more tempers, nothing. Now try to quieten yourself and be peaceful. Ashram has to be a place of peace, where peace should reside. God has been so kind to you just imagine. You are living under such a roof, I can't even think of such a thing in modern times. What a beautiful thing they have done here. Just look at this.

Have you ever noticed what God has given you, to be under this roof, so beautifully done for you? Such a beautiful thing. Count your blessings. If this is important. When you are a realised Soul, you see nothing but beauty around you and then you give beauty. If you give ugliness then you are not a Sahaja Yogi as yet, you better improve yourself. Why are you talking? And Nick is not the last one in Sahaja Yoga, he is not maybe the first one, but he is the one who was available, he's good at organizing so I asked him to organize. Now you don't all of you give him ideas. Otherwise every moment you do

something he'll say I give up. Will you take up from him Mr. Hari? Alright let's see.

Sahaja Yogi: No mother. Forgive me if I made a mistake.

Shri Mataji: So then nobody... why I am just telling you because just now the problem came from you. But you are not the first one, this is I think the 11th case.

So now as he's doing it, you are all busy people, let him do it. Let him do it the way he is doing it, just listen to him, nothing important.

What is important is your Spirit isn't it? Keep your attention onto your Spirit and not to these mundane things. And I tell you I have seen in the West people just are trying to find your ways and methods of quarreling, really. Either Nick quarrels or you quarrel, both are just the same to Me. But it's only just to find something. If your father did not do it, then your grandfather must have done it, like this sort of a thing, you know it's bad tension and very bad attitude towards each other. Not of mirth and happiness and joy and understanding and enjoyment. That I want you to feel for each other.

Sahaja Yogi: When we go back to New York we're going to try and get an ashram there and I was wondering, I'm pretty new in Sahaja Yoga *[UNCLEAR]* but when we have it, may I please live there?

Shri Mataji: What did he say? The last sentence?

Sahaja Yogi: If they get an ashram in New York, may he live there?

Shri Mataji: Thank you very much. Very kind of you.

So what should I do? So? What did he say the last?

Sahaja Yogi: He said they're hoping to get an ashram there Mother and if they do please can he live there?

Shri Mataji: Nobody is going to live there?

Sahaja Yogini: Please can he live there?

Shri Mataji: He? You? Alright, why not? You see some new ones are better than the very old ones, I've seen that.

Sometimes they can act like snakes you know. They take it for granted, they think I don't understand them. New, old, all these things do not exist in Sahaja Yoga, as long as you love Me you're alright. Also this idea of old and new, you better get rid of it. twenty-six weeks are sufficient to make you old. If you are one day a Sahaja Yogi you are already old enough. But if you are a week old, then you are very old. And then if you are three weeks old then you are absolutely matured, full grown. You don't need more than three weeks to be a real Sahaja Yogi.

Some of them just get a spilt of a second and they are there.

Yes, what is it? Did you raise any hand? What water is this? It's a special one? *[UNCLEAR]*. What else? Chaiiya [Marathi]. Ask this Westminster people to send My letters to Me, 48 Brompton Square, alright? [Marathi.] I don't know how much money is there, nothing, it's all going to him. Accha now who is collecting money for travelling? Is there anyone?

Sahaja Yogi: Bogdon.

Shri Mataji: Bohdan? Bohdan you are putting in Westminister thing?

Sahaja Yogini: He's working Mother. He's working.

Shri Mataji: Alright, is he getting the reports from there?

Sahaja Yogini: No I don't think, not yet.

Shri Mataji: Aap so jana me tum ne? So, you please ask him to send that to 48 Brompton Square because I would like to see. [In Marathi:] Tik?

Sahaja Yogini: [Hindi.] Shri Mataji [in Hindi]: In logh ne sab ne diya.

Sahaja Yogini [in Hindi]: *[UNCLEAR]*.

Shri Mataji: Woh nahi, us cheese ko chor dijiye. Me kareo siruf bank wallah se ke do information mere pas kitna rupia he. Kya muja. I have no idea. He gave Me just a cheque book, but I think I can also write, isn't it? To the bank? Alright Gavin if you make the letter I will sign it. Let us send it to him and get it. You see because I have no idea how much money is there. We took some money out, for our travelling, little bit and I don't know whether they have returned it or not. I have no idea as to what has happened about it. Also bank people are funny. If you don't take the accounts immediately they won't give you and if you ask them they'll say alright you give us money for that and also it's quite confusing isn't it? So best thing is to keep day to day account, is the best way. It happened with the other bank account. You see first it was sent to Ashley Gardens. Now they are sending it to Me. *[UNCLEAR]* account. [Hindi.] And Gavin you'll also write. I'll sign that.

So I can consult Bohdan, because I don't know what to do. Now what else? How am I going to Scotland?

Sahaja Yogi: I had assumed you would go by train Mother.

Shri Mataji: But then what about any car there?

Sahaja Yogi: They will be there Mother. There will be a car coming.

Shri Mataji: Is it? Please find out from Phil whatever money or John is here, they'll need it for their expenses, whatever help they need because they still haven't got a job. Who else was? Mark Allen wanted to go there. Susan wanted to go but I thought for the time being let it be. It's the beginning.

So Gavin I think you should little bit look after the advertising or whatever it is. Now would you like somebody to go down to talk to the media people there?

Sahaja Yogi: Yes Mother.

Sahaja Yogi: The Scottish television seemed quite interested Mother.

Shri Mataji: Quite interested?

Sahaja Yogi: Yes, they want to know the precise date you're going to be there.

Shri Mataji: Good, then you contact him, alright? Good idea. It's done. That's it.

Sahaja Yogi: Will Brian still be here Mother? Will Brian still be here that time Mother.

Shri Mataji: Yes Brian should be taken help of, he will give you all the ideas. You just form this plan for us. That's very important. That's your job, you see. To see to it that you form this organization projection this is yours. You must do it. You see otherwise there will be a problem. Now what's happening about you Hari, you're bringing your wife? Hari: Mother still I can't find a job.

So I...

Shri Mataji: Now, can anybody give him a job temporarily? Will that help? Hari: You see they want a special letter saying that I have this job with a salary and I have the income in the bank.

Shri Mataji: What is it, it should be a good job or what? Hari: A good job so that I can support her coming here.

Shri Mataji: But need not be a permanent. Need not be a permanent job? Hari: Well I think they will more appreciate it if it's a permanent job.

Shri Mataji: What supposing it is not there? Hari: Well they will change the situation depending who interviews they will change.

Shri Mataji: But somebody said that if she can come as a tourist here she can get married here and then they will not object to *[UNCLEAR]*.

Hari: But she has already given her passport to the British High Commission there.

So they will know the details.

So if she was to approach them now for that visa, then they would know the situation there.

They would not grant her that visa.

So the only alternative, the only way out is for me to get a job and send that letter to her.

Shri Mataji: Why didn't you talk to the people that had employed you that you give us something now? You go and talk, somebody should go and talk for you.

Hari: I spoke to the personal manager and he said he's not actually, I would call him again.

Shri Mataji: What's the best way to avoid a person. Come back to Me, you see he'll never come back. You take somebody with you who can talk.

Hari: Who would you suggest Mother?

Shri Mataji: Anybody who should say that you see for the guarantee of this man, this girl married him and that should be done. And we can ask these English to give you a job temporarily, can we? Gavin? Can it be done? Gavin: He's busy setting up a travel agents in the United States just now.

Shri Mataji: So he can just offer him a job or something.

Sahaja Yogi: No Mother, I think it might be better if he gets a job with John Fulston, because I think John is trying to set up a company or something and also it's more in keeping with his qualifications.

Shri Mataji: Why not try that? Will you talk to him? Alright.

Sahaja Yogi: I did start talking to him and I was sort of winding him around, but he needs a bit more pushing perhaps from you.

Shri Mataji: Alright, you better contact him.

Sahaja Yogi: We'll work it out so they'll let him.

Shri Mataji: Good idea, alright? So talk to him, he's a very responsible person. Alright, that's done then. Any other problem?

Sahaja Yogi: Mother I've been living here for two weeks and since I've been here the meditation in the morning hasn't been on time. I've talked to Nick and others about it and I haven't gotten any satisfactory answers. They

just say that people don't get up on time. And I don't understand what or how to correct it.

Shri Mataji: What how to? You don't understand what?

Sahaja Yogi: I don't understand why it isn't on time or what should be done about it. I feel like it's a collective problem.

Shri Mataji: You are not getting your vibrations?

Sahaja Yogi: No, meditation doesn't start on time.

Shri Mataji: It's alright. See they are all English Lords. Where are they lost all the English Lords? Their tailcoats have gone but still they're Lords *[UNCLEAR]*. They'll come around. I have patience, you also have patience. What to do? They are all Lords, you see. Lords, ladies and gentlemen. It means Lords are not gentlemen.

Sometimes people say like that. Lords, ladies and gentlemen. In Hindi language they are called `lātsabh', you see even if somebody is a lethargic person they'll say `lātsabh' is sleeping still, even in India. They are Lords. The 4 o'clock program was really very symbolic, you see. To give the program at 4 o'clock in the morning. He must have said that in Sahaja Yoga you have to get up really early. It's so symbolic. No you must try to keep certain discipline with yourself, I said you be tyrannical to yourself. Be tyrannical. That's the only way. Can you open the window? When I call you lords, I really tell you are all angry because you become hot. It's not an easy thing to be a realised Soul. And it's not an easy thing to be established as realised Souls, I must say. You have to really work. Physical, mental, emotional hangs out. This is only physical My child, but they have others also. And

you all don't know how one has to manage that. Thank you very much. She has come alone?

Sahaja Yogini: No she's been staying with us for a little while Mother and she's going back today.

Shri Mataji: She's growing tall.

Brian: Mother, may I tell a little story from Australia, about the media?

Shri Mataji: Yes, tell them. Good idea.

Brian: I remind you that we were in Melbourne and I asked you or we asked you if would come down very early one day to take a very early flight so that you would be available for the press and for television.

Two of us travelled down the day before and handed out a lot of press reports to the television channels and to the newspapers. We'd already had a couple of articles in the newspapers but we had nothing on television in Melbourne. I had to meet you very early, I think it was something like the plane arrived at 8 in the morning so it must have left at, you must have been at the airport soon after 6 and I...

Shri Mataji: I must have left at 5 o'clock.

Brian: I went to meet you and tell you that nothing had been lined up. That your day looked like being a completely wasted one. You then questioned as to who I'd contacted and I explained that I'd been to, two of the television channels had taken the program from Sydney so they weren't interested anymore and the other two I had to ring back as to whether they would do an item.

So you were very gracious and went off to the house. The phone in the house was out of order and so I had to go

out in the car and phone from a phone box. It was about the 4th, 5th or even perhaps 6th phone box that wasn't broken.

When eventually I got through to channel 7, I was told by the girl that I'd spoken to the day before that “Oh I'd phoned at just the right time!" because she'd just come in and she was going out again. And yes they would be interested in doing a news item and interviewing you. Where would that be? Immediately in *[UNCLEAR]* I said Park, because in the park it was a beautiful day.

So then I had to go back and I already had to make time as well, it was something I'd never done so I found myself committing you to an interview at half past twelve in a park in the middle of the city about fifteen miles from where you were.

So I was like this! I arrived back at the house and when I explained to you, you said “You looked so disappointed this morning, we had to do something!"

Shri Mataji: And it was a very wonderful interview. Extremely relaxed and nice you see. It depends on your state of mind you see. To Me, if I'm here I'm here, it's alright. I'm here, that's all. To Me it does not matter whether I have to have something or to get something. That doesn't matter to Me at all you see. It is I'm here at this point. I've come as your Mother and to give realisation to people. Now, how I do it, that I will do.

So I don't have to worry as to how do I do it. When I face the problem, supposing somebody comes before Me, he's got vibrations or something I'll work out, but it does not matter with Me if he doesn't get realisation I don't get upset Myself, neither I upset that other person.

Because if I get upset he'll be much more upset, thinking that if Mother is upset with me, when am I going to get realisation isn't it? So that would be much more upsetting. But it's not rational with Me it's My nature. I'm completely at peace with Myself, I have no problem. I'm not disappointed, nothing of the kind. Perhaps there's only one thing that upsets Me, really, if there's anything that really upsets Me. Is I find that there is no pure love between you. That love is not felt. That you're not enjoying the love, you see doesn't matter anything you do but you love each other. That's very important because that's most pleasing to Me. But loving doesn't mean some sort of a nonsense you people know about, that's not the thing. Love is a feeling of oneness, of unity, of being you see. Like Djamel once told Me, he came down to Bombay [Mumbai] and he was very seriously ill in Bombay [Mumbai] and he came down to London. Now London is not his place, nothing of the kind, as soon as he came to Heathrow he felt he belonged to this place he came here and he got all right. 100%. And he wanted to meet everyone, everyone wanted to meet him. That sort of a thing. You are all lost people who have now found each other. After so many years of searching you have found each other. Why create problems among yourself? Nothing at all needed.

The rest I'll look after. You just don't worry. Now, for the other people like the medias, this thing, that thing, whatever it is, you're trying hard, My blessing are with you, but also it's not your job. You don't have to worry. If it doesn't work out, alright, we'll work out, that's all [Marathi]. You're job is to work happily, stay where you

are. You will not jostle, you will not sort of be speedier, you will not be lethargic, nothing. If you stay in the center your speed will be so well balanced that you'll not hit anyone. That you'll move and everything will move with you. The relationship has to be established you see. You see in a car you go, the relationship with the wheel, the relationship with the switch, the relationship with a clutch and the accelerator, the brakes and all these things, carburetors, everywhere is fixed like that you see and you move with that. Supposing they all start moving in different directions then what will happen? First establish your relationship properly. That's very important, I have been telling you. That's first thing and foremost thing. Is to establish your relations alright. With outsiders I'll manage. With outsiders there's no problem. Because you see they are not interested, why should we worry? Now this thing we have formed, it's really because we would like to joke with them a little bit. I don't know how many will be saved with this, I don't know. Let's see. But it's a big joke, you know. You have to play with them. Let's see. You see creation is not difficult. Making human beings was not difficult, but making Sahaja Yogis is very difficult. It's the most difficult. You have been made yogis in the sense you have got realisation that's all, but Sahaja Yogis, to make good Sahaja Yogis is not easy. It's a perfect work.

And the perfect work has to be done with peace, with understanding.

Sometimes I really also show My irritation at things, because then I find that you are perfected, but at the stage where we are now I feel quite happy and confident.

Somehow I had a feeling that there's not so much of distrust and domination now within Sahaja Yogis. It's not so bad. Once it is established I have nothing to worry. See we have to be a solid personality. Once we are that, we'll manage. We'll manage everything. No doubt. We can do it. But first this is one of the very big things we have to do. And moreover, you see, the Western people have a very greater responsibility. I can get thousands of them in India, but today we have to fight the intellectuals, we have to fight the administrators, we have to fight the countries you see with big people, so-called. With them, these emotional people, the people of India who are emotionally bound, who are emotionally higher, cannot fight. Imagine a person like, say Dhumal, meets your President, he will just say he is a mad man, why are you making me talk to him? He'll just give him up, you see. He'll just say “This mad man, why have you brought me to talk to this mad man?" That's all Dhumal will say and just turn back and go away. But an intellectual will know, because he has gone through all that madness, so he knows. It's only he can retrace him back, not Dhumal. Dhumal will just say “Oh, what's this mad woman, mad man?" that's all.

So he has done many a times like this. That's why, because if you have to save these people then we have to have very good Sahaja Yogis in the West. We have problems, all those are they are to be worked out. But develop certain of My habits is one of them is Mother is very peaceful.

Her pace is not fast, She doesn't jostle people around. Try to be calm, peaceful. Calm down yourself. And that's

only possible when you are solidly holding each other's hands. Then there is no agility or agitation anymore. You just calm down, all of you. Ha, yes?

Sahaja Yogi: I've got John on the telephone asking when he should pick You up.

Shri Mataji: Pick Me up? For what?

Sahaja Yogi: To take You back.

Shri Mataji: Aāhhh. I'd forgotten. I thought some policeman is going to pick Me up. Let him come.

Or somebody can drop Me. Have you got a car anyone?

Sahaja Yogi: Yes Mother.

Shri Mataji: All right.

Somebody can drop Me, let it be because he'll come all the way and then go, it's better you drop Me there. Are you going that side?

Sahaja Yogi: Yes Mother, yes.

Shri Mataji: Alright.

So, what's the other thing?

Sahaja Yogi: Mother, how do you deal with politicians?

Shri Mataji: Don't ask Me. You take a pin and puncture their ego. You just talk to them and tell them `What have you achieved?' You see mostly they're mediocre, they're mediocre people. They are not intelligent, bright people you know, mediocre. Absolutely. Worried about the [worms] of people you see must have, if somebody has a car, you must also have a car. If somebody has this, you must also have this. This sort of a thing. Very low level people they are. What can you talk to them? We can't stoop down to their levels. Forget them. They themselves will come one day to Sahaja Yoga, because it's not easy

to have politics on their heads. Very low level. I think the lowest level people go to politics and take to politics, because they think they have no significance in life, they are useless, so they think that's the best place to go and show your significance. I tell you the wretchedest people go there. And those who are good people will never outshine. I mean I've heard your politicians, I don't think much of them.

None of them. They will just have jokes about how a queen's party works out, sort of a thing you know.

Nothing serious. I think there is no connection between them and reality. They don't know, they have never experienced I think, what they are talking about. Even the socialists when they talk about this and that, they have not known poverty. They don't know what are the pangs of poverty are. Just they are talking just to make a business out of it, that's all. If you ask them give your one coat to somebody will they give? You have to be extremely generous and compassionate to be a socialist, they are not, none of them are. It's all self appointed business you see, get more house, get more this thing that thing and then do what? Drink. What else? Get bhoots in the house. Invite them, feed them. For what do they need money? Everything is money oriented and absolutely low level, very low level. You see if you listen to the news, especially in England I don't know what they do in other countries, there is strike one thing, then the pound has gone or come down, or the dollar has gone and come down, or gold prices, or they are asking for so many percentage higher, they are asking for so much percentage. I think they must be losing count you know,

I'm sure. The way they are fighting I mean nothing, there's no sense in what they are doing. Half of the news is like that. Ten percent strikes, fifteen percent, for what? And that too, they are so miserly whatever money they have. They don't put into something sensible, at the most drinking.

You won't even find a nice teacup with these people, not even one nice teacup. Why your industries are going down, because nobody want to buy anything, only thing that will go up is whisky or something like that. There's no cultural rapport with them. Horrible. Forget them. I've met some of your leaders.

They're surprised that I'm a happy person. Quite surprised.

So they're unhappy people, make everyone unhappy. Those who take to politics are mostly very low type of people, very low mentality. They are good for nothing, useless people who want to show off, that's all. On My opinion is like that, I don't know.

When it comes to sacrifices, they cannot. They make everyone fight, do all kinds of bad things and take advantage. Unions, what are these unions doing? Spoiling everybody's lives and ideas. Why don't they teach them that you should not drink? What good have they done to people? Labour class, you just tell them not to drink, that's the first thing you should do. Stop all the pubs, you see. Gandhiji was a real politician I should say. He went all out to stop all the shops of wine and other drinks in India. All of it.

Then he stopped people buying foreign goods. Hand woven, hand spun. Everybody should wear, whether you are a minister or anything.

So? A poor man can wear the same dress as a minister can wear. All kinds of things you see, he tried from a well being point of view. They are not for your well being at all because they have no sense at all of well being. Politicians are no good. They are no good. They have to be enlightened. But how many politicians will take to Sahaj Yog? Can you think of even one?

Sahaja Yogini: They are tricking people Mother.

Shri Mataji: It's not a question of tricking you see, the thing is they will never even see. They haven't got intelligence to see that there is something beyond you should see. Apart from tricking, you see some may be good also, but they are not able to see that you have to go beyond this.

So they will never take to Sahaj Yog. It's not meant for these people. I don't think of any, any one of them who will take to Sahaj Yog. You were saying David... what's his name? David Steel would take. I don't think so. Why would he take to Sahaj Yog. No elections in Sahaja Yoga. It's a game, it's a game. Very low level people. I wish they could take to Sahaj Yog. Sahaja Yoga would have spread much more, no doubt, but they won't. It's rather difficult.

So should we go now? Alright? Yes, what is it?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: I don't know, Gavin knows better than Me, when can I go. But I would say it's a hot country or a cold country?

Sahaja Yogi: It's medium. It's wet.

Shri Mataji: It's a wet country.

Sahaja Yogini: It's about the same only it's wetter Mother.

Shri Mataji: When does it rain?

Sahaja Yogini: In the summer.

Shri Mataji: I don't know, you just can see yourself and let Me know. Whenever you say we can do it, but ask Gavin when I'm free I don't know. I can do it for two or three days or four days, it makes no difference to Me. But the only thing is it should not be something all the way I go and nothing can work out you see. Ha, how are you? Are you going back?

Sahaja Yogini: No we are staying in London now for a few weeks.

Shri Mataji: Really?

Sahaja Yogini: Yes.

Shri Mataji: Why? What happened?

Sahaja Yogini: Well the job in Darby is finished and David starts work in Brighton job in October, 1st of October.

So we have a few weeks in London.

Shri Mataji: So you are enjoying your holidays now?

Sahaja Yogini: Yes, Mother.

Shri Mataji: You come to Geneva with Me? For a program. What will you do in holidays at the best? Alright? You can go, because I am going to Basel, he has a house, we can all stay there.

So if you have any other plans you can say, that would be a good idea.

Sahaja Yogini: Alright Mother. I wanted to give you this when Anupama was not here, this was the one she gave you and it was left by mistake in Darbyshire so we kept it.

Shri Mataji: Anupama?

Sahaja Yogini: Yes, you remember she gave you that in Darbyshire, it was left behind.

Shri Mataji: It's beautiful. I don't know where she got it. And Kalpana has really asked Me to thank you very much for all that you've done. Thousand and one times she's asked Me to tell you that.

Sahaja Yogini: Thank you Mother.

Shri Mataji: Now you are all here in London it's good, but if you can come it will be a good idea.

Gavin I have bought My passport, should I give you? Gavin: Ah yes.

Shri Mataji: Can I have that? You are looking alright. How are you keeping?

Sahaja Yogini: Fine yes Mother.

Shri Mataji: Much better. Much better now, ha.

So, look at the size of it [passport]. It is to be sealed like that, that's what they told Me, I don't know why, but it has to be. I had another one, but this is the one. I don't know why they have it that way.

So now I'm going to Switzerland and Germany?

Sahaja Yogi: Yes I'll make arrangements for a Visa for France as well if you want to go to...

Shri Mataji: France?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: So am I going to her?

Sahaja Yogi: They are suggesting that you have Pūjā at her house. If it's convenient for you they are suggesting they have to Pūjā in her house.

So then there is less controversy about which one to meet in Geneva.

Shri Mataji: But it should be in Switzerland somewhere. Because you see France we've done the Pūjā. I can go to her house it's different for Me, but what I'm saying that I've done the Pūjā there. These people require, Switzerland people. Now, so what time is the program? 7 o'clock?

Sahaja Yogi: It's advertised at half past six Mother.

Shri Mataji: Alright, so I'll be there at seven. You start it off. What is that now?

Sahaja Yogini: This was the thing that one of the boys from Darby did a picture for you and it was left behind.

Shri Mataji: Yes, yes, I was wondering that. He's done a good job. He's not put his name here.

Sahaja Yogini: John was his name.

Shri Mataji: *[UNCLEAR]*.

Sahaja Yogini: And this one came with you Mother.

Shri Mataji: What is that?

Sahaja Yogini: It came with you Mother.

Shri Mataji: So you keep it here.

Sahaja Yogini: These were the stands Mother for the blue cobalt plates with gold on them from Hampstead.

Shri Mataji: Yes, yes.

Sahaja Yogini: I has these stand to put it on.

Shri Mataji: You are putting the plates on this?

Sahaja Yogini: *[UNCLEAR]*.

Shri Mataji: But I wanted to have the exact name you know because you see My husband likes it very much and he says you could buy it every month or something like that.

Sahaja Yogini: I'll phone the...

Shri Mataji: Find out. It's beautiful. They make it themselves?

Sahaja Yogini: Well they sell it with the *[UNCLEAR]*.

Shri Mataji: Is it? And the cup also can be put? Thank you.

Sahaja Yogini: Thank you very much Mother.

Shri Mataji: That's the kind of work I have seen in Buckingham Palace. They have that kind.

Sahaja Yogini: And there is, I don't like to give it to you now, this came with the family. What's that?

Sahaja Yogini: It belongs to your family Mother.

Shri Mataji: Your family?

Sahaja Yogini: It's a towel.

Shri Mataji: Which family? It will be fine. Alright.

Sahaja Yogini: David wanted to give this to you.

Shri Mataji: Thank you, thank you very much. Very kind of you.

So for four or five weeks you have holiday? Are you happy?

Sahaja Yogini: Ah yes, very happy Mother. It's nice for him because he's been working so hard. All night long working.

Shri Mataji: Bāpre! He's thinned down very much. It's horrible this work is. All the doctors have to do like this is it?

Sahaja Yogi: In the hospitals Mother until you become a consultant you have to work at night.

Shri Mataji: I think it's too much. I think they've increased now.

Sahaja Yogi: It's uh... there aren't enough people really it must be because they do have to work too hard. It's not a balanced sort of a system.

Shri Mataji: And moreover too much of writing they have to do, too much of writing. Now, can somebody take these? So May God bless you All. I hope to see you there this evening and be nice.

So Hari you find out about this job alright and fix it up. What's that? How is Roxanna is she better now?

Sahaja Yogi: Yes she had written a very strong letter to her mother.

Sahaja Yogini: Yes I told her Mother what you said, that's she's coming to Sahaja Yoga. And I said to her she had to stop politics because politics is rubbish and it's make...

Shri Mataji: I think that is one of the things you are catching all the time, apart from the left Swādhiṣhṭhāna, is heart here all the time. Are you better now, in the heart?

Sahaja Yogini: Thank you Mother. *[UNCLEAR]*. And I put in your picture Mother.

Shri Mataji: I hope she'll understand. They are all useless people you know, there's nothing to follow them you see. I don't know what she thinks.

Sahaja Yogini: *[UNCLEAR]*.

Shri Mataji: It's coming back again to her, arthritis?

Sahaja Yogi: She foot-soaks everyday and she meditates every day on your picture, but she cannot really make the connection. She thinks that by our means we cannot change the world really and so she carry on with...

Shri Mataji: So she's going to change the whole world?

Sahaja Yogini: I said to her the politics is not going to save the whole world. Sahaja Yoga is the only way now. I said to her the only way you are going to save...

Shri Mataji: She won't understand. She won't understand this, you have to have brains they aren't intelligent enough to see that. To them saving means only if socialism comes. Let them go to socialistic countries, then they will know. That's the answer for all such people I tell you. Yes, still? What is it?

Sahaja Yogini: It's a letter.

Shri Mataji: Thank you. Now what about anything more you want to do?

Sahaja Yogini: Whatever you say Mother.

Shri Mataji: Wednesday I may be free, just telephone to Me alright? Tomorrow I may not be so much, maybe in the day time. Telephone to Me alright. Also bring him, because he wanted to see Me.

And we'll talk about it more. And who else wanted to see Me? You? Alright. You telephone to Me tomorrow morning and I'll be able to tell you what exactly the situation is.

***Contents: 1982-08-16*, Public Program, Day 1, Disaster or A Solution to Come, Caxton Hall, London, UK**

These days, when you read newspapers, you meet people, you get the feeling that everybody is waiting for a disaster, or for some sort of a solution, that has to come. This feeling that comes to us is also something very innate, something from our unconscious, because the situation that we see around seems to be quite dangerous. Not that we get upset with the financial problems or with other mundane type of problems that we have had, but what upsets people is, that human beings have become just like machines.

They're running mad. They're running morning till evening. They have no time for each other. There is no feeling sometimes to understand each other, and, as if we are all becoming insensitive to each other's problem. Apart from that, those people who are intelligent and loving people, feel that people at the helm of affairs do not feel responsible for the humanity at large. Then the poverty and the other problems, which are gross, still, they bother us too much. One side, the affluence, another side the poverty. One side, the scientific approach to life, the other side what science has created, things like atomic bombs.

All these create a kind of a confusion in our mind. Everybody seems to be confused. They don't know whether whatever they are doing is right or wrong, whether they are going to the right path or to the wrong path. Very frustrated, disgusted, one feels sometimes and does not know why are we on this Earth.

Confusion is the first impression one gets when one visits our World from outside. People are absolutely confused and also very insecure, extremely insecure. If you see the rich, they are insecure because they have too much money. The poor are insecure because they have no money. All kinds of insecurities work out a tremendous world of confusion.

Now, let us see how we are created from amoeba to this stage. We have become human beings without understanding anything about it and are we to evolve more, to achieve something higher, to get out of this confusion, or are we to be dissolved with this confusion in our mind? This confusion is important in a way. If there is no confusion, we are not going to seek any solution out of it and that is why people feel that some solution has to come out. We are confused because we have no absolute values. We have not felt the absolute values.

Somebody says to be honest is a very good idea, but we find that, no, if we are very honest it doesn't pay.

Some say to be devoted and dedicated and loyal is the best policy, but, no, it does not work out that way.

But there must be something that decides whether we are right or wrong. That's what we think. It has to be like that, after all this whole creation was created with such love and care, with such delicacy. If you are a doctor you will see how beautifully you are created inside, every nerve, how beautifully it grew into a sensitive cell. How the whole body was created, how these eyes were created with such accuracy.

You see cameras and cameras in this world created by us. No camera can be compared with our eyes.

Such a tremendous machinery has been created within us with such care, discarding many others.

Many have gone out of the circulation of evolution and then, this Man, the great personality of a human being, came out of it. For what? To be confused? To be upset? To be insecure? How can that be? It's not true. It cannot be. After all, why are we human beings? God has made us with a purpose, no doubt about it. There is a purpose in giving us this kind of a body. This erect body. There is a purpose in everything that we have today as human beings. Even the confusion, as I said.

Today is the day for people to seek. Thousands of people are seeking. They are fed up with whatever they have been doing, they are fed up with it. They are not seeking out of fashion. Many people think that it's a fashion, they're a lost race and they are this and they are that. It's not true. There were never so many seekers as there are today and they are seeking. Maybe they do not know what they are seeking, but they are not satisfied with their state of affairs and they are seeking something higher. And that `higher' is the Absolute, is the Absolute. Now, this `higher', if it is the Absolute, everything must relate to it. Absolute point means everything is related, for example, if you have a one metre here, if you say it is five metres, that means this is five times than the gold rod you have got in Paris which is called as `one metre'. Everything has to be related to that absolute and that relationship then establishes the relationship with each other.

For example, on the religious side, if you see, there have been so many religions, one after another.

We had Judaism, Christianity, Hinduism, Sikhism, Buddhism, Jainism, Islam, so many religions. They all must relate to Absolute. We must find out how many `metres' each one of them are. Where do they stand in relation to this Absolute, has to be.

It cannot be just something, er, like people said “Oh, we've got the Absolute, Mother, we are realised Souls, we are twice born." And how do you see? “Because I see a light in My head." What does that mean? It is not Absolute, when you can see the light, as it is there. If you faint also you might see a little light short-circuiting there.

There could be some others who say “Yes, I've got the Knowledge." How? What is it? “Because, Mother, I don't think anymore." I said, “You must be drunk." Everything that we seek has to be related to everything else. Otherwise solution won't be there. To find the absolute value of anything we must know that there's nothing else but that. That's the only thing, that's one, that's a unity. It cannot have a parallel.

Some people jump in the street and say that “We've found the Last." Then why are you jumping? Now, that absolute thing has to be something that should come in your awareness if it is a evolutionary process. In our evolution, whatever we have achieved has come in our awareness. That means it should become a part and parcel of our awareness, part and parcel of our awareness, like as I can see you, I can see you, in the same way you should be able to see and through that light we should be able to explain each and every thing.

For example, in this room, if there is darkness and I can't see you, I don't know who's sitting where, what is the relationship of everyone? But when the light comes in you know immediately that this gentleman is third on the row, or that gentleman is fifth on the row. Apart from that, you know what sort of a shape and a colour the person has.

Whatever could be seen through these eyes, one can see, if there is light. But this light is not sufficient because this we have already got it, there's nothing more in our awareness with that. We have to think of a light, which gives us a complete idea as to what is the relationship between us and our Creator. What is the relationship between all those who came on this earth to tell us about that relationship? What is the relationship of human beings with each other? With different countries, with different people, with different faces, races and creeds? What is the relationship between Man and the Nature? What is the relationship between Man and all the elements around? Here we just hang in the air, we don't know if we have any relationship whatsoever with the Sun. He gives us light, but what about us? Have we any control over the Sun, or not? Is there any subtle connection between us and Him, or not? All these connections have to be established in these absolute findings, otherwise that's not absolute.

We should not be satisfied with something extremely cheap, which you can buy with money, that's the cheap thing, I think that's the cheapest thing, very easy to buy something with money. People may say “We have no money." It's not the point, because those who have

money can buy. But this must be something that cannot be bought by money. People don't understand. When I went to America first, they said “Mother how are you saying that you can't take money for this?" I mean, imagine, the absurdity.

Such an absurd thing they could not understand. You cannot pay for it. Now you cannot manage it also and manoeuvre it. If you could then it's man-made.

It has to be something natural, spontaneous, living, because Man can't do living work. Otherwise you should not bother. You should say “I'm not bothered, I don't care for it." That's how it should be, but we get very much satisfied with something that's absolutely easily available to us, that is what we can really pay for, or if we stand on our heads we think we should get that. I asked one gentleman, who used to stand on his head every day, I said “Why are you doing it?" He said “I'm seeking God." I said “What makes you think that by standing on your head you'll get to God?" He says “Because none of the animals do that, so to be a high ranker I was thinking I would stand on my head, it would be a better idea." But it can't be, just think of it.

Some sort of physical acrobat. I mean, so many can do it. In the circus people do all kinds of things, if you see them the way they jump onto their horses, it's surprising. It's not easy to do. They acquire all kinds of techniques by which they can jump onto a horse, er, walk on a little string of wire, all kinds of things they can do, but do you think that is something Divine? So, this absolute point has to be something spontaneous, something living. Should come in our awareness.

Must express in our awareness and when we talk that word `awareness', we must understand that human awareness itself we have not understood. The difference between us and animals is tremendous.

It's tremendous. They don't understand so many things. They don't understand beauty, they don't understand insurance, they do not understand many of these hang-ups that we have gathered.

So many odd things we have done, they don't understand.

Human beings have a capacity to harness the Nature for their own purpose, to use the Nature for their own purpose, which animals can't do. Despite all that, we feel so powerless, so helpless and singled out, but if this creation has any meaning, that Light has to come. That Light has to work out. It must work.

But, now, as you have been already told about the Kuṇḍalinī, this instrument's within you, is there already waiting. The time has come, the maturity it has reached, that you have to have your realisation.

Because of that maturity in a human mind that you are seeking, because you are so mature now that you can't do without it. Say, when you are a child, you don't understand many things and then you grow up.

You grow up, reach a point, say at a point where you understand the marriage, then you want to marry.

Then you reach a point where you want to have a house, you try to have a house. But this maturity that is coming to us is extremely subtle, many-sided, encompassing many aspects of life, I should say, all of them.

It's not only one side that is going to mature. It's not that just few leaves are going to show out from a growing tree. It's not only that some new branches are going to shoot out. It's not that many flowers are going to show. It's that the flowers have so matured now that they have to become the fruit.

That maturity has come to us through our trial and error method, our own. This is done by human beings. Animals did the same for their evolution and human beings also have done this, their trial and error, again they make mistakes, they try to correct it, again they try and again make mistakes. That's how we have matured now. We have reached a stage of understanding the beauty of balance in life.

We are trying to stabilize ourselves and the insecurity is working out. A negative method, of course, but a challenge, challenge to your maturity, whether you are matured or not. Whether your seeking is true or not. The maturity can be judged only when you are there to become the fruit. You have to become the fruit. You have to become the Spirit. You have to be the Spirit. You have to be born again.

But many have said that. Many are saying that. They say that they are already reborn. But what is the difference? The difference is, one has an awareness, which is collectively conscious, which is, he has become, it's the becoming, he's not just talking about it, telling about it. It's the becoming and the other is the one who just believes into it. `I believe!' Which is this `I' that believes into something? Who believes is the `I' which does not know itself.

So just a faith of any kind is not the real faith unless and until it is a part of your awareness. “I believe in God." Many people talk as if they are obliging God by believing in Him. What does that mean? “I believe in God” so alright, you must be having a balanced life, alright. But just to believe, but one may ask why, why to believe in God? Why to have the balance, what is the need to lead a life which is called so-called `righteous' life? Enslaving yourself to these ideas, why? One can ask a question of that kind and many are asking that question. You have to balance if you have to ascend, but, because of this confusion, one cannot expect a very balanced life, because everybody seems to be groping in the dark. Then you can't believe that the people are absolutely balanced. You can't just think that way, that would be wrong.

So they have to have a balance and they have to have an ascent. To have the balance, people have tried lots of things. Thousands of years they talked of religion, they talked of, er, sustenance, of Ten Commandments, this thing, that thing, nothing worked out with human beings.

Everybody jumped out of their balance.

So now there has to be a method that automatically gives you a balance as well as a good ascent and happy landings into the Kingdom of God. That has to happen.

Now, you are all built-in that way, this is what it is, but again you don't have that faith in Me, neither in what we are saying, because again “I believe in Mātājī." There are many who finish with that. You have to have faith in yourself, in your spirit, by experiencing it. It's a

something, a dynamic thing that has to happen within you. A tremendous thing.

It's nothing something just your mental belief that today we are communists, tomorrow we are capitalists and third day something else. It's something that has to become, again I say become and again become. And that becoming is now. The time has come. This is the resurrection time. This is the Last Judgment, believe it or not. There is not going to be another time for that. This is the way we are going to be judged. Our maturity, our balance, our capacity.

Many people come to our meetings, few get their realisation, or many get their realisation, makes no difference to Me or anyone or to Sahaja Yoga, or to you, because, if there are seeds which are just sprouted and are wasted, they are wasted as if they are not sprouted. They do not grow. They are just like any other seeds which have not been touched by the Divine. Even if you get realisation, which is now quite easy for people to get to, they are for it, because the Divine is anxious, because your creator is anxious, to manifest itself, but to settle down as a realised Soul is difficult. I have to tell you at the very outset that if you have to mature into it you have to understand yourself. You must have your self-esteem. If you just are here for a shopping, “Oh, alright, let's hear Mother also” that's not the way it is going to work out.

If you are people of that calibre, then only you can ascend. There's nothing else needed of you. You may be a prime minister or you may be a queen or you may be just a parlor maid, makes no difference to the Divine. You

may be a socialist, communist or a capitalist, makes no difference. You may be this colour, that colour, makes no difference. But you have to have the calibre of a true seeker, who is intelligent enough to see that he has not come on this earth just to be wasted. If you make many instruments and if they are just wasted, they are not put to the mains, they are good for nothing, they have very loose connections, He'll just say “Cancel all these. Stop this factory. There's no use having any more creations." Only those who are mature enough who have self-esteem, even age, you'll be surprised, does not matter, I've seen people who are eighty years of age could be very stupid and people who are very young, very small children also, could be great.

So it is the inner quality of a person, his maturity, that matters in Sahaj Yoga. I know it is rather difficult to understand that why, if it is Sahaja, if the Kuṇḍalinī rises so easily in us, why is it we take time to establish ourselves? The reason is very simple. We are not simple people, we are not, we are very complicated. We have complicated our lives with so many problems.

Now, cancer is a disease which cannot be explained by doctors. We can explain it in Sahaja Yoga.

It's caused by over-activity of the Sympathetic Nervous System. If you could soothe the over-activity of the Sympathetic Nervous System you can cure cancer, but say, those people who go to spiritualists, those people who go to false Gurus, those people who indulge into black magic and other activities of a negative nature, getting spirits and things like that, are more susceptible, are really the susceptible. If a person who is mad and

lunatic and the husband or wife of such a person has relationship with him, he can develop multiple sclerosis. Sahaja Yoga can cure multiple sclerosis. What we call the Mūlādhāra Chakra, if that center is caught up with other Chakras, one can develop multiple sclerosis.

The way we have been banging ourselves into the unknown areas, we have really made ourselves very complicated. In the scientific field also we have gone to the other extreme, believing that science is our own creation and have created problems like atomic bomb, that we can see so clearly, but what we have done to ourselves we cannot see. We are not simple people.

Christ has said you have to be like a child when you want to enter into the Kingdom of God. Now some people I found they thought by wearing dresses like primitive people they'll become simple like primitive, they will not. Their brains are modern, how can they become primitive? The brains, all the time thinking, thinking, thinking, there's a thought, combustion going on every minute, every second, every split of a second.

But even primitive people are not very good for their ascent. That's also a wrong idea. You have to come to a point of balance where you have crossed your conditionings and you have not entered into the ego, which is just a wee bit of a space. If you are not too far away it's alright, this way or that way. But if you are too far away from the center then you are to be brought in.

But what goes in favour of modern times is that great seekers have taken their birth on this earth.

Of course, with other people they have complicated themselves. They didn't keep to their own personality, to

their own understanding. They got complicated with other people. Whatever trends came in, whatever things happened, they did, their politicians, this that, or they are, er, this side, they are belonging to this cult or that cult and others have become `club members', all sorts of things. They have not kept their personality, as they were. Like Kabīr Das *[UNCLEAR]* has said [Indian quote] “As I had this chadur on my body, I kept it as it was." We have spoilt it, complicated it, it is hooked to many things.

We have one great advantage, that you are great seekers, very great seekers, of ages born. This is a very big advantage and is your seeking only has brought Sahaja Yoga to this earth. But one disadvantage is there, that in these modern times we have complicated ourselves too much, because of confusion, maybe, or may be because of our ego, that we wanted to try everything and would not listen to anybody else, `What's wrong?' Whatever it is, we have complicated. Also, we do not know what diseases are breeding within us, what is our mental condition. We do not know how we are placed with ourselves. That's how we are complicated.

When Kuṇḍalinī rises and you get your connection with the Divine, it does, sorts out things, it does, no doubt, it will, but you have to be growing with it. If you do not grow with that ascent, then again that small connection that you have established will break.

Like the roots have reached the source, but the tree has to grow according to the supply, understanding; the root has to grow further, too. That's how you really establish yourself and I really beg of you and ask very humbly,

with great concern, that please don't have diffidence about yourself.

You have already created a problem by feeling guilty thanks to these horrible psychologists who have given us these ideas. Don't have diffidence.

You are seekers of very great quality, no doubt, but there are complications which can be sorted out.

You place yourself away from your being and see for yourself that this Spirit is your being, not that what is complicated, that's just the outside, which can be corrected by Kuṇḍalinī, by your spiritual power. You can now correct, you'll be empowered with that.

Sahaj Yoga is tremendous. Those who have established themselves are tremendous people today in life. They are enjoying themselves, they are very happy people, such nice relationships exist, they are beautiful. Even whatever I have in England I am very happy and surprised, I didn't expect so much. They have compassion, they cannot enjoy this nectar of life alone and they want you all to join in with them.

They are here to help you in a very humble way, as they have been helped. Gradually it has been built up now and it is for you people to understand that so many human beings that are created will be lost if they do not enter into the Kingdom of God. That's the only purpose of Sahaja Yoga. As you know, the subject is so vast, knowledge so great, there's no end to it. Whenever you get your realisation, I hope you get it now, today and when you establish yourself, you'll be amazed. You yourself will become the library of all the knowledges, because you become that subtle thing which gives

knowledge. You reach to that absolute point which gives all the knowledge. You'll be able to see which is knowledge and which is not knowledge. Your priorities will immediately change because you will have that light within yourself.

But, as I say, it is a becoming. I cannot just say that, alright, you are a realised Soul, alright, give five pounds and you are out. It's not that way. I must tell you. This is My helplessness to make people understand that you cannot just become realised Souls, you cannot be certified, it has, it is a thing that should happen to you, it should be your own. That you should be able to manoeuvre yourself, you should be able to handle it yourself, should be your own power which should express it. I just cannot say `Alright, done! Now you are a member of Sahaj Yoga.' You cannot. I must tell you this is the thing which you should understand. After all, you are sensible people. You cannot demand it. Even if you weep, I cannot do it. It has to happen and after it has happened do not take it for granted. Be careful about it. I must tell you I have seen people who just come, get realisation and get lost. And after five years they appear again, all tattered and torn, finished.

This is what you have been seeking, all your lives and that's to be achieved. I'm just here to give you what belongs to you. That also, I don't have, I should say, to give you. It's within you. Maybe one candle can enlighten another candle, that's all, like a catalyst.

So don't make your ego stand up, that “Why You, Mother?" Of all the things, it's a thankless job I must tell you. It's a job I have to do.

I do not do it for any thanks. I just do it because I have to do it, that's My nature. I cannot get over My nature. There's no quarrel between you and Me at all, in no way. I am here just to give you what you have. You can't pay Me, you should not feel bad about it. You cannot overpower Me nor will I overpower you. It's a relationship, as a candle or a light has to the hand. It's just to help you to find your way.

I hope in these modern ideas I will be able to give you this queer thing, because people can't understand.

I was amazed, I didn't know this was so. They can't understand that anything can work out without money, that there can be something like love for love's sake. Everybody loves for something. They can't understand a madwoman like Me who just loves because she loves. She can't help it. People don't believe in such people. They just can't imagine such a thing. But we have so many people who have gone who did this for you, though they are in the history, but they are not lost. There could be someone like that and maybe that all of you are going to be that very soon! That must happen to all of you. Thank you very much.

Now I would like to spend some time with questioning, but not too much and there was a suggestion that if realisation is given like that, which is an easy thing for Me, somehow, then people don't value the realisation.

So it should be given after two or three meetings. Then they will value it better, because, according to people who give Me suggestions, they understand human beings better than I do. If you give them realisation then they

just start living in the air and then they don't want to do anything about it till they really touch the ground.

I still believe in your sanity, in your wisdom, in your fairness to yourself and to your Creator.

So I still feel that you should get your realisation today. But that doesn't mean that you are going to leave it.

You have to follow it up, work it out. That doesn't mean you have to give any more money or anything.

It doesn't mean at all. It doesn't mean anything more than establishing it, understanding it. What is this that we have got? What is this power? Now, can we have some questions? Yes, please? Question: When did you know You had this power to give to people?

Shri Mataji: Me? Question: Yes you.

Shri Mataji: I knew from, since long. I'm quite old, you know. Ancient. But, about Me I don't want to say much, as a matter of policy. You'd better find out gradually because if I say anything people don't like it. That's a fact, whatever I am I am, but I dare not say. People don't like it. You see it's a funny world. It's better that you see for yourself and know Me. What did Christ say? What He said is absolute truth. He said, that He was the Son of God. We can establish it through Sahaj Yoga, you will know that he was the Son of God. It was a fact, I mean, it was the truth, what he said was true. If he had not said that it was not true.

So, they crucified Him. Tortured Him. What did Mohammed say? What did Nanaka say? Nothing to harm you. Just to help you, because they could see much more than you can see.

But nobody liked it. If you tell a hot-tempered blind man that “I can see the red colour and yellow colour and blue colour” he'll bang you. He just can't bear it. But there's no point of superiority or anything.

It's kind, it's that you have it within you, it's your own. I'm again saying it's your own.

So, about Me, less said the better. Because supposing I say something about Myself, why should you accept also? If I say “I am the Governor” will you accept me? You will not. I know you will not. Alright. You may, but even if you accept, what happens? You don't get your realisation by accepting that position. Whatever I say you may not accept as I said, but you should not close your mind. Get your realisation first. Your hands must speak and then you will know what I am. Who am I, how do I know? All about Me you will know yourself. Alright? That's a promise.

Question: How do we establish?

Shri Mataji: That we will tell you. First realisation has to take place and then gradually we will tell you because your hands will speak. You will know what's happening, to you, where are the problems, on what centers. As you can see clearly there, what are the problems. You will know what Chakras are caught up, what is the blockage, where is your blockage? Then also you will now how to clear the blockage, then you will also know how to move your Kuṇḍalinī yourself. You will also know how to give realisations to others, just after realisation, you can even cure people. Immediately you can start curing. But that's not much. After establishment you can give realisation to people and how to establish? Everything is told, free

again, because here only thing that is working out is the concern, nothing else.

So how to establish, everything will be told. Now, for example, we have books, but we don't give it to people who are not yet realised properly.

You have to go from one stage to another a little bit. But it's not even like a regular course. For there's no course in the living things, but as you see, first the seed sprouts and then the seedlings are taken and established and then they become into tree and then grown properly. First they are protected and then they are exposed to Nature. In the same way, you'll be very carefully established and you will yourself know that you are getting established. You'll certify yourself, I don't have to say anything. Alright? Question: After getting realisation to you have to be in contact and get training?

Shri Mataji: No, it's not a training, but you have to contact, the contact with the Divine has to be kept and you will know the Divine. The establishment of the contact you will feel through Cool Breeze blowing into your hands, through your fingers getting sensitive and you can feel which Chakras are catching and to keep that contact you have to keep contact with other people who know about it. And they will tell you how they have done it. Then you yourself can go and do this work yourself on your own.

I went to Vancouver and people got realisation, many people got it. There was nobody who would tell them and I was there only for a day.

So we sent somebody from Australia, she went there, on her own. She has created a beautiful center in Vancouver

and now we have one in Toronto also. Only one person. There's one person who must have given realisation to at least ten thousand people in India, who got realisation. First you have to get your realisation, mature, establish, then you yourself can do it. You become the master, the perfect master to do it. All capabilities are within you. You do not know what you are, how God has made you so beautifully.

Question: Does it take long...

Shri Mataji: It may take a split of a second.

Question: To establish?

Shri Mataji: It doesn't take too long, I don't think, yesterday, today, they were asking Me how much, I said “Three weeks is the maximum." Should be, after realisation, three weeks should be maximum to establish, according to My own judgment so far, but, in the beginning, I shouldn't say, that might upset you. It took really four years to struggle with six of them. Now it's not so difficult. Now we can manage many permutations and combinations of problems, quite easily. Don't worry about time, just don't worry.

It's beyond time. All right? Question: What is the flower of India?

Shri Mataji: I didn't follow, power? What is the flower? What is the flower of India? What do you mean? What is this question? Gentleman: [spells it out condescendingly].

Shri Mataji: I am not talking to you here as an Indian. Is a wrong idea. Lotus is the flower, we accept as our national flower, but I am not an Indian here, I am a Britisher,

alright? Out and out. What is the flower of England? Reply: Rose.

Shri Mataji: That's wrong, it should be daisy. [Laughter.] On a very subtle way it should be a daisy, because England is the heart of the universe and heart resides in the Sahasrāra and Sahasrāra is not like a rose, it is like a daisy. Have you had any experience of the daisies that are coming out these days in England? They have tremendous fragrance. Rose may be because you had Wars of Roses, or something like that, but rose is not your flower. They misunderstood, I think. Daisy everywhere, all kinds, all types, all colours, beautiful. Alright? Question: Is it necessary to give up anything in order to achieve realisation?

Shri Mataji: No, nothing. You see, we give up something because we have an idea we're holding on to something, you see. But when you discover you are holding on to nothing, you've just given up as such.

Like, some people came to Me, said “Mother you are living in a family life and how do You say You have something to do with Divine." I said, “Why?" He said, “What have You given up?" I said, “What have you given up yourself?" They said, `We have given up our families, we have given up carpets and houses, this and that." I said “Really?" “Now can you take away anything from this house which is equal to the dust of the Lotus Feet of your Lord?" “Take away, anything." They couldn't find anything, just looked around. I said “That should be at least equal to the dust." When you are not holding on to anything, what is there to give up? The whole attitude becomes detached. You don't `give up,' but you see, like

a drama finishes off, in the drama you are crying, weeping, with the hero you become Napoleon, sometimes killing people and banging, then suddenly you discover the drama is over. Now, Oh God! I was just playing the role of Napoleon, while I was just watching the drama. Automatically this myth of involvement dissolves, alright? So you don't give up anything. You just see it. What is there to give up? Question: Does one have to give up alcohol? [Sahaja Yogis explain the Question to Shri Mataji.]

Shri Mataji: No, never! Did I say so? I'm sorry for that. [Laughter.] Did I say in My lecture that you give up alcohol? I never said so, but it happens, they just give up. [Laughter.] I didn't say so. Alright? It just happens. I don't say, never say that. You mean to say I don't want you to be realised, to say such a thing? I never said `don't do.' I've finished with Ten Commandments now. Nothing, it just happens, you become Ten Commandments yourself. You just become.

Then, even if I ask you, you will say “Mother, no, no, no” because when you get the highest you don't want anything else. Why do we drink, you know? We are bored stiff with life. We don't drink because we want to run an industry of drinking, do we? No we just don't drink. We drink because we are bored in life, we don't know what to do, how to kill the time. But then the whole thing changes. You enjoy yourself so much that you forget that you have a bottle waiting there. No I don't say like that, nothing has to be given up, but you just give up many things by yourself. Like I know of a person who came to Me in a condition which was just, we can call it a coma,

who had taken all kinds of drugs, you see, tried everything. He couldn't even see Me when he came to Me. Next day automatically he gave up. Automatically, I didn't say to him. In that condition what is there to say. To a person who couldn't even see you, you see, can't even talk to him, he can't hear Me.

But he just gave up. These are alternatives to that absolute, but you find the real, you give up all these alternatives automatically, all right.

Question: Do we have to spend a lot of time meditating regularly?

Shri Mataji: You are worried about time bit too much. We go beyond time. We're time.

[Sahaja Yogini explains to Shri Mataji that the person is asking how long we have to meditate.]

Shri Mataji: That's what I'm saying, that he's very much worried about time. Now you go beyond time, you are in meditation, no, no, you are in meditation My child, all the time. There is no question of time. You go beyond time.

Seeker: [speaks to Shri Mataji].

Shri Mataji: No, no, that's not the point, you see, what I'm saying, don't worry about that all these things, don't be futuristic. Let us be in the present. First of all get your realisation, establish yourself one by one, all right.

Now we shouldn't talk of the future too much. Futuristic people can be quite mad I can tell you, better not be futuristic. You forget all the past, sometimes even people forget their names I've seen because they're so futuristic that they're thinking of their future names.

So they have forgotten their own names you see, so let's not be futuristic, let's do the present. At this moment you have to get your realisation, don't worry. You don't even have to use watches, time is not important. Is the time of being. Is eternal time in which you move, it is a space of timeless, thoughtless awareness, all right.

You have to see for yourself, first get you realisation put attention to that. There are many who are just waiting for that. Just think of that, don't worry about the future, also about the train you have to catch or anything like that. Just be in the present just now, is important I'm telling you, because your realisation is much more important than anything else, so just get to your realisation first that's main thing, all right.

So we'll have no more questions now and we have only one hour more to be here, isn't it? Again the time.

Now this can work out in a split of a second but as there are complications there could be a problem.

Now please do as I tell you, there's nothing much to be done. As I told you these fingers are to be sensitive, we have to just put them just like this. In a very relaxed way and sit also in a relaxed way. There should be no tension; we are not to do anything. Now another request I have to make is to take out your shoes.

I hope you are not identified with your shoes, that's also another problem. Take out your shoes because you are better connected with the Mother Earth if your shoes are not there. Is very simple as that, take out your shoes will be a good idea, put your both the feet on the ground, let it touch the ground though there's a carpet and this and that makes no difference but take out your shoes. Put

you hand towards Me close your eyes, be humble in your heart, you have to be humble, you cannot demand it, so be humble in your heart. And as the Kuṇḍalinī moves I'll be able to tell you where is the problem, where is the blockage, what is to be said just follow it and it would be better. Just close your eyes. Now please don't open your eyes.

***Contents: 1982-08-17*, Public Program, Day 2, No other Way Out and Inauguration of Don's book `Sahaja Yoga', Caxton Hall, London, UK**

Sahaja Yogi:.....

Shri Mataji: Last night I was talking about Self-realisation, our ascent into the unconscious and what should we expect to be Self-realised. Self-realisation as I told you the other day has to be felt in your central nervous system. It's an actualisation, it's not a fantasy. It.....

.....

It's very, very wide subject. After all it's eternal and you cannot explain eternity in such a short *[UNCLEAR* time]. You can just get glimpses and glimpses of that. But if you have any.....

***Contents: 1982-08-18* Workshop (talk, conversation and treatments), Nirmalā Palace Ashram, 99 Nightingale Lane Ashram, London, UK**

Shri Mataji: Sit down.

Sahaja Yogi: Mother? Where else should I put this?

Shri Mataji: Here [shows Her Haṁsa].

Yes. I think most of them need it, a little bit.

You see, in Sahaja Yoga, you are not given any mantra or anything. There's no, nothing like giving you into a big course, like teaching you one after another any mantra, or anything, it's not like that.

What you have to know: where the Kuṇḍalinī is, how it is moving, where it is, what is the Chakra catching and what is the mantra for that. It doesn't take anything, hardly it takes about a week for you to understand the all thing. But gradually, as you start using it, you become profficient and you how to do it for yourself and for others. There is not much of a thing, like a child, when he comes up a little age, he starts speaking up language, because he has a built-in capacity to create sounds. And he does it. In the same way, once you get it, when you get the Cool Breeze in you hand, you learn it by using it, you understand it yourself, you become yourself quite profficient. And you will be amazed how fast you learn this. You don't have to learn it just like a science book or anything, you just start learning, you can: this is Chakra which is catching because now, say, for example, this Chakra is catching [fore finger], right side.

Now, there's a mantra for this is of Śhrī Kṛiṣhṇa. Say, this Chakra is catching [forehead], here, then there's a mantra of Jesus Christ. Like that, you must know the mantras and the Chakras. But the Chakras you just know as a, absolutely, a knowledge which is built-in your nerves: you just feel it.

This is... now this gentleman is saying: “It's hot here" [left palm]. Alright, what is that? Hot here means what? That's the Sahasrāra, at the left side. First it was, the Sahasrāra on the right side. Now, on the left side it's there.

So that means there's a mantra for that and that one must be used. If you use that mantra, this will be cleared out. Alright? That is how you have to know. And that's why I said it takes time for people sometimes to establish, because first you have to know it and then use it.

Shri Mataji: Come along. Have you come for the first time?

Seeker: *[UNCLEAR]*.

Shri Mataji: All right, come along. Come along this side.

So, it is not a difficult thing, it is not at all a difficult thing to learn it, it's very easy. You can pick it up in no time, as soon as you start using your hands on other people.

Please, be seated. Alright.

[To a Sahaja Yogi:] Just see them, some people come along.

Now these people, say... Who are the latest who have come to Sahaja Yoga? Let's see. The latest ones. Say, those who have come about a month back.

Seeker: Yes.

Shri Mataji: See, he came back, she came back only one month back. And...

Sahaja Yogini: This is his first time.

Seeker: I was here on Monday.

Shri Mataji: How much?

Sahaja Yogini: Ah. Ok, he was here on Monday.

Shri Mataji: Monday, alright. He's got it.

But you see... [To someone else:] Have you been giving vibrations now? Lady: Yes.

Shri Mataji: In one month, it's done.

So you can imagine. And you know about the Chakras now? Lady: Yes.

Shri Mataji: About the mantras? Lady: Yes. Not all of them.

Shri Mataji: Yes, you see, that's it. It's very simple.

If you pay attention to it, you can do it much faster. There are many people who are here, within a month, one month's time, they pick up so many things. Many like that, within one month's time.

[To a Sahaja Yogi:] He's alright.

Because you become the knowledge. You start feeling it on your fingers, you know this is the Chakra.

If this finger is, say, burning, [left auricular] that means your left Heart is catching. If your left Heart is catching, then you know because it's burning! Then, there's nothing to go to the books or anything to find out, it's just burning, it's there. Isn't it? That means the left Heart is catching. Now, only you have to know what *[UNCLEAR]* left Heart is catching, the decoding only, what does that mean.

Your hands will speak Christ has said, alright? They will speak, I am just recording it. Now you see for self if it's true or not. What does that mean? Left Heart means there's a problem on the heart: may be, the person is over hard working, he has forgotten about his Spirit. The mantra you have to say is: `I am the Spirit,' for left Heart.

It's so simple. Because you have forgotten about your Spirit, you are more on the right side in the sense, you

are more extra, you are an extravert and more attention is outside, not towards your Spirit.

Left Heart is catching.

You start understanding Sahaja Yoga so well when your vibrations are steady. Now this finger, this is catching [left thumb]. Now this is catching means *[UNCLEAR* ghe] person has been to somebody who is unauthorized in spiritual life. Anything, say ISP, you call it IST. Then you have got parapsychology, even psychology. Then you have got other things like all these Gurus, false Gurus, you can say this aura business, what else is there, just now he was telling.

Sahaja Yogini: Supernatural, Mother.

Shri Mataji: Supernatural and under-natural and [big laugh]. All these things, you know, all alternatives you can think of. Anything you can think of, all these things and the books and the Lamas and the Dhamas and every thing. [Laughs.] Even people who go, sort of adhere to a church too much, or adhere to Catholicism again. Because they are not connected with God and they are unauthorized. [Shows Her left palm.] But if you have been to a real Guru, then immediately I will know.

Contents: 1982-08-18 **Guru Pūjā, Guru Tattwa, Brompton Square, London, UK**

You see... ah people who have very wrong ideas in Sahaja Yoga that, “We are people who are higher, we are higher people and we should try to control the lower people." And the lower people have even worst ideas because they think that, “These people are trying to boss us, are trying to control us and trying to tell us and they

are sort of taking away our freedom to do things ourselves and they are impressing upon us." You see this is the thing and this is a very important principle of Guru Tattwa is, very important.

Because in Guru Tattwa is a ten petal thing and inside is the Nābhī Chakra, you see, the ten petals are, they're to be balanced. There has to be a complete balance so that they go through the Nābhī Chakra upwards. If there is no balance, Nābhī Chakra gets closed. And this is the thing people don't understand that nobody is higher and lower as such. That's that way.

Only thing that they're all part and parcel of the same, if there is an imbalance on one side, then it has to be raised. If there is an imbalance on one side, the other side is affected in any case.

So those who are creating imbalances should not feel that in any way they are dominated or anything, on the contrary they are lowering or tilting the other side.

So one has to balance, it's one thing, so there cannot be anything higher or lower, you understand My point here? If it is a one thing, supposing that tilts like that, so we can't say, “This is lower, this is higher." No. It is the same thing because it is tilting like that, you see.

This may look little gone up because they get tensed up, these people who are at this level, higher level and the others feel that we are put down. Once we understand we are all one and the same, then there will not be this feeling of somebody trying to be higher or not.

But those people who are at a higher level even they are pushed down by the people who are at a lower level, so-called. It is not a lower level at all as I told: it's one part

of the whole thing, you see. It's a round circle and one part of the circle goes down, say for example, or one side of the circle goes down possibly, anything can happen. Then the other side becomes upset and becomes more aggressive, this way or that way. It may try to run away from them or it may try to dominate them because they get affected, it's natural.

So there should be an attitude that those who are controlling, should try to pacify others, to sometimes tell them firmly, but they should keep their own balance. If they keep their own balance, the other side cannot push them too low, you understand My point? Because they can't keep their own dignity and can't keep their ego intact, they go off.

It is one thing, it's not separate. There is no entity separate now, is one entity in collective consciousness.

So this is why I say, “Nothing is lower or higher, you keep to your own position." That's very important: not to be aggressed, nor to aggress. That's how you will also make them steady. Did you follow this point? But what I find that, if somebody does anything wrong, all the rest, those who are all right, maybe better or maybe in charge or whatever it is, try to behave in a very tense manner. They just, they're no more normal and they try to dominate that person. Leave him alone for a while. It will work out.

Say a position comes up, simple positions come up. Say somebody is very materialistic, very materialistic person. Still there is a matter attached to him; there's hang-ups and he's still pulled down, still like that, something he's doing wrong. Now those people, who understand he's

done a wrong thing, should see it, watch it and put their attention steady. By putting their attention itself steady, they'll bring up the fellow you see, because the fellow is going down no doubt, because of the pull on him. Now when he is materialistic, how should we approach a person who is materialistic? Sahaja Yogi [answers]: We keep ourselves *[UNCLEAR* in the Spirit].

Shri Mataji: Yes, but how to? Say you are living with a person who is very materialistic? Sahaja Yogi [answers]: Allow them to stay with their possessions a while and see that not everything he needs, other things are more important than his materials. Allow him his own time to see that.

Shri Mataji: No, best thing is, when he is materialistic and the balance is going down because of the material things that he has around and he thinks that material things are good and live with the material things, then what you should do is to give away something that you have precious with him, to give to him. And then he'll be so shocked, “How could you give that way." You see, that's how. You just so shock that person by giving the most precious thing that you have. Then the person is shocked. Or give away something that he says, “I like it." “All right, have it." I do that many a times. Just shock the person, shock. “God no, how did give away the most precious thing that she has" or “The thing that I liked she just gave up." And then they ask you a question, “How could you do it?" She said, “I enjoy my generosity." Then they feel that this is something wrong. These are the subtle ways.

In everything if you study the reactions of a person you can make it out how he is in the Spirit, in everything. Say a person, two persons go somewhere and you see a girl who is overattractive or something and one starts looking at her all the time, this is another weakness some people have. Now how do you come over it, how do you balance it? Let's have, practical side is there. This Sahaja Yoga is very practical. Mine is all spontaneous reactions, immediately I vomit or I, you can act as vomiting if you can't. Immediately I vomit and the person will ask, “Why?" So I would say, “I can't bear the insult of the chastity of the lady." That means what have I done in all these things? I have brought it upon Myself the whole thing, not on the other person: that is Nirmalā Vidyā. You see, My everyday life, if you get with Me, you will learn how I react, to anything and how it helps to neutralise the problem. It's very deep knowledge. But I don't know if you study My behaviour to different things, how I react.

Sometimes it will be strong shock, sometimes it will be mild, sometimes it will be loving, sometimes... It's all, you see it is, Nirmalā Vidyā is a mobile reaction [Aside:] Not now if you don't mind.

Is a very, very subtle understanding of human nature is.

Sometimes you have to be neglect a person, sometimes you have to... it's a thing you must learn through your Sahaja Yoga method. And when the Guru Tattwa is really developed inside yourself, it automatically goes. But everywhere you must remember that it is your power which is going to work it out, not the power of another person. This is a basic thing which Sahaja Yogis miss.

Now we are organizing an Ashram, say for example. And one gentleman comes and says that, “I will stay in this room. I want to have this, I want to have that." How will you arrange that? You have not thought from that angle you know, that's right. Now what we will do, supposing such a situation comes *[UNCLEAR* in/up]. Then what you have to do? “All right, you want to have, have it. You have my bed, you have everything. All right, you want to have your cooking arrangement? Will get you this, will get you that." Make him into an idiot. But you have to sacrifice it there. If you are yourself an idiot, you cannot make another an idiot. Let him look like an idiot in his own eyes. Also like some sort of an absurd thing which is, say, you can give him, say, some sort of an absurd thing which normal he doesn't use, something like that you see. For example, a person who's demanding too much and this, that, you can say, “All right. You can even have a *[UNCLEAR* rake/rag]." So he may say, “Why *[UNCLEAR* rake/rag]?" “Oh if you want to have a *[UNCLEAR* a lump] in your room?" I don't know what you can... They're idiotic people. You see, these ego-oriented can go to the idiotic level and if you show them what *[UNCLEAR* turn their heading for], that the idiocy is ahead of you see, all your ego so-called, then they *[UNCLEAR]*.

But in all this you have to show one thing very clearly, is concern, concern, trust, dependence. You have to admit that, `We can't do it without you. You are in the picture. Now we have to look after.

You have to do it. It's our job.' It's more a maternal and a paternal feeling. It's a sort of a patronizing feeling. We should not be shown as a *[UNCLEAR* parancy as they

show/parent-ship/a stay show] but the wantedness that, `We want you. We can't do without you.' Sometimes it may act as an ego. Then you should just show, `I have nothing to do. We have nothing to do with you. Get out. We have nothing to do. Get out of our benevolence.' But once in a while you do that it's good.

It's a style of Sahaja Yoga is, but Mine is so spontaneous I don't have to think about it because that's My style only. But you can understand it and gradually when you start growing in your understanding, the concern, you see, *[UNCLEAR* the trouble] is the concern, too much feeling that, “Oh God, this man is going to be lost." Then you immediately know how to do it.

Somebody is drowning; you know he's getting drowned. You have to save that, your part and parcel of your being is getting drowned. Then you will know how to save him. You will know. That's within you built in; all Nirmalā Vidyā is built in within you today *[UNCLEAR* could be, it/and] should be enlightened.

And the first and the last resort is *[UNCLEAR* what? Is] asking your Mother *[UNCLEAR]*. If with pure heart and concern if you ask it.

So far people have been only asking about themselves, but I know about the prayers people [UNCLEAR.../are speaking] all their wife, husband, children this, that nothing more. But asking for others I seldom hear in the prayers. You see that concern itself makes you a great person. And then if you scold somebody, nobody minds because they know that you are doing for their good. They like it. This is the sign of a good Guru. Try to put your attention to others than to yourself.

Now you are collectively conscious. You are only feeling their Chakras, but are you becoming themselves? America is a very difficult place I must tell you. People are extremely selfish, self-centered and the biggest problem is that to them nothing is important they're the most important things, you see, very high handed, very high handed. They never think everybody else has got any brains but the Americans you see, they're the wisest. It's very difficult. While British you see, because of traditional life and they have been beaten up so many times now they have learnt a lesson. Americans have [UNCLEAR…/doing it], say in Vietnam, in Korea and all that, but still they're stupid people I tell you. They don't learn much from that, you see. Now imagine Vietnam? What's, what a chaos it has been! Look at themselves in their own country. I mean it's all right to say, “Russia is like that." But you don't say against Russia and America. Russia is definitely a peaceful country, absolutely a peaceful and no doubt about it. Whether it fear or whatever it is. There's no violence. You don't have to look after your purse all the time, nothing is lost anywhere you; People are very generous, giving type, you see. Material wealth is now becoming less important.

So many people told Me in Russia that they want their *[UNCLEAR* seekers] their spirit, so many. They wanted to go to India, that's their dream one day. They think India is heaven; they don't know all the bhoots that co exist there. Now just see all the bhoots from India and the Rākshasas have gone and settled in America because atmosphere is so congenial.

Yesterday that *[UNCLEAR* Monoray Tchahora] told Me that they are: this Rajneesh is making a bigger money [UNCLEAR.../there] than he was making in India. Muktannanda has prospered so much, he has so much money there, doesn't want to come back. Everybody has got so much money and I can't go to America because I don't have sufficient funds, can you imagine. How *[UNCLEAR* stupid they are!/so is there?] They cannot differentiate between good and bad. They cannot differentiate between God and the devil. Idiotic I should say, to that extent.

So they're very difficult people but they are great saints on them though they have become stupid I think cursed somehow or other. I have such concern because first country I visited was America. I was very careful in talking to them but all the time they are talking about dollars, dollars, dollars and I thought I've completely failed. And all those people whom I gave Realisation, only one person among all of them, at least I have given Realisation to three thousands people in California, one person *[UNCLEAR* returned/turned] back. He was no good, all left Swādhiṣhṭhāna problems, here to there, all caught up. Now our idea should be if we can save them well and good, if not forget it. It's really reaching that stage of exhaustion. I'll try one trip next year. Let's see how they work out. I'd sent one gentleman there a good Guru. I told him I sent word to him that he go there, he ran away.

Third day he was out of New York. He said, “They cannot understand God. They cannot. They have no *[UNCLEAR* Vidyās] that's not in their culture to understand. They

cannot understand. They can only understand a Satan." They said, “You must get money, what's it, you have no money, this thing." They are impressed by people like this fat fellow who has fifty-year-old Rolls-Royce.

And freedom means abandonment to them. They don't know what real freedom is. It's a very serious thing because I'm working on America all the time so just don't get desperate about it. Thing may work out at its own time.

So next year I'll be there and we'll organize the whole program. I think they are not yet *[UNCLEAR]* still prepared. I could have gone much earlier. I went first time there. I could have gone second year again but My experiences were so shocking. I said, “They're absolutely on the other side of the world I tell you. They have to come up a lot. They've gone too far with their atmosphere. They have to come back, to come to the center. Too far and they've lost." They don't understand that with their ego has just blasted.

So I don't blame you for that in *[UNCLEAR* any way, your also Guru principle] but you have to be a little formal with them, I think and try to see how many you can get. There's nothing to worry about them but I think now you will meet.

Sahaja Yogi: Is there hope for Canada? Is it hope for Canada?

Shri Mataji: Yes Canada would be better. Canada because they're are agriculturists, you see agriculturists are always better. Much better people than others, you see these technocrats and these machine people. You see if you are all the time touching the machine, you see, you

also become like a machine, you see. The person, who gives you the machine lives like the machine. Starts up like this, opens his briefcase like that, walks up like that, it's a machine like.

So it is true that Canada will be better and maybe that from Canada it will come. Maybe it will come from South of Boston. Boston was a good reaction. Boston is better. There again are people living with nature. Here you see there is the whole of New York you won't find any ground anywhere you, the roads are all covered, everything is covered with cement. New York is the most difficult place. And also because you are so close to New York and with that young *[UNCLEAR* age/haste] that you have around there are people who think “Oh this is the time to, sort of be enjoying yourself, you see, *[UNCLEAR* douching] this, that." They have no time for God.

Sahaja Yogi: *[UNCLEAR* It's conditioned into them at that age to go out and ruin themselves].

Shri Mataji: So they lack that maturity but they'll come back for sure.

Another Sahaja Yogi: I was born in New York and so I always had, *[UNCLEAR* this city] it's been part of me. I always had this tremendous feeling that New York is such a center of; in a way you can say there is a negative in the sense of money, culture and all the artificial things that if it were only cracked it's such a center that it would change a lot, it would change. I mean, New York must be very important to try and keep on working on it.

Shri Mataji: *[UNCLEAR]* is important no doubt. I mean, imagine it is the Viśhuddhi Chakra center, the center of the Viśhuddhi Chakra. It is important no doubt but what

to do? Such a Viśhuddhi, such a Viśhuddhi hard nut, I have to crack it. I must get the map of America, New York just to crack it.

Viśhuddhi you see, all other centers you can raise Kuṇḍalinī but at Viśhuddhi, what you have to do is a strong action because the ego starts from there, the superego starts from there. It's the starting point.

That chanting Śhrī Kṛiṣhṇa's *[UNCLEAR* existing] in New York you find so many of Hari Rāma, Hari Kṛiṣhṇa. Every corner you find them. That's the Viśhuddhi.

Sahaja Yogi: They all shout Hari Rāma Hari Kṛiṣhṇa. They just come to you and give you flowers and ask you for donations. *[UNCLEAR]*.

Shri Mataji: Now they've become, that is, they've become beggars, imagine. Will you contact and tell them that, “Now your Guru is dead. He has given you nothing except for begging." Somebody can talk to them. He has saved some people from Hari Rāma, Hari Kṛiṣhṇa now. We can send him to New York sometimes, [UNCLEAR.../get all]. Here also you can contact these people *[UNCLEAR* you should same thing/...] nothing of yours, “You are just like beggars on the street. We are doing God's work. Why don't you join us?" Their ego is on top a tremendous type because this fellow has told them that, “You have to be austere, you have to not do this, you have to be vegetarians” `vegetarians' means horrible. Of course the vegetarianism is good for people who have eaten too much of non-veg also, you see, because Americans, if they become vegetarians, it should be good because they are so violent; it may help them.

But Indians it's better to be non vegetarians. But for Americans maybe it may suit them a little more of vegetable eating because they are very dried people and they're heated up, very violent, angry type.

So it may suit them a little bit, *[UNCLEAR* they have] more vegetables and less of meats. May suit as I said but it's not a thing that can be a religion.

Sahaja Yogi: Usually they become fanatical about their diets.

Shri Mataji: Diets, anything you see, human beings are such, somehow or other they get stuck-up.

You give them anything, they will become fanatical. Even Sahaja Yoga they can become fanatical. Then now what can we give them? I mean just think of it, this is the limit. Even about Sahaja Yoga how can you be fanatical? It kills all fanaticisms. Fanaticism means an obsession, when you are not in power.

Whatever you get attached to, gets on top of you, you see. Now in Sahaja Yoga you are in power. Sahaja Yoga you are handling. You are the one handling Sahaja Yoga. Who are Sahaja Yoga? It never sits on everybody's head, can it? It teaches you how to love, how to give. How can it sit on anybody's head? How can it be fanatical? Somebody, say for example drinks, who comes the other day, the fellow was asking. Then they said that, “If you drink then you cannot become established." Is all right, that's not fanaticism. “But because you drink you get out of this place, you have nothing to do, we cannot give you Realisation." This is not the way Sahaja Yoga is. It's a loving thing. It's love. “All right you drink, come, Sahaja Yoga will help.

If you feel like drinking, you think of Mother, come to us at that time we'll talk to you, you'll forget it." All these things one can talk you see, to that person. But some people will just go and *[UNCLEAR* thrash/toss], “Oh you drink; you're no good this, that” that's not the way. But certain things when they play tricks, they might, then you *[UNCLEAR* thrash them] immediately. Your mind is playing trick and we have nothing to do with [UNCLEAR…/you, get out].

Like I told yesterday somebody from Switzerland, I told Warren, he wouldn't listen to Me. In the beginning he brought his wife here, I told him and I told him very clearly, till we went up to California where she tortured My life, she tortured Me throughout, he would not listen. In a way he was very good but he would said, “Mother, let it be now, you see I've married her, this, that." But as soon as he has left, left America she got her epilepsy and then it came to *[UNCLEAR]*. Otherwise he would not listen to Me and was siding with her “Oh she is my wife and I have married her, this and that." But I said, “But what about Sahaja Yoga?" So fanaticism aggresses others through their attachment to a thing. This is no aggression; this is just civilly, “Get out; we have nothing to do with you." There is no more connection left to aggress or anything.

This is what one should understand that in Sahaja Yoga there is no intention of having any relationship with a person who is not with us.

So to come to the point is that we are not interested in aggressing anyone. Fanaticism aggresses.

Anybody who crosses the limit, we do not have anything to do with that person. We ask him to get out because we are not interested in any aggression. That's not fanaticism. Fanaticism will aggress; he'll always have interest of aggression.

So in Sahaja Yoga you go to a point to see that the person remains with Sahaja Yoga otherwise you have no interest, finished, that person is dead now, is no more living in Sahaja Yoga finished. We have nothing to do, where're not interested. You see the difference? And this is what Sahaja Yogi's don't understand. When I tell somebody that, “Forget that person for the time being, they have nothing to do with it." Just don't talk of their future, what will happen, how they will come back have nothing to do with that. “Get out, we have no interest." Then out of those who get out of it, they going far away from Sahaja Yoga realise themselves, not all, some, then again they come back. When they come back they accept it. You see we have no interest. Aggressive person always has an interest in aggression.

So he won't allow the mouse to run away, the cat won't allow. Cat will always have an interest. As far as the cat is alive, it will be having interest but not Sahaja Yoga. “Doesn't matter get out; we have nothing to do because there is no interest." This several fanatics will do. Now this is the very fine difference one should understand. But I've seen people when I tell them off some people start sympathizing with them because still they want to aggress you see. The sympathy, behind it, is a camouflage of aggression. Then they can still say that, “You are very bad. You are wrong. You are doing like this.

You should not." I've seen people sympathizing with them, I've seen. By that sympathy they ruin that another person because that person doesn't improve in any way. When I've said that, “Forget it” that means, now let that person go. There's another kind of a treatment it requires, let him go away. I've seen people sympathizing. They'll go and talk to another person, say, “Oh this has happened, that happened." And the sympathy starts working. And when the sympathy starts working, that person, “Ah I've played the trick again, very nice, this, that." Is to be understood very well that you have not sympathized with the person but you have really ruined the chances of the person [UNCLEAR…/very much]. The idea of punishment comes from that, in our loss, punishment, jailing, all this is an expression from the same Sahaja Yoga Chitta.

So this is what it is. One should understand that our human ideas are very different from that of God.

He destroys; actually He cuts them off, nothing, wrathful God. He's wrathful. That is for the good of the whole that He does it. But there is no aggression. He doesn't all the time, “Oh you are like this, you are like that, I will help you, I will do." This is not there. “Get out I've nothing to do *[UNCLEAR* with you]." You see the clear-cut point? If you understand this, then you'll not have sympathies with such people, at all, sympathies.

In Sahaja Yoga, either you are here, or not there. Nobody is interested in you if you are going to behave like this. You have to change. For any relationship it is true, then it will work out. The love itself does that. You see, like animals you see, when say a mother is there, mother

monkey's there and a child monkey's there. When the child is sick, then she'll be crying, weeping, shouting. She'll ask help from everyone to help that child. But when he dies, she throws away. The moment she finds it's dead, “Finished, now I have nothing to do." It's like that.

When you find the person has lost Spirit, finished. If it could be revived, by any chance, it's all right.

But it is so.

So if you understand this natural way of life, as the monkey does, you won't be fanatic by any chance, all right? You follow the point here? Now if you have any questions, you ask Me.

Sahaja Yogi: If we come across a Sahaja Yogi who has become fanatical, we try to point out this fact to him or immediately cut the ties as You said?

Shri Mataji: You'd better ask them to listen to this tape. They wouldn't mind it from Me. If there's any problem, use Me, My tapes, all right? If they say, you just say that, `This is what we feel, we are sorry, we have not interest anymore in you so you please go away. We don't want to insult you or anything you go away now. We have nothing to do. Just go away, please.'

Sahaja Yogi: We allow him the time to change or we just completely cut?

Shri Mataji: You see you will immediately know when he tries to play tricks with you. It will be found out. Then you should say, `You go away.' Immediately you'll find out how that person is trying to play tricks with you. Then you just say, `Please go away. We have nothing more.

You see, we cannot do any more with you.' Finished, just cut. You see like this hand till it works all right; when it is dead you have to cut it off if you have to exist.

Contents: 1982-08-22 **Śhrī Gaṇeśha Pūjā, Troinex, Switzerland**

First I would like to tell you about the meaning of Pūjā. There are two aspects. One is the aspect that you have got your own Deities within you inside. And these Deities are to be awakened within you. Deities are the different aspects of one God.

So, on one side you have the Deities, is the aspects of God, which are all the time awakened. On the other side you have your own Deities, which are sometimes awakened, sometimes half awakened, sometimes sleeping and sometimes sick. [Laughter.] So, you have to use two methods, one to please the Deities of God and to ask them to bless your Deities or to ask them to awaken your Deities.

So, by doing the Pūjā, means when you offer anything that you have got to offer, anything that you offer is, say flowers, if you want to offer flower to God you don't have to speak anything, you have to just offer that, `This is for You.' Anybody can understand offering, means for that you don't have to have even a tongue. Even if a blind man is there, if he wants to give you something, he can just give you like this.

And that expression is sufficient for anybody to be convinced that he can offer it. You don't have to say anything about it.

So now, when you offer a flower to God, even if you don't say a mantra, it is offered, all right, it's given. But, whether it is accepted or not is a problem. But now, when you are a realised Soul and you offer anything, it is acceptable to God, even if you don't say anything.

But what about you, getting any reward out of it? After realisation when you offer anything to God He accepts, because it's coming from a realised Soul.

So He accepts.

Now, how do we get blessed by Him by giving a flower to God? Now, if you don't say anything about it, you just offer a flower, then you might be rewarded with many flowers automatically. Or you maybe, whatever material things you offer, you may be blessed materially. Then in a subtler way if you say something as you say for offering somebody that humble way of saying that, “I'll be happy if You would accept it” will be even subtler results of that maybe, which would be much wider, maybe much deeper.

Now, you do something symbolic which is very the essence, the principle of something, like flowers are the... they represent the principle of the Mother Earth. Now, so the symbolic-ism of all the things that we can offer to God has been meditated upon and has been found out.

So, they use five things, called as Pañchamṛuta, as we have here.

Because if you have hit the principle then you have really hit the whole. Because spiritual well-being is a total well-being. It's not just partly that your material well-being or your physical well-being, or your emotional well-being, or

your mental well-being, it's a total one, completely balanced into totality.

Now, when you offer these other things like the, you call them Akshadas [coloured raw rice], is the, what you call? *[UNCLEAR]* these. Turmeric, turmeric rice, you see, these yellow things, you see. When you offer these, you know, the yellow colour is that of the Swādhiṣhṭhāna Chakra. And rice is very dear to all the Gods. Now, there's a trick in it, because it's a human trick: Gods are fond of rice, so, they put turmeric on it, means that “We offer to You a rice which is yellow coloured” means “You should give us blessings of our creativity." When you eat it, more creativity will flow and we'll be blessed by that Deity.

It's a trick. The whole thing of Pūjā is a trick of human saints, you see, how to trick God to give more blessings. [Laughs.] But whatever God likes has to be auspicious and holy.

So, ultimately it works out for the holiness of saints and their simple hearts.

Now, the Pūjā cannot be done by a person who is not a realised Soul. A person who preaches also has to be a realised Soul, the one who does Namas [salutations] has to be a realised Soul, the one who prays has to be a realised Soul.

So, all the utensils that are used are to be worshipped in a way that they are to be holy things. They are to be respected things. You cannot use anything, say the one you are using in the bathroom and you use the same thing for the Pūjā, is absurd.

Three things are very important, is a ghata [water pot]. Ghata, means the vessel, within us to get to God, is first

to be worshipped, our desire. Is the Vata, is the one made here and on top is called as a Shrīphala [coconut]. Shrīphala means this also has got water in it, you see this coconut, this represents the coconut, represents the same thing. Now, in a subtler form it is the water of all the rivers of the world, rivers. And the coconut is the water of all the oceans. The water from the ocean or sea rises to the tree's trunk of the coconut and becomes the sweet water in the coconut. It's a symbolic thing.

So this is the vessel called Ghata-Pūjā, this is the Ghata-Pūjā.

Now, I don't want to go into details today, because we have to talk about Gaṇeśha.

The same is, now that is water, all right? Then we have to worship Ghanta [bell] and Śhankha [or zagkha, conch, shell], these are two representing the sound.

[Repeats it for the French translator who did not understand:] shell. Actually the Śhankha represents the ether. Then we have the Dīpa, means what? It's the light, represents the light element, called as tejas [ame].

Normally also, to the Goddess, they also give Her a fan, which represents the air element.

So, this is how all the five elements are pleased beforehand using them.

So, the essences of these, the causal essences of these five elements should be pleased at this time, to be supporting the Pūjā.

Now, there are also all kinds of other things like your family deities, you might be worshipping in your family some deities. They should not be also at this time

upsetting the Pūjā or maybe the forefathers who are dead. All these things are to be quietened, so that they should be told that: `This is a Pūjā like this and you do not disturb us at this time.' Means, even thoughts should not come, yet thoughts, or there any disturbances.

So, everything is to be first made into peace. Now, this is the one aspect I have told you in short, because it's a very long thing, if I have to speak about it I will have to speak at least three times, three hours in time, still it may not be finished.

Now, we come to the second aspect which question I asked you “What do you... How do you get benefited by Pūjā?" So, apart from this technique to have the best effect of the blessings or the best flow of the Grace within us, we say Mantras. The sound of Mantras, the sound, the sound echoes into the being of God. And they are re-echoed on our Chakras and then the Chakras start opening more.

So, the flow of the Grace of God is received.

But only a realised Soul should chant a Mantra. Because without connection, how will it reach God? It is a vicious circle. Now, one may say that, “Mother, you cannot get realisation unless and until you get the Grace of God. And the Chakras won't open by a person who is not a realised Soul. And without opening the Chakras you cannot get realisation." That's how the play of the Mother comes in and of all the saints like you. I would say the Sahaja Yogis have to break this vicious circle. You are to raise the Kuṇḍalinī yourself.

Once you raise the Kuṇḍalinī, the Kuṇḍalinī opens the Chakras a little bit. Because you have given your vibrations to the Chakras.

So, once She knows there is a Sahaja Yogi standing behind the seeker, She rises *[UNCLEAR]*. She knows you are Her brothers and sisters. And that you belong to the same family as She does. She knows the land where She has to grow, you see, so She can feel that and then She rises in Her dignity. That's how She breaks this vicious circle.

That's why in the beginning we don't tell them about the Mantras. Because in the Mantras you have to accept Me as the Deity. In this Advent of Mine, it is made compulsory that you have to recognize Me.

Because this is very precarious, the resurrection time, you can call it, or the time of your Last Judgement.

First the realisation has to be given without any recognition. But not to those who are denying or insulting Me. Under any circumstances they cannot get realisation, whatever you may try. Even after realisation, if people start thinking against Me vibrations will stop. Because of Sahasrāra. And the heart has to be completely in unison with Me, otherwise Sahasrāra is closed.

Now, those people who are simple, who are full of open heart, you see, such people understand Me very well and they just put Me in their hearts. After realisation, after going through the understanding of Sahaja Yoga through their mental activity, also the intellectuals understand Me and recognize Me in a little certain way.

After the Pūjā, when they receive the blessings in a very blissful state they achieve, then they realise the value of

Pūjā also, afterwards. Now, in India, where the Pūjā system has been traditionally coming and has been maintained quite a lot, they understand it without any mental process. But when they meet somebody, an intellectual, who has become a Sahaja Yogi, you see, they can't understand them. They don't want to listen about it, the whole rhythm or the whole movement of the brain. And some of them who try, you see, little westernized, they try, you see, they develop an inferiority complex. And they go to the left side. But there is no need to understand it with mental, I mean, to all the time analyze it through your mental process and then to understand everything and then become Sahaja Yogis with the heart open, it's rather very circuitous. But what to do? They have gone that way, they have to come that way. Because, even if they become Sahaja Yogis they start questioning and thinking about it and worrying about it.

So, the false people just mesmerize them and take advantage of that mesmerism.

So, one should not feel bad, if you have, if you feel like analyzing, you should go ahead with it, because I cannot stop your speed, I'm not going to mesmerize. In Sahaja Yoga the freedom is to be respected. But we do not allow people to come for Pūjā who have not achieved a certain amount of understanding, mentally, of Sahaja Yoga, from the Western people, not in India. But here there is a restriction. Because supposing in India I'll do not explain to them, they don't want to know. They know that they'll get vibrations. They already know about vibrations, so I don't have to tell them, “You'll get more vibrations." If

they get more vibrations they know I am Ādi Shakti, that's all, I don't have to explain. Like as you can make out which is the best wine, they can make out who is the real person. They know the taste of it. Now, once in a Pūjā I had about 6,000 people that touched My feet.

So, I said, in a Pūjā now, please don't have... people need not touch My feet. I said it. But they thought it was Dhumal who suggested, so they all got after him trying, see *[UNCLEAR]*. They said, “You only want to take all the blessings from Mother's feet and you didn't want us to take it” and they got after him.

Another thing is, you see, I, in the West I never used to make the Pañchamṛuta with My Feet, but with My hands, because here people would think that there's a dirty thing, feet is and we should not have of the Feet, you see. But actually the Feet are very powerful and they can never be dirty.

Like the river Ganges has vibrations. If you have the water of Ganges you'll see that it will never be dirtied. On the contrary whatever are inside that, because it is never sort of very kept clean, whatever dirt has gone into it, settles down and doesn't dirty the thing at all. It's very clean water, all the time vibrating.

So, one must understand, whatever is pure, which is responsible for purity, which is the source of purity, can cleanse any impurity.

So how it can be impure? But with the brain if you're thinking, it's so limited.

You cannot think of something which is just the embodiment of purity.

This is the point we have come now, where I think I should talk about the Absolute. That is Śhrī Gaṇeśha. Today is His Pūjā. It's a very great thing that this Pūjā we are doing in Geneva in Switzerland.

Geneva is the right Heart, I think. The way it is against right Heart. [Laughter.] Everybody's life is a tragedy, like Rāma... *[UNCLEAR]*. And that is why it is very important that Śhrī Gaṇeśha should be worshipped here.

Now, Śhrī Gaṇeśha as you know, is the embodiment of innocence. Now, Gaṇeśha's colour is red or orangish. Because the child, when it is conceived as a foetus, the first colour it sees is orange, of the red one of the mother's womb, of the blood. In Sahaja Yoga, now you must have learned that every action has a reaction, which acts. The colour of the original, we can say, the primordial Gaṇeśha is just of the clay, because He is made out of Mother Earth. Now, when the Gaurī, the Mother of Gaṇeśha created Him to protect Her chastity, means while She was having Her bath, She coloured Him red, because everybody could see that there's somebody sitting there to protect Her.

So when you see the red colour around you as the foetus, then you absorb that colour and your Gaṇeśha gets coloured with the red in the same beautiful manner. Just it has a reaction of that getting red and it acts, means red colour of a Gaṇeśha, the one who has a red colour of a Gaṇeśha, frightens others. They know there is Gaṇeśha sitting there, a pure, changed personality with all the fieriness of the Gaṇeśha is there.

Now, this Gaṇeśha when He is in a childhood, as you see, when the child is born, the children are extremely

protective or fiery, you can say, about anybody touching their innocence.

When they are absolutely young they are not even aware of it. But slightly, as soon as they start growing, they become very aware and they don't like their clothes to be taken out in the presence of others, they become very shy of their innocence. I mean, not shy. Shyness is not... in the sense *[UNCLEAR* innocence] of their nudity, very shy of their nudity, so that their innocence should not be attacked.

If their innocence is not attacked and if they are pure, if they see a nude woman they'll close their eyes, they would not like to see a nude woman, or a nude man.

So, this is an innate understanding, an intuitive understanding that it is important that they must preserve their innocence.

Now, what is the innocence within us? What does it do to us? As it is, already I've told you that it gives us wisdom. All kinds of stupidity we do with our ego as I was describing the president [Ronald Reagan] and so many others at that age and at that height of their positions. It is because the Gaṇeśha is missing completely.

We went to Brighton and they have a sort of a beach where you can do nude things and My maid, she is innocent, you see, we went there and she couldn't understand, you see, she asked Me: “Why are they doing it?" But as you will find that in the West it's hard to find a really a wise person. You can say that people are overeducated and they are very well equipped with other understanding of the material side of life and all that, but as far as the wisdom is concerned one can get shocked

the way they are, I mean, just can't understand, what's the wisdom behind it? Because all their wisdom has become nothing but sex. They always think of sex and they always want to understand all the nonsense of the sex. If you start thinking about your sex, naturally your innocence will be destroyed right there. Because you cannot use your intelligence for sex. I don't understand the wisdom how you can rationalise sex. This is such a spontaneous thing. And by thinking about it, are you going to enjoy it? How can you? It would be like saying that we can transform a flower into a fruit by thinking. And the more serious thing is this way that supposing you say I can, of course you can never think like, I hope so that you can transform a flower into a fruit. I hope so.

But some people can think that I can shift, say for example, this thing from here to here with my mind, I can shift it. Or materialise things.

So, you know that you can do it, you believe that you can do it, because some people have done it, but as Sahaja Yogis you know it is done by bhoots, by dead spirits, they do it for you. Because they are busy bodies trying to help you.

Now, same thing happens as far as sex is concerned. When you want to have sex through your intellectual pursuits, you get only the bhoots to do that for you. Because when you project too much of your mind, then it goes into areas where you catch them. And they are sometimes very sly, sometimes depraved, sometimes aggressive, all kinds of things you gather and the result is that the sex becomes a nonsense.

So many depraved people are satisfied once they attack you and you have either a very excited sex that even if you rape a hundred women you are not satisfied or you'll have an impotency of the worst type.

So, I mean, you are always left dissatisfied. All such people, when they die, they also become the same bhoots, waiting for some sex fellow to come around and jump on him.

Innocent persons also may not have any sex activities for many years, even after marriage, because they are so innocent. It could be so, also with very childlike people.

But here it's a science which is taught from childhood, just imagine. What is the need? Do the animals have to learn anything from childhood about sex, they produce children.

So, the asceticism is not what I am teaching.

First, the innocence is protective and red, taking the age of at the most fifteen years. Then gradually, if the person is properly matured, not the stupid people, but who are maturing properly after 15, it starts becoming orange, it becomes orange. Means, when you get married this process of this redness goes away and it becomes, starts becoming orange. Means, [the] protection part is over. Means, before marriage the virginity has to be preserved, till you meet the person with whom you are to be married. That redness is the protection of that virginity. Then, when you are married, the protection part of it is not needed. But it has to be only towards one person, that's your husband or wife.

Then the proper maturity takes place and by the time you are about fifty years of age, it becomes orange,

means there's detachment. You don't feel like having any more sex life. There is no need also. And then you develop a, what you call, a proper matured innocence which can be compared with a properly baked earthenware.

So, old age is the really the golden age where a person has that wisdom shining through the complete behaviour of that person. But why, again, why to have this maturity, why to have this innocence again, because you are rational people, so one can ask the question: why? Innocence is the way you really give fun to others, create the fun part of it. The fun is created only through innocence. And innocence is the only way you can really emit also the fun.

Imagine this world without any fun, what would happen? But people are very much confused with the fun and the pleasures. The pleasure is nice to begin with and horrible to end with, but fun is a treasure.

Anything that is full of fun you remember all your life, you can tell others, it's such an embodiment of fun-creation.

Can you imagine this French language is diplomatic! No word for fun! [Laughter.] Sahaja Yogini translating into Italian: Amusement.

Sahaja Yogini translating into French: Amusement, but it is not as strong as `fun'.

Shri Mataji: Fun is so sweet! Sahaja Yogini translating into French: Fun is strong, yes.

Shri Mataji: Strong and so beautiful.

Like I'll give you a simple example how these children create fun out of something. They make everything into a fun, you see. And now, you see, even when they speak or they say things also they create such a fun out of it.

The other day My youngest grandchild, that's Anupama, she's hardly now six years, was playing and she went up to the top of the house somewhere and then we heard a big thud, you see.

And My daughter, she is a very frantic mother Sahaja Yogini translating towards French: Apprehensive.

Shri Mataji: Fun, eh? Always worried about her children's well-being. And she couldn't even walk, here, you see, her legs became heavy with worry and she was walking to find out what's coming down now.

So, she shouted for the child and the child came running down, she was quite all right.

So, she shouted at her: “What happened? Where did you go? Why did you go up?" She just started shouting at her.

So this child looked at her quite puzzled and she waited for her to stop her shouting.

[Laughter.] And she said, very quietly: “I've not come all the way from Riyadh here to die." [Laughter.] So, there are so many things which you write it down, it's all fun and natural fun that they have out of everything. You see, we can have now here all the children who are here, there are so many things, you can write them down how beautiful things they are doing and how there is a twinkle of a mischief in their eyes. That they want to create a fun out of everything. [Laughter.] Fun is joy-giving, it gives you joy. It's not just sort of a cock-singing, any way, or

bird-singing, any way, or anything sadistic in it, but is just blossoming.

[To the translator:] OK, they understand fun.

Gregoire: [asks to stop translating because it is taking a long time].

Shri Mataji: OK for you? Because I'm coming to an end, Gregoire, I'll finish at 12:30, let's do it today. But next time I think is a better idea to translate it later. Just little bit I'll translate more, because we are coming to an end and I know it's taken so much time, it was, it would be one third of the time.

Yes, just started this part, what I've said is, that fun is nothing but blossoming. It doesn't tease anyone, it doesn't hurt anyone, doesn't trouble anyone, but just blossoms, the whole thing, into fragrance. It's a Divine's trick. It has something higher than that also, that if you are innocent, you really can feel the joy.

So, an innocent person can feel the joy of something which a very serious and a very rational person may never feel. An innocent person may laugh loudly at a thing to other people it may not be something funny.

So, the fun-creation is not a dubious thing, it's a very straightforward, simple, a spontaneous blossoming.

Now, in Geneva, people are really very serious about everything. More so in Switzerland.

So much so that they commit suicide as a result. Because you are money-oriented and you are also, sort of a, take up a role of helping the whole world. Means, you are very ego-oriented, because you want to help the whole world.

Who are you to help it? And thirdly, you have a stupid military here, which is not needed.

[Laughter.]

Sahaja Yogini: Mother, excuse me, you know that yesterday it was in the newspapers that there have been again a military airplane which crashed in Switzerland with two deaths... With Your photo next to it.

Shri Mataji: It's too much to blame Me. [Laughter.] Sahaja Yogi [far from the microphone]:... helicopter and new models of planes...

Translator: He says it was during a show where they wanted to show off all the military strength.

[Laughter.]

Shri Mataji: That's the fun. [Laughter.] That's the fun, you see? So, everybody is happy about it, you see, that this is the one how it is funny.

Now, to help the fun more, we have got Hanumāna. He is all the same. He helps the fun part of Śhrī Gaṇeśha. Like Gaṇeśha, who plays tricks of fun on the people who are left-sided, He plays these tricks on the right-sided people. Like there is a person who was crying too much, her husband is dead, now what to do, I'm finished, this thing, that thing, you see and suddenly she sees her husband walking in the room.

But this He only does to the people who are innocent. But to the cunning, He punishes. He'll go on pouring all kinds of miseries, one more that the other and He'll say: “Now cry more and cry more, you want to cry? All right, have it more and have it more." And Hanumāna, on His side, say for example when Lakshmana was sick and He had to get

some medicine from one big mountain, He brought the whole mountain, you see, because He said: “I have no time to find it, so better find it now” and brought the whole mountain.

He too is the same style, can be very, very destructive when it comes to egoistical people, like Rāvaṇa, whole Lanka He burnt.

If Gaṇeśha is painted red, He is painted orange. And as Gaṇeśha has to settle down permanently in one place, He uses Saint Michael to run up and down the left side, while Hanumāna can run up and down, He need not settle down at a place.

But though He is a settled Deity, Sthita, is the one who is to be settled, once He is settled, then He emits vibrations which go everywhere. He is the source of innocence. He is the source of the vibrations.

He is everything, in a way.

When He ascends here as Mahāgaṇeśha [touches back of head] in you and in God He descends as Gaṇeśha. From here, from the back [touches back of head].

[While Sahaja Yoginis translate, Shri Mataji speciffes:] Back Āgñyā.

So, when you think too much about sex, your eyes get ruined, because you are using Mahāgaṇeśha.

Your Mahāgaṇeśha is spoilt and your eyes start wobbling. The eyes lose innocence, purity. And they start absorbing all that is filthy. The eyes which are pure and innocent, give innocence to others. Not only that, but they are the eyes, are the eyes through which the Spirit looks out.

It has many combinations, which I have no time to tell you, but it's a very bad thing that people get those unclean eyes, the bhootish eyes and anybody who is bhootish around, you turn your eyes to that person. Because it's a play of the Satanic you're playing now, the negative. That is what we do when we do not place Gaṇeśha at right places. If we have to make Gaṇeśha reflected in our Mahāgaṇeśha stage at this point [back Āgñyā], we should try to keep our eyes very clean.

So that you keep the seat of Mahāgaṇeśha clean.

In the Pūjā of Śhrī Gaṇeśh you must bring the soft grass also, because Durva, He is fond of Durgā...

Durva, that's called as Durva, because the soft grass is soothing to the eyes. Not only that, but it gives you the green part of the Swādhiṣhṭhāna Chakra, which exists when you have not started about thinking, you have not started the thinking process. That suggests that part of Swādhiṣhṭhāna when you are not thinking. The green part of it, the lower part of Swādhiṣhṭhāna is green.

So the green is the one at which stage we have not become human beings, at that stage represents the green of Swādhiṣhṭhāna where it created the whole universe, everything, up to that it is green.

Then, when it starts creating the ego, it becomes yellow-coloured, where it uses the sun, the action part. Not uses the sun, but becomes active, representing the sun side.

So the green represents actually the part of Gaṇeśha, part of Gaṇeśha, in a way, because still then you are not thinking, you are at a level where you are close to the Mother Earth, you see. Is the Mother Earth's giving, you see, the sun part has not started when the green is there.

Because the Mother Earth gives this green, of course the sun makes it green, that's different point. But that you don't start doing it. When you start doing something yourself, at a human level, the whole thing becomes yellow.

So Swādhiṣhṭhāna has two sides: a physical and a mental side. The physical side is the green side and the mental side is the yellow side.

So now we are today here to worship Śhrī Gaṇeśh. Now I would like you to get some grass from the yard.

Some soft grass, because that is important for Him.

So you should put your eyes onto the greenery, to improve your Gaṇeśha. And when it is very warm, then you can also walk bare-feet on the greenery in the morning time, when there is dew on it.

Those who are very overactive, should take to vegetarian diet, will help them to become more towards the balanced side. Not as a fanaticism, but more on vegetables and eat animals which are very small ones, it's alright.

[Grass is brought to Shri Mataji.] But today I have not talked about His Vāhana and all that, because I've talked in other lectures. His Vāhana, His conveyance, I've not talked about it because I've talked about it in other lectures of Mine, about it.

[Shri Mataji looks carefully at the grass and chooses a blade out of it:] This is the best, if you can find it. Very thin. This kind. This is Durva. This one, it's alright. You can get more, yes. With this the water is sprinkled.

Those who have not washed My Feet, should wash My Feet today.

[To a Sahaja Yogi who brought some grass:] Oh, that's good, that's the thing. You got it exactly what I mean! Exactly! This is Durva, yes. But still some of them are hard, doesn't matter. But it is this kind, you see. They are round, with round blades. You can take out some of them? With round blades. Not the at, but the round.

Not with the edge, but the round ones. They are round, are they? Round, yes, that's it, that's it.

They are not round ones. The round ones, alright? They're all at. This one's round. Now this is at, too. I don't think you have here in this country. I think we should get *[UNCLEAR]*. This will do. You just tie them with a string, that's all, that will do, that is sufficient. Just to tie it up with some sort of a string. Just tie it up with a little string and use it for sprinkling water. They are called as `durvankura', means the... Ankura is the `tinglings, tinglings' *[UNCLEAR]* of that.

Sahaja Yogi: [says that in his country this grass is used to package Easter eggs for children.]

Shri Mataji: In this? Other

Sahaja Yogi: Also in England.

Shri Mataji: What do they do?

Sahaja Yogi: [says the grass is used to package Easter eggs for children.]

Shri Mataji: Just see.

[A child brings more grass.] Oh, that's correct. Yes. *[UNCLEAR]*. Good, thank you. Just tie it up, this one also. Good. Can you tie this with the string also. That's it.

Good. Ah, you got some more. [Ties the grass into a small bunch.] It's big. Better to have the bigger ones, because we haven't got much choice.

Those who have to wash Me... use it for sprinkling on My Feet. Those people who haven't washed My Feet should come forward.

Let her come, let her come. I'm so happy you could come! So nice to see you! Alright. Now come here. One should do the washing and somebody should start *[UNCLEAR* reading]. You can ask Me, yes, come along.

Good, good, good. Now this will be after the Pūjā, alright? So, all the four young children, where are they? Four. These have to wash Me first. Now. What about these four things I gave you? For the children. Alright, where have the children gone, four of them? Alright, we'll have these four. Come along.

Alright, now, come along. First of all the children should come and wash My Feet. Come along. First of all, all the children. Come along, come along. Hold on. Wash My Feet, put some water. I think, where is she? And also the yellow one you bring from there, one yellow one.

Rub it hard, rub it hard. Alright, have done the job. Now. May God bless you all. Good.

[Shri Mataji presents some scarfs to the children.] Hallo, this is for you! For doing the Pūjā, alright? *[UNCLEAR]* should be given dakshina, you see... Alright. According to the sizes I've given, to their age.

Now take out the thing. It is to be given to the people... after children they'll do it. They have to put it on their heads.

Something should be under My Feet, a towel, somebody should...

Somebody to wipe My Feet, can you? The other one, who doesn't have a camera. Come along. Come along. *[UNCLEAR]* just to wipe My Feet.

[One Sahaja Yogi recites a stotra. Shri Mataji explains:] Today cannot be Dwitya, has to be Chaturthi.

According to Indian..., you see, is Chaturthi, has to be. Or Chaturdashi, could be. When was this rakhi?

Sahaja Yogi: Seventeen, sixteen days ago.

Shri Mataji: Sixteen days ago, so it is after rakhi.

Sahaja Yogi: Two days after new moon.

Shri Mataji: That is, two days after new moon it is. It is, has to be Chaturdashi, fourth day, has to be in Indian time. Because Chaturthi is the day He is established, Gaṇeśha is established on this Chaturthi, because Indian, you see, is different, little bit particular. Must be starting now, about 12 o'clock, Chaturthi. Chaturthi.

So you need your translators. It's a Chaturthi, has to be. You see how it works out? Now, those who have not washed My Feet have to come. Now what you do is to take that thing now.

Use it for washing. [Shri Mataji tells people to rub the Feet hard.] [To a Sahaja Yogi:] Now you realise that by rubbing My Feet, you've got your vibrations more.

So rationally you understand. May God bless you.

Not to hold but to rub, more. Not to hold too much but to rub. Better now? Good.

Now he has to read about Gaṇeśha...

Your fingers should be rubbed, your fingers have to be rubbed, not Me. Alright. You are to rub your fingers, so that they become more sensitive. Alright? Come here, come. Read loudly. Loudly. Now. Listen to what he says, alright? Now, he's reading, listen to him.

[The Divine essence of the prayer is read: Let Your presence be awakened...] Shri Mataji [comments]: That means awakening of Christ within us. Awakening of Śhrī Gaṇeśha within us.

[To a person who has washed Her Feet:] Now enjoy *[UNCLEAR* yourself].

Now the flowers.

All the washing should be done first and then...

So, would you like to do of My feet or hands? Sahaja Yogis: Your feet.

Shri Mataji: Alright. Get somebody who is free. You come along. You can. Yes. Brilliant. You come along. These two can, you too, yes.

So what we can do this, we can work hard, because there has to be Swiss and she is German, so it will help both. You come this side. Alright? Now. You pour the water, you will be in charge of water. Now you'll do the rest, now tell her whatever is to be done. Yes, Pañchamṛuta.

[Two Sahaja Yoginis come to wash Her Feet. One small spoonful of water is put on Shri Mataji's hands.

She puts the drops into Her mouth and on Her Sahasrāra.] So your Mother doesn't feel thirsty. Alright. *[UNCLEAR]*.

First is the ghee... [Then the two Sahaja Yoginis rub the Amṛut elements on Shri Mataji's Feet.] Such vibrations...

her hands are shaking! Put it down. Her hands are shaking through vibrations! Just put it down. Such vibrations are there...

May God bless you. *[UNCLEAR]*. May God bless you.

Unmarried ladies. In Sahaja Yoga you hardly find them! We have seven I think. Three, four, five, six, seven. Good. Annie, come along, you aren't married. Or are you married? [Laughter.] You just have to start, that's all. Sit down. What you have to put is all this, you know that and...

Yes, no, Gaṇeśha? But you have to do the Havana later... you can do 108... or Devī's names. Devī's names you can read. What Gregoire has given you. Gaurī's names, yes. She's Gaurī, see, She's the One Virgin, is the Mother of Śhrī Gaṇeśh, so Her names can be read.

You can read the names of the Virgin that Gregoire has given you. In French, somebody and in English. Gregoire can do it.

Gregoire: I'll read in Latin and then I'll translate in English?

Shri Mataji: Yes.

[The Kyrie Eleison is read in Latin as well as the names in Latin of the Virgin Mary. The Sahaja Yogis reply “Ora pro nobis."] How many of you came? Unmarried ladies? How many were here? Seven.

So, can you bring those plants? Seven plants should be given to unmarried people. Seven plants, that we brought. Begonias.

Alright. I'll give them. Come along. You have to look after. Unmarried. They are eight, bring one more. They

are all coming from the heart, that is London! Bring one more. We have a lot more. I think there are two more are there? Two more? Two more, or three? Two. Bring two more. Two other, two virgins were here in the beginning. Who? Barbara and the other. Yes, your daughter, yes. They have the special day of the virgins.

Were there *[UNCLEAR]* who never married? Never married ladies? They are virgins too. They never married. Madeleine was married? How many more left? Three more. Alright, three more.

Sahaja Yogini: *[UNCLEAR]*.

Shri Mataji: But still you are a virgin. Virgin is a virgin and she must be respected, whatever may be the age, alright? Now there are two boys, three boys left, is it? Let them give, let them have the three boys, you see, they should not be left unhappy. That solves the problem. Shouldn't make them unhappy.

We have exactly three for the three boys. Come along, the boys. Were are they? That is their day.

Alright. May God bless you. Look after it. Alright? Now where are the other, other two boys? Matthew never came for the Pūjā. Here, but he didn't come at the time of washing. What was he doing? Where were you, Matthew, at the time... why didn't you come? You are a boy! For little boys, alright? Now this can go to Vincent, because the little are to look after the plants. You have to look after it immediately, I think. They are in a big mess. Where is he gone? Just call Vincent, that's all.

[The child takes the plant, the Sahaja Yogis around make admired comments about him.] And how seriously he lifts

his Kuṇḍalinī, you should see the way he lifts it and how he ties it, wonderful to see how he does it.

[A child takes some food and the adults react.] Nothing serious, nothing serious. Get him something to eat, now I have had, eaten something, now you can give to everyone, because for the children specially. Give it to children, the Prasad. I've taken the Prasad. Now what else? Now for the married ladies.

To the children, to the children, just to the children. Where are the other married ladies? Come along, all of you who are married. All the married ladies, come forward. Alright. Let's have it.

[The Sahaja Yoginis put the bangles on the wrists of Shri Mataji following Her instructions on the order to follow.] How they tingle a little? They create fun!

***Contents: 1982-08-23*, Public Program, Day 1, Temple Fusterie, Geneva, Switzerland**

[Introduction by Antoinette Wells.]

I bow to all the seekers of Truth. It is such a great fortune that I should be given this opportunity to face so many seekers of truth in this international city of Geneva. There has been never such a chance, such a great chance where you have seekers who are just trying to find out the truth, their Self-knowledge, their spirit and they are not satisfied with anything else. This seeking that has come today is so much exposed and manifesting. It is the work of thousands of years of the seers and prophets. In this materialistic advancement, when we have gone too far, the Tree of Life has grown too much and it must find its source sustaining us [itself].

With this background, we are here today to know about the truth that we have to find within ourselves.

All the scriptures, whether it is Bible, Koran, or any Indian scripture, even Lao Tze or if we go to Zen or Buddha, Mahāvīra, all of them have said that you are to be reborn. Those who have talked about the *[UNCLEAR* religion/reason] traditionally, I think in India people, have really worked very deeply, in a meditative way, to find out what are we to find.

The existence of this primordial power within ourselves called as Kuṇḍalinī in the triangular bone was known to ancient seers for thousands of years. [Americans too, partly Americans.] This is not a new knowledge which I am telling you about. You'd be surprised that the bone is called as `sacrum' which means sacred. When I went to Greece, I tried to find out why they called this bone as sacrum and I was amazed to hear from them that they had a record with Indo-Aryan groups of people coming there and talking to them about this power.

This happened much, much before Alexander went to Greece. Now it is for us to see if in other scriptures also it is mentioned. In the Bible they have mentioned about the Tree of Life. This is the Tree of Life if you see here which Moses saw, which he talked about. Then it is said that you will be comforted in such a way that you will know my father forever, said by Christ. *[UNCLEAR* The sentence that Calvin used was that their work will tell you. It's very important now to understand].

You have to understand why this was so important that their *[UNCLEAR* work/will] tell you. In the Koran it is said all the future things they have said about themselves: “Your

hands will speak." In the Koran they have talked of the resurrection time that will come, when your hands will speak.

Now let us come to the point, of work will tell. Now we understand work as human beings as the *[UNCLEAR* art/alms giving]. But what is the specialty of the work that Christ was talking about? If you think that for collecting money for the poor was the work, that was done even much before Christ.

Or if going to the churches and talking to God or praying to God was the work, then it was done before and even today we can do.

If asceticism was the work one had to do, it's done in many countries even today. If the Laws of Shariat which are followed these days in the Islamic countries, which are described in the *[UNCLEAR* levy/Levi] of the Bible in the second chapter, then if they were to be done, they were or they are already done. What is the specialty of the work that will be done today when it was said that their work will tell? Man can do work on physical level, can do on mental level, can do on emotional level. But *[UNCLEAR* we/he] cannot do work on spiritual level unless and until the Spirit shines through him. And when the Spirit shines what should happen to him? For the first time, you start doing the living work.

For example, we cannot transform a flower into a fruit.

So many living things are *[UNCLEAR* born/done] everyday, you see, which you cannot do. In the human body itself, when a child is conceived, according to the laws of nature it should be expelled immediately because it's a foreign body; but not that it is kept there, it is nourished,

it is looked after, it is protected and the right time it is thrown out of the body. Who does this work, is the point. We take these things for granted. For us our evolution from amoeba to this stage is taken for granted. Why not the scientists answer a question why we are made human beings? What's the specialty? Why should we have not been left as amoeba only? So we come to the conclusion that there has to be a purpose of our being human beings and all this work has been done by some power which is beyond human power. This power is the All-pervading Power of Divine Love. This power is the one which coordinates everything, sorts out everything, which is so organized that sitting down here, if you know this power, you can know about another person. But so far we are not connected with this Divine Power. This Yoga has not taken place. The Spirit that resides in the heart is not in our attention. On our central nervous system we cannot feel it.

So there is some sort of a transition into which we are. We have not achieved our full, full meaning, our full understanding about ourselves, the complete Self-knowledge.

So we have to know that there is something that has to happen within us, which is a living thing. Our evolution is a living happening. Dead things don't evolve. It's the living things that have evolved.

In the Bible it is said that He is the living God. Perhaps we have not been able to see what it means that He is a living God, means that He does all the living work.

So now the work that you will have to show and do is not some sort of a dead work. Like a tree dies and you make

a furniture or you get these stones from somewhere, building is erected. It's all dead work, from dead to dead. But it is the living work that you have to do.

So something more has to happen within us so we do this living work. It is all within ourselves. It is only...

[About the disturbance in the crowd:] This is Satanic. Is he drunk? Don't disturb I will allow you to ask questions later. Be decent in the end. Don't argue. Hello, hello. Hello, mister, just a minute please.

Don't lose your temper. Sit down. Be decent and you have to be a decent man. It is indecency. No, no, no it is indecency, it is indecency. What is he saying? What is he talking about? Oh, I am just telling you about Christ. Let Me come to Christ now. Does he know Christ more than I know? I am coming to Christ. You see, he has no patience. He must learn from Christ, how much patience he has. I am here to tell you all about Christ, what else? He doesn't know anything about Christ. Just saying this is only Christ, Christ. Christ is not going to recognize such things! Christ has said himself in the second chapter of Mathews in the second verse, “Who will be calling me, `Christ, Christ,' and I will not know him." In the four years of his little time that human being gave him how much he has warned you. But one thing at least one should learn to have patience and understanding.

So here we are. We have to do the living work. And how do we do the living work? So that we should feel that this is something very different from us. For example, somebody is dead and we feel the pulsation of that person and there is no pulsation, we say he is dead. Now it pulsates, means it lives.

So the first thing that happens to you that you see there is a pulsation. You see actually the pulsation of the Kuṇḍalinī in the triangular bone. And you see the pulsation rising with a stethoscope; you can see the pulsation rising up to the head here. And when the pulsation rises here then gradually it dies out and you find the Cool Breeze of the Holy Ghost coming out of your head, your own head.

Then for the first time you start feeling the All-pervading Power of the Holy Ghost as Cool Breeze around, so that you become subtler. And to become this subtle thing, the God Almighty has placed all this within you. If there is no connection with Him or with Christ, what's the use of talking to Him? So those who talk of Christ and Christ and house, what have they done as far as religion is concerned? It's not the building; it's not the organization that Christ wanted. He wanted you are to be born again.

There are some people in America who believe they are born again already; they are self-certified born again. This happening is the actualisation of your baptism. It is not an artificial. The authority has to come from God and not from any other place that you can baptize people because you should see if being baptized actually it should happen to you.

All right, today you are following certain dogmas. Go on following it, but a day will come when people will ask you, `This is all artificial.' They are all intelligent people. Today the young people are so intelligent.

They are going to question you and they are going to question God. They are going to deny that.

I can give you a concrete example that in Algeria the people, young people, started feeling that there cannot be God because these fanatics are around. They cannot be representing God.

So there cannot be God.

So let us become Communists. Their fanaticism is so blatant and so open that you can see the fundamentalists are fanatics but fanaticism can be very, very sophisticated. And then, you'd be surprised, one of them came to London, got his realisation. And he got his realisation and went back and told all the young people who were thinking, I mean, they had already formed an organization, communist organization, he said, “There is God." And he himself got five hundred people here.

Do you follow that the existence of God itself is challenged today and you have to prove the existence on actualisation and not in talking and all the blah, blah, blah? You have to give them concrete examples, concrete actual facts.

Now how it happens is the thing that I am going to tell you tomorrow but I'll not talk about Christ because a gentleman has already been thinking that Christ is in his pocket! When I tell you about it you need not accept Me blindly, not at all, but you should keep yourself open.

Christ exists within ourselves in a very small point there on the Optic Chiasma in a very subtle point called in Sanskrit language as Āgñyā Chakra. Now if it comes from Sanskrit, it doesn't mean it is Indian because they knew about Christ fourteen thousand years before you people. Mārkandeya, who existed fourteen thousand years before Christ, you can say, or maybe twelve thousand years

before Christ, has written a book called `Devī Māhātmyam', is of the holy importance of the Goddess in which he has described Christ very clearly. He is called as Mahāviṣhṇu.

All his formation, how He was born and how the Immaculate Conception took place, all these details are there. It's described, most of His life, the details about it even up to the point that He will be the support of the whole Universe. But the people who went from here who were talking of Christ never told them that Mahāviṣhṇu was born. They were such closed-minded people. They did not want to know about Him from any other source. Also when they went there, to find the kind of Christ was represented was horrifying. In one hand they had the gun and another hand they had the Bible.

Many people still today believe that Christ was born in England or in Switzerland. They converted poor people by giving them money, making it so cheap, the whole thing. They converted people by just putting some bread there. All these tricks they played and the poor Indians did not know what it was like.

It was more a sort of a material representation.

Christ himself has said that, “Those who are not against me are with me." Who are those? It is said in the Bible that, “I'll appear before you like tongues of flames." Who can explain this? Except that when you see this Kuṇḍalinī rising you can see these Chakras burning like beautiful flames. Christ was the embodiment of innocence which came on this earth. He was the logos. He was the first son. He was the Brahma. And when he came on this earth, He tried to talk to human beings who were insane.

But they can be forgiven because they were not realised Souls.

Now he placed this mark at the Āgñyā Chakra because that's the cross there and he was specially made for a very special job to cross through that suppressed point. When a man starts into a human being, they start developing their ego. And whatever conditioning they have is the superego. We can say in other terms that they are their Karmas and their sins. Now when these two things meet on the fontanelle bone area, calcification takes place and you form your `I'-ness, that you are Mister So and So.

When the Kuṇḍalinī rises and she passes through this point then she sucks in both the balloon-like structures of ego and superego. That means you can rid of your suffering and of your Karma, of your action. Now between these two, when they meet each other, there is no space at all.

So they have to put the embodiment of innocence itself, the embodiment of the Brahma itself where just when Kuṇḍalinī rises that she can just suck in these things in our head which are causing big ignorance.

So when He said all of you have to pass through the same gate, which was, He was meaning that when you get your realisation, the Kuṇḍalinī has to pass through the same Āgñyā Chakra to awaken Christ within you.

Now if we want to see if there is Christ or not you can verify on *[UNCLEAR]* with our vibrations.

Because when the Kuṇḍalinī stops here at the head we have to say Lord's Prayer. It is a mantra; it's a chant. The person who is a realised Soul has to say. Not the person

who is seeking realisation but the person who is a realised Soul has to say the Lord's Prayer, which is a mantra, which is not to be challenged, which works out and you find Christ opening the gate and you find the Kuṇḍalinī crossing it very subtly.

So the message of Christ is of resurrection and not of His crucifixion that we have to suffer. He has already suffered for us. Do you want Him to suffer more? Did He not suffer sufficiently enough for us that we should suffer anymore for our spiritual growth? His message is of joy and of rejoicing and not of crying and *[UNCLEAR* mass hysteria].

When the Kuṇḍalinī rises and opens the Āgñyā Chakra you can see clearly that there is a depression in your head. Actually, you can see with your eyes that there is a depression in your head as you had in your childhood. Absolutely, you can see clearly. If there is somebody, a bald-headed gentleman, who can see the sucking of these clearly with your own eyes. If you are truly honest to yourself, you should know that you haven't yet found that and if so you should find it because it's your own. It's your property.

A lady who told Me that she thinks she is already a realised Soul. If I believe that I have a lot of money in the bank here in Geneva, will I be able to cash my check? I have to be sure about my bank account. In the same way, believing the myth that, “I am this. I am that” is not good for you.

After realisation, you become collectively conscious. You become. It's not just, `Oh, I believe in it. I believe.' It just happens to you that you start feeling another person on

your fingertips. Your hands start speaking, your hands speak, you know what's wrong with another person and also you know what's wrong with you within yourself, what centers are catching within you, the subtle centers that are there. And when this happens, you are sure about it, what's happening; but only it is to be decoded and you are to be told that what does this finger say.

For example, a person had asthma and he came to us and we asked him, “Have you got asthma?" So he said, “How do you know? Oh, because I was drinking heavily" he said. Then I said, “What about your father?" “Oh, I am not talking to him. I have nothing to do with him. He is a hopeless fellow. I don't want to have anything with him." Now can you believe that if your fatherhood is challenged, you can get asthma? Whether your relationship with your children or relationship with your father are little bit topsy turvy, then there is a problem of asthma can come. Even if the father has died without seeing you and there is a feeling left in you mind, “I did not see my father” you may get asthma. If the child dies and the father feels, “Oh, I have lost my child” also he might get it.

Say if there are ten children who are born realised and if you ask them to put their hands towards a seeker they will put up the same finger saying, “This is the problem because this will burn” and they will feel the burning on the finger. Absolutely all of them will feel the same thing. Once you find out from that person whether he has any throat trouble or he smokes or he talks too much the right side of his Viśhuddhi Chakra is catching you'll be

amazed he'll say *[UNCLEAR* some/one] of them are *[UNCLEAR* very stiff].

For example, the gentleman who was shouting just now is really anti-Christ, because his center of the Āgñyā, this center of Christ was caught. Supposing a person has got ego and if you tell him you have got ego, he'll hit you hard. But when you get realisation, you see this is catching, you know its ego, you come and tell Me, “Mother, my ego is horrible. Please cure it." Because after realisation, you become the spirit, you can see your ego superego like a block within you; then it's taken out. We are not identified anymore with that. We are identified with the spirit. Once this happens, the maladies disappear automatically.

We had a boy just like this one, I remember, in Brighton. He came all drunk and he was shouting at Me something. I didn't hear.

So I told him, “All right, don't shout just now. Go home, sleep and come and see Me tomorrow." And I gave him the realisation next day. He left his drink. I never told him anything.

Because if you find the nectar in your life, why do you want to go to anything like that, alcoholism? So why should you bother as to what habits you have got or what wrong you have done, because in the West I find everybody has only one great problem is that they feel guilty for nothing at all. All the time they are feeling guilty. For what? I don't know from where this mind has come to tell you that you are guilty, you have done this wrong, that wrong. Actually, we have complicated our lives so much. We are not simple people. Even if we put a

spoon this way you'll feel guilty. “Oh, God! I have put the spoon that way!" In the eyes of God, you are not guilty. You haven't done anything. Why are you guilty in your own eyes? Why are you judging yourself like this? This is the biggest problem. I always find in the Western mind that is all the time indulging into a mythical guilt. It is in England you feel guilt, in Switzerland.

You go anywhere up to India; everywhere you find it. But Indians never feel guilty, only if their mothers *[UNCLEAR* sometimes] they are another limit! So one has to know that we are just ready to have it and receive it. It's an actualisation which has to work out within us. For that you don't need any lecture as such. With children, I don't need any lecture. It's just works out. But the grown-up people have *[UNCLEAR* yards and yards/built up yarns and yarns] of our own understanding they are guilty.

So I have to little bit uncoil it so that you come to your logical conclusion that the essential thing is to be *[UNCLEAR* free].

[UNCLEAR Now you have denied Christ in a sense. It's a fact. It was stupid. Now please don't deny him again.] I have no surplus to give you; I have no buildings to sell you, nothing. You are My temple and the Christ is within you. Only the light has to shine; that's all. Of course, it goes without saying that you cannot pay for it. It's absurd. I mean, I just don't know how to explain this point that you can't pay for these concepts, because ideas have come to us that we can pay for God. God doesn't know any money.

He doesn't know banking. I must tell you this.

What do we pay for? It's all human-made things we pay, not for God's things. Did we pay anything to become human beings from monkey? It is all effortless. Also you cannot put in an effort.

Some people think standing on your head you can get to God. I mean, imagine, how can it be? So many animals do this morning till evening. Are they going to get to God? Even eating this kind of food, that kind of food will get to God; it's not so. Only thing your health may be all right because out of the kind of food that you eat, but that is not the spirit which is beyond material things. If vegetarianism is going to give you God then all the cows of Switzerland should go to God much before than you can go.

So in this way you will understand that all these ideas are just self-destroying.

Even the self-indulgence is also self-destroying. Too much thinking is much more self-destroying than anything else. And too much planning is much worse.

I will tell about this center tomorrow to you, what happens to us when we live in the futuristic state.

And then you will realise that the day we are always thinking, actually we are harming ourselves morning to evening. And the balance has to be established before you get your realisation. All the religions came on this earth just to give you a balance, to tell you about the sustenance, which is importance in the quality of human beings, how we have to live. They were all living flowers on the tree of life which was plucked by everyone saying, “This is mine. This is mine” and then they became dry and ugly *[UNCLEAR* which we are shocked].

The best way to know about yourself is to go to your enemies. For example, if Christians go to Jews they will know, they will feel that Jews are the only safe ones; we are all going to be killed. Then the Jews should go to the Muslims to find out about them and the Muslims should go to Hindus to find out about them. All are living in a myth, I feel and I really sometimes don't know how to convince them that please, please be sane. Know the reality. Please face the reality which is so beautiful that is within you.

Please face it.

So it is important not to be serious. You have to be cheerful, not to feel guilty at all. You see, if I have said something that upsets you, please don't be upset. Forget it. Only thing you have to do is a very simple thing that you should know your own glory that you are the temple of God. Do not condemn yourself at all. You ask Me for the real and not for unreal things. For example, somebody's sick. Let him get his realisation; he will be completely cured. Everybody can be cured with realisation. The people who got their realisation in Geneva, you can ask them. They never go to doctors anymore and doctors should not mind that.

Today is the first day, I would like you to ask Me questions but not in a way the fellow was frantic and mad. There's no need to get frantic with Me, because I cannot get frantic at any cost.

So please ask Me questions in a proper, decent decorum way that behoves a good citizen of this country. Now, for example, if somebody like that wants to give a lecture, he can arrange himself and have people and talk to

them. I have no objections for that. But when we have arranged it with a purpose, he should not come here for the purpose. We should not be disturbed. In all civil sense it is so. What am I doing? I am not doing anything wrong, am I? So please ask Me questions, as many as you want to ask. I'll be very happy to answer your questions before we start with realisation.

[Aside:] *[UNCLEAR]*.

Accomplished? It's not. It cannot be. I don't believe it. Now this is a misunderstanding. Everything is accomplished. When he said so it was correct. It was accomplished as far as he was concerned. You should not sort of try to mislead people with that. You see, this is the trouble: people try to fix up everything like that. For example, now see what is the thing that Christ has said when he was at the cross when he was dying. He said that “Everything is now accomplished." He came on this earth to play this drama of crucifixion because people were so stupid and idiotic because he rode the donkey to show that and he said, “Everything is accomplished." It was meaning that he had accomplished the work that for which he had come, is to suffer for you people.

[Disturbance in the crowd.] I have not finished as yet. Have patience. He has no patience of Christ. Sit down. Just a minute. All of you sit down.

Now to believe that he has accomplished everything, that nothing is to be done, what have you got out of it? What have you done yourself? You ask yourself. You face yourself. Bible is not going to support you. You face yourself and tell Me what have you done yourself in life. Have you been able to get rid of all your temptations?

Can you say that you are a perfect man? Is it? Let's see what have you accomplished yourself. Let's see.

That lady should sit down. They are very impatient. You are not Christians at all. Have patience.

Please sit down, madam. Andre, let Me talk to them. Just a minute, madam. Please sit down. I have not yet asked for you. Now. Impatience, you see, like jack in the box. Without any knowledge, without any knowledge they talk. Now let us see another point. Now this is why people say, let's see why people say that Christ has said everything is accomplished. It's an escape. That's the best way. Christ has accomplished for us so we just take the Bible, go around, we are all right. This is an escape.

Now, one thing, sit down please. Just a minute, I have not finished answering you. Just a minute.

Now, why people do this is another denial. You see, they'll will find out things by which they will deny the truth. They want to deny the truth and that's everywhere.

Now the question is, just a minute madam, just a minute. You are very clever people. Just sit. Now listen to Me. Just a minute, just a minute, I'll give you a chance. No hurry. Sit down, sit down, sit down.

I'll ask you to *[UNCLEAR]*. [Laughter.] Now listen now. Now just a minute, madam, just a minute.

Will you please let Me tell you this subject fully.

Now what happens? Now this is the one point. Now the Muslims say that Mohammed was the last Prophet, all right? So they have a right to rule over everyone. Now what we achieved that by accepting dirty things, make

believe, have we achieved something in our awareness? Let us face it out. You see, we should find out have we achieved anything in our own awareness; let us see with our own eyes.

Then why Christ said, “I will send you a Comforter” if He had completely accomplished? Why did he say that He will send you a Redeemer and why did He say He will send you a Counselor? It must stopped the way people in His name have created such barriers against the truth itself.

Now the second question, please.

All right, just put it in short, madam. You see, some people ask question to show off they are there.

Don't do like that. Just ask a precise question. Yes, yes, but that doesn't mean you take everybody's time, madam.

There is a group of people who have come here to disturb us. This is Satanic, absolutely Satanic to have a group there. Sit down. Will you please behave yourself now.

You see what I am saying? For that you must have some patience and you must come to Me. I will tell you how we are saved and how you can do His work.

Don't you show the Bible. When they say by giving Bible to someone they can cure alcoholism, can they? That's a group there. You cannot do anything. I have cured the cancer of the President of India in ten minutes. Can you do that by talking about Christ? Because you are not connected with Christ. I am connected. Better write to him and find out. Tell them to write to him to find out.

He's there. You'll find out in ten minutes Now, by talking like this about Christ what have you achieved yourself? You tell Me. I am asking you a question, madam. What have you achieved yourself as far as you are concerned? No, no, just tell Me what have you achieved. Have you been able to convince somebody to give up even a drug addiction? Have you been? But that's something once in a while.

Nobody is interested in you. Who is interested in her? Is there somebody? You all just say no, no.

You just say no to her and she is all right. We are not interested in you. You go away. We know why you are here. Will you please now go away? You are very indecent. No, you can't. You can't.

Give him a flower. [Disturbance in the crowd.] No, not for you. This place is not for you. You can't use, I am sorry. You have no business to have this showmanship at our cost. We have come here. We have got this hall. You have no business to have a showmanship at our cost. Please be humble like that.

Christ would not behave like this. Get out. Talking of Christ and behaving like brutes. Imagine! This is Geneva! This is Geneva! Very sad, very sad.

At least, thank God that there is Khomeini to show them. He says the same way. He talks like that.

He has message for the whole world. All right, go, go.

Will you please ask this lady to go away? It is our right to have you here or not. Please go. Just ask them to get out. Will you please get out? There is a bhoot there.

[Aside:] please give them a bhandan.

You should not disturb others. Please, if you don't want it, go away. Nobody is forcing you. Will you go away? You should not try to aggress other people. You are very aggressive for Christians. Better call the police.

[Disturbance in the crowd.] Honest to themselves, must know that the book reading is not going to give you Christ by any chance.

Christ never read any book. And logically also one can understand, if God is for everyone then He cannot be only for people who can read. You are very nicely settled in a very nice affluent country but I am sorry to say that you lack all the culture that we have in a poor country like India. If these people want to meet Me I'll be very happy. They can come and have a cup of tea and talk to Me and tell Me what they think about it. But this is very aggressive and very indecent to behave. Where there are three, four people who have come with the idea of disturbing, it's very destructive.

Christ is the one who controls your ego but what I found that these people are very ego-oriented.

Because they can read Bible they think they can do what they like! That shows that these people who aggress have not imbibed Christianity. It's only the books that they know in their heads that's all not in their hearts! Now at least I hope they'll behave like decent people and sit quietly. If they want, they can hire this hall and do what teaching they want. They can preach but they should not aggress somebody who is not doing anything wrong to you. I have not done wrong to anyone so far. Always the fanatics have always attacked the saints, no doubt about it. Everywhere, in every country, they are

attacking. Because they believe in a book but not in their hearts. There is nothing like in the heart. But still you must forgive because they are naive, they are blind, they can't see. What can you do about it? [There was a big turmoil for about fifteen minutes but the magic of it all appeared in the fact that the more negativity manifested, the stronger came the vibrations from Shri Mataji. She was extremely majestic and absolutely powerful. After sometime the whole audience sided with Her; the intruders left.

Hundreds of people got their realisation in less than five minutes.] Sahaja Yogi [said later to Shri Mataji]: Mother, this meeting was historical not only for Sahaja Yoga but also for the city of Geneva.

Shri Mataji: It was historical for the whole world. Because, after having declared war on the false prophets, we have now declared war on all the religious fanatics. [Smiling:] I enjoyed Myself quite a lot with this incident; it was all getting a bit too mundane for Me.

***Contents: 1982-08-25*, Public Program, Day 3, Love Is the Solution, Temple Fusterie, Geneva, Switzerland**

..... When the Spirit manifests within us, then this *[UNCLEAR* joy/job] becomes active within us. First of all our malignicity disappears. Because our Spirit is the source of the vital energy or we can say it is the connection between the human attention and the Divine Power.....

***Contents: 1982-08-26*, Public Program, Day 1, History of Spiritual Seeking, Casino de Montbenon, Lausanne, Switzerland**

I bow to all the seekers of truth and love. There has been a great talk about truth, love and bliss so far in the history of spirituality of human beings. But it is so surprising for an outsider to see that all these religions have been separated from each other and it is impossible for them to find any common points between themselves.

If truth is one, God is one and love is the same thing, why there are so many religions and so many wars in the name of God? The more human beings are developing in their intelligence, they look back upon the history of religions and they get a fright from the way people have behaved towards each other. Even the science, which has no connection with God or religion, has gone to a limit where we have created devils of bombs, which are atomic bombs, hydrogen bomb, nitrogen bomb. Yesterday we had a very important gentleman from the disarmament organization of the U.N. and they said, “It's all absurd because already there are five thousand types of bombs which are being created. We have to just press a button in one of these countries and the whole world can collapse into nothing." Under these circumstances, we are born at the present time.

If we try to close our eyes to the fact that all these movements of human beings whether on the religious basis or on the scientific basis or into any other economic basis has not lead to the betterment and well beings of

human beings but has ultimately ended into some sort of a shocking demon sitting on our head.

Now what is the reason for this kind of a mess we have landed ourselves into? We have not been able to understand why we have reached such a confused state. But I'll give you a little simile about it which will make you understand. Supposing there is no light at all in this room and about hundred blind people just walk into this room who cannot even feel their way around. They will bang at each other. They will fight for their seats. They will be sitting, not facing Me, facing the other side because they are blind. But that is what exactly human awareness is at this point of its development in the evolution.

Actually our ego does not allow us to accept this situation and we go ahead with it, banging each others' heads, breaking each others' lives. God has created us so beautifully, this whole universe and has developed us from a little amoeba to this beautiful being as a human being. Is this, is this the purpose for which God has created us: that we start destroying his creation? The best creation, that is the epitome of creation, is this human being. He poured all His love, His bliss, His intelligence to make us human beings.

Today I would say there are many people who are aware of this kind of a gap between the truth and themselves. They are the real flowers of this beautiful tree of life.

Someone may be a rich man.

Someone may be a very big official.

Someone may be something great but in the eyes of God, those people who are seeking the truth and trying

to achieve it are the real joy, a thing of joy of His creation.

So we can see now that we are face to face in a situation of confusion. Either we emancipate this world or we destroy it.

I would like in a very short way to tell you the history of spiritual seeking. When man was first faced with the nature, he tried to find out the essence of the nature so that he could overpower it. That is on the right side movement, as you see there, is the movement of the action that man started to perform something they thought proper to experiment with the natural forces of five elements. Greek people said that there are all the deities of all these five elements.

When I went to Greece, I asked them, “Who told you that these deities are there? And from where did you gather this knowledge?" And I was amazed that they said that “Much before Alexander went to India, we had a Indo-Aryan rapport. And we consulted them and it is our consultation that brought forth these ideas about the deities that are presiding over the elements." So this side of a human being is the reflection of the creator aspect of God. He created first the causal of the elements then the elements out of the causal and then He created all this universe. For example, fragrance is the causal of the Mother Earth.

Now when they started worshiping these deities, a kind of a right-sided movement of the worship or is it connection with the subtler side of life started growing. This happened practically in every country but did not continue very much in the West because Western

countries suddenly started taking to the position of a shoot of a tree. That's how we find you people are so developed in material things. But in countries like India, which tried to play the part of the root to find out the source of all the energies, tried to find out how to please these deities and how to take advantage of the material, or we can say, of the five elements.

But in this also, as in every other Western country, they gave up this idea and they made the Gods look like imperfect human beings. This movement was in England, I have seen was done by people who used to worship places where some stones came out of the Mother Earth, like Stonehenge.

Even quite late as sixteenth, seventeenth, eighteenth century in England, there was a movement to find out the relationship between the gravity and the magnetism. All the churches built in those areas go in two lines where they found that throughout on those lines the compass goes on bending downward. [Repeats for the translator:] The compass, you see the compass bends at those four points like this. It has to be straight, you see, north, south, east, west it points. But actually it bent to the gravity, you see.

So they were surprised how it bent at those points. And they picked such a, so there was deeper understanding.

They tried to understand deeply the significance of God's blessings through these natural elements.

But after some times, they lost interest and they just became organized religions. And after that, when we had a person like Henry the Eighth, who wanted to marry Anne Boleyn. He authorized the bible from the

Protestants and they started using that bible. That is how the Protestantism came in England.

So the whole seeking ended up in authorizing the bible by such a horrid fellow who killed his seven wives in the name of God.

So the king became in charge or the ruling people became in charge of the God. And the whole thing, the whole religious movement became nothing but a sort of a formal thing without getting any benefit out of it. Now you'll be amazed to know that in England, churches are sold just like houses and people are buying them. And these false Gurus are now taking over the churches for their use. America is much more advanced in this. They even have churches of the witches and the black magic. Same thing happened in India.

Those people who were trying to raise or to initiate people to become spiritual started taking to methods of Tantrikism, which is black magic. For negative, there are three, four words in the Indian language. It's called as the knowledge of the dead, bhoot Vidyā; Shmashāna Vidyā meaning the knowledge of the cemetrey; and pretha Vidyā meaning the science of the dead, or you can say, of the past. Also some of them have taken a clue from the Western people thinking that if you give them sex as the energy of God, they will be very much popular. They have done it. Now in the temples of India, you will be amazed to know that all kinds of drugs are sold. And these fake Gurus and the false Gurus have built up empires of empires out of your naive idea about religion. But innately, because we are very traditional in the idea of God, innately if you ask an Indian he knows how to

recognize the truth. As it is, the village people, country people are simple and they know what is reality. It's not easy to befool such innocent people.

Now one has to realise that in your seeking, whatever may be the way you are doing it, you cannot pay any money. In the West because the priests were paid for their jobs, people believed that even God realisation or Self-realisation or any movement in spirituality has to be paid for. Spiritual evolution is a living process. Any living process, you cannot pay for it. If you want to sprout a seed, you can't pay the seed and the seed won't sprout out of it. You cannot put any effort. You cannot stand on your head for the seed to sprout. All the designs and maps of what this little seed is going to be is all built in that little seed by the Divine Power. And when this seed is put in the soil, in the Mother Earth, the Mother Earth knows the seed and seed knows the mother and it sprouts by itself.

This is the spontaneous happening, which is the living happening which we human beings cannot do.

At this level of awareness, we cannot do God's work. Whatever work we do at this level is the work of human beings, which is a dead work. In our humility, we must know this. We cannot transform a flower into fruit. Let us accept it.

So we cannot make a pulsation in a person who is dead. Let us accept. We'll go deeper into it and we can say that supposing you are running very fast and then you stop. You can increase the rate of heart but you cannot reduce it to the normal. There are so many such things, which are billions and billions of happenings which we cannot

control as human beings. But being very superficial with ourselves, we take it for granted. Even we do not understand how a particular type of flower is grown on a particular kind of a plant, how this choice is so beautiful and perfect.

See their variety and the variety of human beings, the kind of people, the temperaments and such a lot of beauty created by that variety. But we must know, we cannot clump these human beings into groups.

We cannot make them into some sort of a machine that moves with the same mood. They are human beings of their free will. If they have to be collective, it should be a part and parcel of their awareness where they are not forced into it but they just become.

So that is what one must realise: that we are not at that level where we feel this All-pervading Power or we are not at that level where we have become.

Again I say become in our awareness: in our central nervous system that we can feel others.

All the scriptures have aimed at our second birth, towards our breakthrough into that unconscious.

Like, a, one fish came out of the water. Then some came out. And then shoals of fishes came out. In the same way, in the seeking of God also, there were very few people in the beginning who knew about Him as a collective being within themselves. But when the seeking started, man went into the extreme and clubbed people into organized religions. We cannot organize living process, leave alone God. We cannot brand people as this kind of a sheep and that kind of a sheep.

So something has to happen within us. And that happening has to take place because we have to save this great creation of God.

Now think of the wars and think of the problems we have. Why we have all these problems? We have problems because we are not collectively conscious. We do not know that there is no `other' in this world.

Mentally we understand that if we try to destroy Russians, Americans will be automatically destroyed.

Mentally we understand that if we destroy others, we'll be destroyed. But we do not know that it's a fact that if you destroy one finger, the whole body is going to suffer; that we are part and parcel of the whole being, we are already. But we are not aware of it.

We do not know that we are part and parcel of that thing and an experience on the central nervous system. Whatever we have achieved in human is in our evolution is on the central nervous system. Now if you, if you take a dog through a dirty lake, he has no problem. But we can't go through that because in aware in a one awareness we are sensitive to dirt, filth and bad smell. And at the later stage of our evolution, we will be conscious of, we will be conscious again I say that the other is me.

We can feel others on our fingertips. In the Koran, Prophet Mohamed has said for the future that “Your hands will speak." In the Bible, also it is said that “I will send you a comforter who will make you know My Father forever." That clearly means that yet we are not connected with the Father of Christ.

And somebody has to do it and give the counsel and redeem you, means give you evolutionary jump into that breakthrough. I feel today that blossom time has come.

Whatever has been in the history is just an evolutionary process. Like in the earlier stages of animals' evolution, those who were very aggressive and bulky people were thrown out of the circulation of evolution.

Today at human level, those people who are trying to club each other and organize God and also try to create falsehood will be exposed, no doubt. Now the truth, truth has to express itself, which will express but if you don't accept, it will break through with a crash.

So now, one has to understand that there is within us a power or a built in process by which we can become the spirit.

I must say for Christians, it should be easy to open your mind to understand that the movement of seeking has not been only in the Western countries but all over the world. And as it is said that “You are to be born again” this is the only work of God that is to be done. You are the temple of God and you are to be born again. In Sanskrit language, a person who is a realised Soul or born again is called Dvijaḥ.

Dvijaḥ: the one who is born again, twice born. But interesting part of it is that they call a bird also a Dvijaḥ. Because he's first born as an egg and then he becomes a bird. In the same way, a human being when he's born, he starts growing. He becomes he starts developing his ego and superego in his head like a balloon. And then a calcification takes place at the fontanelle bone area by

which you get separated and become Mister X Y Z, means you develop your `I'-ness.

So now you get your freedom to choose and decide which is the right way to move.

So we have to understand that we have to be in the center to evolve. Now tomorrow I'll tell you about the center path and the left side but today I'm just telling you that we have to be in the center, not to the extreme of the right and not to the extreme of the left. The wisdom that is given to us helps us to remain in the center.

Also, the Ten Commandments like things are in every religion because they are our sustenance to remain in the center. They assert their influence. In the center, the green that is shown there in a very light green colour is a round circle and they assert on this abdominal area where when you try to go to the left or to the right, they try to bring you back to the central path.

For example, if a person is too active and is running all the time in extra then imagine the heart goes out. The one who thinks too much and who plans too much for the future, his heart also becomes very weak. Is most surprising, when you use your brain too much, your heart gives way. Supposing there is a person who feels very guilty and weeps and hysterics and cries all the time, you can say `the emotional person' who begs everybody miserable by the miseries they have. Emotion is the quality of the heart but such persons use their brains. They land up in the lunatic asylums. You'll be amazed to know that a lunatic never gets a heart attack. That is how the system balances you and tries to give you a balance.

So first, this balance is to be achieved within us because if this power has to rise, if the person is not balanced then this transformation or this second birth cannot take place, you see.

When you will grow in Sahaja Yoga for that, you'll be amazed to know that most of the diseases, I mean ninety nine point nine percent we should say are caused, are caused by imbalances on the right or on the left. Even you'll be amazed to know that when the egg is comes to its, it starts developing and it comes to its full form, it stands in the water. You may try to push it down any amount it won't settle down in a horizontal way.

So now, when the Kuṇḍalinī comes to this and pierces through your fontanelle area, the seat of the spirit is on top of your head and it reports. Actually you can see the pulsation of the Kuṇḍalinī. Yesterday only I showed in that church pulsation of Kuṇḍalinī whose somebody's what I mean, somebody's void I mean somebody's stomach problem was there and you could see it pulsating there. This is a living process so you can pulsate. Only living, if we want to see if somebody is living or not, you see the pulse, isn't it? The pulsation rises along the spinal cord. And you can see it with a stethoscope till it reaches to the top, the summit of the head on the fontanelle bone.

In India, there was a poet called Mārkandeya about fourteen thousand years back who has written about this happening. In the south there is a place called Chindindra, means the Indra, the king of the devas, was given realisation was made a hole in the head, chind-indra.

So God knows how many years back it happened. And it is said that once it happens then you find the All-pervading Power, the brahma.

First time you start feeling the Cool Breeze around you, the Cool Breeze of the Holy Ghost. You'll be amazed when you come to Sahaja Yoga that all the prophets and all the incarnations are so complementary to each other. All of them were so much opposed by the blind people, even today, people oppose Me. This is, of course, not so difficult now; in democracy nobody is going to crucify Me. But in those days, they crucified, they gave poisons, they beat. They did everything possible that they should not speak.

So with this method of the central path of giving evolution was kept a guarded secret. But some murmuring souls who could not get realisation, out of frustration, just went out and started a Tantric thing against God.

Christ was the first person who said that “You have to be born again" so openly and to the public. He was not given much chance, as usual, to say much into details about it. Then in the sixth century, Ādi Shañkarāchārya wrote books about it and told people that “You have to get your realisation. Without realisation, all this is falsehood. You have to know only the Brahma, the All-pervading Power." All the priest class who were interested in their earning money out of God, could not tolerate them and they tried to kill Him and actually He died very young. Then came Mohammed. He was a compliment. He *[UNCLEAR* devote] Nimaz is nothing but Kuṇḍalinī awakening technique. He thought if you talk of

the deities and aspects of God, people just get stuck to it. Like if you talk of the flower and not about the honey, people get stuck to it.

So he said “Better talk of the formless God of the honey." But his disciple started talking, talking, talking, talking, talking. All of them are doing what kind of a work you know how fanatic they are. As Christians also diverted their attention from giving realisation and understanding realisation and second birth, developed into sort of an organized religion, these Muslims also did the same job.

Hindu priests also priested all Hindu philosophy into bread earning organization. The caste system was not existent, it was existent as a system by which you know your profession or the aptitude towards God. For example, those people who were seeking God were called as Brahmins. Those who were seeking money were called something else. Those who were seeking power were called something else. And those who wanted to serve others and live like servants were called something else. But it was surprising that how these priests got this idea that we are born Brahmins. Even their children became Brahmin and their children became Brahmin. It's not true and there are proofs of it. Like the one who has written Gītā, Vyāsa, himself was not a Brahmin but an illegitimate child of a fisher woman. God specially chose such a particular person to denounce the idea of caste that you are born with it.

So then came Nanaka. He was another great believer in the unity of people in their awakening into collective consciousness. He collected all the poems of all the, all the realised Souls of our country in those days and put

them in a book to see that you have to get your rebirth. I went once to a temple of these people who follow Nanaka. They told Me that this book has been read throughout in two and a half days by people continuously, continuously.

So I said, “Really?" And at that time they were singing a kind of a hymn. And the hymn was “Oh my seeker why are you going to the forest to seek God? He is within you. You must get your realisation to become that." They were singing and singing and singing.

I told them “Supposing a doctor gives you a prescription. And you start singing the prescription. Will you get alright?" You have to get your realisation. I mean, whatever is said you better take your medicine, take your realisation." But these books have made them absolutely blind.

Then came a terrific poet in India called Kabīra. And he outed all of them with such a strong tongue.

In his poems, he clearly said about the Iḍā, Piñgalā and Suṣhumnā and all these channels. He also said how the Kuṇḍalinī rises and goes to the apex of the head and how it breaks out and what happens and how you feel collectively conscious. In every country, there have been great realised Souls who have tried to, to generate this feeling in people that `Don't run after falsehood but take to reality. Take to realisation.' Only hundred years back, William Blake was born in England. He said, “England has to become Jerusalem." He described all Sahaja Yoga and his collective happening in his books. Up to this point that he said that “Harsiniums vibrate peace and joy." “Harsiniums" is nerves, nerve. About the priest he said,

“The priest cursed my head when I was a child." Because that Baptism is not Self-realisation. It is just artificial show. It is a drama. He said, “I never saw the face of that priest who cursed me on my fore, on my head." Because he was a realised Soul and no realised Soul likes a person who is not a realised Soul to touch his fontanelle bone area. Even a child won't like. It's so revealing the way he saw things clearly about Sahaja Yoga that nobody so far I have known, whether in India or anywhere, has still such clear-cut ideas about Sahaja Yoga. He even described, you'll be amazed, the place where we'll have the ashram where I laid the foundation stone. It is in Lambeth vale and he says “Come to Lambeth vale all you seekers." He described My first house that the first beacons will be lit in Surrey hills where I lived first. But the second house, the one now I'm living is so precisely described that it will be on the Talburn stream. And our house is on the stream only, floating in the stream it is Talburn. It's just next to Kensington garden. Exactly. I must say what a great person he must be, to see what a seer he must have been, to see that this work has to be in England. And suddenly, My husband got elected to this job by about hundred and thirty four nations and I was in England. And now England has got so many realised Souls, so many centers and so many people are transformed. We believe that England is the heart of the universe and everything flows from there to other places.

I know that Switzerland, I have not started very early, is a very later movement. I started much later in Switzerland. But I'm sure that in this great country also people will take to truth and find out their meaning and purpose in

life and thus save the whole humanity. Tomorrow I will tell you about the two other channels and how it is important that we have to become the spirit today and not tomorrow.

May God bless you! If you have any questions, you may ask but not too much time. Then we'll have the session of realisation and that may take about half an hour. And tomorrow again we will have session of realisation. Those people who have any maladies or anything, I would like to attend to them also.

They have to go to Geneva. They came all the way from Geneva. Thank you very much. They came from Geneva; now they are going back. Those who want can come and sit in front because we are going to have the session of realisation. If you have any questions, please ask Me.

Shri Mataji: What did he say? He said, “Why are we doing it now?" Just a minute.

Sahaja Yogini: Yes he says, “The humanity had been once realised and why and if not, why it is now today."

Shri Mataji: Yes, you can see now after telling all this, how many people have already left the hall.

They are not ready. They do not want it. The time was not there. You see, you can see now in this gathering how many have left suddenly. I didn't say anything wrong. They were not willing to even have realisation. I mean, I tell you at the time of Christ, if you had tried it would have been impossible.

He couldn't even talk of Kuṇḍalinī to those fisherman, just look at these today's. Just now you've seen Lausanne how many have come, first of all, from Lausanne? It's not

such a small place we have come to and how many have stayed back for realisation? Them, they don't want it. They don't want realisation.

Question: Six thousand years ago, most we were realised.

Shri Mataji: No, not all, very few.

Question: That means never. This situation never existed.

Shri Mataji: No, this is the first time. That's what I said. Today is the first time. And that too, very slow movement. In London, I tried on six people, you won't believe, for four years. Can you believe it? Four years! The lifespan of Christ, which He spent on this earth with these horrible people. Huh? [The man says something again.]

Shri Mataji: What's this? Question: Adam and Eva, were they realised?

Shri Mataji: If they were, they would not have behaved like that. I will tell you about this tomorrow, this question. I'll tell you what was the situation of human beings in relation to paradise. Is a good question you have asked Me but we are not We have to get realisation but look at the, there is no seeking.

There is no asking for it. They are so self satisfied with their ego that just they left, you see. It's question of half an hour. They have much more important things to be done. What can you do? It's a difficult task.

[Maybe somebody asks question in a non-English language.]

Shri Mataji: In India, you'll be amazed. When I go there, I have not worked there for so many years, when I go

there in the villages, this hall would never be sufficient. I have to have it in open places with thousands of people coming, you see? And they come from villages to villages and thousands and thousands. You can see the film, how they get realisation, raise their hands. But here they are so sophisticated that you just can't touch them. And those who have gone with Me to India are amazed.

They said, “Mother, why are you wasting your energy in the West?" Actually, in the West great seekers are born. Every individual is a great seeker and a great potential but ego is too much. They cannot see things clearly. They want a circus behind Me. They want a Guru who will pamper their ego. It's very funny but it is so. Your country is another very great country and you can see that many international communities are built in here. And so many people from various countries are coming and meeting you and they find you are open hearted people. But as I said in My, one of My lectures that “We have to find out that, on national basis, if we are doing any harm to other countries, we must correct it." As in, on Indian basis also I can say we are doing lot of harm to humanity being Indians. By allowing these horrible Gurus to travel around and torture, so many people and who are accumulating so much money, not to control them is absolutely inexcusable in the eyes of God. Not that India government does not know that they are thugs and they are all cheating you, they know everything. But they are allowing it they do all these things because they can get some foreign exchange. It is a very hypocritical attitude, I must say.

Now in the same way we can say here in this country of ours, in Geneva, we have these banks which are quite hypocritical. Because of Swiss banks, we cannot remove the corruption in all the developing countries. Especially India I know for definite that all these ministers and all the people who are making money, they have put it in the Swiss bank. In a way, this bank is responsible for not developing our country and keeping us poor all the time because of corruption. All over the countries, I also know about Mauritius, that the money of Mauritius has all flowed to this bank. In some countries, the poverty is appalling and they have so much of natural resources, everything they have and still one can't understand why these people are so poor. People are starving. The children are sick and dying and it's such a mess, you can't imagine. If you go to Bangladesh and if you see the condition of the people, you won't feel like even eating your food for eight days. But all that corrupt money comes to Switzerland.

So I have to request you Swiss people...

[To the translator:] What she say? Ah, so what I am saying, in the same way as we Indians are tolerating these horrible Gurus, you also are tolerating. If you can do something to stop this, at least the countries will develop in some way. As you asked Me for a special message on a national basis, I'm just telling you for your information that if something could be done to stop this kind of a thing Translator: *[UNCLEAR]*.

Shri Mataji: Yah, [laughs]. The only solution is that only solution is that we must have mass evolution.

So that our priorities change, so our priorities change and then money doesn't become so important. Then doing and giving becomes much more joy giving. And when such people will be there in Switzerland, I am sure even the bankers can become the same way. But Christ was little pessimistic.

He said, “Is it easy to take a camel through the hole of the needle but a rich man cannot pass through that." [Repeats for the translator:] Cannot, yes, cannot go into the, into the kingdom of God.

[To the translator:] What did she say? No, no, no, it is, it is, no, no, no, no, no. It means that an impossible can be possible but not it is possible it is just for understanding the essence. Is not possible to make a rich man enter into the kingdom of God. This is the essence of it.

So, but I'm not so pessimistic. I'm just saying I'm not so pessimistic.

I'm sure they will understand. But the greatest message that we have to understand that this matter...

[MISSING.]

Contents: 1982-08-26 **Conversation with Sahaja Yogis, The Sects, Lausanne, Switzerland**

Sahaja Yogi:... [... feel they are send by France].

Shri Mataji: Now another great [Christian country], Swiss-land. Now England are the people who dominated all over the world. Ended up in China and see who are they to get out of that place [their island]? They went everywhere; in India they stayed for two hundred years. And now they don't allow an Indian to stay for three months. And openly they are racist. These are Christians.

Look at the French, the great Christians of France. Christ has said: “Thou shall not have adulterous eyes." Every third lamppost you meet a prostitute in that country and every seventh lamppost you see a pub there. They are Christians, no morality and no respect for themselves, self and body, such indecent people. These are Christians.

Then Germans, when they fought, they killed so many people, they were still believing in Christ and they said we are killing the Jews, because they didn't believe in Christ. Now Jews are killing the Arabs because they don't believe in Jews. [Laugh.] This is just mad, I mean just think of Christ what would he think of the people that are supposed to be Christians? We must face ourselves and see that we have to do a lot, if we have to really make Christ living in us.

Alright, that's alright,

Sahaja Yogi: Bolo Shri Mataji Śhrī Nirmalā Devī ki! Sahaja Yogis: Jai!

Shri Mataji: It was a nice talk [UNCLEAR…]. I think you'll all have some, be free now, enjoy yourself [UNCLEAR…].

[Every body seems to have food.] [MISSING.]

Shri Mataji: I am giving you great information about all these horrible sects into every detail. And we are going to give you information, which should be really vitally important because we'll give you proofs, all right? Now there is one thing she has done that this government which is supposed to be very intelligent was going to get Muktananda to teach his Yoga to the prisoners and to the police too.

Sahaja Yogini: No, lunatic asylums.

Shri Mataji: Lunatic asylums, to make them more lunatic. But she, Marie Martine wrote a letter.

To whom did you write, Marie Martine? Marie Martine: I wrote to many people.

Sahaja Yogi: To the General Prosecutor of this country. She wrote accusation.

Sahaja Yogi: General Prosecutor of this country.

Marie Martine: And to the Federal Police Bureau, which answered also, very nicely, very positive and to the publishers.

Shri Mataji: She understands English there? Better tell her in Hindi. And that has really been now circulated. Did you tell her? Answer has come; something good is happening. But this horrible gentleman, Maheśh yogi, who has done no justice to you. You must talk about him, get all the information. He'll give you lots of it. He is the worst of all.

Another is this Raktabīja, this fourteen-year-old fellow. And you must send a letter to our president in India and to the Prime Minister.

The Ambassador of Spain told Me that the Queen of Spain told him that “Why should India export such horrible people to ruin our young” She said and this fellow is so powerful there that there are fifty thousand Spanish people who are completely under his control and are feeding him. Fifty thousand!

Sahaja Yogi: He could not survive the Indians.

Sahaja Yogi: He could now be in Kolhapur or in India because we lose him in Buchs, in Switzerland, *[UNCLEAR]* [Lausanne, going down].

Shri Mataji: Maheśh yogi? Yes, but he is now in America.

Sahaja Yogi: And the second question we came in Chur, why not we go to the place, is a commune in Switzerland, who gives the enlightenment, or University if there is there and we go to speak to the local, political, responsible persons in charge and to discuss, to say they can't fool, they are not worthy but they want to invest in frauds.

Shri Mataji: About whom? About whom? About?

Sahaja Yogi: The political authorities in the place from Switzerland where they are living.

Shri Mataji: But speak about whom? This Maheśh?

Sahaja Yogi: Yes, about Maheśh. Maheśh yogi.

Shri Mataji: Maheśh yogi?

Shri Mataji: Catherine was on the telephone today as well as I don't know which day to get some information from the Mayor, from the town people. I don't know what can he promise but they have a contact. They contacted them already to ask for information.

Shri Mataji: Really? But I tell you we'll give you the information if you want. We saved a lot of information. We have got this Linda whom we can send to talk to you. Even here it is you see, she's here.

She has been to Maheśh yogi and she can give you in the tape or you can tape Linda or you can tape on all of them as long as you don't give their names, you see.

Some of them, most of them. Linda won't mind because her interview appeared in, was the News of the?

Sahaja Yogini: News of the World.

Shri Mataji: News of the World, you see. Where she said this man raped her, openly she said and then abortioned her. And then she got into epilepsy and she used to be for three hours in epilepsy! And even when she met Me, you'll be amazed. She said he is in her heart, she can't give him up. “He loves me” you see. She was only seventeen and he was about forty-five or fifty, something like that! She was very naive, absolutely young. She didn't know at all about the man and she is the grand-daughter of a duke and all her money, everything, got lost. And her husband became the head of the Flying Academy of Scotland. He was a diamond merchant. There was another. I think I'll ask Linda to come down, that's the best and you give a full-edged, you see, picture of his crimes. He is the worst of all. You write a letter and also I'll tell you something very much later. I mean, she might be able to tell you. I think it's better if she comes and talks to you about it. She knows so many things about this man that you can really blast him and then send that over to Geneva. Unless and until you will give a full publicity about this man you cannot save him.

Sahaja Yogi: Not only that they took, take the money from the people but they make the people work for them, work the, all day without paying anything to them.

Shri Mataji: *[UNCLEAR]* doing it at that level.

Sahaja Yogini: Should we have here the tea?

Shri Mataji: All right. It's all right, doesn't matter. It's all right.

Shri Mataji: Yes, what is it?

Sahaja Yogi: Mother, *[UNCLEAR]* they give bribery or they, did You see that where they press all their publications, is in southern Germany and center of it? In Baden, yes.

Shri Mataji: They are all false.

Sahaja Yogi: In Freiburg, near Freiburg.

Shri Mataji: They just make them secluded.

Sahaja Yogi: They said they may call them Brahmacharia and then they have to live there, the men and they just work, growing.

Shri Mataji: They are cut off from the society, to live. You see this is the main point.

Sahaja Yogi: Will you begin to discuss in the journalist form a kind of coordination between Brian's information, between Arnaud's information, people like Me, about the sects?

Shri Mataji: We can just inform that and give it to Brian.

Sahaja Yogi: So with Maurice.

Sahaja Yogini: In France, Mother, there's a lot of information already but they need a bit of.

Shri Mataji: Brian is to be informed. Brian is the person in charge.

Sahaja Yogi: Mother, if You don't mind, I will send to Australia all articles I have about TM and I have got the article and the interview of Linda, too.

Shri Mataji: You have got it? And the one which was published about, you know there was a fellow who came to us from Norway who sent Me some publications.

Sahaja Yogi: Yes, he has many publications about TM, Mother. He collected that and I can do photocopies and I can send it to Australia.

Shri Mataji: All right and to Marie also? Marie Martine: Please, yes. I've wanted that article for ages.

Sahaja Yogi: I had that thing now for one month. You have just to call me and I will give it to you.

Please call me and you will be on the list.

Shri Mataji: Thank you very much.

Sahaja Yogi: And I can send it to Paris, Mother, if they want.

Another Sahaja Yogi: And copy to London and to London maybe.

Shri Mataji: What's the name of your organization?

Sahaja Yogini: It is called ADFI.

Shri Mataji: ADFI. You should inform all other organizations which are also doing the same kind of work.

Sahaja Yogini: It's a center of, to welcome people who want and need help and documentation. Their main job is documentation.

Shri Mataji: But then you communicate this media?

Sahaja Yogini: They have a press agent which can communicate. They know journalists and people.

Sahaja Yogi: I think it's the best-informed French-speaking center in Europe except the Secret Service.

Shri Mataji: Then why not send some information to Secret Service also?

Sahaja Yogi: Mother, they know the Secret Service. Secret Services are using Moon, for example.

Shri Mataji: What?

Sahaja Yogi: Moon Unification church is used and the also special from the Secret Service.

Shri Mataji: But see they do not run after scientology and the scientology is now settling down in Germany, I was told. Is it true?

Sahaja Yogi: We have scientology in Switzerland also.

Sahaja Yogini: They are terrible. They are very powerful in Switzerland, also.

Sahaja Yogi: They are the most dangerous people for media people, this scientology. Otherwise you're getting caught. You will get bomb into the house and so on, so on.

Shri Mataji: Really?

Sahaja Yogi: Yes, they gave some bombs in United States against journalists. They are writing against scientology.

Shri Mataji: The other one is Ananda Marga which is very violent. They tried to kill some Indian Ambassadors.

Sahaja Yogi: And they use techniques, brain manipulation technique used in the Korean or the Vietnam War, exactly the same.

Shri Mataji: Really?

Sahaja Yogi: Yes, it's so-called `white torture' by the specialists.

Shri Mataji: What torture?

Sahaja Yogi: White, torture blanche.

Sahaja Yogini: They call it white torture.

Shri Mataji: White torture?

Sahaja Yogi: Because it's a torture without, `sans trace'.

Shri Mataji: Without?

Sahaja Yogi: It's a torture without traces.

Shri Mataji: That is why we call all these Satano-logy! That is one sect we have not been able to save. From scientology we have not been able to give anyone realisation, very dangerous.

Sahaja Yogi: It's more dangerous to us so-called demonology or Satanic people because Satanists we know they are Satanic people. It's clear but the scientology, the people don't know what is it, how they are used.

Sahaja Yogi: London we have, three, four centers, near Brighton also.

Shri Mataji: I don't know what's wrong with the English.

Sahaja Yogi: They have more money than Sahaja Yogis. That's a very well-organized.

Another Sahaja Yogi: Any other cult has got more money.

Sahaja Yogi: For example, unification church of Moon has two accounts in the Swiss banks.

Shri Mataji: You see, it is because they are collecting money. We don't collect any money at all.

How can we have any money whatsoever?

Sahaja Yogi: And the money system of the Children of God is, all rich, all rich. You have no idea.

Moses David is, they are living now in India.

Shri Mataji: But now they are being found out.

Sahaja Yogi: Sorry.

Shri Mataji: These Gurus have been found out. *[UNCLEAR]* of criticism. The fellow was arrested.

Sahaja Yogi: But not Children of God, not Children of God.

Shri Mataji: Now what is that supposed to mean?

Sahaja Yogi: Since it's founded solely by a Protestant priest, an American arrogater and he's called himself Moses David and he founded Children of God. And it says he has a system [from parabolic sentence and some designing, some `de design', bomb designs, drawings]. Another Sahaja Yogi: Pretty, the pictures.

Sahaja Yogi: They are very pretty *[UNCLEAR]*.

Sahaja Yogi: And they are in connection with the actuality and politics there is *[UNCLEAR* British Training College was actually] and it takes out the young children and the young people. They say “go away" from the drawings and so on. And they use the child, the girls after some moment, some preparation, complete manipulation. They don't sleep very often, not so much food, they have to give all the money, they have ten percent for this, ten percent for this, twelve percent for Moses David which is living with his family in India and after six months approximately the girls are instructed to go to look rich men and to make prostitution to live, to love through the love for God and they make money like this. And it's all prostitution.

Shri Mataji: This is God's Children Protestant?

Sahaja Yogi: No, no this man has coming from Protestant sect but no, nothing to do with it.

Shri Mataji: But how do people allow their children to go there? They are very small children.

Speaker: They play with the law, Mother. They are always in the extreme limit of the law and in America when you found a church you can do everything, including take LSD because it's in the ritual.

You have the right!

Sahaja Yogi: Maybe these sects, Mother, take these children because I have read in the newspaper maybe it can be in connection. I have read it in the newspaper that millions and millions of children disappear every year in the United States and the parents, see and the who are in charge of the children don't know where they are going, how they disappear. Maybe it can be in connection with these sects.

Another Sahaja Yogi: Maybe, maybe. We know that the Satanic sects use children for sacrifice and some people use children for porno films also.

Shri Mataji: In India, they used to do it. I was told also Hitler used these Tibetans for their perverted purposes, for this purpose. Hitler, he used Tibetans *[UNCLEAR]*, [Hitler].

Sahaja Yogini: Mother?

Shri Mataji: Hitler.

Sahaja Yogi: What is historical certain in connection with this, Hitler has ordered it three times an scientifical, so-called scientific alpinist and scientific expedition to Tibet. This is sure. The rest I don't know.

Shri Mataji: What is it? Another Sahaja Yogi: He says that Hitler initiated, started expeditions to Tibet, three of them, scientific expeditions.

Sahaja Yogi: This is sure.

Shri Mataji: That's where he developed this system of mesmerism.

Sahaja Yogi: But I am very, but, Mother, I am sorry. I'm living with these people, very surprised that Tibetans gave him techniques for this man or through other men. I cannot understand this.

Shri Mataji: Yes, yes, they did, you see because is very easy, *[UNCLEAR* you/they] can use very much. Now this Maheśh yogi himself.

Sahaja Yogi: Might be.

So might be Indian fakirs or things like so also.

Shri Mataji: These Tibetans are the worst. My son-in-law has lived among these Tibetans and he said they are all doing this voodooism [vudu], black magic, all doing. They are only interested in the dead.

You see, they cut the hand, of the dead and bury that. They do all kinds of things. All rituals are nothing but of the dead.

Sahaja Yogi: I know that there's two orders of Tibetans so-called the Red coats are using old ceremonies from the bone, bones people coming from the Mongols. And sometimes they use bones, blood a little bit, it's true but it's gone too further but I can't imagine for this because I met an yogi, he was cutting one time his hand for Brahma and then the other for Brahma. He was a Hindu.

Shri Mataji: I've read these Tibetans are horrible. This Lama, what's his name?

Sahaja Yogi: Dalai Lama.

Shri Mataji: Dalai Lama, he was sitting next to Me, one day when we were with Shastriji. Lal Bahadur Shastri was

the Prime Minister. His wife could not attend any parties, nor any meeting, so I used to be there because My husband was his Secretary. And he was sitting next to Me. I was boiling, absolutely boiling and I felt little uncomfortable you know.

So Lal Bahadur Shastri, he knew about Me and said, “Are you feeling uncomfortable?" He saw Me. He said, “All right. You go and sit that side." Then he called the, our Foreign Minister *[UNCLEAR]*, “sit next to Me." He was a Sikh and he wouldn't feel any heat or anything, horrible Dalai Lama.

The whole, you see, establishment, if you see, is supra conscious because if Dalai Lama says, where the other Dalai Lama is going to be, where you will find him, when will return. All supraconscious and the, all this third eye business is also supraconscious, all supraconscious. All that is true. If you see their rituals are just to awaken the dead. The concentration is on Āgñyā. With the concentration in Āgñyā you just start shifting to the left or to the right.

Say how they pray. They put a piece of paper or some sort of a thing with a little hole and see the candle through that for the supraconscious movement. And for the subconscious movement they put a white paper with a black dot. That is how the concentration starts. Then the movement is there of other things like if any evil genius is there. Then they get near his cremation point and then capture this part of the, his body somehow, especially the skull.

Translator: Especially?

Shri Mataji: The skull. And the spirit which is still hovering, soul, I mean to say soul, gets after them and they capture this man. And then they use the soul. They have very great knowledge how to master this.

You see, the whole of Tantrism has come from Tibet. It's spread out later on the sixth or seventh century because, you see, the kings were very licentious in the central part of India, I should say, say from Bengal you go upward towards Khajuraho. And when, you see, this started and these people came to know that you can use sex in the name of God. It's the Jainists who picked up from Buddhists. That's another very, very fanatic cult we have in India, Jainism, the disciples of Mahāvīra. Mahāvīra was the contemporary of Buddha and these people were working as ministers to the kings. Now they wanted to establish their own temples with the money of the king.

So they went and saw these kings and told him, them that “We will try to make a live show outside the temple which will show all lifestyles of sex. And we will also hold many competitions and invite people of great art to create beautiful murals and beautiful sculptures expressing perverted art, the act of sex, act of sex." Now the Tantrism is based on one principle, how it manifests. You see, when the movement of the attention starts moving, say, to the subconscious into the collective subconscious, the Divine tries to pull you out, tries.

Sahaja Yogini: Mother?

Shri Mataji: The Divine tries to pull you out of it. But what happens is that these Tāntrikas discovered that if you can insult the Divine or a deity and create an area where they are humiliated, for example, the other day the way

they humiliated Me, I might have said, “I don't want to go that temple anymore." By doing ugly and dirty things that Divine cannot bear, doing it again and again, again and again, say, in a temple, the whole temple can become devoid of the attention of the Divine. Then they can use this temple to manifest anti-God activities.

The evil forces are definitely afraid of the Divine, no doubt.

You have seen how people shake before Me, all mad people, anti-God people, every type of people, how they shake before Me. But the Divine cannot get into filth, you know. By creating that filth, the movement, say, in the subconscious goes like this in a slanting way and curls down. They create a dirty, or you can say a filthy, a horrible obnoxious hell.

So the Divine does not go there. And they knew about it.

In Nepal, you go, it's a, houses are made, even temples are made of wood that is called Katmandu, made out of tree's wood. And they wanted to create an atmosphere of negativity there.

So they convinced the artists that if you put figures which are not liked by the Divine because they are filthy, sexy and dirty then the deity of thunderbolt, which is a virgin, will not come there. And the houses will not be destroyed, because She is a Kanya. She is a Kumari. But this they accepted. Poor simple, you see, artists accepted and they made a horrible statue.

If you go and see in Nepal it's true, I've been told, you can't see normally not on the lower ground.

When you see Japanese, you see, having their blue lenses on a special type of a ladder, then you start wondering what are they doing there? Japanese specially. That is very much visited by Japanese and Germans.

Sahaja Yogi: Japanese is not Kumari. Kumari is living now in Nepal.

Shri Mataji: Because Kumari is maiden. [The Sahaja Yogini translates and says Japanese have very big cameras.] Shri Mataji [joking]: Telescope.

And when you see there all that thing, then you start wondering, “Why are they doing it?" It's so insane. And it's true that the Goddess of thunderbolt has not destroyed these temples because She can't go near the filth which is there.

But there are some other forces which can work it out.

So tremendous filth was created and negativity just spread.

But why did they do it in Nepal? Because Nepal has two tremendous deities which have come out of the Mother Earth, one of Ādi Shakti Herself, Holy Ghost and another is of Pashupati Nath, which is Shiva. He is Shiva, just Shiva, not the Shakti and that is a very powerful temple. You can go and see the vibrations.

Sahaja Yogi: It's very strange people in Pashupati, Mother. You can't stay three days. After, you are finished.

Another Sahaja Yogi: It's not allowed.

Shri Mataji: It is because that which is created, destroys the vibrations and deport are from whom? Nepalese. All the art is Nepalese. It's not Indian art. All that is Nepali, yes, Nepali style.

But I think people still understand innately. They don't put their sindoor here [bindu at Āgñyā]. The women of Nepal, they put it here [at Virāta point]. Now this is the place for Virāta, Akbar, Viṣhṇu, because they have got the Shiva there, so they protect their Viśhuddhi. Such a power of Shiva is there, so they don't have to worry. And Sītā was also born in Nepal. She was Nepalese. Even if you see My face, it has the Nepal features. Many mistake Me for a Nepalese. Mahatma Gandhi used to call Me Nepali.

So it's a Mongol feature.

Among the paintings that I've seen some are so much like My face, that I am surprised. The most powerful deity that has appeared in India is in Navindya.

Sahaja Yogi: From where?

Shri Mataji: In that high mountains where the temple is.

Sahaja Yogi: Saptashrungi.

Shri Mataji: Saptashrungi, very near. You remember? She doesn't remember?

Sahaja Yogi: Sophie, you don't remember?

Shri Mataji: Saptashrungi. That's very near, what that place is?

Sahaja Yogi: Nasik.

Shri Mataji: Nasik also, very good… Is a *[UNCLEAR]*.

Sahaja Yogi: Nepal, that's Nepal.

Shri Mataji: Nepal, Nepal. There is a big hill you should have seen. No? Saptashrungi, that's the most powerful one, I mean regarded, because Mārkandeya, you see, worshipped Her many years back. She appeared in the stone to Me.

Sahaja Yogi: Ma, would you like a picture?

Shri Mataji: And her face is very much like Mine.

Sahaja Yogi: Your face like Mā Anandamayee?

Shri Mataji: Like what?

Sahaja Yogi: You have a face like Mā Anandamayee?

Shri Mataji: Mayee [means]?

Sahaja Yogi: Mā Anandamayee.

Shri Mataji: No, no, hers is very thin. She's a Rākshasa.

Sahaja Yogi: Horrible Mā Anandamayee...

Shri Mataji: She is another one. I must tell you about this Mā Anandamayee. Our Prime Minister has got *[UNCLEAR* her]. All her disciples suffer from diseases, kidney trouble or angina. They always quarrel with their husbands and have divorces.

[Looking at the photograph and discussing.] This is Saptashrungi. And this has appeared in the, imagine, in the, nobody has carved. See the vibrations.

Sahaja Yogi: Yes, Mother.

Shri Mataji: Come, see the place where it is. It is on the hills around the place. This time you come to India and you'll see.

Sahaja Yogi: Mother, it's true Buddha is born in Nepal, not in India?

Shri Mataji: What is it?

Sahaja Yogi: Buddha is born in Nepal not in India, but as this place it was at His time India but now is on Nepalese territory.

Shri Mataji: Kosambi, born in Kosambi. There was a dispute on the border. I don't know what has happened.

Buddha was born in Nepal but that has now come to India, so I mean it is. Imagine this has come up out of the Mother Earth.

Sahaja Yogi: With all the colours and everything?

Sahaja Yogini: This is the rock itself, was no photograph effect.

Sahaja Yogi: You have been there, Ma?

Shri Mataji: You have been there? Marie Martine was there.

Sahaja Yogini: It's very beautiful.

Shri Mataji: I'm just tell them about what we got from Portugal, experience of the Portugal. And you have got it with you?

Sahaja Yogi: No, I haven't Mother. It's at Nightingale.

Shri Mataji: In Portugal, I must say it's a very good experience in Portugal. In Portugal, the man who has the keys of the halls said, “Tomorrow You have to finish the program very fast because I have to go to a fair." So immediately I told him, “I am coming with you to the fair." He said, “Why?" I said, “Yes I want to come." And we took all the Sahaja Yogis and went to the fair and there I asked people, “Is there any temple here or why is this fair?" So they said, “There's a temple here, been built to the glory of the Mother and in ancient times two small children running after a hare, running after a rabbit and they came to a point where they saw a light in a niche and they saw the Mother, long time back and they went to call everyone. But when all the people came in, they didn't find anything in the niche. But they tried to explore the niche because the hare had gone through the

niche and when they pulled out their hands they found a statue like this, out of a stone, beautifully carved. It was not carved it was like this made by nature, you see. They pulled out the statue from somewhere like that and they put it there calling her the Mother of the rocks." The vibrations were tremendous and her face was just like Mine.

The boys have taken out the bulletin and have gone.

So how things are discovered in modern times, but without vibrations, how will you know? Like that Musalwadi. There is a village near Rahuri where we have a center and they invited Me in Musalwadi to give a huge program. On our way Dhumal, one of the organizers, told Me that this place has a very strange history. There is a bund you see *[UNCLEAR* and towards this/because this was] bund comes from English people long time back and when they tried to build here, the whole night they would build and the whole day they would build and next day it would be all destroyed, that part and they could not understand.

Sahaja Yogini: I have some pictures also.

Shri Mataji: Oh, you have here? And the engineer got tired.

Later, one realised Soul was passing that way. He was a Muslim and he told that this is a place from where the vibrations are coming out. You can never build anything on this. You have to go in a circle.

So the engineer wrote this in his history, in his report and the bund is little circular in that area, like loops.

I went and saw the place. It was the Sahasrāra. I could see the three powers coming down and all that so, so well and then Shiva and that was a very hot day. As soon as I stepped on that soil, tremendous vibrations, cool.

So I told them a temple must be built. This is the Sahasrāra.

So they have put a stone with My name on it that the opening of this temple has been done by Mātājī Nirmalā Devī. It's such a tremendous place. Just have a look, so vibrated. I mean, this is a fact. You can see this. Have you got that photograph where there is rays of light coming on My head?

Sahaja Yogi: Ha! Yes, I understand. Oh no, Martine is the great photographer. I only have a few pictures.

Another Sahaja Yogini: *[UNCLEAR]* cold.

Shri Mataji: Don't mind. I've got what I wanted. I won't have anymore.

So what is it now? Please go ahead. He likes fruits. Go ahead. You eat for Me also. Even My part you have to eat. You can give Me some grapes.

Sahaja Yogi: Mother, today it will be not so heavy and difficult. The people of this province are not the same as in Geneva little bit more quiet, probably will be more quiet.

Shri Mataji: Yeah! Will be better, for Me, very good. But you see I don't blame the Western people for this because the time when they should have been checked not to deviate from God this is for Mother, you see. But it's a very big one I would definitely agree. Oh, they have

sent you copies of this who are a bit enlarged, with all kinds of colours.

Sahaja Yogi: Mā, at my house while one day I was in meditation, as one candle fall down onto Your photo, Your picture and instead to burn the picture it made a light on the Sahasrāra.

Shri Mataji: Sorry.

Sahaja Yogi: While I was in meditation, one candle fall on Your picture and instead to burn the picture it make a light on Your Sahasrāra.

Shri Mataji: Oh, I know this photo. He told Me that's why when I put My hand, you know, up there, by moving, it proved with that, it is the, that even attention it goes up.

Sahaja Yogi: There is something in Nepal we have some rolling views houses, rolling views pictures and we have flowers turning in the direction of these pictures. Might be if we have Your picture the flowers bloom this side.

Shri Mataji: You see, there is no materialisation, no materialisation, not materialisation. But what happened that day was a Shiva Pūjā. We have done it on a Shiva day, in Shiva's Pūjā. They took My photograph of My feet and actually they saw flames coming out of My three fingers which were burning and here also on the left Viśhuddhi, flames, such is the Ādi Guru's.

This particular photograph [of Mine], let Me see, there were six expositions of this, last summer when I was sitting outside an old *[UNCLEAR]*. This, this particular one, the one that is there.

Sahaja Yogi: That is Cheryl.

Shri Mataji: Is Takinia. [Cher], Cheryl, [Cheri] Australian Sahaja Yogini. And this light that is the place called Takinia. Takinia, means `a gentleman called Nia'. Nia means a realised Soul. When a Muslim is a realised Soul is called as Nia.

Sahaja Yogini: A fakir.

Shri Mataji: And the name of the place was Takini.

So in India we usually respect if somebody is a realised Soul whether he is a Muslim or anything. Once he is a realised Soul he is respected.

Now this Takinia there where I was speaking, because I knew it was a vibrated place and they told Me that he's buried here also, long time back. When I was giving lecture, suddenly this light started falling on Me. And very joy-giving, I knew and six photographs are there and in some of them I'm extremely joyous just as I was bathing into something. But in the seventh one, I put My hand like this and it has stopped. These things cannot be explained! So if there are fake Gurus, if there are false faiths, then we must know there has to be the real one. If there are plastic flowers we must know there has to be a real flower to give a copy. Now this Kṛiṣhṇamurti was another horrid fellow. He is brainwashed.

He says, “Just believe in yourself. They are all false. You are your own Guru and you can become realised." I've seen people of this Kṛiṣhṇamurti they blah, blah, blah, blah, blah, blah. They talk just like him. But the best was the grandson of this Dadaji came to see Me; grandson of Dadaji. His Guru was Babaji.

Sahaja Yogi: Not Sāi Baba?

Shri Mataji: No, this is another one, Kriyananda Guru.

He said because my grandfather was Dadaji, naturally in childhood, I had to do Kriya Yoga. But I found the people who were doing Kriya Yoga they were not at all changing. They were very bad people and they had bad eyes for children also and horrible people. They used to wear that Kashaya, orange this thing, shaved their heads off, cut their tongue, cut their tongue and turn it back for kitchen. There are so many now walking with us achieving nothing! So he said, “I became a big Kriya yogi but then I realised that this is all stupid and very dangerous!" So he took to Kṛiṣhṇamurti. When Kṛiṣhṇamurti started talking, he was very enamoured because he convinced him that they are all false.

And then he said, “I started talking like Kṛiṣhṇamurti myself. I found myself giving lectures just like Kṛiṣhṇamurti. Just like a machine talking big, big things, the same acting and when people said that they would like to publish my lectures I got the fright of my life because I was honest about it. I knew I was nowhere, anywhere a realised Soul and I was talking just blah, blah, blah, blah! But now I have come to You Mother. I have surrendered to You but I am extremely complicated case. Please work on me." Then I came to London and the Sahaja Yogis gave him up, he was so bad, so very horrible. But I know of one doctor who got ill, who was a Kriya yogi and who is dead. Had a very miserable death and his wife was is now a Sahaja Yogini.

So many stories, every part of your life is full of stories. There's no end of these horrible people. But the most annoying thing is that I always feel I have known all of

them but suddenly somebody comes with another name. Now once you try to finish them and when you want to finish them and want to take to the other side of the fanatic and all the intellectual nonsense there are still many are coming out like mushrooms.

Sahaja Yogi: The moon people have seven new names in the two last year on scientology, five names of organizations. In words nothing to do with scientology or moon but practically same thing because the society *[UNCLEAR]*.

Sahaja Yogini: They changed their names. They changed the names. Scientology becomes the Dianetics, for example.

Shri Mataji: Really?

Sahaja Yogini: So people think it's something else, you see, but it's the same.

Shri Mataji: Then really I don't know.

Sahaja Yogi: Only Christians are not doing like so.

Shri Mataji: Only?

Sahaja Yogi: Only Christians.

Sahaja Yogis: They are very charismatic now, very charismatic. Or they go to the psychiatry.

Shri Mataji: And charismatic you must be. We have one charismatic *[UNCLEAR]* program.

Sahaja Yogis: He's here, Mother. He's here.

Shri Mataji: Oh, yes, yes, I couldn't recognize you.

Sahaja Yogi: It's a charismatic trick.

Shri Mataji: I tell you really he was so poor. He suffered so. Oh God, you can't imagine. Well, I mean, I was so full of tears but I didn't know what to do because he could

not talk, you know. And when he fell down then only I ordered them to get out. They would not give Me any chance, you see, just to enter him. And once I said, “Stop it” all ran away with all their paraphernalia.

Sahaja Yogi: Like it's told in the Bible.

Shri Mataji: Like what?

Sahaja Yogi: Like is told in the...

Shri Mataji: Yes, yes. They all run away.

Sahaja Yogi: You were talking initially about Lamas, how they manipulate spirits or what happens to, what happens when somebody dies. I mean, why, their spirit also. Then it has to wait so many years. Or why, for example, they choose this person or another or why they attack for specifically Sahaja Yogis. Are they just thinking they are going, their waiting time in hell is shorter or what? Why do they attack us, Mother? You said that we shouldn't live, for example, close to a cemetrey, that we shouldn't go for the cemetrey. You know, what, how does it really operate, Mother?

Shri Mataji: You see, when a person dies, it depends on the person how he dies and also on the personality. Supposing there is a mother who dies leaving a little baby. Then the mother feels that she has left the child alone, you know and she is worried about the child.

So she just does not go to the area where she has to be after the death. She hangs around the child. Because only the element of the earth falls off and the rest of the elements are there and also water starts evaporating, so that we don't see it.

The Kuṇḍalinī of every person rests on his head and the spirit rests on top of that. While the people who die in this kind of a condition are in a way harmful to the child but not to the other people so much. But say there are sinister people, say some drunkards. They die, then they find somebody who is a drunkard or who wants drink or maybe there is somebody whom they can use for drinking. And, say, in much the way that if they have left some bottles half-drunk and they are miserly, so they want to come in a man or a woman, whatever it is and they become their slaves.

There can be spirits and spirits for if there is a man who is a man with, is a womanizer; means he can enter into someone who becomes a rapist without understanding why is he raping. Homosexuality! Even the so-called homosexuality is also due to the possession of a woman by a man and man by a woman. We have also cured so many of homosexuality. Now there could be a man who is a murderer and a bad man, a criminal. He can possess also someone and suddenly someone can become. Or somebody who does too much of racing or who indulges into anything too much. It's all a question of using others.

Sahaja Yogi: Mother, on which level does it take place, for example? If somebody like that, a criminal, dies in Lausanne, would he catch, would he get on the nearest person in Lausanne or would he just go on the best available ride, right around the world?

Shri Mataji: Depends on, you see, how they move on in the whole world. They maybe can get on top of a plane and walk across.

Sahaja Yogi: Flying carpet? On a flying carpet?

Shri Mataji: Because supposing they have never seen the world, he doesn't know all the bad parts of the world. Then he may not dare. But then there is a very big collectivity in them. They, you see, communicate with each other. I'll give you a very good example.

My first Sahaja Yogi disciple was a Gujarati diamond merchant, very nice man, very nice, the first one. As a man, because the lady was another one, as a man. Now this man once called his friend to greet somebody *[UNCLEAR]*, his friend and so he went to the station to receive him and the fellow never appeared.

So he went to the post office to find out. There he met a man in the post office, working in the post office who said that “Why do you want to call such and such man? I know you want to take him to Mātājī and Mātājī, you see, is regular information department, better than yours and She is doing such a great work. Why do you want to take this problem to Her? Don't disturb Her." You see, very convincing also, very convincing.

This Chandu Bhai, poor thing, was a simple man and by that time I had not started talking about bhoots.

So he did not understand the way this fellow talked to him.

He said, “There is a temple and such and such place coming from Bombay [Mumbai]. You go there, take one coconut and fruits and there is a Gaṇapati temple and the fellow who is there, is the priest, he'll tell you all about it." Poor Chandu Bhai went with his friend to that place and put the coconut.

So he told him that “No, no, no, no this wouldn't work out, because is a very difficult work, you see. Next time

you have to bring a silver plate for Śhrī Gaṇeśha of this size, this size” and the house name he told.

So Chandu Bhai came home and told his wife. Now Chandu Bhai's wife was, the wife was worried about her daughter who was in divorce in America.

So his wife was a very half-baked Sahaja Yogini.

So she told Chandu Bhai that “I want to go there. Please take me." So Chandu Bhai, poor thing, he had to take her. He asked Chandu Bhai's wife to bring something of diamond also. She secretly also gave him.

After that Chandu Bhai came to see Me and his heart was in complete catch. I said, “Where have you been?" He said, “Why?" I said, “Tell Me the truth. Where have you been?" You'll be amazed; still there were vibrations flowing a little, little. Then he told Me the whole story.

I said, “Your heart is caught. You are in for a heart trouble!" I gave him treatment and I told him, “No more go to that man." And Chandu Bhai said, “All right, Mother. I'll never go." But his wife was very negative. She called that man to the house and he again got a heart, really got a heart attack and when he got the heart attack and he put vibrations he got all right. But this negative woman called a doctor who gave him an injection and when he was given injection, told Me Chandu Bhai has died. There is such a communication. I mean, so much you don't know.

There is another very senior Sahaja Yogi called Mister Pradhan.

[MISSING.] He came to Me. He got cured, passed his LLD, but he was possessed by some sex maniac or so.

So because of that he could not sort of come up in Sahaja Yoga, always used to oppose Sahaja Yoga *[UNCLEAR]*.

So we told him not to come to programs. One day a lady came who was ruined by this, another horrible Guru who, what's his name? Who was in Nagar, a Parsee gentleman.

Sahaja Yogi: Meher Baba?

Shri Mataji: Meher Baba. Oh, horrible! And she went into trance and started telling about Meher Baba, how he used her for sex! This son of the man came rushing into the hall.

And told her, “Don't tell anything to Mother. Don't tell anything to Mother." He used to live so far away. He came rushing, running from his house to the hall and rushed inside the hall and stopped.

“Don't say anything. Don't say anything." He just put his hand on her mouth. And he had never met this lady.

So she just pulled him aside.

She said, “Jagadambā, Jagadambā, Jagadambā” and he started trembling then.

So Pradhan said, “See the fraternity of the bhoots. See their friends." I mean, so many, thousand and one I can give you. *[UNCLEAR]*. They read minds, this materialisation they do, all those sorts of things, out of that play of bhoots only.

Sahaja Yogi: Mother, to what extent can the bhoots be regimented and used by the negativity, in other words of an army of bhoots as it were there? Positive or negative?

Shri Mataji: To Me, actually it's different. You see, the collectivity of the bhoots and the collectivity of the Sahaja Yogis is extremely different that in the first case

they are not free and the second case they are absolutely free. You see, whatever horrible things Hitler has done he has used bhoots because human beings could not do that. How could they kill somebody in the gas, little children? I mean, it's impossible! I went to Berlin and I felt I was in a collective or bhoot cemetrey, horrid. At the slightest pretext I ran away from that stand. I have been to all these places in Germany. I have been to Russia. I have been to Mainland China. I have been to East Berlin. All the tricks are there.

Sahaja Yogi: Mother, I was very hurt from lot of emotions, because you say about the Dalai Lama. I cannot, I cannot compare all Tibetans to Dalai Lama because one thing is I saw people going in a house without using a door. I saw one man stopped the rain and also saw some other people make it. One man going like in a distance and can be so sharp only a horse can do it. All these are bhoots? That's all bhoots?

Shri Mataji: These are bhoots. Why, because God is not interested in these things. What is His interest in these things? Just tell Me. Is that God has to do? Just use your understanding. Why will God want you to walk so fast like a horse? He doesn't want you to be like a horse, does He? You are an intelligent man. Use it. Dalai Lama is a very posh fellow you see, but he is a big parasite. He used to take his food or drink in what, do you know, in a gold cup. He had everything gold in his house like your Pope, great Pope and he sucked these Tibetans, completely sucked their blood! Now he has come to India to suck our blood and there have been questions about him in the Parliament. “Why do you have this parasite

here? Why should we look after him?" It's some sort of a prestigious issue for Indians to have him there.

Sahaja Yogi: Political.

Shri Mataji: Not so political because, you see, there's a big cult following the Dalai Lama all over the world. If they ask him to get out, people will never understand.

As you yourself said, see. “Ha! Dalai Lama, oh, really great." Just for that thing you saw. They had given Me a plot of land and then they said, “No, no, no, no here's Dalai Lama's somebody else to come." I said, “Why? Who this Dalai Lama is?" He said, “Oh, we know he's our pries a bad fellow and we have to just do it to show. Otherwise he is so bad that if we do anything to him, he'll immediately go to Americans and publicly he will denounce us." See everybody is following. Nobody is going to keep him in his house. It's very good idea. You see, if they like him so much why don't they have him? We'd be very happy to get rid of him but nobody wants to take and he is using this situation. Nepalese do the same because they are precariously placed, Nepalese.

So what they do? Indians have to please them because they are precariously placed. They are making Indians, the whole road from India to Nepal is built by Indians. All the money is spent by Indians! They are using their position very well because they know that. And here they are having a little rapport with Chinese also which used to keep Indians dancing.

Sahaja Yogi: The thing which puzzled me very much, it was just there was some accident but this in absence of Dalai Lama, this puzzled me very much.

Shri Mataji: What did they do?

Sahaja Yogi: Oh, it was a monk who was killed by hundred and fifty bees, died after two hours, in Dharamshala.

Shri Mataji: Who died?

Sahaja Yogi: A monk, a Tibetan Lama.

Shri Mataji: Died?

Sahaja Yogi: This time it could happen only when Dalai Lama was not there.

Shri Mataji: I will tell you what it is. You have read the Devī Māhātmyam? Read the story of Bhramara Devī. Rākshasas can be killed by Her. She has killed them, actually is the Bhramara Devī.

They were all horrible parasites.

Sahaja Yogini: Mother, if You would like to take some rest...

Shri Mataji: I will. Imagine these monks. Why should they have gold cups for themselves? You see, for a saint nothing matters. He will never care for comfort, never, it is the first point. Now you can come and see in My house how comfortably I live, that My house is very comfortable. But if you put Me even in the villages of India or anywhere then it's all right. In the bullocks cart, it's all right, nothing matters to Me. And that for a saint, he is like an emperor, nothing can dominate, no comfort, nothing. He's above.

But for a person who says he is a king and asks for this like a beggar this, that, then what is, is he a king? I mean, of course, if somebody is a Divine personality to have the best of vibrations there must be a, say, proper metal, it is important, to suit good vibrations first of all.

But people even have washed My feet on a plastic bowl, believe Me, even the powder in the plastic, food in the plastic, which in My own house I would not even touch and allow it to come in the house. To Me it doesn't matter but it should matter to others.

Sahaja Yogini: When we have gold, Mother, it will have be only for You.

Shri Mataji: I am not thinking I am going to survive that long. Don't you worry. I don't need any more, you see. I don't have, but I am saying that it was, it is said in the Book that for the Goddess you have to use gold, no doubt, or the silver, but that doesn't mean that Dalai Lama is a Goddess.

There's another one coming up now who is supposed to be Shañkarāchārya. He's making a big chatra if you know what I mean, what you call those like structure they use, umbrella, gold umbrella. Can you imagine? Such a big one and he is only four feet five inches in height. And that umbrella once falls on him. That's the best, all funny happens.

Sahaja Yogini: When? When it happened? Another Sahaja Yogini: No, no it's not happened yet.

Sahaja Yogi: It will happen.

Shri Mataji: They have not been able to collect so much gold so far. Another one is Aga Khan who was weighed.

Sahaja Yogi: Who was Aga Khan?

Shri Mataji: That *[UNCLEAR]* fellow Aga Khan. He weighed himself. He used to take first into silver when he was twenty-five years of age, of his weight. And he was very fat, like that. He took silver of his weight. Then he got to

diamond, no, no, no, got to gold. Then he died. Thank God for the diamond.

Now his son is there.

Sahaja Yogi: Two, two sons.

Shri Mataji: Two sons but the one who is now the Aga Khan. He is member of the UNO and the another is the refugee one. I have met him.

Sahaja Yogi: No, one.

Shri Mataji: One is the Aga Khan.

Sahaja Yogi: Yes, but the one who work for refugees has nothing to do with Ismaili position.

Shri Mataji: Yes, he lives separate. Whatever it is, both are useless people. And the one who is Aga Khan is the worst. It is said if they enjoy women in this life time their disciples will enjoy women in the heaven. What do they think they were doing? You laugh but they don't. They think he is very holy and find women for him...

Sahaja Yogi: His brother is also laughing about this.

Shri Mataji: Brother laughs, laughs but he should say his real name. Why should he call himself Aga Khan? That's not the way. See, what I am saying is, he is not a saint.

All kinds of things these Ismaili are doing in front of My house, at the gateway when we get out on that Premier Road, Old Brompton Road. They are building a huge, a huge big building, Ismaili Center.

This will never be finished, I know. Horrid! They will all die with their palaces. We had only one Rasputin once upon a time; now there are so many. The best part of it, they are interested only in money and women. There is

no purity and that's the advantage: that all impure and false things have to fall because they have no base.

They'll all be exposed. That is the best death for them because if they die they can again use their Satanic forces from the subconscious. Let them live in the present tense and get exposed. Let all the seekers of the world get out of their clutches so that Sahaja Yoga works. May God bless you all! See if somebody says about Pope in India they will be equally hurt when I say about Dalai Lama

Sahaja Yogi: I was Catholic.

Shri Mataji: You know, My husband was so impressed by Pope you can't imagine! He said, “He is not like Dalai Lama. He is a much better person." He was so impressed, he went to see him, you know. He said, “Ha! What a man. He was very nice, very good, very religious. They had silver and gold, you know, for the tea. They had, he said very good things they had there." I said, “It's all other people's money. They aren't their own." My husband knows about Dalai Lama because he was with the Prime Minister but he doesn't know about Mister Pope.

So he said, “You mean to say he is just like a parasite as Dalai Lama is?" I said. “Yes” I said, “this Pope has no source of income of his own." He could not believe. He said, “I'll find out." I said, “You find out for Me. It's a good thing.

So I see where *[UNCLEAR]* he had the dinner set." He doesn't have any personal money of his own. Imagine!

Sahaja Yogi: It's for the visitors.

Shri Mataji: It's for the visitors, yes. He himself is a visitor. See, you should see his apartment. By chance I have seen his property in Vatican because first time when I went, I went as a VIP. I had to come to the VIP, certainly I did. I tell you, oh God, such a lot they have. I don't know what are they going to do with the brooches of silver and gold and all emeralds and what are they going to do with lady's ornaments, I don't know, there! And these Spanish things, you know, these necklaces they wear, these all diamonds.

Sahaja Yogini: There is a gentleman on the telephone. His name is Kelly and he was in Geneva and he has a fundamental question to ask You. And he said that it was more difficult to talk to You than to the Pope. He would like to meet You.

So I said, “Just a minute. I will go and ask." And he said, “I am sorry. I cannot come this time." I said, “Listen, if you want to..." [Talking about this man.]

Shri Mataji: Pope's more difficult than anybody else, Pope you cannot go near.

Sahaja Yogini: I said to this gentleman, “If you don't let me go and ask I won't. This is more important than the Pope so you have to take your time too." So he said, “OK." So would you like to put him on?

Shri Mataji: What does he want?

Sahaja Yogini: He is from Geneva.

Shri Mataji: Yes, Martine, you tell Me.

Sahaja Yogi: We talked to him yesterday, Mother. He is a curing person. He thinks that he is realised and he has

understood everything but he would like to talk to You nevertheless, *[UNCLEAR]* a bit higher.

Sahaja Yogis: Please, Mother, no, please Mother. It's a waste of time, Mother, Your time Mother, Your precious time!

Shri Mataji: All right, tell him that Mother has sent word that you are not a realised Soul. Take your realisation.

Sahaja Yogini: You knows he was saying and it was, you see, just the beginning that we are telling and so on, so on. [MISSING.]

Shri Mataji: What is it?

Sahaja Yogini: These people, they are headache. They are headache for You...

Shri Mataji: What did he say?

Sahaja Yogini: He said that he was feeling the negativity when they asked him to see You and so on because they said, I said that “No, you will have to wait” and so on and he can't wait, you see.

Sahaja Yogi: He was maybe a bit hurt because I said he had to wait. I don't know, I forgot his name.

Shri Mataji: So I can see him now sitting down here. I don't have to go to the hall.

Sahaja Yogi: No, no, no he's not here in the house.

Sahaja Yogini: He is on the phone.

Sahaja Yogi: And if he wants to come and talk to us, we can explain the things, you know. Mother, it is not Your job to do these things.

Shri Mataji: No, you should say, “Mother talks to only realised Souls. You are not."

Sahaja Yogini: They can be a headache for us but not for You.

Shri Mataji: You think *[UNCLEAR]*. She has so many things to be done. You are not so important because you are not a realised Soul, all right? Marie Martine...

Contents: 1982-08-28 **Interview Radio Suisse, Romande II, Switzerland**

Interviewer [in French]: *[UNCLEAR]*.

Shri Mataji: It is with every religion. [Yes], all of them. But not the believers; the people who originated the religion are the real people, but the believers diverted.

[Translation and question in French.]

Shri Mataji: As I said, I won't like to limit Myself as anything or describe Myself as anything. It is for you people to find out what I am.

[Translation and question in French.]

Shri Mataji: Jesus Christ is a great incarnation of God's power of love.

[Translation and question in French.]

Shri Mataji: Because truth is one...

[Translation and question in French.]

Shri Mataji: It's described that the Holy Spirit has the Cool Breeze.

[Translation and question in French.]

Shri Mataji: The experience that they talk of is from St. Paul.

[Translation and question in French.]

Shri Mataji: The experience of the power of the Holy Spirit has to be a living power.

[Translation and question in French.]

Shri Mataji: Now this technique is called as `Sahaja Yoga'.

[Translation and question in French.] [MISSING.]

Shri Mataji: Means it is spontaneous.

[Translation and question in French.]

Shri Mataji: Now, first of all let us see the collectivity of it.

[Translation and question in French.]

Shri Mataji: They call Me Mother.

[Translation and question in French.]

Shri Mataji: That's what I am coming to.

[Translation and question in French.]

Shri Mataji: And that possibility is given in all the religions and described in all the religions.

[Translation and question in French.]

***Contents: 1982-08-28*, Public Program, These are Days of Confusion, Freiburg, Germany**

[Discussion about a request to begin with questions.] Actually only I am here for a day and the... if you have time we will have questions. Otherwise you can write to Me. Alright? *[UNCLEAR* Now loudly you have to speak alright?] Now should we have... if we have time we will have questions later. Alright? Thank you.

I bow to all the seekers of Truth first of all. The seeking of Truth has been going on this Earth for thousands of years. All over the world we can find out that.....

***Contents: 1982-08-28* Conversation with Sahaja Yogis, Freiburg, Germany**

[MISSING.]

Shri Mataji: [Fraud] he is?

Sahaja Yogi: Very, very, very, very.

Sahaja Yogis: Devil. Devil.

Shri Mataji: Devas.

Sahaja Yogi: Devil.

Shri Mataji: Oh, devil. He is a devil himself. Why should you work with him? He's, he is Rāvaṇa, who had said to Sītā that, “I'll molest the chastity of women of India." But he could not do it much.

Sahaja Yogi: No.

Sahaja Yogini: Mother, has the second one got the powers of Rāvaṇa as well?

Shri Mataji: Aāa?

Sahaja Yogini: Has this second one got the powers of Rāvaṇa, or one of Rāvaṇa's brothers he is?

Shri Mataji: What's it?

Sahaja Yogini: The second.

Sahaja Yogi: Rajneesh.

Sahaja Yogini: Rajneesh. Has he got the power?

Shri Mataji: I don't know. These are stories I am telling you. I don't know. I'm not bothered.

Sahaja Yogini: Mother, as well is [one of] printed matter in India. One of Your disciples collected anything printed out *[UNCLEAR]*?

Shri Mataji: No, I can ask. I can ask.

So I am able to tell you all these things. Hmmm. See now, the story about him, another story, seem to be many stories. Another story they said is that Rajneesh

was never shaved since he was a diabetic patient. And as a diabetic patient he used to eat a lot. That's good.

He got a neck problem, was not very seriously sick. But they took a certificate from a doctor saying that he's very sick because he wanted to go to America, because something serious was discovered about him in India.

So he ran away. And just like a criminal runs away. And before everything [became] more serious he ran away. He's the same person, but he said that he's sick just to escape the police. Or they say some people who are manoeuvreing him, who were manoeuvreing him played this game. And they took him away from there to America, saying that he's sick and he has to go there. “Now he's sick.

So we want to take him." And they couldn't say no on that premise. But the way he ran away, all his ashrams were burnt and *[UNCLEAR* evacuated/evicted]. And the way he had collected the lakhs of goods worth billions of rupees and pounds. Everything was gutted.

Sahaja Yogini: Rare *[UNCLEAR* goods/books].

Shri Mataji: Mmm?

Sahaja Yogini: Rare *[UNCLEAR* goods/books].

Shri Mataji: Rare *[UNCLEAR* goods/books]. He used to tell his disciples [he] used to send a list of *[UNCLEAR* goods/books] he wanted from abroad. And he used to read a lot.

Now, we have not covered about one more point, I think. It's about the dangers of Sahaja Yoga. One danger of Sahaja Yoga is that you don't pay any money for it. Second danger of mort is that your health improves and

that you don't pay any money to the doctors. Third danger of Sahaja Yoga is that people no more are confused and they have a mental alertness and dynamism. Fifth is that you become very creative. Sixth is that you drop out all your habits and no more slaves of any habits. Sixth is you, you lose your identifications which are false and man-made. I've lost the number. Which is the next numbers [present]? Sahaja Yogis: Seven. Seven is the next number. Seven.

Shri Mataji: Seven. Seventh is that you become capable of giving realisation to others and of understanding Christ as a living entity, as a living reflection you can *[UNCLEAR* say/see Him] within yourself.

Sahaja Yogi: A very perfect symbol.

Shri Mataji: Eighth is that you become a law-abiding, peaceful, blissful citizens of your country.

Honest, honest. Generous, honest. Generous, honest. You become a universal being, understanding values of all the human beings by your enlightened value system. As far as the priests are concerned...

Sahaja Yogi: We aren't primate, but the priests, Mother.

Shri Mataji: Aāā?

Sahaja Yogi: We are priests. None are primate.

Shri Mataji: No, no, we should say, we have, we must have some people to enjoy the joke in the play of the Divine. If the priests are so capable why don't they come and see Mother and talk to Her, face to face?

Sahaja Yogi: I've been telling Mother that a one month's time yogi is coming to Switzerland for the Vicar's Day.

Shri Mataji: And we wrote to the Canterbury, what's the name?

Sahaja Yogi: Archbishop.

Shri Mataji: Archbishop of Canterbury is too busy with the politicians and and committing with the kings, you should put. And the Pope. You put it. We can put it: we wrote to the Archbishop of Canterbury. He's too busy with the politicians. He has no time for Mother.

Sahaja Yogini: Did you write twice or more?

Sahaja Yogi: No, no, no, too much, too much.

Shri Mataji: Thank you, very much. We, we expected some priest to come in the church of Lausanne.

None of them turned up. And the priest met you on the street, you told Me, na?

Sahaja Yogini: Yes. I've met him in the, before You just arrived, Mother.

Shri Mataji: He is... Last year the Protestants were not very unhappy with the Mother. Why? Because I only spoke against the Catholics. But now they are against Me because I said, “You are also in the same plight." No, I didn't say anything against. She said that, “You should not be annoyed because She didn't say anything against you." It's only you got exposed yourself. Mother never said that anything against you.

So why should you be so annoyed? It's surprising. She never said anything against you as such. Why should you be annoyed? Even say She has said something subtler than what you have been saying, what is there to be annoyed? Still we don't understand the reason for your annoyance is."

Sahaja Yogini: Mother, this is for Brigit's birthday tomorrow and this Mathias' today.

Shri Mataji: All right. Let's sing.

[All are singing Happy Birthday to you to Mathias and Brigit.]

Shri Mataji: What I'll have this fit for it? *[UNCLEAR* Look at/You cut] it. Oh, it's great. Now what about the lights?

Sahaja Yogini: Yes, Mother. Found.

Shri Mataji: Now take it out. All right. One by one, put it on.

Sahaja Yogini: Mother, we have got another birthday, a Realisation birthday.

Shri Mataji: Aā?

Sahaja Yogini: First year the Gandharva's realisation.

Shri Mataji: That you are?

Sahaja Yogini: Yes, yes and [he worships Guru].

Shri Mataji: Congratulations.

Sahaja Yogi: There is some Greek.

Sahaja Yogini: Greek music.

Shri Mataji: Take the birth cake to her.

Sahaja Yogini: Yes. It goes to the Brigit.

Shri Mataji: Aā?

Sahaja Yogi: We have one more Greek.

Shri Mataji: We got a dynamic one converted. I want more Germans to come. Another one German is getting, you see. They'll put one of the rise and want them just to rise in. May God bless you.

Sahaja Yogini: Mother, two things You have, because it's the best present for me truly, that You are here for my

birthday. I know You are not here for my birthday but You are just here and I mean it's just a beautiful present for me. And this is little remembrance from Bassum, in case sometimes I can come here.

Sahaja Yogi: You should. You should.

Sahaja Yogini: I just hope it will work out.

Shri Mataji: It will work out. Very good idea. May God bless you.

So many candles. *[UNCLEAR]*.

I was expecting six years old.

Sahaja Yogi: [I'm] very old, Mother.

Shri Mataji: Waw. Whose birthday?

Sahaja Yogi: *[UNCLEAR]*. You also? There's one more?

Shri Mataji: You should write that those who cannot see, hear; see those who are blind physically, can see; those who cannot hear, can hear. We have seen that happening. Thank you very much.

Sahaja Yogini: It's napkins, Mother, with, with the design of Bassum. It's just a little thing, Mother.

Shri Mataji: I know, I know. It's beautiful. It's great. What's that? This one is for Mathias, please?

Sahaja Yogini: And this You see, Mother.

Another Sahaja Yogini: And he's too, Mother, very dedicate.

Sahaja Yogini: But Mathias is with family also.

Another Sahaja Yogini: You have to give it to Mathias. It has the same style. It's for Mathias after all.

[Translation and question in French.]

Shri Mataji: You give him this holder. You give him this?

Sahaja Yogini: Mother, thank you very much. [Mother, I must say it's a] very big style.

Sahaja Yogini: Mathias.

Shri Mataji: For Mathias. This is from Brigit. That's for groom. Now start lightening the other ones.

Sahaja Yogis: This one?

Sahaja Yogi: Brigit.

Sahaja Yogis: For Brigit, Mother. For Brigit.

Shri Mataji: For Brigit. May God bless you. This one is from Brigit. This is the, this is from, from Mathew.

Sahaja Yogini: Look at this, Mother.

Sahaja Yogini: Look at this one, Mother.

Sahaja Yogini: So that he can slow down.

Sahaja Yogi: I have that to my face, Mother.

Shri Mataji: What kind?

Sahaja Yogi: Yuppies.

Sahaja Yoginis: It is a joke. It's looser. It's [looser] limping so that he can slow down.

Sahaja Yogi: I have that on my face, Mother.

Shri Mataji: Yes, yes, yes.

Sahaja Yogini: Mother and this is from I, Emilia and Arneau.

Shri Mataji: Aā, good idea.

Sahaja Yogi: Oh, thank You very much, [thank You] Mother.

Sahaja Yogini: Thank You.

So it is also from Marie, Emilia and Arneau to thank You for welcoming us here.

Sahaja Yogini: *[UNCLEAR]* from Magda.

Shri Mataji: For whom?

Sahaja Yogi: Magda and *[UNCLEAR* name].

Sahaja Yogini: Thank You. Thank You so much.

Sahaja Yogis: For Arneau and Marie Lou.

Shri Mataji: For Arneau and Marie Lou. All right? You like it? Arneau: [I am fond about it]. You can see, Mother.

Sahaja Yogi: For the candles, Mother.

Another Sahaja Yogi: Thank you very much. Merci beaucoup. It's very nice.

Sahaja Yogi: Mother, *[UNCLEAR]*. Please have it *[UNCLEAR]*, Mother.

Sahaja Yogini: These You can give to those with children, Mother. They will sure spare some money for the ashram.

Another Sahaja Yogini: For which? It's for puts money, ah.

Sahaja Yogini: To the children. Just that they get something also.

Shri Mataji: Oh, I see. All right. I saw, you have one. Arneau? For keeping some money for ashram.

You put some money there for the ashram? This was the time for the children, you see.

So I just thought that I could not get any other present but for children. That's the best. And the way they greeted Me first at the airport was the best.

A child: *[UNCLEAR]*.

Shri Mataji: Done. Now, come along.

Child: No, no, please no. No, no.

Shri Mataji: See... Wish I'm giving you this one.

Sahaja Yogi: Very good. Brigit's... You know, is.

Sahaja Yogini: Mother, You please.

Shri Mataji: It is very beautiful idea.

Sahaja Yogini: At the same time...

Shri Mataji: This is God and this is human being.

Sahaja Yogini: Oh, I didn't know, Mother.

Shri Mataji: I'm your Mother and that's the human beings who looks after you. All right?

Sahaja Yogini: I mean it just happen like that, Ma.

Shri Mataji: Because God doesn't see the whole world. He lives under the protection of Mother. Now, I must tell you something about Gods. Now come along, let's have it. *[UNCLEAR]* nobody answers. All right.

So.

Sahaja Yogi: Thank you very much for the cake.

Shri Mataji: Dear [Scottie] I give you very little, very little of, very little, just the wings of the angel.

Then you can have it.

Sahaja Yogi [about a child]: He wants to blow the cake.

Shri Mataji: Oh, please come. I eat a little one, the rest is yours.

Sahaja Yogi: Actually [in fact they don't like this cake].

Shri Mataji: I've warned you.

Sahaja Yogi: OK, Mother.

Shri Mataji: Now, you have to get strong. You have got the knife? I hope you don't eat two pieces at once.

Sahaja Yogini: *[UNCLEAR]*.

Shri Mataji: Better take them out. Very little is enough. No, no, no. Not allowed to eat that. Very nice. Take all of this now. Slowly, slowly, take out. This was a nice [anniversary].

Sahaja Yogi: Thank you very much for the presents, for You were a part and parcel of everything.

Sahaja Yogini: Open that present.

Shri Mataji: Now a new rule in Sahaja Yoga that they have passed for Me, this is also Sahaja Yogis' suggestion that Mother should not give any presents on birthday. If She has to give She can give otherwise but not on birthday, that others feel bad.

So Ashirvad, he felt because sometimes people don't tell their birthdays or they tell their birthdays and sometimes people become very upset.

Sahaja Yogi: If they don't get anything.

Shri Mataji: If they don't get anything.

So best to avoid everything, no birthday present. I said, “All right. To children I can give." He said, “All right. To children you can give." It's a big problem.

So My birthday present is that I have selected your presents. All right? Then it's all right. May God bless you.

Sahaja Yogini: So I must open them, Mother.

Shri Mataji: This one I *[UNCLEAR* didn't/don't] know. The one I have selected is in here.

Sahaja Yogini: It is so funny because the whole family is upset I am not with them.

Sahaja Yogi: She can say except for me [who is here].

Shri Mataji: That is what they are trying to say that if she cares so much for Mother, then you forget the family. But what about Christ? What will you say? When all His twelve disciples joined Him and cared for Him and loved Him. But we are not the people who live away from family into places. We are not ascetics. We lead a very

normal life. That's the basics they have not seen, you see. In their blindness they didn't even see. Just write it down that we are the people who live in family. We do not give up any family, anyone of our associations or anything and we are very normal people. We don't lead an ascetic life. On the contrary, Mother is very anxious that the family relations must be maintained at any cost.

[Aside:] We got that.

So you be the messenger of [this]. Oh, not so many, one I can have. Very nice dress Stefanie got. Yes, it's very nice. You better [fit it].

Child: That my aunt could do.

Shri Mataji: What an idea, āa?

Sahaja Yogini: It's beautiful, Mother. I look forward to taking this with me.

Another Sahaja Yogini: It was so beautiful, Mother, how everybody was in joy with me when I came back from London.

Shri Mataji: Mmmm. You have to put some money, as you know.

Sahaja Yogini: Chicken feed.

Another Sahaja Yogini: Look at that, Mother.

Sahaja Yogi: I am Satchit.

Shri Mataji: Yes. You put it there so I'll ignore.

Sahaja Yogi: *[UNCLEAR]*.

Sahaja Yogini: This one, Mother, is for Martin?

Shri Mataji: This one is for Martin.

Sahaja Yogini: Oh, it's very nice.

Shri Mataji: Just look at that. Quite surprised.

Sahaja Yogi: Surprised.

Shri Mataji: Now what to do is the problem. But don't feel bad. You are going to be all right. Don't be upset. See, the aunts are full of hope. All right? That's what is the photograph is saying. There is nothing to worry. May God bless you all.

Sahaja Yogini: You just look to that one.

Shri Mataji: This was given to you?

Sahaja Yogini: Yes, Mother.

Shri Mataji: It's beautiful. There were some people in India, some journalists, who criticised about the plump body I have.

Sahaja Yogis went and said that, “She's plump but She's thousand times a better looking than you are." And and they said, “I would not like to see your face in the old days. You see, it's all right to see you in the night." They told the woman like that. She said, “But you must understand, I went and asked Mother why She has a plump body.

So She said, `I have to have water in My body. It is very important that I must allow My body to have water because all the Chakras are to be loaded later and are to be looked after. There has to be some buffer.' " But he says, “Mother's body, see how old is. She knows why She has to have a certain body. She doesn't have to become a cinema actress. Why are you worried?" he said. “You want to have ladies who are beautiful according to your will. You go ahead, like that, you see." He was very strong. “If you want prostitutes, you can go to prostitutes. She's *[UNCLEAR* a/the] Mother. She's not here

to please you with Her body figures." See, even, I've seen people who talk of God also want to have a body figure to please them. Imagine. They want to see beauty in the body of a person.

Can you imagine? That's what it is. And he just went and told that, “What are you looking for in Her? Is She an actress? She's your Mother."

Sahaja Yogi: Mother, I [don't think] they'll attribute You, shapely be half of the, twenty five [woman].

Shri Mataji: See what, with what eyes they are looking, is the point. You can see. Also these French, same thing. With what eyes you are looking at Her, you can see how cheap you are. I mean, what interest you have in Her. Because you can't look at a woman as a Mother. This they have to think of it.

Sahaja Yogi: Mother, You remember, this man who went to see You in Paris and they had an interview and he, he was a [painter], was a great painter who...

Shri Mataji: Ha, I remember.

Sahaja Yogi: Who, who painted a and he said that all your cool inside.

Shri Mataji: [Picture].

Sahaja Yogi: No, I used Your picture.

Another Sahaja Yogi: We are the first who require them. They were so many of [artists]...

Shri Mataji: Yes, so many artists. But specially he, the artist, what was his name?

Sahaja Yogini: Jose Jarson. We've met him again, Mother. This year he's going to organize Your radio interview but

[perfectly] this time, because last *[UNCLEAR* time/one] was a mess.

Shri Mataji: You see, he says that, that you know because he said that, “I was impressed because Your face, you see, whatever we have learned about the perfect person is all that is in You." That's what he said.

So, you see, even the churches want the priests to be attractive, you know, provocative. Not attractive but provocative. You see, they want a woman to be provocative. This is what they want. Just think of it, to have a Mother who is going to teach you about God, you want to have that and must [look like a filthy] woman. Can you imagine?

Sahaja Yogi: Doesn't it come, Mother, from the right side that so many people are now right-sided and they want to [think and think] and just think of sex. They are women of the sex, aren't they? They are cast from the right side. And then what are their vibrations? Speak for the right-sided women.

Shri Mataji: Yes, of course. I mean, it's all that they want a woman to be, nothing but a sex. That's why these feminists have come up to say that, “Who are you to tell us?", you see. They want women to be nothing, like nothing but prostitutes, you see. Just selling their bodies, showing their body and all that.

To be used, that's what it is. It's too much of it. And women are so, so stupid, they accept that situation.

They don't want to keep to their self. You see, they want to accept it. If they say, “The waistline should be six inches” they'll do anything to get it. Stupid. And this is what it is.

And specially, you see, like these priests and all that. You see, either you listen to them or agree with them. Otherwise they're just professing. This is the another. Either we accept them whatever they are been doing or we hear or you take to their [side]. That's also of journalists. Also they [have]. But doesn't behoove a priest. It's all right for a journalist to say something like that but it doesn't behoove a priest to pass personal remark about a lady who is a respectable lady. She's made by God, not by you. And by that you are insulting God. And we have never seen Mother passing a remark on a physical side or on a personal side of any person. I mean, they don't even have the decency and decorum of a priest. Challenge their profession. Challenge their profession. Priest has to be a decent man. He looks at a woman from what angle? He has to look at every woman as his mother. They are not Freud, are they? They are priests.

Sahaja Yogi: Mother, would You like to, to rest afterwards?

Shri Mataji: Yes, thanks. But you can say in Sahaja Yoga you are prohibited to pass any remarks about the physical aspect of people and to be provocative. Is it, are we really going with people who behave in a way that provokes really? It's very common. *[UNCLEAR* Mary/Marie], isn't it true?

Sahaja Yogi: Yes, Mother.

Shri Mataji: I'm very particular on that point. Not to dress up in that way, talk in a way that is provocative. It's not [allowed], because it debases human beings, isn't it? It debases people. It destroys.

So this is what you have achieved out of your personality as priests. Just condemn them [openly]. This is your mental level.

Sahaja Yogi: Mother, writing this letter is going to teach us so much that we'll be ready to talk anywhere afterwards.

Shri Mataji: This is your mental level. Yeah.

Sahaja Yogi: No, I guess, anybody.

Shri Mataji: This is their mental level. You see, you can see your mental level even with your dogmas, what is your mental level. There's no decency or decorum. And I'm sure this priest must be drinking and must be smoking.

Sahaja Yogi: Yeah. You know, where I was, Mother, before meeting You I raised this question in Christian community and they were drinkers. They were drinkers and smokers as I have never seen, Ma.

Sahaja Yogini: This is in my family.

Shri Mataji: And, when I was, when I was supposed to be in the, in the, in dining room I was feeling I was going in the hell. They had a big cloud of smoke around them.

Shri Mataji: Yes, this is what it is.

Sahaja Yogi: And that and they are...

Shri Mataji: They are very, very much in the hell. And this hell is created by the priests, I must say.

But they are so good, you know, sophisticated, you see, all that, if we don't see. You see, there are some good priests also, not bad. All of them are not bad. But they are misled by the idea, that idea that you are a servant of God, you are working for God. They are misled. They

are good people, I believe. They are very good people. I've met some very good people, priests. And they get confused with Me later on, because they don't know. They think they are doing God's job. You see, they are mentally little less, I think, to understand. They don't understand. What can you do? Just they don't understand. If left to themselves they would understand this, that, “We are taking money in the name of God, we are working in the name of God and that we are also doing something which is not of substantial value. We are just doing some sort of a social work." They could see but if they are intelligent, they are cunning. If they are not intelligent they are playing into the hands of the Church. And they are paid for it, see, na. The problem is they are paid for. Because nobody wants to give time to God, really. Even to God you must pay. This is the idea that if you give any time to God then you must pay. This is the basic idea of everything, isn't it? If you give even five minutes to God, the God must pay. But poor God has no money.

Sahaja Yogi: And if you want to be a Baptist you have to pay five times as much.

Shri Mataji: That's what I am saying. And if you have to have wedding... But the worst is the community called Parsee in India. They said, “It's better to live than to die in Parsee community because you have to pay ten times more than the living." So they have all kinds of priests. It's not the first type.

I've seen many types, you see. It's nothing. They have one type...

Sahaja Yogi: Mother, it's no matter you have to pay a lot when you are going to die because then this means you are not going to continue paying for them.

So once you are gone you've got to pay.

Shri Mataji: Pay the lump sum, you know, for future. I tell you. Better pay them now. But America is even more sophisticated. You can pay them before your death, for your death. They will dress you up; they will put whatever you want to put in there.

Sahaja Yogi: Cinema.

Shri Mataji: I tell you, everything, it's so ridiculous. If you see, you'll really laugh. And if you want, they'll put white satin for you; if you want they'll put blue satin for, as if you can see, you know, after you are dead, what satin it is put around you. And they can carry you in a particular carriage; they show you beforehand. Whichever carriage you want, they'll carry you in that.

Sahaja Yogi: You can have a tour before, if you like.

Shri Mataji: Aāa?

Sahaja Yogi: You can have a tour before.

Shri Mataji: That's it. They have a regular now, like a super store for all these things. You can go round. You know, this, like we have, like a...

Sahaja Yogi: Like a [multiplex].

Shri Mataji: [Salvage] and sort of thing. And you can choose whatever you like, whichever you like, to such an extent that there are people who contribute for a man. You see, there is, supposing one person who is going to die, now he tells his relations that, “I've put so much money for you, so much money for him. But first you'll

have to contribute for my death." So somebody pays for the coffn, somebody pays for this. And there is a list of things. And, you see, you can choose whatever you like. It's so absurd you know, when I saw the documentary I was shocked. Can you imagine, for the dead that you can give a list and you can say, “All right, this list it is this, I will give. That one this will give." You see, so that there's no repetition.

Sahaja Yogi: But then you know what you can get for the sixty's anniversary already.

Sahaja Yogini: Same, same system is all the U.S.?

Shri Mataji: Yes, yes, same system, you see, because they have to make business out of your death.

[MISSING.]

Shri Mataji: Very good, this one. This I need the most, I tell you. I go on losing them. Beautiful.

One better than the other. I think I should write down My names. Then I won't lose. Best is to put the names *[UNCLEAR* here/on] [isn't it]? Beautiful. Thank you very much.

Sahaja Yogi: Very nice.

Sahaja Yogini: Thank you for all that You have done for us, Mother, *[UNCLEAR* during/doing] this *[UNCLEAR* travel/trouble].

Shri Mataji: What did I do?

Sahaja Yogini: I mean, You worked so much for us, Mother, You did so much. You help us and I just hope we will, we will be up to what You have given us.

Shri Mataji: Thank you.

Sahaja Yogi: Mother, we are all begging You for making us the way You want us to be.

Shri Mataji: You are already there. You are there. You are already there. You are just progressing.

You see, with the natural forces of God, you'll be all that. Just be patient with yourself. Don't get exasperated. Don't be unkind to yourself. I know there are problems sometimes. Take it easy. It will work out.

Sahaja Yogi: Mother, before going at [Sankt Andreas] may I show You the meditation room?

Shri Mataji: Yes.

Sahaja Yogi: Always.

So take example.

Sahaja Yogini: We've put this, to wake up us in the Paris ashram. If You could bless it so everyone gets up in the morning.

Shri Mataji: For whom?

Sahaja Yogini: For Paris ashram.

Sahaja Yogi: Wake up in the morning.

Shri Mataji: In the ashram?

Sahaja Yogini: Yes, to wake people up in the morning.

Sahaja Yogis: To wake up. To wake up, Mother.

Shri Mataji: Oh, beautiful, I must say.

Sahaja Yogini: For a cow, Mother.

Sahaja Yogis: Wake up, wake up.

Shri Mataji: Do wake up, wake up, wake up.

Sahaja Yogini: You know, I'll set it in the veranda. You'll see it, Mother.

Another Sahaja Yogini: I hope I will hear it. In [Nigeria].

Shri Mataji: Put a loudspeaker. All right.

So the things that I, these, you have got the things that I *[UNCLEAR]*...

Sahaja Yogini: This is just funny, Mother. What happened? I went in this shop to buy the presents to Matthias and Arneau and I just, they had little biscuits, you know, from Bassum and I said, “Oh, it's so good” and she gave me the box. And it's already, it's already, I mean, it's not full, but it's so sweet she gave me the box.

Shri Mataji: What is this, [Christiana]?

Sahaja Yogini: It's a specialty. It's very good, Mother, that You'll love it.

Shri Mataji: You want Me to take one?

Sahaja Yogi: [Please] take one Mother.

Shri Mataji: Mmmmm. Really, it's good. They are ginger biscuits. All of them? No, I don't eat biscuits much.

So I think it would be nice to distribute them to others.

Sahaja Yogini: Yes, yes, Mother.

Shri Mataji: Sahaja Yogis will [get these]. These are ginger biscuits, are good.

Sahaja Yogini: I've just received, I've just received them in the shop.

Shri Mataji: It will be a good idea. Very good biscuits, very good. There's one more [found] point, the last but not the least since *[UNCLEAR]*.

Contents: 1982-09-00 **Departure (by train), Cambridge, UK**

[As they arrive a bit late for the train, Linda Williams runs down and opens few doors of the train on the platform.]

Shri Mataji: [says that Linda should not have done this]. I am Kali [Goddess of time] and trains don't leave without Me.

***Contents: 1982-09-18*, Public Program, It is Eternal Life, Town Hall, Hampstead, London, UK**

It is such a pleasure again to come to Hampstead and to the Town Hall of Hampstead. Hampstead has a special place in the play of the Divine. Perhaps the people living in Hampstead do not know the significance of this place. But we know.....

***Contents: 1982-09-19*, Public Program, Day 1, Who Does All These Things, Ghent, Belgium**

It's very kind of the Sahaja Yogis of Ghent to invite Me to come here in Belgium itself to meet them and meet other people who are seeking the truth. Actually every place, every country where Sahaja Yoga started, it had a very dramatic beginning. And I have been always enjoying and witnessing the fun of the reaction, the first reaction of the people of *[UNCLEAR* truth]. *[UNCLEAR* Robert] is a wonderful person because he came to us at a point where people did not think that he would even achieved his realisation. And suddenly I came to know that he has started a center in Ghent and everybody thought it was really miraculous. How could he do it? It has happened also once before that one gentleman came to Bombay [Mumbai] to get his realisation and he went to Rahuri and

started a center of his own. *[UNCLEAR* And it's true/And through you] it is such a big organization now. I should not call it an organization but such a big tree that thousands and thousands of people have received realisation under that tree. Like the banyan tree has a very small seed and once it *[UNCLEAR* pierces/creates] a huge big banyan tree. And the same is happening here in Belgium. I am very happy to know that we have such nice seekers here who have achieved their realisation already and there are many who are seeking.

For this, there is one thing in common. I think it's the sincerity of purpose, sincerity of seeking. If you are sincere, you won't accept even the rationality or rationalizing. Because sincerity has its own feeling and the feelings cannot be argued and you do not feel satisfied with what you are doing unless and until you have found.

Sometimes people rationalise things because they enjoy the mental feat, like a circus going on and they go on arguing between themselves. They like to have like a card game, you can call it. But one must understand that rationality can go to any extent. A murderer can rationalise his murder. Murderer can rationalise his murder, why he murdered a person. Murderer, a killer.

So it can have many various aspects and various representation.

But why we find fanaticism everywhere? People can kill other people in the name of God. But truth is very different. Truth is absolute. It is not that one can say, `This is truth,' and another one can say, `This is untruth.' It cannot be *[UNCLEAR]*. For example, the colour of this

room, everybody can see and say that this is the colour. Nobody can argue on that point. And there cannot be two opinions about it. But then why, in the name of God and religion, there are so many sects? If God is one then why there are so many problems? So much so that people are now thinking that there is no God. Every thinking man really sometimes wonder what's going on. Actually, the reason is that human beings as they are, at that awareness that they are, they are not yet fully there from where they can see the truth.

Supposing you are climbing a mountain, from different angles then wherever you are, you think this is the truth about the mountain. But those who are sensible will understand that unless and until they go to the apex, they won't be able to see the whole picture and they should not take such a decision.

So one has to reach that point, that zenith from where he sees all around and then knows that it is all just the same integrated in one. Once you are moving you should move along knowing that you have not yet achieved the zenith.

Now the problem is that people don't want to believe that their awareness is not yet complete. At this human awareness, they want to judge everything. For example, a person who is not a realised Soul and comes to a program, what will he see? He'll see we are wearing a sarī or saying some things. It may not be intelligible to his mind at all, because we are not subtler enough to feel the subtle side of reality. This has given another problem to human beings. Those people who are realised Souls or those who came from the zenith downwards, you can say incarnations, they were never understood by the people

who were climbing up. And that's why they tried to kill people who were coming down from the zenith and telling them about the zenith! That is how they tortured people. Now it is difficult to understand why they crucified Christ. But maybe in modern times also if Christ has to come, you may not crucify Him but you will make such a fun out of Him in our newspapers that He would be crucified in any way. This is the way we try to avoid the truth. This is not a question of our inferiority. Because when you think that you are inferior to someone, these problems come. But if you understand that the ocean is waiting for all the rivers to flow in it, nobody is inferior or superior. The clouds rise from the same ocean, go and fill the same rivers and again the rivers flow into it. There is a continuous process going on.

So there is no question of inferiority or superiority. But at this stage of awareness, it is very difficult for human beings to understand that there could be someone who is just like the ocean, who is the spirit.

Till you become the ocean, you will not understand that kind of a personality and you'll always criticise such a person.

So there is a vicious circle between the people who know about the truth and the people who do not know about the truth. And in between, the fake, the people who are interested in cheating others and making money out of you or getting something out of you, have the *[UNCLEAR]*.

Now if you have to become the truth, that is, what happens to us and how we relate it to our awareness, as human beings if we say there is a bad smell coming or a good fragrance is coming, we all know that there it is. But

suppose the people just start quarreling about it. You'll say, “You are all mad. How can you not smell it? It is there. You can feel it. It is there." Or if somebody doesn't feel, you'll see that, you'll say that there is something *[UNCLEAR* less/lacking] in that person. In the same way, when you become realised Soul, then whatever you feel on your fingers, even a child feels the same. Even an old person feels the same. Any country, any community, all of you feel the same. You cannot argue it out. It's an awareness in your feeling of your central nervous system, of the nerve. You can feel it about another person.

Mohammed Sahib has said that in the time of resurrection, your hands will speak. And His *[UNCLEAR* independent/dependent] Islamic people, they feel that He was the last and there cannot be anything. He himself has said that there will be a resurrection time when the hands will speak and who is going to do that job. That means somebody has to come and do the job of resurrection. If you yourself believe that by doing this kind of a circus of namaz they are just going to take off to heaven, they are sadly mistaken. Even the same about Christ. If you go on saying, “Christ! Christ!" and listen to the way people have killed so many *[UNCLEAR* Ceialos] you think that they will have any place in God's kingdom? It's true about Hindus also where they have formed a caste system and fighting among themselves.

So one has to realise that whatever we have achieved is not sufficient. We have to have a higher awareness by which we see the zenith and by which we understand that it is absolute. Absolute has no higher point; it's the

highest. It cannot be compromised, either. Absolute truth means there is no parallel to it; there is no question about it. God has created human beings with great care and love. He has brought them to this great level of the understanding that there is God. For animals there is no God. Whether you believe in God or not, doesn't matter. But on the whole people have an idea that there is some sort of a power above us. They can think about it and they can see it with their own eyes.

Now you see the flowers becoming fruits. You see so many living things happening in this world. Who does all these things? You have to think. Now if you do not want to know about it, so it's *[UNCLEAR]*, but if you want to know then we should find out. After all, what is this power that is doing all this living work within us and without us? Now if I say that this is the Divine Power of love of God, you are not to take this for granted because nobody has felt it before. Nobody sees it. It is so subtle that we cannot see it. It is here. You cannot see it.

But in ordinary cosmic level also you do not see any ether. It has got all the programs that are going on in England or in America and when you put the television you can see that. Supposing you are an instrument like that and it has to be just plugged to the mains, then why not do it? If you are the instrument, if you are to know, then it is better that you do it. But then the question comes, how to do it? Because it is a living force and that living force cannot be excited by human beings. We, what we do, is the dead work. For example, if there's a tree available then we can make it into a chair. It is all dead from dead.

But we cannot make one seed sprout with our authority. You put even one seed in the library, nothing will sprout because there is so much knowledge around it. You stand on your head, do all kinds of Haṭha Yoga exercises or do anything you like, it won't sprout. You may say all kinds of Tantras and say all sorts of Vedas and also say prayers like, `Sprout, sprout, sprout.' It will not. You may end up calling it very obstinate, unreasonable thing. But the trouble is, for living things you cannot brainwash it. It has to work out. But how? You've to think how did we become human beings from a unicellular cell, amoeba? From monkey to this stage, where you are listening to a nice lecture? It is unbelievable that we were that and today we are this without knowing anything about it. We did not rationalise anything to become that. It has happened spontaneously. In the same way our realisation is going to take place also, spontaneously.

Now when we ask a simple question, “How does a seed sprout?" you have to just place it in the Mother Earth and it will sprout. The Mother Earth has the capacity to sprout.

So anybody who has this capacity can sprout it.

So there are many people in the market who say, “I have the capacity." Another one will say, “I have the capacity." You say anything and you get the market flooded. But this capacity is to add, not to *[UNCLEAR* show/sow]. It's not just talking.

For example, I went to America first time in 1976 [1972] and there I told them that, “You have to be born again." That's what Christ has said. If everything was finished at the time of Christ, then why did He say that you are to be

born again? So they started an organization calling `Born Again'. Even one President of America was born again. I don't know how! So I asked them, I said, “How do you call it `born again'? Means do you do that job?" So they said, “No! We are already born again." As this self-certification. I didn't understand how are you born again when you do not have the capacity to make others be born again. Now if the cement says, “I am the Mother Earth” are you going to believe it? If you put a seed in the cement it won't sprout.

But that is another capacity of human beings to believe into something false and live with it. It may be money-oriented, power-oriented, whatever strategies, but I find *[UNCLEAR]* it is the seekers. They need to suffer the most. You have this, or the people who are not intelligent enough, I should say, do not have the wisdom, always fall *[UNCLEAR* up for/into] these things. Their ego gets identified with this wrong path and they just get dwindled up into it. It is a very sad thing because this is the time of resurrection. This is the time of your last judgement. This is the time you have to get your Self-realisation.

And so many are lost like this because of the misidentification. It is simple to understand that you cannot put in any effort for living process and you cannot pay for it.

But people work on your weaknesses and support your weaknesses and you get entangled into these things. I must say that once you get your realisation you become the strongest personality. You do not aggress anyone but you do not also receive aggression from anyone because

you are a living person What you feel, your life force within yourself.

Within us is placed this personal mechanism of Kuṇḍalinī, which is the residual power of our desire.

It is called as residual because it has manifested the whole of being but yet not expressed itself.

So in essence, it is the desire to be one with the spirit, to be one with the absolute.

So as because it is not yet manifested, we call it a residual power. And this is the tree of life, the whole of it. You can see that.

It is not in our central nervous system felt so far. These are the subtle centers which manifest of course *[UNCLEAR* in growth also of] our plexuses. When this residual force rises through this center and arise at the top of your head it creates a sound just like a heart beat on the top of your head near the fontanelle bone area.

Actually, Christ never needed any baptism but to tell people that baptism has to take place He had to go through this process which is termed as baptism. But everybody has not done the baptism. One who can give baptism in reality is the person who is a realised Soul.

So, it has nothing to do with what money you give, how you talk, how you live, what is your race, what is your condition. It's just if you can give realisation to others, then you are a realised Soul. When this power *[UNCLEAR* presses/passes] through your fontanelle bone area and clears it through, you start feeling the Cool Breeze of the Holy Ghost coming out of you. It is not possible by doing anything else but the sprouting of the Kuṇḍalinī.

You cannot give a false certificate. You cannot say you've got Self-realisation, you are born again. It has to happen. The Cool Breeze has to blow out of your head *[UNCLEAR* that's as simple as anything].

Then it has to flow from your hands also.

Somebody asked Me today that it is said that the Kuṇḍalinī is hot and you must get a hot feeling within yourself. Now must be some people who are not authorized to do something like that, must be creating a problem with the sympathetic nervous system.

This is a sign of sickness. We know that if somebody has temperature then we know that person is sick. Even in nature if you see, you cannot see that there is a helium gas and people are working on it to reach it to the absolute zero point in cathode, helium. They have found out that when the gas is cooled down then it is filled more. Then all the particles, that is all the atoms there are, or you can call them molecules, they do not stick each other anymore. They become very quiet and they move in the same direction, like collectivity it is that. And when they are heated, they start bumping at each other, kicking each other and destroying it.

Now the disease we are taking is the cancer. When the whole body gets heated out and it cannot pass its heat into the blood to show the temperature, the heat is retained in the body. It comes from the fighting, aggressive malignant cells. And malignant cells are *[UNCLEAR]*. Then we lose the connection with the whole. Then they lose their connection with the whole. For example, this is the center and the center is working for a particular area.

For example, in the stomach, you can say this is the local center. It has to supply to the left sympathetic and to the right sympatric and center is the parasympathetic. Now when there is more *[UNCLEAR]* activity in the right side or the left side sympathetic activity, the connection with the whole breaks like that. When it is together, the connection is established with the whole. Like somebody who breaks from the society and is on his own and he says, “I am on my own” he becomes malignant and such malignancy, when it is manifested in our body, then we get tremendous heat.

I was speaking in a concentration class and it was really snowing outside in London. But they emitted so much of heat that we had to close all the heaters. We had to close down the heater completely. And not only that, but it was so heated that outside we could see *[UNCLEAR Leo*pards] falling outside on the windowpane.

So one has to know that when the Kuṇḍalinī rises it has to cool you down. For Indians, it is very easy to know because it's already written down and they know all about it. But the westernized Indians have read only westernized books which are coming from somebody who doesn't know much about it. And it is just the opposite of what it is really. One has to understand that whatever was not known, in those days, ancient times in India tend to *[UNCLEAR]* later on in the life of Christ, in the life of Mohammed, they are all complementary to knowledge.

Christ had to talk of the ascent, while Mohammed had to talk about the establishment of the balance, but by no means creating any difference between the two. Blind

people are not divided at all. Like human beings, if you have two doctors, one will say you have got cancer; another will say you have got tuberculosis. And if you have five doctors you'll feel you have every disease possible in the earth. And they will ultimately give a certificate that, “You are in coma. We cannot get you all right." And you'll be surprised the patient in coma might walk out with *[UNCLEAR]*.

Because the doctors who work out all these things themselves, are using machines which they have invented themselves, which do not relate to reality. To their rationality, to their understanding, whatever they think is, it is.

So one has to know that even if you use something mechanical, like a machine, ultimately it has to be faced by a human being which are unpredictable. Like an X-ray, if it can be seen by ten people and they will have ten different opinions about it. But in Sahaja Yoga, we do not brand anyone with any disease as such.

We talk in the terms of Chakras and centers and blockages. We cannot attack the Self. Self is beyond all these Chakras. It is just the Chakras which are separated from that absolute which is beyond diseases, beyond any attachment. Unless and until patient will come and tell us that he has got cancer, we will not bother as to what it is. We'll not have a diagnosis. We'll not try to give it a name. But on the contrary, we will judge what centers he is catching, what is the blockage. Once we know, everybody will feel the same way. Then the Sahaja Yoga has a method by which you can clean the Chakras of another person and your own, too.

When the power is flowing through your hand, you have to just know how to manoeuvre it. And if you know the technique, how to do it, that's all is to be known. But it's a simple technique. Even just touching that person it might work out. Even just looking at that person it might work out. It is very simple like the sunshine. It works out in a very fast way in people who are normal people, who are balanced people.

It works out much faster than in the people who are complicated.

But all this working takes place as a by-product of this energy that has enlightened you, because you are the instrument, you are the energy, you are the doctor, you are the medicine. The greatest of all is that you are the enjoyer of all that work and the enjoyer of your well-being. It's all together in one state when you become the Spirit. And this is what one has to achieve, which is your own, within yourself. You don't have to go to jungles to find it out or to go to someone. It is just within yourself.

Of course, an enlightened light can only enlighten another light. But that doesn't mean that the enlightened light is doing anything obligatory or some sort of a big help to the person. For example, a part of your body, if it is paining a little and if you rub it, you don't feel you are doing any obligation to that part, do you? So you don't help no-one because nobody is the other. All these ideas are little complicated at the beginning but when you become that, then you become so simple, childlike.

I would say that for introduction of Sahaja Yoga it should be enough for you to give some food for thought and tomorrow again, I will be speaking into details as to what

is the correct and what are the achievements about our spirituality. Of course, on the first day I would like you to ask Me questions and I would like to answer them because rationality is always there and it should not be illogical. Whatever is got *[UNCLEAR* working] is absolutely logical. We are not so logical. We are rational but not logical.

So again I would thank you all for giving Me this chance to talk to you and request you to ask Me questions if you have any about Sahaja Yoga and I'll try to answer them.

Thank you very much.

[Questions are being asked in Flemish or French, aside remarks.] You will be amazed that Sahaja Yogis become so negligent about their health that they don't bother and God looks after their health, I must say. And sometimes, we get worried about that.

One day we had gone to a forest and we were coming back. I was in the car and they wanted to go on a truck, all of them and I found rain all along the way.

So I said, “They must be all tensed there” and I was quite worried.

And then I reached the place where they were supposed to be waiting for us in a house. They were all singing and very happy and taking some cold drinks [aside remarks].

So they reached the place where they were supposed to wait for us and there I found them very happily singing and taking some cold drinks.

So I asked them, “How is it that you avoided the rain? The whole road was filled with rains. What happened to you?" So they said, “That rain never touched us, Mother.

It was way ahead of us and it never touched us. And it was really watering the dusty road but it never touched us." Because in Sahaja Yoga, you feel the complete presence of God Almighty and *[UNCLEAR]* His compassion, His love. And His attention is so beautiful, is so dynamic, is so efficient, that normally Sahaja Yogis are not sick.

For example, I asked one Sahaja Yogi, he had got lots of equipments on music, how did he manage? He said, “No doctor's fees anymore and I do not smoke, I do not drink. All the money is saved." I don't think any one of the Sahaja Yogis go to any doctor.

Question: *[UNCLEAR]*.

Shri Mataji: That means you have a bad Viśhuddhi. If you have a bad Viśhuddhi Chakra, see this *[UNCLEAR* now/nerve], it passes, travels through your hands and comes through here. It is already pressed by that Chakra. If your Viśhuddhi is not all right then you don't feel. Many people in the West have this problem. They don't feel. Normally you should feel it in the hands first and then there, normally. In India they feel it more in the hands first and then in their heads because the Kuṇḍalinī moves from here and then comes out from here. But the sensitivity at this point is not felt in the hand, because this center is not all right.

Some people, whom I know have been in Sahaja Yoga for days together, never felt it.

So you must try to improve yourself, Viśhuddhi and there are ways and methods. Honestly, if you do it you can clear it out. You should be honest about it and work it out. It will clear out. There are certain asanas you have to do to improve this center and there are some gargling

and all that with vibrated water and also certain mantras, everything we need to clear out our center. Once it is cleared out, you will have no problem. Also cracking the neck is very good. It is done at the physical level, cracking the neck. I think it works out wonders.

You know these small, small things can reduce your sensitivity. Small things can reduce the sensitivity.

Of course, if you are smoking, if you are talking too much, anything can reduce your sensitivity. Once as you start practicing and you start giving it to others, you get an inner force and you overcome all the blockage of yourself because God also looks after those who want to work for Him.

Any other question? For the Viśhuddhi? See, Viśhuddhi, the deity here is Śhrī Kṛiṣhṇa, Rādhā Kṛiṣhṇa. Kṛiṣhṇa is here and the Christ is stationed here and you see, on this point, you have to say the Lord's Prayer. At this point you have to say Śhrī Kṛiṣhṇa's mantra. This they will tell you how to say it, how to relate it to Śhrī Kṛiṣhṇa and on the left hand side is because of your guilt.

Sometimes, you know, we have habit of feeling guilty. That's absolutely useless and nonsensical. There is nothing to feel guilty. And only if you say, `Mother, I am not guilty,' it will clear out. You'll be amazed. Only thrice you say, `Mother, I am not guilty,' it will clear out.

Or if you are a person who is using the right hand too much, say, you are an artist or you are a painter or you are a typist or something, then also it could be that you are using your hands too much in relation to your legs, feet and head. You can *[UNCLEAR]*. Luckily, I have come to Belgium at a point when lots of things have been already

said. But in the beginning I used to be very careful, cautious and say very few things.

So, now most of the knowledge is out, I should say. I said, I have come to Belgium at a time when most of the knowledge has been already *[UNCLEAR* shared/said].

There are four books written by four Sahaja Yogis now. But you must know that Sahaja Yoga door is open to everyone. Whether somebody is a doubting Thomas, whether somebody is against Sahaja Yoga or any sort of a person, it's open to everyone. And you may meet people who are still not there, though maybe they might be here for days together or for months together, years together. Still they are doubting Sahaja and half-baked. You can get people like that because Sahaja Yoga is very tolerant and extremely forgiving. The only attitude is how many more people are going to get their realisation. It's the main objective.

There can be stupid people also with whom when you talk you'll think, “How are they Sahaja Yogis?" you see. You'll be amazed. We do not bestow any or confer any degree on anyone that you are a Sahaja Yogi, never. It is they who have to claim that they are Sahaja Yogi. It is for you to become the Sahaja Yogi. We do not say that, `Now, you are Mr. Sahaja Yogi. You put a badge here. You are Sahaja Yogi.' We have no organization and we have no such arrangement.

So anybody can become a Sahaja Yogi. If you claim *[UNCLEAR* pray/claim] you have to come up to the point.

So everybody is given full chance.

We don't even openly say what is the criteria of a Sahaja Yogi. But you yourself know after some time that you are

a Sahaja Yogi now, that you have become a Yogi in full way because you realise you are empowered. It's a state where you reach, you see, doubtless awareness, after your thoughtless awareness.

Then you start feeling, “Oh, I am a Sahaja Yogi definitely now." You have to certify yourself. It is for you to judge.

What is your question, you want to ask anymore? No? Yes, you see this TM fellow, he has a name. You all know that. You know what he was and how he *[UNCLEAR* has/was] disturbed once upon a time.

So if you know the mantra of what was his name and how he was destroyed you can just take it up. There are so many TM people who were treated. They are all completely cured.

In Sahaja Yoga, you know the past is full of all these Gurus. *[UNCLEAR* of fake Gurus] you see the past is full of thousands of years. And you know how they are finished off also.

Question: *[UNCLEAR]*.

Shri Mataji: It's dangerous.

Question: *[UNCLEAR]*.

Shri Mataji: They will *[UNCLEAR]* on the contrary. *[UNCLEAR]* not only that *[UNCLEAR]* but will give you problems, you know. I've seen people who after going to TM, their muscles start twitching.

This is a simple thing which you call as possession, when you put a spirit on someone. Now it's very simple, you see. They will give you a name say of Rāma, that's all right, but they also give you a horrible name you see, which *[UNCLEAR]*. If you will tell an Indian, he will laugh.

And those people on the *[UNCLEAR* run] ask you more money, more money.

So, you are paying them more and more without understanding why we are running.

Now if you are taking the mantra of Rāma, you'll ask them, “Where is the situation of Rāma in your center? Where is He?" They won't be able to tell you anything, nothing. They'll just go on saying, “Rāma, Rāma, Rāma." Comment: *[UNCLEAR]*.

Question: What is the meaning of repeating always that mantra to come into *[UNCLEAR]*?

Shri Mataji: *[UNCLEAR* Horrible]. It spoils your... First of all this center because you are repeating something. Anything you repeat, it will be spoiled. Specially it has the *[UNCLEAR]* because you see, Rāma, whom you are calling, you are not connected with Him.

So when you go into too much extreme, at first you move to the left or to the right. And in that condition you can be caught up by your collective subconscious or collective supraconscious.

So in your calling, “God, God, God” and you are not connected you might lose some *[UNCLEAR]* where is Rāma there in the collective subconscious and He may just grab you.

So by this kind of a circus you will spoil all these centers as well as the center of Rāma by which you might get asthma. But most of the people from TM who have come to you have basically one disease, that is, epilepsy. Also they have you see these problems of jaw bones and the movement of their muscles but when they reach *[UNCLEAR]*

for eighteen years or so most of them ended up with epilepsy.

[Shri Mataji narrates some stories of experiences, mostly unclear and inaudible with disturbance, few audible dialogues are as follows.] I can't forget their experiences when they first came to Sahaja Yoga. One day I received an SOS saying that one gentleman who came from here and somebody just recited the name of the Goddess and he went into contortions and contortions. He would not talk. And everybody got frightened. The Sahaja Yogis, it was a great experience for them. But they were so excited. Immediately they telephoned to Me saying, “Mother, what is this happening now? He went into contortions. Please come." Another fellow who just saw the garlic, you see, in the chicken and he became mad, started shouting.

Still he couldn't see the garlic anywhere. He could not bear the smell of incense. Another fellow, he jumped. Also he sees things like that. Suddenly, you know, sitting down there, suddenly he jumped up.

[UNCLEAR] I said, “What happened?" He suddenly jumped and started barking like a dog.

We have *[UNCLEAR* Douglas] here. He was the first one when they *[UNCLEAR]*. He went to some place called *[UNCLEAR]* and there he saw a magazine in which Yoga Today, Sahaja Yoga was written down. Now this poor *[UNCLEAR]* was a very big Managing Director and this and that. All his money was exhausted with TM and he has also lost his job and he was in a mess.

So, tried to somehow or the other to go through his savings, you see and he saw the program written there,

this magazine. And the TM people are not supposed to read anything else. They are not to know anything else but TM, you see.

And My photograph was there and they said, “All right now you feel the vibrations with the photograph." And then he started... tried putting his hands like this and the whole face started becoming a kind of a *[UNCLEAR]*. They didn't know where the face was *[UNCLEAR]*. He got a fright. *[UNCLEAR]*. And this was a six month old magazine. He telephoned but we had changed our place, you see.

But he then somehow he found the place and then he telephoned and Douglas *[UNCLEAR]* was there on the phone, you see.

So, Douglas said on the phone that, “Are you very hot?" He said that, “I am boiling." So we are seeing people who came to us from TM who were boiling but they went away. You see, they couldn't stand the *[UNCLEAR]*.

So they knew the people from TM were boiling, very hot *[UNCLEAR]*.

So then *[UNCLEAR* Douglas] said, “Are you from TM?" He said, “Yes. How do you know?" on the phone.

So Douglas said, “I can see your Chakras and I can say from your Chakras, you see, you are TM combination." So this *[UNCLEAR]* really called him to the ashram, slowly, slowly. Again he might go into that kind of a contortion.

Of course, he got his realisation. He got many people into Sahaja Yoga, even the Director of the Flying Academy of Scotland and his wife and daughter who all were suffering from epilepsy. This lady was the granddaughter of a Duke and they were all on the *[UNCLEAR]* the Deputy

Directors and the Director of the flying squad. They spent money on the people who were coming there for doing the flying tricks. Nobody was flying, of course. They were not paid back by the TM organization and they were just bankrupt.

But the wife was struck by epilepsy and for three hours she used to get into that funny situation of *[UNCLEAR]* and scream and shout. But then they all of them were changed and they all are all right.

They are doing Sahaja Yoga.

So, it's nothing. You should all be all right. *[UNCLEAR]*. You can become a great Sahaja Yogi.

Comment: *[UNCLEAR]*.

Shri Mataji: He will be all right. *[UNCLEAR]* I do not know how to cure TM people. But some of them are still, you see, half baked. Then they get out. You see, what to do? They cannot understand.

Then what to do? Comment: *[UNCLEAR]*.

Shri Mataji: About what? Yes, they are all the same but, you see, spiritualists are openly saying that, “We are spiritualist” you see. That also is another sort of a very bad thing like charismatic movement and what you call *[UNCLEAR* penticot/penticourse/Pentecost] and the spirit movement, it's all just the same! They get possessed. Now there are spirits which are right-sided and spirits which are left-sided. The right side spirits can give you an experience of an aura. You start seeing an aura. Like yesterday only in the night we had six people from *[UNCLEAR* Sydney itself]. Out of that, two ladies started seeing a golden aura around Me. I said, “Don't see all

that. That's not necessary. You see Me as I am." “Well, we are enjoying that." What to do? It's all ego-oriented.

You'll be surprised that most of the diseases like cancer, multiple sclerosis, leukemia, all these come from left side. Through spiritual *[UNCLEAR* fanaticism], that is, it has to be there. You are one *[UNCLEAR* side] and all that. It's a very dangerous thing.

A man I have seen now, thrice it has happened, multiple sclerosis, which we have cured, but I have seen the man has lived with a woman who is possessed. That means his Mūlādhāra Chakra is affected and that's how he got multiple sclerosis. Can you believe it, in all these people? A relationship with a woman or a man who is possessed can give multiple sclerosis. All this sounds confusing. First thing is, they are very abnormal people. They are not normal people.

Question: *[UNCLEAR]*.

Shri Mataji: What is it? Is what? This disease? Abnormal people, you mean? Or mental disease or physical disease? They are not normal. Why? You see, the people who are not normal have either a physical problem or a mental problem first of all, very obvious. They can be very moody people or a hot-tempered people. They could be extremely volcanic, they could be *[UNCLEAR* reclusive/recluses], they could be quiet and selling the people and frightened paranoids. There are so many methods. You can make out that a person is getting gradually a recluse. For example, TM people are reclusive. They get out from the society. They get away from other people. They shut themselves. They don't want to meet others. They are afraid and frightened.

While Sahaja Yogis have to talk to people and tell them about it and they are trained as teachers for days together and *[UNCLEAR* this and that] completely brain-washed and they repeat what they have learnt and they have nothing to do with others. They don't know each other at all. There's no congenial relationship between each other at all. They are very individualistic.

Also this can be very dry, very, very, sort of devoted *[UNCLEAR]* because they are extremely dry.

They have no feelings. Like one man he came to Me, he was a *[UNCLEAR]*. He said, “Now, I have no feelings left. If anybody weeps or cries, I don't feel anything about it. I have no feelings." This is an abnormal man, I thought. He has no feelings.

So, it's an imbalance that he is such a dry personality.

But with Sahaja Yoga, not only that you become normal, but you become master of your Self, master.

You become your own master.

Question: *[UNCLEAR]* now they all have mental or physical problems.

Shri Mataji: Yes, to some extent all of us have but there are normal people also. There are many normal people also. It's a, the kind of civilization we are living in, we have to believe in all sorts of *[UNCLEAR]* living in this one. But we have simple people. In the villages in India, I have seen many and also in England I've seen many very simple people. But the more you think, then the more you complicated you become.

Question: Where is the limit between normal and abnormal, the border?

Shri Mataji: You need not worry on that point. What it happens that once you start thinking about it, again you become abnormal.

So better not start the chain of thinking. But I would say when you become the Spirit you start seeing the abnormality in a person that clearly because at that awareness, you just see that a person is behaving in a very abnormal way because you see the abnormality at the center. You do not see to the symptoms but to the source of abnormality after realisation. At this stage you cannot verify but at the stage when you reach and you see the centers, then you see the abnormality so clearly because you can see the centers.

And also, you see the balance. You see, in one hand if you have too much vibration and in another there are no vibrations, that means there is an imbalance.

So you understand also that there is an imbalance in you. With the vibrations, you can make out if they are flowing normally in both the hands; then you are normal.

Comment: The lady says that she is new and she doesn't feel vibrations in hand.

Shri Mataji: You will, just now. We are going to have that session.

[Aside:] The gentleman, is he going to come back or has he gone forever? Because just have the session now of realisation and then you feel it.

Question or Comment: *[UNCLEAR]*.

Shri Mataji: That we'll see now. All right? That's behind the *[UNCLEAR]*. We'll see that now, how it happens.

Question: When you go out of your body, what does it mean?

Shri Mataji: Oh! That one? No, you are not to go out of your body. You have to be very much...

Everything can be reversed. You have done this. The question is, how you do it, isn't it? It's a point. Is that the point you are asking? *[UNCLEAR]*. Yeah! Simple, simple I'll tell you why. It simply *[UNCLEAR]*.

There is a deity, say the deity of Christ within us. Yeah? What happens that when you are moving to the left or to the right you get indulged by these spirits. Your body is taken away or whatever happens to you because of the spirit. Now if this deity can be awakened here, at Āgñyā Chakra, it sucks it, your ego and superego and in the superego, all these entities are there; they just run away.

So in your awareness if they are there, they just run away if Christ is awakened here.

You see, to start, Kuṇḍalinī awakening looks so simple. It's like that. You raise your hands towards your Sahasrāra. There is a big organization behind it. There is a big happening behind it. See, all the deities get enlightened and that's why it works out. Otherwise it doesn't.

All the deities get awakened with it and that's how they get effect and then when you say the mantra you address to the deity in another person. Because you are awakened, your deity is awakened, you can awaken the deity of another person.

You say that Christ died for our sin. What does that mean? Or that is for our Karma.

So when He is awakened, He sucks in all that. That's His part. And these are all deities placed within us in all these centers. This you can know from the little books we have. All right? Question: *[UNCLEAR]*.

Shri Mataji: Yes! There are. You see, every center has a mantra. Every deity is a mantra.

So supposing here is Lord's Prayer. *[UNCLEAR]*. There are. Mahāviṣhṇu. Christ is called as Mahāviṣhṇu.

It's a pattern in which you have to read that mantra and then it works out. Mahāviṣhṇu is the name of Christ.

Question: *[UNCLEAR]*.

Shri Mataji: We'll tell you everything. There is no secret in Sahaja Yoga. Everything we are going to tell you. Of course, we see also how far you can go. You see, certain things are not told. Supposing there's a Christian coming here and you tell him the name of *[UNCLEAR]*. You'll have it? Or if we tell a Hindu who is a staunch Hindu and you tell him there is Christ, you see, he'll think that this is something like the spread of Christianity.

So one has to see how far people can accept the truth, you see and if they can accept, everything can be told to them. But some people just cannot accept. That's the problem with them because there are attached to this or *[UNCLEAR]*. All right? But you must know gradually about these mantras. You must master them. You can master these mantras. Once you say it, it's done. Just say it. It is done. Then master it. First, realisation, of course, but then you master them. You can be the master of mantra. Any mantra you can start. All right? We have some other methods also which are told to people once they come to Sahaja Yoga, which you call as Pūjā and all that, but

normally we don't call people who are still little half-baked because, you see, they go amuck. They can't bear it. You see, like people crucifying Christ sort of a thing happens to them, you see. But if you think that they are all right, even if they have some problems, doesn't matter, but mentally they are all right, then we call them for these higher awakening to the mass. It works out but if they are not so surrendered or if they haven't got that much of understanding of Sahaja Yoga, if they are not surrendered to God, then it is for us to take some time to expose it to them. But some people overnight they come over and they just jump into it and become masters. I have known many like that.

Also about My nature or anything, you don't discuss it with everyone, you see. If somebody says that, “How can you do it?", supposing somebody says, so I say, “All right, you better do it." We don't say what I am, why am I doing this, what is so special about Me, in the beginning, no. I am just like you. I am worst than you because I don't know driving, I don't know this, I don't know that.

So that, so that nobody is challenged, you see. Then gradually they themselves start seeing things then *[UNCLEAR]*.

Should we have now realisation? All right. Take off your shoes. Just for five to ten minutes and then it will work out. Just put your hands towards Me like this and close your eyes.

Contents: 1982-09-19 **Conversation with a Sahaja Yogi, Ghent, Belgium**

[UNCLEAR] sense of smell because both left and right, because both smell bad, left and right, but one has a very sort of a smell of a very stagnated personality and another has a smell of a, say, jaise pasina [like sweat], burning sharp smell, hān [yes], sharp, pungent. *[UNCLEAR]* like if you put the blanket, you see at the bottom, keep it hanging. It smells horrible, like that stagnated ammonia types. That's all.

But then this side all fragrance. This side on your vibrations, it's better. That's all right.

So now the combinations of all the muscles because the muscles all *[UNCLEAR]* comes fromMūlādhāra.

So this combinations would be, you see, which one *[UNCLEAR]*. For example, if Mūlādhāra, left Mūlādhāra is catching, left Nābhī, left Mūlādhāra, left Nābhī, left side, this is a very bad combination.

Left Mūlādhāra, left Nābhī, left Swādhiṣhṭhāna and heart is a bad combination. Because even if you have these three things, if your heart is all right, then the Spirit is right.

So it can control all these things. But if you have in addition to that, even left Āgñyā, then definitely you'll have one of those incurable diseases like mellitus.

So for mellitus patients or for cancer patients, for all such incurable patients, you have left side problems.

Cancer can be divided into various *[UNCLEAR* faces/phases]. Like you can have cancer, say, of the uterus. It's the combination of Swādhiṣhṭhāna and Mūlādhāra and left Nābhī, left Swādhiṣhṭhāna.

So you give it a bandhan on these three Chakras separately, then tie them together with fire, with a *[UNCLEAR]* tie them, go on tying. First of all, of course, you have to raise, as I have told, the right side to the left. Do it about seven times and then after doing that you bring it to any Chakra. Then you tie them up together, three of them together and then put two together and then two together and then all of them together, the tying up, you see and then take it out like that. Tying up. With that tying up you will find that they will have no place to go *[UNCLEAR]* and you'll be surprised that they *[UNCLEAR]*. It will clear.

But at that time, the best thing would be to have a candle with My photograph behind it. It is the best if you can *[UNCLEAR* device/devise] a method in which you will have a candle in the front and the photograph behind so that vibrations are flowing all the time. But at other time what you can do is to put the candle and one hand towards the photograph and right hand you can use so that vibrations are flowing. Best would be to have the candle in such a place. Behind it you can also fix My photograph, with the candle and the photograph together, if you could make some device. I mean, in India you can.

Sahaja Yogi: We have mirrors behind candle. We can remove the mirror...

Shri Mataji: Yes, instead of the mirror you can have a photograph. That would be better.

Sahaja Yogi: Instead of the mirror, if the candle is in front and the picture is at the back, you see a special candle

stick which can have both Shri Mataji's photograph and the candle on it.

Shri Mataji: That would be very effective. Otherwise, for other normal people, what they have to do is to put the candle with left hand towards the candle. Right hand you have another candle and photograph, that's all. Right hand you have another candle and go on doing like that. It can work out that way also but if this combination is not all right *[UNCLEAR]*.

So best is to have direct, if you can, but this also will work out. Even just giving bandhans will stop it but this is a very quick method, flame.

If you have fire also you can. It's very good to do on the fire. If there is fire burning, ask the person to put the left side towards the photograph and right in the fire. It will clear and the photograph should have a candle also.

So put the left hand towards the photograph and right hand there. It will clear out.

For the Mūlādhāra, it is better to sit on the ground, you see, just like we have a camp fire. In a camp fire we can sit on the ground, Mother Earth and have some fire. You can do it in the summertime, it's all right. Clear out the Mūlādhāra.

[Shri Mataji talks about Scouts' Tent and huge pandals, about the expenses etc. Not hiring large pandals used for marriages but smaller ones will be cheaper to hire separately for ladies, gents and others.] So the second point is about the Swādhiṣhṭhāna. It's the most complicated. Left Swādhiṣhṭhāna is *[UNCLEAR]* due to fake Guru or unauthorized things but fake Guru it will be Swādhiṣhṭhāna plus *[UNCLEAR]*. But if it is purely left

Swādhiṣhṭhāna then you will get *[UNCLEAR]*. That's the easiest.

It is pure with someone like that. But left Swādhiṣhṭhāna can have all kinds of combinations. Say, for example, left Swādhiṣhṭhāna and Mūlādhāra. You can get paralysis of the legs for no reasons. You might get arthritis. But for arthritis, they have to have left Nābhī. *[UNCLEAR]*. With Swādhiṣhṭhāna you can get paralysis of the legs. Left Swādhiṣhṭhāna, Mūlādhāra, it's very dangerous also in some ways because you may develop very dirty methods of perverted, like, extremely Satanical, you can say, Pishācha [Hindi word]. You see, left side is pishāchik. What is it called? Pishāchik?

Sahaja Yogi: Demonic?

Shri Mataji: No, Demonic is of the right side type of a, demonic is aggressive but paishāchik is a person who is like a pashu, who is like an animal, bestial. But I mean beasts are normal. Bestiality. All right.

So they indulge into such things and they can do this to others also. They can find out ways. It's more like a worm, you see, such of people are fond of eating feces, you see, all kinds of things, you know.

Dirty people, absolutely devilish. I mean, maut se bhi bhattar [worse than death]. They like bad smells and they like to smell the gutters, this, that. But they would not like to smell the flowers, sort of thing.

That's left side. Like people who do the washing of the latrines and all that, then they become like that.

They don't smell anything dirty. They are just like an animal, you can say. Nothing is dirty for them.

They will eat the food lying on the street, they won't mind. I mean, dirty people. And as a result of those habits, they might develop something.

Sahaja Yogi: It goes to Nābhī?

Shri Mataji: It can go anywhere. But what I am saying, basically it is an activity which is sly, which is secretive, which is low.

Like you see there are, say, flirts. Must be because can't have sex actually, flirts. Then also all the perversions, you know, that you study about these people is like, say there is a young girl but they can't flirt with a young girl so they'll flirt with the wives sort of nonsense they do within that *[UNCLEAR* border]. They flirt with the mother because they can't flirt with the young girl who is sitting there, you see. As soon as they see a young girl, they start flirting with the wife. What do you call that kind of a thing, displacement thing?

Sahaja Yogi: It's a typical psychology, Mother. Freud entirely spoke about it. This whole psychology is based on the theory of displacement.

Shri Mataji: It's true, very true. I have seen people doing it. But what is the reason in this? He says it's a good idea?

Sahaja Yogi: He says it's a good idea.

Shri Mataji: It's sickness. That is the sign of sickness because you are dealing with your mind.

Sahaja Yogi: You mind become, that is the thing, Shri Mataji. What happens is, now it's clear to see is that you have a desire, for some reason, either because of cowardice or something, you do not express that desire,

but instead of killing that desire, you twist it, wrong twist, you see. You shift it into another direction and if you cannot fulfil it, you give it another twist.

So if you have a desire for person A, because you cannot go to person A, you go to person B who reminds you of person A but you have no real interest in person B.

So you get frustrated.

So you go to person C and it's twisted and twisted and twisted, you know.

Shri Mataji: No, but this desire is actually artificial. I will tell you how. Say you see some, all sorts of advertisement, read book, this that, everywhere. Then you form an image. It's an image that you follow.

It's an image that you follow, artificial image. It doesn't exist in reality. Now you think of a woman who is young, it could be you own daughter who is young, you see and seeing this young daughter, you might feel this desire for your wife. It's not a very clean thing, you see.

Sahaja Yogi: Ha! Now I see what you mean, Shri Mataji. That takes place in our culture a lot. There are many examples *[UNCLEAR]* between husband and wife.

Shri Mataji: Husband and wife. You see, normally the husband won't feel that for the wife but if there is a young girl sitting or a young woman sitting or even a daughter, then he feels. That is, it's a very debase sort of a thing, such a sly stuff. But it is actually, it is a possession. In this case it's a possession.

Sahaja Yogi: The other extreme relationship is, Shri Mataji, in our culture is that both husband and wife together will go into such a situation, let us say, I cannot

give example, which will inflame this desire in both of them.

Shri Mataji: Also it is filth. It is imagination and filth. Because what happens, there is no joy and a child produced out of such relationship, what will be the child of such hallucination? After all, the child is produced after two persons have met on the level,

Sahaja Yogi: Spiritual level...

Shri Mataji: No, not spiritual. You can call it, but in the present in reality, you see, because mind plays a part and the Manas is on the left so it's always deluded. You do things in delusion, you see.

So you don't take the responsibility of the child or the relationship. The whole thing is so funny, you see.

There is no reality behind it. This is absurd.

Sahaja Yogi: This is the basis of all mental illness, Shri Mataji.

Shri Mataji: Mental sex is that. This is madness. This is real madness. This is the sign of madness.

Child can be born mad in such a family or such husband-wife relationship. Where you see the marriage is a reality, it is a reality, it is not fantasy. It's not some sort of a romanticism that you place one into another and imagine and change that this is another woman and you have relation with another woman.

It is not possible. If you do like that, your mind is somewhere else. You are somewhere else. It has an effect on the mind of a child.

So the child that is born itself would be any sort of a person, with the mind which is not normal, could be a

mind who is mad, could be a mind who is depressed, can be anything, such a child.

Sahaja Yogi: This sort of a behaviour, Shri Mataji, is considered normal in the West. If you read any of the magazines, even on psychology text books, the magazines so often people write.

Shri Mataji: Mūlādhāra *[UNCLEAR* has been made into] evil, I tell you. The Mūlādhāra attention is absolutely evil in the West. I mean, it's really evil to human beings, no doubt. The whole concept is absolutely wickedness. It's wickedness.

Sahaja Yogi: That means each generation is getting more completely destroyed.

Shri Mataji: That's what I am saying. The whole thing is nothing but wickedness, of some sort of an evil doer who has put these ideas and that's why Mr. Freud I believe...

Sahaja Yogi: Mister Freud and the writers of Playboys. Freud started it. Freud made it respectable.

First of all it was not respectable. People did it but they were ashamed of this attitude...

Shri Mataji: Accha, is that so? I don't know what they do. But whatever it is. I'll just give you an example because I have seen this happening among some of the so-called elite people here.

So that's what I felt that they see a young girl and suddenly you'll find that they are very nice to their wives. I have seen it because, you see, My seeing is different na. But in that it's not the play of so much of a possession, you can say, always, but could be the person himself is *[UNCLEAR* loose, can't read himself]. You see,

that kind of a nonsense. May be possession, may not be, it's not definite. You cannot say *[UNCLEAR]* it will go. Such a person has to be alert.

Sahaja Yogi: But you said this morning, Shri Mataji, that these things becomes a part of your mind, these possessions...

Shri Mataji: Possession could be taken off but this becomes a habit. See, possessions can give you habits and can disappear and there could be you might form your habits as a result because you are enjoying that kind of a nonsense. Everything that is imaginary is not possessions. Everything that is imaginary is not possession. That's your own perception, mental perception. This is a kind of a thing that is extremely abnormal for any righteous person, absolutely abnormal and a person who leads such a creates problem for the whole society.

So left side is the physical side as far as the triggering of these diseases are concerned but mainly it spoils the mind.

So if you have the left Swādhiṣhṭhāna spoilt and left Mūlādhāra, you are vulnerable absolutely for a mental disease, vulnerable apart from physical; vulnerable for mental diseases. You might get all these troubles of schizophrenia, this, that. Even if your left Swādhiṣhṭhāna is spoilt by any chance, you are in for it.

But if in addition there is Mūlādhāra then you are definitely vulnerable. But what happens that in the left side, the mind, how it gets into problems because you see first of all the left side makes you lethargic.

So your mind stops working in the sense that it doesn't think that what I have to do. It's like, what you call, Mind, a devil's workshop.

[Aside:] Woh kya tha? [What was that?] You develop idleness. Idleness makes you think, you see. Now what to do with idleness? You can't carry on with idleness. You get bored with idleness.

So this idleness makes your organs idle, but this Manas, there is no English word for it, the mind is intellect. Two things we can put it: Manas or this side is the Praṇav Shakti.

So we can say Manas, left side, the Manas.

The Manas starts going into all these things like these perversions and all that. The movement of the Manas on the left side *[UNCLEAR]*. For example if you are drinker *[UNCLEAR* rude/prude], then you don't see your sister as a sister; then you don't see your mother as a mother. You can't *[UNCLEAR]*. You see, all the values are lost in three generations. In the first generation you gain this nonsense *[UNCLEAR]*.

Second generation also, third generation, it happens. How is it? In India it is not conceivable that a boy can have any such infatuation for a mother knowingly, impossible! And here why is it so much? Because drinking is so common in the West. With drinking it happens but in primitive classes it's absolutely a rule. Among primitive people it's a rule. It's actually a rule. They have lots of compulsions. In jungles the primitives, they, can you see, there is no problem. They are anarchist. They have no such, they are just like animals.

So that's there. But even if you drink, what happens is that part of pashuta [animal-like qualities], that part of animal does come in you that you don't see your sister as your sister. All sublimity dissolves. All sublimity dissolves.

This is the thing that on the left side when the sublimity dissolves, you see, there is no ascent because the movement is all that side. Then when you get possessed on that movement then you can get all other combination. Left Nābhī you can get. Left Nābhī can be caught, as you know, that left Nābhī can be triggered by a horrible woman in the house. A woman who is not religious, a woman who is materialistic, any sort of thing, left Nābhī. Anyone who is a lower level type of a person or any sort can develop left Nābhī.

Now with left Nābhī, you see, you are always agitated in that relationship. You are not balanced in that relationship. You may tolerate. You may say, “It's all right. I have to go through this” but the agitation is always there. That agitation causes the left Nābhī to grow into a problem. Left Nābhī, you see, is our spleen. It goes into this thing. Those mothers who have these problems can get children whose spleen is absolutely lethargic. Cannot produce any blood cells, anemia, a leukemia, some sort of a thing happens. Leukemia can be solved, you can say; can come.

But it is due to the mind. This is due to the mind of the mother or the mind of the father also. If the father is a flirt, he is a badmāsh [wicked] and all that, his son can get it. Is all mind is very powerful.

Mānas is very powerful because you go to the left. Flirting also is the sign of left side, absolute left side.

Flirting, not the actual. If a rapist, he is the right side but the flirt is the left side, absolutely the left-sided, in the sense that he is absolutely impotent *[UNCLEAR* greatly], impotent and you see it goes into his mind, romantic fellow, all this nonsense. There is no reality, only flirts with women this thing. But also it may happen with people who are overenergetic can also become flirts because what happens that they are so energetic that they have no attention on their sex. Then the sex enters into their mind, the other side of their mind, the ego part and then it can be used for ego purposes.

But a flirt, you see, is a funny type of a flirt, likes to show off his body, tries to show off his body, is the left-sided. A flirt who uses his eyes, you see and if something reminds of mothers and sort of pricks his ego on that and “I don't know so many women are after me” that's another thing.

So it's an abnormal combination. When he becomes overactive physically what happens that he becomes impotent as a result because all his activities were his mental activities. Even sex is a mental activity. Even religion is a mental activity. Everything becomes a mental activity. It's another mythical world of supraconscious. Religion means get up, go to the Church, sit on *[UNCLEAR* your head] very seriously, this, that, finished, come back, sit down, get your baptism, sit down like a fool and read the Bible, argue it out and say, “This is the dogma that I can think of." Nowhere near the truth. That's also a mental activity.

Fantasy it is and then it can be fanatics that side.

So the fanatics could be absolutely impotent. They have no interest in sex. They don't like the idea of sex. If

anybody talks openly, they don't like it but with eyes they will do. But if anybody mentions it, “Oh! This one? It's nonsense” but with the eyes they'll do. That's the ego style but this is another type where a man exposes his body. Women specially, they like to expose their bodies. I mean, imagine! This is left side, exposure of body. But to control other men and to use your body for that purpose is right-sided. But some even very slyly they do this. This is very sly manner.

Sahaja Yogi: I have seen, it's what they call a seductive style they have. Even they don't expose their body, they speak in such a way that you are caught in some sort of a...

Shri Mataji: They may not even speak. You see, their gestures are such...

Sahaja Yogi: They make you, first thing they do is illicit sympathy. First thing they do is they awaken sympathy and then before you know where you are, you are caught in something like a spider's web and they do not want anything from you. They just suck your energies.

Shri Mataji: Left-sided ones, they can do, I mean all these things but the result of all these things, that's what we have to see as we have to cure them. All such people suffer from mental problems. They might have wobbling in the stomach because of the uterus. There could be barren women. They will have problems with their periods very much. They will not have their periods regularly. They may have irregular periods, all sorts of thing where the uterus is the mother's place.

So the mother who is disturbed or debased in any way, not respected, you can have problems with the uterus also.

Sahaja Yogi: What about *[UNCLEAR* oral/corals] contraceptive *[UNCLEAR* oral/corals] apart from tablets. Here that is quite common in the West to control.

Shri Mataji: I have no idea as to that but that's not so bad [UNCLEAR, rotation] medication is not so bad but to take medicines for that is not good, periods and all that. But more is to see, slowly, slowly you see in Sahaja Yoga when you rise they build up a rhythm of it, you see, a rhythmic. It's better to have it rhythmic, you see, to arrange a rhythm.

So that's a better way of doing it in a rhythm where you know this time is free sort of thing is better. But this coil also is I don't think is any harm. After all, irritation is not so much. It becomes superficial but other things should be avoided like taking pills and all that is absolutely wrong. Pills and all that must be stopped.

Sahaja Yogi: The young women of even fourteen to sixteen coming in are being on the pill, Mother. Such little girls, really. They start so early.

Shri Mataji: Because mothers, you know, don't want to take the responsibility of the girl *[UNCLEAR]*.

I mean, you see they don't know these things at all. In the city at the most we don't have these problems, you see, because we don't have so much of a exposure of sex, you see. We don't talk of sex. I mean, innocent people, they are innocent.

So if you are innocent you don't have to. But imagine from this how many dangers are there. First of all, it's very unnatural to have a child very early because they are not matured enough and you are not married.

So the child is placed in a very difficult situation.

[Aside:] *[UNCLEAR]*.

So that kind of a thing is among Sahaja Yogis we have to understand that our children, we should bring up in such a way that they are very innocent.

Try to keep them innocent, more with the flowers and with animals and all that and in such a way that they do not see all these things which are excitable by young. But if it is so, then what? If a child is like this then what is the treatment for a thing like this? If the child has too much interest in these things, if he is right-sided, he has interest like this, best thing is give him cold water bath and things, you see. Give more cold water baths. Make him sit in the water tub for a while with some salt and all that.

That can help. Sandalwood paste at the Mūlādhāra will be good idea to cool him down so the excitement is much less and then you can put him left to the right, put him down.

But if it is a sly way of doing things and all that, then you can use fire [ajwain smoke is given during childhood]. In India it's very common, they give ajwain, you see. Put the ajwain and put the child over that one, you see, smoke of the ajwain. It's antiseptic and anti-bhoots and anti-everything. Just put the child on the ajwain and it takes away all the bhoots from them.

It's very clean.

So that's what they do. For children it is good but also for elders it is very good to take it that way just to get rid of all this funny thing. Because Mūlādhāra is the support of all being.

So to keep it clean and nice, any combination with it can be very deep and lasting. It's very deep and lasting.

You can't get rid of it very easy. That's why Mūlādhāra *[UNCLEAR]* and if somebody has Mūlādhāra you give the bandhan to Mūlādhāra. If you go to the combinations higher, say left Nābhī, as I told you, you get blood cancer. You get diabetes from left Nābhī because that's all contained in left Nābhī. Also you can get lethargic liver, left Nābhī combination with Swādhiṣhṭhāna. With Swādhiṣhṭhāna, left Nābhī, this combination is, these things can occur.

Then we go ahead of that is the troubles like, say, diabetes cause left Nābhī is for diabetes. Now diabetes is not caused as a result of lethargic ways of the pancreas but it is actually overactive pancreas becomes lethargic, overactive. You see what happens, we think too much. Pancreas, what does it do is to convert sugar into digestible, what does it convert into? What it does is to digest the sugar in a way or it neutralises into glucose; it breaks up.

Sahaja Yogi: I'll tell you what it does. The endocrine part of the pancreas which causes diabetes, that converts the sugar into glycodin that stores the sugar in the body in the form of glucon or glycogen.

Shri Mataji: Stores the sugar as well as it also must be reducing it.

Sahaja Yogi: It reduces the level in the blood. It puts it into the cells of the body.

Shri Mataji: So what happens that when you are using your thinking too much or liver too much then what happens that the sugar is consumed fast because of the liver, you see. If liver is overactive, it means sugar. Then the liver is sucked and when it is too much sucked then more is poured over by this pancreas.

Glycogen is more poured. It goes into over-activity. When it goes to overactive then it gets diagnosed and no more, finished. Then it says that *[UNCLEAR* we have] diabetes.

So it becomes lethargic. But it is over-activity that brings this lethargy.

Sahaja Yogi: Yeah, this is correct because one of the functions of insulin is to increase the uptake of sugar by the liver.

Shri Mataji: Means it doesn't secrete insulin any more. See, it has an activity of secreting insulin.

Now it has a limited energy of producing insulin. I mean, if you exhaust it so where to get the insulin? So you have to put the insulin additional. This is the artificial thing. But you can cure diabetes by raising the left to the right because there you raise it, awaken, left to the right. Now right to the left you should not do in diabetes, though it is the same thing as right to the left, but first you try to raise it if possible.

If there is still some life left in that thing, absolutely there is some life left, then what happens is that it may start working. It starts working because when it starts

pumping, the energy from the Swādhiṣhṭhāna can flow because now it's in connection with the Divine Power.

So that can be sucked in.

So it starts working out. But supposing now it is in such a shape that it is absolutely finished, exhausted, I mean, it doesn't rise. Then you have to put right to the left and tell Ādi Shakti to play her part; so She awakens it first. Ādi Shakti to work it out. First you try to raise it with your own Self, with your own hand, your own Kuṇḍalinī, on the left to the right.

Try to give it a sort of a little *[UNCLEAR* teaser/tweezer], you can say. But still it may not rise; it may not.

So in certain cases, diabetes is curable if you put it left to the right or if it is a bad case, then you have to put right to the left. Like cases like infantile diabetes.

Sahaja Yogi: Diabetes is very common amongst Parsees, very common in Jews...

Shri Mataji: You see, diabetes will be very common in any country which is over-developed, very rich.

It is the disease of the affluence [more the affluence, more is the intake of sugar]. They take more sugar than normal, those who are affluent.

Also apart from that sugar what they do, they think too much.

Sometimes human being diet, don't take sugar. Don't take sugar but think. Then they will get diabetes.

Question: Why do children get diabetes?

Shri Mataji: Children because the parents are like that. The blood, you see, the parents, the pattern, every blood has a pattern and the message. Every person's blood has

a pattern and a message. It carries the complete, you see it is the habit of a cell, is molded by the kind of a personality you have. And now the mother's blood goes into the child's blood.

So the same pattern is carried there and that blood, you see, circulates. If mother is like that, you see, she has diabetes, the child has. If the father has also, if it is a son, the son will get it, not women. Women do not get so much of diabetes. Normally woman don't get it. But if there are women, you see, like politicians and all that or those who are manly women, even woman housewives who plan too much about their house hold, what to cook and how to entice the husband, you see, they also can have.

Then there is pancreas and spleen. Spleen diseases, I've told you, leukemia and all that.

So for that how to cure? Best for diabetes is to use salt. Sea bath. Sitting in the sea, sea bath. And for diabetes, another thing which is very good is to have little pumping of our hands. I mean, you are a realised Soul.

Supposing you find somebody has diabetes, so you locate the pancreas, you see. Just try to little bit tickle it like that, you see. The pancreas, you can feel the pancreas. The doctors can feel it. Just give it a little tickle. And for a Sahaja Yogi, it is easy to locate. Wherever there is a problem, you'll find a lumpy spot.

But only Sahaja Yogis can feel because they are subtle. Doctors may not. A lump, see, you can find a lump here. For Me, all lumps are nothing but My Chakras working. I am talking about diabetes. You see, My Chakras are working like a diabetic patient.

Now this diabetes gives you a problem here because Swādhiṣhṭhāna goes around here also.

So when you have a Mūlādhāra and a Swādhiṣhṭhāna, then you have a problem here at the back.

So you get eyesight problem.

Suddenly you'll find some people absolutely blind in the eyes only. Now what you do is to put a candle before My photograph and put little sindoor on the head and give it a proper, what you call a, pradakshinā style of a bandhan through the back side with a flame, with a flame; that's very important.

Flame should be used, nothing else and you will be surprised, people will start seeing. I mean, somebody started seeing in Geneva. First she saw My red mark. Then she saw My face. Then she started seeing.

But if it is left Swādhiṣhṭhāna and right Swādhiṣhṭhāna because of pancreas and Mūlādhāra, then it is a provision, I'd say. Then it takes more time. But as you will know your hands will give the flame.

So for pancreas it may show right Swādhiṣhṭhāna also, depends on at what position you are. Supposing it is over-activity of the pancreas is going on, then you get right Swādhiṣhṭhāna. But if you are lethargic, then finished. Then you just clean the left Swādhiṣhṭhāna. But normally both you see in pancreas; you can see both.

So you get a lethargic or overactive pancreas or you can get even the same with the spleen.

Now you say the spleen that is overactive. It's the one that makes it absolutely lethargic with over-activity and then that inactivity brings forth this leukemia business

because the triggering takes place. It becomes, you see, sort of hopeless and starts depending on some help and then the bhoots come in to help it. They start triggering it. When they start triggering, they do it the way they are.

So it starts becoming bigger and bigger because it is not in relation with the whole any more. Like a person who is tired now, he sits down. There is a demon who comes. He moves with his speed. It's like that and that's why cancer is caused.

Do you follow My point? Because when these people attack, they have their own speed, their own rhythm which has nothing to do with the rhythm of the body sort of a, they become so this thing, that if somebody lifts them up and they start using them. That's how cancer is caused, when you reach that state of over-activity.

Now you can say for the void, peritoneum, void. But the worst is that if void is caught on both the sides, that is, if you think you are a Guru or you have used some methods to be the Guru or you have tried to put something and also go to some Guru or, I mean, accept somebody as a Guru. Both way if it works out then you get a compete Ekādaśha on that. Then the activity of the cancer is much more. The reason I'll tell you. The reason is very interesting. This reason you must know is the vāni, you see, is the sound.

Sound that moves or the Kuṇḍalinī that moves, you see, later on making sound but first the sound is there.

So the sound rises first before the Kuṇḍalinī. Om, you can say, starts moving when there is Kuṇḍalinī. What happens that the flow stops here of the sound.

So it is para. First of all the vāni is para. You can't hear it and then it comes up to Madhyamarga. Then it starts throbbing here showing it can't go any further in that stage and when that throbbing starts spreading, actually your attention is dropped left side. That's the danger sign. Then you find this throbbing here in the sternum, below the sternum, in the stomach area, you can say, *[UNCLEAR]*... cardiac at this point you find it, dhak dhak dhak dhak.

So you can also do one thing at that time. It's easier to put your right hand on there now and then you put your left hand on the center of the heart and ask the person to hold his breath and go on saying Devī's mantra. The dhak dhak will rise. Then you lift the right hand. Put it on to Viśhuddhi and take Śhrī Kṛiṣhṇa's name till this dhak, this throbbing, comes here. Then you take it higher here and then you put it higher to the Sahasrāra. It comes out. That's one way of clearing out if you find any throbbing there. It's a very important part. Did you follow that?

Sahaja Yogi: This sound is Omkāra, is it?

Shri Mataji: It's Omkāra. It's an Omkāra which is para, which is not heard. It's beyond but it becomes heard here because it starts, you see, it has an obstruction. The one that is all-pervading everywhere, it is existing already there. What happens that sound, everything has a sound inside, you see, but it's silent. This silent sound becomes active because it has an obstruction. Say, for example, if I hit this it gives a sound.

Sahaja Yogi: The Kuṇḍalinī is Omkāra, is it?

Shri Mataji: That is also Omkāra. Kuṇḍalinī is also Omkāra. But that sound which already is present in the

body, this sound becomes active in the sense when you, percussion happens, when the percussion happens...

Sahaja Yogi: When the Kuṇḍalinī strikes that is...

Shri Mataji: No, no. Kuṇḍalinī has nothing to do with this at this stage. Kuṇḍalinī has nothing to do.

Sahaja Yogi: The body is also Omkāra also, isn't it?

Shri Mataji: I mean, you can say so. Om, these are the three things that is working at it, you see.

The whole thing is working on A-u-m. It's all Brahma Shakti, the Brahma Shakti which is already present within us; otherwise we won't exist.

So what are the Brahma Shaktis within us, are the three Shaktis are there. But what happens actually when it integrates because of the Spirit, we call the Spirit is Omkāra.

All right? Now the Kuṇḍalinī is the three Shaktis together but manifested within us. Also these three separate Shaktis are there. When, you see, the attention is enraged or you can say the attention cannot find its movement everywhere, then it starts hitting you there and then also with percussion. This is the percussion but the Anāhata is without percussion.

You see, if I hit this it will make a sound. All right? But there is a sound must be in this; otherwise how does it make a sound? It must come from somewhere.

Sahaja Yogi: Now I understand. The sound is inherent in the substance.

Shri Mataji: Of course, but it's silent.

Sahaja Yogi: But something can trigger it so it becomes a sound.

Shri Mataji: Anāhata is a sound which is without the *[UNCLEAR* pressure/presence] in the sound.

Sahaja Yogi: Which is inherent in the vibrations of the substance's sound.

Shri Mataji: It just makes a sound. But the trouble is the sound, we can't hear it. Of course, some of the sounds we can't hear it because our ears are not made for that. That's different. But the sound that is in our body we can't hear. Can you? Everything is going on. We don't hear any sound. It's not all the sounds are outside. But when the attention is hitting something then the sound is made. You can hear. That is the percussion. But actually this heart is without percussion. Natural sound is without percussion. Only in the heart it is manifested, as it's called as pashyanti where it just cease.

So it is.

Sahaja Yogi: Shri Mataji, according to this would you say all sounds is an indication of disturbance of the attention?

Shri Mataji: All artificial sounds. You see, normally there is no sound.

Sahaja Yogi: You see, because I used to notice in *[UNCLEAR* Derby] that wherever there was a lot of sound around like lawn mowers or cars or something, my liver would hurt and the attention would be diverted.

Shri Mataji: No, but that sound should not be so disturbing to a person who is in the center, you see. It is more a mental activity here, I think, so much of mental activity. Your brain is like bonbonbon.

Any more sound, you see, that upsets you. To Indians, it does not so much because this brain is so much going on like this all the time, you see. Bom bom bom bom bom, it's going on. You put a little sound and oh! they can't take it, too much for them.

But actually that is not so severe. The activity is so much that you can't bear any sound but with all that activity you don't hear the sound in your head. See, blood is flowing all that you don't hear any sound, you see, because it's all neutralised. Absolutely there is no imbalance. But when there is an imbalance, the sound starts. You then start hearing the sound.

Sahaja Yogi: What I was trying to say, Shri Mataji, is that in this world there is so much sound. What is that sound? Is that sound a manifestation of imbalance?

Shri Mataji: No, that is percussion. That is with percussion. The sound comes from percussion. No, that is a sound that comes from percussion, any percussion. Without percussion there is no sound.

Sahaja Yogi: But what causes that percussion?

Shri Mataji: That percussion can be human, can be any percussion.

Sahaja Yogi: But that's not the sign of imbalance...

Shri Mataji: No, in a way it is. Because when it is silent it is not at all touched but if you touch it then there is a percussion created. That sound is only in the heart, that is Anāhata, without percussion.

Only the heart has. Why? Because of the spirit...

Sahaja Yogi: So the whole Universe is Anāhata and out of this Anāhata, on top of that is placed percussion.

Shri Mataji: Everything is in para, para Shakti potential.

Let's say a man becomes mad. How will you make it out? You'll get a throbbing here and throbbing there, just the opposite of Me. If a man is mad I'll also get a throbbing, but I'll not be mad. On the contrary, I'll be producing anti-vaccine, you see, antibodies in my head or anti-things, anti-effective things.

So if he's a mad man, you'll see he'll have a throb. If you have a bad throat you will find a throb.

Sahaja Yogi: So any sort of throbbing...

Shri Mataji: Obstruction come on the way [Hindi].

Sahaja Yogi: Now let's take a third form, Vaikharī. Now that we do consciously. Like when you are doing Pūjā or reciting mantra, it is Vaikharī.

Shri Mataji: Now, here, you see, it passes through your sound box. It's like a bansuri [flute]. It passes through an aperture. Because of that, that air or that sound which is silent, that is flowing, you see, because of that movement here, gets into a, this is the nada, becomes the sound, here Vaikharī.

Sahaja Yogi: What is the importance of this sound, Shri Mataji, in the economy of the Spirit? Economy, I don't know what word to use. What is the importance of this Vaikharī to this Ātmā?

Shri Mataji: Ātmā? This Vaikharī? Vaikharī has all the consonants, all the vowels, you see. All the vowels are produced here. Without a vowel no mantra can be said and without the mantras, no deities can be awakened.

So the spirit in every deity has to be awakened.

So the spirit of the sound resides here.

Sahaja Yogi: But supposing you reach the stage where the whole Om is flowing through the whole Suṣhumnā. Then it is not necessary to use Vaikharī anymore. Is that right?

Shri Mataji: No, only Chitta can work out. Even Chitta is not *[UNCLEAR]*. They'll look after, I mean, I don't really, to be really frank *[UNCLEAR]*. In My conscious mind I am not bothered. But I have built this up. You see all the mehenat [hard work] I have done before, you see. But now here as you have put up the thing, nobody knows what I have done. Only I have to put the lights on and very nice.

But I have done the job also but now I don't have to worry so much. I just put the button on.

Sahaja Yogi: Mother, when we feel the pain from somebody who is sick when we think we are curing it, actually we are doing it by asking you to increase the flow from that part in You.

Shri Mataji: Yes, you are awakening that.

Sahaja Yogi: We are awakening it in You. We are not awakening in ourselves.

Shri Mataji: No, no, in yourselves. You see because when you, mind is all the time awakened. But what happens that by saying that whatever is awakened in Me is there in you and then you react on the other person.

Sahaja Yogi: We also produce antibodies.

Shri Mataji: Of course, of course, you do. You are realised Souls. What do you think? You are sanctified people, not only produce but you are sanctified. [In Hindi:] You can

do wonders but now what to do now? [In English:] You are still *[UNCLEAR* ripe/unripe].

Sahaja Yogi:... you see in Jamshedpore, Shri Mataji, I used to notice this whenever there is a problem in Jamshedpore, what I used to do even not with me in my neighbourhood or something, I'll just go silent and I feel these antibodies will be coming out and in one or two days everything will be sorted out.

Shri Mataji: Yes. You see, you just have to think of it, ask for it. After all, Ādi Shakti herself has given you the license. How many people have got from Ādi Shakti? All My powers I have given. Just accept Me. Just surrender. Surrender means what? Accept Me means what? You exploit Me. Tell you very frankly the word is `exploit'. What is there to surrender? What do you have to surrender? Isn't it? What you are doing is to exploit Me completely. But not the way the Portuguese have done. Portuguese are the limit, I would think. I tell you it is the last thing I could think. I really...

Sahaja Yogi: What should we do about Ghent *[UNCLEAR]*?

Shri Mataji: I don't know what to do with that.

Sahaja Yogi: Something has to be sorted out. Otherwise they'll be in a big mess and our whole center will go into...

Shri Mataji: I feel that way. That's what I feel. Money, I don't mind. We'll manage somehow. You can do some little bit here and there to show C.P. I can manage it. We can so some hanky-panky but what to do about them? Basically they are the ones who are going to be hurt.

Sahaja Yogi: And if they are hurt the whole center will suffer.

Shri Mataji: Hmm. All right. Tell them, Gavin, that you have to keep some money for Mother out of whatever you all, you must keep some money or what they can do now they are getting these things.

We'll keep them here. We'll try to sell them or do something. We'll say you cannot just take advantage.

And you told them some percentage has to be kept or something?

Sahaja Yogi: They are quite willing to do it. Ricardo is still with us. *[UNCLEAR]*.

Shri Mataji: Yes, of course. He has no money to go back. You know that?

Sahaja Yogi: I thought he is thinking of going to America or something.

Shri Mataji: America?

Sahaja Yogi: There was talk of going to America just to...

Shri Mataji: See now, don't encourage him. He is on a very big ego trip and he'll ruin himself completely. Has he got those?

Sahaja Yogi: He's got copper utensils and there was some *[UNCLEAR* talk/local] of tablecloths. I'm not familiar...

Shri Mataji: And that I don't know. Just find out Gavin. Be on his lookout. I hope he doesn't fly out to America. Tell him that show everything to Mother. Bring it down here. I would like to see all that he has got. Stupid fellow. Just smartly came, taking My photograph. You see, I thought that who is this? Got some newspaper fellow? You see, very smartly dressed with a thing and jumping around

like a monkey. I didn't know who he was. Suddenly, I see, “Ah! You are here!" Such a stupid fool, I tell you.

Four thousand pounds he has borrowed and bought those table cloths. Who is going to buy for thirty pounds and fifty pounds a table cloth like that?

Sahaja Yogi: Most of us didn't know what was happening. That was at the beginning there was talk of big sale.

Shri Mataji: No, no, now what you do... yeah! That must be his idea at that time. To go to America.

What did he think? I thought I was a Commercial Director of Sahaja Yoga. I said, “What? Commercial Director. I just can't understand." I said, “Who gave you the idea?" He said, “Maybe my ego." I said, “Really?" I didn't know what to do. I mean, ego is stupid, stupidity. If somebody says, “What is it?" what am I to say then? Itna bhi stupidity kya ki char hazār pound āp borrow karte ho? [Why so much stupidity that you borrow four thousand pounds?] And now you appoint, self-appointment. We paid for his transfer, we paid for everything, played all the tricks that they should have it and here they are just borrowed money on that stock. Let's see now whether their shop works out or anything. But they never informed Me. You see, the bhoot is like that. The ego is such that we thought, “Mother, we thought it was your blessing that we got all the loan and everything." I said, “Really? But why didn't you inform Me that you are doing it? If it was My blessing you should have informed Me." There is no treatment for stupidity and twenty percent rate.

Sahaja Yogi: Of interest? twenty percent? I didn't realise that.

Shri Mataji: What are you getting to start? [In Hindi:] They don't have a single penny of their own.

Sahaja Yogi: [In English:] 800 pounds a year, just to service the *[UNCLEAR]*.

Shri Mataji: I mean, they may sell it because there are 150 pieces altogether they have got but at the most for 3,000 or so...

Sahaja Yogi: Every three months of delay is costing him 200 pounds. I don't understand.

Shri Mataji: Every year how much?

Sahaja Yogi: 800 pounds a year. For them, it's a lot of money.

Shri Mataji: I think they'll become bankrupt. That's the solution they have. I think they'll sell it off and say, “We can't return your money." Within four years they have to return. They can say, “We can't return. We are bankrupt." That's the only way they have.

Sahaja Yogi: Then what future do they have? They can't soft loan it.

Shri Mataji: All right.

So this is it.

So now which one, left side we have dealt with.

Sahaja Yogi: Heart, Viśhuddhi, Āgñyā we have left. We haven't done āsman.

Shri Mataji: Aasman is right side.

Sahaja Yogi: Left Heart complications, left Viśhuddhi complication, left Āgñyā complications. Treatment of diabetes? Sugar and salt, Mother? Sugar or only salt?

Shri Mataji: Salt. For the spleen if you can really give vibrated extracts, you see, liver extracts or something,

firstly. Liv 52 vibrated, for spleen, liver extracts, you see, like Livergen or something. It has nothing to do with liver but they are liver extracts, means for the RBCs only, for iron content.

Sahaja Yogi: What about eating liver for the spleen? Is it good, Mother?

Shri Mataji: It is good for the spleen, liver [in India liver is smashed and had] for iron, any kind of iron content, B12. You better give Me one B12 again. Everybody said that I was looking much better but now I am much better. I was so tired.

Sahaja Yogi: In the Hampstead meeting [yesterday] you were looking very young.

Shri Mataji: Isn't it? Everybody said in Hampstead but you know I got tired in this one. The one we had, the last one, Cambridge, Cambridge one was also very, too much. You see I had travelled, went there, had a Pūjā in the morning, no rest. Then we travelled all the way and this horrible bhoot on my head all the time arguing, arguing, got fed up and then we went there. It was very hectic but the Cambridge was the one. But thank God there were people. Now I got over it. But that day I was very tired. OK over? OK, we'll do tomorrow sometime. What time? [Aside remarks.]

Shri Mataji:... That Sahaja Yogis don't realise.

Sahaja Yogi: That's the desire, Mother, to awaken, the desire to do actually more than you think you can.

Shri Mataji: Yes, you see you have to go to the roots, you see. You have to go deep down into it.

You have to be serious people. You have to be serious. You have to work it out because you have to go deeper into it. It's nothing superficial. Superficial things can be done superficially. You have to be ardent about it, earnest, absolutely earnest about it. It's reality, you see. It's not fantasy. You cannot say, `Love, love, love.' All that nonsense is not there. To go deep down into it, to get to it, this Sahaja Yogis don't realise. I tell you I feel that Sahaja Yogis don't realise that it's a deep investigation, the deep approach the superficial people can't reach.

Sahaja Yogi: The Canadians seem to be doing very well Mother.

Shri Mataji: They are much deeper. You see, organizing outside is important but much more is organizing within and the organizing within comes when you reach the depth. If you do not reach the depth, how are you going to organize yourself within? There is no way out.

So for every small, small thing, “Mother, he wakes me up in the morning", array, why should anybody ask you to wake up? You get up and do it. You get up on your own. Objections, I am surprised at it. It should be done, for you good. You have to do it. You have to work it out. It is not just by the way on the road walking. You can just catch hold of something. It's not that. You have to work it out. This Terrance came, “I don't like people." I said, “You shut up now. Don't interfere with. That's the thing. No use criticising others or doing anything. You better keep quiet. You don't understand anything." Then he kept quiet.

Because Australians are going deeper, you see. Nobody tells them. This is the point, you see. It's not just fun or anything. You have to go deep into yourself, to organize yourself. You must be organized within yourself. You see, alertness should come in that movement, “Oh, where is my mind, Mother?" It's not just talking, you see, or putting posters or things like that.

Sahaja Yogi: Especially if many of these actions they are done without desire.

Shri Mataji: Without desire [in Hindi:] and to talk about it superficially [in English:] and just to talk about is very... What have you achieved yourself? This is the chance. You have to dive down, if you have to find. First dive down much deep and that's what I find is lacking. You see, why should anybody wake you up? What is the need? You wake up yourself. You should be the leader and you should do it. What is the need for anyone to do it? You come out of your own shells. You see, I can't understand Myself. I mean, if I were you, I would have done it. I would have done everything to the extremes to do it if I were you. But you see I'm just the other way. Still I am an extreme... if this is the way you work, even if you pay someone thousands of pounds, people won't work like that the way you work. For what I can't understand, the sincerity.

Sahaja Yogi: Also I think, Shri Mataji, is happening that people are putting responsibility for their ascent on few people who take things earnestly and seriously. This used to be always here in London, I noticed and they put their responsibility for their ascent on those people and they will just pack off and enjoy life.

Shri Mataji: They don't want to ascend. You see, you have to take something and enjoy it yourself. If your tongue is not sensitive you cannot enjoy. As simple as that. Nobody can make your tongue sensitive.

Can anyone? You have to make your tongue, everyone has. What is the need to say anything? I mean, it's all right in the beginning. I just thought that if we put restriction all the nonsensical people will disappear. That's why I said, “All right” but what is this? This has become a customary thing.

Sahaja Yogi: You see, this business of taking responsibility, the main thing in England is people don't want to take responsibility for anything including...

Shri Mataji: Oh, responsibility to your own seeking? I am not asking to take anybody else's responsibility.

Like this Susan now, the other day I saw. I was amazed, so much left, so much left. She has developed a face like a man, I tell you!

Sahaja Yogi: And no-one can see it. They all think she's very sweet.

Shri Mataji: Really? There is a man coming into her. She will become a man, you see that?

Sahaja Yogi: Much worse than it was one year ago.

Shri Mataji: That day she came, I said, “You go and sit at the back." I just couldn't bear. I mean, they are not sensitive people. She is shrinking, on what? On mental level maybe.

Sahaja Yogi: I don't know, Mother. It's very subtle, you see. I mean, I can't explain it. It's, they have made a fantasy out of Sahaja Yoga. They imagine. First they hear

what they should feel, then they imagine they feel it and then they feel happy.

Shri Mataji: Stupid. All right, whatever it is. Now in this Bhagwati Pūjā, on that day, on Monday, I'm going to come out with some things like that about this one that you see. Now look at these persons so very *[UNCLEAR]*. They get up at 4 a.m., 4 o'clock, have bath, sit down, Baithak, you see, what we call is Baithak. I don't know what you call it.

Sahaja Yogi: Baithak is determination?

Shri Mataji: It's the sitting, sitting hours of the meditation, sitting hours, Baithak. What is your Baithak? You must have Baithak. It needs to be steadied on one point. In everything we think, even you say my brother, I told him that, “Why don't you take this one for your articles, say, to the Auditor." He said, “Has he got a Baithak?" Means a determined way of sitting on to it. Assiduity is,

Sahaja Yogi: Determination plus stability.

Shri Mataji:... and stability. There is no word in English for it.

Sahaja Yogi: It applies to depth.

Shri Mataji: Depth and the holding to it and getting into it and everything is what is Baithak.

Sahaja Yogi: Some stubbornness also. What the English did to the Falklands in a gross way. They went, they went and they go it. Shri Mataji, the whole society has lost that. Only in the Army still you'll find that. This is the problem with the country, is that Baithak has gone out in Sahaja Yoga but also out of it.

Shri Mataji: But Rustom, it's such a thing. If you really see the beauty of Sahaja Yoga, one should really sit down. Even for music in India you have to have a Baithak. They are not a Baithak master.

They cannot do it. They have to do riyāz for six-six hours, seven-seven hours. In India it's very common for a musician to sit down for six hours. Otherwise, do you think they can move their voices like that? You see, C.P. is an example of that. Baithak is Baithak. When you come, you can see that. And in the office everybody says, “Whichever are the Indians? They work like this." It's a team. They all work better than all the English people together. English are 5:30 they have to go home, for what?

Sahaja Yogi: To meet their wives who will nag them.

Shri Mataji: I don't know, maybe to rape or what? I don't know. All of them, all of them, whether they are Japanese or anyone, except for the Indians, they work very hard, finish the job; then they go.

Baithak is the point, you see. In Sahaja Yoga that's what we need. In logon ne sab ne kya hai [All these people], they have achieved. Just see *[UNCLEAR]* the thing, how he has done it. Bahut baithak chahiye [a lot of baithak is required]. That is what is lacking here. I don't know how to put this into their heads.

They are fantastic and they, what is this nonsense? When they come before Me, I can't even make them sit before Me. It's such a condition! They'll go to India and they will also *[UNCLEAR]*.

Sahaja Yogi: They have to sit for six hours, seven hours at a stretch?

Shri Mataji: They do. They do. Abhi jaise ek Chakra pakda hai [Let's say if a Chakra is catching], for example, Swādhiṣhṭhāna. They will work out Swādhiṣhṭhāna, work out, work out, clear it. They will clean the carpets much more with Baithak than their inside, to get to it.

Sahaja Yogi: That has to be told to them.

Shri Mataji: God will do. Mātājī will do. How far can I go? You see, I drop off very fast. Now this one is now one of the examples is this Susan, very left-sided. She'll become a man, I have a feeling.

Very left-sided, she is so caught up. See actually her ego is full of bhoots and she is one of them who is a target for Me and I am *[UNCLEAR]* there is another Susan. Susan, a funny name, huh! What does that mean? Is it a biblical name?

Sahaja Yogi: Yeah, Susanne. There is a dirty story in the Bible, Shri Mataji. It certainly gives rise to dirty thinking. It's a dirty story. That's all I can tell you.

[Shri Mataji talks to Her cook and arranges for seating and food menu arrangement for the guests. She discusses about buying sarī for Gaurī Pūjā. Gifts to be given on Gaurī Pūjā can be made of stone or clay.

Can be of marble. She suggests a Mother Mercy and a little child idol made of soap stone as a gift. During Lakṣhmī Pūjā, gift made of gold can be given but it's not mandatory. But appropriate gifts according to occasion are more preferable.]

***Contents: 1982-09-20*, Public Program, Day 2, You Are to be Born again, Ghent, Belgium**

Today, we're seeing in this world a tremendous crisis. Either we accept the emancipation or we really get destroyed. In our achievement of material powers.....

***Contents: 1982-09-21*, Public Program, Day 3, Ghent, Belgium**

... of these things, they can fall a trap to all these people who practice this kind of black magic. But an intelligent man must understand that what you have to get is your realisation. That means the power of your Spirit must manifest, not the powers of some dead spirits which makes you... also they can take your body and travel, astral travelling and all that. They can do all kinds of things. All this type of spirits that enter into human awareness always cause diseases and also can cause lots of problems: mental and physical. Most of the mental cases are afflicted by these; all of them I should say. And if they are to be cured, only thing what you have to do is to see that the spirits depart from them and they are absolutely normal.

In My own experience, all the cancer patients that I have cured had an affliction from the left side.

They were all possessed by something or other, either by Guru or by some sort of a left-sided attachment or they had troubles like muscular, you see, muscular disability, yes, yes, that sort of thing and all polio, virus infection all are due to the left-sided attack. Virus is due to the left-sided attack of some horrible vegetables which have gone out of the circulation; even tobacco is one of them. It is another devilish thing.

Tobacco is a thing that was created by God as insecticide and not to be smoked. But human being, you see, in their original idea try to do everything that is absurd and they started smoking it and it is a thing that is not to be smoked. That's not meant for human being from starting and that's how it started giving the trouble of cancer. It is an attack of the left side.

There is no logic in following these things because what is the interest of Divine or God in making things move? Why should God give you diamonds and things, these material things which are of no value to human beings? And why should God take you away from your body when He has given you this body and separate from there in a dangerous position? There are some people who start suddenly jumping, you see, without their control and then they think they have become Divine because they have started jumping without their own control. But you can always jump, even with your control.

So why do you want to lose your control for that? Some people think that when they take out their clothes they have achieved their spirituality because now there are no inhibitions and they have become free birds. Any drunkard can do that. When you lose your awareness, you can do what you like. When there is no control on yourself you can do whatever you like or whatever is done to you: you accept it as a spiritual blessing.

There are some Gurus who are teaching you that you can fly in the air. Make that Guru fly first of all.

Let him jump from this leaning tower of Pisa and let's see where does he land. But you pay thousands of pounds to such a horrible hoax and then you get suffering from

such a person. You get epilepsies and all kinds of troubles. Spirituality is not illogical. It is not blind faith. You cannot purchase it. You cannot sell it. You cannot put in an effort for it. It is a spontaneous happening or blessing that you have to get at the end of your evolutionary process. Now when we understand that we have to look for what should happen to us.

Yesterday I told you that you get the power of your Spirit. And the power of Spirit first of all is that it's a universal being within us; placed within us is the universal being. Now this universal being once gets enlightened and our attention is enlightened within us, we should become universal beings. We should become. Again, I say become. It is not like you form some sort of a group: `We are all brothers and sisters,' and when it comes to calamity, you know they are no more. It should happen in such a way that we should feel that others are part and parcel of our being on our nervous system, on our finger tips. This is our Self-realisation. This is our real Baptism, not the artificial one.

Now, to go to the left side, there are many things which human beings use which can take them to the left side. Apart from these horrible Gurus there are things like alcohol that can take you away to the left hand side and there are many drugs that take you to the left hand side. A person who had a mother who must have been very strict, never gave her love or maybe that the mother has been all the time a crying baby, never gave joy to the child, such a person can become left-sided.

So the left-sided person is always complaining, asking for comfort, always unhappy and always in a very

pessimistic mood. But such a person suffers bodily and mentally very much. These people are very emotional and such people can end up in the lunatic asylum when their brain fails, not their hearts, but the brain. They use so much of their heart but the brain fails. That is the balancing factor of nature. Such people can take a lot of domination from others, they like to be dominated and they can be very slavish. But they are sly and sarcastic and can be extremely disturbed.

Now on the other side, of the right side, we have a consciousness which looks after our future. It works all our physical and mental action.

So supraconscious area is the area that is our future. Beyond the supraconscious area lies the collective supraconscious. When you enter into the supraconscious area, you come across people who are dead but who have been extremely egoistical. We can say people like Hitler, you'll find them there. All the arrogant and egoistical and dominating people who have died and still have ambitions to ruin others exist in that area. Hitler himself used the Tibetan Tantrism to get hold of such dominating souls. And to rule the German people with the idea that they are a special race. All this, this kind of work in Sanskrit language is called as bhoota Vidyā, Preta Vidyā, Shmashāna Vidyā, means the knowledge of the dead. When you get into the supraconscious area, first you start seeing an eye on the Āgñyā Chakra. That is first. The deviation starts to the right because when you are, then you don't see it. When you are the light, you don't see the light.

Then you start seeing things like colours and auras and all kinds of things which have something to do with the elements. This area is even more dangerous than the left side area because when you enter into supraconscious you never get any pains. You get very ego-oriented, you get very dominating and you start saying, “What's wrong, what's wrong?" You may kill thousands of people and you say, “What's wrong, what's wrong?" You give an explanation, rational explanation for everything that you do. You cross all the norms of life and you are least bothered about it. And this kind of ego-oriented temperament lands up into an area where you become a success, so-called. Such a person can be so much self-opinionated and so much injected in him is the idea that he is so great and he forgets that others are all human beings, made just like him. There are also some drugs that can take you to the right side, like LSD takes you to the right side.

Some clairvoyants can be on right side or some could be on left hand side. Right-sided clairvoyants can see the future, can talk about the future, could be like good astrologers.

But Spirit lives in no space and in no time. It is not interested in future or past. But it illumines the present which is dynamic, which is real, which is the blissful state. And that is why any intelligent man who is logical should seek the Spirit and not all these nonsensical experiences and sensations. But people are more impressed by the circus they have to go through. For example if somebody says you have to pay 300 pounds to do something, then there is a competition who comes

first to pay 300 pounds. And once they enter into that competition, then they don't want to return because it is below their dignity to accept that they have been stupid to pay those 300 pounds. And some of them feel that, “Now we have paid it so let's go through it. Why waste the money?" But if you have paid the money for the poison, are you going to go through that? The first criteria should be: what have you achieved out of anything that you have been doing? There is a gentleman who does this kind of thing and then another kind of meditation, third type of thing, anything, is perfectly all right. He doesn't want to see himself, that what powers does he have himself.

If somebody has written a book, you should not dance at his tune. It is very easy to make people get into fashions, I think. If they publish one article that you must stand like this, you will find all of them standing everywhere. If they say you have to stand on your head, then all of them will stand on their heads whether they have high blood pressure or low blood pressure. Same about Haṭha Yoga: now the Haṭha Yoga of modern times is absolutely absurd. Patanjali lived thousands of years back when we had a different social system in India. The small children about from five to twenty-five years of age were sent to a university where there were professors and teachers, there were, who were realised Souls. And the first criteria was called as Īshwara Pranidhan which means the establishment of God within yourself, means Self-realisation first. Now without having any connection with the mains if I start shouting at it, it will be spoilt. Without connection, if you do anything, it's all wrong.

Then after even when you are connected, there is sign which tells you how to do, what, where and what is needed at this moment. The way these days people are doing so-called Yoga has nothing to do with Yoga, means union with the Divine, but only thing what's happening is they are developing a funny body which will ultimately collapse under the pressure of the heart. It is like taking a complete medicine box without knowing what medicines you have to take for what disease. Moreover, every human being requires a different type of a body. Say, there can be somebody who has one element less in that, then that person requires to do asanas which will help him to achieve the fulfilment of a particular element that is missing in him. And after realisation you know where the Kuṇḍalinī is stopping, at what center, what Chakras and then you can do the exercise required for that particular center.

Same thing has happened about Zen. Viditama was the originator of Zen system of religion, who was a realised Soul and till the 8th century there were only twenty-six realised Souls which were called as Kaśhyapas. Now these were no longer available in Zen system so whole artificial stuff started like your artificial style of Baptism.

For example, Tai Chi dance. Now without any vibrations flowing through you, what Tai Chi dance are you doing? Just moving your hand, it's just an acrobat. Another thing is acupuncture. That also is very dangerous. Why? I'll tell you. In both the cases when you do such things you are using the energy of your sympathetic nervous system. For example, if you are running very fast then you are using your sympathetic energy to run fast because there

is an emergency. But when you stop your running, the parasympathetic gives you the balance and brings your heart to normal. Now this parasympathetic has a limited energy before realisation. Only after realisation you get connected with that whole energy so that there is no exhaustion of energy.

So, when you try to put these needles into different places, what actually you do that if one Chakra is exhausted, one center is exhausted, you are trying to take energy from another center or from the third center. It goes on like that.

Those people who do such activities can become extremely dry people. They can become very hot-tempered.

They might go in to divorces and problems like that. They cannot be congenial with others. If the left side is exhausted, by then they might become paranoid or nervous.

So it can be anything. It can be one extreme or the other extreme, but you cannot be a balanced person.

So only thing that human beings have to do to overcome the original sin that is they have become human beings who think, who have taken responsibility upon themselves, is the original sin they committed that is they have become independent from God, to overcome that only thing that human being can do is to get into balance. That's why Moses came on this earth. He brought Ten Commandments and in India also in all the scriptures.

These Ten Commandments are described in the Bible, in all the Koranic laws, all the Ten Commandments are

described that you have to have these laws of the Divine. Our human laws are based on these laws, which have come to us from Divine. These laws are very important to be human beings. Otherwise we become animals or we become some *[UNCLEAR* volcanic] demons.

Now the problem is, people always try to use their freedom to be abandoned. They use it to deny all that is logical. And to deny all that normalises them. That's why these prophets came and told us that you must have a balance. That means don't go to the right and to the left. Don't be extremist, but be in balance. But people have lost that sense of balancing and now we have reached in a stage of modern times where it is called as Kali Yuga, the age of complete confusion. This confusion is very important though.

Without the confusion we will never try to come out of our original sin. This is the knowledge, so-called, we achieved that we make stupid fools out of us. Or else we create atom bombs and hydrogen bombs to kill our brothers and sisters or else to find out ways and methods how to exploit each other and on top of that to develop a rational explanation for all these kind of stupid or cruel work.

But in Sahaja Yoga we do not talk of any balancing to begin with. We do not ask what are your good or bad habits. Because when you are sitting in your car and something goes wrong with your car, you cannot correct it unless and until you are out of it. You may try to cleanse it and do whatever you like but you have to get out of the car to see what's wrong with it. For example, if there is something dirty on My sarī I do not know it and I

think it's all right for Me. As long as I am identified with this sarī then I don't like anybody criticising it. But as soon as I take it out and see for Myself, away from it, I know it's dirty and it must go. This is what Sahaja Yoga is today is called as Mahā Yoga because it is not meant for one person, but is meant for thousands of people. `Sahaja' means born with you, spontaneous, like it is born with a seed that it has to be a tree. And `Yoga' means union with the Divine. And also `Yoga' means the deftness of the technique, technique. In Sanskrit called as *[UNCLEAR* Kowshalam], Yoga *[UNCLEAR* Kowshalam].

So when you are realised, what do you feel? First when the Kuṇḍalinī rises upward, then when She pierces through the fontanelle area, giving you the real Baptism, that time you start feeling the Cool Breeze in your hands.

Some people don't feel it in the hand, they feel it in the head first and then in the hands if their this center is out of gear, which is mostly among Western people is, then they don't feel it in the hands so much.

So you have to correct this center so that they feel it in the hands.

So what do you feel actually? You feel the All-pervading Power of God's love, the Holy Ghost. Because it is that power you are feeling, you can experiment and find out that the power you are getting in your hand, has it got something special about it or not. You have to test it. You have to work it out, experiment with it. After you get the light, you have to give light to others. Christ has said we don't put the light under the table. You are only enlightened because you can give light to others.

So you become your own Guru. You start understanding what's wrong with yourself and correcting yourself. And you don't mind anything because you don't like it. And when such a happening takes place, gradually you find that you have become the witness of the whole show. When you are in the water, you are afraid of the waves. But when you get in the boat you see the waves and you are not afraid of them. In the beginning, is rather difficult to forget the habit for some people, but mostly people just jump on to another side and become something different, completely transformed.

Message of Christ is not His crucifixion because crucifixion was His accomplishment by which He got settled into this center of Āgñyā. He said, “It is accomplished” means that, that work that He had to do to enter into this very complicated place of Āgñyā where these two lines cross to enter there and to reside there, was a very difficult job which He accomplished by His crucifixion. And that is the gate, so everybody has to pass through that gate, so it's only through Christ one has to rise. There are many others but ultimately it is the Christ here, through which one has to rise.

So when the Kuṇḍalinī rises She enlightens or She awakens Christ deity here and then She comes out here thus gives you Self-realisation.

Moses did not talk of Self-realisation or of second birth. He talked of the balancing because that was the time of people to balance. At the time of Christ it was so horrifying that He could only live for four years. In that short time whatever was possible He said. He said that He will send you a redeemer. He talked of the future. He

said, “Anything against Me will be tolerated, but nothing against the Holy Ghost will be tolerated." Many people believe that Bible is the last word of Christ. It's not true. Christ was such a great personality that it cannot be contained in one book. He was an eternal being. But before Abraham came into being, we had people in India who were writing about Christ fourteen thousand years back. Are we going to deny the knowledge because they were not included in the Bible? Even the Bible that is today I don't know how far it has been tallying with the real Bible that was written because in the New Testament this Saint Paul who has been included. I don't know what right he had to be there, because he was not with Christ. He killed many Christians in fact. And he suddenly saw a cross so he became such a big Christian that he's included in the Bible. He created the biggest problem for Christians. He has taught that, I mean the description of the Acts, it's all written by him and not by the disciples of Christ. I mean he added his own stuff in between. If he sees the cross that means he's a supraconscious person. And if he's a supraconscious person, then how are we to rely on his any information? That he said that when the Holy Ghost came as Cool Breeze, that's true, but that all the disciples started speaking different languages and they behaved like mad people and everybody said they were mad. It's a simple question of getting possessed that's all. But they never got possessed, His disciples. And how can they behave like mad people? If there is Holy Ghost, they must be the sanest people going around.

This is a simple thing that we do not know that when the Holy Ghost comes into us or blesses us we get our realisation and a transformation takes place. You become the master of yourself. All your habits drop out. You become a beautiful personality, a compassionate and loving and blissful and relaxed person.

You become a universal being and the power of love flows through you, don't talk about it, just flows.

Most of your physical maladies are removed, your mental problems are removed. That's what it should happen. If it is Holy Ghost has to come to makes us mad, better not have it. But when it is an organized religion nobody can talk, you see, immediately people get very annoyed because it is organized, now fixed.

They do not want to think. They have blinkers like the horses have.

So now Catholicism is going towards charismatic, imagine! This is absolutely Satanic, anti-God, anti Christ. The Protestants started this joke much earlier. They called it Pentecostal. They all used to get the spirits in them, they say, “Ho, ho, ho, ho, ho." All of them behaving like that and they said, “Oh, the Holy Ghost has come in us." No change in their private life or in their understanding of life. Extremely alcoholic and horrid people they were. They had illegitimate relationships and they had illegal licenses with all kinds of dishonest things in India, we have so many of these Pentecost, nonsensical things even in the villages.

In Paris a boy, about twenty-five years, I think, of age came to us in a program and he just started saying, “Ha, hoo, he, he” all sorts of things he said first of all and then

he started crying, weeping and ultimately he fell down on the ground. He was from charismatic movement. He was like an epileptic person. When I went near him and I said to the Satan, “You leave his body!" Then he got all right. The boy felt so much normal, now he's living in our ashram. He's a normal person, he's going to colleges and he's working all right. And he told Me that all the members of that charismatic church are doing all these nonsense and even the priest is doing the same.

I don't know what's going to happen to these people who say, “Christ, Christ" and do nonsensical things in the name of Satan. I would say they are ignorant, they are blind. They have lost their ways and they have lost their *[UNCLEAR]*. But it is time for people who are thinking, must know that this is a very dangerous thing for them to do. It is just like any other Guru business. I hope people will understand it very soon because I am sure with this kind of happening, you develop also lot of diseases. The children become blind or they just die in their rooms, many incurable diseases are created by this kind of an action.

I'm sure one day will come when people will realise it and they should turn to reality.

The reality and truth is that you are the Spirit. You are the Spirit. The human beings can become the Spirit, not the animals. People should not try to save animals. They should try to save human beings.

Human beings, one human being is created out of thousands of animals. It's so important to think they have no value for themselves. Just they are standing at the

brink of becoming the Spirit and thousands can get realisation.

For example, in Indian villages there are people... I have seen thousands to come, they do not come one or two like this. They have no cars but they come in bullock carts, walking to get realisation because they know all these trickery and jugglery of spirituality. They are very sensitive to reality. Of course, the westernized Indians are just the same as you people are who like some sort of an artificial show. They are very little complicated, there's no complication we can say with them, while here people have complicated by having their mental projections about everything. All the outcome of the original sin: `What's wrong?' The wrong is that you cannot get your realisation. The wrong is you cannot become your Spirit. The wrong is you have to live with the wrong all the time.

So this is what it is.

Today is the time when thousands have to get realisation. As said in the Koran your hands will speak.

This is the Resurrection Time. This is the Last Judgment. How are we going to be judged? Is somebody going to put us in some sort of a balance to see how much your weight is or what your beauty points are? Michelangelo has shown in his very beautiful murals in Sistine Chapel, Christ standing like a huge personality and just throwing people on Āgñyā on the left or the right like that and they are all coming down to hell, very clearly he showed it. And the realised Souls are taken by the angels. There's no end to all these beautiful things about Christ but now we have spent a lot of time on talking about it. Now let

us have realisation, I think. It would be better if you can ask Me one or two questions and then we can have the experience of Self-realisation.

Any questions? Is it cold? Might be the vibrations are making you feel cold and not really the cold. How many of you taken My photograph now? All right.

You see, the Western people think that Christianity is their own contract. Was Christ born in England or in Belgium? Actually His Mother and He have lived in India much more that they ever came to your Western countries. He was much more an Indian than a European, all right. Yes, many people think like that, that He was born in England. And He used to wear suits and ties, you see. No, He was darker than Me. And He had dark hair. Because you have organized Him, you see, you have become the rightful owner of Christ. Actually the Christians who came to India, the missionaries, made the biggest mistake because there were nothing up here, you see, because it is written in the scriptures, in Indian scriptures that Mahāviṣhṇu will be born, who will die for your sins and He will take away your sins and your Karmas, is written down. But these stupid people didn't know anything about it, you see and they went and talked about Christ as He was something like an English man, you see. That when He will come then you don't have to worry about your Karmas. But these people never talked about Mahāviṣhṇu. They never tried to find out, nor did they have the idea of Christ, what it means that He died for our sins.

So the Indians still carried on with the cleansing of their Karmas.

He was described as the incarnation of *[UNCLEAR* Bowtha], not Buddha, *[UNCLEAR* Bowtha], the one who is the mild one. And they got confused with Buddha, but they said, “Buddha doesn't look like that." If they had told Indians it would have been much better but they didn't know themselves anything. They are all artificial Christians. It was all political Christianity. They wanted to have majority to become Christians somehow. They put a loaf in the water and would say this is the *[UNCLEAR* beef] and you have all become Christians now, those who taken water from here. By villages after villages, poor things Indians, you see, they thought, “Oh God! We have committed the sin now, the original sin we have committed so we have become Christians." Thank God He was not born in the West. Otherwise we would have had no chance to say anything about Him. He did not know any one of these languages either. But He knew Sanskrit. You know He went to India that you know very well.

All right. You see, the thing is, in India there has been a search on the roots side as I said and here it has been the shoot and both are complimentary. If you little bit humble down yourself, you will see that as you have knowledge of science, we have there the knowledge about all God's science. And it should not be resented, it is knowledge, it's for universal use. It is for the good of everyone. Unless and until you tell about Christ, how are you going to give realisation to people? I am not here to give you artificial Baptism with some water on your heads. But we have to talk about Him because He is the principal Deity who has to deal with this subject. I don't

see you as Westerners; I see you as human beings. You may see Me as an Indian because of your blinkers.

Now, should we have realisation now? Put your hands towards Me, please, all of you and close your eyes. It is the actualisation you have to face. You have to close your eyes and place both hands towards Me and don't open your eyes till I tell you because when the Kuṇḍalinī crosses through this Āgñyā Chakra of Christ, there is dilatation of pupils in the beginning and if your eyes are not closed, the Kuṇḍalinī won't come up. You see, just the opposite of mesmerism, you can see that.

Just don't say any mantra or anything, just keep your eyes shut, please. And please do not put in any effort, do not direct your attention in any position or point, just let it be as it is. If it is thinking, let it be. Be relaxed and sit in a relaxed pose, put your hands on your lap in a relaxed way. The aim is to get realisation that you have to be the Spirit. Be kind to yourself and fair to yourself and to your Creator who has created you. And don't be obstinate. Just keep yourself open, it will work out. Our job is to work it out and we can't say about the fruits. If it doesn't work out, we work out later on. But it has to work out and you have to certify yourself. Now we have here people who have come across from Paris and from England who can help us. Later on we can take people from Brussels, from Belgium to other places.

Now put your right hand on your heart, please. And before starting your meditation close your eyes and say one thing clearly that, `Mother I am not guilty.' Please say it again and again. Now you may say again and

again, you must say, `I'm not guilty.' Because what could you have done to be that guilty.

I'm talking about the ocean of love and ocean of compassion. Let Him judge you. You please don't judge yourself and condemn yourself. I told you that God has created you with such care and with such love and you have no business to condemn yourself. You are the highest in this universe and just ready to become a bird out of your egg.

Now put your left hand straight towards Me on your lap, please and say, `Mother I am the Spirit.' Keep a relaxed *[UNCLEAR* mouth], relaxed *[UNCLEAR]*, relax, relax. Do not go into any pressures, position or anything, just relax. Now put your right hand across your forehead and now say, `Mother I forgive everyone.' Say it from your heart, please. Say it again and again, please. Now put same right hand on top of your head touching your head and try to feel the central area with your palm. Also with your fingers in the central area of the head where you have your fontanelle bone, which was a membrane in your childhood. Now just feel on top your head with the right hand if there's a Cool Breeze coming out. Now you can try with the left hand and right hand towards Me.

Contents: 1982-09-22 **Pūjā (first in Belgium), Ghent, Belgium**

This is the first time we are having a Pūjā in Belgium. That's very quick for a Pūjā to be done like that.

Normally we don't allow people to come to Pūjā unless and until they are established Sahaja Yogis.

Because sometimes if they are half-baked, it harms them more in the way that they start doubting and thinking about it. But in the Pūjā you should stop thinking, do not doubt, do not think, then you have the best advantage out of it.

As far as I'm concerned, My Chakras start working sometimes with a great force. Say if [name yogi] does Pūjā, he is such a great Sahaja Yogi that the deities can start emitting lots of vibrations. But if you are not in the receiving mood, then it takes time for Me to take out the vibrations in the atmosphere or in another awareness.

So it becomes more difficult for Me to have a Pūjā, because sometimes I do suffer with overflowing vibrations which you cannot suck in.

So today as we have ventured to have this Pūjā for all of you, please try to receive, humble down yourselves in your hearts. Only through your hearts you can receive the blessings of this Pūjā.

It is a very higher state when you can do that, but it is alright with Sahaja Yoga, they are aware, all the deities, that you are still children, you can make mistakes and you are seekers and you are especially blessed by Me.

It is not difficult in India because the one who raises the Kuṇḍalinī like this of masses of people definitely establishes Me in their hearts, that I'm the primordial Mother. Because it is written in so many books so they don't have this problem. While here people have not heard about Holy Ghost and it's a secret for them and they just can't understand. It is impossible to explain to them.

If someone says I'm God and all that, then they are enamoured. Openly if somebody declares I'm God.

But that should not be in Sahaja Yoga, we should have an inner circle. Only these people should start growing, then others should follow.

It should not be exposed to everyone, it won't help much and to Me also it doesn't give pleasure because the vibrations are not sucked in and I have to carry the load upon Myself for quite some time till I deliver it to the atmosphere.

So it's a very different system we have. We seldom allow people to join us in the Pūjā, only people about whom we are convinced that they are alright we allow them.

So though it's a hasty one today we have done I'm sure you people in Belgium will try to receive more don't think about it. Just expose your body to it, expose your mind to it and get as much as possible.

Because I think now in Belgium I will be here only after a year or so, not before that. But you all can come to London some time. There's a Pūjā now, there's a very good Pūjā of Navarātri. We must have one big Pūjā for Navarātri in London itself and I think it not very far away, you people can come for that Pūjā. That is the beginning of the nine days, nine incarnations of the Goddess when she came on this earth to kill the demons and the devils who were troubling the devotees and the seekers and one has to also know about that part of knowledge, it is very important.

These books, luckily some of them are translated. If you go through them then it will be easier for you to understand. As I told you that India is the root and you

are the shoot, so the knowledge is more known to Indians, as science knowledge is known to you, knowledge about God is known to them.

And so there should be no harm in learning about it because you are all seekers you are not scientists.

You are seekers of the science of God.

So the best thing is to get this into yourselves, open up yourselves, receive the blessings by which you grow. It's like sunshine to the plants.

May God bless you.

Don't think. As it is I have stopped you thinking, but try to receive as much as possible with humility.

Contents: 1982-09-25 **Departure, Airport, Belgium or Holland**

[While Shri Mataji buys chocolates at the airport, Brian Bell is given a copy of an Indian magazine called Today and asked to show Her an article in it. Brian tell Her he has the magazine in his bag and the matter drops out his mind. When settled in the plane:] Now what is this letter [article in the newspaper]? [The article was about the leader of a very damaging cult who was hoping to resettle from Switzerland to India and who wanted the Indian government to waive any tax claim on the money he aimed to transfer.

The article included a map which showed the Indian properties he owned.] [Shri Mataji points out how they are clustered around army, navy and air force headquarters, in Pune and Calcutta, for instance. She talks about the dangers of this, puts a bandhan on it and hands back the magazine.] You know that what this

Rākshasa is doing? He pushes his followers as far as possible into the left. He prevents them from taking garlic and cuts down on their protein, so that when they die they will die far out in the left. He can then control the bhoots that they become, so he can have an army of bhoots under his command.

[Suddenly Her comments about this Rākshasa's properties and the way he was creating these armies of bhoots, took on terrifying overtones. Fortunately, as the Indian government refuses to waive its legal claims, the Rākshasa never resettled in the land of his birth.]

Contents: 1982-09-26 **Śhrī Durgā Pūjā, House of Gregoire, Vienna, Austria**

All of you should take bandhan. It's better before Pūjā.

Today is the first day we are having this Pūjā in this country of Austria. This country is an historical country with different upheavals it has gone through to learn so many lessons in life. But human beings are such that they do not relate the calamities with their mistakes. That's how they go on repeating the same mistakes again and again.

The visit to Vienna was over-due and I came on a day when we had to celebrate the birthday of Macchindranath [a Sahaja Yogi baby]. It's very auspicious for all of you that he should be today complete his one year of life. I bless him with all the flowers, the choicest flowers, of beauty and bliss on him and his family, all his relations and his family. There are so many things which have been done for the first time.

I should say, for the first time I've come to Vienna, to Austria and first time I've come to the birthday of a child, on his first birthday.

And on an Ashtami, that is today, is the eighth day of the moon, of the moon which is increasing, shukla pakshi; that first time all the weapons of the Goddess are to be worshipped. This was a great idea because these weapons who work all the time, not only to kill the evil but to protect the good, were never worshipped before; and that today, if human beings realise their importance and significance, then lots of problems of atomic bombs and all these things that have been created could be solved by diverting them to the right direction, using them for the destructions of the evil forces and not the good; also for protecting human life, nourishing human life. The same weapons can be used in a wrong direction; but, rightly used, they can be dedicated for the use of God's work.

All that is created by human beings, which looks apparently an instrument of destruction, but if human beings use their wisdom they will find out that all these inventions that have come to them from the prompting of the Unconscious, are for the work of God. All scientific research, everything that has been done, all these instruments that you have produced, are for the use of God.

In a way we can say that human beings have worked to create methods as instruments, as social, economic, political institutions to advance the mechanism of God's work.

The Unconscious has worked through human beings. All these institutions, if they are put to the right side of their activity and not to the hellish activity, they all can join together to complete the work of the Divine. Like, in the East people believe that God has created this beautiful body of human beings and it is for human beings to create beautiful artistic clothes to enhance the beauty of what God has created, to glorify the beauty of what God has created, to respect the beauty that God has created. And that's what has happened in many spheres of life, of human activities and should have happened in all of them if they had used their wisdom.

The question of knowledge that I discussed before is very important to understand. The knowledge that was forbidden once upon a time, as Adam and Eve, has been a big problem for human beings to understand.

It was the case when God created human beings first time, apart from the celestial beings, who were perfect, that He wanted to see if these human beings could grow in their population and in their awareness, in their innocence, they would become Self-realised. But it was an experiment and the human beings failed God at that time, because they listened to baser promotions or baser prompting. That's how they failed and they lost their innocence. And loss of innocence is the sin which was first committed and that sin took a different turn for human beings. Now, that knowledge, what I've said, is not this real knowledge. That was the Avidyā, the artificial knowledge, the knowledge that “I am something” that “I am the doer", the ego. Till the animal stage there was no ego and then the ego started

growing. We can say that's the beginning of the original sin: that “I am something. I am doing something. It's I who can do it." All right? So God said, “Let's see. Let's see their little courage and let them decide." So the plans were changed; one had to think now that we should get incarnations on this earth to help these people, to guide them, to put them into balance, to put them into proper understanding of Dharma, so they keep to that balance. But every time this `I' refused to accept the balance.

And this `I' goes very far from reality. Today also, when we come to Sahaja Yoga, I see people, they don't grow very fast. Because of this `I' they have questions, they have doubts, they have problems.

Because of this original sin people cannot grow very fast.

That, “I am the one, I am free. Why that? Why this?" Who are you to ask questions? Who has made you? Have you made yourself? What did you do to become a human being? Why this kind of egoistical behaviour towards God? “Why God has made us? Why this thing?" Who are you to ask any question? But it is so, the questioning goes on and such people are very dangerous for Sahaja Yoga. If they have to come for Pūjā, I'm worried, not because anything will happen to Pūjā, but we may lose them completely. Such egoistical stupid people get lost. As a mother I have simple compassion and love for them and I feel sad that they could have been saved. But this questioning mind of theirs can drown them. This is the basic original sin that human beings have created.

Apart from that, we had problem that we have come from animal stage to this stage.

So there are animal brutal conditionings within you.

Then we have gone through other conditionings, which were created in the history by the same mister `I' who has started institutions, who started organizing religions. For example, take Christianity.

Christ came here to break your ego.

On the contrary, people built a big ego out of it. Now, there are some Sahaja Yogis who believe that Sahaja Yoga is a Christian Sahaja Yoga or a Hindu Sahaja Yoga. Still that lingers on, that lingers on, that it is a Christian Sahaja Yoga. For Christians it has to be Christian Sahaja Yoga; for Hindus it should be a Hindu Sahaja Yoga. For Muslims it is a Muslim Sahaja Yoga; it must relate to Islam, because they can't get out of their own conditioning, so it must relate to that, it must explain everything that is there.

They can't get out, you see? It could be also a Catholic Sahaja Yoga or a Protestant Sahaja Yoga. Could be even deeper than that.

Like that, you see, it goes on.

So, you pull Sahaja Yoga into your own categories, into your own small little cups. But it's just the other way round. Sahaja Yoga is the ocean, is a universal thing, it is a Mahā Yoga. It is not meant for Christians, Hindus, Muslims; it is meant for human beings as they were. Have you got animals who are Christians, Hindus or Muslims? This all comes because of the original sin only, that we are something, we are Christians, we are Hindus, we are Muslims. In Sahaja Yoga, one has to understand that all the rivers, whether it is the River Ganges or the River Yamuna or it is the River Thames or River Danube, any river, that all of them flow into the same ocean and

become the ocean. They say that when all the rivers flow in the River Ganges, they are all called as Surasari means `the River of the Gods'. No more people call them by the different names of the tributaries that are there. In the same way, Sahaja Yoga is the ocean. You cannot name it. Do not try to find its identity with other things.

If you start doing that, then your mind will start becoming that small little cup. And moreover, if you are coming from some organized religions, it's very important to understand that organized religions make your cup even stronger, it doesn't dissolve. If it is a disorganized religion, then it is a cup of earthenware, which can dissolve into this ocean.

But if it is a solid, nice porcelain, Meissen, there is no possibility. Then you are adhering to all that conditioning, all that solidness and then it's very difficult. All the time you have to bring in Christ or you have to bring in Mohammad or you have to bring in Zoroaster, or someone like that who should be there to guide you. Now your guidance is your Spirit, which is unlimited, so you don't have to bring any one of Them. They are all within you. They are part and parcel of you. But to stick on to one person is again a sign that you are not expanding.

You know that you are all. You have got Śhrī Kṛiṣhṇa within you, who is awakened, you have got Christ within you, you have got Gaṇeśha within you, you have got Brahmadeva within you and you have got Mohammad within you. And you have got all of Them: Moses, everyone, within you; so how can you be identified with one person? The reason is, you are still conditioned and you want to drag it into your own conditioning.

So try to bring it at a position where there is no conditioning. We can see our conditioning works so much with our style because, as human beings, we have a habit of forming a closed sect, whether it is ourselves, first we close ourselves as `I'. “I am XYZ." Then we can club together as, say, “We are, say, people who use fork and knives." There could be people who just use the fork and knives this way can be clubbed together, the others who use this way can be another way. See, it goes on like that, all kinds of stupidity that human beings have to club together. All right, use the way you like, makes no difference. You eat the same food, it digests the same way, it works the same. But as far as the outside is concerned, when it comes to human activity, they will use the fork and spoon in a different way, somebody will use their hands, fingers and somebody will, I don't know, may use daggers. I don't know how they can manage to go to what limit.

So, this is what it is. In doing something, in doing any activity, then only human beings make it a closed circuit, that “This is how we do it. This is how they do it” how it is, the method of another party or people.

This groupism is the worst of all and is against the laws of nature. You can be an individual, as far as your appearance is concerned, as far as your hair colour is concerned, or your eye colour is concerned; that's what God has created you that way. But all other things that you have created are dead. All other clubbing methods you have created are absolutely of no value. They are just mythical. There's nothing truth in it, nothing that should be worthy considering. It is just a myth! So one

has to understand that there is nothing like a Sahaja Yoga which is a Christian Sahaja Yoga, Sahaja Yoga which is a Protestant Sahaja Yoga or a Catholic Sahaja Yoga. I find this at a very subtle point, where people talk of collectivity, that they don't understand that we are not collective, because we have so many tags, you see, attached to us, like the conditionings of our own doings. It could be in Switzerland, it could be in Austria, it could be in Rome, or it could be in India, anywhere. These conditionings, we have to get rid of. We should know we are human beings, created by God and whatever is within us that is real, created by Him, is the only thing that we have to be; and all the rest of conditionings we should try to give up. Everything is complementary. From this place you have to learn something, from that place you have to learn something. Every place has something to learn and to understand. And there is nothing that can be retained by some people as something higher or lower. But of course, where this ego has developed more, this original sin has developed more, there is a possibility that such human beings must have created more conditioning. Naturally the conditioning is much more. Or where they have been not at all moving about religion, about God and have been sticking on, like, you can say, in Africa and all these places, could be that the conditioning could have been by the other forces, called as Adibhautik, means the ones which are created out of what God has created. Like, if they see the moon, they are afraid of the moon, if they see the trees, they are afraid of the trees.

Sort of a mythical ideas about the nature itself. See, so there are two styles, as you always know. One is where they create mythical ideas about the nature, the mythical side of nature, that is Adibhautik and Adidaivik are the mythical ideas about what you can produce, you are God, you are the devas and you want to create this. “I'm this, I'm that." So there are two types of conditionings which work out and in modern times it is such a confused thing that both these sides, I don't know where they act. For example, the other day I was coming near the cemetrey in Vienna and I was amazed that it was a cemetrey but it was catching on right Swādhiṣhṭhāna.

So I said, “All the bhoots must be acting now, because I can't understand how can a cemetrey have a right Swādhiṣhṭhāna?" This is how it can be explained, that all the bhoots are now active; or maybe they are again born, you see. They must have been dead hundreds of times, they must have created graves after graves and only there are empty graves and they are active now. Or maybe that the bhootas themselves are active, they are no more there, they have all disappeared from there. It could be that.

So we have to judge now on vibrations and not on our understanding or what we think or what we understand through this brain. By asking questions and by talking too much about it, you cannot understand Sahaja Yoga. For Sahaja Yoga you have to have that super state of mind, where you can receive vibrations, can feel vibrations and have to be absolutely compromised on them. If there is still the tag of that ego so much that you still question Sahaja Yoga and think no end of yourself, it is better that

such a person should not attend the Pūjās, not attend the Pūjās. It is kind to himself.

It is being nice to himself that such a person who has doubts should not attend a Pūjā, because Pūjā is only meant for people who have achieved, received that state of mind which is called as Nirvikalpa, where there is no vikalpa, where there is no doubt in your mind. If there are still doubts in your mind, your mind is still very powerful and it is going to put you down.

So either before Pūjā you tell your mind to keep quiet. Tell him not to talk now, `Better keep quiet, now I have to ascend and I have to receive the blessings of the Divine.

So just keep quiet and if you cannot keep quiet then I cannot ascend.' I have told you many a times it is like a donkey, mind is just like a donkey. If you go behind the donkey, it kicks you, it will tell you, that you are the bad man, you are the worst man; all the self-pity will come into you. If you go ahead with the donkey, then he'll put his ears to you, you can hold him like an ego, you see. You can go wherever you want, do what you like, “What's wrong?" It will not control you. If you sit on top of the donkey it will still play about with you, to see how you work out.

So if you allow the mind to go here and there, through your eyes or through your attention, or anywhere, or through your tongue or your senses, it will say, “All right." It will eat the grass on the sides, it won't move. It will move this side, eat some grass, that side.

Gregoire: At this stage, as You speak about it, should I quickly translate for the French who don't understand English?

Shri Mataji: Oh, you want to translate the whole thing? Gregoire: I can in two minutes.

Shri Mataji: I think later on, Gregoire, would be better, if you could translate, because the flow is better now, all right? So this donkey, the donkey wants to eat the grass. He knows that you don't mind him eating the grass.

All right, it goes round, eats grass, all sorts of dirt, filth, whatever it is. Whatever you allow he eats, goes on eating, all filthy things, all filthy thoughts, all dirty thoughts and every sort of thing, without questioning, you see? Only in Sahaja Yoga they come here and question, but not when they have to eat filth and dirt and all kinds of unholy things and sinful things, they never question. Then they'll say, “What's wrong?" But when it comes to Sahaja Yoga, they will question. Which is the holiest of holy, which is the greatest of greatest. Only these gates are open to you. That's how you get it; otherwise it is not, it's prohibited to all the people to achieve this.

The water that washes My feet is the ambrosia, is the tirtha, which was even prohibited to doctors in olden days. Vaidyas were not allowed and they had to fight for it. Only the Gods were allowed to drink it. Only the Gods were allowed to drink it.

Today you are placed at the position of Gods. But are you capable of that? Are you deserving that? Or you are still questioning, you have still problems? Then it is better you are prohibited. It's a rare thing that you should take

that ambrosia. It's in the Devī Purāna Bhagavatam, if you read, that they were prohibited to take it.

So this is what it is, that the mind goes like a donkey. But if the donkey knows the one who is the rider, knows his ways and he knows how to control the mind and he knows where it has to work, the same donkey, the same instruments, the same institutions, the same things you have got around you, will take you there with a faster speed, with a very comfortable thing.

So tell your mind today, that we have had enough of it, playing with the mind. Now we want to be there in the realm of God. Tell your mind, fully, tell your mind. It is important. This is the mind which has taken you to all kinds of things; it has given you all the filth and dirt and all that.

So just tell your mind.

May God bless you! So for today's theme, we should say that we have to achieve our innocence within ourselves and feel the innocence of the Virāta. The question of Gaṇeśha Virāta, we can say, or Virāta Gaṇeśha, where, in the Virāta, the innocence we have to feel, so that we become innocent, our sins are washed out, that we are cleansed by that innocence, so that this `I'-ness is lost from you, this original sin is washed away from us and we become that beautiful being who is the proud child of God and who is the prize of this creation.

May God bless you! Now you can translate, Gregoire. It's all right. You can translate. I know it is long, but sometimes I find that if the flow is not kept...

Gregoire: I'm sorry, Mother, I should not have interrupted.

Shri Mataji: No, it's all right, it's all right.

You can replay and in that background you will be able to, keep it low, so that you can spontaneously go on saying something. Will it be all right? To replay? That will give you a proper...

Gregoire: I was just thinking three minutes for the French and three minutes for the Italian, in a very condensed manner.

Shri Mataji: You can? Gregoire: I can, yes.

Shri Mataji: All right.

[Gregoire continues to translate.]

Shri Mataji: Many people ask Me, before also, that, “Mother, why we became like this? Why didn't God just made us aware of ourselves, without committing all these mistakes? And why we had to go through this all vicious circle?" At that time, I didn't want to say that you have committed the original sin, that you have disobeyed God. Otherwise things would have worked out in a different way, not have been so lengthy.

Because if you tell them that, then there is another thing that happens to them is that they become left-sided and they start feeling guilty about the original sin, you see.

So we have to jump from ego to original sin part of it. But that part if you avoid, only one can say, in the beginning, that evolution could not take place without this freedom being given to you, you see, because freedom was first tested. That you were given a freedom, you had a nice place to live in, you lived in the complete protection of God, in the garden of Eden, you can say, in the

beautiful... everything was wonderful. Nothing was missing there.

But, despite that, human beings, you see, when they had the freedom, just the freedom was going to be tested, immediately they took to these baser things, you see.

And that is the way God had to then change the whole plans, because the baser things of life were attractive, even with all the blessings that they had. All the animosity and the, we can say, all the animal feelings, we can say, were still attractive to human beings and that's what was most surprising. And when these things happened, naturally the freedom itself had to go through the test of improvement. And that test was all this whole creation of human beings that took place. But to tell them `all that it is only the original sin which has created a problem.' Then they feel then: `Oh, God, why did You create the original sin?' So it is better to tell them that it is inevitable, for your evolutionary process, that your freedom must be tested, because if you have to enter into the supreme freedom, you must first know whether you can bear it or not. And in seeing that...

So, it took so many years for human beings to grow into it, to understand that the man cannot bear anything. He cannot bear freedom, he cannot bear money, he cannot bear position, he cannot bear comfort, he cannot bear anything.

And that's what now we are seeing in Sahaja Yoga also: when they get comfort, they are just sitting down again. When they get any blessings of material wealth, it will happen which it was, again the same, that Garden of Eden is coming back to you and when it starts coming

back to you, again you go back to the same stage. It's not good. Now you must understand that you have to be supreme, so you must master all this. Nothing is important, nothing is important, only the Spirit is important. Then only you can get out of... This is also can act as a temptation for you, you see.

All the blessings that are coming to you are temptations.

So you should be prepared. Nothing is more important than the Spirit, you see. We are prepared for any kind of thing to achieve the Spirit. We are not bothered as to what blessings we get or anything but what we want is the freedom of Spirit which is not hankering after anything, hankering after material things, so that you will be like a lamp which is giving light, without getting involved into the lamp itself. Whether it is of gold or silver or anything, it can burn, the light, even if it is made of mud. That's what is to be achieved by Sahaja Yogis, to be understood because this is a very precarious stage where, I find, people are again drifting down.

So now we have to humble down ourselves, to say, `I have not known anything, Mother, so far, I have to know.' Because, this is the knowledge of the root, which you do not know. This is a new knowledge for you. What can you question about? You don't know anything. You have to know about the knowledge of the root.

So humble down yourself and then only, you will receive the blessings of this new growth. That is the growth that is inward, inside, the Antar Yoga. Unless and until you humble down, it won't work out. You have to humble down, because as soon as you start asking questions, it's your ego that is asking questions.

So humble down to grow into it and to go further with the knowledge of the roots.

It is surprising that in India only this knowledge has been really sought after and people have gone very deep down. That's why every one of them had to come to India. Even Christ came to India to know about how people are searching it out, to support them, to help them.

So it is important that the knowledge of the root has to be done in the area where it is more possible. It is easier to do where the roots are not disturbed; and that's what was the country, India, where people searched it out.

But when they started growing out again, they became stupid and foolish; and when we see them, we see them, they're outside. But we don't see what tremendous work the seers have put in India, tremendous.

I mean, you take one of them and it is sufficient to give you a full idea of Sahaja Yoga.

You take a simple person, a very simple person like, say, Sāi Nāth, who was, to look at, very simple, but what tremendous ocean of knowledge he had.

Who was not educated or anything. Nobody knows where He was born, what happened, from where He came and where He lived and how He came up to that age. No one knows about His background. Or you take Ādi Shañkarāchārya, or you can take Kabīra, or anyone. For example, you take Macchindranath.

If you read about Macchindranath, you won't know, you'll think it's some sort of a mysterious knowledge he's giving. It's a tremendous work they did! They went into

all the left and the right and everything they did, all kinds of experimentations. If you see the books they have written about the Navnaths, the Nine Nathas and about Macchindra's life. Macchindranath went into such depth and he found out so much about the places where women were rulers. I think it must be the Belgian place he must have been, where women were the rulers and husbands were just like cabbages; and this and that and all kinds of things He discovered and then what happened and how he tried to cure that.

It's the movement in another direction, you see, in the root direction, that how these roots have gone and given rise to such horrible trees here and there and that's how he worked out. And it's such a symbolic thing that to understand their work, you have to be really very deep and very penetrating for which the human mind so far is not able to see the amount of work they have done. It's not possible to see. Like, if you see Ādi Shañkarāchārya's descriptions or that even Mārkandeya's descriptions about your Mother, it's remarkable how little-little things He could see. From where, from what angles. And every little bit of Mother he could see, as a child would see, you see, absolutely close to the Mother.

That means the innocence was complete and perfected. Otherwise you can't see these points that they have seen, all the little things like the three folds of the Mother. How can anyone see, but child can see that three folds of the mothers are there, that she has three folds in her body. Only a child can see. It's tremendous, I tell you it's tremendous, that innocence, their penetration and

their courage. Need real courage to grow into that penetration.

So innocence is the thing which one has to achieve first of all, but it should not be like this through Christ or through Gaṇeśha, it should be you who should have it. Means you are, you are the innocence.

You don't have to say that, you don't have to come through someone. You are that, you just directly can have. That business is meant for people who are not realised, meant for people who are stupid, meant for people who can not directly attain. You all can directly attain it. That is your blessing, that's the greatest thing that you can directly achieve all that. But you have to get to that position of innocence by which you become so subtle, so sukshma, because innocence is the subtlest thing that you enter into all the areas to know the knowledge of the roots, knowledge of the Tree of Life. And it's not meant for the stupid egoistical nonsensical people. They become Rākshasas I tell you, they are Rākshasas.

So we are not going to go their way, we have to go the other way round.

So we have to humble down within ourselves and try to awaken your innocence, once that is the holy innocence, that pavitra, innocence within you. In Sanskrit language there's no word for innocence, you'll be surprised.

Because for them whatever is holy, auspicious, everything is in it. There's no word separate for innocence, because they can't think that there can be innocence existing in the air like that. It has to be inside

something, you see, it is always sort of a cup can only contain the water like that.

So they cannot think, they we cannot think of water hanging in the air like that, you see. It has to have some cup.

So they will say “auspicious time” “auspicious person" or “auspicious thing” “auspicious night” “auspicious day." Everything is contained, container, like a container. The container that can have innocence, you see.

So the auspiciousness. Again, auspicious. It's an adjective. There is nothing like saying that this is a solid innocence, the shubha. Shubha itself is an adjective, there's no noun for innocence. Innocent it can be, but innocence itself doesn't exist for them because it exists everywhere that is innocent. It's such a wider idea, it's a wider idea of the Virāt Gaṇeśha. When He is in the whole of Virāta, how can you put Him down as `innocence'? Is so much subtler, too subtle to be made into a noun. Is too subtle a thing and we have to become that subtle.

May God bless you! May God bless you all! [Now, the Pūjā protocol begins. Below are a few of Shri Mataji's comments made during the Pūjā protocol.] You can start washing My Feet. First, what we can do, that those who have not washed My Feet please raise your hands, so far.... He has washed?

Sahaja Yogi: Everybody has.

Shri Mataji: Everybody has. He has not washed? All right, come.

First like that. When they start Pūjā then you can remove it. Today I think first of all, those who want to do My Pūjā

have *[UNCLEAR* decided] to wash My feet first of all. And then you can wash My feet.

Who are the people who want to do the Pūjā? You. And who? Your wife. Let's first get Macchindranath for the Pūjā of Gaṇeśha. Who else? She has done Pūjā, this lady? She has done.

So we can get one from, she's from Switzerland, another from Rome, two persons. That's to help you out. All right. Let her come, from Switzerland. And we can have Guido from... Guido, can you sit on the ground? Will you be able to sit on the ground? You'll be able to sit? All right.

So we'll have two persons. Alright? Now you should help here. Is to get all these things out, now *[UNCLEAR]*.

Yes, come along. First what you do is to wash your feet. Then *[UNCLEAR* let] you wash My feet and go away and you can all go one by one. All right? You better take out your watch... What's your name? Sahaja Yoga: Giovanni.

Shri Mataji: Very good. May God bless you. Now see your vibrations. With your hands see. All right, good. May God bless you.

Give her some water.

That water could be in there, for washing. *[UNCLEAR]*. It could go in that one. Or you have something else, a jug or something? Or could we take it out as it is.

If you can *[UNCLEAR]*.

So you can take this out and throw it in there, you see. Ask them to throw it in the garden. Then anyone can go and throw it in the garden and wash it and bring it.

So you *[UNCLEAR]* wash it and bring it.

Macchindranath, you come here. You come here. You have to work. *[UNCLEAR]*. Now good. Now that's it. He's done his job. *[UNCLEAR]*. Come along, rub My feet. Ah good. It's alright. Now it's over, it's alright, done it. Take him away.

They enjoy, they enjoy that. Ah yes! Where is the Kuṇḍalinī now? All right, now let him go, now just take away. Now what you can do is to wash My feet with the water, or you take some more water, [because] Macchindranath has already spilt it. You can put it on the Sahasrāra of everyone. You put it on the Sahasrāra of everyone. Now you wash My feet. You rub your hands then mine, you rub it like that.

Your hands must be rubbed. Rub your left because... left-sided, rub your left more...

[Recitation of mantras begins.] [Recitation of the names of Śhrī Viṣhṇu.] These are the twenty-one names, these are the twenty-one Names of Śhrī Viṣhṇu which is the aspect of your evolution, of your Dharma. First the sustenance and then evolution. That's the Father within you. And so first because you are all seeking your evolution we invoke the twenty-one powers, twenty-one powers of this Father aspect of God. Twenty-one powers. These are the twenty-one names which represent the twenty-one powers of evolution within us. Suṣhumnā channel has got twenty-one powers. You can translate, in French it's better.

Viṣhṇu, Viṣhṇu, it's the Viṣhṇu power or, we can say, the Nārāyaṇa. Viṣhṇu, the Father.

This is to raise your right side because it's activity now going on. [Gāyatrī mantra was read after.] [Recitation of

mantras for Śhrī Durgā from Devī Māhātmyam.] Krita Yuga. This is the Krita Yuga. Krita means when where it will be effective, when where it is going to be effective. The work will be done. This is the Yuga, the times where it will be done. Krita Yuga. This is the special time which is in between Kali Yuga and Satya Yuga, is the Krita Yuga where things will be done, work will be done. Resurrection time where your hands will speak. This is the thing.

You see. Translate it. Krita Yuga. `Kri' means `to do'.

[To Macchindranath:] Come here, you sit down. You have to do the Pūjā. Come along, come here.

Come this side. You have to do the Pūjā. Alright? [Shri Mataji puts child down:] Alright. He gets excited with flowers, this child.

[Śhrī Gaṇeśha Atharva Sheersha.] [Twam bhūmī rapo... Shri Mataji stops Śhrī Gaṇeśha Atharva Sheersha to explain:] See, svatojayte, means the principle, you awaken the principle of the whole universe, the principle of the universe and Pratye means you give also the experience of that, so that he is the one who generates the principle and also he gives you the experience.

[Translation into Italian.] Pratye, pratye is the experience that proves, that proves your existence, you see. You give your own pratye, means you give your experience by which it proves that you exist.

Sahaja Yogi: [reads the translation of Śhrī Gaṇeśha Atharva Sheersha].

Shri Mataji: So the translation, somebody should read. Gregoire can read the Sanskrit.

So, when it starts, that Brahma Twam, what is it?

Sahaja Yogi: Twam Brahmā, Twam Viṣhṇus, Twam Rudras...

Shri Mataji: So He is called as Rudra, see? But not as Sadāśhiva, you see, because at Rudra state, because He's the Tattwa of everything, He's the Tattwa, He's the Principle. Rudra... [indicates Ekādaśha Rudra].

[Sahaja Yogis read then the Divine Essence to the Prayer to Śhrī Gaṇeśha.]

Shri Mataji: It should be `You are God in man,' it would be better. God in man... He is not man, by any chance, how can you call Him? [Shri Mataji asks for mangalsutra.] [To Macchindranath]: Let him put Mangalsutra. He's the one... Śhrī Gaṇeśha has the power to give Mangalasutra. Make Me wear this one. Come along. Thanks.

You have the greatest right [shows Mangalsutra]. He turned the other way round, it is used this way when there is the first year of the marriage, you see, that's right, that's how it is put.

Just married women. Married women have to do this. All right? All the married women and then the kanya [unmarried women] has to do something else. All of you, let us have two each otherwise it won't be all right. You can mix them up, no harm. Wait for all the married women. You come along.

So here we go. I didn't bring all My ornaments...

That's good. May God bless you all. Akhanda saubhagya. This is the blessing given to all the married women that let your saubhagya remain all your life without any

obstacles. No obstacles in your married life should be all the time there till you live.

May God bless you.

Now for the kumkum. You people can come and married girls can come, with the water...

[Shri Mataji is rubbing something in Her hands though we cannot see what as the video only shows upper, then She says.] Keep a little bit for everyone and take it round and they can put it on their hands. It's good for them.

Guido, you take it round. And give it in the hands of everyone, so that they rub little little, so that...

Gregoire, you read your names that you have made, where are your names? Gregoire [asks]: For Śhrī Shiva or Śhrī Mahākālī?

Shri Mataji: Yes... Śhrī Shiva... All this is for His enjoyment only, isn't it?

Sahaja Yogi: Om Twameva sākṣhāt Śhrī Nav Jerusalemeshwara,

Shri Mataji: Again!

Sahaja Yogi: Om Twameva sākṣhāt Śhrī Nav Jerusalemeshwara, He is the Lord of the New Jerusalem.

Om Twameva sākṣhāt Śhrī Ādi Nirmalātma, He is the Primordial Self of Shri Mataji.

Om Twameva sākṣhāt Śhrī Sahaja Yogi Priya, He is fond of Sahaja Yogis.

Shri Mataji: So this means that He is the Beloved of the Sahaja Yogis.

Sahaja Yogi: This is another name, there is another name, Mother, for this, Sahaja Yogi Vatsala,

Shri Mataji: Sahaja Yogi Vatsala.

Sahaja Yogi: Priya Bhakta, He is the favourite of the devotees.

Shri Mataji: Priya Bhakta; so Priya is first but if you put it last, you see, Bhakta Priya means He's fond of bhaktas, you see, Bhakta Priya. But supposing you put it that She is the Beloved, you see because the Priya, where you put it, you see, then it is My name, so I am the Beloved. You can switch it Premi, would be better, if you put it Premi then it would be all right.

You can put it, Priya will be, Gregoire, Sahaja Yogi Priya it's all right, but if you put it `Priya' then immediately it means just the other way round because you are addressing, you are making this thing according to Me, I become that deity, you see? Sanskrit is tremendous, little change here and there and makes such a thing because every, every consonant, every vowel has a meaning, can you imagine every consonant and every vowel has a meaning and has a mantra because it is a devanandra, it is understood only by the devas, devanand created by the devas, so all these have such a tremendous effect when you combine all these things, you see.

Sahaja Yogi: I'll read some names for You Shri Mataji?

Shri Mataji: All right.

[More names, all beginning with Nirmalā.]

Shri Mataji: Beautiful.

The same comb in that photograph has come up as light, have you seen that? Just like a flame, this comb. Have you seen that photograph? In your, yes, in your album.

Oil, Amla, Amla oil? [For hair. A Sahaja Yogi replies with another name].

[Shri Mataji asks for khus perfume.]

Shri Mataji: I saw some Khus, Gregoire, in your bathroom I saw some khus, is khus perfume. Khus.

I saw one, it has to be `Athar', you see from India because let see this one is also `Mogra'...

Here the kind of perfumes people use are very dangerous, especially this `Tabac' is nothing from tobacco, you see sort of people get addicted to it, because it is an addiction.

Yes, this is all right, this is all right. This is hina, is it written `hina' on that? Khus, same thing. Just the same. This is all right. Just the same.

You can apply to all the Sahaja Yogis, this perfume khus. It clears all your Viśhuddhi, right Viśhuddhi especially. Though if you have hina is the best because that clears out your right Viśhuddhi very much, but this is good for people who are speedy, heated up, for liver patients.

[Sahaja Yogi is saying a mantra.]

Shri Mataji: Let he do it when I hold the sword. I will hold the sword in this hand [Hindi].

Sahaja Yogi: [asks to begin the reading of Lalitā Sahasrānama.]

Shri Mataji: 108 Names. Have we got copies of 108 names?

Sahaja Yogi: No.

Shri Mataji: But you can translate it.

Sahaja Yogi: It's my wife who selected it, I am innocent. [Showing the sarīs to Shri Mataji.]

Shri Mataji: He selected and you put the blame on her. That's why the wives are there, to take all the blame.

[Shri Mataji explains to Sahaja Yoginis how should they fold the sarī and put it around Her:] You have to open it the other way round, like that, half way, open half, you see? That's how you should take it, yes, fold it that side. *[UNCLEAR]*. Now. You have to bring it round, that's the problem.

This is the way they had it at the time of Śhrī Kṛiṣhṇa [pallu in front].

Take off My hair from the back and pull out My hair.

Did not have the modern watch. But I don't believe in time! [Garland is offered.] Best combination is green, orange and yellow.

[Orange flower crown is offered.] Flowers are the best *[UNCLEAR* above/around] the head, they say.

Sign of beauty is that you cannot tolerate any imperfection anymore. This [crown] is very beautiful so you must make everything in relation to that, is to be done. It's done very well.

May God bless you.

Try to take complete photographs also.

[Weapons are given to Śhrī Durgā. Shri Mataji takes the sword, but not the club, saying:] This I don't need! [Then She asks for the Conch.] You can read...

[Ār.ti.] Stand, it has to go down.

May God bless you all, give yourself a bandhan Sahaja Yogis [say]: Jagadambe.

Shri Mataji: Say Lord's prayer.

Once more.

Once more.

***Contents: 1982-09-26*, Public Program, Day 1, Spirit Resides Inside You, Vienna, Austria**

I bow to all the seekers of Truth.

[Aside:] Can you hear her there, all the way? No. Stand here. Or you may use this. Better. I will just speak... All right.

I'm very grateful to the Sahaja Yogis of Vienna, who have invited Me to this place and this is My first visit to Vienna. This is the last state that I had to touch in Europe and so I must say, lot of work has been already done in Sahaja Yoga in other countries.

Somehow it happened that I had to come to Vienna after such a long time. I'm really very happy to see there are so many seekers in Vienna. And they are the seekers of truth. But first of all, we have to understand what is truth.

Whatever truth we have so far as human beings, has been known to us through our awareness, through our central nervous system.

For example, if you see the flowers, the flowers are white; we can see they are there, this is the truth for us. I touch this steel and I know it is cold, so I know it is steel and I know it is cold, is a fact with My fingers. It is not any imagination or a mental projection to think that this is the flute of Śhrī Kṛiṣhṇa.

Because I can see, I can hear and I can feel that I know this is the truth, because I know through My experiences of the central nervous system.

In My own awareness as a human being I know there is fragrance in the flowers. In My own understanding I know the aesthetics of this place. If you take a horse through a

dirty lane, he doesn't feel the dirt and filth and the smell of that place. But a human being, when he passes through those lanes, he knows that it's dirty, he can't bear it, because his awareness is such.

This is the difference of awareness in our evolution that we have achieved as human beings.

So, one has to know that whatever is going to happen to us has to happen in our awareness. That whatever we achieve or whatever we get in our central nervous system is absolutely logical and can be experimented with. That we can verify it.

It is not like a dark lane that you move on for years together, [repeats to the translator:] It's not like a dark lane, dark lane, dark, but is an enlightened path where you are aware of the higher capacities of human beings. What is the higher capacity of a saint? It is not that the kind of dress he wears or the way he moves about. But the higher capacity of a saint is that he is collectively conscious. Because he's connected with the Spirit, which is a collective being within us.

So that something has to happen in your awareness that you should become, again I say become, actualise the experience of collective consciousness. Like Mohammad Sahib has clearly said that, “In the resurrection time your hands will speak." That He said that you can feel in your hands, what hands are going to speak, there's not going to be any lips here, but you are going to feel something in your hands which is going to speak for you.

Now, when we come to truth, we have to know about its other alternatives and the fakeness of it. Every truth can

be faked. Every flower which is living can be made into plastic flowers.

And to make plastic flower is very easy, you can make them by thousands. But the real flowers are rare and are real because they're actual flowers living on a living force of life.

So the evolution is the living process of the living God. If that is the truth, then we must understand that whatever has happened to us so far in our evolution spontaneously, in the same way something has to happen to us, spontaneously. Like a seed, if it has to sprout, you have to put it in the Mother Earth because she has the quality, she has the authority to germinate it. Do we pay money to the seed to sprout? How can you pay for God? I can't understand the naiveness of the Western people not to understand that you cannot pay to someone who thinks that he can deliver the spiritual life to you.

These are all parasites and if you want to have parasites as your Guru, you go ahead with it. Nobody can control you in there, because you have the freedom. The other school of thought which is revolting against this kind of fakeness could be that they are all fake, that's all falsehood, there's no truth, that's also wrong.

So many people who have gone through the circus of Guru-shopping come to end that we should become communists now. That is also another extreme. That's a denial of the truth.

So it is in the center there is the truth, no doubt about it, but it is not a thing that you can purchase in the market. Specially in the West people are pampered, their ego is

pampered, if you can pay for something or you can purchase something, you can possess something. But I said, “You cannot pay for God." Anybody who takes money in the name of God and lives upon it is a parasite. And the one who is a parasite cannot be your Guru, he's much less than you; you won't live like a parasite yourself.

And the second point I told you, when it is a living process within you, then you must know that you cannot put in any effort. Is a simple thing of a flower becoming a fruit. Now you jump before it or stand on your head or take out your clothes or wear any clothes, will it become the fruit? How much does it take to jump or to change it or to have some sort of a nude body, how much does it take? Anybody can do that. Sahaja Yoga is a path for the true seekers and not for the people who run after fake things and do not want to face it. It's a category of people who are men of God, who are seeking the truth and who do not accept anything that is fake. And is a category of courageous people, the brave people, who can discard all that is a hang-up or a conditioning on them.

So, God has given you everything. While making you a human being, in His gentle care, He has created you a beautiful human being and all the roots are within you. Now, when you try to put in your effort to find God, then you are not spontaneous. It's all man-made. And in that effort you start moving to the left or to the right. Tomorrow I will tell you in details about the left side and the right side, but today I will just tell you that when you move to the left, you fall into the trap of your

subconscious or into the collective subconscious. In Sanskrit it is called as Ādi Bhautik. Means it is the collective subconscious within us. You get drawn into it and you start getting lost and completely mesmerized and brainwashed. If you are given an ego trip on the right hand side, you can fall a trip to that also. Human beings accept conditionings very fast.

There was an experiment with twenty people in England. They told ten people to behave like prisoners and ten people to behave like jailers. They were just told that, “It's a drama, you have to be there for a month and we want to see if there is any change in your behaviour." And they were told again and again, “It's an enactment, it's not reality, it's just enactment." But, when they went into the jail, the jailers became very arrogant and egoistical and the prisoners became absolutely slavish and going through all the hardships which these ego-oriented people poured on them.

Out of the twenty, only one revolted against this because he was beaten up by these so-called jailers who were acting, actually beaten up. And they came out of the jail and they were surprised at their own behaviour. The prisoners had become so weak that they were to be admitted in the hospital for all the tortures they had to go through. And the other ten became so ego-oriented, perhaps they must have joined some political party.

This is the situation of human beings. Now with all this, the masters of evil geniuses, they come as fake Gurus. And you are so naive, you play into it. They have in control lots of evil spirits with them. And they can

mesmerize you so well that you'll do all kinds of stupid things whatever they want you to do.

So they make their money, they have women, they drink, they enjoy the life more than any king or president or any rich man of the world. While the poor disciples are finished with their all wealth, money, health, they look sickly people.

One has to know that when you get your realisation, your own powers must manifest.

So that you become collectively conscious and that you are spirit, manifest the power of that collective consciousness.

Now, the trouble with people is that they are not yet know the knowledge of Kuṇḍalinī in the real sense.

I have read, I mean, I've seen and not read fully, but I've read some of the books written by Germans and by English and by all Western people and I was shocked. They had no knowledge about Kuṇḍalinī.

Leave alone the knowledge, they had no power from the Divine to awaken the Kuṇḍalinī. They had no character of a saint, which is required to raise the Kuṇḍalinī. They were ugly slaves of their greed and lust and they were using this knowledge just to make more money.

Now to understand the basic character of Kuṇḍalinī, one has to know that she is your mother. I'm told that German people call their motherland as fatherland, but Father is just a spectator of the play. Only His Shakti, His power, the Primordial Mother, the Holy Ghost does all the job to please this spectator who is sitting alone and watching it.

He resides in your heart as spirit. And the Kuṇḍalinī is the Holy Ghost reflected within you. The nature of the Kuṇḍalinī is that she's the pure, ultimate desire. This power is called as a residual, because it has not yet manifested itself. The ultimate desire of every human soul is to become the spirit. You may do this, you may do that, you may try everything, ultimately you will come to the conclusion that, “I have not become the Spirit." So when you become the spirit, then only the manifestation of this Kuṇḍalinī takes place, her ascent takes place and she is the one who creates the position of Yoga, the union with the Divine. This is the Yoga.

Also Yoga means kaushalam, means the deftness, the deftness, how to handle the Kuṇḍalinī of others, the whole knowledge of the Divine laws and the Divine manifestation, is also Yoga, is also called kaushalam.

There are all types of Yogas these days prevalent, as there are all types of Gurus. Now the physical Yoga is another kind of a thing which people think is the ultimate for spiritual life. This one comes from Patanjali, who lived thousands of years back in India where we had a very different system of life. Till the age of twenty-five years, the children lived in the forest with their realised Souls as their Gurus. There, celibacy was so preserved and innocence so respected that a person belonging to the same university could not marry each other.

And these universities were called as Gotras. Even today, you cannot marry in the same Gotra. The yama niyama, the vyayama, the one you do the exercise, was only done by people who were not married, according to the need of a particular center which was in trouble. We too use

these exercises wherever it is needed. But today's Yoga system which we see is nothing like, nothing but taking the whole box of medicine together. Without even finding out what is your prakruti, means what is your temperament, what is the need of your particular body, where is the Kuṇḍalinī, what you have to do to open a particular Chakra where you are caught up. I mean, nobody has that knowledge at all. It's such a mechanical process that has started that we all want to be of the same size just like a machine thing. This one is a very dangerous move because it creates problems for the Kuṇḍalinī to be awakened.

The people who indulge into too much physical attention and work out too much of physical activities and mental activities become futuristic people. They become very superficial and dry-tempered. With such people there's a possibility of getting people divorced and fighting and quarreling. The greatest Haṭha yogi which I have known in My life was Hitler. And he used Tāntrikas from Tibet to get him the power to control the ego of people. And he made them so violent that they could not see what they were doing.

There are many Gurus who do that way today also. They can make you so violent that you cannot see what you are doing. Or they can make you just cabbages, so that you lose all your being and become somebody else. But it is done so well that people who do not know about the knowledge of Kuṇḍalinī and spirit can be easily captured.

I call the West as the progress of the shoot, of the outside of the tree.

They know science, politics, economics very well. They can create atom bombs to kill themselves.

They can create even worse things than that. They haven't got the knowledge of the roots on which they are growing. And the knowledge of the root only can be known when you become the spirit, that's the beginning. This is a big disadvantage for the saints who are born on this beautiful side of the earth.

So many seekers are born in the West. As the desire of God must have been to give them a comfortable life, to get them unemployed, so they can be used for God's employment.

[Aside:] Loudly.

They got watches to see, to save the time, save the time, save the time. For what? To go into a pub? Or read some horrid books? Or waste your life with these horrible Gurus? So, in the West we have the saints, in the East we have the wisdom. In the West, people are seeking because they are seekers. They are a special category of people who are born in the West. But they lack the basic wisdom to understand what is the truth. What do we have to achieve? What do we have to become? This basic wisdom will not be told to you by the people who want to make money out of you.

They want to make a business out of it. And thus there's a big problem for the saints of today. As you belong to that area which I call the shoot of the tree, people can get enamoured by the superficial things.

You can be impressed by somebody who tries to pamper your ego. Or could be somebody who dominates you, like Hitler.

So it is a great responsibility of all the seekers in the West to take to wisdom, first of all.

Logically, you must reach right conclusions.

So when it comes to spirituality, you are prepared. Supposing I come to Vienna from somewhere lost conditions, how will I know this is Vienna, unless and until somebody says this is the way to go to Vienna? And how will I know it is Vienna because I should know what Vienna is like, first of all.

So, one comes to another conclusion that the description of the collective consciousness must be already there in the scriptures which are written long time back. It has to tally the findings of the psychology, like Jung psychology. It has to tally the many predictions; like thousands of years back, there was a book written called NĀdi Granth by Bhrigu, who was the pioneer of our astrology. We should find out from other sources like great poets, like William Blake, I know English, has clearly written about Sahaja Yoga.

So many such realised people, great people, like Dante, you can say, Homer, you can say, they have written about Sahaja Yoga in so many ways. If we take to all these things, then we know that this is Vienna. But we should not be brainwashed by people who just give us big stories or read some book and convert it into some other knowledge and say, “This is this, this is this” and just talk, talk, talk.

Now the time has come, to become. Now the time has come for this Divine Power to manifest itself.

We see a flower becoming a fruit, billions and billions of them in their seasons.

We see ourselves breathing, we see ourselves digesting, we don't pay for it, do we? Then who is doing all this? Which is that power that is doing? We don't even think about it. We just take it for granted.

Look at these eyes that are made, are the best camera that you can think of, so advanced. Look at this human body, so great. Look at this human brain, so expansive. Why all this was made and who has done it? Why we have become human beings from amoeba? What is so great about human beings that they are the epitome of all the creation? Is it just to sit down and feel guilty about all small nonsensical things? Or to weep over all mundane stuff? No, it is to become something that is the instrument, to know something that will give you the power. This All-pervading Power should become your power. Power is always connected with violence somehow, at this level of human existence. But I'm talking of the power of Divine Love that transforms this flower into fruit, that has transformed you from amoeba stage to this and that is going to transform you into your state of realisation. How an egg grows into a bird? And how at the right time the bird comes completely transformed from the ordinary egg? This power is the power of Holy Ghost.

People do not like when I talk about Christ. The other day in Belgium a lady asked Me why should I talk about Christ in an Indian way? I told her, “Was Christ born in Belgium? Or was He born a Westerner?" Many know that He lived in India and not in England. Why, have you taken His contract, that you think you know all about Christ? You'll be amazed that about Christ was written fourteen

thousand years back in India. Bible is not enough to contain such a great personality. By saying, “We love God, we love Christ and Christ is love” this is all imaginary behaviour. It's just a fantasy. Reality is that Christ exists within you and He is to be awakened within you. It is He who said, “You are to be born again." What are we doing about it? We call somebody and say, “All right, I'll baptize your child” artificially you take some water, pour on his head and say, “He's baptized." This is all artificial.

So, when people get disillusioned from this kind of artificial behaviour, they fall into another mess.

You don't have to go anywhere. Your spirit resides within you. You don't have to go to the forest in seeking. Your Kuṇḍalinī is within you. Your centers are there. The Kuṇḍalinī will rise and you will become Self-realised. As an egg becomes the transformed bird, you will become the spirit. You don't have to run for it. But first thing one must know that we have to know all about it, first of all. If you are still busy with your reading and busy with your ideas and your conditionings, it's not going to work out. It's act better with the people who are simple and not so complicated.

So I would request you to ask Me some questions about it. Today is just an introduction I have given you in short. You can ask Me questions, but the questions should be suggestive of your seeking, that would be better. If you belong to any cult or any opinion, you better think about it, what have you got out of it? Here I am, I am saying that you have to be your spirit and can happen through Sahaja Yoga. Sahaja means spontaneous happening and

Yoga is the union. And that is what I think we have to achieve and that's what you want.

But I've seen so many people who come just to argue with Me when they haven't got anything, as just like unpaid pleaders, because they cannot accept that there might have been some mistake. Human beings after all, have to make mistakes, there's no wrong in that. They should not feel guilty about it.

They should not feel guilty about anything whatsoever, because I'm talking about God, who is the ocean of love; who is the ocean of compassion; who is the ocean of forgiveness. But we do not even understand that ocean, how great it is. How beautifully it cleanses us, gives us a nice bath, beautifully traps us into nice warmth and takes us to the realm of His kingdom. This is happening en masse now. It is happening in other countries, specially in India thousands of people have got realisation in the villages.

And it should happen to all of you here. But if you are not seeking, I cannot force.

You cannot take the horse... You can take the horse up to the river, put his mouth in the river, but the horse has to drink the water and enjoy the satisfaction.

This is all your freedom. You have to achieve in your freedom. We cannot force it on anyone.

So there is no need for you to be any way aggressive. Because even if I want, I may not be able to give you realisation.

It has to work out some time for some people.

So I have to request you, be kind to yourself and fair to yourself. You are a seeker and you have to have your realisation.

And that is why I'm here. I have come to give you something. That should in no way challenge your ego. As I was telling this morning, I don't understand any laws, I do not understand any copyright, I do not understand insurance, I don't know how to drive. But, one thing I know is Kuṇḍalinī.

So you should not feel hurt if I know it, but you will know yourself. You will be able to do it yourself. There's one person in India who got realisation and so far he has given realisation to ten thousand people.

Tomorrow I will also tell you how Kuṇḍalinī awakening, as a by-product, manifests the curing of incurable diseases like cancer and other diseases. How it cures mental diseases and how it takes you out of the clutches of your bad habits. And how you become your own Guru.

So I would like to have some questions from you. If you have to ask any questions, please ask Me, without any fear.

Thank you very much. May God bless you.

Question: Mātājī, he asks the difference between Puruṣha in Indian language and the Holy Ghost?

Shri Mataji: Puruṣha is the God-Almighty. Holy Ghost is His power which manifests this universe and is the Kuṇḍalinī within you. That is the Holy Ghost. It's called as Ādi Shakti.

Question: Shakti means the dynamic aspect of the Holy Ghost?

Shri Mataji: Ādi Shakti means Primordial Power.

Question: He asks what kind of meditation do you request, you will give them?

Shri Mataji: That I'll tell you. A good question. That's what I'm going to tell you.

Question: Mother, he asks about the manifestations when the Kuṇḍalinī rises?

Shri Mataji: That I'm going to tell you later on, the whole thing, isn't it, it's a complete subject which I'll handle. I'm going to be here for three lectures now in Vienna.

So in one lecture I thought of giving you the introduction and later on I'm definitely going to tell you all things about it. Everything.

No secrets.

Question: He asks just about what do you feel physically when the Kuṇḍalinī rises?

Shri Mataji: That I will tell, just now, just now I will tell. That the first time you feel the All-pervading Power as Cool Breeze of the Holy Ghost. Coming out of your head also. And in your fingers, you start feeling it all around you.

Question: He asks what happens with the breathing and with the heart?

Shri Mataji: You become very normal.

Question: He tells it's not the Kuṇḍalinī then.

Shri Mataji: Why, what should happen, you should die? You have read something, now you see for yourself. Reading is not the way to get convinced, is a mediocricy. You may go on reading thousands of books; you cannot get your realisation from books.

Question: Mother, do You believe that we don't need a Guru in general?

Shri Mataji: Cool? Translator: Guru, Guru.

Shri Mataji: No, you do need a Guru, in the sense that an enlightened light can only enlighten another light. But where are the real Gurus? They are all hiding in the Himālayas or some other places and when I tell them, they say, “We are not interested in these people, they are not seekers." The only people who are interested in your purses are down here, in the market. With great persuasion I sent one Guru to America, who returned within three days. He said, “I had enough of these Americans, horrible people. They only understand dollars, they don't want to have reality. They have no time for that." Question: Mother, he asks if, to get realisation is only possible after certain meditation, or if you can prepare the people to get this experience?

Shri Mataji: If you are a human being, you can get realisation. You are already prepared because you are a human being. But if your human sustenance is little bit spoiled, then the Kuṇḍalinī, though it comes up, it may go down a little, come up a little and it will establish itself.

Question: Mother, he doesn't understand how he comes to the spontaneous experience? He thinks, he has to meditate, or something.

Shri Mataji: You cannot meditate, you go into meditation. That's very simple, I'll tell you what happens really. You have to put your hands towards Me like this. How you see the [tree] the leaves become green, in the same way you put your hands towards Me and as I am a realised Soul,

the information goes through these fingers. Through them the information goes to the Kuṇḍalinī and she rises. Spontaneously.

Like the Mother Earth, when you put the seed in the Mother Earth, the seed knows it's the Mother Earth and the primule, the germinating power, arises by itself. Then you are in meditation, you don't have to do meditation, you are in meditation.

When it is obstructed in some people, you can see with the naked eye the pulsation of the Kuṇḍalinī at the sacrum bone. You can hear the rising of the Kuṇḍalinī with the stethoscope, even you can see with your naked eyes if there is obstruction. When she crosses this Āgñyā Chakra, then you become thoughtlessly aware. You are aware, but there is no thought. There are many who talk about thoughtless awareness, but they never achieve it. Then you go beyond, when it comes onto the head here, you feel the throbbing on your head here. And then you start feeling the Cool Breeze coming out of your head.

We must know that what we can do like jumping, doing all other things, can be done by everyone.

But the living force does something that we cannot do. We cannot make the Cool Breeze come out of our head, can we? And you are not to be satisfied, give a false certificate about it; you have to certify yourself.

Then your fingers are enlightened. Because these are the seven centers, five, six and seven. About which I'll tell you tomorrow in details. They will all get enlightened. And from the fingers like this you can make out what Chakra of a person is catching. If the left side is catching that means there's an emotional problem; if the right

side is catching means there's physical or mental problem. Then you can also know the permutations and combinations which are decoded, you can verify them. Sitting down here you can find out about anyone, even the dead people, were they realised or not? If they were realised you will start getting a Cool Breeze. That's the rapport established with the Divine.

Any absolute question you ask and if it is the answer is `yes', then you get a Cool Breeze flowing. If somebody is a false person, you get burnings. If he's a evil genius, you might get even blisters, little bit. If somebody is going to die, then you get the numbness on the fingers. [Repeats to translator:] If somebody is going to die, then you get numbness on the fingers.

So once you know about the Chakras, then you have to know how to correct it. All this knowledge is your own and is to be given to you. It has to be all free, as I said.

It is, I would say, I'm like a cashier in the bank. And I am just giving you what you have got already within yourself. Also the knowledge to know the things that you have got. And how to use them. It cannot be believed that there could be someone like that. There have been many more like this, I am One of them.

May God bless you.

Question: which kind of religion do you have, Mother?

Shri Mataji: Is the religion of all the religions. Because it's the essence of everything. Actually all the religions started with life's force only. All the incarnations and prophets were true and all connected.

Absolute concord. And it's such a coordinated thing within ourselves and they are placed within ourselves.

But all these beautiful flowers which grew onto the Tree of Life were taken away by each one of them and they have said, “This is mine, this is mine." The flowers are dead and ugly.

Question: Mātājī, many of us have learned that it is extremely dangerous to wake up this Kuṇḍalinī, I'm sure You know that.

Shri Mataji: Yes, yes, they all say so. That's the only escape they can have, My child. That's the only escape they can have. That is a very difficult thing is, your Karmas, your this thing. See, if I have to handle that camera, I will say it is very difficult, beyond Me. But I should be honest to say that, “I don't know anything about it." I must be knowing something about it, that I say so positively. Three questions.

One by one, now, this gentleman has asked, this side.

Question: Is there any connection to these parapsychological powers?

Shri Mataji: No that is Ādi Bhautik. Parapsychology. The parapsychology has to deal with Ādi Bhautik, is the left side, the collective subconscious. You cannot explain anything, what you are doing, you see, you are flying in the air, what you are doing, you don't know. How you are curing, you don't know. You are blind. But in Sahaja Yoga, even a child knows. If he's a born-realised, he knows. He knows what Chakras people are catching. If they are very highly Self-realised Souls, they also know about Kuṇḍalinī.

There are many children these days born who are realised Souls. But those who are not realised are the parents and they don't understand their children. Great saints are taking their birth on this earth these days. Till you get realisation, you won't understand them. If we have to discuss colours with blind people, how can we? If our eyes are open, if the light is on, we can see everything. It is just a wee bit of jumping, the breakthrough, it's a little bit.

Question: Mother, he has something to do with geometry. Is there some power in geometric shapes?

Shri Mataji: Of course. Yes, yes, of course. Everything has power. But you don't know the essence of anything. Mathematics has powers, how do you get your formulae? Your formulae, say for a pi?

Sahaja Yogi: [... announces following lectures in Urania, Vienna...]

Shri Mataji: Now, we can say, what did you say, Gregoire?
Gregoire: I'm just suggesting that as most of the questions are going to be answered in your next lectures...

Shri Mataji: Is better to write down. You see, I'll answer them, is better, in My speech I will give you answers about it, but moreover it's the ocean of knowledge. When you will yourself have the light, you can see through, yourself. Now there are some books also written by Sahaja Yogis for Sahaja Yoga seekers. But we don't give them to people who are not yet established. Unless and until your realisation is established, these books are not given to you. Because they can be like any other book and you may just neglect your growth.

This gentleman.

Question:... about what Gopi Kṛiṣhṇa wrote about Kuṇḍalinī...?

Shri Mataji: Gopi Kṛiṣhṇa., You sell that book off., Who is Gopi Kṛiṣhṇa? Has he given realisation to anyone? What is his authority to write on Kuṇḍalinī? He writes like a villager who touches an electric point and says that electricity burns you. He is like, you go and see his private life, what sort of a life he leads. At least you must know that when he talks of Kuṇḍalinī, he talks as if he's a third party. Like a shock. You see, like, “I say I get a shock out of it” means I don't know anything about it. You want to have another shock? Why do you believe in him? What has he done? You see, just because of reading a book, are you satisfied, My child? You are a seeker, why should you be satisfied with a book? Why don't you see for yourself? Again I've said, just a book he has bought and he is wasting everybody's time for one book. He has done no good to anyone. What good he has done is only he has taken sixty-five lakhs of rupees from Indian government for a so-called research center in India which is not yet started. Because the then minister who was in charge was also a Kashmiri. I have to tell you one thing: Indians are very intelligent people and if they come to dishonesty, no-one can beat them. They are past masters, they are past masters.

I feel otherwise also about Indians that the attacks you did on them as white people, was a gross attack, outside. Now this is a subtle attack is coming on you, from them, which you must understand. [Loudly.] So, one must not just believe into something that is published, how much

does it take to create a book? Because you have read one book, you have no business to take the time of others. It's not being civil.

Thank you. What else, please? Question: Mother, he thinks it needs a certain maturity of character to raise the Kuṇḍalinī.

Shri Mataji: Of course, no doubt about it. But this maturity you get with the power of your spirit.

When your spirit shines through, your attention becomes enlightened. And then you grow into new areas.

We can give you the example of a bird which comes out of an egg. Actually, in Sanskrit language a bird is called as dvija and a Self-realised person is also called as dvija. It means `twice-born'. First the bird comes out of the egg, then it tries to fly a little bit and ultimately it receives the power and it gets confident and it spreads its wings around. But in the beginning, the mother bird looks after the baby bird. She hides behind and calls the little bird so the little bird takes the courage to fly. And that's how it works out.

Now we have got many people from Italy and from England and from Switzerland and from Australia, who have come to help Me here. They are realised Souls, they know how to swim.

So, next time I don't have to import people from outside, I hope in Vienna, because you yourself will grow into beautiful people, all-powerful and all-glorious. I am sure, I can see that. But be truthful. Be honest to yourself and kind to yourself. Because you are seekers and you do not know your past.

So get your crowning glory and enjoy the eternal bliss of heavens.

All right. Now I think we should go in for the experiment. It will not take much time.

So, one should go in for it. Without making any effort, you have to just put your hands like this. Take out your shoes, just for the Mother Earth to help us. Put your feet on the ground. Please, put your feet on the ground, straight. And just spread your hands, just like this. And close your eyes.

The gentleman who asked question, if he wants to go, he can go away, or if he has to sit here, you better put your hands like this. Because those who are adamant spoil the vibrations of others. They are just here to disturb. If they want to have shocks, let them have shocks.

All right, put your hands like that. Close your eyes, please. You have to keep your eyes shut. It is just the other way than the hypnotism. Now keep your hands straight, relaxed on your lap. And keep your eyes shut. Be comfortable. Don't put in any effort, please. Just keep your eyes shut, that's important.

Because when the Kuṇḍalinī rises above your Āgñyā, if the eyes are open, it will be hindered.

Now few instructions I'll give you how to raise your Kuṇḍalinī. But don't open your eyes. Put your left hand towards Me and right hand on your heart. The hand towards Me should be on your lap, the way it was before. On your lap, upward.

Now putting the hand on the spirit you ask a question in your heart, `Mother, am I the spirit?' Ask it thrice.

Sahaja Yogi [asks Shri Mataji from behind]: What are you feeling? What are you feeling?

Shri Mataji: Please put your right hand at the left side of your neck, right hand. From the front.

[Again say it.] Now, this is the problem of the West, all the time, I find people feel guilty for nothing at all.

And say in your heart, `Mother, I am not guilty.' Just say it eight times that, `Mother, I am not guilty.' Now put the hand down below, on the stomach and ask a question, `Mother, am I my own Guru?' Ask ten times. Put the right hand on your stomach and ask a question, `Mother am I my own Guru?' Left hand towards Me and on the stomach and ask the question, `Mother am I my own Guru?' Left hand should be kept on the lap, very relaxed. Ask the question ten times. [Say loudly] `Mother am I my own Guru?' Now just raise the hand again to your heart and say, `Mother I am the Spirit.' Say it twelve times.

[Twelve.] This is the number of sub-plexuses we have. `Mother, I am the Spirit.' Now...

[Aside:] behind there I think they are not...

Now put this hand again at the neck and say thrice, `Mother I am not guilty.' This is very important.

Now put the right hand across your forehead. Now you have to say, `Mother I forgive everyone,' with your heart, with honesty you say it twice. Now put the hand on top of your head, touching in the center with your fingers, where you had the soft bone and move it clockwise. Move your scalp clockwise, backwards and forwards. Now raise your hand and see if there's a Cool Breeze coming in.

Gregoire: [speaks to the audience to encourage going higher.] Shri Mataji [aside]: What's it? Higher. Higher. Better.

[Aside:] Warm.

It's hot.

So now you put your left hand on top of your head... and see if it is cool.

[Aside:] Better.

Again raise your right hand and put the left hand on the liver. Put your right hand on the head. Liver.

Left hand on the liver. That's wrong. Good.

[Instructing Sahaja Yogis on how to work on people:] Put them left to the right now if you can. Put them left to the right. If you can put them left to the right. And then raise it. Left to the right, left to the right. That's all right.

Now see if there's a Cool Breeze coming in.

[To Sahaja Yogis:] Āgñyā. Ah, better.

Now put both the hands towards Me. Now see if there's Cool Breeze coming in your hands. Just see it.

[To Sahaja Yogis:] You go round. All right? See if he can feel it.

[To Sahaja Yogini behind Her:] Lower. Press it hard. Press it hard.

[Aside:] Just feel his head. Ask him to be comfortable.

Please don't feel guilty. It will work out.

[Aside:] How is it? Started? Hah. Right. Don't think about it. It starts working. The Cool Breeze is coming out of many people.

Just see your, raise your hand and see for yourself. [Say that the Cool Breeze is coming out of your head in many people and see for yourself.] And don't think about it.

[To Sahaja Yogi:] Right.

[Shri Mataji sends Cool Breeze through the microphone.] Better now.

First you will feel it on top of your head and then you will feel it on your fingertips, as you'll be growing. But some of you might feel both the things.

[To Sahaja Yogis:] They're feeling it? Better? Better now? [To Sahaja Yogini behind Her:] *[UNCLEAR]*. Put it on the heart. Little higher. *[UNCLEAR]*. This side. Move it in the center of the heart. In the center, in the center of the heart, little bit this side. Press it hard. Put it at the Kuṇḍalinī. Put your hand at the Kuṇḍalinī. Press it hard. Little higher. Like that.

Place the other hand like that outside. Left Swādhiṣhṭhāna.

Some of you have to say again that, `Mother, I am not guilty.' Now you have to say, `Mother, please give me my realisation.' You have to ask because I cannot overcome your freedom. Ask seven times please.

Once you feel the Cool Breeze you'll tie up... all the Sahaja Yogis should tie them up.

Those who are feeling the Cool Breeze over their head please raise your hands, all of you. You can see for yourself.

Just move your hand up and down.

He's got it.

Raise your hand if you have got Cool Breeze in the hand. Raise them. Got it? Horrible. But it will go out. You'll have to give up that man.

But to keep it up and to establish it you have to listen to us. You have got it because of your seeking but it will go down in case you have problems or you are doing things which should not be done.

So please listen to us. Again tomorrow please come and you'll grow more and you will find the difference tomorrow again. You must take out everything that is in your neck in the night. Take out your watches. Place yourself free. And they will give you the photograph.

[Aside:] Have you got? Today? Sahaja Yogi [aside]: Tomorrow.

Shri Mataji: All right, tomorrow they'll give you the photograph. And tomorrow again we have to re-establish. Please don't think about it and discuss it. It is beyond thought. Maintain your peaceful behaviour.

May God bless you.

I will teach you now how to raise your Kuṇḍalinī. Get your eyes open. You put your hand in the center of Kuṇḍalinī, left hand. And now start rolling, your right hand. This is the hand of your action. This way.

Put it forward, downward, backwards and upwards. Now put up your hands as much as you can and give it a knot, to your Kuṇḍalinī. That's the first time. Now take another awakening. Move your hand again the same way slowly. Your hand will know itself. When it is cleared out it will move much faster, so do not force it. Now take it on top

of your head and give it one knot, slowly. Turn it, turn it quite a lot and give it a knot and take it down.

Now take another one. This is the last and the third one. Now take your hands as far as possible and give a big *[UNCLEAR* turn]. Now do tie three knots. One, two and three and bring down. Throw your hands like this. Throw away everything and now see. Now see the flow in the hands. Feeling the Cool Breeze? Good.

Some of you will definitely feel it.

You'll feel very peaceful, comfortable and you'll sleep very well. Wear plain clothes, loose clothes in the night [loose clothes and plain; plain; means not coloured] and when you come tomorrow, don't discuss it. I'm here for two days and I'm sure I'll establish it before going.

I have to make a humble request, to people who are wearing orange clothes and all that please take them out. If time comes tomorrow I'll tell you the secret of that also. Listen to Me for six-seven days when you are with Me. I'm your Mother and I've come here to tell you something that is the truth.

So just listen to Me, wear simple dresses, tomorrow come in a simple dress, not tight dresses, so that Kuṇḍalinī is easily...

Something normal, wear something normal, whatever is normal for Vienna people they should wear that dress. Nothing abnormal.

May God bless you.

Contents: 1982-09-27 **Interview on Blue Danube Radio, Vienna, Austria**

Interviewer: Mother, You are an Indian, now what kind of following do You have at home?

Shri Mataji: Now, there are lots of people in the villages of India. I work in the villages of India and not so much in the cities. And the villages are not yet touched by the superficialities and pretentious of life so much. People are very simple and it's easy to get them realised. I mean the Self-realisation, the Spirit.

They can feel it much faster than others can. It works much faster there and it has improved their lives to a very great extent. Because of this happening within your self you get cured. And there was a possibility of starting even a national health scheme on those grounds because you don't have to pay anything for it. And also you give up all your bad habits like drinking, smoking and there are other blessings that also follow with it.

So it's a very great thing because you don't have to pay anything for the countries which are developing now.

Interviewer: Of course there are many fringe religions in Britain. And indeed in this trouble times they are growing. There are more people who are turning to religious experiences of one kind or another. But what is so special about Yours? Is it another established church?

Shri Mataji: No, it is not. It is not an established one, it is neither an organized one. It is something very natural within us, spontaneous. It is the breakthrough of our evolutionary process, the last one. We have a meaning, we human beings are created for a meaning for certain purpose. We are not purposeless.

And the evolution has taken place, has brought us to this level of human awareness. And we have to breakthrough

to become the awareness of the spirit. It has been said by all the scriptures. I am not here to deny any scriptures or any religion that was established. But by this you understand that they all are belonging to one universal power, while we are fighting because of our ignorance. It is the very integrating thing. It transcends all the races, all the nations and all these barriers which human beings in their ignorance have created.

Interviewer: Now You are the spiritual head of this movement. Now how can You spread the word and the gospel of Your message when You have no organized church, it must be rather difficult?

Shri Mataji: Not at all. Because there are seekers, as you said that the people here are very complicated.

And sometimes this confusion gives them a greater seeking than that is in India. Because people in the developing countries are seeking now material value but the people where they are affluent, they are seeking the spiritual value.

So lots of seekers are born in these places and it's easy, very easy to talk to them and this can work out.

Interviewer: Shri Mataji, You are said to have these gifts. I mean how do You react to that. Don't You think it's little dangerous? There are a lot of people should just look to You as an individual. It's got a responsibility, isn't it?

Shri Mataji: It's like the sun, the sun does not feel anything is dangerous. And it just emits, what can I do about it? I mean, if you could do it I would be very happy. But it's not so. I have to do it, what to do.

Interviewer: Are You saying that there is something special with You? Or could any of us or could I develop this?

Shri Mataji: No, you can get it also.

Interviewer: Can we pass this on to another people?

Shri Mataji: Yes of course, you see one light can enlighten another person. Nowadays these boys are curing others and they are doing all these work. I can't go everywhere. It's done like that. You become that, you become collectively conscious yourself.

Interviewer: Well I am not sure what if, what it is going to make of this, at least there is something in it but I don't know!

Shri Mataji: Why not try, why not try.

***Contents: 1982-09-27*, Public Program, Day 2, About the Roots, Urania, Vienna, Austria**

Today again we are back together and I bow to you all who are the seekers of truth. Yesterday it was the introduction of Sahaja Yoga in which I explained to you what is the truth. A gentleman yesterday raised three, four questions regarding Kuṇḍalinī. As I told you that the knowledge of this Kuṇḍalinī is the knowledge of the roots on which we sustain ourselves. The whole instrument is called as tree of life in the bible. Actually Christ didn't have sufficient time to explain many things because he was crucified so prematurely. We only know four years of his life where he spoke to people, where his disciples, whatever they could gather, have written in their own opinions.

So now whatever I tell you about Kuṇḍalinī, I say is the knowledge of the roots we know about the shoot. In the West specially we know about the shoot and nothing about the roots.

This knowledge has been a secret knowledge for thousands of years till it came in the sixth century the Ādi Shañkarāchārya, who was a very great realised Soul, who came on this earth, he started talking about it. About 14,000 years back since then we can see there were poets who wrote about Kuṇḍalinī like Mārkandeya. But it is in the poetry form and was only available to very few people who were capable of coming to the situation of Self-realisation.

About 8,000 years back, Rāja Janaka, who was the father-in-law of Śhrī Rāma, was the first one, where we see clearly that one disciple called Nachiketa who went to him for Self-realisation. But Janaka told him, you can ask for anything else, but not for Self-realisation.

So we can understand very few people got realisation in those days. Viditama, who was a disciple of Buddha went to Japan and started Zen system of religion. Zen Zen means meditation. But it is written that there were only twenty-six Kaśhyapas up to the eighth century. Kaśhyapas are the realised Souls.

So in the sixth century Ādi Shañkarāchārya talked about it. In the bible there is a mention that I will appear before you like tongues of flames. Bible is a sacred book, but is also very secretive. The knowledge of bible is extremely symbolic and unless and until you are a realised Soul you cannot understand it.

So this Kuṇḍalinī resided here in the triangular bones of *[UNCLEAR]* called sacrum. This bone is called `sacrum' by the Greeks. And they know a lot about the Primordial Mother and her manifestations into three aspects. I asked them, when did you discover all these things, was that when Alexander came to India? So they said no, it was discovered much, much before that, when there was Indo-Aryan report between our country and India.

When you travel, you are sometimes amazed the way people knew about Kuṇḍalinī and so many things, how did they know in those days when this knowledge was so secretive. That shows from the unconscious.

The knowledge about Kuṇḍalinī has been coming into the human awareness. Moreover some people took to a kind of a meditation by which they were thrown outside their body. Which is a very dangerous thing to do, of course. By which they could go around the Chakras and see the colours of the Chakras and could describe them. But when you are inside them you don't see it. When you are outside the building, you can see it, but when you are inside, you don't see it.

So this outside movement is not the one which we are going to think of. Just now somebody has told you about the two sides that we have, the left and the right. And I told you yesterday that when we try to put in any effort to know God, we move either to the left or to the right. If you move to the left, you enter into collective subconscious area ultimately. In Sanskrit language it is called as Ādi Devī, Ādi Bautik.

All that is built within us since our birth is recorded it that area, is, lives in that area. Whatever has been dead since

our birth since our birth from the very beginning from the creation. Recently I saw a very good film by some BBC doctors, with the doctors who said that the cancer is caused by certain type of proteins which are called as protein 58, protein 52 and these proteins enter into our body, into our being from the areas which is built since our creation. I have in My work of Kuṇḍalinī for so many years now have discovered that most of the cancer patients, I haven't met one who is not, have the problem of the left side. Left-sided are the people who follow wrong paths of meditation, wrong Gurus, fake Gurus and subserve them, become their slaves. Because these Gurus use some dead spirits to mesmerize people.

As I told you yesterday, the right side also could be there, like Hitler was the most right-sided person who used another style of spirits, who could excite the violence in people. But it is not only the Gurus, it can be anything that has to do with the dead. Like we can say ESP, parapsychology, all those things which we do not know about, clairvoyance. These things are not known to the psychologists or to your doctors.

So, it so happens that they say that they cannot cure these diseases and they call them incurable diseases. All the mental problems plus incurable diseases like cancer, multiple sclerosis, all of them come with this left side movement in a human being. I will show you how the center is made.

Now this is the center and we have a right and left, right and left movement of the right and left sympathetic nervous system, this is the center. The center is formed by the left side and right side circle of the fingers as you

can see clearly. Now when a person asserts too much movement onto the right or to the left, this just gets dislocated. Now when it has dislocated, this center loses its power because its deities or its inspiring force dies out. And the cells which are looked after by this center become on their own, they become on their own. Because the relationship with the whole is lost.

So they start growing out of proportion to other cells.

So then we say that these cells are malignant, because they can just grow like a nose will grow too big to cover the whole face and no other cell can grow under their overpowering. This is one of the examples. Now the other diseases that can be called by left side behaviour are the diseases of the mind, but mind is a very vague thing in the Western language.

To make it clear, let us see that the left side, the movement of the left side that is emotional movement, emotional behaviour, too much emotional inclination causes the left side to move or activate too much. Any emittance that comes in from the left side reacts violently on the left sympathetic nervous system. Now, when that happens, the left side movement starts, the surprising thing is that when we work it through our heart, because emotions come from our heart, our brain quits. That shows that there is a balance attached in the whole system that if you work too much with the heart, then your brain fails. And the right-sided person is a person who works for the future, the one who plans for the future, the one who uses his body for the activating of the desire. When this activity takes place, physical or mental, then another thing is developed in our head as a

by-product, is the ego. Left side the superego is developed and the right side the ego is developed, but they cross over. By the time you are twelve years of age, these things get completely covered and the fontanelle bone area becomes a calcified bone. That's where you develop your ideas; you become Mister X, Mister Y. I would say that's how you become the egg.

Now those people who are right-sided, who are very futuristic can become in their old age, they get a loss of memory gradually because they live in the future not in the past. Such people are very ego-oriented and they try to dominate others, they are very dominating and they dominate others. These people when they work through their physical or for mental efforts, they think they are doing everything. This is a very big myth. A human being cannot transform one flower into fruit. Whatever work he does, is the dead work.

If a tree is broken or dead, you use it for your furniture or for a building, you think, oh I've done a great job. Even in the science you work with the dead. Living force has not been harnessed by human beings as yet. Even when they have a tube baby, they have to take a living ova and thing, otherwise they cannot make a tube baby. But these formations of different dead things like from say, from a wood to the chair, makes you slaves of the matter. Once you get used to the chair, you can't sit on the ground. You have to carry your chair on your head everywhere you go. That is how the matter all the time tries to suppress your spirit and to overcome it. Through science we have been able to do this quite a lot to achieve many things for our comfort. Also we have been

able to achieve a sort of a mastery we think over matter. But actually the matter has become the master. We can't live without petrol, we can't live without electricity, we can't live without ordinary things of life which we get out of this material advancement. And today what we find, after all this search we have been doing, we have created atom bombs and horrible things just to destroy us. This ego is so subtle that we cannot feel it. If it is superego you get pains, troubles and you feel sick and you go mad. But ego you don't feel, you trouble others you don't trouble yourself. Now this ego gives you problems also physical.

The first problem comes in when you start thinking too much for the future. The future doesn't exist actually, it's a myth. But when you start planning about the future, a big strain comes on the second center called as Swādhiṣhṭhāna within us. This center Swādhiṣhṭhāna manifest outside in the gross, the aortic plexus. The main job of this Swādhiṣhṭhāna Chakra is to convert the fats of the stomach for the use of the brain, which is working very hard. But is has many other things to be done: it works out the liver, it works out the spleen, the pancreas and kidneys and also the uterus.

So now when you start giving it job just to transform this fat for your brain, all the others are handicapped.

So such people develop liver troubles or they develop diseases like leukemia. Or they can develop a problem of the pancreas which can be like diabetes or can have blood pressures from the kidneys and also for the women they cannot produce children or they become dry and they don't want to produce children. The right-sided

people are like dry sticks, you have to be careful when you go near them, they are very hot-tempered and they think no end of themselves. But they have another check; when they think too much with their brain, their heart fails.

Because they are thinking too much about their physical body, the spirit gets angry and it disappears, which is in the heart.

All heart troubles come to people who are right-sided and never to the left-sided people. We have a doctor with us here who is a doctor as well as a psychologist and he told Me that they have got a machine to take a cardiograph of the patients, but not one patient in the lunatic asylum ever got heart problems.

Their hearts are as sound as ever till they die. This is the check of the nature.

So now we have seen so many diseases caused by the left side or the right side extreme movement of human beings. Now let us talk about the centers. When you move to the left or to the right on every center you assert a pressure.

Now we have a very important center, called as a navel center, called as Nābhī Chakra. This is the center which is responsible for our evolution. This evolution started from the animal stage when people just felt hungry. Means the amoeba felt hungry and then we can say the fishes felt that they should go across the river or across the ocean because they had to eat. Up to the human stage, all evolution took place through this center, with the desire to eat.

But at the human center, people developed a sense that there must be something beyond, is not only eating.

So they developed their ego, they thought it is the power they must seek, power over other men, other people, power as politicians, as kings and queens. Then some of them felt that it is too egoistical, so it's better to take to the left side. They took to drinking and all that to overcome their ego. In their drunken state, they thought of emotional romanticism and all artificial phantasies with which they live at the most for a year or so. And then it all finishes off and then they are divorced. Because it's not reality.

So, you cannot live with unreal things for a long time. And once you discover it is unreal, you just disappear again into another side, that is the right side.

So, human beings started moving, wobbling from left to right, right to left, left to right. Like when they don't have wars, they settle down not in peace but in arranging for another war. All human endeavours, whether it is politic, economic or anything, is unreal. It has nothing to do with reality. That's why it fails.

Actually we have never felt the reality so far. Because we are in transition, at human level we cannot feel the reality. Unless and until you have that breakthrough into your unconscious, you cannot feel the reality which is the All-pervading Power of God, which is the All-pervading Love of God. Unless and until your awareness becomes that subtle, you live with unreal things in every way.

Take your economics for example, it is said that the wants are satiable in particular, but in general wants but are not satiable. One want can be satisfied, for example,

you want to have a house, all right, that you'll get. But you get a house, then you want to have a car, you have the car, then you want to have a horse, then you have the horse, you want to have a helicopter. You go from one want to another want.

That is not satiable. Now when this is so, then why are we running after this madness? Why it is so that it cannot be because matter cannot give you joy. It cannot give you that ultimate thing for which you are made. It cannot give you the meaning of your life. There is something beyond which you have to seek; if you do not seek that and get it, you will never be satisfied. When your ego will be supported, you will feel happy and when superego will be there, you will be unhappy. You will be dwindling into happiness and unhappiness.

So you can never receive the actual joy of reality.

So, one is definite that matter cannot give us joy.

So all theories of materialism fall down like the houses of cards. Now take your politics. It is always superficial. You talk of money being distributed all the time. Who has the money? Actually none of us have the money.

Money is something that comes and goes and apart from that, when we die, we cannot take it with us.

What is there to fight for something that is going to be for a transitory period? Your capital is within; in within every person, there is a capital within yourself. You have not explored that capital. You have not seen the ocean of that wealth within you. This is what is capitalism, which is artificial. And the communism is another artificial thing, because you distribute what? The stones? What is the use of giving stones to people? And the stones that they

are going to leave here and die like stupid people insuring them.

But when you have your own capital, you cannot help it but distribute. When you have that property within us, you cannot enjoy anything else but the distribution the communism offered.

So in that realm, all your so-called theories and all your endeavours which are superficial become real. They all integrate.

I feel sometimes like when we have to have real flowers, we are happy with artificial flowers. And that is how our seeking becomes subtler when we reach a certain amount of affluence in life. We start understanding that matter is not the end and the subtler understanding comes into our mind that we have to find out something that is beyond this matter.

This is the atmosphere of today. That great seekers are born on this earth, especially in the West, but they are attacked. If there is a market for anything, you can get people to sell it. Those who are denied the matter do not understand that you cannot purchase spirit with matter, with money. There is a Guru who is permanently fourteen years, who bought 58 Rolls-Royces in London, thanks to the naiveness, I would say, of the seekers. Then he disappeared in U.S.A. and now has become a Yankee, married a women eight years older than him. Now this special Guru wanted his 59th Rolls-Royce, so he wrote to his disciples, who are about 30,000 in UK, that if they can pay him, they can give him a 59th Rolls-Royce, then only he will come to England.

Now poor English young people don't have so much money. They starved themselves, ate potatoes and collected that much money to give to this fourteen year old boy. And when the Sahaja Yogis went and talked to them and told them: why do you want to give him a Rolls-Royce? They said that it is only metal we are giving him, but he is going to give us the spirit. How can you exchange spirit for metal? They have lost their brains and if you tell them, they say that in religion and in spirituality you should not use your brains. Why God has given you brain to understand what to find, what are the right conclusions. But they are so mesmerized that you cannot talk to them. Ambassador of Spain told Me that the Queen of Spain is so disturbed there are 50,000 people who are following this horrible Guru even today. If people are seeking this kind of a thing, then they should know they will never reach God, but they will go directly to hell where their Guru is going to go first.

All the Gurus who have earned money in the name of God, every one of them is parasites, they will all go to hell and all their disciples will have to follow suit. They play upon your weaknesses and hit you hard.

There is another one about whom I must tell you because I told you the secrets about the gentleman who gives you orange robes to wear. This gentleman gives you orange robes to say that you are an ascetic. And he believes in mass sex activity. How can that be? Asceticism means Brahmachari, means a person who is celibate. How can such a man say that you wear these robes? Because he is trying to befool you. He talked out of his head I think, because he does only talk about the psyche, which is the

left side. He tried to reduce you to your sex point. How do you tolerate this to your honour, to your glory? You are a human being, the highest of highest. Are you just a sex point like any animal? Thank God at least he did not talk of God. But one must understand that sex does not play any part in evolution. Sex is important for a man or a woman in a sacred way, with the sanction of the collective. If we start behaving like animals, we'll become worse than animals, we'll become devils. We have to know that nature is against this behaviour.

Those people who indulge into this kind of indiscriminate behaviour get into terrible troubles as far as their sex is concerned. They develop horrible diseases, they also develop a nervous temperament, their children could be born with extremely violent temper, just like demons. But diseases like multiple sclerosis is caused by the affectation of this center in human beings. I have seen, I have cured the cases of multiple sclerosis and all these cases I have seen this center is affected. Purity is the essence of life. Without purity you cannot reach God. This we have to accept, whether we like it or not. Anyone who doesn't want to face reality will have to face what is the consequence of that. I know it is difficult when you have lived in this society, the kind of society you have around. But after realisation you become such a master of yourself, that you are not tempted by any such things which deteriorates your personality as a human being.

So one has to know that this center is the most important center is of innocence. Today the human race is standing on the precipice of destruction or of ascent. The negative forces are very active. They come to you in various

places, ways. It is surprising that how innocence is attacked by this negative forces in the West. It is astonishing to see how we are destroying the progeny by our stupid ideas about sex. Under these circumstances only demons can be born or great, great saints who can fight it, like Blake. This center is the basis, is the adhara, the support, is the support of your ascent. But My statement should not make you upset. I must tell you the grace of God, the all Divine Power is so merciful today that everything is forgiven. Such large arms God has to embrace everyone who seeks it, that's the time you are born, you are so fortunate. Before realisation, I don't say anything to you normally. Whatever you have done is the past, forget it. You just get your realisation. And everything will work out itself, automatically. As you just put the light in this room, you can see everything, you'll start seeing what is dirty, what is bad, what is good. And then you will know what to take, what not to take. You will be your judge. You will be able to cure yourself and cure others.

This is the only way it was to be worked out. Before realisation to talk of purifying and all that, is not easy. In these days of tension and problems, you cannot ask people to work for thousands of years, cleansing themselves. As you have now got a jet-age, you have a jet-age for spiritual life also. The human being has been created with such care, gentleness to this stage and it has to achieve its awareness. It has to know its meaning. It has to work out. Because you are the flowers of this universe that is created. If this creation has to have any meaning, you must find your meanings first. And that has

to happen through Self-realisation. Yesterday I explained to you how Kuṇḍalinī rises, gives you realisation and how you feel about it.

Tomorrow I will explain to you about other centers and how they work out and about the general picture of to give realisation to others. With one day gap, we have another program same here and where we'll be able to talk about it more. But it is not talking, it's the actualisation I'm telling you. When you believe in books, you just do not believe in actualisation. You just want to escape. Don't be escapists.

You should not be escapers, you see escapers. But, try to face it. Because reality is beautiful. Is glorious and great. This is all within you. Whatever you have, you get it. As I told you, I am like a banker who cashes your checks. That is how it works out. No obligation on you. This I have to do. And then you have to do it to others.

Once you get your realisation, you can give realisation to others, with full understanding as to what you are doing. I would like you to ask Me some questions today, but not like yesterday that one fellow read one book from somewhere and asking about that book. I do not want to waste time with such stupid questions, please.

So ask Me nice good questions; I'll definitely answer. Thank you very much.

Question: What is the difference between ego and superego?

Shri Mataji: All right. It's a very good question. Ego is the institution within us which develops as a result of our activity of mental and physical being. Then superego is the institution which develops as to what conditioning we

take. I'll give you an example. If there's a little child, whom the mother is nursing, is in complete joy. Then she wants to take him out, his ego comes up as a protest. And then when the mother says, “Don't do like that” it is the superego that comes in. That's how we have two institutions, one against another. We can say the one ego makes you, at its extreme, a sadist and the other as masochist. All right? Question: How can you remedy psychosomatic pains?

Shri Mataji: Oh very easy. That's very simple. Psychosomatic pains come to you through the possessions. The left-sided spirits. They are very sly. And some of them are all the time there and some of them enter for a short time, they're busy-bodies. Like your virus infection is also just the same style.

The virus comes from the vegetables which have gone out of the circulation of the evolution. If your left side is corrected, you'll never have those pains at all. There are many who have been cured of that. Not only, but you can also cure.

Question: How to cure the left side?

Shri Mataji: That's what I'll tell you. That's absolutely the question. I'll tell him now. All right.

Now who else is there? Is there any other question? Question: If you are on the left side, are the vibrations on the left hand not so strong?

Shri Mataji: That's the thing and sometimes they're not there also.

Some people get very red hands, also that could be. Yes, there is one question, one by one. This gentleman.

Question: If the material is not the true thing, why has God created us?

Shri Mataji: You see, God created ourselves, Adam and Eve to begin with. And gave us the freedom and told that don't go after these material things. Don't try to know the knowledge about the material things; this is the knowledge, it is forbidden. He said that very clearly, he said this very clearly. Now, it so happened that he wanted to test how they would use this freedom to obey God. Instead of that, they tried to follow a Satanic information and wanted to know the knowledge. This knowledge is called as Avidyā, non-knowledge in Sanskrit language. But, they chose their freedom like that, what can you do? That was the original sin. The idea of God was originally to make us innocent people, in our innocence to grow in population and to get realisation. But human beings don't know how to use their freedom at all, that shows.

So how could they have this supreme freedom? Where they will just know the All-pervading Power, the Brahma, that is the truth? So he allowed human beings to go ahead with their enterprises, you can say, with their enterprises, with the knowledge.

So they will learn their freedom has been misused.

By learning lessons in life, the way we have to produce now atom bombs, we can see that. Now, when these things happen, of course, God did not take out his attention. He sent many incarnations to tell us to at least remain in the center, not to go to extremes. But we never listen to them. We gave them poisons, we crucified them.

At least now, you cannot crucify Me. But at least, keep open to Me.

Question: How did you get your realisation and which capacity you could develop?

Shri Mataji: For this simple question, I have to ask you one thing: that you better not ask this questions, better know them. Through My human realisation, I have been able to understand human beings so well that I'm very clever and I'm not going to tell you much about Myself. Because Christ just said the truth that he was the son of God and they crucified him for that truth, which he was. And if somebody false person says I am God, but what, they run after him.

So I would say you better discover about Me what I am. Than to believe what I say. That's a better suggestion and a solution. I must be something, after all, if I can give en masse realisation to thousands of people, I must be something. Use your brains.

Question: What you mean exactly with realisation? If it is the same thing as Satori?

Shri Mataji: No, no no. Satori, yes. But Satori is not so clear-cut. Satori is all right. But Satori is not so clear-cut, you see, it's very clear-cut. What Christ has said to be born again is, but this realisation which I'll explain to you is absolutely clear-cut. I told about this yesterday, but if you want, I'll repeat it again. In Self-realisation, this Kuṇḍalinī which is the force, the residual force within you, starts pulsating, gets awakened and the Kuṇḍalinī rises; you can see with your naked eyes the rising of the Kuṇḍalinī and it comes up to the head, here at the fontanelle bone area, where it pierces through and you

start feeling the Cool Breeze coming out of your head. If your center of Viśhuddhi is correct, then you start also feeling the All-pervading Power as Cool Breeze of the Holy Ghost. Now, with these you find that your fingers, all these fingers at this portion, these are the seven centers of your body. One on the left hand side, one on the right hand side, which get awakened. And you start feeling them. Say for example you want to know what's wrong with you, you put yourself a bondage of your power around your aura and you just feel it.

Think about yourself. You will start getting either burning or Cool Breeze or numbness on these fingers.

When you start feeling that, then you have to see the decoding, what is the center catching. Now you should also know how to cure yourself. In the same way you can feel another person. When the Kuṇḍalinī rises above this center, Āgñyā Chakra, which is the center of Christ, you feel thoughtless awareness. That means you come in the area of present. And when it pierces through from here, you start feeling the Cool Breeze. Now any absolute question you want to ask about anyone, you can ask just like this. If you want to know whether there is God or not, you ask, `Is there God?', in whatever language. Because the language is always followed by the preceding subtle thought, which is known to the unconscious. And that's how you can ask a question like that, any fundamental question and when it is yes, lot of Cool Breeze starts flowing. If you want to know about any Guru, whether is true or not, you will find a... also impression of that, because if he's real, you will get Cool Breeze, if he's not real, you might get burning, you might even get blisters.

You feel absolutely relaxed and blissful. Alcoholism and all your habits just drop out overnight.

So many things happen that in one lecture I cannot tell you, but later on I'll be able to tell you everything.

Question: if someone has lost his both hands, how can he feel his spirit, the power of the Holy Ghost?

Shri Mataji: Now you don't worry about him, you worry about yourself. Even if your hands do not feel, your body does feel. We should pay attention to ourselves and not to others. We have done it too much now. If you get all right, you can make many people all right. Many people who don't feel it in the hands, can feel it in the body. All right? Question: if Self-realisation cannot be paid for, how does it come that you are here? Who is paying for that?

Shri Mataji: I have a husband who pays for it. And sometimes if you want, if you pay for travelling, you pay for My travelling, but not for your realisation. My husband always used to pay for Me, but then Sahaja Yogis felt very ashamed that I should pay for their realisation.

So I said, all right, once in a while you pay.

So what you pay for My travelling, to the air fare, not to Me. But these horrible Gurus take thousands of dollars. Do you know one of them who is teaching these flying techniques? He has ruined so many people. Their families are on the streets. They are getting epilepsy; they are falling on the street.

He gets 3500 pounds for one week and gives you nothing but water in which the potatoes are boiled. And last day he gives you the rind of the thing. And he says you have to be light to fly. But why not ask him to fly himself first?

Throw him from this tower of Pisa. He has got four thousand crores of rupees in India.

Gregoire: [concludes the Questions and Answers session to allow for the collective meditation.]

Shri Mataji: All right. Let's have it. Now, it's very simple, you have to put your hands towards Me. That's all. And, sit relaxed, put your hands on your lap. Put your both the feet on the ground. Be comfortable. There is nothing to be done, no mantras to be said, nothing. And now, close your eyes. Don't open your eyes because when the Kuṇḍalinī is passing through this Āgñyā Chakra, there is a dilatation of the pupils.

So I request you not to open your eyes. Of course, nothing will happen, but Kuṇḍalinī won't rise. You have to little bit cooperate with Me. At the very outset, I have to say that all the Western countries have one big problem: that they feel guilty for nothing at all. Now here we are facing God Almighty, who is the ocean of love. He's the ocean of compassion and ocean of forgiveness.

So you should not judge yourself. Also do not think that you are not yet ready, or you are not prepared. In no way you should have self-pity. Just say, Mother I am not guilty. You all are saying so much of this guilt. Better say again and again, Mother I am not guilty. Now put your right hand, because left hand is your desire so you put it relaxed towards Me on your lap and the right hand we have to use for action.

So I will tell you how to use the right hand now. Keep the left hand steady and now move the right hand to your heart. And just say, Mother I am the spirit. Say it twelve times. Put the left hand straight, please. Same way,

same way, but stretched fingers. Now put the right hand on the stomach, on the left side. Keep your eyes shut. And just say, Mother I am my own master, I am my own Guru. Say it ten times, please.

Ten times.

Contents: 1982-09-27 **Conversation with Sahaja Yogis, evening, House of Gregoire, Vienna, Austria**

Sahaja Yogi: Many people mother were very interested and asking and Mother, many people were asking and very interested and they wanted to know more about you and they are going to come tomorrow.

Another Sahaja Yogi: Vibrations were so cool.

Shri Mataji: Very cool vibrations. They had come today after *[UNCLEAR]*. I must say it was very great the translation, because I speak quite complicated.

Gregoire: Mother, Mother, now is the dessert. First of all… First of all the picture too much, too much too much. Now I translate.

Sahaja Yogini: Which page.

Gregoire: These days the Kuṇḍalinī power will also be in Vienna awakened. And then the title, the breath of God blows over the top of the head and in the palms of the hand. Now the text and then on your picture it is written “feminine Guru Mātājī." Then at the last a Guru who does not take any money. Shri Mataji Nirmalā Devī called Mātājī by Her disciples also simply Mother, is in Vienna. She is in London, married to a high diplomat. She does not need any material support and from 1970 onwards, she teaches the world wide Sahaja Yoga then we quote spontaneous link between the everyday being, living and

risen with our deeper Divine being, soul of being and this comes from the information which is distributed during the seminars and the conferences which She gives. According to Shri Mataji is actualised as in the human being the sleeping potential spiritual energy of Kuṇḍalinī the energy of the holy spirit will be awakened.

Shri Mataji: Is awakened.

Gregoire: Then the power serpent can be dangerous. Kuṇḍalinī the power serpent who from the center under the sexual organs through the spine up to the top of the head climb and Rudolf Steiner knew about it and who said that it can be dangerous. Shri Mataji spoke from this danger to the Kurier to this newspaper and to the numerous visitors to her first program in Vienna. Kuṇḍalinī is completely and totally is not dangerous at all. I am sorry Mother it is a little bit difficult to get that.

Shri Mataji: Alright.

Gregoire: No doubt, the uncomplicated Indian experience when Mother work with them, up to 99% from the Indians can experience of this Kuṇḍalinī. In the West, there are much less because there are some big obstacles, those are identified by these feminine Guru is a confusion and coward[li]ness which men maintain in them the obstacles to the Kuṇḍalinī is the confusion and coward[li]ness which men live and also with because of the inflated ego and because of the conditioning of the materialism and science because of the book knowledge which repress the spontaneity as also in the shameless marketing of what cannot be sold like breath and God for instance.

Shri Mataji: *[UNCLEAR]* should take this thing at all.

Gregoire: All those who in the name of God take money are parasites she says. But the worst are the `thief Gurus' as she call them who in the Western wisdom which thanks to the Western wisdom can provide spiritual evolution. Would you like to translate mother.

Shri Mataji: Forbidden.

Gregoire: Try to fool you with these kinds of calls.

Sahaja Yogini: and according to Shri Mataji lots of these Gurus are devils who use unclean spirits in order to suppress the people and to use them. Maharishi Maheśh, the founder of the *[UNCLEAR]* and the author of the recent book about *[UNCLEAR]*. Lots of people talk to him *[UNCLEAR]* sex for sex.

Shri Mataji: What? Gregoire: And not to forget the Rajneesh who is sex obsessed.

Shri Mataji: But this is not *[UNCLEAR]* to Me.

Gregoire: Sorry.

Sahaja Yogini: She says that we are against all these people.

Shri Mataji: She asked Me so I said yes I am against this *[UNCLEAR]*.

Sahaja Yogini: She says it is a fact this is *[UNCLEAR]* you mother. She says all of them make a pile of money. Shri Mataji says with complete disdained anger that all of these Gurus eat and drink and they have women and they are really rich. And that is the best proof that they are kind no realised Souls.

And the realised Souls are all in the Himālayas and in the jungles of India. When Shri Mataji tries to awaken the Kuṇḍalinī in her listeners and they all feel the breath of

God which is the Cool Breeze on their hands and on their heads. And then she explains how to meditate. And actual fact is that the people who have seen Shri Mataji say that they have such experience. And Shri Mataji promises further experiences like this and increase in depth of the experience through programs. And then it says today we will go *[UNCLEAR]*.

Shri Mataji: Good fellow.

Gregoire: Sorry no no, he has said that tomorrow and Thursday at time in Urania.

Shri Mataji: You see even if tomorrow radio *[UNCLEAR]* is not coming this is going to work out.

Gregoire: So I will take need a hall tomorrow.

Shri Mataji: Both are big places you know.

Gregoire: I can have a big hall in a single day immediately.

Shri Mataji: In the same place.

Gregoire: In the same place in a single day, I think I have to ask you mother because if it is correct for you because it is downstairs. It is like an amphitheater, so everybody is above you and you are like in the.

Shri Mataji: Doesn't matter.

Gregoire: Doesn't matter.

Sahaja Yogi: It is a cinema.

Gregoire: It is like a cinema, yes.

Sahaja Yogi: It is a cinema.

Gregoire: *[UNCLEAR]*.

Sahaja Yogini: And then she says and if anybody *[UNCLEAR]* all they need to do is to look at the picture of Shri Mataji with a flame in front of it and wait for the vibrations.

Sometimes it takes a long time, lots and lots of other problems have to be solved first before Kuṇḍalinī can arise. For example, if you used tobacco, alcohol, drugs and certain kinds of sex the situation of the Chakras will be destroyed.

Shri Mataji: Yes, will be destroyed *[UNCLEAR]*.

Sahaja Yogini: And when they are disturbed then the Kuṇḍalinī can't flow and then there is no chance of realisation. Shri Mataji says that the Kuṇḍalinī is a lot more than this. It is the holy power of the last judgment and everybody becomes their own judge.

Gregoire: He has picked up all the points.

Shri Mataji: Beautiful.

Sahaja Yogi: It is the best article mother we have had.

Shri Mataji: It is one of the best I must say. Thank you very much, I was overjoyed.

Gregoire: Everybody I am going to call tomorrow. And everybody is his own judge who can see himself in his Kuṇḍalinī as in mirror.

Shri Mataji: Because I fix him on the point of reflection. Remember that.

Sahaja Yogini: It says many people who could not take part in this have to be people who are humble and if their ego is too swollen then they won't be able to experience it. But in actual fact nobody is shut out and nobody is forbidden to have this awakening.

Gregoire: From the beginning.

Sahaja Yogini: Although certain numbers of people or certain groups of people for example politicians in the West have so much ego that they can't.

Gregoire: That their spiritual [il]lumination is almost impossible. Bolo bolo Jaganmātā Shri Mataji Nirmalā Devī ki jaya. Mother it's I bow to him mother.

Shri Mataji: Really very great.

Gregoire: I bow to him.

Shri Mataji: The ego of the politicians is so much.

A

Sahaja Yogi: Did he have his realisation mother?

Shri Mataji: Yes, he has.

A

Sahaja Yogi: That is why he talks *[UNCLEAR]*.

Shri Mataji: Beautiful, one of the best article I have had.

Gregoire: Absolutely mother and the picture.

Shri Mataji: The picture is very sweet, it is written something about Yoga over here.

Sahaja Yogini: Yes Mother, something that has nothing to do with egoism.

Gregoire: What?

Sahaja Yogi: Doesn't matter, doesn't matter.

Shri Mataji: What does he say? A

Sahaja Yogi: Not interesting Mother.

Shri Mataji: She is good at English. You are English or you are German?

Sahaja Yogini: I am English mother.

Shri Mataji: That is why you speak so good English. But how do you know German then?

Sahaja Yogini: I did German at the university mother. At the university I learn German and I lived in Germany a lot.

Shri Mataji: Sofiā is very sweet I tell you so direct you see.

Sahaja Yogi: Mother we were talking with her but may be it would be a good idea if you agree that next year she would come and join us in Germany for a while so that we could start together Sahaja Yoga.

What do you think about that mother?

Shri Mataji: A very good idea and also a little English you see naturally it is a difficult subject and sometimes I use My words little freely about English I am not such a master of English but whatever I know you see she finds it difficult to, sometimes sometimes, but she helped her a lot so I was wondering how is it that she know English so much.

Sahaja Yogi: She could help us a lot mother because of this.

Gregoire: Mother you know how many copies of this newspaper are 800,000.

Shri Mataji: Really? Gregoire: Yes, 800,000 of Shri Mataji Nirmalā Devī circulating in Austria. We will need a statue tomorrow.

Sahaja Yogi: There are about 1.8 million people living in Vienna. If there are seven million people in Austria it means that actually everyone has the chance of getting it.

Sahaja Yogini: Austria will be very vibrated now.

Shri Mataji: The whole of Austria or.

Gregoire: The whole of Austria. It is about the most read newspaper. The whole of Austria of course.

Sahaja Yogini: Mother your blessings are coming upon this country.

Sahaja Yogi: We don't know whether we are dreaming or whether we are awakened Mother.

Sahaja Yogi: Everyone who was so interested, this boy you know who was sitting in front of you know that he was asking very interesting questions, he talked to me I said what is all this about. I think I felt something but I am not sure. He said but I want to know some more about the left side. I said well the left side when you feel guilty, you will feel left side and you have problem with the left side. And when you don't forgive people, you will be left. He said oh I have two people I will not forgive. I said those two people are going to make you very ill because they are gone a sort of eat your brain these two people, you should forget them. And he said, well I don't think so. I said, well come tomorrow and she will learn you how to forgive.

Shri Mataji: You should have told him right hand up and left hand towards Me. He is better now.

Sahaja Yogi: He was better now. He was very interested about everything.

Shri Mataji: People are good here; I must say they are sound people comparatively. What Catherine was saying because I said about Freud they left Me is it? Gregoire: What is it mother?

Shri Mataji: I think the idea was that because I talked about Freud and that is why they left.

Gregoire: I mean 1 or two had to leave afterwards.

Shri Mataji: 1 or two only that is what I felt. People left earlier and 1 or two left after I talked about her sex.

Gregoire: I must say humbly that I suffered with the translation. Yes, the translation was really not good you see. In *[UNCLEAR]* it was really not good. She missed many points, many points. The problem is that verbally she is not really strong enough. If she translates she has to take the mike.

Sahaja Yogi: May be Mother I can try may be.

Shri Mataji: She is good at translation.

Gregoire: Anyway tomorrow may be she is no more there Sofiā, tomorrow evening Sofiā is no more there so we need somebody else.

Shri Mataji: She can do. Give her a mike.

Gregoire: I will have to check if whether we have a mike mother.

Sahaja Yogi: In the new hall if we take the bigger one they could...

Shri Mataji: You both should sit together and you can do it. You and she.

Sahaja Yogi: Mother I felt that when I am doing the introduction, I have spoken for about twenty minutes and it was without any difficulties as far as the language is considered.

Shri Mataji: So let him translate and she could stand there just to help him.

Sahaja Yogi: Yes Mother we could try mother tomorrow and if there are words that I cannot.

Shri Mataji: Who will give the introduction though?

Sahaja Yogini: Today.

Shri Mataji: No no tomorrow.

Gregoire: Introduction I, why not or anybody.

Shri Mataji: You can give introduction then they can translate.

Gregoire: Who else could do the introduction?

Shri Mataji: No, it is alright you can give introduction tomorrow and these two can translate finished.

Sahaja Yogi: Who? Gregoire: Arneau and Madhuri and Catherine also speaks in German.

Shri Mataji: Just write it down the hints.

Sahaja Yogini: She is a little bit Mother she is a bit sugar ego.

Shri Mataji: How did she receive this problem? Gregoire: Mother the cook told me, the Pūjāri and the cook told me that the dinner is ready.

Shri Mataji: Pūjāri, from doctor.

Gregoire: Mother I have to make a present to the Pūjāri Mother so I have already something in my *[UNCLEAR]* to bless it.

Shri Mataji: The Pūjāri to cook what vaidya. Khansama, you see he is the cook, in Sanskrit language.

Sahaja Yogi: It is something like bawarchi Shri Mataji. I tell you what it is. I have hooked it up over there.

Shri Mataji: Pākashala. Pākshala they say to it, simple way pākkarta.

Sahaja Yogini: Excuse me Shri Mataji; you were saying something about her.

Shri Mataji: She has left side problem and heart.

Shri Mataji: Why?

Sahaja Yogini: She has problem with her mother and her mother had problems also and as far as I understood that her mother was also doing some kind of parapsychology things and spiritism and no, no sorry.

Shri Mataji: What is her problem?

Sahaja Yogini: Her mother is not enough detached too attached to her, is too possessive. Her mother is fully possessive.

Shri Mataji: Father, she has no father.

Sahaja Yogini: Oh yes, her father is living.

Shri Mataji: What does he do?

Sahaja Yogini: He is employee, he is working.

Shri Mataji: And her mother?

Sahaja Yogini: She does not work, she is at home.

Shri Mataji: *[UNCLEAR]*.

Sahaja Yogini: She has one sister.

Shri Mataji: Is married?

Sahaja Yogini: No Mother.

Shri Mataji: But what is wrong? Is her mother is always like that? In which way, you don't like her attachments?

Sahaja Yogini: She says because it is a very egoistical attachment.

Shri Mataji: What sort?

Sahaja Yogini: She says it is not pure love or pure affection. But it is a kind of interested, may be for herself for not being alone. She cannot describe it.

Shri Mataji: Does she put her to ambitions?

Sahaja Yogini: No her mother is not ambitious for her.

Shri Mataji: Does she expect anything?

Sahaja Yogini: No.

Shri Mataji: What does she do for her? She cooks for you?

Sahaja Yogini: Yes.

Shri Mataji: Does she give her money?

Sahaja Yogini: Yes.

Shri Mataji: Then she loves you. Does she say that you shouldn't go here and you shouldn't go there?

Sahaja Yogini: No.

Shri Mataji: But is it for bad or good?

Sahaja Yogini: Not for good reasons.

Shri Mataji: But there is nothing serious about that.

Gregoire: I thought you would listen to the Pūjā hymn Mother, is it OK?

Shri Mataji: It is very good.

Gregoire: That we found such nice names for you Mother.

Shri Mataji: It is good. Would you like to ask the Pūjāri if he, ask him, the Pūjāri. This is what for the Pūjāri.

Sahaja Yogi: It is very beautiful.

Shri Mataji: So beautiful. This is in Vienna you got Gregoire? This is not, it is beautiful. Bahut sundar [very beautiful].

Sahaja Yogi: I got it in Rome Mother.

Shri Mataji: Where?

Sahaja Yogi: Rome.

Shri Mataji: It is very beautiful, Rome, I went you see, kitna sundar banaya hey [They have made it very beautifully]. Have you seen, how beautiful it is?

Sahaja Yogi: Yes I have seen. Very beautiful Shri Mataji.

Shri Mataji [in Hindi]: For all of us is very good. You see whatever you give Me like this is going to use for Me because you put it in front of My photograph.

Gregoire: You see Mother, I flowe him this because it is thank to him that my work is vibrated now.

Sahaja Yogi: No, it was not thank to me.

Shri Mataji: Very good ideas. Must say, two ideas he gave very good, one is about the Pūjān of the thought these things and the second idea was very good about is Nirmalā.

Sahaja Yogi: For about one year now Shri Mataji I have the desire to see you worship with all your weapons.

Shri Mataji: So your desire is fulfilled and Gregoire desire is fulfilled also. What is this? This is a bomb.

Gregoire: No, this is specific mother, it is to grain and it comes from Nepal, to bring the grain.

Shri Mataji: Grain. I think it is not that it is for keeping the, what do you call tarkas, which keeps the arrows.

A

Sahaja Yogi: That is what I thought when I first saw it.

Shri Mataji: It is for arrows only. It is not for grain, this is for arrows, you see, to keep it at the back.

You see, the arrows to take out, that is what it is. It cannot be for grinding. How can we have a thing like this for grinding, little thing? It is only tarkas, we call it tarkas.

Sahaja Yogini: It is for the great bowmen.

Shri Mataji: Exactly. What you say to that in English?

Sahaja Yogi: Quiver and to the string.

Sahaja Yogi: Bow string.

Shri Mataji: In Sanskrit it is pratyancha. Because you see when we pull it, it makes a sound pratyancha.

Sahaja Yogini: Beautiful.

Shri Mataji [in Hindi]: It is very beautiful.

Gregoire: You like it Mother.

Shri Mataji: Very much, very Divine, it is very beautiful. [In Hindi:] It is very beautiful. [In English:] We call it as dīpawali, dīpa is the light, awali is the line, line of dīpas. Actually in India, there is no system of Mombatti [Candle] never we had this, surprisingly. They always used with ghee or something oil but never this Mombatti we never had, never can you imagine.

Sahaja Yogi: For my Pūjā Shri Mataji I use the mixture of olive oil, ghee and camphor.

Shri Mataji: That is very good for the eyes.

Sahaja Yogi: It is much cheaper than candles to burn.

Shri Mataji: Ghee is regarded as the best. Most auspicious is ghee. But *[UNCLEAR]*.

Sahaja Yogi: I don't know it doesn't produce. I notice that with this it doesn't burn the impurities as much as the properly. The vibrations are not so strong.

Shri Mataji: We never used and apart from that people used, it is a kind of a fact. Also they use in some Arabic countries and all that. *[UNCLEAR]* all the light.

Sahaja Yogi: In Europe before they found oil, they used to use *[UNCLEAR]* candles Shri Mataji.

Shri Mataji: Are you alright, he has void, I don't know why he has void. Left Āgñyā, void, you went to Guru or something. Never.

Sahaja Yogini: He made Haṭha Yoga and Kuṇḍalinī Yoga.

Shri Mataji: That's why. From where, who taught you here? [In Hindi:] is the food ready. [In English:] So Mr. Cook, is the food ready? Sahaja Yogi [in Hindi]: Yes, Shri Mataji, the food is ready.

Shri Mataji [in English]: So the food is ready. Now serve the food alright, then we will come.

Sahaja Yogi: He is my assistant Shri Mataji.

Shri Mataji: He is your assistant. If the cook is your assistant then what is going to happen to the people who are going to eat the food. [In Hindi:] Rustom did you put ghee in the rice? Sahaja Yogi [in Hindi]: I added enough ghee and also butter, how to say it, [in German:] I do not know anymore. [In Hindi:] There was no cardamom, cinnamon; it was not there in the house. Then I did with garam masala.

Sahaja Yogini [in English]: He used to read many books, lots and lots of books.

Shri Mataji: Void is very bad. Just go on saying, Mother I am my own Guru. Better, much better.

Now say another thing: Mother make me my own Guru. Hmm, better. Now see your vibrations. Is much better, now see your vibrations. Good, excellent. Be nice to your mother, there is something wrong with her, you see, she will be alright. She has to trust you, alright.

Sahaja Yogini: Thank you.

Shri Mataji: Come along, let her rub a little bit, poor thing. She has been translating and doing everything for Me. But her English is so good; I was amazed I said how can Germans speak such good English. I was wondering. Today, I met another Englishmen, suddenly; he spoke

very good English you see. First I asked him and said are you German or a Christian. No he said I am English. I said, oh that is why you are good, come along I have come from the same country. You know really if you know one language you feel at home suddenly. Because you don't understand any other language, you will get lost.

We went to Paris I think or on our way back. You see I was listening to all kinds of things you see this language that language, so many. Then I went to the airport, to the Paris airport, the British airways air hostess, you see she started speaking English I was *[UNCLEAR]*. She was so kind. It happens, same in Sahaja Yoga, is the language of love, where you fight the language of *[UNCLEAR]*. No you are the one the way you make *[UNCLEAR]*.

Sahaja Yogini: Yes, Mother.

Gregoire: What did they Mother, did radio interview.

Shri Mataji: Everyday, I had been waiting, today it was late. You see we didn't want to have it because of parapsychology.

Gregoire: But when I asked, is he a seeker, you see first we took the vibrations of, that's a good lesson, first we took his vibrations, we were with the Italians.

Shri Mataji: Did you have My food? Then...

Gregoire: Then they said, it is hot and it burns and so on.

Shri Mataji: You took every one of you, see bandhan.

Gregoire: Yes, no, then I said OK forget it. I ask if he is a seeker. And then cool wind.

Shri Mataji: I said about parapsychology didn't I. beautiful; he said I will make a good story for you.

Gregoire: People here seem to be.

Shri Mataji: He started calling Me mother, that's the biggest thing.

Sahaja Yogini: Really.

Shri Mataji: Yes, he did say twice, thrice, mother to Me.

Sahaja Yogi: It is so beautiful.

Gregoire: And for those who don't know it yet, mother, radio interview, the men who come to interview mother, are in front of Mother and does like this.

Shri Mataji: Yes, he did like that. I was amazed, you know. He has been to India, he speaks Hindi and writes Hindi and he said that he is not good in speaking but he can write and read.

Sahaja Yogi: Mother the people from Swiss radio should take course here in Vienna.

Shri Mataji: What courses?

Sahaja Yogi: I mean to courses to how to behave themselves. They should see how they behave themselves here, these people from the radio.

Shri Mataji: Gradually everybody will be alright, I am sure. Everything is going to be alright.

Sahaja Yogi: But it is so beautiful when you see what the people are *[UNCLEAR]*.

Shri Mataji: To begin with you see, the second question he asked was about Maheśh yogi, because he had been cheated by Maheśh yogi. He said, “I give a lot of money for a silly mantra." He said, “For a silly mantra, I paid him a lot of money." “Yes I was one of them” he said. You see, how cheated they must be feeling, isn't it. He was quite angry. He asked Me, “If he is a fake don't you

think." I said, “Yes, he is fake no doubt about it." And he was angry with these Satano-logy also I think.

Gregoire: Mother can I get my car back tomorrow morning.

Shri Mataji: *[UNCLEAR]* about that.

Sahaja Yogi: you are a diplomat.

Gregoire: No, I will have absolutely no problem, just pay, they cannot.

Sahaja Yogini: Just pay the money.

Shri Mataji: Really. They cannot stop but they will charge I mean they will *[UNCLEAR]*. I hope they don't *[UNCLEAR]*.

Gregoire: I am absolutely entitled to leave my car where I want to. I don't have yet the plates of Vienna so you see I have the Italian plates.

Sahaja Yogi: But you can change.

Gregoire: I didn't want to have the Viennese plate too early. Because we were putting the posters of Sahaja Yoga OK and then Mercedes, Catherine jumping putting poster, going back into the car, people were looking and looking at the plate number.

Shri Mataji: So you removed the plate numbers.

Gregoire: I have Italian plate numbers still; I still have Italian plate numbers.

Sahaja Yogi: So probably someone call and they say there is an Italian putting what kind of.

Sahaja Yogi: Again Italians, yes.

Sahaja Yogini: There is no `I' of Italy, so people must not know of which country.

Shri Mataji: But there is no D written on that, diplomatic.

Gregoire: CD yes, but they don't know from which country.

Shri Mataji: So now we are not alone here alright.

Sahaja Yogini: Yes Mother.

Sahaja Yogis: Chai.

Shri Mataji: Chai.

Sahaja Yogi: Spoon, Shri Mataji.

Sahaja Yogi: Smells very good.

Shri Mataji [in Hindi]: Did you make the big one.

Sahaja Yogi: No, the small one.

Shri Mataji: Small.

Sahaja Yogi: It has become very smooth.

Shri Mataji: It will become smooth, it was not put that long. You should keep it.

Gregoire [in English]: Is it OK a present, would you like to have a candle like the one I gave you,

Shri Mataji: What? Gregoire: Would you like it, this kind of.

Shri Mataji: Yes, this, I like it but I don't want it because you keep it. Everything you want to give away.

Sahaja Yogini: As long as we have so much we can give away.

Sahaja Yogi: Would you like to have lemon.

Shri Mataji: Lemon, no not for Me. yes, start, you all have it. Good, well done.

Gregoire: Those who can, yes, those who can't.

Shri Mataji: This kind of rice if you eat Gregoire, there are never problems with rice, because we take out all the starch out of the rice. There is no problem, if there is too

much of starch with the rice that you have brought, because you wash it out. They enjoyed My jokes also very much. There was this fellow sitting with a tape recorder you see, then he stopped his tape recorder and was just enjoying.

[UNCLEAR]. Most of them did feel, no doubt.

Gregoire: I think the attitude was very excellent.

Shri Mataji: The attitude was excellent.

Gregoire: I mean they didn't leave quickly. You know, they all went in round you know.

Shri Mataji: They waited. One lady *[UNCLEAR]* she took out her necklace. Rajneesh people didn't come.

Sahaja Yogis: No.

Sahaja Yogi: The once who came yesterday mother I saw them arriving in a car from outside Vienna.

It was from about a distance at least 50 kms *[UNCLEAR]*.

Shri Mataji: You saw them arriving.

Sahaja Yogi: Rajneesh people I saw them arriving and the car plates were from quite far away from Vienna. They must have come for one of the council of Rajneesh.

Shri Mataji: Oh I see.

Sahaja Yogi: Because it was from an area which was at least 50 kms away from Vienna mother.

Shri Mataji: Oh I see. They have come from where?

Sahaja Yogi: They must have come from *[UNCLEAR]*, because I saw them arriving from a distant place from Vienna.

Shri Mataji: They all went away.

Sahaja Yogi: Yes, they went just when you started realisation ceremony.

Shri Mataji: Is it.

Sahaja Yogi: They walked out, yes. But there was a group of three who came into with fancy dresses, with shaved head; there was one with shaved head completely shaved. A woman and another one who had a beard and they were in fancy dresses.

Shri Mataji: They were wearing orange dresses.

Sahaja Yogi: Yes, mother.

Shri Mataji: I didn't see them coming.

Sahaja Yogi: They stepped in the end at the back. They left before you started the session of realisation.

Shri Mataji: *[UNCLEAR]* that is what I said *[UNCLEAR]* for Me to talk openly about the Gurus.

Sahaja Yogi: Yes, absolutely mother.

Shri Mataji: Start your food, you shouldn't eat it cold. [In Hindi:] Rustom very nice, very well.

Sahaja Yogi [in English]: Thank you Shri Mataji, improvisation.

Shri Mataji: Indians sometimes, yours is the same style as Indians, isn't it or is that different. Well done today's program, wise people very wise people.

Gregoire: I really feel full of joy, mother. I really feel full of joy.

Shri Mataji: Because Gregoire, it tell you, they are so close to the Eastern world, Eastern communist.

That there is a kind of a balance in the people you see here I feel. It is a very balancing country.

Sahaja Yogi: And also mother here lived the Russians for quite a long time for about ten years.

Shri Mataji: I answered a very good question today if you noticed when he asked what about the matter why did God create? The original sin.

Gregoire: I may have been out at that time.

Shri Mataji: You didn't hear that part. About the original sin, about eve and Adam. You didn't hear that. The translation was not good.

Gregoire: No, the translation was really not good. I don't want to tell *[UNCLEAR]*.

Sahaja Yogi: Missed it that's what.

Gregoire: I mean it's OK. It was not the best, I am not a perfectionist that is what Sahaja Yoga is concerned, so I *[UNCLEAR]*.

Shri Mataji: She can try tomorrow *[UNCLEAR]*.

Gregoire: She has gone anyway, we have to, no, you see she was saying and she was also you know who becomes, the flower becomes the fruit. And she was saying the fruit become the flower. You know things like that. There was a big mistake. People could not understand what you were saying. They didn't understand *[UNCLEAR]* and people can hear her.

Shri Mataji: She is a very direct person you know Gregoire. She is not at all complicated. She is very safe.

Sahaja Yogi: She is a jewel mother. She is a jewel I said. She is very good and very constructive in Geneva mother.

Shri Mataji: She is right-sided, simple and straight forward question. She is not at all complicated.

That's why I have always said that the Germans will get it. They will have it. They just walk straight.

No question. They are difficult. *[UNCLEAR]* will get them, I am sure *[UNCLEAR]*.

Sahaja Yogi: And she played a very important role mother in Geneva. She has got a lot o authority.

Shri Mataji: If she can join you it will be a good idea.

Sahaja Yogi: Yes, mother. Well I guess, she is going to India mother. We all expect her to come back married.

Shri Mataji: Does she want to get married.

Sahaja Yogi: She was quite afraid for quite a lot of time but she said that she loved her idea and she knows that she knows to develop further, she needs to marry. And she starts feeling now problems with left Nābhī which she didn't feel before.

Shri Mataji: What has she done and what is her age first of all?

Sahaja Yogi: She is I think about thirty to further one.

Shri Mataji: She is 30.

Sahaja Yogi: No no she is younger 28. 27 to 28.

Shri Mataji: What has she done?

Sahaja Yogi: She started university mother and she dropped it. Then she is studying music, she is playing violin. She also has done some teaching mother. She was teaching German language, yes, German and she is very much interested in teaching later in her holidays. Actually she is preparing for her exams in violin so that she could teach also music.

Shri Mataji: If she is very tall and we have to find a tall man.

Sahaja Yogi: Hugo is gone mother, Hugo is gone. Hugo is married already. Hugo from Australia.

Shri Mataji: Hugo, there is somebody taller than him we have.

Sahaja Yogi: And she has been very strong with her realisation mother. She said for two days she was in a state where she cannot *[UNCLEAR]*. And she took very wise steps mother, after realisation, she decided that she is not going to work more than five may be six hours a day so that she can establish herself in Sahaja Yoga and keep her attention straight on Sahasrāra mother.

Shri Mataji: She is very direct. I must say. She is very young you see.

Sahaja Yogi: She has done a lot of work for preparing for the program in Geneva mother. She is an excellent girl.

Sahaja Yogi: She went to Germany mother to help Thomas.

Sahaja Yogini: She is very straight forward.

Sahaja Yogi: It's a very nice couple Thomas and Sofiā if balance is established.

Shri Mataji: Thomas you see is no leader; he is just one of the Sahaja Yogis as a person.

Sofiā said mother that she would agree to marry *[UNCLEAR]* vibrations wise will be very strong.

Shri Mataji: Marcus what do you say.

Gregoire: Marcus is tall.

Sahaja Yogi: Which Marcus, Marcus.

Gregoire: Not Marcus the famous Marcus.

Sahaja Yogini: The one Austrian Marcus Dawes.

Shri Mataji: What's it. Marcus is what.

Sahaja Yogi: Dawes. This is his name.

Sahaja Yogini: This is his second name.

Shri Mataji: He is alright. He could come to Germany.

Sahaja Yogi: He could come to Germany. They could stay in the same town as we mother. They can stay in the same town as we and for jobs it could be no problem. Because

Sahaja Yogi: You can give him a job.

Shri Mataji: Very good at English. Marcus is very good at account. He is very good at account.

And only thing is you see, he comes from a family where they were well off once upon a time very well accountants. And his mother is still in Venice and some place like that. Such a family it is. But he is very suitable for her I think.

Sahaja Yogi: It will be quite interesting to see Marcus; will be quite interesting to see Marcus was very slow very.

Shri Mataji: Yes, we are done.

Sahaja Yogi: He was speedy.

Shri Mataji: Absolutely speedy fellow, will be a good idea.

Sahaja Yogi: Marcus and Sofiā.

Shri Mataji: I don't her name but Marcus would like, will have to see.

Sahaja Yogini: Who was this Marcus? How old is he?

Shri Mataji: He is about thirty I think. He is 30, he is about thirty I think now must be.

Gregoire: Would you like some more chicken mother.

Shri Mataji: No no, I am just trying to finish this that's all.

Sahaja Yogini: Age is perfect between them.

Shri Mataji: Age is perfect. When he came first to Me, he was 26. Now how long have you been with Me Gregoire? Gregoire: How long? When I met you, how old I was?

Shri Mataji: No no, when did we go to what that place is called? Gregoire: Scotland.

Shri Mataji: Scotland.

Sahaja Yogi: Three years ago Shri Mataji.

Shri Mataji: So he must be now 39 or something. 29 sorry must be 29, alright about 28-29. She is 28.

Sahaja Yogini: I don't know mother.

Sahaja Yogi: She is at least 29 mother. She has a very pure Mūlādhāra mother. When she went to Germany first to see her brother she said that she was having diarrhea for few days.

Sahaja Yogi: Mother I must say that I said that I could have seen her meeting the wife of Thomas that could have been a nice picture you know.

Shri Mataji: It could be a solution for Marcus also I think. She is an accountant and everything *[UNCLEAR]* coming down.

Gregoire: I am little bit afraid that she may be a bit strong for him because he is quite I mean his move.

Shri Mataji: He was quite strong now he has come down. A very strong in back. Extremely he had problems with lots of them, that's our idea.

Sahaja Yogini: Mother you were saying that he was an accountant. He could be very useful in Rom there is a hotel to manage because in Rom, we have cooks and we

have every kind of people for the hotel but an accountant we should need.

Shri Mataji: You should have an accountant.

Sahaja Yogini: Accountant would be very useful in Rom.

Shri Mataji: We can give him many accountant from Gregoire: That is absolutely mother to send the English people having jobs in Europe.

Shri Mataji: He may get a job there.

Sahaja Yogini: Well if we receive from Śhrī Hanumān a hotel, a restaurant, an ashram an accountant will be very necessary.

Shri Mataji: You have many accountants. He is of a good family but his family is ruined now, finished. His mother is gone to *[UNCLEAR]* father is something. What is it to some sort of a contractor or something, doesn't give him any money. We have so many accountant, our john is a big accountant himself, you could have another accountant. We have so many accountants. We have this one, the one got his epileptic attack what is his name? Norman.

Sahaja Yogi: Norman got an epileptic attack.

Shri Mataji: He is the one who is having a business.

Sahaja Yogi: I thought he was totally inactive and he apparently was doing business.

Shri Mataji: You know he had a big business. A shop of liquor which he sold. Then he shifted to the ashram. There he started his business without telling Me.

Sahaja Yogi: What business was it?

Shri Mataji: He started selling cloth; he got all the stock in the ashram.

Sahaja Yogi: Maybe didn't know you see just ignorance mother.

Shri Mataji: I know I forgave him.

Sahaja Yogini: Do you want some more mother.

Shri Mataji: No no, out of question. I have eaten three of these. It was good.

Sahaja Yogis: It was very very good.

Shri Mataji: And I have just told Rustom how to make it *[UNCLEAR]*.

Sahaja Yogi: Very very *[UNCLEAR]*. We should learn that recipe.

Shri Mataji: He has a brain; Rustom has a very good brain no doubt.

Sahaja Yogi: That is why he is doing good cooking mother.

Shri Mataji: Without that how can he. Now for example if you have to do it then none of us can eat.

Gregoire: I know mother *[UNCLEAR]* Divine, what you told that other day. I think you all know that story there was Macchindranath, but I have a good CIA service, so I know the story already. Macchindranath was playing and he was putting a little cube in a hole. Mother said yes he is intelligent like his father he can do this he can close this little box. But I am not sure that his father can do that.

Sahaja Yogini: Mother if I may I want to check in the defense of my big brother, he makes excellent omelets.

Shri Mataji: I have heard that. But he has not made one for Me how am I to pick it.

Sahaja Yogi: Mother, I am too humble for that mother.

Shri Mataji: I tell you mostly the intelligent people don't know how to cook, that's one thing about them. I have seen it in India if somebody is intelligent, he will not know how to cook some or other then I sometimes think if I know how to cook that means I am not intelligent. That's what you have to decide now. You see I have seen people like My husband he has no sense, this much. How can you teach him? He doesn't have any sense of any kind. Only what she has got is nervousness, you see, this will burn that will burn this that, that's all. Rustom has really done a good job. [In Hindi:] You also eat, you are just.

Sahaja Yogi [in English]: It's really excellent really, really excellent.

Shri Mataji: Somebody has really enjoyed.

Sahaja Yogi: You see, question of love.

Shri Mataji: You know Rustom did what. This I tell you.

Sahaja Yogi: Yes, you could tell them Shri Mataji.

Shri Mataji: Sir C.P. and Kalpana was there I think Kalpana, Aradhana, Anupama, Prabha and Me we all went to Derbyshire and we agreed to go all of them and went out and try to somehow put this, so Rustom said I have done the biryani its left there, when you go in the afternoon, so you see we were waiting waiting for the food, My program was in the evening, so it took about 3:30, we didn't know what was happening, Hester and Kalpana were both busy in the kitchen, so I went down and said, “What are you doing” so Kalpana said, “Mummy Rustom has cooked a biryani." I said then you just have a look, you see, “How can we improve it?" So I went and saw, it was all rice and absolutely raw

absolutely raw and the chicken was not yet cooked, so they started cooking it, separately they took out the chicken separately and they started cooking it and the rice was left as it is you see, but C.P. was very you see, he said you don't tell him poor thing, he has done so much and after all you are not to tell him that it is spoiled and this that. I said no no; we are not going to tell him about that.

So some or other that chicken which was all raw was cooked somehow with all the mixed rice you see and we ate something at the lunch, you know, he slept off and then we got up and then Rustom came and said, “How was the chicken?", he said, “Oh excellent, it was very nice." But I think he went and opened the...

Rustom: I was very suspicious and I knew that it was near disaster.

Shri Mataji: So he was suspicious and he went on asking Me and asking Me you see.

So I didn't tell him that day but then I said Rustom I better tell you and he was shocked.

Sahaja Yogini: Mother you never told me, how was the dish that we prepared for you when the ambassador of the Spain was in your house, with the wife and the children. The *[UNCLEAR]* with tomato and parmijana is called.

Shri Mataji: We do make the same thing. It was very well done. We make the same thing, you see, our cooking is very much the same except this pasta business we don't have much, because we don't eat this white our. But we eat very thin ones like that otherwise; our style of

cooking is quite the same. It was very nice you have put some cheese and all that. Very nice it was.

Gregoire: Mother when you started you don't know what Rustom has done it reminded me another story in relationship with your daughters, I don't know if you know this story already. It was in Ashley garden, when I was leaving for Switzerland and I was leaving mother, mother was near *[UNCLEAR]* sofa and then she walked away and I saw her chapels there on the ground and then I said oh well I will take the chapels of mother to worship them at home during my holidays, so I took the chapels of mother which is very auspicious and of course in my room OK and so I put them on the table and every morning I was bowing and so on and then after the holidays, I returned in the Ashley gardens and then I put the chapels and then Sadhana saw them on the floor and then Sadhana suddenly said, “Mother my chapels are back where were they."

Shri Mataji: He never asked Me. My feet are slightly about the same but slightly little longer. I do not have big feet.

Gregoire: I don't have the eye of Śhrī Ādi Shañkarāchārya, mother.

Shri Mataji: We had such fun I tell you. What do you call that pineapple dish that is more *[UNCLEAR]* more dish.

Sahaja Yogini: It is parmijana.

Shri Mataji: Parmijana.

Sahaja Yogini: Yes mother, it comes from parmijana the cheese which we put on.

Shri Mataji: Parmijana, from what part is the *[UNCLEAR]* parmi or jana.

Sahaja Yogini: Parmijana is the name of the cheese. It is just the name of the cheese.

Shri Mataji: Oh it is the name of the cheese parmijana.

Gregoire: So I think now, the pure name of the cheese is no melanzanie ala parmijana. That means obergin in the way of parmijana, the style of the place this part of the Italy is parma parmijana.

Sahaja Yogini: Where they make this special cheese.

Shri Mataji: Parmijana.

Sahaja Yogini: That we also put on the pasta.

Shri Mataji: So what do you say to this thing to egg plant?
Sahaja Yogis: Melanzanie.

Shri Mataji: Melanzana.

Sahaja Yogini: Melanzana, yes mother. Italian is very easy.

Shri Mataji: Melanzana. We call it bengan.

Some people call it in Marathi wangi. Maharashtrian people call it wangi.

Sahaja Yogini: There are few words that are the same in Sanskrit and Italian like the one that you told me in Rom chawi; it is the word which means key chawi.

Shri Mataji: Chawi, chawi comes to us not from Sanskrit. It comes to us from Persian, chawi. It is a Persian word.

Sahaja Yogi: Basta.

Shri Mataji: Basta.

Gregoire: Basta, bas, basta means enough.

Sahaja Yogi: Like bas.

Shri Mataji: Bas.

Sahaja Yogini: It is the same.

Shri Mataji: That also is Persian. Bas is also Persian. You say basta, is Persian that's Persian. You see because I am sure lots of Persians must have come down, Arabic people must have come down. They were ruling Italy isn't it, some of this, basta. Ah so much food. But the way, you see they pronounced the words *[UNCLEAR]* style but in Europe it is I think French and Italians are known for cuisine no doubt French and Italians. That is surprising how many languages you can speak you know three or 4.

Gregoire: In one day if you said everybody should know more than one language. Then you said one should at least know at least English of course but then either Hindi or Marathi. German French Italian and Hindi wouldn't exist in your counting.

Shri Mataji: Because if you have to listen to Me at least English you should learn. Because after all you will miss lots of points like today you know which he missed so many points.

Gregoire: This is certain mother that is one of the reason it would be very nice.

Shri Mataji: But Sahaja Yoga is a very subtle thing I tell you. And there are lots of subtle things and if you miss then you will miss the whole thing so why not have the *[UNCLEAR]* I have learnt English you will learn English also that is not My mother tongue or father tongue. I have picked it up.

Gregoire: But then what to learn Hindi, Sanskrit, Hindi, Sanskrit and Marathi.

Shri Mataji: If you know Sanskrit you will learn Marathi or Hindi very easily. There is no problem, because you know the roots.

Gregoire: I would like to learn Sanskrit.

Sahaja Yogi: Although we could have Sanskrit courses. You said that German is very close to Sanskrit.

Shri Mataji: That is what they say but I had been only able to find one word is du.

Sahaja Yogi: No mother, another word is tat.

Shri Mataji: Tat means that.

Sahaja Yogi: And tatsache means fact.

Shri Mataji: Tat sach what.

Sahaja Yogini: Tatsache.

Shri Mataji: Also we don't have this `h'.

Sahaja Yogi: It is like in Arabic.

Shri Mataji: Arabic yes, but sach is not a Sanskrit word. Sach is used in a colloquial way, very very rustic sach. Especially I would say Kabīra has said this word sach. Sach is the essence of the sach. But sacher is a Marathi word. Sacher I think must be close to Marathi may be German.

Sahaja Yogi: Actually sache means a thing Shri Mataji.

Shri Mataji: Thing.

Sahaja Yogi: Thing.

Shri Mataji: Sacher and sugar.

Sahaja Yogi: And sugar is Zucker.

Gregoire: Because we have taken the sachertorte of the sacher hotel.

Sahaja Yogi: Sacher is the name of the place isn't it. You see sacher is the name of the hotel Shri Mataji.

So that is why it is known as sachertorte which is quite famous in Austria.

Shri Mataji: We had this famous cake. Sacher. Sache means vastu mean the thing.

Sahaja Yogi: But where German is similar Shri Mataji to Sanskrit is the grammar. The way the verb changes.

Shri Mataji: Then it is not similar. You know that way you can say that Marathi is similar to English.

Yes, then it is something like that you see the grammar.

Sahaja Yogi: But they have this system Shri Mataji of prefixes.

Shri Mataji: *[UNCLEAR]*.

Sahaja Yogi: Also they have this system of prefixes which changes the meaning of the verb. Like we have in Sanskrit like gaccham agaccham.

Shri Mataji: That is nothing similar you see that you see it is a very different language. You see our say Hindi language is same as English language as far as grammar is concerned practically.

Sahaja Yogi: Yes, the grammar is identical mother.

Shri Mataji: Same style, but what I must be lots of words, for example is sacher may not be. These are all Persian words. Kha as you all know is not in Sanskrit at all, is against the Viśhuddhi Chakra, your kha, gha, ga. Your gha.

Gregoire: Mine.

Shri Mataji: Ra.

Gregoire: French ra. I cannot do the ra. None of us.

Shri Mataji: Rhuth is bhooth. Rhuth we call some bhooth. Ga just like this ga special. Ga for Gaṇeśh.

In Sanskrit language this words are not there. We don't use this part at all.

Sahaja Yogini: Persian language is coming from where. The hruth of Persian language from where is it coming from.

Gregoire: Where are the hruths of the Persian language coming from? Shri Mataji: Persian language this Persian itself all the same I should say must be Italian or something.

Sahaja Yogini: Latin because Italian is Latin so.

Shri Mataji: Latin language, this Hebrew is also there. You see Hebrew language is different may be from Hebrew or Persian language.

Sahaja Yogi: Old Persian Shri Mataji Zend Persian was from Sanskrit. But at the moment the Persian comes from Arabic.

Shri Mataji: The old Persian comes from Sanskrit.

Sahaja Yogi: Because in the parsis have met pravaruna and all the devas are mentioned.

Shri Mataji: Ah the old Persian which was before I mean after Zoroaster is definitely Sanskrit very much no doubt. But this modern Persian is Arabic. Now what is the root of Arabic?

Sahaja Yogi: Arabic is a to big separate system. Arabic Hebrew they are all in this side. They all started in this side mother. They have nothing to do with Sanskrit.

Shri Mataji: With Latin.

Sahaja Yogi: Nothing to do with Latin.

Shri Mataji: You see because Latin and Sanskrit are sister languages, so Persian looks like latinisch but I think the modern Persian is very.

Sahaja Yogi: It has nothing to do with Shri Mataji, it is Semitic may be, but Latin is similar to Sanskrit mother. Latin is very similar.

Shri Mataji: Very sanskritized very Sanskrit. You see they say to center kendro.

Sahaja Yogi: And also Shri Mataji to fire they say Agnes, for fire Agnes.

Shri Mataji: Agni.

Sahaja Yogi: So similar.

Gregoire: Mother we are sorry we are just forgetting that you worked.

Shri Mataji: Formally I must leave.

Gregoire: You worked so much. We just say your mantra before you leave.

Three Mahā mantras.

Om Twameva sākṣhāt Śhrī Mahālakṣhmī, Mahāsaraswatī, Mahākālī, Trigunātmika, Kuṇḍalinī sākṣhāt Śhrī Ādi Shakti sākṣhāt Śhrī Bhagavatī sākṣhāt, Shri Mataji Śhrī Nirmalā Devī namo namaḥ Om Twameva sākṣhāt Śhrī Kalki sākṣhāt Śhrī Ādi Shakti sākṣhāt Śhrī Bhagavatī sākṣhāt Shri Mataji Śhrī Nirmalā Devī namo namaḥ

Shri Mataji: May God bless you.

Om Twameva sākṣhāt Śhrī Kalki sākṣhāt Śhrī Sahasrāra Swāminī Moksha Pradāyinī Mātājī Śhrī Nirmalā Devī namo namaḥ

Shri Mataji: May God bless you. I must say, I did not realise, I did not realise that I was using a coloured sari till now.

Sahaja Yogi: But it was very nice.

Shri Mataji: For a program. Gregoire I am going to try, so let us see.

Sahaja Yogis: Thank you Shri Mataji. Śhrī Nirmalā Devī namo namaḥ, Śhrī Nirmalā Devī namo namaḥ, Śhrī Nirmalā Devī namo namaḥ

***Contents: 1982-09-28*, Public Program, Day 3, Urania, Vienna, Austria**

I bow to the seekers of truth. I do not know what he told you in German language. Yesterday as we were discussing about the centers that are within us. We will continue to do that today again. Within us is placed this residual energy in the triangular bone, called as Kuṇḍalinī. This is the energy of desire which is not yet manifested. It is pure desire and it is the ultimate desire. It is the desire to be one with the Divine. We can say the Union with the Divine. That is the Yoga. This is placed in the triangular bone which is called as Sacrum, means sacred. The Spirit, the reflection of God Almighty, is placed in your heart. But the seat of your Spirit is on top of your head here. Like as you may have the king moving all over the places, but the seat is a fixed place. Unless and until this union takes place, the manifestation of this residual power does not take place. This manifestation has to take place. This is the last breakthrough of our evolution. This is what has been described as the second birth, as the baptism. It is also in Sanskrit language is called as the second birth, like an egg becoming the bird.

So bird also in Sanskrit language is called as Dvijaḥ, means twice born. This happening has to take place, has been described by all the scriptures.

But instead of finding out what is this, people have artificially started some mental projections out of the reality and have created an artificial cosmos of religions. The people who incarnated on this earth to help us and those who tried to give us the fundamental basis of our existence and the idea as to what should happen to us were real people. But later on as the people were not connected with God, were not realised Souls, were not twice born, all artificiality started growing around them. That is how we see how in the name of God people are killing, having wars. This cannot be explained by any sensible person why people take to such horrible violence in the name of God.

Without the Realisation, without the ascent of the Kuṇḍalinī, you are not in touch with reality, with the All-pervading power. The All-pervading power is everywhere in a very subtle way. In a molecule it oscillates the different atoms in different ways. In animals it pulsates. In the plants it transforms into different shapes and different stages. It classiffes. For example, a apple tree will give apple and a rose will give rose. All this sorting out is done by this very dynamic All-pervading power of God's Love. But we take all these things for granted, because we do not feel it. To feel it, one has to become subtler. At this human level we are not subtle enough. There has to be a breakthrough. Unless and until we have that breakthrough, we cannot understand the relationship with the Absolute. We live in a relative world all the time and that is why there is a confusion. Unless and until we find the Absolute, we cannot sort out this confusion, what is right and what is wrong. And that

Absolute is the Spirit within you, who at the time when we are human beings is just a witness of what we are doing. It witnesses the field of our work, but it does not in any way activate itself.

Yesterday I told you how there are two types of people, one are right-sided, another are left-sided.

And there are third type of people who are seeking God. The left-sided people pay too much attention to their emotions, to their past and live in the past. And the right-sided people live in the future and act through their physical and mental being. But the people in the central path do not go to this extreme or that extreme, but reside in the center and try to find their Absolute. How we go into extremes is very interesting to see. For example if there is a doctor, he sees a person as a physical being. He doesn't see him as a mental being or as an emotional being. If there is a psychologist, he sees a human being as a psyche only, because there is no integration. Once you get to your Absolute, everything gets integrated, because the relationship between everything is through the Absolute.

So people put in this theory, then they discard it, they put in another theory, they discard it, then they come up with another solution, they discard it. They are all groping in the dark. And when they are groping in the dark, if you have to tell them that, “You have to just put the lights on” they don't like it. They get identified with their theories to such an extent and they are so much blinded by their mental projections that they don't want to see that there can be something absolute which is

beyond thought, beyond mind. We are talking about this All-pervading power. It pervades into everything.

So it is unlimited.

So to know about this unlimited energy, how can we use this limited brain? Even to come inside this hall I had to leave My limited car outside.

So one has to know that, if you have to go to unlimited thing, you have to have a breakthrough.

You have to jump into that kind of an awareness by which you can realise the Absolute. But in the seeking as I told you also when we put in an effort, we go to the left or to the right.

So we go towards the collective subconscious or towards the collective supraconscious.

Our evolution is a living process, it is not a dead process. We say we have come from monkeys and other animals, what did we do about it? What effort did we put to become human beings? What theories did we propound to do that? What books did we read to achieve it? Or how much money did we pay to get it? So the spontaneity is the quality of the living process. And the living process cannot be explained through mental process. For example, how will you say that this flower becomes a fruit? At the most you can say, this happens, that happens, but why? How? You cannot answer the question why. It is said that in the human beings the acetylcholine and adrenaline, two medicines which are we can call them as just chemicals, act in a very different way. All right? Are you understanding that? All right? [Laughter.] So adrenaline and acetylcholine act in two different ways,

if either they augment or they relax, it is not easy to explain why they do it.

So the honesty of the scientist is that they say, “We do not know why this is the mode of action." Even if you are honest, then one has to realise that we do not know.

So we have to know about it.

As I told you the other day, that this is the knowledge about the roots. West is like the shoot which is outside, obvious, one can see. But the roots are in the East. Maybe the climate in that country or maybe some previous arrangements that the people are more interested in the roots than in the shoot. Makes no difference because the roots have to depend on the shoot and the shoot has to depend on the root.

But one should be open also to the knowledge that is not yet known to us. Anybody who tried to speak about the roots was poisoned, tortured, or crucified. Now if you are really intelligent and not intellectuals, then we should understand that there is much more than what we know. When I'm telling you about the Kuṇḍalinī and all that, you need not accept Me blindfolded. And also you should not deny it. But with an open mind, see for yourself that once you get your Realisation you will be able to verify everything that I say. But before Realisation I cannot talk to you about it. I may tell you about it, but you will not know. If My eyes are closed and somebody tells Me there is red colour and there are wood and people are sitting like this, I will know it in the mind but I will not experience it Myself. This is the only thing that is missing now. If once you discover the Absolute, all your problems will be resolved completely, because this Absolute is the

collective being within you. Once it gets awakened or when it comes into our attention or into our central nervous system, we understand everything in the new light.

So, now we have yesterday discussed about these centers of first, second and third in a way. The first one is that of the innocence. That I said was the, our `original sin'. If we had remained innocent, there would have been no problem of any kind. God gave us our innocence and also gave us freedom and everything that was possible to live there. But that time the freedom could not be borne by people and they thought it is better to disobey God and find out for themselves. This original sin is still going on.

But that innocence, when it broke, we started developing our ego, through which we try to find about this and find about that and go in all directions. Every direction we moved was a linear direction and all our movements fell down at a point.

Now, when we know that we have these centers within us, we should know also that this last center, which is the center of innocence, plays a very, very important part in our life. Innocence is the basic of wisdom. When the innocence is lost then you lose your wisdom. And you start becoming something for which you are not made. Yesterday when I said about Freud, many people left the hall. That is not the way to face reality. You must try to listen to Me. I am trying to tell you what happens with these perverted ideas. Because innocence is lost he took full advantage of us. He told us that there are inhibitions between parents and children and all that, is something

shocking. It is not to you, but to any innocent person, say in India or any place, it's really shocking. How could he think of us to be just sex points? That means we have no sublimation, no sanctification, nothing. We are absolutely nothing but just sex points, even animals are not like that. If you see his own life, he was a perverted man, had a bad relation with his mother. What is there to learn with such a person? [Laughter.] In India, if you mention Freud, people will go and take their bath. [Laughter.] It's the most unholy thing one can think, it's an abuse. It's an abuse for people, abuse to say that you follow Freud, it's an abuse. But we accepted him, I don't know why. Then he had cancer, he died of cancer. A such a miserable man, what can he teach us? Except for weakening all of us our innocence and taking away our basic wisdom, he has done nothing else.

These are the people who came on this earth as great intellectuals, who have no relationship with innocence, who are possessed. All the perversions of sex come through possessions. Like, I would say, we have this problem of homosexuals. In India is much less, but here it is something surprising. I met a westernized Indian girl who was married to an Indian. And she came to, she's married to a very nice man and she came to Me because her husband said that, “She's very funny. That she's interested in girls, not in me. She walks like a horse, like a man and she wears all the men's dresses and it's something absurd. We can't imagine such a person." It is a new type of a disease for Indians. [Laughing.] They didn't understand that stupidity. The gentleman was very upset. He brought her to Me and I put her into Sahaja

Yoga system. And you'll be amazed that she had started growing little beard also. When I saw her, I saw a man possessing her. And when that possession was removed, she felt so shy, you know and she just wept, she said, “Did you see that man going out of me?" The another attack comes from the medical profession, I think sometimes. I Myself have done medicine, but I was amazed to see that some of the pills that women take have male hormones in it. If you make the women like men, then what is the sense in having men and women as such? One can't understand [laughs] a military of only men sitting round here without any women to bring some sweetness. And how can these women produce children and look after their children? It is a very confused state in which we are as it is, on top of that, these people are adding coal to the fire.

Then we have some certain Gurus, they are another set of devils. As somebody says that you can achieve God by sex. We have no basic wisdom to understand how can it be. Christ, if you know that, He was such a purity, He said, “I do not say only thou shalt not commit adultery, but that thou shalt not have adulterous eyes." But here if you find this Guru, we saw one film known as `God Who Fled' where there was mass, horrible, hellish act going on. One can't see. After that I vomited for one week and I couldn't eat any food, horrible. It is all filth, there is no sense of decency or decorum in this nonsense. We do not bring bathrooms into drying rooms, do we? Under the guidance of these Gurus you will find anything on the streets tomorrow, I mean, if you listen to these people who go to these Gurus, I'm amazed. God is purity, He is

sanctity, He is innocence. You cannot reach Him if you are indulging into such dirty habits which are hellish, it is hell, believe Me, it is hell. But I have seen people who preach about God, live in such a hellish way, there is no relationship between what they preach and what they live.

This is the center of innocence, which is the support of the Kuṇḍalinī, which receives all the information about us. And passes on to this Kuṇḍalinī, who is your mother, the virgin. She is a virgin, I hope you understand that word at least, it has not lost its meaning. Your mother is a virgin, in there that Kuṇḍalinī She sits and this innocence is looking after the protocol of his mother, the Kuṇḍalinī, the innocence within you, whatever is left. Now if you understand that this is the position of your innocence, that innocence is the one which is going to help you ultimately, you will know what I'm saying is so important.

I have seen people have the Kuṇḍalinī which is wounded. It is just putting its head all sides, helplessly, limply, it has no strength in it. And even when She rises in a sense, you see, if there is problem in this center, it sucks back.

So this is what happens within us when the Kuṇḍalinī is sucked in, then again you have to raise it and fix it up, again you have to raise it and fix it up. She's your mother.

[Aside:] Loudly.

And She is the one who is born again and again, with you to give you this second birth. And She's waiting for that chance all your lives. But how can She be harsh to you? How can She trouble you? She is not like these modern

mothers in England that kill their children. It's shocking everywhere mothers have started killing their children. No wonder all the children are being born in India, we have to bear the load of it. They don't want to be born in countries where there is no love, there's no heart.

So when this Kuṇḍalinī rises, She rises straightforward in a split of a second. In people who are not complicated. She pulsates on your head, on top of your head and opens this part and makes it soft. And you can feel the Cool Breeze coming out of your head, which is described as the Cool Breeze of the Holy Ghost. In the Bible, Holy Ghost is not described so much. One reason Christ was crucified in such a short time and secondly, He never wrote anything. Nobody gave Him any chance. This was another kind of an attack on an incarnation. But we have to seek information about Him and about Kuṇḍalinī somewhere else, this Kuṇḍalinī which is the reflection of the Holy Ghost. Of course, there are so many books written in Sanskrit language about Kuṇḍalinī. You'll be surprised, 14,000 years back in India they have talked of this Kuṇḍalinī. They have talked of Christ as Mahāviṣhṇu. All the description tallies with Christ. That He will be born on this earth, who is the embodiment of innocence itself. That He is the innocence and that cannot be destroyed, so His body won't be destroyed. And that He will be responsible to suck our ego and superego, the effects of our action and desire. The effects of our action and desire and conditionings.

But nobody wants to know about it. Because we have started such huge organizations based on falsehood that we don't want to topple it down. But I tell you that there

is so much information otherwise also that as open-minded people, we must try to understand those things.

Now, when this Kuṇḍalinī rises, as I told you the first Chakra, then the second Chakra is the Chakra of your activity. I told you yesterday how we become futuristic by using this and how we develop problems of the visceras in the stomach, organs in the viscera, I am sorry. To solve these problems, we have to correct this center. The third center I told you is the center of Nābhī, which is the navel center, which is responsible for evolution. First it gives you your sustenance. Sustenance is the quality. For example, carbon has four valences.

[Aside:] Loudly, say loudly.

In the same way, human beings have ten valences. These are described in the Ten Commandments.

This balancing takes place in this area which is shown with the green colour. This balancing is done by people who incarnate on this earth as great prophets. We can say Abraham, Moses, Socrates and many other prophets like these, Mohammed, Nanak, Janak, all of them came on this earth. They were the incarnations of the Primordial Master.

So to talk about this balancing and this balancing they told us, because without the balance, there cannot be an ascent.

[Aside:] Gentleman, why are you disturbing everyone? So the balance has to be achieved through these different advices given to us by these great incarnations.

But out of these great incarnations, what they have made, Islam, we can say, Jews, Judaism, all kinds of

`isms' we made out of it. The fanaticism is the only word you should call all of them.

So when there is a movement of people on the right hand side too much such people can become extremely fanatic. Best thing to understand their fanaticism is to become the other. If the Jews become the Muslim they will see how stupid they are. And if the Christians become the Jews they will know how stupid they are. All the fanaticism, thank God, is today going to be exposed entirely.

Now for your information, those who are fanatics develop the trouble of the stomach. I met a doctor from Iran long time back about 1974, who had cancer of the stomach. And I told him, “Do you believe that Moses and Mohammed were the same persons?" He said, “How dare You say such a thing? How can they be the same person? Mohammed was absolutely different and He has nothing to do with anyone of them." But I said, “Mohammed said He was a prophet, didn't He?" But still he would not accept.

So I said, “All right, I cannot cure you, Sir. You are suffering from fanaticism, not from cancer." He went home, he had still trouble for about eight days, then his wife put some wisdom into his head. [Laughing.] And then he came to Me. He said, “All right, I accept, Mother, if you say, I accept that Moses and Mohammed are the same." And you'll be amazed, his cancer was cured.

All kinds of extreme behaviour take you to physical troubles. Whatever we do in an extreme way, we develop diseases, physical, even physical. We develop mental diseases. It is very easy to make out these people who

have been to these extreme things because they emit tremendous heat. Say, if there is a madman and there is a cancer patient and a fanatic, they emit the same amount of heat.

So you can imagine how we are getting mad and also sick with our fanaticism. But we have also sophisticated fanatics, who in a very sophisticated way adhere to their own mental projections. They say, “I believe. I believe in this." But what do you believe in? Where is your “I"? This is nothing but your ego, because your self is not showing. You believe into it because your ego believes in it. But what is the proof of your believing into it? What would you have done to yourself or to the society that surrounds you? How can you prove that what you believe into is the truth? Yesterday I told you that all your economics and all your politics is a myth. Because it is based on myth. The myth is of these material wants. And the material wants cannot be satisfied. [Laughing.] So there is something missing in us so that we do not feel satisfied with ourselves. Let us face the fact that when we are facing ourselves we will know that we are not yet that what we should be. Only because of our ego we feel inferior or unhappy about it. A dog will not feel unhappy because he's a dog, does he? But if you realise that there is a little thing more has to happen and all the potential is present in you, it is your own, you have all the powers, then why should you feel unhappy about it? If it is said that all powers are within you, just let it manifest, that's all. The truth is the All-pervading power of God. That's the only truth. And when that truth starts flowing through us, we feel the Cool Breeze in the hand and any absolute

question can be answered. You can ask any question and the answer comes as a Cool Breeze in your hand for `yes' and as heat for `no'. Now somebody asked Me, “Why it is cool, why not hot?" It is cool because it is cool. [Laughter.] But you can see it even in the helium gas. When the helium is cooled down, the atoms of helium which were attacking each other, were violent, suddenly become collective.

So that shows that absolute zero is the zero of the Spirit. As you cannot reach the absolute zero, people say you cannot reach the Spirit. But this is just again theory. But the zero can come in your attention or not? The light can come in your attention, now why not try it? Why deny it? So this is the gap one has to fill and this gap, the green gap, is filled by the Kuṇḍalinī very easily when a person is a balanced person.

Some people who come to Me, I work on them so hard, but I do not give them cure so fast. But there are some people I just touch them and they get all right. That means they are just at the door. A little push and they are there.

Now above that is another center which I would like to deal with today and then we'll deal with other centers later on day after tomorrow. Is the center of your sense of security. The sense of security, when it is disturbed, you get the pulsation or a kind of a movement in this area. We have a bone here which connects to some of the ribs. Till the age of about twelve years, the antibodies are created in this bone.

These antibodies spread to the whole body and protect us from any attacks from negativity or from some

physical anti-life force. But when people are insecure, then there is more generation by the pulsation, but as they are completely out, little more energy is sent to them or a message is sent to them and they start acting. A woman who is always insecure about the behaviour of her husband, maybe a flirt or any sort of a man, she develops troubles of this center very easily. If her motherhood is challenged, also she develops this trouble of this center and she develops disease called also cancer of the breast. That means in modern times many women are insecure. By establishing the security of this center, you can cure this trouble.

On the right side of this center is another center, we call it as right Heart. And left side is the center which we call as the left Heart. Right Heart center deals with the father and the left Heart center deals with the mother. Which perhaps Mister Freud never knew. When this right side center is in trouble, means if the fatherhood of the child has been unhappy, or the father had died early, or that he has been a bad father, then there are complications of this heart. Then people develop the disease called asthma, sort of thing. You'll be amazed that asthma can be cured if you can settle the fatherhood of that gentleman. The method is also a part of the Sahaja Yoga Vidyā or Sahaja Yoga knowledge how to deal with the Divine power.

If the left side is weak, that the mother has died early, or she has not been loving, or you are a bad mother or anything the left side catches and such people are very weak on the left side. They can be very sensitive and their ego is hurt very easily. These people also suffer

quite a lot because of another problem which we have developed in the West, which is called as the left Viśhuddhi, we say, where we have a sense of guilt. About that I'll tell you tomorrow, day after tomorrow.

So now you can see that God has made us in all perfect way. These centers are placed within us.

These centers express themselves outside in the gross as Plexuses. The first center is expressed outside as the Pelvic plexus. The second center, Swādhiṣhṭhāna, is expressed as Aortic plexus. The third center is the navel center, is expressed as Solar plexus. And the heart center is expressed as Cardiac plexus, heart center, center Heart.

Today I have tried to explain to you the different centers and in short to tell you what are the quality of these centers and what they give us. They have a limited energy of parasympathetic within them. Now whatever we have achieved in our evolution is in the central nervous system. For example, as I told you yesterday, if you take an animal through a dirty lane, he cannot smell anything. But human beings can smell. Of course if they have been living with dirty people I can't say, I mean, but normal, I mean, normal human beings. Now when we get the enlightenment in this part, in the viscera and the organs get enlightened, not that physically we are cured, but we develop the sensitivity to anti-God activities. Our sustenance gets enlightened and active. Now when it is awakened, then it avoids or it does not allow the body to take in something that is not sanctified. You don't have to tell people, `Don't do this, don't do that.' They just give up, they can't bear it. We can say they get the dirty

smell out of it, or whatever it is, but it's just they give up. I had a young boy in Brighton who was alcoholic and who came to My program and was very aggressive. And I asked him that, “Today you go home and come and see Me tomorrow at home. That would be better." Surprisingly, he got his Realisation. Not that overnight he gave up his alcoholism, but he became such a sane person that his mother could not believe it how what has happened to him. He was an electrical engineer and was doing very well when he got into alcoholism and he had no job, nothing, he was like a cabbage in the house. And as soon as this got awakened he became absolutely normal.

Now it is something that people can't believe it. And it's really unbelievable, I can understand that.

But it is very simple to understand that if you come in this room and if it is dark, you'll fumble. You may think that this pillar is this room or this staircase is this room. But as soon as there is light, you can relate everything to everything. And then you don't fall and fumble. It is as simple as that. But one must know that behind these lights there's a very complicated organization.

So behind this happening there is a very complicated organization, [laughing] very loving and benevolent.

All the angels are waiting for you to enter into the kingdom of God. I'm sure tonight so many will receive Self-realisation.

May God bless you all! In any case, yesterday, day before, I asked people to ask Me questions. I would again say that I don't mind answering your questions, but it should be to the point. It is not civil to ask a question

about some book you have read in Timbuktu and I should go on answering about it. Or any such absurd things. It will not be civil to other people, who are anxious to get their Realisation, to waste their time. But you can ask questions which are relevant. I'll be very happy to answer them because at the time of Realisation these questions should not shoot out like jack-in-the-box. [Laughing.] May God bless you! Thank you! Ask the question.

Question: In anatomy I have learnt that Solar Plexus is here and Cardiac Plexus is here?

Shri Mataji: No, no, no. You didn't hear Me properly.

Solar plexus is here and Cardiac plexus is there, I'm sorry. She might have made a mistake.

Question: What do you think about Siddhis?

Shri Mataji: Siddhis? Now you see if you ask a word like that, Siddhi. Now. Siddha, Siddha means the one who is proved to be a realised Soul. But the so-called siddhis are nothing but possessions. For example there is one Guru who is taking $3; 500 to give you a Siddhi of flying. [Laughter.] And already he has collected 4,000 crores of rupees from you people for that. [Laughing.] Why not ask him to fly for a change? Don't be deluded by these words. I know there are thugs and thugs. Thugs, these are thieves.

But these are worse than that because they put spirits into you. And this gentleman specially has put spirits into people that people have become just cabbages, just cabbages. These people are even afraid of the garlic. At least cabbage is not afraid of a garlic, is it? [Laughter.] Paying all this money if you have to become a cabbage, then go ahead. And then he claims that people have

become non-violent. What is the non-violence of the weak and the cabbages? But the same gentleman has six percent population of the Israel. No wonder they have become so violent suddenly, because first all of them become violent. In North Ireland, this gentleman has four percent. And you know the history of North Ireland people.

Whatever stories they give, we take it for granted. I'm here to warn you of all these horrible people who are incarnations of the devil. They pamper your ego and I do not know what are their plans. But one must know above all is God Almighty. They have ruined so many seekers that they cannot be forgiven.

So don't listen to these words of Siddhis, this type, just forget it, get your Realisation first, then I'll tell you everything else. Because you all are seekers. And the seekers of truth. Not seekers of Gurus. You have to become your own Gurus. And then you will know what they are like. Thank you very much! Question: Please, I have a question. I am practicing Yoga and work with my Chakras, but my Thyroid gland is not working.

Shri Mataji: Which Yoga are you practicing? Question:... it's from Indian medicine men from the native people of America... and it's Yoga...

Shri Mataji: I will tell you. This lady is telling Me that she's practicing some sort of a Yoga, but her Thyroid is not curable. About all these Yogas I have to tell you the same thing. Without getting the Realisation, without getting the connections with the mains, if you take to any one of these methods, even what you call that Chinese thing, Tai Chi and another thing they put the pins and needles,

acupuncture, any one of these things, then you exhaust the energy of a particular center to the maximum. Then this center sucks in from other centers. Because there is no unlimited source within us.

So doing all these things puts you on to the sympathetic nervous system. Even cancer is caused by the over-activity of the sympathetic.

So it is the case just like a car which has got limited petrol and you can go to that extent and no further. But if you go too further with it, you ruin the car completely. But when you are connected with the mains, all the time the vital force is flowing through you.

So first you must get connected to the mains, which is Yoga itself. Without the connection how do they call it Yoga, I don't understand.

There is no union and they call it Yoga. Also Yoga means the deftness in the manoeuvreing of the Divine power. If the Kuṇḍalinī has not risen how will you know where it is obstructed? Now supposing if you start from here to go to your house, how can you know where is going to be the obstruction? But here the car has not yet started. And you are trying to correct the obstructions at a point which does not exist, may exist.

So all these Yogas have no meaning because there is no connection with the Divine, with the main. Supposing this instrument is not connected to the mains, it is useless. If you telephone to somebody without connection, you'll break the telephone.

So the first thing one has to do is to connect you to that Divine power. Is it not logical? In the olden days, when this Patanjali Yoga was practiced thousands of years

back, the first thing was called as *[UNCLEAR* Īshwara prari dhan] means the establishment of God within you.

So now, but in the modern times everything is so confused [laughing] that a simple thing like this we overlook. If you get cured it is just a by-product. Just as the by-product of these lights is that we walk properly. All right now.

[Aside:] She as to go today also? May God bless you! All right. What is it? Question: You are against all fanaticism, why are You so fanatic against sex?

Shri Mataji: I'm not fanatic, sir, I'm wise. I'm not, excuse Me, I will tell you, I'm not fanatic. If you have sex, in the way, perverted sex, you will have complications in society. If you have sane sex and you are attending today, is it? Yesterday I told in a very long way that sex in a proper sacred manner with the collective sanction is absolutely needed. You were not there yesterday, I told it. I'm not fanatic.

I'm Myself a married woman with four grandchildren. We have lots of marriages of Sahaja Yogis and we believe in sensible marriages.

If you cut in My lecture, one lecture, then naturally you can draw conclusions, but that's not fair to Me. You should have attended all My lectures, or you can listen to them. You can take the tape and listen to them and then you will know what I had to say about sex in a full way. Today was the little bit of it which was yesterday because people left suddenly, that's why I said. Now most of yesterday's lecture had about sex and I said what is the sanctified sex, which is going to give a proper life to children and great souls can be born on this earth where

there is a proper sex life, not the perverted one. And not to doubt your parents that they have sex feelings for us. This kind of sex-oppressed society is extremely insecure.

We have to have its place in its right way. If you don't mind, you can take the tape from these people and listen to it. And you will know that I have no fanaticism about sex at all. Any other question please. Yes? Question: I was not present at your first lecture, I don't know if You said anything about how to feel pulsation and sensation on the skin?

Shri Mataji: No, no, I will say that again. That I have to repeat again. That I'm going to tell you again. Is a very good question. I'm going to tell. He asked Me a question that he was not for the first lecture, but he didn't hear as to how I'm going to do that, which I will tell you, no doubt. I have to tell that again and again, no doubt. We are open to that. Also if you have any questions, even if you have come today, does not matter, any questions you may write them down, give it to Me, I'm coming back again, I'll answer them. And there we have got everything in tape. And you can get the tapes from the people here for no payment at all except that you give your own tape and we'll give you and you can go through it and see for yourself. For that matter, any part of discussion you want to know, we have other tapes also which you can take, see them, study them and let us know whatever is your problem, we'll try to tackle it. This is open to all of you. It does not matter what was the past.

So one should not worry about these things.

Question: I was at your last lecture. During Self-realisation session I did not feel much. But during last night I felt a strong burning sensation on my whole right arm.

Shri Mataji: What's she saying? It's a personal problem.

Sahaja Yogi [summarizes the question]: She says she tried all these things with the picture, she was here yesterday and she says she wasn't sure about the feelings on her hands, but she went to bed about 11:30 p.m. And then she woke up about 1 o'clock, she got a very hot feeling here.

Shri Mataji: Now I'll tell you what. If you have, now, just a minute. I'll tell you, it's very simple, you know. If you have a hot feeling here, that means you have a bad liver. All right? You see, you have a bad liver. You are a very right-sided person and you are speedy and your Swādhiṣhṭhāna Chakra is giving heat. All right? So we'll correct it. Don't you worry. It's all right. And the reason for that is she thinks too much and she thinks of the future. [Laughing.] And that is how she has developed this problem.

Although she must be a speedy person, very speedy. That she is, all right.

So, it's indicative, it's all right, doesn't matter, it will work out. [Laughing.] Now, it will go away, it will take hardly any time. Now, all right. But this has given some proof, isn't it? It has given some proof.

[Gregoire brings the questions and answers session to a close so that the meditation can begin.]

Shri Mataji: Now, all right, now what I'm saying, Gregoire, just tell them that when this is happening, just don't stand up and walk off because they disturb everyone and secondly, tell them that whatever I say, please listen to Me. If you do not want to do it, you can go away. But you don't disturb others.

That's not good because you should be civil. If I say take out your *[UNCLEAR* Mala] or anything, you should not object to it because it is for your good I'm saying it, I have nothing to get out of you.

She's the one running away, that's the thing, see.

If they want, they can go for one minute, if they want to go to the and they can come back, but settle down, because, you see, it's a thing of ages. It's the greatest thing that can happen to you. And it is the greatest gift that you should have.

I'll have to say that, that's what I'm saying, I'm going to tell you that.

So first of all, I would request you to take out your shoes. That helps a lot because it tightens our feet and also it doesn't give us contact with the earth.

Contents: 1982-09-29 **Talks to Sahaja Yogis, morning and evening, House of Gregoire's, Vienna, Austria**

Sahaja Yogi: Yes, Mother.

Shri Mataji: Just tell them how much you questioned Me. Tell Me, tell them how much you questioned Me. How much you question. At that stage when we started *[UNCLEAR]* I mean, he was [all the time questioning Me]. And this you didn't tell, remember. I mean *[UNCLEAR]*...

Sahaja Yogi: I do remember. I do remember, Mother. But maybe I was going far of that *[UNCLEAR* you know/enough].

Shri Mataji: And he represented all of them. I could see through him all the questions that they are going to ask or they can, you know. But once I've answered that, [lot of them will apply], [then] I've seen [it], questions are seldom, seldom repeated.

Sahaja Yogi: Because once, *[UNCLEAR* on one side/when I was trying] to answer a category of *[UNCLEAR* human beings/maybe] but, Mother, I was, it was like you were like in front of a `turbulence'.

How do you say in English? It was like firing at you, tatatatatatatatatata, like this.

Shri Mataji: Brigitte, it's all right now. *[UNCLEAR* The questions are/First question is] over.

Sahaja Yogi: Yeah, yeah, yeah.

Shri Mataji: It's all right. But yesterday like the lady came to ask Me a question. See what a good thing. She said, “Mother, why are we on this earth?" It's a very different type of a question. What are we to do on this earth? Why are we here? [So] many different ways, of a question isn't it? [Very]...

Sahaja Yogi:... Yeah!

Shri Mataji: Very positive. It's just, “Do you think I have the Spirit which helps [me]?" Can I have a shawl?

Sahaja Yogi: Mother and we feel that in the questions, we feel the confusion. We feel the confusion of the people when they are asking You the question, because the confusion is taking the speed. How long I do the

development of Sahaja Yoga? And if the question is repeated, especially...

Shri Mataji: It takes some time. And I know some people are *[UNCLEAR]*, because you are all interconnected.

So whether you are awakened or not, I can feel it. The questioning and so far I didn't see that answering questions one could be very *[UNCLEAR* enlightened/important]. Very direct people.

And I had to use a lot of discretion *[UNCLEAR]*.

Sahaja Yogi: Mother, I [the original sin], you see, the first we discussed innocence and then ego.

Shri Mataji: But you can see God has given one thing to Sahaj Yogis: it's innocence. But if you want to know about how this world was created and the universe was created, isn't it? Let the child be born [first].

Sahaja Yogi: Yes, but then, if it is our curiosity that it was also the start of [our seeking].

Shri Mataji: No, first curiosity was there, but when you are forbidden to know. It is not...

Sahaja Yogi: What was forbidden? What was forbidden?

Shri Mataji: Forbidden that you should try to know all these things.

Sahaja Yogi: Just forbidden to try to know.

Shri Mataji: Of course, it was absolutely forbidden. What was the need? What's the use knowing all these things? Another Sahaja Yogi: Which things, Mother?

Shri Mataji: All scientific things, what was the matter?

Sahaja Yogi: Knowledge of Kuṇḍalinī was forbidden?

Shri Mataji: Yes, I mean, God could have given you everything. But [if] you, you wanted to achieve it by your

own [this thing and all], *[UNCLEAR* She/He considers, obstinacy that] you should know on curiosity. See, like a child is told not to go in the other room.

Sahaja Yogi: Nothing [we are having]. But then you could not say that that belongs to God. Then *[UNCLEAR* you won't trust Him to/you wanted us to do it], to find out.

Shri Mataji: No, first take the baptism. Freedom is first you see what you do, all right? And it's told that you must obey to Him. All just to enjoy yourself. They are nicely perceived, everything. They had a body, who could bear all kinds of atmosphere, everything.

Sahaja Yogi: But there was no way, no way of recognition within.

Shri Mataji: You see everything, they had recognized Christ and they had recognized God. They knew it was God. They knew it, [aren't they]? And they were proceeding and proceeding. With all that, everything is given, still.

Sahaja Yogi: I don't understand.

Another Sahaja Yogi: Now, in the beginning they were [realised all]...

Shri Mataji: Aā?

Sahaja Yogi: In the beginning it was realisation, [in the human starts].

Shri Mataji: No, no, they were not realised. They were human beings. But they had to grow in *[UNCLEAR* life/love], you see, in [inner] being as they don't go in for all these.

Sahaja Yogi: Stay in the middle.

Shri Mataji: That's why it is, you see.

Sahaja Yogi: Mother, I don't understand this because if they were not realised surely they were not fulfilled because that's...

Shri Mataji: No, no, [it's only] they would have been fulfilled. They were told that, you see, supposing now I give you a house, very big, everything, garden, you have no problem of money, nothing. You just stay here and enjoy yourself and grow. Have no complications. You have every freedom. And also told us only a particular thing you just don't do, that is to go into the inquiry about something. It means mental projections, simple thing.

Sahaja Yogi: Aha.

So the first thing is mental projection.

Shri Mataji: Of course, thinking is the main thing.

Sahaja Yogi: This I did not understand.

Shri Mataji: Yes, the mental projection in the sense that God has told us to obey Him. But they won't [obey]. It happens even in Sahaja Yoga. I tell you not to do it, but you just do it. And then you suffer for that.

So the other way was left, was to make them understand through their own sufferings.

This is specially, this is done as specially. Then all those things, you see, started off, because you went so wrong and everything. And then, you see, then it started that we had *[UNCLEAR]*. I mean He, He *[UNCLEAR* had no/could not] control over them, in a way.

Sahaja Yogi: Yes, it's true.

Shri Mataji: There was no control over human beings of God. [Is this] He could control them.

Sahaja Yogi: But then it is not the... What I was a little bit afraid, Mother, [it can sound] when we read the book of Genesis [it can sound like], I could never accept this story. Because it sounds like your seeking itself was a sin actually.

Shri Mataji: What was it?

Sahaja Yogi: [It sounded like if] seeking is a sin.

Shri Mataji: No, no, because the knowledge is confused. You see, a big confusion it is there. Then you don't have to have [Vidyā] also. You see, your Vidyā would have been given there.

So Self-realisation would have been there. What is the Vidyā needed? You could have come up. Now the Vidyā has to be there also because you have so many complications within you. You see, you can't imagine how terrible it is.

Sahaja Yogi: OK, good, without...

Shri Mataji: God has lost all control over human beings. They became ego-oriented, separated from God. They developed, developed their identities. Not only that; they created all problems for themselves.

Now, I mean to work it out. One had to do a very big programming for them to learn how to use their freedom. Now in their freedom how they behave? See, you can see it in Sahaja Yoga.

Sahaja Yogi: Yeah.

Shri Mataji: How Sahaja Yogis get entangled into their smaller things saying, “This is mine. That is mine. That is mine” isn't it? It's like that, whatever you may try. All this is, this is, actually the knowledge they wanted to know

was this knowledge. And there was no need for them to, [first they] get realisation, Sahaja Yoga. Nothing was needed. There was no need to have incarnations. They send incarnations to try.

Sahaja Yogi: That's why.

Shri Mataji: Because nothing else was needed. They were all ruined. You would have not seen Me otherwise also but without questioning of His work. You see, it is a very long way. And how many will not come. Then what a headache for God. I mean, the other[s] *[UNCLEAR* say/things] [need] tremendous patience. And still they are disobeying, are disobeying. Human beings are disobeying all the time. It's not only curiosity. It's also their own ego to tell other people this thing is done. Simple curiosity. And there is no way of understanding how they have to serve God. Why? I mean, imagine God's created them, told them everything and they have to just wait and see. That's all. No, but they must do something that is told not to do. It is a powerful story, but because it is so symbolical these stupid fools cannot explain.

These are another set of people who are just the same, part and parcel of the whole. Just dim style of a people.

So all this is disobedience.

Kṛiṣhṇa came, said, “Sharanam, Sharanam Mamah, Sharanam Mamah, Sharanam Mamah” you see.

Buddha came and said, “Buddham Sharanam Gacchāmi" is this, this is. Everywhere is surrender your ego. Surrender? Why to surrender? “We are great, you see, created by ourselves." Ego is tremendous. I mean, only a Mother can see that and then bear it. And despite all that, God tried to save you because [God does that].

So supposing you want, you are given this house. What is the need to know from where it has come, so much *[UNCLEAR* money/planning], this, that? What is the need? Suppose the [carpet] is there. Why? God is not that. They don't tell us. Their heart if they would have had God there, obeys.

Obedience of a man. Then they *[UNCLEAR* know/get] the response.

Sahaja Yogi: What's wrong with that?

Shri Mataji: They are weak. With your brain you cannot know. You really have brains; that's all.

And imagine the tremendous amount of trouble God has *[UNCLEAR* to take/get].

So see the extremes, the religions, this religion, that religion. Then you see how human beings *[UNCLEAR* have been/are] doing really stupid things throughout the seeking. When He has given you everything, what was the need? I can understand one [argument maybe] but you can't take them also because *[UNCLEAR* there is/they did] a little bit progress, the [others with the] whole mountains and mountains they have created out of ignorance. Because the more you think, the more ignorant you become of God. It's very, very symbolic, but the trouble with Bible, you see, is that was a very abridged form, you see, the whole thing.

And because of that [you just], all the small necessary things I just spoke of them, unless and until you *[UNCLEAR* project/forget] it, all the time, [then you cannot see Bible].

But I didn't talk about this before much because, you see, that *[UNCLEAR* would/could] make people *[UNCLEAR* think/feel] so again doing all these, again doing all this nonsense and feel guilty and [say nasty things]. A man, it's like a bull, you see, who gets adamant, obstinate. While he's running he is horrible. When he stops he is horrible; no control.

So according to the plan it's gradually I'm opening My heart. I mean, saying what is the truth behind the Sahaja Yoga. I mean, this is the effort of God, you can say, the effort of God, how patient He is. And anybody who was sent here, to tell you anything was killed. Why? Anybody tried to control or say, “Do this for God” was finished. Disobedience was not only there, but also arrogance is also there.

So when I tell to these English Sahaja Yogis, “You must meditate every day, do Pūjās, this thing, that thing. To say that, you have to surrender also." Ādi Shañkarāchārya ultimately gave up. He said, “Done, Baba, finish[ed] with these intellectuals.

So I am just going to sing *[UNCLEAR* a/the] praise of Mother that so that She comes on this earth and solves the problems for all of us." He wouldn't go into the, anymore, [well], worry of convincing, people. Got frightened. *[UNCLEAR* `Cause/Because] if Mother comes She solves the problems. It is their work you see, their work. Everybody gets. If you see their lives and the *[UNCLEAR* end/error/enemies] *[UNCLEAR* they/people] get.

Imagine killing these people; so many [wrote the Scriptures] doing this, doing that. And on top of that when they are dead making big, new, organizations, all

these organizations and then using those organizations to fight each other. I mean, it was supposed to lead you to [search God]. Absolute stupidity, I tell you, absolute stupidity. That's what I thought. But not [what], [you shouldn't say]. I say so. I say that it is stupidity because still the [game] it's not over. Let us try the last chance. If that is so, then you must all understand your responsibility as Sahaja Yogis. You must understand your responsibility. Forget about your personal life. This personal, forget it. How much time you think about your personal life? You have to have a big vision of yourselves. See now how what you are and what's important. Otherwise, when the other force will start you'll be thrown out. All this stupidity. It's all right. You should worry about the present, not about anything else. Couldn't be in *[UNCLEAR]* daily circumstances, you see, *[UNCLEAR* when/then] they get involved, little [localised] things. And then from there they start [pumping]. What to do? It's so, the times.

I say because I can't stand it.

So finish this nonsense. Let it be finished. All the time you have to appease them. Appease them; even Sahaja Yogis I have to appease. I can understand you see My family if I have to appease them because [they're My family]. But here the Sahaja Yogis also take Me to dust absolutely. And then the questions like the one people ask, “How is it I am a still suffering so much?", “How is it this is happening?" Are, what have you to ask [this question]? You have only gained out of it.

But you've seen the expanse of Sahaja Yoga also. Such a thing occurred, historical, such a great thing.

Even, I mean, ego, if it is there, is the greatest satisfaction for the ego even. I mean, it's a temptation for the ego to take a jump at that big *[UNCLEAR* issue/vision]. But if that's not even there, the ego, it becomes superego then. Depends on. See, human beings are unpredictable. Worst of all, you can't say whether they'll act *[UNCLEAR* like/as] scorpions or they can act as snakes or as the wild [boars] also.

You just don't know how they act.

Ha, I'll first talk to you about [deities], what are the deities.

So you put it off.

Sahaja Yogi: Now, it's all these, Mother?

Shri Mataji: See all the Shaktis, now. Rādhā and Kṛiṣhṇa. Rādhā and Kṛiṣhṇa. But Kṛiṣhṇa is the One which is apparent, [Hindi], *[UNCLEAR* was apparent/Rādhā] you see. She is the Shakti Virāt. Like the Mother Earth is the Shakti, isn't it? She is the Shakti. But Gaṇeśha is the one which *[UNCLEAR* is innocence/respects]. She sits behind. You see, even if you see Me I give you the Śhraddhā. I have all right, of course many powers, all *[UNCLEAR* powers/powerful] of the deities. But I do not play that role of being an all-powerful. I never order you [about ganas]. Nothing. I may be behind your powers. I mean, what I'm worried is that you should have your powers.

But the women here are, either they are half *[UNCLEAR* way through/baked women], neither women nor men sort of a thing, or they are men. They are not what they should be like women.

So their personality is very horrid. They don't know their role. I mean, if somebody comes to your house I've seen, if the woman of the house is cooking or doing anything in the house, if she is the one, she just tries to be stingy or this, this some sort of a thing she'll do. She will not open *[UNCLEAR* hand/heart]. You see an Indian woman; she'll cook ten things in the house, to see that the, she'll look after the guests. I mean, she'll go all out to [do it]. It's a very different situation. I do not feel welcome in a Western house, I really tell you.

I am not surprised but it's all right, Sahaja Yogis. It is all right. But if you go to any Western's house, see Gregoire, it's impossible. C.P. will never stay in a Western house. You may give him *[UNCLEAR* whoever will invite/whatever you like]. He would prefer to stay in a hotel there because, you see, if C.P.

will see the face of the person, they react in such a way. He saw people are trying to create some fuss or they'll create some problem or they'll show such a face that the another person doesn't want. I mean, they are not shameless; they are shameless people.

I went to this lady's house. I mean an Indian woman. Now see, you have seen Me how I work with that. Every lath of the house I know; every hold of the house I know, every arrangement also of the house I know, everything I look after and neat it. My husband is just like living in a hotel, sort of, if you go and ask. He doesn't know anything what I have got, where I have got, what are the, everything I know of My house. And I do everything in My house, decorating, everything. Now, you've seen My husband.

He doesn't think. Now if I go out I'll worry about what to buy for My guests who will be coming, this is lacking in the house. My husband does not bother. He's not bothered what I am going to have. He doesn't know even what things we have in the house. I bother about everything because it is My job to look after the guests, to make them feel comfortable, to make them feel happy. Here the women only have rights, no duties. This is the best part of it. They have only rights, no duties. Then how can it be? How can you make them understand? This love, love is just, just talking nonsense. Giving love means only showing off, put your hands round their necks and to caress, all nonsense about. It's you, it is nothing but just hands. It doesn't mean anything. If they wait for a year or so this Annapūrna Shakti come out.

Then they get a shock. Better to marry again for the other sensations. It's not reality. It's not true love.

It is a very demanding. True love never demands anything. Doesn't demand; doesn't demand anything.

It gives; it gives, you see. And then as you give, others respect you, understand you, this and that. But this is not only you keep demanding, `Bring this for me. You must get me. If you haven't got a Coke for me then you are the worst person,' isn't about that also.

Sahaja Yogi: [False Guru].

Shri Mataji: But here women *[UNCLEAR* make/have] too *[UNCLEAR* much/many] demands.

Thank God, in India we have still preserved everything, the duties. Woman is so beautiful. I mean, it's such a joy for them. *[UNCLEAR]*. People are coming to [see] her so.

She, she goes out of the way, to the market to get things everybody rejoice. You see, it's a thing of joy for them [about it]. And this lady, you see, she made all the Sahaja Yogi[ni]s clean her bathroom, do this, do that. I saw her. What's her name? Poor Malika was working like a servant in her house, first day in the house. Even Natalie was cleaning the bathroom and you see they become like owners of the house. You see, suddenly they want to grab. “This is my husband, my family, my house." And no duties for the house, nothing. First duty is how you serve your guests, how you look at others. You see, because your husband has got a personality which involves other people.

As I said [about image] that he is not a grown-up. You can see his image as somebody, as a leader, or a Sahaja Yogi. All right. What are you doing to support him in that image? As Mathias as he [got leader], he was no more in the eyes of others. All right, he was later a Sahaja Yogi. That, that's no worry. What is it? Nothing much. Now he has a certain image. How are you going to support him in that image? Are you rejoicing about it? Are you happy about it? If so, what are you doing about it? It's, you see, then whole *[UNCLEAR* Pūjā/thing] all the time when some way or another is to be done, then they won't tell him it's wrong because mothers are doing like that, as they are.

[MISSING.] Tell Robert... [GAP] It is not a life of humiliations. This is they should understand. You see, this is not the life, but your position in life, it's like this Mother Earth. You are so powerful that you are the giver. Only the person who has can give. What can your men give? Only the women can give. They are the Shaktis.

So for a Shakti there's nothing like humiliation. See, she has to give.

So the life of humiliation and all that human talk of because they lack something within themselves. You see, you do not take, assume the power what you are. Logically you are humiliated. If you assume your power as the person who has to give, then you'll be surprised. You'll be respected the most. And the family will say, “There's one woman like that." Everyone respects her. Everyone say, “She's such and such." So it's like a, as I think Rosemary or somebody said, that an Indian woman is like an Indian flower of magnolia. I don't know, in India I have to have a magnolia flower, that wherever it is, from a very distance you can smell it, that there is an Indian woman, in her poise, in her dignity, in her decency, in her decorum, in her Dharma. She, in India, the women are Dharma, not the men's quality. Women are Dharmic. They are the *[UNCLEAR* givers/preservers] of morality.

You'll seldom find a woman in India who is not Dharmic. Men can be adharmic. They can go on to all sort of things. They get disturbed. We don't even know to what extent they can do it.

Some of them are horrid men. But women, you know, they have Dharma. And on that point they fix the family.

Now some people say that, “Why should the women should be Dharmic? Why should she take this?" Because she's appointed for it. Now supposing a person is appointed for a job and he takes bribes. Then? He takes bribes; he's punished, because he's appointed for that job. In the same way, a woman is appointed for Dharma.

And if she's appointed for Dharma and if she doesn't know how to keep her own Dharma, then soon it's [to be] taken *[UNCLEAR* from her/for granted]. Men won't be. Men will be punished for other things if they take something in the political life or in their, their official life or something. But women for Dharma. And this is a big problem. The inner strength of women is not developed. Outer, that you see they'll have ten types of cosmetics, this, that. The body should be nice to attract the men. All the men of the world should look at them, you see, put a sort of a, all the time an image like a prostitute walking on the streets. Everybody must look at you as if you are selling your body. And the whole system it's like this. In India if you are coming it's just the other way round. A woman will cover herself very well.

You see, if she sees somebody then she gets covered her whole body. Or she'll put a palu on her head, get covered. If it is in the north also they cover heads. But in Maharashtra, in fact, immediately it, if they think a man's coming they'll just cover their heads or cover their bodies. Here there's other way round.

The men will bother themselves. What is there for men to bother yourselves? Whole thing, the whole system is like this. I mean, all this life, on Dharma, you are all right for the political, economic things like this. You have better telephones sort of things, but look at these things. That's also done for, by men because men are like that. And they could be womanish if they are enslaved. Then they are not men.

Then they are not men. They do not have that position.

So this kind of a thing, of course, domination and all that, we always talk of. Now, I mean if you ask an Indian women, “Are you dominated?" they'll say, “No, we are not *[UNCLEAR]*." Even [at any cost]. Then we are protected. You see, once we develop one idea that we don't want other men to use our chastity, the whole system changes. We want to be protected.

And now, you see, I'm in the house. If I am not travelling, if I am not going out anywhere for Sahaja Yoga, I'm just sitting at home. I don't go out anywhere. Nowhere. You just see; I just don't go out.

People will just walk out, just *[UNCLEAR* for/sort of] a walk or stroll. I don't. I never even go to any garden or any place. Ask Gustav. He has been telling Me, “Come to see these flowers” and I said, “Let C.P. come. Then I'll come." Just no desire. When you all are there, all right, with My children I can walk around. With My grandchildren I may go to take them [with Me out of the house]. But, you see, to enjoy luxury, nothing, I have nothing to gain. What is there to gain at all? I am happy *[UNCLEAR]*. But just to please you to go around with you, it's all right. That's only for children's sake. But unless and until you develop that [witness] among the women, they won't strive, not *[UNCLEAR]* won't come. It's something that is imposed by men also, because the other men, you know, they run after horrible women and your idols are like that, you see.

So it's a prostitution. It's a, absolutely is the way you look at your women is. If they start looking at women who are more attractive, this, that, so your women try to be like

this. And this transition is there. Once the Sahaja Yoginis understand they will change themselves.

Either they look like [bhooties], that they are the worst and the most unhappy women, or they look like the *[UNCLEAR* smartest/smarties]. It's one of the truth. Looking like anyone, that's so easy. I don't know, it's a very different thing and it's the only women who can really sin. But when will they be obeying? Because their ideas about womanhood are very second-hand, because they are not their own ideas. The ideas come from men. Whatever is projected, tomorrow if a woman wears, say, a big tin on her head and every man starts looking at her with that tin on her head, then all the women will wear a tin and a bun like that. There was something called bouānt. I don't know what was that called as bouānt and that was just put on the head, some sort of a thing and on that was [built in]. In India is a very common [word such a] bouānt. There's a very nice picture about it. *[UNCLEAR]*, it's a very sweet picture. You should have that, how……

***Contents: 1982-09-30*, Public Program, Day 4, Viśhuddhi to Sahasrāra, Vienna, Austria**

I bow to all the seekers of Truth. In My last lectures I've been telling you about these centers which are placed in the lower part of the body. Today I would like to cover the rest of the three centers which lie here, here and here. These are very important centers for human beings. When man as a human being raised his head up, this center established a new dimension. This center is called as Viśhuddhi Chakra.

And this has got sixteen petals which manifests in the sympathetic or the parasympathetic nervous system sixteen plexuses, which looks after our eyes, nose, throat and our tongue, our eyes, part of the eyes and the whole expression of the face. When man is ego-oriented, he puts back his head like that. And when he's superego-oriented, he puts down his head like that.

This center is extremely important for human beings and for Sahaja Yoga, because the hands play a big part in Sahaja Yoga. To get a universal language we have to use our hands, that is the best, for say, for people who are blind, who are deaf and dumb, best thing for them is to use the hands.

So these hands, though we express ourselves by moving fingers and gestures, are still not enlightened. When this center gets enlightened then these hands become enlightened, too. This center has two sides, one on the right and one on the left. The left side center is caught up when a person feels guilty and obstructs the ascent of the Kuṇḍalinī. That's why I always request all the Western seekers first to say in their hearts, `Mother, I'm not guilty.' These are the conditionings that have come to us from so-called religions, from so-called psychologists and other people who are responsible for our development in our childhood. When material things were very important for the parents, they all the time shout at children or correct them, saying that, “Don't spoil the carpet, don't spoil that, don't spoil that." And that is how we develop a kind of a guilt within us. When we grow up in the schools and colleges, this can be built up very heavily within us, too. Education has to be

imparted to children with great love and understanding. There's a big feeling, especially with the people who are very developed that children must be controlled by brainwashing. But this brainwashing results in this funny trouble called guilt.

In the same way the psychologists who discuss this subject of guilt are really not understanding the effects of this kind of a discussion. These psychologists, when they talk about the trouble of guilt, they do not know that these are pathological cases. This is not normal, this is abnormal case. But if you start discussing about these abnormal cases in a general way, it becomes a general disease. They themselves work with the sick people, who are possessed and they have no way of protecting themselves from these sick people. That is how they themselves become sick. And then once they develop this sickness within them, they start generating it on a larger areas by saying that one develops a guilt and this happens with guilt, that happens with guilt.

Now God has created human beings in His own image. There is no need for human beings to feel guilty for nothing at all. If these human judges have not been able to find you as guilty, how can that judge, who is nothing but compassion, will brand you as guilty? You have come from amoeba to this stage and God has created you as the epitome of the whole creation. And now at this stage you start feeling guilty.

When He wants you to adorn the seat of your Spirit at this great moment, you are becoming guilty, just very disappointing, the whole thing is extremely disappointing. [Laughing.] All these evolutionary things

have happened within you, not to make you feel guilty. It would be like a prince who is now to be anointed as a king, suddenly stops, says that “Oh, I'm guilty, I can't become the king." Self-pity is worse than suicide.

So the right side problem is just the opposite of left side. That is a person who talks with aggressiveness, who has a personality that he talks in such a way that he impresses people and puts them down. Such a person develops a very harsh and a dry personality. I know of a dentist who came to see Me. He was a dentist, but he told Me, “Mother, I have lost power to smile even. I can't smile now. My muscles do not go into the mood of smiling at all. I have become so feelingless that I cannot smile, nor cry." So he went to some saint, so-called and the saint said, “Oh you have gone beyond everything now." This is the wrong idea we have for people who are very great in spirituality. Such a person has to be an ocean of compassion, ocean of love and ocean of forgiveness. Above all, he should be able to give joy to people and not miseries. Normally wherever I see a painting of a saint or a statue of a saint, he looks the most miserable to Me. Wherever the some artists, architects have carved the popes and the bishops and all that, they look so miserable that nobody would like to take their place. [Laughter.] Sometimes with these aggressive people, as a result of their aggression, also develop the left side because they feel guilty the way they have talked to others. With this you develop problems both the sides of the center if they are in imbalance, you develop a center into such a way that a physical problem called spondylitis can develop.

If you feel guilty or if you feel aggressive, both ways it can work out. Specially if you feel guilty, then also a heart problem called angina, sort of a thing develops. And also you develop a stiff left hand with that.

Now in short I have told you about the Viśhuddhi Chakra, because we have to cover three Chakras and I want to tell you today about the Spirit. Above that is the center of Āgñyā. Āgñyā Chakra lies in the region of pituitary and pineal body. It is placed exactly in the center of Optic Chiasma. One of the windows of Āgñyā Chakra is shown here on My forehead with this mark and another one is at the back of the head.

Now this center is also extremely important because it controls your ego and superego. This is the center where Jesus Christ, our Lord resides. Many priests have been shocked when I told them this. But His cross is symbolic of this cross where the ego and superego cross each other and are extremely close. This is the place where Christ was to be placed and bestowed upon and this was to be accomplished by His crucifixion so that His subtler body enters into that area of our awareness. When Christ said on the cross that, “Now it has been established” He meant to say that this accomplishment is the establishment of Christ in that center, which is very, very subtle and difficult to enter into.

He was, His body, only His body was made of the vibrations that you feel. These vibrations are called either Om or Chaitanya in Sanskrit language. When He is just made of that, He could walk on the water.

The other day somebody told Me that Christ has been born somewhere and now He is going to come on the TV.

[Laughter.] So I said, “Better ask Him to walk on the water and then you'll find Him." Now, this establishment was important and at the time of crucifixion, when He was in that state, He said only one sentence, which shows that something was to be accomplished by His crucifixion. “It", He didn't say everything is accomplished, He said, “It has been accomplished." He has talked of the future about Holy Ghost, that everything will be forgiven whatever is done to Him, because done in ignorance, but nothing against the Holy Ghost will be forgiven. He said, “I'll send you a counselor, who'll explain everything to you. I will send you a redeemer, who'll redeem you. And a comforter, who will give you comfort." The third thing He has said that, “You are to be born again." He's the only one who said this in the whole of Bible, Moses and all these people, it is He who said that, “You are to be born again." Because Moses, as I told you the other day and Abraham were busy establishing your balance in that green part of the body. But this awakening of Christ within you, the awakening of your power as a second birth was only said by Christ.

So we started giving baptism to people. You get some water from somewhere, appoint somebody as a clergyman, put on the head of a person and say, “You are baptized." It is such an artificial thing because there is nothing that has happened, just you have put some water, anybody can do it. But to get baptism, you have to raise the Kuṇḍalinī to break through.

Christ didn't say that, `You take water and put on somebody's head,' did He say so? But a second birth has to take place. And the second birth, birth itself means an

evolutionary process, or you can call it a living process has to take place. In Sanskrit language a bird is called as Dvijaḥ and a realised Soul also as Dvijaḥ, means twice-born. Like a bird is an egg, first of all, then he grows in that eggshell and then it matures, it breaks through and it comes out as a transformed personality, as something else, absolutely something else from the egg.

On the Easter day we give people eggs to remind them that, `You are egg now and you have to become the bird.' But I don't think people know that, because resurrection is the message of Christ. Crucifixion is the accomplishment, but Resurrection is His message.

And the way we are making Christ look so miserable is something I just can't understand. They just show the skeleton of Christ hanging with a skin there, can a skeleton carry such a big cross? Michelangelo was another realised Soul who painted Christ like the way He was, a huge person, person who was healthy, full of vigor and joy and not a miserable pitiable caricature. I think people who are sadistic enjoy this kind of a thing to see somebody miserable. Perhaps that is the reason because just below that I have seen a miserable looking skeleton put there as Christ on the table. Spiritual life is not misery by any chance.

It was a thing of great pride that Christ came on this earth because when He's awakened within us at this point, He sucks in the ego and superego. That means He takes away all our conditionings and our actions, the Karmas. That means in the Christian words we can say He sucks away all our sins. He has died for us.

He has gone through all the miseries. He didn't leave any misery for us to go through. There is no need for anyone to be miserable now.

For example, Jews said that, “Oh we...", they denied Christ and that's how they said, “Oh we must have miseries. We have to suffer." So they suffered nicely. When Hitler came in, he made them suffer.

That's what they were thinking was religious life, was that? And today the same people who suffered have become the other side of it and they are doing all kinds of things without any relation to their religion.

Because the greatest of greatest Commandment is, “Thou shalt not kill." And then how do you explain this Christian militia in the name of Christ killing so many helpless people? Innocent small children, women, for no crime of theirs. In the name of God, in the name of Christ, in the name of Mohammed, these people are just using their sadism. Where is the word that is said as love and compassion of God? Mohammed has talked of *[UNCLEAR* Rahamat], all the time of *[UNCLEAR* Rahamat], he calls God Rahim. *[UNCLEAR* Rahamat] means compassion, Rahim means the embodiment of compassion.

One can't understand these nations, what they have done of God and these incarnations, nobody can explain. Those who followed Buddha, like Japanese and Chinese, what are they doing? We have some followers of Mahāvīra, they have become such extreme vegetarians that they try to save mosquitoes and all little worms on the street. They are so stupid that they make some bugs to suck the blood of a realised Soul so that the bugs will get realised. [Laughter.] This absurd vegetarianism, one

should understand are we going to give Realisation to chickens? [Laughter.] We are more kind to animals and to our tables and chairs than to our own children.

Human beings are going in the wrong direction. The right direction is to be in the center and watch for the Last Ascent. And when the Kuṇḍalinī rises She takes you through this gate of Christ, through Him alone it takes. That's why I said through Him everybody has to pass into the realm of Kingdom of God, which is the Limbic Area within you.

The superego and ego represent your past and future. A thought rises and falls off and another thought rises and falls off. One is a past, one is a future. Our mind jumps on the cusp of these thoughts. We have to be in the center of these two thoughts, which is the present, we have to be. But just by giving lectures and saying, “Now you be in the center” you just don't become. By giving lectures or giving badges or starting organizations or having some sort of a postcard with you attached on your head, you don't become that. All honest seekers must know that this is all outside, it has nothing to do with inside. If you are true seekers and know that all these things are ego-pampering and is very misleading. It is to be understood in its right perspective, in the proper wisdom of a human being.

Now when you cross through your Āgñyā Chakra you become thoughtlessly aware, because you establish your attention in the present. But again I have to tell you one thing that this is not a myth, it is an actualisation that has to take place, it has to happen within you. Your awareness has to be enlightened.

It is not just saying, `I am an enlightened being,' giving a false certificate to yourself. Then the Kuṇḍalinī passes through the last Chakra of the Sahasrāra, 1,000 petals and opens out into the subtle energy of God, His love and His compassion. At this time, you are thoughtlessly aware, but you are in complete state of bliss and relaxation. You feel the All-pervading power for the first time as Cool Breeze. This is the Cool Breeze of the Holy Ghost described in the Koran as “Ruh” in the Indian scriptures as “Chaitanya Lahari” means `waves of consciousness'. We can put waves of enlightened consciousness. There are books and books written about it in Sanskrit language, but they are not translated.

Some people who went to India to study Sanskrit, they were only interested in the loopholes of the culture. Like a thief is interested in all the weaknesses of a bank, they went there to study what they can get to support their weaknesses.

In the late 6th century in our country, a big revolt against God broke out as Tantrism, where insulting the deity and, unholy behaviour became the signs of Tantrism. They behaved in such a manner that the, with the repulsion the deities disappeared. And they created an area around them where they could get all the negative Satanic forces to handle. This is called as in Sanskrit language as bhoota Vidyā, Preta Vidyā and all that which in short means the knowledge of the cemetrey.

[Aside:] Please don't disturb others.

Now this Vidyā was practiced, this science was practiced by people who wanted to entice and hypnotize people and make money. But the people who went there only

studied these erotic and dirty things, which has no meaning to the philosophy there. I went to Nepal twice with My daughters; we never saw anything wrong there. But then one of the Sahaja Yogis told Me the Nepal is filled with these, the erotic images.

I said, “Where are they? I can't see." “See there” he said, “on top of the temple." All these Japanese had their zoom lenses put up there to see it. [Laughter.] They had brought special type of ladders, you see, special type of ladders to climb up, to take the special photograph of the special brains. [Laughter.] And the Nepalis told Me that these stupid people are doing [laughing] something so unholy and unsanctified.

They have no sense of holiness. And I said, “That's not so. They have, but they have lost it now, they can make money out of it." But they were surprised, they said, “Who is going to buy these inauspicious things in the house? They'll bring all bhoots in the house." But these Tāntrikas had convinced these poor artists that you make such statues on top of the temple so that the Goddess of thunder is a virgin and she will get, she will never come near this, because it's so dirty, you see. [Laughter.] So, one has to understand that God is purity, He is sanctity and He is holy.

Now, with this idea, now I'm going to tell you about the holiest and holiest that resides within you, the beauty that is within you, the bliss that resides within you and the light that watches you. It is your Spirit. It is a reflection of God Almighty in your heart. And the Holy Ghost is the power of God Almighty.

God is the witness of the play of the Holy Ghost. Christ's Mother was Herself an incarnation of that, but it was not mentioned in the Bible because if these Romans or Jews had known that She is the one, they would have cut Her into pieces and attacked Her.

So, it was not said because Christ had to play this drama of crucifixion. But you can find out after your Realisation through your vibratory awareness that whatever I'm saying about them is absolute truth. Because your Spirit, which is the Absolute, gives you the absolute answers. It doesn't give you relative answers. It takes you out of this relative world. And you know the absolute through your new awareness, which is vibratory awareness; we can say the sanctified awareness, the holy awareness. When this Kuṇḍalinī rushes through this point, She enlightens the Spirit, because the seat of the Spirit is here. In our brain, all these seven centers are placed like this. All the seats of the centers are in the brain.

So, when the Kuṇḍalinī comes out of this center, all the centers get integrated, because the Spirit integrates you. Like in the room, when you have no light you are fighting for different, different places, different, different things. But when there is light, you know where you stand with what.

So the relativity is dropped out.

But when you become the Spirit, your attention gets enlightened into collective consciousness, it becomes, because this Spirit in you is the collective being. Everybody's Spirit is connected with each other. It gives a message which is the collective message. Now when you place your hands towards yourself and try to find out

by putting your Aura into a proper bondage, then you can find out about yourself. If it is a physical and a mental imbalance, then the right hand shows on the fingers different centers. And when it is an emotional problem, the left hand shows. All these vibrations you receive there in sensations are decoded and you can verify everything. Sitting down here, you can feel the vibrations of any person.

The other day I said that Mozart was a born realised.

So they said, “How do we know?" I said, “Just put your hands and think of Mozart” and immediately tremendous vibrations start flowing. When such realised Souls play any music or paint any paintings, for a realised personality it is the greatest source of joy, because you don't think about it. But the essence of the creator of that joy becomes one with yours.

You feel the bliss flowing in you. And you enjoy it only for joy's sake because Spirit is the joy within you.

Spirit is the joy, means it is neither happiness or unhappiness, but it is single thing, is joy. Happiness comes when your ego is pampered and unhappiness comes when your superego suffers. You get out of the duality of these two and you become the joy, which is singular, which is because you become the witness of the play. No more you are in it involved. Supposing you are in the water, then you have the fear of the drowning, because you see the waves around. But supposing you get into the boat and are established; you are established in the boat then you enjoy the same waves. That is the mastery you have to reach.

Another very gross simile I'll give you, but don't carry too far with your mind. In a car you have a brake and an accelerator. In the same way we have the accelerator and the brake. The human driver tries to balance both of them. Then he becomes the expert driver. Then automatically he drives. Now the master is sitting at the back, that is the Spirit. Then this expert driver becomes the master and sees the driver in him drive. Now, when you see yourself as a third person, you are not involved in the joke. You must have seen some little children talk like that in a third person. Like they'll say, “This John will not go there." These days there are so many realised Souls born in Europe and England, America that we must get Realisation to look after them. There are great saints born on this earth. They talk another language of vibratory awareness. If they have a problem, they suck the finger to suggest.

Many saints want to be born. But in the countries where the children are not understood and respected and loved, they avoid it. All the Sahaja Yogis who are married now have got great saints born to them, tremendous people. That is how I would request you, all of you, to know that the time of Resurrection has come, the time of your judgment has come. That many people who asked Me one more question all the time that, “What about cleansing ourselves before coming to eat, we are not yet ready." You don't have to judge yourself. You have done all these things in your previous lives, you don't have to do anymore now. Apart from this, we have to know that the one who has created this universe is much more worried in saving this creation. All His aspects are busy

there to help you out if He has to save His creation. He has to save human beings. And this blossom time has come where many flowers are going to become fruits.

Sahaja Yoga has been there since times immemorial. All those who got Realisation got through spontaneity, there's no other way out, as every seed gets germinated through its living force. But on the tree of life, there were one or two flowers to begin with. But today there are many flowers.

So it has to be an en masse happening. Many of you who have been to India with Me have seen thousands of people getting Realisation, because in the villages there are people who are not so complicated. And it will happen to so many people on this earth.

A lady interviewer asked Me, “How will it go to people whom You do not meet?" It is very simple because when I was in Hong Kong, the lady who owned a television asked Me to stand up and give vibrations to people. And in that horrible, busy city many people got Realisation through television.

The science has developed so many things like a camera which can take a photograph and which has the vibrations. There are so many ways we can spread it much faster than Christ could have done it, or anybody could have done it in these modern times. But it is difficult because it is becoming. People like a convenient type of a Yoga. If you tell them to stand on their heads they're happy. But if you tell them just, “You have to put your hands” they just don't understand. But all the vital things of this world are done so simple, in such a simple manner. Apart from your evolution, your breathing, your

seeing, everything is so simple. It is so vital, so it has to be simple.

So people who like to have lots of mental fits with Sahaja Yoga find it difficult to accept. I do not say that you close your brains, or on the contrary, open it, completely. Logically reach the conclusions, not blindfolded, not blind faith. But once you have come to logical conclusion, you cannot do with this limited brain because you have to enter into the unlimited.

And for that we have to leave this limited behind. But once you get enlightened, everything becomes logical. You can verify everything. It is so simple, like to the blind people, we cannot tell about the colours, we can just say, “All right, let the eyes open then you can see." And that is what is as simple as getting Self-realisation. There is no danger, no problem.

May God bless you all! Today is the last day and I thank you very much for giving Me this opportunity to be with you all, such great seekers and I'm sure next year again I'll come. Even if you don't get your Realisation today, you will all get it, we are going to start a center here and we already have a follow-up meeting. As there is no money involvement you people have to organize it yourself for Vienna and Austria. And it is your own lookout. But you all can write to Me in London all your problems.

So, may God bless you! Today is the last day and if you want, you can ask questions for about five minutes or so, but better is to get to Realisation.

You people can come here on the staircase.

I think some can come down because there are some more coming in. Come this side, please. Don't stand in the door, come this side.

As I have told you that this is your own. This is your own property. It's just an enlightened light can enlighten another light. There is no obligation of any kind. As if on My finger is paining and I rub it, there's no obligation on My finger. As you are not the other, there is no other for Me.

So if I am just pressing My finger and comforting it, there's no obligation of any kind, I better do it.

Now, whatever I just tell you, please listen to Me and cooperate with Me, that's all. First you must know that you have to have a cheerful temperament. There is nothing to be serious about it nor to be frivolous, but be cheerful, because you are going to have the last ascent now.

Now, you put your hands towards Me in a very relaxed way, keep them on your lap, but before that you better take out your shoes, because they are tight and they stop the connection with the Mother Earth.

Also you can loosen if there's something tight in your neck or on your waist, if there's something very tight, means you should be comfortable. Or if there is any heavy necklace or anything, something that is weighing on the Chakras, because very subtle thing it is. You can take out even your glasses, will be all right.

Now everyone has to do it. Those who are not going to do it should go out. Everyone has to close the eyes. If somebody keeps eyes open, it disturbs the vibrations, so

I request you in the interest of everyone be civil and you better go. You have to be also kind to yourself.

Now, please close your eyes. And do not put any pressure of your attention be taken to any place. Just leave it loose. The concentration and all that is not to be done at all anywhere. Just leave your attention absolutely loose. Let it think, let it do what it likes. Don't put any pressure on it, just now. And now you should know that the left hand of yours is the expression of your power of desire. And the right hand is the power of action.

So we have to use the right hand for the action and left hand is kept towards Me, little stretched out fingers. And keep your hand very relaxed.

Now, the right hand, as I've told you, that first we have to get rid of this so-called guilt-business from our minds, so it should be put at the left side of your neck, from the front side. But don't open your eyes and keep the left hand stretched towards Me straight, but on the lap. Now, by putting that you just say, `Mother, I'm not guilty.' Please say it again and again, `Mother, I'm not guilty.' That is important because that is one of the big problems in the Western countries.

Now you put your right hand on your heart. And say, with full understanding and with your heart, ask a question, `Mother, am I the Spirit?' Ask the question three times. On the heart, little higher it is.

Heart, is little higher, yes. Ask a question thrice. Because you are, but just ask a question.

Now please put your right hand on the left side of your stomach. And ask a question, `Mother, am I my own master?' Say it ten times, please. `Am I my own Guru?'

just ask. If you have Gurus or anything, if there's any conditioning, that will drop out immediately because you are your Guru. You don't need any Guru at all. When you become the Guru, you don't need the Guru at all.

So please ask with full confidence.

[Meditation is interrupted as someone wants to leave the hall.] What's her name? See, this is the negativity, what is the need? The wife is not going to be killed here.

This is how they attack, you see? Better go now. Tell your husband to behave himself. You can't disturb, you see. Let her go away. This is the thing, they are not civil even, they are not civil people. How can they get Realisation? Very uncivil.

All right, doesn't matter. Forgive, forgive, forgive. [Laughing.] Put your right hand again on the left side of your stomach and say ten times now, `Mother, I am the Guru.' Now say please again, `My only desire is to become the Spirit. My pure desire is to become the Spirit, to become my own being, to become the Self, to become the Absolute.

So let it manifest.' Now put the right hand again on your heart and say, `Mother, I am the Spirit.' Say it with full confidence that you are, believe Me. Put your feet straight on the Mother Earth, touching it straight, you see, don't push forward your legs. Those who are sitting on the floor are all right; they don't have to worry.

So now on the heart you put it and say, `Mother, I am the Spirit.' Say it twelve times.

Don't feel guilty. Please, this is the only snag you have, all of you is that you are feeling guilty while saying it. Be

confident, I'm saying you are the Spirit. Why do you judge yourself? Let the Divine judge you.

So just say, without feeling guilty. All right, without feeling guilty say that, `If I have done anything wrong, forgive me.' You can say this to God, `Oh God, if I have done anything wrong, please forgive me.' Without feeling guilty, because to take out your guilt I am just saying this.

[Aside:] Better. Better. Still there.

Now please put the right hand again on the left shoulder near the neck. And again say, please again say sixteen times now, `Mother, I'm not guilty.' Please say it. With no pity towards yourself, but with confidence.

[Aside:] Hm, better.

Now put your right hand on your forehead across and press it. Press the upper line of your hand, across. And say, `Mother, I forgive everyone.' [Aside:] Much better.

Now put this hand on top of your head, on the fontanelle bone, where it was a soft bone in your childhood and try to feel the thickness of your head in the central part of your head, backwards, forwards and try to press it. From the base of your hand you can press it, with the base of your hand you can press it. Try to press it, you can do it yourself. With the base, with the base of the hand. Now, very good.

Now put the hand on top and see if there is Cool Breeze coming. Now you have to say, `Mother, I want my Realisation,' because I cannot cross your freedom, you have to ask for it.

You can change over your hand. Put the right hand on your lap towards Me and the left hand on yourself. Move it up and down to see there is Cool Breeze blowing. You can go on changing your hand to find out.

If there are journalists in this group, I would request them to take their Realisation, otherwise they should not publish anything, because you can't understand Sahaja Yoga without it. It is not a superficial thing. You have to get your Realisation otherwise you will disturb or *[UNCLEAR* disudale/dissuade] or you can say, misguide the people, who are seekers.

Now, better, good. Many are getting it.

[Shri Mataji blows into the microphone.] [After the program, Shri Mataji asked Zorana to repeat again and again `Mother, are you the Holly Ghost?' Then Shri Mataji answered:] Yes, I am, but I want you to know that. You have to trust Me!

Contents: 1982-10-07 **TV Interview 1 (first television interview in UK), Northampton, UK**

Reporter:... wife of a United Nations diplomat. She lives in London now but has thousands of followers around the world, who hail Her as India's greatest living saint. She teaches a state of Self-realisation and happiness and says that with a spiritual force She can cure the incurable. She's speaking at public meetings in Bedford tonight and Northampton tomorrow and today She gave Her first television interview in England. Our Reporter is Rebecca *[UNCLEAR]*.

Her Holiness Mātājī Nirmalā Devī is known around the world for Her healing powers. Her followers look upon Her

as Divine. Mother, as She is referred to, preaches a gospel of peace and has discovered a spiritual force called Kuṇḍalinī, which is shown on this chart. She can release it in seekers, as She calls them, to give them complete awareness. She admits that many Westerners are skeptical of Her powers, but She scorns the idea of charging money for Her gifts. Her claims of success in curing and healing are remarkable. Alcoholics have been known to give up drink, drug-takers have been cured, but perhaps most extraordinary of all, She claims to have cured many cancer victims.

How many people have you managed to cure who have had cancer?

Shri Mataji: Thousands... I don't know... I should say...

Reporter: Thousands? What do doctors think of what you're saying?

Shri Mataji: You see the trouble is I Myself I have done medicine and... the doctors are the people who are working with the `shoot' side of life, you see, not the `roots' of it.

So the trouble with them is that anybody starts talking that it can be cured by a higher method than a human awareness, then they don't want to jump into that awareness, which is a higher awareness that one has to achieve, because human awareness is still transitory. You have to achieve that awareness which is the Divine awareness. When you have that awareness, then only you can cure it.

Reporter: How would You describe Yourself, as a healer or a spiritualist?

Shri Mataji: You see, I do not want to fall into any category Myself because... I'm a housewife and I have to do all the jobs of a housewife, I'm also a diplomat's wife, so I have to act as a diplomat's wife, I'm also a person who has to do this work of Sahaja Yoga...

So I don't know how to describe Myself.

Reporter: Can I ask You if You can reach me?

Shri Mataji: Yes yes, see, one can reach masses. Now, we have to first see in your case now what is the problem. First is that there's an imbalance, a little imbalance, because you have to work outside too much, I think, you have to go out too much and don't have much time for your emotional life.

So it's more that you are more mental and physical, but less of emotions in you, so there has to be a balance.

So first I have to give a balance like this, all right? I have to put you into balance now. Now, this is, you are working with your mind too much, so you are overworking it, so your liver is out. And the liver is also excited.

So to put it right what we have to do is to just put you...

Reporter: What are you doing?

Shri Mataji: Just I'm removing the liver pressure. The liver is expressed in this part and this part of the hand.

So your liver pressure is reduced. It's very simple.

Reporter: Now, is anyone watching this going to have, feel any effect from You?

Shri Mataji: From Me? Reporter: Yes.

Shri Mataji: No no, no effect. No, nothing. Because it is just, you see, it's like construction of the destruction; you

just take out the destruction out of the construction, that's all. It's very simple. Now, what I am doing now. You have to now just say within yourself, or loudly if you want to, say that `Mother, I forgive everyone.' Just say that.

Reporter: Mother, I forgive everyone.

Shri Mataji: Yes, you have to say thrice. Now let's see. Say it.

Reporter: Mother, I forgive everyone.

Shri Mataji: Again.

Reporter: Mother, I forgive everyone.

Shri Mataji: Again.

Reporter: Mother, I forgive everyone.

Shri Mataji: Now see. Is it flowing? A little bit. It's very sensitive, it's very subtle.

Reporter: Well, I can... I can feel the clearness of it. Yes.

Shri Mataji: It's started. Started, see? Just I... what I'm making, a cross on your hand. You see, that's Christ, who said you have to forgive. Now see. It's working? Reporter: And what will it do for me in the long run?

Shri Mataji: In the... in the long run that it is your... own power now will manifest. You have this power within yourself. Now with this you will feel very peaceful, you will control your thoughts. You don't have to think all the time. You can rest without thinking. If you want you can think, otherwise you need not think. Then your own powers will be manifested, by which you can give this power to others. There's so many things you can do.

Contents: 1982-10-07 **TV Interview 2, Northampton, UK**

Reporter:... Her name is Mātājī Nirmalā Devī. She trained as a doctor in India and She is now married to a senior diplomat at the United Nations. She lives in London, but this week She's holding a series of public meetings to publicize Her teachings. She believes that we all have a form of spiritual energy called Kuṇḍalinī at the base of our spines, which can be awakened and sent flowing through the body.

So I took my shoes off and went to meet Her in Northampton this morning.

Shri Mataji: You are a person who is more active and tries to think too much, work too much...

Reporter: I think too much? Nobody ever said that to me before. Right...

Shri Mataji: And you work too much physically, you run about and you are more working outside.

And left side is the emotional side, so left side, for emotional life. Well, that's what is the imbalance in you is. Now for this we have to first give you a balance, all right? What I'll do is to awaken your frozen side and bring it down so the grace comes over here to satisfy this side.

So it is to be awakened, you see, the emotional side is awakened. And this side is given a sort of a soothing effect with the All-pervading Power from your right.

So this is, this is how it moves, right? This is the way.

Reporter: But is this energy and this desire any more than the desire that everyone has to make the best of himself, to be happy, to be content?

Shri Mataji: You cannot be contented with material things. You cannot be. That's the basic principle of economics.

Reporter: So can I put a contradiction to You, that in the past when all the Gurus that have achieved fame in the West have all seemed to be surrounded by a great deal of very affluent trappings, great deal of wealth and money. That seemed to be a great contradiction of what they're talking about.

Shri Mataji: I'm happy you see that, but how many see that? Is something one should understand, that it is not a business, you cannot make money out of...

Reporter: But they're making a very successful business out of it.

Shri Mataji: Because you are so naive. In this country people do not use their brains. You must come to right conclusions, that if something has to happen to you, it will be in your awareness. You have to manifest your powers and then only you will realise that you cannot pay money for your evolution.

Reporter: Now we've got perhaps three million people watching us at the moment. Should they be able to feel anything or to gain anything from watching You just on the television?

Shri Mataji: Yes, some of them may. If they are just there, if they put their hands towards Me just now even like this, they might feel the Cool Breeze in their hands. And then they might feel on their heads coming out the Cool Breeze. I mean, it has happened in so many places.

***Contents: 1982-10-07*, Public Program, Truth Is to be Achieved, Guild Hall, Harpur Street, Bedford, UK**

I'm sorry for being little late. I was talking to the Mayoress.

I bow to all the seekers of Truth.

But before we start talking of truth we have to know that truth is to be achieved in your awareness.

It is not a mental projection that I say, “This is truth, that is truth” but is to be achieved in the human awareness. As they say in Sanskrit Chaitanya. In your awareness you should know the truth. Like you see Me now standing before you, you know fully well that I am here, that I've a shawl on, you can see it, you can feel it. I'm here before you as truth because your central nervous system relates to you that I am here. And the truth is like that, truth has to be felt in your awareness. It is not just somebody gives you a lecture or reading it out from a book or saying, “This is truth, this is truth." The time has come for human beings that they're not going to accept anything like that. You may accept but your children will not and their children will never accept such a thing.

So something has to happen to our awareness.

That means at this stage where we are, at this stage when we are called as human beings we have not felt the truth. We have not seen the truth, we are not the truth. That one position one has to accept. If we believe that this is the truth because it is in Rāmāyaṇa or in some book or that book then be sure that that truth is nothing but your mental projection, is not the truth which is reality.

So we are not to live with something fantasy or something that is not what we can feel through our central nervous system.

So when I talk that the seekers of truth and I bow to you, I mean to say people who will be honest about it. Those who are not honest, who are just clinging on to certain ideas, are fanatic and think that, “This is the truth” then I cannot help you. I can just say that come inside, within yourself is placed the truth and just find it out for yourself because it is your own, it is within you. It is your own, it is within you. Only thing is that you have to see it yourself and feel it yourself. The rest of it, the way people have all kinds of things about Freud, is something that I feel all the honest people should completely deny.

When we became human beings say, we didn't do anything about it, we just became human beings, is a simple thing. We did not stand on our head or we didn't do anything to become more human and less monkeys. It just happened spontaneously, so one has to understand that our evolution has come through a living process and through the living energy of God, God who's living and not a dead thing that can just give you some ideas and you cling to it which are dead.

So this spontaneity of life has to work it out within you, that kind of awareness which makes you higher than what you are.

At this stage as human beings whatever we understand about life, whatever we know about life as truth, may be, may not be. Let's keep it open like that, it may be, it may not be. For example if I tell you something about a country which you have not visited, it may be, may not

be. Better go to the country and see for yourself. And that's what one has to do is to place yourself in such a way, “Let us see." Keep your mind open to see what is the truth about yourself. Now this truth has been told by many great sages, by prophets and many incarnations who came on earth. As we know Christ has said about it, Nanaka has said about it, Kabīra has said, Lao Tze has said, Buddha has said, everyone has said one thing which is people, which I should say people neglected and are not bothered about it and simple thing is that you have to have your second birth. You have to know yourself; you have to have Self-realisation. This every one of them have said it. Instead of that we are building up something which doesn't lead us there. “Take us to that land." If somebody says, you just don't do that. You see it's just an imaginary thing if I say, “All right now, close your eyes off we go to the Kingdom of God." It's not that way; something has to happen in your awareness. Means whatever you are feeling now, you should feel more than that. You have to become something more, you have to expand more and that expansion has to come not through just giving you a lecture or talking to you but by something happening within yourself. As a seed has to become the tree it has to sprout, as the egg has to become a bird it has to grow and then the transformation takes place. In the same way the truth has to come to you.

So what should happen if the truth has to come? You can't pay for it; you cannot put in any effort, but what should happen when the truth comes. When the truth comes then you see things in a different way, you are

transformed. You are to be transformed. If you are one with the truth how could you live with falsehood anymore, that's as simple as that, is a very simple thing and you know all living processes are the simplest ones. There's no complication about it. You see people have made theories and theories and when I saw them I was amazed now what are all these mountains these people have created, for what? Why to climb all these mountains? It's very simple, see any living process is so simple, like you breathe you don't go to books do you? Or do you consult anybody for that you just breathe. Do you know this amazing eye that God has made, it has so much in it that all these cameras put together cannot make one eye and He's made such a great eye within us and this one that has been made has been made through this spontaneous process. Is not done by our own doing at all it is done spontaneously.

So within us is built in, just like in a seed all the maps of that seed which is going to be, whatever trees it is going to be, whatever things it's going to be, is inside that little seed. It is within us and it is so simple that you just have to put it to the Mother Earth and the seed sprouts. But if you try to read books it won't, if you try to operate it won't, if you try to stand on head it won't, you have to put it to the Mother Earth because Mother Earth has the capacity. The quality of Mother Earth is such that She knows Her job and She can do it.

So the simple things are made so difficult that as if to achieve your Self-realisation must be something, you have to waste ages and ages and ages and then you do it. It has to be a simple thing, anybody who tells you that

Kuṇḍalinī awakening or Kuṇḍalinī is a dangerous thing, please beware of such people because they're naive or they're unauthorized, they may be unholy people, they want to make money out of you. Kuṇḍalinī is your own Mother, She's your own Mother all the time sticking to you, means it's an individual Mother. Everybody has an individual Mother within themselves and this individual Mother gives you this realisation as you will see here in that chart, in the sacrum bone is the Kuṇḍalinī and this force within us is the residual power. Why? Because it has not yet manifested.

It has created the whole thing but it has not yet manifested.

And what is this power? This power is the ultimate desire to be one with the All-pervading Divine. It is said there's All-pervading Power all round and that it does everything the rest is all false. It's only this All-pervading Power which achieves everything. For example the flowers become the fruits, billions and billions of them. All the time so many living things are happening but we just take them for granted. But they say it is done through this All-pervading Power.

So when this last thing happens that you become Self, when you become that then only you can feel this All-pervading Power as Cool Breeze around.

Now there are people who come round and say, “Why should we seek?" There are some people who say so. But there are a special category of people who are born in the modern times, they're a very special category, those who are seekers who are not yet satisfied with what they have been doing, they're seekers and seekers of the

truth. They are definitely a different category which is not born so many before. They are a special category of people as William Blake has called them as, “Men of God will be born in those days and they will become prophets and they will have power to make others prophets." That's what is the time today and that's why we find so many seekers today all over the world. Of course as you know the seekers are mislead, exploited, tortured. They have done all kinds of things to them but still the seeker remains a seeker and if he's a seeker he must find the truth. The time has come for him to find the truth.

Within us lies this special power as I told you called as Kuṇḍalinī. Now this Kuṇḍalinī is there or not, whether it exists or not, or whether I'm telling you a story of some sort of an imaginary thing, one has to come to right conclusions about things first of all.

You should not accept Me blindfolded. Blind faith has no place in Sahaja Yoga. No faith at all, no, we have no faith in people who have blind faith because you must come to right conclusion first of all. As we have now come to a conclusion that it has to be spontaneous happening, a living happening and it cannot be worked out by us but the Divine has to work it out. If it is a living process, if evolution is a living process, if you have to jump to that higher awareness then it is the living force which is going to work it out and if it is so we cannot do it. Human beings can only do dead work you can see that. If a tree is dead you can make it into a chair but can you make a flower into a fruit, you cannot. It's the living force that does it. In the same way if anything has to happen to us it should be spontaneous, for which as I told you, you

cannot pay, you cannot exert yourself, you cannot demand it, whenever it has to happen it happens.

So first we have to come to right conclusions about things. Secondly as I told you, you cannot have blind faith about it, about anything. Keep yourself open, you should not deny it keep yourself open because you're seekers of ages you have been seeking the truth for ages now, so keep yourself open just, don't deny it. Because you follow certain cult or certain thing you should not because so far you've not found it. If you've not found it you must keep yourself open to receive. If it is true should happen something to you in your own awareness.

So when this Kuṇḍalinī is there She's is sleeping because She has not yet manifested. She's in three and a half coils, as I said you should not take Me for granted but if it is proved later on you can see it for yourself. Everything can be proved. The time has come to prove all the scriptures to prove that you are the spirit, that you are the instrument of God that you are a collective being. The time has come and so you have to see for yourself how this Kuṇḍalinī acts. Now you will find in many people when there is an obstruction the Kuṇḍalinī doesn't rise and there is a big pulsation in the triangular bone.

So we reach the third conclusion that whatever we can do, like we can jump we can shout, we can say a mantra we can do all kinds of things but we cannot make this triangular bone pulsate, can we? So it is done by Divine. Then we can see the rising of the Kuṇḍalinī with the stethoscope you can hear it passing through these centers which comes up here and when it reaches there at the top of the head you can feel it, the *[UNCLEAR* lak

dha] of a heart. Kabīra has said it, “Shum na sheik kurra parra ana hudya bhia." He has said that, “At the top of your head you can feel the anahada." Anahada is the sound of the heart. You can feel it, but even the Sikhs, you see, they do not know that it should happen with everyone. Everyone has said the same thing but it is to happen and that once happens there then suddenly you find that that stops and when it stops you find a Cool Breeze coming out of your head. That's called as Chaitanya hari, that's called as the Cool Breeze of the Holy Ghost.

There is no difference in what Christ has preached or these people have preached there's no difference.

Only thing is there is no proper translation, there's no proper understanding of all these things that they have all said the same thing, because truth is the same. How can there be two truths? Truth is the same and you feel the Cool Breeze coming out of your head. When John the Baptist talked about baptism he meant this, he didn't mean the way we do baptism, just call somebody, put some water on the head and say, “Oh now you are baptized." That's just a drama you can see it so clearly. Anybody who's thinking, can see it's just a drama to say that you're baptized. Baptism is a living process and in that you must see this germinating power within you that rises up and gives you this Self-realisation. It should happen to you in a way that you should feel it. You should feel the Cool Breeze in the hand, you should feel this thing within you, first of all. Now once you've got this then you'll be amazed that you'll become absolutely peaceful, within you you'll feel absolutely peaceful and

you'll feel relaxed as if you've solved the *[UNCLEAR* person] or you can say as if the drama is over. You'll become like a witness, the whole thing will start looking like a witness that you are watching the drama, there's nothing serious about it. What is there to be worried? You see all the detachment starts then that you are in it and you are away from it. Like you start seeing everything just as a drama you are not bothered, you are not troubled, you are not concerned about it. What's this all seriousness going on about? You achieve that joy within yourself which flows all the time, all the time the beauty of God's love. And that's what one has to achieve, that achievement is not done through your effort that is the effort of the Divine. Is God Almighty Himself has to do it otherwise His creation will be ruined. He has created us and jolly well He has to do it, let's put it that way. Because if he has created the whole universe and in that universe if human beings are going to be destroyed then one should know that it is God's own creation will be destroyed. His own doings will be destroyed and it is He who's so anxious, so anxious that you get your Self-realisation.

There are so many objections raised and so many people ask Me questions all kinds and some people also ask Me a question saying that, “How is it Mother that it is so difficult, they say so that you have to work for thousands of years to get to realisation." That may be, may have been but not today, that's not the situation today. It works out spontaneously in a split of a second, no doubt about it. In a split of a second it should work out. But actually what happens we are very complicated people.

All these centers are in complication our Kuṇḍalinī is in complication all these complications are there. We are sick people, we have mental sickness, physical sickness, we have other social sicknesses and so many types of sicknesses we have and that's how the Kuṇḍalinī though She warns you with realisation, though She wants to rise, She wants to give you birth but She finds it difficult and then we have to work out.

Somebody who knows the job has to work it out, raise it up and bring it there and give you the realisation and then you have to learn how to maintain it.

So that you have to know all the things, what these centers are and what are they and why the Kuṇḍalinī's down and why we are feeling it, what's your problem, because you start facing it. Actually it is such a truthful thing that it works on your fingers, just you feel it on your fingers, your Self and other's. Mohammad Sahib has said quite clearly, “At the time of resurrection your hands will speak." Your hands start speaking that you feel which is catching what is catching, you know your Self and you know others. But when you know that you don't feel bad, you don't feel bad. For example if I tell somebody that you have an ego then I'm not safe at all but when you get realisation you start seeing your Mr. ego coming up like a balloon on your head and you get such a fright that you just come and say, “Mother this finger is catching very badly my ego, please save me from this big ego of mine." And then you know how to correct the ego, also you must know that, this is the technique.

So the word Sahaja means, `Saha' means `with' and `ja' means `born'. It is born with you, is spontaneous, is born

with you as your eyes are with you. This Yoga, this union is born, is with you, just it has to activate. It is within you, it is your own, it's your own thing which happens to you because you deserve it.

The time has come that's why you get it. And this Sahaja Yoga the communion with the Divine is your birth right as a human being to have it. Every one of you should get it. That has to happen so millions and millions of people should have to have it and this happening has to take place because if this whole world is on the verge of collapse something has to happen to transform the human being. For the emancipation of human beings, something has to work out and that is what it is, the God's desire that we all should as far as possible get our realisation, become ourselves and know all our powers, what we are. Actually in reality we are very beautiful, you're extremely beautiful, you're extremely blissful, we are collective being.

But with all the social problems and all that, especially in the West I find people feel guilty for nothing at all. There's nothing to feel guilty because your Father is compassion, is ocean of compassion, is ocean of love, He's ocean of forgiveness. He's so great that these little bit things we do here and there should not upset you at all, there's nothing to upset you and this is what it is that we have to believe into that if you are going to get your realisation. First of all you're not to be guilty.

You have to enter into your own freedom, the complete freedom, the supreme freedom, at that time you are free to choose. You have to be free. I cannot entice you, somebody mesmerizes you or binds you by something,

such a person cannot give you realisation. You have to be absolutely free, I must respect your freedom.

Apart from that when this happening takes place you should know what exactly it is, whether it is reality or not, whether it is working out or not. For example we have within us other *[UNCLEAR* place/plane] which we do not know, unknown *[UNCLEAR* planes/place] to us. For example in this thing you can see there's a left side and a right side sympathetic nervous system and the central is the parasympathetic but this is the subtle side of that. On the left hand side you can say within us lies our subconscious and then lies the collective subconscious. This area is called in Sanskrit as Ādi *[UNCLEAR]*, is the one that has happened before since our creation. I was surprised I saw once a program in television in England by some doctors who showed the cause of cancer is because there is some sort of proteins they called it protein 58 and protein 52 which triggers this happening of cancer within us. And when this thing happens to us we do not know what to do because this agent, this special protein that enters into us comes from some unknown area which they call it, which is built within us since our creation, I call it as collective subconscious. Whatever is dead is on that side.

So they're actually talking of possession, or a possession of a dead spirit or something. That means that such a thing enters into our being and triggers, triggers cancer. Now this I've been telling them for so many years now but now as it is according to their own understanding they've stated, because they're very honest and they don't say that we know about this area. But that area

exists *[UNCLEAR]*. As a result or manifestation of this area supposing, you are too much crying, “Oh God help me, do this” you can get possessed because you're not yet connected to God. And once you get possessed means somebody, some other spirit can come into you and such a spirit when it comes into you, it can really make you mad. It can really make you feel like jumping, singing or shouting or screaming. These are not the signs of Self-realised people, they are very sane, balanced, beautiful people. How can there be mad people jumping all over or grabbing others and being angry and being very volatile they cannot be. They have to be very sane, the sanest of sane, most balanced people.

So this kind of thing happens to people who go on to the left hand side. It can happen in so many ways and more over these people afterwards starts getting all kinds of problems like epilepsy they can get. They can also get another problem we can say that they get pains all over they feel very guilty, all the time crying and weeping because left side is the emotional side.

There's another side to us which is called as Ādi Devī and is the right side we call it as the collective supraconscious, this is the side which is the future. When we indulge too much into future see, we go and plan too much and we are aggressive about it then there is a built-in process within us which is called supraconscious, means all those ambitious people who lived in the future are there. Hitler used this power, Hitler used this power to entice people and he was one of the greatest right hand person I would say that the day he used it to enforce this on the people, to say that, “We are

something, a great race, we are a higher race” and all that. Because he used these people who are dead on the right hand side means supraconscious. And when they jumped on them they also started becoming ambitious and absolutely heartless, they were so heartless you can't imagine. If you read the life of some of these people they were not so heartless to begin with. They were not, they were good people, sweet people, affectionate people, they were good children and suddenly how do they become so devilish and so destructive. The thing is they are no more there but something else acting. Such people can become dynamic for the time being may look dynamic but afterwards is too much a load to carry then again they also become like cabbages like the other side people.

Drugs have the same effects. Drugs can right-sided or left-sided, you can say LSD and all these drugs take you to the right where you see the auras and things like that. And the left-sided stuff is like other Hashish and all these drugs which make you feel miserable afterwards and you laugh, laugh and then you become immobile and sort of things you see. All those things are imaginary or they are not reality. Reality is in the center, is absolutely in the center in the present. We live either in the past or in the future. A thought rises within us and falls away another thought rises within us and falls away but we have to be in the center and that is the present. If I just tell you, “Be in the present" you cannot.

Something has to happen within us to keep you in the present. And that happening includes Kuṇḍalinī awakening.

Now what is the Spirit, also that I will tell you in short because tomorrow I'm going to tell you in details about these centers and their manifestation but today I would like to tell you about the Spirit about which people have told that there is the spirit within us. Spirit is the reflection of God Almighty within us which resides in the heart actually. But the seat of the Spirit is here on the top of your head where the fontanelle bone area is, but it resides in the heart. Now this Spirit is the collective being, it is the collective being meaning that you don't have to tell the Spirit that we are all one. When you become the Spirit you just start feeling the other one, like there's nobody is the other. Like some people say, “Mother when you try to help others, you cure others and do this and that then you think you are obliging them." I said, “How? There is no other, they're all within Myself. Who is the other, I don't know, I don't see anybody as the other. If they are helped it is because I feel they are within Myself." And that's what happens that you become collective conscious. That means in your central nervous system you start feeling others and yourself. You become, again I say it's the becoming. It's not talking, it's not a mental projection, is the becoming, the being becomes and when the being becomes that he gets this experience of understanding that there is an energy flowing through us and this is the energy of the Spirit that flows through you.

So you get *[UNCLEAR]* you get the energy within you, you become the energy. Then you start manifesting the energy of your Spirit and then you start manifesting that energy then you do it as a collective being. It just flows;

you don't have to do anything it just flows. You don't have to say, “Oh come along you stand on your head” or anything it just flow. Even if you touch somebody it can flow, it can cure people. It's no only curing people that's important, it's just a by-product. Actually when Kuṇḍalinī rises She integrates you, all the centers, She gives you physical, mental and emotional peace and then integration and also She gives you power to understand what She is like, what She is doing and how to manifest in other people. She gives you power to give realisation to others. It is too fantastic to believe I know, it is too fantastic. But is it not fantastic that we have become human beings from amoeba? We take that for granted. If the time has come to become that, let's have it. What's the harm even if it is fantastic after all you have reached the moon isn't it so you can reach the Spirit also. It should happen on mass it has to happen to all of you.

Today is the first day; I've just given you the introduction to the subject because I would like to know your questions. I hope you'll ask sensible questions to Me which will help everybody else. I find it something sometimes very surprising the way people ask questions it doesn't help them neither helps anybody else because they're not civil to other people. They just want to propound their ideas on other people is wrong, I think you have to be civil. Now we're talking about Kuṇḍalinī awakening and about Self-realisation so you need not tell Me, “Somebody wrote like that and somebody wrote like that." Let's have it, I'm saying it's an open thing let's have it with open mind. And so I hope you won't waste the time of other people because today I would like to try

also the experiment of realisation with you so you'll give Me more time for that which is more important than talking about it. As far as talking, I've been talking and talking, in England I think there are about 1,000 lectures I've given and all over the world I've been talking everyday so it makes no difference. What happens to you is the most important and I am sure it should happen to all of you and that you should get your Self-realisation and establish yourself so that this new awareness, which is the awareness of the Spirit should come and change the whole world.

Thank you very much and may God bless you.

Can I have a question from you? Question: *[UNCLEAR]*.

Shri Mataji: Yes of course, of course it will of course no doubt yes not only one but many of course definitely no doubt. Yes please.

Question: *[UNCLEAR]*.

Shri Mataji: Yes luckily you have a center in Bedford where people will tell you all about it. Thank God I have come to Bedford after a long time. I started with seven people in England for four years can you imagine. I had only four [seven] people and this was a big struggle you see to get them there. But once it started off now we have many people in Bedford, we have a center where you can go and meet people and they can tell you. And we have also very near here Cambridge and other places where we have such centers. In London we have now two good ashrams and people are working it out.

So in England I must say there is no such problem. And you can also write to Me, I'm also in England these days,

for at least some time I hope so. Any more questions? Yes My child. What is it? Question: *[UNCLEAR]*.

Shri Mataji: It has a meaning it is so. Ill-luck comes *[UNCLEAR]* by many things you see but once you're realised I would say the angels help you, you see, you won't believe. Just you get over it now, it's a very different situation. At least there are many people who say that, who are here, who are realised Souls. They'll say that how they're helped by God. But our idea of luck changes by that, very much.

Like we don't want to be like a millionaire or anything, we get satisfied temperament and also of course, of course other things like material and all that is solved. Lots of it, lots of things solved, no problem but first of all you should be the citizen of God's kingdom isn't it. Then He looks after you.

Beg you pardon. Can be. Avoid, what? You don't have to, it's looked after. You are looked after.

Kṛiṣhṇa has said, "*[UNCLEAR* Yoga shey yam ne hum no hum]" that "first you get your Yoga" first you get your realisation "and then, I'll look after your well being." He said it clearly, yes so you are not looked after as yet as it should be. The Divine looks after you so well you can't imagine. You are completely under the care of the Divine, it's true. But sometimes I don't say in My first lecture, people think it's a false story so I don't tell them, but it is true it works out. There must be some reason for ill luck and that you'll find out very soon after realisation. Is like light you see, supposing you're walking and you fall down and falter because it is dark and you can't see

anything but when there is light you can see, you can avoid it, isn't it.

Question: *[UNCLEAR]*.

Shri Mataji: But you see one can see it if you are on the futuristic side, if you are on the futuristic side but you should be in the center. What is the future it doesn't exist, one should not bother about the future you should see about the present that's the best. If you see the future is not good you should see the present, you should be in the present because present is real and dynamic. It comes because your movement is on the right hand side maybe you think of the future too much. You'll find out now, you'll find out it's easy to find out. If somebody's a very futuristic person he may forget all the past, he may forget even his name but he might see something of the future. It's not a normal behaviour then you see more of the future and nothing of the present, all right.

Some people see auras, lights that's not important, that's not important at all, seeing is not important, becoming is important.

[Hindi.] She has a problem. She says, “My children don't listen to me." I said that, “That's this country, you can't help it. You see when you have come to this country; you have to face the atmosphere also." But after realisation also it's a beautiful relationship that exists, extremely beautiful. All right, is it sufficient, should we have? Because first day I'll take some more time to because I'll go round and see all of you. Is it all right now, should we start it? It's a very simple thing, there is nothing to be afraid of, nothing goes wrong, everything is perfect. You

just have to put your hands just like this, just like this and you have to put your feet on the ground...

[Shri Mataji proceeds with realisation process.]

Contents: 1982-10-08 **Radio Interview, Wellington, UK**

Reporter: This is Phil Malone for the County Show at the Victoria Center in Park Road inWellingborough.

With me is Mātājī, who teaches Sahaja Yoga. Now, Mātājī, what exactly does this Yoga involve?

Shri Mataji: Sahaja means: `saha' means with, `ja' is born.

So whatever is born with you means spontaneous. It is a living process of the living force, which is surrounding us, which is everywhere, which pulsates in everything. And this happening is the breakthrough, the ultimate breakthrough into our unconscious; can be described psychologically.

Reporter: So some people call this Self-realisation.

Shri Mataji: Same.

Reporter: Now, Your background is from a Christian family in India.

Shri Mataji: Yes.

Reporter: Is Your teaching involved with Christianity or not?

Shri Mataji: It is, of course, because Christ is very important for Sahaja Yoga, no doubt. But the way we understand Christ out of the text of Bible is very limited. We have to see to other texts about Him and expand and

explain Him, what He meant, because Bible is not sufficient to explain Him.

Reporter: So, is Your message one of peace and that's, in that case, peace in the rest of the world or peace within people?

Shri Mataji: Absolutely. Peace within will only bring the peace outside. Whatever we are inside is expressed outside.

Reporter: Now, You have had some successes in curing people or healing people in the past. Is this because You work from the inside out or how do You do it?

Shri Mataji: It's just very simple because you have the vitality, that Force is vitality itself. And once you have that flowing through you, if you give that vitality to someone, that person is revitalised. In simple words you can say like that. But actually it is a happening within you which takes place. There is a residual force, the germinating force you can call it, or the ascending force within you, which rises and gives you the experience of your Spirit. Means your Spirit comes into your attention, means you can feel it on your central nervous system.

So you receive the information or, we can say, you become enlightened by the Spirit, which is the Absolute. Once you receive the Absolute, as a by-product of that all these things drop out, all your maladjustments and everything.

Reporter: Now, tonight You're appearing in Northampton at the Guildhall.

Shri Mataji: Yes.

Reporter: If people went along, what would You have to say to them tonight?

Shri Mataji: I'll have to explain to them what actually they are. Actually they are the Spirit and this body, mind and all these things are just the covering. Now our attention is at our body level, at the level of our mind, or emotions. But you have to go beyond and with this happening it happens. When it happens, you become the twice-born, as they call it, like an egg becoming a bird the transformation takes place.

Reporter: So this second birth coming, some people perhaps they believe this would happen when they die.

Shri Mataji: It's not possible. How can that be? That's a misunderstanding. There are lots of misunderstandings we have about these things, which can be removed. First logically we have to reach certain conclusions, logically.

So that we don't put our brain a complete stop, we see through our logical understanding that what we have to achieve, if it's a living force. Then we achieve it. Once we achieve it, then we have to verify it if it is so or not. It's all absolutely open.

Reporter: So, are Your followers then... how do they practice this form of Yoga? I mean, do they do it in conjunction with other religions, for example?

Shri Mataji: You see, these religions that you see, outside they look like different religions but actually they are one. All these are flowers out of one tree of life. They are different flowers to look at, but they are not. They are living on the same truth, there's no difference at all between them. But when you pluck them and call them “this is mine, this is mine” they become dead, ugly and

funny. That's how fanaticism has come. All religions are born out of truth and here you find the integration of them, complete integration.

Reporter: Well, You'll be meeting with people from Northampton and from the rest of the county in the Guildhall tonight and thank You very much for speaking with us.

Shri Mataji: The address is: Guildhall, St. Giles' Square, Northampton.

Reporter: And it starts at about half past seven.

Shri Mataji: Yes, half past seven it will start. I hope to see, Reporter: Thank You very much. This is Phil Malone for the County Show at the Victoria Center, Palk Road, in Wellingborough.

Shri Mataji: Was that good? Reporter: That's great, that's fine, yes, thanks very much.... take these flowers with You, all right.

Shri Mataji: You should have asked about Gurus, I think that's important.

Reporter: *[UNCLEAR]*.

Shri Mataji: That's very important, you know, because all the people are misled by Gurus and all this hypnotic stuff and black magic. You must save all these people. That's very important.

Reporter: Yes, they get confused, do they?

Shri Mataji: Very much confused, you see, the confusion is so much. That's the sign of modern times also. You must know what to expect.

Reporter: Mm, yes. Anyway all the best, Thanks very much indeed. Thank You, OK, *[UNCLEAR]*.

Shri Mataji: Thank you very much.

Reporter: OK, Thank You, *[UNCLEAR]*.

Shri Mataji: Sorry I was late, but yesterday was such a funny experience. We came down running out forty miles and nothing happened. Thank you very much, thank you. Goodbye.

Contents: 1982-10-08 **Newspaper Interview, Wellington, UK**

Shri Mataji: How are you? Please, what's your name? Reporter: My name is David *[UNCLEAR* Cooper], I am *[UNCLEAR]*. Can You tell me why You have come along to Northampton here this week?

Shri Mataji: Why I have come here? Reporter: Why You have come along here were you invited by a...

Shri Mataji: It's a sort of a... kind of a message I have, that a discovery has been made now of a method.

Reporter: Is this the first time that You've come to Northampton?

Shri Mataji: No, I've come before also.

Reporter: And what sort of response did You get then?

Shri Mataji: Response was, I wouldn't say very good. No newspaper didn't come at all. Yesterday also there was no one, it's very surprising.

Reporter: You found a lot of people were very skeptical, did You?

Shri Mataji: I don't know what they were like, because no-, nobody came, you see.

Reporter: That was the Guild Hall as well?

Shri Mataji: No, Guildhall yesterday we had lots of people, yesterday. But as far as the newspapers were concerned, We met some people here. But most of them came to see Me, when I came here first.

They were sort of a labor class people. They were suffering from all kinds of maladies like possessions and things and one gentleman just got up and started walking all around the places and talking like... it was a bit funny.

Reporter: In fact, You were in Bedford last night, weren't You?

Shri Mataji: Yes, I was there.

Reporter: And how did that go?

Shri Mataji: Very good, very well.

Reporter: It went very well. In the past, I understand, that You've, um, You've helped heal an awful lot of people?

Shri Mataji: Yes.

Reporter: Can You give me some examples of some of the more, extraordinary healings You've done?

Shri Mataji: Anything, you see, like cancer. Then, we can say, blood cancer specially. A Sahaja Yogini has cured one friend's blood cancer. Then diabetes.

Reporter: In fact, I understand, on one occasion You had a blind woman come to see you, is that right?

Shri Mataji: Yes, blindness, if the eyes are open.

Reporter: Which one was that exactly? What was happening?

Shri Mataji: That is due to a possession, on the backside, the optic lobe we have here. You see, if that gets possessed by a live entity, your eyes are open but there's

darkness, you can't see anything. And if you know how to open that and get rid of the possession... And the deaf person hearing, yeah...

Reporter: You've actually cured deafness as well, have You?

Shri Mataji: Yes, I did. There in Geneva it happened.

Reporter: Do You, I mean, it's very difficult for people to actually understand how it's done. I mean they, you know, it all seems just a bit mystical and, you know...

Shri Mataji: Yeah. It is nothing mystical, I tell you, there's nothing mystical. Like we see a flower becoming a fruit. We take it for granted, isn't it? Do we find it mystical? Because we see it every day.

But there is something, some power that does that, doesn't it? Supposing you become the owner of that power, say, or if you have that power within you. You can also do many things.

Reporter: But, nonetheless, I mean, if I have an illness I go to see a doctor, he gives me tablets or so on... I mean, to actually to come and see You and You say I've got the power within me to cure myself... I mean, how do you actually get this power?

Shri Mataji: You see, what happens: when you become realised, or we become, it's called twiceborn, then you become collectively conscious, you become. It is not that I just tell you and it's a brain treatment or something, or brainwash, that I say, “All right, now you have become this and this." You really become, that you start feeling them, they are centers on your fingertips.

Reporter: So you actually feel them?

Shri Mataji: On the fingertips. You can, everyone can feel it very clearly.

Reporter: So this is like a guide, this is the way to diagnose.

Shri Mataji: Diagnosis. You see, you are the doctor, you are the diagnosis, you could be patient also.

And you are the medicine.

Reporter: So once you've diagnosed what's wrong...

Shri Mataji: Then you should know how to cure a particular center. For example, now, which is the Christ center? It's this one. These two are Christ centers, in the pituitary and pineal. Now what are the diseases you get? All the diseases of the eyes you get out of it. Others are possessions. You see, people are mentally depressed, this, that, all this is due to the problem of this center. There could be ego problems also. People are egoistical, you see and very bombastic and they try to destroy others with their ego. All these problems can be solved if you can awaken Christ within you. Because it's said that He died for our sins.

Reporter: And using this healing method You've got, that actually awakens powers [of healing]

Shri Mataji: Yes. You just have to say Lord's prayer before Me and He awakens because I am connected with Him, you see.

So when you say something to Me, that connection is just made and that is awakened and there is ego and superego in your head, which are sucked in, means your actions, that is your Karmas and your sins all are sucked in. Once they are sucked in, this portion opens up. When

this opens up, you get the the Kuṇḍalinī up. That is, it's very simple, you know, because it's all done. For example, now look at this. To look at this, looks very simple, but it might be quite complicated inside.

And it has taken years to make it.

So the whole thing has taken ages to make it. This human body has come out of amoeba to this stage; even from matter to this stage. All that is built within you. Not only that, but what is going to happen to you is also existing within you in your heart; the Spirit. Now, only thing, that last *[UNCLEAR]* breakthrough has to take place. That is also built within you, that is Sahaja, means built within you. It is born within you. Sahaja is `born within'.

So it's all within you. And just if somebody knows how to do the job, the one who could have capacity... Like the Mother Earth has the capacity to sprout the seed. We can't do it otherwise, if you do grow, do anything, you can't. It's a living process. But the Mother... Mother Earth can help. You put it there and you get it. In the same way, it is supposing I have the capacity, I can do it. Supposing you get the light tomorrow, you can do it.

You can enlighten another person. One enlightened person can enlighten another person but he has to be enlightened first of all.

Reporter: Do You find that, I mean, as You say, I mean, once people have seen You and discovered how it can work, they can spread the word?

Shri Mataji: Yes.

Reporter: But nonetheless You say You met a lot of skeptical people last time. Do You think that that is the

basic problem I mean that... through this healing process You have could be much more widely used and sort of...

Shri Mataji: You see, but I've seen people who come for healing, just get satisfied at that point when they are healed up. They don't go further. You see you must say that God also has common sense; that He would like to only heal people, normally, like we would like to only construct, improve, or repair those lamps which will give lights, isn't it? So those who are not going to work it out; the interest is less. But still it works, I mean, it's compassion, so it cures, people get cured, no doubt. But out of them I find very few really come to Sahaja Yoga, who come through healing. But those who have seeking of the Spirit they are a special category of people. They are extremely beautiful people and they are seeking. Maybe they are taking drugs, going to wrong Gurus, whatever they are doing. That's a different point. But they are seekers, basically they are seekers of the truth and they are the best people. And they are the ones who are meant for Sahaja Yoga, not the people who just want their body to be all right. What's the use of having the body, what are you going to do with it? You see, this body might have a meaning. And those who are finding the meaning are the best helped. Of course, they get rid of all their maladies and everything that's... as a by-product. But that's the main thing, that's important.

Reporter: I understand that Your husband, in fact, holds a very eminent position.

Shri Mataji: Yes, he is.

Reporter: Can You tell me a little bit about that?

Shri Mataji: He is elected as Secretary General.

Reporter: Of what exactly?

Shri Mataji: Of one international organization you have, a one agency you have in this country, called as International Maritime Organization, which has got 134 nations who have elected him. And that's how we are here.

Reporter: Do You find... I mean, his work must be so completely different to Yours.

Shri Mataji: No, it's quite just the same, I feel, because My work only works out how I meet people, isn't it? And when I meet the people, I find they like My work. I help his people also sometimes, you can say, for something wrong with them. But it never collides with My work at all, I find, because you are so... you become so loving and affectionate and so tolerant that you just don't feel anything else. It's very nice to meet new people because... Because of him I've gone to many communist countries, I visited China and visited Russia... All these places I could not have visited.

Reporter: I think, um... I mean, You must have a great deal of difficulty convincing people that You are a genuine, bona fide person, You know, it's a little bit dangerous. Do You find that there is, um, problems with people who are extreme, sort of extreme people who are...?

Shri Mataji: You see, it depends on what country you are. Say, in India it's not difficult at all, because they understand this, they know, they have had an education on this, that the one who awakens the Kuṇḍalinī is the real person. You see, they can see the rising of the Kuṇḍalinī, they can see the pulsation of the Kuṇḍalinī,

they can feel the pulsation here. It's all told them, so they know about it. I don't have to work out with them. But if otherwise the... most of the seekers in other countries also have come to right conclusions, because they have had a very bad time.

So they have come to right conclusions, I mean it's not so difficult. But of course, you know, that if there's too much mental projection, then rather difficult. But it doesn't matter.

Reporter: Are there fakes in this country?

Shri Mataji: So many. Most of them are.

Reporter: I mean, they must be Your biggest headache, I should think, maybe.

Shri Mataji: They are not only Mine but of all the seekers. And that's very true. They really ruin seekers. I've known people, they make money, put these people out of jobs, out of their lives, make them abnormal, sick like cabbages, they take away... the children are ruined... it's horrible.

Some of them get epilepsy, some of them get cancer... all kinds of diseases.

Some people become blind. They all punish them, Reporter: You don't in fact charge anything, do You?

Shri Mataji: No no no. No no.

Reporter: Then how is, Your trips round the country, to different countries and around Britain and so on, how are they actually funded then?

Shri Mataji: You see, it is mostly funded by My husband. Mostly he's a generous man.

Reporter: That's lucky, isn't it!

Shri Mataji: He's generous. Otherwise also I have My some income of My own.

Reporter: How much would You estimate that You spend trying to spread the word, a year?

Shri Mataji: Well, I can't say that, I'm not good at accounting, but I would say that when I travel, for example, supposing I go to any other country, sometimes Sahaja Yogis think that I should not pay for their salvation, you see.

So out of their self-respect they pay My travelling sometimes, but they don't pay Me but to the travel agency or something they, buy tickets for Me at the most, that's all. But not much, it's not much per year.

Reporter: Where have You travelled this year?

Shri Mataji: Now, this year, let's start. When... where did I go, can you...? Now, I came from America... Geneva, Austria, Belgium, Spain, Portugal, France, Germany... Russia, I went to Russia, Uzbekistan.

Reporter: And this is all this year, is it?

Shri Mataji: Yes, this year, yes...

Reporter: You must be worn out.

Shri Mataji: Do I look that? Now I'm sixty. I'm sixty now.

Reporter: Really?

Shri Mataji: Yes, I'm sixty years of age, really.

Reporter: You don't look sixty years old at all.

Reporter: How did it all start for You then, I mean, right at the beginning? Well, say, I mean, most people know very little about this sort of thing, me included. But how did that actually all start in the beginning for You?

Shri Mataji: You see, actually I was aware of it from My very childhood, as you are aware, say, for example, you are aware you are a human being. In the same way I was aware. I was absolutely aware of Me and My mission and what I... why I'm here, what I am. Everything I was aware of from My very childhood. But I was working out how to do it in en masse happening. It would be for the masses. My father himself was a realised Soul and he was a member of the Parliament and Assembly in those days and he was the only Indian to be elected. Indian Christian to be elected, I should say. My brother also is a Minister of... what is he Minister of? Communications and something else.

Reporter: So, I mean, I suppose in India, I mean, that it's not as difficult to actually, um... to make people understand. It's only when You start travelling abroad?

Shri Mataji: Oh, Indians understand much better.

Reporter: That's what I was saying.

Shri Mataji: But abroad is the problem. Because, you see, they... they are naive, they don't know.

You see, Christ's life was only for four years. He couldn't tell them much about it; about the Holy Ghost.

It's all a mystery, you see. The Christianity could not give that, because they never went into the search of it, you see, the deeper of it. Just reading Bible, telling some sort of an interpretation doesn't give you anything.

So the second birth part of it they didn't work out. And that's why I find people got lost more, because of these Gurus coming, giving them some ideas, this, that... And they sort of are hypnotized also to a great extent. All

these people are hypnotized, brainwashed, then they, some of them went into drugs.

You see, so many things, they are all self-destroying. That's how I found people very much confused, very much confused. Of course, the people in India say, for example, of this entrepreneur, He knows I am a saint.

So he treats Me like a saint, it's a very big thing and then he'll come to receive Me and... that even the Prime Minister of India, Mister Lal Bahadur Shastri, My husband was his secretary, but he used to come and see Me often, in the car, you see.

So in India it's a... saint is higher than all kings and everyone put together, you see.

So they know how to respect a saint, even for popularity.

Reporter: Do You find that, I mean... to call Yourself a saint... do You find that the people in England...

Shri Mataji: They are not so much.

Reporter: You know, they're not... they're not quite as keen...

Shri Mataji: *[UNCLEAR]* the saints, I think. No, they care more for politicians.

Reporter: That's right, that's right. I mean, do You find, You know, sort of... I mean, You are little bit insulted by them sometimes?

Shri Mataji: Aah, it's all right.

Reporter: I mean, You firmly believe in what You do, obviously and it must seem incredible to You when other people *[UNCLEAR* ignore] it.

Shri Mataji: It's all right. You see, after all they are children, they don't understand. That's all I can say.

Because they are still children in spiritual life, you see. But they are not going to crucify Me this time, isn't it? So it's all right.

Reporter: Now, when You make these trips to towns like Northampton and so on, You got several people with You. Does this team come with You every time?

Shri Mataji: No, they are from this place, some of them are now and some of them are there also. Of course all the others they have come from Australia. And we have an ashram in South London.

So they are staying there, so they just came around here. And these two are from, he's working in London, he is also there. And these three gentlemen are from Bedford. He is from Bristol.

Reporter: Oh I see.

Shri Mataji: But there is nothing like that, is that a team or anything. Anybody who feels like can come around if they're free, because...

Reporter: So anyone who is available for You, to help...

Shri Mataji: Yes, they can just to help Me, because if it's a big group and all that, so they can help Me.

Reporter: I see, all right, I see. Well, thanks very much for Your time.

Shri Mataji: Thank you very much. But I think you should ask one more question if you can, say, about Kuṇḍalinī, because those who have read about Kuṇḍalinī would be interested to know. Is that, is said that, you see, lots of books have been written about Kuṇḍalinī, that it's very dangerous, it is very *[UNCLEAR* this thing] and all that. But it is not at all. You see, thousands of people I've given

realisation. Thousands. It has never put anybody into danger at all. But those who are naive, those who are unholy persons, who have no idea of a spiritual life, you see, if they try tricks, you see, like sex, you see, through sex and all that nonsense, then it feels insulted and then there are problems.

Reporter: How can it be dangerous then?

Shri Mataji: Beg your pardon? Reporter: How, You said, it can be dangerous if it's not used properly?

Shri Mataji: You see, like we could say that if I don't know this instrument and I put My hand into something, I may get a burning, but it doesn't mean this is dangerous, that is because I don't know how to work it...

Reporter: That is basic, I mean, if you don't understand it's like putting your finger in an electric light socket...

Shri Mataji: That's what, you see. That's like that, you see. But they try to do it and then they try to write books about it. It's something surprising, isn't it? I haven't written any book so far.

Reporter: So, that's obviously, You know, sort of the thing you've got to try and make clear to people.

Shri Mataji: Yes, you have to. And then, you see, when you get realisation, you automatically become righteous, I don't have to tell you `Become righteous.' Because the religion is enlightened within you. You automatically become. I don't tell you that `You don't drink,' you just don't drink, because you don't enjoy it any more. You don't smoke, because you just don't enjoy it; don't take drugs. Just you just don't do it because it's all enlightened, because a new priority has come. Like if

there's light in this room, suddenly you start seeing where's the position of everything and you know, if you walk this way, you'll be hit. In the same way, enlightenment means that automatically you become righteous.

Reporter: What is Your success rate in full for healing people?

Shri Mataji: What is?...

Reporter: What is Your success rate for healing people who come to see You?

Shri Mataji: Success? Reporter: Successful or have helped them.

How many times do You actually heal people compared to the number of people who come to see You?

Shri Mataji: Oh, some people just come, for ten minutes is sufficient. Our president Sanjiva Reddy, the first president, he was coming from England... America. His operation had failed, he was just in a very bad shape. I just went to see him and he didn't know I was Mātājī, but he knew Me as Mrs. Srivastav.

And suddenly our High Commissioner told him, “This is Mātājī Nirmalā Devī." So his wife said, “I've heard You have cured so many people, so just cure my husband." I put My hand only for ten minutes, you'll be surprised. He was just, then, he got it.

Reporter: This can happen every time when You get somebody come to see You?

Shri Mataji: Not always.

Some people take more time, some people take less time. It depends on if they are complicated, you see, they

take more time, some of them do. You see, for example, supposing I have to break through, now. And if you are just there, you will out.

Reporter: Are there some people You just simply can't heal?

Shri Mataji: Some people... I don't know, but, you see... I don't know, I don't remember of someone who came to Me and was not healed so far.

Some might have been, I don't know. But those who came, you see, assiduously, I don't think, isn't it? As far as I remember, I should say.

Reporter: Yeah, You've done quite a lot.

Shri Mataji: You see, there are so many I have, it has happened, even these people are healing, you see.

So there's no end to it. Imagine, one person is Me, I can remember for Myself, but there are so many they are healing and I just forget about it, I just don't remember. Once I had gone to a program, I was just sitting. One gentleman came, he just touched My feet. I said, “Who are you?" He said, “You forgot me?" I said, “Why?" I said, “I'm sorry." He said, “I'm the father of such and such girl, whom You cured in two minutes time, who was going to die and this and that in the hospital." I said, “Really?" I tried to remember, I said, “Who was this?" you see. Then with very great difficulty I remembered, because it was so quick. I had gone to see somebody else and on My way back he caught hold of Me. And there she was.

She was cured in such a quick manner that I'd forgotten all about it.

Reporter: Really? Well, I suppose, the proof is in the pudding, isn't it?

Shri Mataji: Yes. And moreover, what I'm saying it is not important. What is important is to become Spirit. Healing is not important. You see, because everyone has to die in any case, isn't it? What is important that you have to become the Spirit. That is. And then you heal others. Not only yourself, you can heal yourself and heal others also.

Reporter: All right, very good... Well, as I say, thank You, thank You for Your time.

Shri Mataji: Many incurable diseases you can put, but that's not the main job, I think.

Reporter: Yes. I think that's probably the thing that a lot of people are most interested in.

Shri Mataji: I agree, yes.

Sahaja Yogi: Excuse me, Mother. When you asked *[UNCLEAR]* in Paris and Mother took it very well, but they described Her as a man.

Shri Mataji: What is she...

Reporter: I think you are speaking to the wrong person.

Sahaja Yogi: I'm getting confused.

Shri Mataji: What is it? What is it? Yeah.

Reporter: This is in fact...

Shri Mataji: Ah, I remember that. And he also said I'm a He, you see, put My photograph. And they referred to Me as a He, you see, *[UNCLEAR]*.

Reporter: In fact, this would be the first article we've ever run on You, so...

Sahaja Yogi: [Apologizes.]

Shri Mataji: This is *[UNCLEAR]*.

Reporter: That's all right, that's all right. It often happens, actually.

Shri Mataji: It happens. I've seen, there have been so many things, like Me, also, as you said, I am just...

Sometimes I don't remember all...

Reporter: That's right.

Shri Mataji: All right.

So...

Reporter: Can I take just two more pictures?

Shri Mataji: Yes yes, please, please go ahead.

Photographer: Actually, if You could close Your hands, so... You know, which is normally... do you mind if I move this?

Shri Mataji: As you say.

Reporter: Sometimes a problem.

Shri Mataji: Our style is like this. Is this all right? You can ask to put their hands towards My photograph also. My photograph has vibrations. You see, they have got realisation from My photograph. Yes, really, they have been cured from My photograph.

Reporter: That's incredible, isn't it?

Shri Mataji: Yes, that's it, That's what I was speaking, it's going to help, Sahaj is going to help all of them.

Reporter: So the more of them we get, a thousand more pictures we have...

Shri Mataji: Yes, the pictures. These people *[UNCLEAR]* something like *[UNCLEAR]* photograph.

Not only as photograph but just cure people, we have seen. And first time I went to Australia, there was big *[UNCLEAR]*. What happened, that a relation of a very big man in that industry was *[UNCLEAR]*. And a lady, one of the Sahaja Yoginis, so she said that, “I can't *[UNCLEAR]* so let's put a photograph" and *[UNCLEAR]*. Not only that, not only that, but the patient *[UNCLEAR* was perfectly all right]. And that's how they gave it and that's how the photograph *[UNCLEAR* works out].

One of them, you see, is another journalist who is a realised Soul.

Reporter: Oh I see. It's the question of, You know, making people see, isn't it starting I suppose once...

Shri Mataji: I think, I think so. Otherwise *[UNCLEAR]*.

Reporter: *[UNCLEAR]*.

Shri Mataji: *[UNCLEAR]* responsibility *[UNCLEAR]* for everyone.

Reporter: *[UNCLEAR]*.

Shri Mataji: Isn't it? After all, newspaper should give some good news also. May God bless you.

[UNCLEAR]. You are *[UNCLEAR]*. It's all right. All right. It was very beautiful. We can give this address. Will you please? And you tell them about *[UNCLEAR]*. Tell them about *[UNCLEAR]*.

[UNCLEAR Can you...] *[UNCLEAR* Douglas is genius]. I want *[UNCLEAR]* anyway, he wants to *[UNCLEAR]*. He's a genius. He's a genius. It's the truth. He got into speed and I also got to got into speed with him, I said, “Let Me talk fast." All right? Now, thank you for the cameraman”This team follows You” he said come.

***Contents: 1982-10-08*, Public Program, We Don't Have to Suffer, Guildhall, St. Giles' Square, Northampton, UK**

I bow to all the seekers of Truth.

At the very outset I must thank our very respected Mayor of Northampton to grant us permission to use this beautiful hall for this work of God. Yesterday at Bedford I explained to you about this energy which is placed in the sacrum bone.....

***Contents: 1982-10-09*, Public Program, Living Work of God or It Is You Who Has to Enjoy it, Cambridge, UK**

I bow to all the seekers of Truth.

When we say we are seeking, we must know that we are a special category of people. People were seeking before also. They were seeking power, money, possessions, affluence, every sort of thing. Still they are not satisfied, those who have got it. And so those who are seeking the truth are the highest, highest of all in the evolution. They are the ones who are going to jump into that higher state which is called as Self-realisation.

If you are not seeking, then nobody can force seeking on you. It cannot be done. Even by force, if you take somebody to the beautiful lake of nectar of God's love and even if you force the person to drink it, it is you who has to enjoy it and unless and until you have the seeking, you will not have the sensitivity to enjoy that nectar. And truth is what it is. We cannot change it, we cannot organize it, we cannot transform it. It is, it has been, it will be.

And what is the truth? The truth is that God loves us, that His Divine Power of love is all-pervading, is everywhere, that this power is acting all the time, it is a living power of a living God and that this power does all the things that we call as living work of God. A flower is transformed into a fruit by this power. This body we get out of that power. From amoeba to this stage we have come out of that power.

The whole world is created out of that power. In everything that power resides and works out, sorts out, coordinates things for us. Above all, it is the love of God. It's the compassion of God.

We human beings have not got the comprehension of His love; we try to see Him through our own angles, through our short sight, through our blinkers that we have got. He is the ocean, ocean of love. All the oceans put together cannot be compared with that ocean of love, that ocean of forgiveness, an ocean of complete well-being for us. Only thing, we have to jump into it. We have to enter into His kingdom.

That is what one has to do. When it is accomplished, then you are just there. You are looked after.

That is the domain of God I am talking about and there, when you enter in, as a by-product, all kinds of well-being are blessed upon you, just they are bestowed upon you. You just get them automatically. But this happening also is not our doing. This also is the doing of God. He has arranged us in this way that you can see in the chart, this is the life tree, or you [can] say the tree of life as described.

And this is the one that is within us already placed. All these centers, which are subtle centers, are expressed outside as gross centers. When this residual force of Kuṇḍalinī, which people must have explained to you, from that sacred bone or sacrum rises and pierces through all these centers, it enlightens all of them one by one. By that enlightenment only, you get your physical well-being, your mental well-being, your emotional well-being and ultimately, your spiritual well being. That means you become the spirit.

Once you become that absolute, the absolute, then all relativity drops off. We actually live in a relative world which is false, which is not true.

This power has its own telecommunication. It's so tremendous that it is unbelievable that such a power exists around us and we are not aware of it. We are not aware of many things. We are not aware that this Mother Earth is moving with such a tremendous speed. We are standing on top of that; nothing happens to you. We are not aware of the gravity. We are not aware of many things because God is so kind, so gentle and so thoughtful that He wants us to live happily as human beings.

So He doesn't want us to hear some things which are not good for us, for our ears, so He makes the frequency of these things so sharp that we can't hear with these ears.

Some of them, He makes them so low that you can't hear. Only what you can hear and enjoy He makes you hear.

But we in our freedom have done a lot of wrong to ourselves, to each other, to our society, to the whole

world. Once we realise, this freedom is nothing but is our ego, our ego, which has created this problem for all other people. Then we have also another thing where we get conditioned, which creates the superego.

Now in our activity, which is the right side sympathetic nervous system, we accumulate this horrible thing called ego, because when we act, we think we are doing it, we are in charge. We are not. He is in charge.

We are really doing nothing. What are we doing? Like the people ask Me, “Mother how can you cure everything so easily?" It's simple. How do you make a flower into a fruit? To us, we take it for granted. We are not bothered to find out, but can you do it? It's so difficult. Can you do it? We can't. But if it is God's power, it can do it.

So if you also have the God's power flowing in you, which will happen to you as soon as you get your realisation, you can do it; anybody can do it.

It's very simple. Like any instrument, when it is put to the mains, it starts acting and then we can see that it is an instrument. Otherwise it looks like some funny stuff here. It has to be put to the mains. The instrument is ready, but within us these two things, called the ego and superego as a result of our activity and as a result of our conditioning, are accumulated in our brain. These two are to be sucked in. That's very important because when they grow, these two elements, or two, we can, say balloon-like structures, they make a very strong gap filled with calcium and you become an egg. Another becomes an egg. Third person becomes an egg. You develop your `I'-ness, I am this, I am that. All kinds of misidentifications start coming on us. When this is to be

sucked, what should we do? That's the question. What are we to do? To raise the Kuṇḍalinī. As I said, it is a living process and you cannot do any living work, so just can't do it. It is as simple as that. You yourself can't do it.

But somebody who is enlightened, who is the light, can enlighten another light, because that light is ready, just ready, but you need an enlightened light to enlighten that light. Once that light is enlightened, that light can enlighten another light. But the problem is when the light which is enlightened tries to say that “You are to be enlightened” immediately you hit that person. You don't like it because ego is there, which is ignorance. That's how people like Christ were crucified. What wrong did He do to people except that, see, He said, “I am the light"? It's true. He was the light. No doubt that He was the son of God.

It's true, He was the son of God which you can prove, on vibrations. By this Sahaja Yoga, you can prove it what He was. He was that, but that time people killed Him. Why? Only because He said, “I am the light” and that you were to be enlightened by Him.

You allowed him to live only for four years and when He was killed, when He was crucified, you took advantage out of that and made all kinds of artificial things out of it. He could not explain many things which He talked. He could not say anything. On the cross He said, “It has been accomplished." What has been accomplished? Nobody thinks about it, what has been accomplished.

So we have to take reference from other people, those who have been deeper than us, who have gone into it, who have found out certain things about Christ. And they

say that Christ accomplished the greatest thing, the greatest feat, because He was nothing but Omkāra. He was nothing but the vibrations. That's why He had no body and only He could accomplish it. And what did He do? Is to accomplish Himself on this cross where we have this ego and superego.

Of course they say that He said he died for our sins. How did He die for our sins? We say that He died for our sins. We accept it, yes, because Churches are telling, people are telling, Bible is telling. But how? He suffered for us. Then why are we suffering? But when He said, “You are to be born again” we don't pay any attention to that. For that you have found out an escape. You take your child to the church and they put some water artificially and you accept, “All right, we are born again." I met people who are certified born again. They quarrel with Me and fought with Me for nothing at all. I said, “How are you born again? If you are born again, that means an egg becomes a bird. Have you become something different? Is there any transformation in you? How do you believe? Why are you so self-opinionated? If you are born again, what happens to you? What happens to you? What is born again in you?" Born again is nothing but the Kuṇḍalinī awakening, which rises on top of your head and here is the seat of your Spirit. Of course, it resides in your heart, but the seat of the Spirit is here and once it touches that seat, immediately you start feeling that subtle thing which is all-pervading within you. For the first time you feel this Cool Breeze of the Holy Ghost. Holy Ghost is nothing but the power of God, the power of

His love, which is called as Ādi Shakti in Sanskrit language.

We don't have to accept anything else from outside, any dictionary we don't have to accept to give answers to things, to mysteries that we have been suffering all these days. Once this cross, which is between the ego and superego is enlightened, Christ is awakened there. He sucks in both these things, your Karmas, your actions and your conditionings, your sins. It is sucked in. There is no more for you to suffer. Why do you want to suffer? Some people have started another theory that we must suffer if we have to go to Christ. Why? Did He not suffer for you sufficiently? Did He not do that? He has done it, then why suffer? Be joyous that He established himself there at that point. In the Hindu scriptures, He is called as Mahāviṣhṇu. But if I tell this to them that this was Christ, they won't believe Me. If I tell this to Christians, they won't believe Me.

They don't want to believe it because for them Christ is their contract. They have a contract with Christ, as if they are the contractors of Christ. Nobody dare say anything about Christ. It's only they who are the Christians and they who are the Hindus, they who are the Sikhs, they who are the Muslims and they don't know anything about reality. Just fighting morning till evening in the name of God, the One who is the ocean of love, compassion and bliss. They are so disturbed, so upset, so violent that one can easily see there is nowhere the blessings of God. There is no blissful state. There is no peace in them.

Because there is no peace within, how can you have the peace without? And this is what it is that one should

understand, that in the name of God, many things have been done which are absolutely against it. They are anti-God activities because if you become a fanatic, you are anti-God, absolutely anti-God. You have to see that God exists for the whole universe. Nobody can take His contract and can organize it. When I say this, of course there will be people who are interested in things with which they are identified. They want to carry on with that kind of identification; maybe they get some money out of it, maybe some sort of a name or something free.

But what is most important is your Spirit. Why identify with anything else but your own spirit? You cannot get money out of it. No. The joy of Spirit is the reward of Spirit. Why do you want money? Why do you want fame for it? Why do you want anything of these worldly things that are so transitory, temporary, will finish off? Why not ask for something that is eternal? Why not ask for the eternal life of Spirit? And that if you ask, it is at your door steps, you can get it. It's very simple and easy. When you say it is simple, people can't understand. They think, “How can it be? You have to stand on your head for one life then you have to stand on one leg for one life." That's the idea they have got about Christ.

There is no need to do that, Christ has done it for you. Believe Me, He has done it.

So now, how to understand it is simple? In this room, say, there are so many lights and we all can see each other. The room is enlightened. But what did you do? You just switched on one switch, very simple.

If you ask anybody, “How do I put the light on?" I just put. There is a light there. Just switch on. That's how you get

the light. But for a person who has never seen electricity, it must be a wonder. How just switching on light, so simple. It is not in a way. It is made simple for you, but there is a big organization behind it. There is a big history behind it and there are so many people who are working it out. There is a big machinery. In the same way, whatever looks so simple to us is tremendous, is great.

But God Almighty with His care and tenderness doesn't want you to know anything about it. Forget it. You just jump into it. You just enter into the kingdom of God and enjoy the bliss, that's all. Why do you want to bother about these things? Of course, as we are very thought-oriented, people want to know about it. That's why one has to talk about these things. But best is to get your enlightenment first and then talk of it.

It's a headache to talk about the electricity and about its history, where it enters and the problems they have had and then after all these when you have tumbled down, fallen down, everybody hit each other, kicked each other, then say, “All right, now it's very simple. Just put on the light." It's better to be other way round, that I say, “All right, put on the light and then we'll talk about it." I am so happy to see so many people in Cambridge today, really very happy because I have been here before also. But we had no response. I was surprised. Here where there are many false Gurus are working out their tricks. People have collected thousands of pounds from this place, Cambridge, which is the seat of learning. Here so many educated people live, intelligent people live, have been befooled completely and have been pampered.

Their ego has been pampered. They have gone into such trips which are very dangerous.

We had somebody from Cambridge in Sahaja Yoga, very well educated person, got into epilepsy, going to such a horrible fellow. Lost all his money, everything, bankrupt and also epileptic. Educated, very well educated, first class boy, ruined for his life. But why it happens to us, we must think. Why we are enamoured by such people? Because we believe in the superficial thing; because it is being advertised in such a way. These people come with a circus because they have to attract you. They have to attract you for their purses. They have to attract you for their own powers because they want that people should be dominated by them because they can extract money.

Their interests are very low, base and we don't see it. We don't understand it. They pamper our ego.

They talk of big things, “We are going to make you a minister. We are going to do this." We say, “All right." We follow all this nonsense. Imagine. This ego is such a tricky thing. It plays tricks not only with others but plays with yourself also. It cheats you. The so-called intelligence of the ego can cheat you and that's how many people are lost. Those who are seekers of ages are lost because these horrible Satanic forces know how to play the trick, how to play the trick with you and how to take you to their own domain of Satanic forces by which they could extract all your blood.

I am so sorry when I hear that these things have been happening all over. But in the places where there has been the seat of love, the Goddess Saraswatī reigns, where people educate themselves, all these thing have

come slowly and settled down. There are other things also which are very dangerous. Like people who are, call themselves, psychologists. They can be very dangerous people. They are unauthorized. They have no idea about the psyche. They don't know that psyche also has another side, which is the right side, which is the ego.

They can be very dangerously placed, person like Freud. I don't know how people believe in him. In England, there are so many Freudians. I am surprised because I used to think that at least English are the wisest among all the Europeans. But more than the place where he was born and worked out in Vienna, there are more in England. It is most surprising, what has happened to our wisdom. Even logically we can see that he was a hopeless case. First of all, he had bad relations with his mother. Can you imagine? He had no sublimity of any kind. He was worse than an animal. And secondly that he died of cancer in such a miserable condition. And he was nothing but a miserable personality. How can you follow a man like that blindfolded because he suggested that you are a sex point. All your relations are based on sex.

There is nothing sublime. Now see where is the sex point. It is the last, here there is the red and here resides the innocence. This first center, which is the innocence within us, is the child within us, is looking after the Mother Kuṇḍalinī that you have. She is your Mother. Everybody has their own Mother settled down in their sacrum bone, so sweetly, waiting for an opportunity to get this realisation. She is going to give you your second birth and she is going to work it out and this innocence of

yours which you may kill any amount, it's still there and they attack that innocence.

Today I find in all the Western countries there is a big attack coming on their innocence, on the children.

They do not understand that there is, sex has nothing to do with your evolution. It is not important for your evolution. Of course a married sex which is a sensible sex, which has a sanction with the collective, is very important, no doubt, for the society and everything. But here if you play about with your sex, it's a dangerous game. It gives you all kinds of diseases; it gives you impotency, all sorts of other problems and worst of all, insecurity in the whole atmosphere especially for the children.

This is what it is. We have not been able to use our brains. Use your brains. God has given you brains, come to logical conclusion. Like the Mayor yesterday asked Me, “What do you do with them?" I said, “First I will bring them to logical conclusion." See what should we expect. We have known that Christ has said that, it is written, “Thou shall not commit adultery." I say, “Thou shall not have adulterous eyes." Are we Christians aware of these warnings? Not to have adulterous eyes, just the opposite we have.

So that the eyes should be clean. There should be no lust in our eyes. It is to be at that point, not at the eye level, not at the brain level. It is at that point and it should reside there. There is placed your innocence, because innocence guards you against all wrong doings, all wrong things that you do with your sex and that's how you get into troubles and you have problems.

Yesterday we had people there, many people came and as the radio fellow has told Me that you better talk about how you cure people. They will be very much interested. I told them all how it happens and we did cure so many people there, of many problems and so many things can be cured and if you want, you can get My tape to know about them, how it happens and what Chakras give you this. But in short I'll tell you how we develop problems within ourselves.

Now one thing I would say, that when I am discussing this, human mind is so funny that immediately they start reflecting upon themselves. Firstly they will feel guilty. “Oh, I have done this." Immediately they will start thinking that, “I have got cancer” or, “I have got leukemia” or “I have got that." So if I tell you about the symptoms, it can be very critical.

There is a very interesting book I read long time back when I was a child, `Three Men in a Boat'. I am sure all of you must have read it. It's a very interesting one. In that a character of one gentleman who said that never read Materia Medica, the book about medicine. Once he read it and he thought he had every disease, every disease except for housewife's knee and the doctor was amazed when he told he has this disease, he has that disease. He said, “Why not a housewife's knee?" He said, “Because I am not a housewife." Otherwise he had practically every disease and he wanted a medicine for that doctor was, that time doctors were wiser I think, he didn't want to take money out of him, so he said, “All right, I have given you the medicine but you have to take it when you go away from here. Go to your bedroom and then you can

take this medicine." He went home and opened that and there was nothing but a paper and on the paper it was written, “You are the greatest fool I have ever come across. Never read Materia Medica again and you are absolutely healthy." So when you start telling them how the diseases are caused, also people can start thinking, “Oh, I must be having this trouble and that trouble." Nothing of the kind. Please don't think like that. I am just telling you because you should not go into it again and it should not happen to you in future, not in the past. And those who have had problems also can be cured. It's not difficult. It can be cured. When you get your enlightenment, you can cure people. You can also cure. It's not difficult.

So, now we start from the imbalances that we have. For example, a human being has another funny habit, is to go to extremes. If you tell him, now in the Newspapers or, say, in the TV it appears that your legs should be like this, the measurement of the legs appear, or the measurement of the body appears, all the ladies will try to be that, to become like the form that is given. But why? It is, it might be some sort of an enterprise that people are trying to sell something just to make you thin or fat or whatever it is and that's why they are publishing these things. Why just you go into it headlong? May not be required at all for you. Now when they do it, they do it so much, so much over-do it that they develop really the problems which never existed in them. They were normal people and suddenly they become sick people.

So in this way, we have so many extremes we go to. For example, we are people who are right-sided and left-

sided as you can see here, the people who are emotionally very rich and who go to the emotional extremes and the people who are more mentally rich and who go to the mental side more. Those who have any desire and just work with their desires and weep for it and they are the most unhappy and the most miserable people, I couldn't get this and I couldn't get that, they are the left-sided people.

The right-sided people are that “Why did he get that?" “I must also get it." Such aggressive people are right-sided.

Now the people who are on the left hand side think of their past, “I was so very happy. Now I have married this wretched man and I am very weak." The man will say, “I have married this wretched woman” or some sort of a thing. They go on worrying about themselves for nothing at all and making themselves miserable.

So, we have two types of people. The another, one extreme case we can say, is Hitler. Hitler was the one who was so aggressive. He used his aggressive policies. He got people who were dead who were aggressive and used them to entice, to become aggressive. They could not see through. They could not understand that they are not a special race and they became such racists which one can't understand with Human understanding that how can there be a race superiority when God has created all of us. It's nonsense. It's absolute nonsense. It has no meaning, no basis. It's not natural. God has created everybody separately in a different way but this kind of a thing comes into the mind. Then you are identified with certain ideas on the right hand side that you are an aggressive person.

On the left hand side, as I told you, a person makes himself miserable because he thinks of the past, but on the right hand side, the people make others miserable and aggressive sort of. Both sides are wrong.

You have to be in the center, neither in the future, nor in the past.

So how to be in the center is the problem. By saying it or by brain-washing it, it cannot happen. For that the Kuṇḍalinī has to rise but you have to keep the balance. You shouldn't go to the extreme of anything.

You should not become identified or clubbed with something which is not normal. We should treat it with normalcy about it. Like if you ask a person now, “You have to do Haṭha Yoga." There is a new system that has started, Haṭha Yoga, without knowing what this Haṭha Yoga is. What was the basis of Haṭha Yoga? There are Ashtangas and all these things have to be done. I have seen people doing only that little part of it, the Vayayama, which is so indiscriminate, which has no sense as to what Chakras are catching, where is the Kuṇḍalinī, what is the problem. Such people can develop heart problems, tremendous heart problems they can develop and they can be extremely negative people because though they appear to be very positive, they can be very, very dry. They can develop divorces. They can be very aggressive. A time will come when they will have no emotions. Even when their own child dies, they will not feel it. They can be very, very dry. Now we don't see that dryness in the back. We do not see that that we are not feeling the emotions of another person. We do not think that that is important.

Left-sided people are the other way round, as I told you. But when they go to the extreme, first they go into their subconscious. In this they see what had happened and they think of their previous lives and all that and then they can go into the collective subconscious if they go on pressing it too much. Or some of the people who are interested in their purse, all such base things, can entice them, can hypnotize them, completely hypnotize them and push them on to the left side.

Now cancer develops on the left side. Leukemia develops from the left side. Multiple sclerosis develops from the left side. I haven't seen one patient who has come to Me, who is having cancer, having leukemia or multiple sclerosis who is a right-sided person. And ultimately they can be epileptic, or they can become lunatic or schizophrenic. All those things can happen to them.

The right-sided person, on the contrary, will get a heart attack. He'll get a heart attack. Definitely he'll get a heart attack, if he goes too much with it. But first of all he might develop a liver, very bad liver, hot temper with it. He may develop a pancreas trouble that could be the diabetes. He could develop the spleen trouble which could be a kind of a leukemia which comes out of speediness but it has to triggered by the left side so it is between the, first the anemia and all that will happen and ultimately he can get leukemia after that. And many children also become patients of leukemia because their parents are speedy.

Extremely speedy people get leukemia because they are all the time acting on emergency. Simultaneously, they are working on various things like, you are driving, you

are eating, you are listening to the radio, horrid news. Early in the morning you see in the newspaper, all horrid thing are there. They will never give a good news. You'll be amazed. We have been trying to tell people that we have found out solutions to many things, please publish at least one line, half a line, but they would not.

But if there is a calamity somewhere, a horrible thing happened, early in the morning, you open the newspaper, it's the only thing that is talked of. You become so much upset that emergencies that... Then you have your breakfast, you have to catch the train, you have to rush up, you rush up, then you find that your train is delayed, you start shouting. Specially you all get worked up. Ultimately what happens is that your spleen goes out of gear. It becomes crazy. When it becomes crazy, it's a speedometer, it controls our speed and you become so speedy that nothing can fit into you and the speed of the production of red blood corpuscles is so much increased that they become malignant. But of course the triggering, as I said, comes from the left side.

So sometimes the right side can create a condition for the left side to act, can also be just the left side can work out. If a person is affected, say, by a position, if he lives near a funeral place or some place where there is a cemetrey or in the churches also you have all the dead bodies there, I mean it's something I can't understand. People don't know about that. Why to put in the churches, the dead bodies? I mean, normally, anybody who dies must be cremated except for the realised Souls. Realised souls are to be buried. It's a simple thing, because they give fragrance to the Mother Earth, they

give fragrance to everyone. But if you bury a person who is not a realised Soul, supposing he is an evil genius, you know about this that the souls wander about. And I have lived, since I have come to London, always near a church. I have found all these souls coming up in the night and they are horrible things and we walk over them. They are sleeping there and we trod on them. It's a wrong thing. People have no idea as to how to deal with the dead and that's how people have also created a double problem. The cemetrey is in the city. The center of the city, there will be a cemetrey. All children are going there. Everybody is going there. Pregnant women are going there and these busy bodies can attack you. It's a fact. They exist.

There is no doubt about it. Even the doctors say that there are proteins which they call as Protein 52 and Protein 58, like that and these are the proteins which invade us, our being by which cancer is triggered.

And what they say that this comes to us from an area which is built within us since our creation, means from collective subconscious. But, I mean, they cannot put it together as I am putting it because they see things from outside [and] I see things from inside.

Now when I tell about this, people don't like it but it's a fact. You should not play about with spirits. These spiritualists, these charismatics and this sect and that sect..., Pentecostals are nothing but possessions and these possessions can be horrible and most of the lunatics and all these people are with possessions. You must have seen a woman walking. Suddenly she becomes blank. Her eyes are open, nothing wrong with

her. Doctors can't cure. She can be easily cured if you can remove the possession from her. These are all horrible things, which can ruin your life and you do not understand why doctors cannot understand because they don't understand that there can be spirits. They don't want to accept it.

You can't see the spirit until and unless you become a Spirit.

That is the problem, is that in English language there are three meanings of the word spirit. One is the Spirit that is Ātmā. Another is the spirit which is dead and the one that you drink is also spirit.

So you can understand how can you have three words, which are just opposite each other meaning the same? Now I am praying [to] the Spirit which is in the heart, which is the reflection of God almighty.

But this Spirit, unless and until it is awakened, no use talking about it. Better have it done so that you know how beautiful you are, how God has created you with such beauty, care and you are all there intact. Nothing is missing. You don't have to worry about it. You just don't have to think about it. “Oh, Mother, how can I be? I have done this. I have done that." Please don't think. First thing that I always say before starting the program, before the demonstration of it or before the manifestation of it, that first of all say in your heart of hearts, `Mother, I am not guilty.' That's one thing, this idea that you are guilty, is absurd. It has no meaning at all. It is not even a speck in that Ocean which cleanses you.

So you don't have to say that, that, `I am guilty.' Please, for heaven's sake, all of you have to say that in your hearts before we start any program further. Because how can you be guilty? As He is the compassion, you can't imagine what compassion He has. He is forgiving. He is complete forgiveness.

At that time if you have to feel guilty, you really insult His power of forgiveness.

So we should not feel guilty about anything. Whatever has happened has happened. Forget the past, doesn't matter. It is a very important time, important moment you have arrived. The time of resurrection has come. The time of blossom has come. You have to become the truth. It has to work out and it will work out. May God bless you all.

I would request you, if you have any questions, you can ask Me questions. But don't ask irrelevant questions and, you see, offensive questions. That's very wrong because, you see, I have nothing to get out of you, nothing I tell you, except that little politics about it that I am a Capitalist in the sense that I have all the powers within Myself and I am a Communist because I can't live without sharing it.

That's the problem and that's why I am here and so people should not ask questions which are offensive for nothing at all.

If you want to get it, you can get it. I cannot force you as I have told you in the very beginning. It cannot be forced. I cannot promise you. I am sure it will work out, if you little bit cooperate with Me.

So be kind to yourself and be open. You need not have blind faith about Me, not at all, not at all, but you should be open to receive. If it works, well and good. If it doesn't work we'll see it the next time, doesn't matter. I am going to be in London at least for three years more. I hope so. May God bless you all.

Now please ask Me some questions.

Question: When you say that spiritualists... spirits are wrong... is it wrong for someone who knows the secret to try and do something about it... what is so wrong with it?

Shri Mataji: You see the spirits are the dead spirits, are the people who belong to another country.

They belong to another state. All right? They are in the subconscious area. If you start allowing them to walk into our lives, there will be many who will come around as immigrants, you see. And you don't know what they are up to and they will attack you. Moreover, those people who are realised Souls or of higher nature never stay back. They know that this is over and we should go back. Moreover, it is our responsibility also to see that we do not trouble them. I mean, we have used them; they have lived with us. Now we should give them their freedom. By keeping them around, we torture them. We trouble them.

And sometimes they can be very, very troubled. Even if they are good people, we really trouble them. Let them go. That's not the time that they should be here and they will be back again. Why trouble them? It is because you are identified with them.

Now about sickness, people say that for sickness, I have known people who are spiritualists, who try to cure. But what they do is to remove one spirit and put another one

into it. If a person, say, he is a person who is wasting money, say in horse riding, so if you remove him from there, he'll become an alcoholic. If not, he'll start beating his wife. Because there is no transformation, you see. There is a gap always if you...

So it is better not to have some sort of a screw there which is always to be replaced by something else.

So these spiritualists, also those who try to heal, are just giving you relief in the physical being. Physical being is not so important. It is part of it but we are not only physical beings. We are also mental beings and emotional beings. If you try to be only physical being, do everything only for the physical side, then you forget the spirit. And the spirits get angry with you.

So you are three of these things which are to be integrated through your spiritual ascent. All right? So that's why in any case that kind of a work is of no help in any way to ask because ultimately we have to see to the general good of everyone.

I have seen spiritualists who have been acting as spiritualist end up their lives very miserably, most of them. Not only that but whenever they are in a program you get tremendous heat from them. All those people who have tried such tricks... I'll give you a very good example of Doctor Lang, who was, who died, late Doctor Lang International Curative Center was in London, I don't know if it is still existing or not.

I came to know about it because so many people in India suffered from that curative center. And they came to Me. I had no idea. Now this gentleman died long time back and his spirit entered into a soldier, not into his son, but

to a soldier in Vietnam or something. And this soldier, now they write all this story, I mean they are very frank and honest, I must say they are not hiding anything.

So this gentleman came to England and told the son that I am the father and he told him secrets where things are and all that and he convinced him that he was the father. He said that you open a clinic with this name, Late Doctor Lang International Curative Center.

Now what they used to do, you see, he got hold of many doctors who were sort of unhappy or some sort of thing or those who were lingering behind.

So, he used those spirits and what he did by using those spirits, he used to write a letter, which I have seen Myself, in many cases, that at this time, at this hour, we will enter into your body. I mean, they frankly told. They didn't say that `We are going to do anything Divine and we'll enter into your body and when we enter into your body, then what will happen, that you'll start shaking. Don't be worried. It is we who are in you and once it happens,', it would happen after three months or four months but they would give exact timing, `and then you'll feel better.' Now these people who came to Me suffered from tremendous nervous trouble. And out of all these who came, even one percent I could not cure, one percent. They were such gone cases. They had a miserable old age and I still know of a lady; she just lays down in her bed and goes into tremors and things and nobody can help her. I haven't got time to pay so much attention to one individual only.

So it's a miserable case. Every time I go there, she meets Me. I put her right. Again she goes back to her bed [and]

again she gets ill. It's a very long process. I am not here to cure you, I must tell you very frankly, but to give you realisation. But as a by-product of that, you all get cured. That's it. Just as a by-product of that, you get cured.

Moreover, you must understand that God is the source of all common sense. He will only cure such lamps which will be His lights later on because we don't look after lamps which are gone cases.

So they can be born again. But God looks after those people who can give His light to all. Of course, many people get cured. I have seen in London, the first wave of Sahaja Yoga started, we have thousands of them they got cured. But out of them very few really took up Sahaja Yoga and helped others. They just forgot.

Of course, they have tremendous respect for Me. When I go to India; they all fill the hall and all that is there. But they are doing nothing for Sahaja Yoga. They are not doing anything curing for others. They are not raising their Kuṇḍalinī. They are not giving realisation.

It's really...

Sometimes I feel that so many people have been cured, so much God has done for them, but they don't understand why God has done it for them. It is to give it to others. You don't have to do so much for Sahaja Yoga. You don't have to pay a single pi [short form of Paise]. Nothing is needed. Only thing is, God has given you this power. All right, just give it to others. That's all. It's very simple. And you feel so happy. You are so employed by God that you do not feel bored at all. It's such a wonderful thing.

But one must accept that if He has been kind to us we have to be kind to others. It will just automatically work, no doubt. It works. I know people get cured, no doubt about it.

Any other question please? Yes, please, little loudly… can you say loudly, please? Question: Why is the picture sitting on the table lying next to you?

Shri Mataji: Why? You don't like it? It's a question really something I can't understand. You see, if I am something, if this picture is My true picture, then why not have it? All the pictures you have of Christ are not His own. Very few people have seen Him and also there is no one who has taken His picture.

Actually, when I see the pictures of Christ I get a shock. I said, “How can this be Christ?" I mean, this miserable creature cannot be Christ at all, but you don't mind having all these things around.

Even the cross that you have can be horrible, made of plastic, made of this, made of that. That gives horrible vibrations to you. You don't know anything about it. With this picture, you'll be surprised, the person who first got realisation got through this picture. In this picture there are vibrations. When you will get realised, you will know that only this picture has that vibration because the real thing it is, thank God that science has given us the real thing. If there were cameras before, we would have had pictures of all those great people. Because there were no photographs they said, “Better not have any pictures." Because all the pictures were imaginary, done by people who wanted to have some money. With this picture, many people have been cured. All right? Especially in

Australia, a miracle happened. That's how media took Me over.

There was a lady, a friend of a very big journalist and a businessman there who was in coma and doctors said she has got a brain trouble and she cannot come back to her normal condition. There is a damage in her brain and she is dying. Then everybody had given up hopes and there was one Sahaja Yogini and she said, “All right, you just allow me to put this photograph under her pillow." And you'll be surprised: she came to consciousness next day. By the time I reached there, she was very conscious.

So all the media was there to receive Me in Australia. I was surprised because media is the last which attends to anything that is real. I was Myself aghast to see them there. But it's one thing, no doubt and it's really true and it happened and now that woman is walking about. You can write to her and find out.

So this is what it is.

It's a very good thing that has happened that we can take pictures now because I think, I cannot meet everyone in this world but they can at least see My picture. People get cured by this picture. What's wrong? Supposing your picture was like that, I would like to put it there. But is it like that? That's the point. You see some people say, “Why you are doing it?" I say, “Better you do it. I would like to retire." Actually, today My husband was very angry with Me. He said, “Why are you there on Saturdays? Why don't you come?" I said, “Now it has been advertised too much. I just can't come." He is not, he wants Me there for some purpose and he was not very happy about it.

So I would be very happy if you could sit down here and do the job. You see, I'll be very happy. I'll retire. But you can't do it. And why to feel bad if I can do it? Because you can do many more things that I cannot. For example, I can't drive, I don't know how to write a check, I don't know anything that you know.

So many things there are that I do not know. You'll be amazed. I am so simple that people can call Me a rustic woman because I don't know many things that you know. But I know one thing: that is awakening of your Kuṇḍalinī and then another thing is that this photograph also knows you somehow.

Yes please? Question: How did you discover such a quick way of Self-realisation?

Shri Mataji: Must be something about Me, sir. You better find out. It's true. It's true. But something about Me, definitely. You see, whatever our education is, you have come to us with wisdom and all that, it has come to us through other English writers and Western writers. But if you really go into the literature, you will know that it is already prophesized. Even William Blake has prophesized absolutely about Sahaja Yoga. He said that God of men [men of God] will become prophets and they will have powers to make others prophets. But who reads Blake? No one; they read Freud. He's described to such a detail about Sahaja Yoga that sometimes I am amazed. No Indian seer has seen that what William Blake has seen.

But our mentality is funny because once he had his exhibition; I went to see his exhibition and people were looking at nude women that he had painted. He was innocent. He didn't paint any nudity; he just painted

women without any dress, just the body. But they were looking at the nude women.

So, look at our mentality. Looking at William Blake also we praise him because he has painted women without dress.

He was innocent.

It has to be done. The time has come. At the beginning of life, I know there were hardly one or two people, but today is the time, a time where many have to become. As you know, on the tree of life there were few flowers. Now there has to be many flowers because the blossom time has come and it has to be simple. But supposing it is simple, must you not accept? It's like My grandmother saying, “I don't believe you can go to moon. How can it be possible?" It's like that. It's a jet age. If there is speed outside, if the tree is growing outside too much, something must have grown inside: the roots. And this is the knowledge of the roots which you do not know, which you should know, how it has grown, what it is sucking. All right? If it is so, why not have it? I mean, if I say there's a diamond, will you refuse it? You'll say, “All right, if it's diamond then let us see." It's more than all the diamonds put together. It's true. It is very simple to understand if you see God's point of view. This creation has to have a meaning. And you are going to give it the meaning. If it doesn't work out, this creation, it is going to destroy, because human beings are going to be destroyed.

You can see that. You can see around what is the situation is.

Question: *[UNCLEAR]*.

Shri Mataji: It's a little confused question because, you see... but I understand what you are trying to say, that people are seeing it through now because they are intelligent. They are seeing through and it has reached a certain culminating point, you see. All these philosophies have reached certain culminating point and they are seeing that, what is the result. Now the time has come for them to see the result of all their mental projections we have had about everything.

So people are thinking that there must be an answer to all this. Whatever we have done may have been little wrong or something has been more linear.

It is not expanding us and it is not giving us what was promised to us.

So they are thinking about it and they are going down to find out the answers. That's why there is a seeking, no doubt. But it is also the plan that they should be here, that they should be on this earth at this time.

All, so many things have worked out. But the reason is that there is confusion today. In this confusion only, you are going to find it out. If you were not confused, if you were sure that you are doing the right thing and you have done whatever is right which was before this, then you would not have thought of it.

But just now people are seeing that we are relatively living: “This is also right. This is also right." How can that be? If right is one then it should be one.

So people are thinking about it. They are seeking.

In this seeking they might do mistakes. And people might do many mistakes like going to wrong Gurus, might

spend money for it, may become bankrupts, might go to drugs, might do this punk rock... all kinds of things. They are nothing but expression of that feeling within that there is something beyond.

It's true that this confusion has led to this seeking. No doubt about it. Because they are all challenged.

These philosophies are challenged. Everything is challenged. And people see that it has given no result.

Our forefathers did the same; we are doing the same. What's the use? We have to reach somewhere. For example, Jung has talked of universal unconsciousness much before I came. They have prepared the stage for Sahaja Yoga, I should say. All right? Question: [About another Guru].

Shri Mataji: Oh, now don't ask about them. What do you think about him? What have they done? What good have they done to you? In general, there is one principle you must apply to all of them. On the gross, anybody who is interested in your money is not your Guru; he is a parasite, on the gross. In the subtle, anybody who doesn't manifest your powers has no powers of his own. These two you apply to every Guru and don't ask Me individual question. The one who is interested in Rolls-Royce, I mean if you think him to be a Guru, I must say this is something surprising. Very surprising. It's a *[UNCLEAR* paras attitude].

Yes, he can... [probably Mother permitting someone from the audience to ask a question.] Question: *[UNCLEAR* I wonder whether you have anything in your faith which corresponds to the Apostles? In the Scriptures? Do you have any Apostles?]

Shri Mataji: It's again confused, My child, but doesn't matter. Let's see now... they had a hot air on their head. Did you say so? When was it? Where was it written? You saw it in pictures? Reply: In the scriptures. *[UNCLEAR* Pentecost]. He sent out twelve men to do his work.

Shri Mataji: Yes, it's all right. Now, I'll tell you what. You see, hot air will come out of everybody's head now. Even you are sitting here. Because there is heat within you. First the hot air will come out. You see, Christ tried to give them realisation but they didn't believe Him. Believe Me that they never believed Him till he got His resurrection. No, till they got His resurrection you see. Till He got his resurrection, they were still like this you see, little half baked, not fully there. And that's why the hot air came out.

You will see now, gradually as you'll settle down in Sahaja Yoga, when you will be fully equipped, when your vibrations will flow well, it will be Cool Breeze. Otherwise, hot air comes out. You see, with people who have... most of you will first have hot air, no doubt about it because there is heat within you. Now, I will tell you people very frankly about it that when it is hot, say for example take Helium, Helium is a gas, you know that. When it is hot, all the molecules in it fight within, revolt against each other. They are absolutely volatile. But when it cools down, they become collective and they move in a collective way.

Even in science it has been shown and it is the Cool Breeze of the Holy Ghost which has been described in the Bible also.

So it should be a Cool Breeze because even the Apostles that Christ had, they did not get their realisation fully

because they were doubting Him. Not doubting, I would say they did not have that faith till they saw He was resurrected. And after resurrection to have faith was rather wrong, isn't it? Untimely, I should say.

I can understand that. That time, you see, this was not there. I mean, to talk of realisation itself in that country was something so out of the blue. They were fishermen, not Cambridge students and you could not explain to them. But still they were simple people and they were honest, no doubt about it.

But to their honesty, they could not understand how... what this man is saying about Self-realisation or of second birth, you see. And so they doubted, was all right at that time. But today it is not all right because once you get realisation, you see for yourself. All right? Question: *[UNCLEAR* also had this experience after the resurrection].

Shri Mataji: You see, they had faith with Him. But I wouldn't say they got realisation, except for John, I would say; but others, I am not very sure. Because the way they write about His works, it's something an outsider writes, you see. It's just a... not a person who is innate. You see, when they write, that's not there, I find. But the worst of all I feel is about St. Paul who should not be there at all. He had nothing to do with Christ. I can't understand why he is there because according to Sahaja Yoga standard, he was a supraconscious personality. I don't know why he put them there because he saw a cross or he did all this. He was the one who was killing all the Christians to begin with and then suddenly, I don't know how, it was a Roman trick perhaps to put him there, I don't know why but somehow I cannot explain it.

Interruption [from the audience]: *[UNCLEAR]*.

Shri Mataji: No, that's not the experience. Experience is different. The experience you can get it.

You see, the other day only one lady saw a cross on Me. She saw auras. Another one saw something else; that's not the thing. That's not reality.

Question: You are saying his experience did not exist but yours is existing.

Shri Mataji: Yes, because that you can also get an experience. Supposing you are taking LSD; supposing, all right? Anybody is taking LSD, they come and see Me. They just see lights coming out of Me. They don't see Me at all.

Interruption: *[UNCLEAR]*.

Shri Mataji: You see, you also are taking too much time of others. All right? Now leave it. You come and see Me, we'll talk about it. You see, we should see what have we got out of it. All these discussions and these dogmas, what have you got? You see, what are we going to achieve out of it? Just think of it. What is the use? You have to get the reality. Why discuss all these things? We have so many clergies here who have been studying Bible and all that and they are now fed up. Their heads are off now. This dogma, that dogma, this, that, it's over now. Finish it. Just get the reality first then we'll talk about it.

All right? You just get the reality, then.

Question: *[UNCLEAR]*.

Shri Mataji: Of course, that you will be in meditation. You cannot meditate; you get into meditation.

That is the most meditative state. Now, so I will tell you what happens to you, all right? Let Me talk on that. That's a better question, a very good question.

First when the Kuṇḍalinī rises, all right?, you won't feel anything, most of you won't feel anything, but some of you may feel. You may feel heat in the body. You may feel kind of a, some people might feel the throbbing in the back in the spinal cord, might feel, little, not much. It's not very painful or anything.

Don't be frightened of anything. Then it will rise.

Some of you might feel the rising, because if there are obstructions you can feel the rising. If there isn't any obstruction, if you are not misidentified, if you are not extremist, if you are in the center, normally it shoots off in the split of a second.

When it shoots off, what do you feel is, you feel a Cool Breeze coming out of your head. But normally, as I have seen, people are complicated. There are complications in the physical, mental or emotional being.

People are not so balanced. Mostly they have liver problems or such things like that. You might get heat coming out. First the heat comes; quite a lot of heat might come. When the heat disappears, then you start feeling the cool coming and you feel very nice inside. Then the bliss starts coming. You start feeling absolutely relaxed and you feel in your hands the Cool Breeze is coming. But first of all you feel on the head. You should feel yourself. Nobody is going to certify it for you. There is no falsehood about it. It's a thing that you have to feel it.

And once it happens to you then you can develop it. Because though the Kuṇḍalinī at the first shot comes out but then She tries to look after your different organs if they are sick, your mind if it is overloaded, or anything that is wrong it creates a balance *[UNCLEAR]*...

So you have to just know how to reestablish it yourself because it is your own. Everything is your own. It's, you can think like this that this light is your own. It is your own lamp. I just have come because I have got the flame in Me, perhaps. Then I put the lamp. Your light is enlightened. Now you look after your light. It's your light, it's everything yours.

The power is yours. It's your mother. It's your own spirit. And then you work it out. Unless and until you work it out, you will not know whether it is true or not.

You have to work it out. Now you should not be identified with anything, that's one thing is true; because you have not seen the reality so far. Say, for example, Mr. X says, “This one says so." All right, must have said it but he is not here. Today he is not here; it is I who am sitting here. All right? So it is better that what I am saying you better receive it because it's nice to live with the past. Like, people want to believe in the past because it is easy to handle the past, or live with the future because it is easy, or live with somebody who has written a book or something he had done to us. But why not believe in yourself that so far you have not got anything of your own and I am saying that you have to get it of your own.

That's the main point I am trying to say, that you must not believe into anything till you have found it yourself within your self. That's what it is. And if you are identified

with other things which you have been doing, most of the people who have paid to some Guru or some thing, get very much identified with them. But what have they given you? Have they given you any powers? Nothing. Can you feel another person? In collective consciousness, you should be able to feel another person. After realisation, immediately you can start feeling another person and yourself. Immediately you can feel, but you need sensitivity which we lack quite a lot in the Western world because the *[UNCLEAR* `light is very small.'] But in India I have seen people get realisation [and] immediately they start feeling it like that. It's very easy to cure Indians, I must say, but difficult to cure Western people. They are very complicated, ego-oriented, over-read, all that is there. But once the Western get it, they settle down much faster, much better, much deeply than Indians do. It's like if you have the teeth, you don't have the food; and if you have the food, you don't have the teeth. It's a funny combination, this world is.

Question: *[UNCLEAR]*.

Shri Mataji: All right, let's have it. Now see what sort of thing you work out in Cambridge. All right? So all of us should forget all about these things. Be honest to yourself and fair to yourself.

So far, by doing all these things you haven't found yourself. Accept this fact. I have nothing to gain out of you.

I haven't even written a single line, a book, nothing.

So you must know that it is your own. I am just like a banker who is cashing your checks. Better have them cashed, for which you don't have to pay anything.

You don't have to put in any effort, nothing. But once you are realised then you will know what is to be done. But first get your lights on.

All right, now just cooperate with Me as I tell you, without much questioning. I am not going to tell you anything horrid nor am I going to trouble you by anything. It is your own blessing just waiting at your door step. Can you believe Me now? If you can believe only this much that I am genuine, it will work out.

May God bless you.

All right, now put your hands towards Me and if it is not very inconvenient, please take out your shoes because this Mother Earth also helps us. It's better to take out your shoes; it helps. If you are sitting on the ground, it's all right. You have to touch your Mother Earth with your feet so if you can take out your shoes easily, it will work out faster. Moreover, it is a very tight thing on the feet. Now this is the question of language of hands which is an international language always, but this is the language where the hands get enlightened and the hands have to speak. As Mohammad Sahib has said it clearly, “At the time of resurrection, your hands will speak." So, your hands have to speak and that's how we have to see how our hands will be speaking.

So these centers which are shown here are represented in your fingers.

So, these are five, six and seven, this side left and right. Once these centers are enlightened, then you can feel yourself and feel others. To begin with, we do not understand what it is because it is too great a thing. But

once we start using it, we are amazed how we start transforming, how things start happening to us.

All right, now just put your hands straight like this. Sit comfortably. Be comfortable. If you have anything tight, please make it a little loose. It's better. Not that it makes any difference; it's very subtle.

But why I am asking you because attention goes there if it is something tight. On the waist also if there is something tight you see the attention is gone. Make yourself comfortable. That's the main point, be comfortable so that for a while you could be with yourself comfortably. If you are wearing any big malas and all that, please take it out. It's better. It's heavy. Anything like that, please take it out. It will help us. Just first get yourSelf-realised and then you start understanding.

Now, after this I have to tell you one more thing that you have to keep your eyes shut. The reason is that when the Kuṇḍalinī rises above this which it wants to pierce through, at that time it presses this point and the pupils go into dilatation first before it is piercing it and that's why, if the eyes are open and the Kuṇḍalinī is passing through, She may stop.

So please keep your eyes shut, that's all. Just keep your eyes shut till I tell you to open them. And if you have spectacles and all that, you can also keep them safe because you don't have to see Me anymore till I ask you to open your eyes.

So it's better to keep so that you don't have problems of your spectacles.

Now close your eyes. Now don't open your eyes as I requested you. Please don't open your eyes, that's all.

Because this is just the opposite of hypnosis. In hypnosis, they make you open your eyes and put their eyes into your eyes and do all these things. What's happening? Now, no gesticulations, nothing abnormal has to be done. Whatever has to happen will happen within. Nothing abnormal thing has to be done.

Nobody has to jump, shout or scream, that's all nonsense. You are not to do anything like that, not to turn your necks or anything. Just keep quiet. If you cannot keep quiet, it's better that you go out for the time being. But just keep quiet. That's very important not to disturb others.

Contents: **1982-10-1x Quote related to the Miracle that Took Place with a Boy during the, Public Program in Bedford, UK**

[When told about the Article `Guru and the Miracle Boy' published in Bedfordshire Journal on October 13 in connection to the night of October 7:] It's marvelous to think such occurrences are happening in this country and it is a blessing.

Contents: 1982-10-17 **Navarātri Pūjā (1st Day), Innocence and Virginity, Temple of all Faiths, Hampstead, London, UK**

It's a great thing today that we are celebrating the Virgin's worship in England. As you know, according to Sahaja Yoga, England is the heart where resides the Spirit of Shiva. And that Virgin should be respected and revered and worshipped in England is a great honour, I think, for all the Sahaja Yogis.

Now one has to think why such an importance is paid to a Virgin? Why a Virgin is respected to that extent? What are the powers of a Virgin? That She can bear a child of that magnitude that was Christ, that She could create Śhrī Gaṇeśha out of Her own body, that She could protect innocent, dynamic force of Her children who are egoless, who have not known what is ego.

So this great power and force resides in a person who has lots of `pūrva-puṇyas' who has done lots of good things in previous lives, who has always understood that Virginity is a power higher than any other power and would save the Virginity and Chastity with all her effort and care. As you know that within our body She is placed as Kuṇḍalinī.

Means She is the Virgin. She is untouched. The desire to become Spirit is without any blemish: Nirmal There is no blemish. It's waiting is pure. There is no other desire, but to be one with the Divine. All other desires are finished.

It's a very difficult subject for Me to talk about in the Western country. It's embarrassing. I do not want any one of you, whether men or women, to develop any guilt in your mind. Because that is one thing is the greatest blemish as you know, at a later stage this guilt works in the opposite direction. It is of no help. But when we understand that we have these problems, we have to be humble about it. Not guilty but humble.

If you are not humble about it and aggressive about demanding what have you got out of Sahaja Yoga and complaining about it all the time, while not seeing what are `your own' Puṇyas [merits]; what do you deserve?

Your Kuṇḍalinī, despite every blemish, has been raised. You know that. You are blessed.

So instead of complaining or being aggressive, you must know that it is a great `favour' to you. The greatest favour; that you are forgiven completely, that this great blessing has been bestowed upon you. And to come up to it you have to work hard. Not to feel guilty about it; but to be humble, to be thankful. That despite what we have done, `played' with ourselves `completely', still we are today sitting as God's Devas. The Somrasa which is the charanamrita, the water that washes the Mother, only `you' are allowed to drink it, only the Devas. You are sitting in that category and how can you be demanding? You have to humble yourself. By seeing your past, whatever mistakes we have committed, I am with you in this. Not to feel guilty.

It's very embarrassing as I said to you, but please try to face yourself. We have to face ourselves as we are.

The advantage of the Indians is that the Kuṇḍalinī exists there.

So whatever Indians may do, they are always aware it is wrong. For them virtue is virtue, whether they are not virtuous. Righteousness is righteousness, whether they are not. They know, all the time they are aware of it that they are doing wrong. They do not say `what's wrong,' nor do they propound things which are obviously wrong and against the Virginity, against the sublimity, against the divinity. Satanic things they never proclaim that this is God. They are hypocritical, alright; but they are aware all the time that these things are wrong.

The whole society is like that. Because Kuṇḍalinī stays there.

When we lose our Innocence and our Virginity, first thing happens to us is that we become ego-oriented and we start thinking “what's wrong?" Your Shakti is your Kuṇḍalinī and She is Virginity. She is your power. She is your strength. Your Innocence is your strength, the day you lost it that is the day we have committed the original sin.

So for us it is important that we have to be very humble about it and that we have to achieve something.

What? Not the kingdoms and some sort of a luxurious life, but a seat in this holy land of Shiva.

Shiva is forgiveness, He forgives everyone. Even the Rākshasas [demons] can be forgiven, but can they be given realisation? Even the Pishāchas can be forgiven, but can they be given realisation? Forgiven is a different point. One aspect is forgiveness, so that they can remain for a longer period, they may live longer, because of Shiva's forgiveness.

So what? But what a wretched life. And the people who are not innocent can never be joy-giving. They are themselves miserable creatures and make everyone miserable.

The arrogance is not a child-like quality. We have to be like children. And even when you were not, you were given realisation alright. But now you are sitting with the Devas. Even higher than them.

So what is our decoration? It is humility. It is simplicity. Not cleverness, arrogance, putting others down, showing-

off, but a complete surrender, surrendering all your egoistical qualities.

Let the Virginity be reborn in you. From today you all have to take a vow, is the New Year's day for us, “that we all will surrender our horrible tempers, dominating natures, asserting behaviours, ego-oriented harshness, domination." I don't know what use it has. Unless and until you surrender that, the Lord of Virginity, Śhrī Gaṇeśha, will not be able to crown your Āgñyā Chakra. Whatever we have done so far should just give us this. If our past could give us the idea as to how humble we have to be with each other, with all the Sahaja Yogis, how kind we have to be, how loving, how universal.

Virgin cannot accept ideas which are not universal, She cannot! That's a sign of a Virgin because She is universal by nature. All fanaticism, all racialism, casteism, `all' these things which artificially separates man from man, woman from woman, nation from nation, will all finish off as soon as you become innocent.

But you can't become, by brain-washing you cannot. By Kuṇḍalinī awakening, of course you can. But to maintain it, your progress should be inward' and not outward. To seek your roots. She is the Moola, She is the roots of your being. She manifests all your roots.

So your attention should be towards your roots and not towards your shoots, you have been that. Face yourself and develop your roots now. All the Western society is without the roots, you can see that. We have lost our roots, let's face it as Western people, as I am also with you today. We `have' to find our roots.

You see in a tree which does not have roots. It dries out, it doesn't give any shade, afterwards it becomes a dry horrible dying tree. When it dies, it falls upon someone. It grows thorns. All dried things grow thorns. It's like a desert, where only thorns can grow. When the whole society becomes so stupid as to hate each other, materialistic, then roses are not going to grow there, lotuses are not going to grow there.

While you are the Lotuses of this country. You are born in the mud alright, but now come back to yourself. You were beautiful, you were like lotuses, fell into this mud, became the mud, out of which you came out because of your true nature. Then you have become now lotuses, but there is no fragrance.

Lotus without a fragrance, one can't understand. Lotus has to have a fragrance. The fragrance that will overcome the filth of this mud.

You have to grow much more than Indians can grow. On the contrary the arrogance of people, I am amazed. They start complaining this, complaining about that, complaining about another. What do they think of themselves? Who are you? Because the roots are not developed. Once you develop your roots, immediately the humility will start coming into your temperament. There is artificial humility, not from the heart. It will only come when you become Virgins, you become Innocent.

Innocence doesn't only mean morality, doesn't mean only that. Many people think that if you are a moral person... No. It also means a non-materialistic attitude. For people, carpet is more important than their children. Morning till evening they will be saying harsh things just

to save few nonsensical things which are going to be left here permanently. Materialism is the hit, it's the one that hits you, your Innocence. If materialism means to make things to give others happiness, to present others, as a cup that carries the nectar. If materialism is that cup which gives the nectar of love, then it's alright. But you don't eat the cup, do you? To Me materialism sounds like people eating the cup and not the nectar! Is cup more important, or the nectar? Supposing there is a golden cup and a poison is placed inside that, will you take it because it is in golden cup? If you take it, of course, I will have more value for gold. Will anybody knowingly take a poison in a golden cup because it is in gold? No common sense! There is no common sense at all. That material things cannot give you happiness is the basic factor of economics.

In My own life time I have sees, that anything material gives you greatest happiness when you can give it to someone. I have seen that way, always. I `enjoy' the giving more than taking. I mean you try, sometimes, to give away something and see how happy you feel. Of course, it should not be done because you want to get rid of it! Actually it is done for that only, perhaps, because whatever you possess is a headache in anyway, even the subtlest form. Any possession is like getting possessed. It's slavery. It hinders your freedom to grow. But it goes hand in hand.

You know, people ask Me, how it is these people who are so affluent are so miserly? Why are they so miserly? People can't understand, you know. For one `p' if it is dearer, the whole England would be ablaze, you see. All

the time, what you hear is nothing, that so much percentage of rise in this thing and that and they are going for a strike for this. I can't understand how do you keep account of all that.

If somebody asks Me what is the price of this sugar here and there, I would know, but I would just know that it is cheaper than the other place. Because I am innocent. I get things absolutely cheapest always, I have seen that, I always get things cheapest. Because I am so innocent. My Innocence takes Me to places where it is the cheapest and I get the maximum joy, because I can give it. I know how to give it.

That's how I would say, because of the `real force' of your Spirit which is Virginity, you have lost the sense of joy also. You are joy killers, morning till evening you are killing each others joy to say harsh things, you see, from this tongue.

I was folding My hands before you because I knew it would little bit upset you, so I was just keeping it there, that your mind should not be disturbed so much. In My palms, you see, very carefully I was catching your heart to keep it there, so that you should not feel hurt. Because it was not harsh, but it was truth which was harsh. But still, in My palms I was holding it, carefully, so that you should not feel hurt about it.

So to hurt anyone, just open your tongue and hurt anyone, one doesn't understand how many ripples of hatred you are creating within yourself.

Twenty-four hours are not sufficient for Me to love people. Now, I will be sixty years of age, I don't think I have done justification to these sixty years because I

have not been able to love people as much as I wanted to. The flow is so great that My body suffers with that flow and sometimes I curse Myself that why should I carry such load of love within Myself. And little excitement with the Pūjā also, you know what happens to Me. I shudder, sometimes, you are calling Me for Pūjā, now what will happen. Then somebody can ask a question, sometimes, “Mother did we not suck your vibrations?" It is obvious, but I don't want to say that. Because if I say that, your Viśhuddhi will be caught up again. You will suck less.

It's a very delicate work I have to do. You are already wounded people, because you have wounded yourself. Nobody has done this harm to you, you people have nicely wounded yourself, very nicely. Every way possible you have tried to hurt yourself. Now because of the hurt, the guilt is built-in and you are hurting others. It is as simple as that.

So don't hurt yourself, there is no need to hurt yourself. But remember that we have no business to be harsh to anyone. You have to be sweet people. You have to be kind people.

There are also psychologists who have come forward to give you explanation for your harshness, that Your willpower should be strong. If you don't talk like that others will take advantage." Who can take advantage of the Western people! It is absurd, absolutely absurd! The ones who have done injustice all over the world should say such a thing, it's absurd. I cannot understand how can they give an explanation like that.

But now the time has come, `you' are the people who are going to change the mind of God with your good behaviour. The wrathful God. You are going to please Him.

Who is going to deserve in this Western world, you tell Me, today. You are the ones chosen for this, specially prepared for this, to create an area so that the deity of compassion should be awakened, for the rest of them.

The arrogance, you have seen in the spread of Sahaja Yoga, what happened. We had a program where we had, say, a thousand people. For the next follow up there are only three. It's typical. I have spent most of My precious time in this country and in the West. Despite that, the arrogance sometimes baffles Me.

Arrogance among each other, even towards Me sometimes they are so arrogant I cannot think of anyone being that arrogant to Me, as the way they are. The way they talk to Me, the way they behave towards Me, I just can't understand how can they be like that. It can be anyway anywhere, anytime. Specially women; I was amazed! I went to Belgium and I found that Belgium housewives were even worse than British housewives. Ah! Terrific they are; terrific women! Ah! Just horrible! Absolutely. You just don't know how to deal with them, it's terrific. They control the whole household into their hands, I don't know how. I don't know how they do it. There's no...

So ego-oriented, I am amazed! But if You go to America, American women are Baba They are amazonic! Horrible! You just can't understand. There's no love, no affection, nothing. Showing off, all the time talking about their

material things. Absolutely dry sticks, I tell you. And they want realisation and they want to be great and this and that. I don't know what are they.

Today it is especially the day of Virginity. I have really great hopes from the women of this country [UK], specially. Here the men don't talk at all. You see the pattern was worst in Belgium, no man would talk a word. They cannot talk, just poor things are just shut. They don't talk, strangled, completely strangled by women, believe Me. Horrible! What is going to happen to that country, you see, where men cannot talk and women talk. It's horrifying, let's face it up. What have they achieved, the women there.

At least in India our Prime Minister is a woman. What are they? Good for nothing, useless, just washing utensils in the house and showing off. I just don't understand. What sacrifices they can go up to? The woman is known by the amount of sacrifices she makes. It's a challenge, I tell you, for all of you woman who are realised Souls to see to it that you humble down yourself. Your quality cannot improve unless and until you humble down. On everything you assert. For what? It's impossible to worship Virgin when we are so arrogant and so strangling type.

The Virgin is a simple woman. She is extremely simple. She does not understand what are your plans and what is so important, everything. Her importance is her Virginity. That she knows and she will not allow anybody to touch. That's her property, that's her wealth, that's her greatness. And she's humble because she is not afraid of

anyone. She is not aggressive. But she doesn't allow anybody to aggress; nobody dare aggress a real Virgin.

A new page has been turned now, in Sahaja Yoga. I must warn you all about it. Don't take liberties too much with Sahaja Yoga. You are not obliging anyone else but yourself, be careful. Take up My warnings always seriously. You `all' have to come up very well now. It is not only doing My Pūjā is going to help you, I can tell you this much. Now you better worship yourself. You have to worship all your Gods within you. Cleanse them.

First is the God and Goddess of humility, of innocence, of simplicity. Worship that. Unless and until you can worship that, you cannot go further, you will not be protected.

Again I say that a new page has been turned. Don't take liberties with Sahaja Yoga. It has bestowed all the blessings upon you. You have seen the light of the day. But b e prepared for the night. Nobody should try to take liberties. Try to improve yourself. No more complaints. If you can't live in an Ashram like that, you better get out of it. It's not for your convenience. Nobody is in need of you. Take it from Me. Nobody is in need of you, you have to be in need of yourself. If you are seekers, if you want to find your roots, everything is available for you. But you have to be humble, to go down to the roots, not with arrogance.

We must understand why we are not progressing. Actually arrogance comes to people who lack selfconfidence. Self-confidence is shattered in people whose Self is not manifesting. Let your Self manifest.

When the Self is not manifesting, you get all kinds of problems and then you complain. Actually the problem

resides within you. It is God who has to complain. Think of it. The One who has created this universe, the One who has created you all with such love and affection, the One who has given you everything under the sun, also the One who has given you realisation, given you light, everything that is possible. And you are complaining against Him? You should not. Complain about `yourself,' that `I am not alright, I should be alright.' Complain about it. Face yourself.

Like children when they face the mirror, they say “this is somebody else." But we believe, They never identify themselves with their own images that they see. They are identified with the image that they `are'. They don't create artificial images, or don't dwell with the images which are making them feel ego-oriented. They live with reality as it is. They are made like that.

You see a camera, if it takes some photograph under a light which is some other colour, the photograph could be different. Supposing I am wearing a red thing and supposing you put a light that is blue, this might start looking green. But human eyes will see always the same thing. It won't see something unreal.

Camera can do all that. Camera can remove somebody's head and put somebody's head there. All these tricks are possible with camera but not with human eyes. Whatever you see is the thing that is. Of course, you are drunk, then it's different. I mean I am saying of normal conditions, you see, in normal conditions you see what exactly exists. But if you are ego-oriented, you would never see yourself what exists. You will see some sort of

a bloated, you see, you will think yourself to be the King of God's heavens, you see.

You `can' see, if you want to; its imagination. If you put your imagination like that, you can see yourself as anything! Which is false, is absolute false.

You are your Self and you must see yourself as your Self, as your Spirit. And Spirit is a universal being, is the Innocence, is the Virgin within you. Respect it, respect that part of yours which is the Virgin, still exists. Because if it was not there, I could never have given you realisation. Despite every attack it existed there. Be sure on that point. If it had not existed, you could not have got your realisation.

So many of them, they are very proud, “Oh! I don't feel anything, Mother, you know, it's nothing." Then there is to be ashamed; or at least you feel that you are missing something! At least you should feel that you are missing, if something is not alright and you should be alright. At least think like that, “I should be alright, I am not alright." On the contrary “No, no, I didn't feel. Oh! what I didn't feel I should feel." So the wisdom. Wisdom is the part that is innocence. Complete wisdom. You find this among the villagers, or very simple people. They are not planning in any way. You try to befool them and you will be amazed, at the end of it you will find, “I am such a big fool, myself." Try that with some rustic people, who are very simple, matter of fact, who live with Mother Earth. You will find that all those so-called intellectuals, if they try to befool a simple man like that, after half-an-hour this educated and very M.A.-Ph.D. style will find that he is the “biggest fool ever born." There is a saying in Sanskrit,

which is very common “Vidyā vinaye na shobhate", that is, “Vidyā” even the knowledge, “is decorated", shobhate means gets decorations, or “is beautified" only through humility. If there is an educated man he has to be a humble person. If he is not a humble person, then he is not educated, at all, in any way.

I don't know if I have told you a story about one saint who was meditating and was blind. And a king came there and asked him, “Did you see some people around?" He said, “Yes. Yes King, my King. Sit down. I saw your servant come in and then your minister came in and then the prime minister came in and then now you have come." He said, “You are blind, how did you know? Through your meditation?" He said “No. Common sense." He said, “What is the common sense?" He said, “First the servant came in.

He said, `What, you are bogus fellow sitting down here, wasting your time.' He gave me two-three abuses, used bad language and said, `Have you seen any person here?' So I said, `No.' Then the minister came in.

He didn't abuse me, but he just asked Me. Then the prime minister came. He said `Sir' to me", Must have been from England! And might have said also Thank you perhaps!, “And then came the king." And he said that, “You were extremely humble. You first touched my feet, you sat down on the Mother Earth, waited for me, to ask you, `What do you want,' and in a very humble way said: `If you have heard of people around you', because I am blind, so you didn't say something that would hurt me, in such a humble way, if I could tell you. But at least

hundred and eight names of the Guru you took, before you asked me this.

So I know you are the learned, you are the humblest, so you must be the king." Otherwise in those days we at least never had kings or prime ministers who were box-office actors. Even the public was so innocent that they would not accept such a nonsense, you see.

So this was the difference.

From this story we have to derive that the more we are learned into Vidyā, into the technique of Sahaja Yoga, we have to be humble. That is our decoration, that is our certificate, that is the path into the entrance of every human being, that is the way we are going to be very close to the other seekers. To be humble, to find out ways and methods of being humble. This is the key of Nirmalā Vidyā: `How to be humble?' By humility you will not ever say, `This is my bathroom, or this is my fruit, or this is my food, or this is my table and this is my glass.' Innocence gives you strength to enjoy everything that is there. I mean for Me, sometimes I have to eat with bhoots and sometimes I have to eat bhoots. I not only eat with them, but also eat them, is worst part.

So you also should not mind if there are people with bhoots. If they are arrogant, try to give them bandhans, try to control them through all these methods. But if you think by arguing with them you will be able to manage them, it's an impossibility.

So try Nirmalā Vidyā and that is humility, which is the myelin sheath of vibrations. Like every nerve has a myelin sheath covering it, in the same way is the

humility, is the myelin sheath. If you are humble you will win the battle, if you are not, you will be lost.

Then the whole thing will become a joke for you, absolute joke. If you are humble you can see the stupid, the bhoots and all the arrogant as clowns of this drama.

Try to be humble with your Self and with Me. With Me is very important. You must understand that it is one of the conditions that Christ has put on `you', to be `careful'. Dealing with Me, I don't want you to be in any way rude to Me, because I can't help it there. Till you are humble with Me, everything is in My charge. But as soon as you are rude to Me, somebody else and so many of them, thousands of them take charge and then don't blame Me for that. Because you are My proteges, you are under My protection. Supposing you try to make holes in your roof and then say that the rain is coming in, what can you do about it? I mean you have already made holes in your roof. The roof that was to protect, you have made holes, now the rain has to come in. Then if you want that the roof still should protect you from the rain, then I must say you lack intelligence. That's what it is.

So this is the another warning. It's very embarrassing, but again today is the day of embarrassment as it is. Because the Virgin is in embarrassed condition always, she is a bashful personality. She has to be bashful. She is embarrassed to say things which she does not want to say, of course that's a very sweet thing, even there she is bashful, to say harsh things is a horrible stuff.

So let us worship our Virginity within ourselves. Let us rise up to that point. To mount that diamond of brilliance of our Virginity, in the setting of our humility. You can be

angry with others, not with Sahaja Yogis, not with Me. Even with others, when it is `absolutely required'. But if you fight among yourselves and tell people about Sahaja Yoga, nobody is going to believe you.

And that is why, today is the day when the Virgin, Gaurī, sat down to worship Shiva. She made a Shiva Lingua and was sitting and putting Her sindur on that: “That you look after this, which is the mark of my union with you. I leave it to you, to look after", to Shiva. “You look after me. I surrender to you." With this, that's how Gaurī your Kuṇḍalinī surrenders to the Spirit: “Now You look after this connection.

I forget everything else. I leave it into your hands. Lift me up. You raise me up. I forget all that was me before. Everything I have dropped out. No other desire. But just lift me higher and higher. Make me yourself. The rest of it is not important. All other manifestations of this, desires are over. Now, I am absolutely surrendered to you, my Spirit. Lift me higher and higher. Higher and higher, away from all the things that were not the Spirit. Make me complete Spirit, full Spirit." Forget all that was there. That elevation, that ascent becomes a fast, quick trip, a `very' fast ascent.

Just you can do it if you try at this moment and every moment to give up all that was not the Spirit.

Anything that goes against the Spirit must be given up and that is what is the pure desire, that's what it is the Kuṇḍalinī, is the Virgin. Is to be absolutely one with the Spirit. All the rest has `no' meaning, has no value.

This ascent, whatever may be your possession, to whomsoever you may be married, wherever you are

working, whatever is your situation, whatever may be your country, you `are' the Spirit. And if you are, raised aloft, you will dwell in the beautiful kingdom of God, where all ugliness drops out. Like when the lotus opens out, all the mud drops out, completely. In the same way, let My children become fragrant, beautiful offerings of Sadāśhiva.

May God bless you.

[When passing by Glastonbury, a small town near Bath, someone says that there is a legend that Śhrī Jesus Christ visited there. Shri Mataji said that He had been:] all over.

[Glastonbury is the Āgñyā of England, where Lord Jesus Himself planted a tree saying that the wind would always blow over this place. On ***1984-08-08*** Shri Mataji tells Dr. Mathur that the tree Lord Jesus had planted was not to be found in the grounds of the abbey but on an escarpment in the green fields above the town.]

Contents: 1982-10-21 **Śhrī Devī Pūjā, Hall, Exeter, UK**

[About twelve Sahaja Yogis including few who have just arrived from London with a book of Vedic Pūjā hymns.

They are ready to start chanting from the book.]

Shri Mataji: What are you doing? Sahaj Yogis: These are the Vedic prayers.

Shri Mataji: You don't need all that. Just wash My Feet, sing My Ār.ti, finished.

[After the Pūjā, as asked a couple of days before by Shri Mataji, Sahaja Yogis offer water from the rivers to be

vibrated. Linda Williams, who could not attend the Cheltenham Seminar, brought water from the Seven Springs, the source of Thames, who was vibrated by Shri Mataji on August 2. When this water is offered to Shri Mataji:] But this water is already vibrated.

Contents: 1982-10-21 **BBC TV Interview (5th Day of Navarātri), TV South West, Plymouth, UK**

Presenter: Her followers see Her as a great spiritual leader, capable of curing all ills, even cancer. Well, these are the sort of claims you've probably heard before from many so-called Gurus, but for Her fast expanding group of disciples Mātājī Nirmalā Devī is different. Tonight She brings Her message to a public meeting in Exeter.

Reporter: Mātājī, the world of healing and Gurus is full of frauds and charlatans. Do you accept that many people might be skeptical about Your claims?

Shri Mataji: Of course they should be. Why they are not I don't understand, you see. You must use your brains and reach right conclusions. Why are you seeking, what are you seeking and whom are you going to. Those people who charge you money and live like parasites on you cannot be your Gurus, you see, they are people without any self-respect.

Reporter: You don't charge any money at all?

Shri Mataji: Not at all. I mean, how can I charge money for this, is Love, Love of God. How can I charge money for that? Reporter: It's claimed that even viewers of an interview such as this just by looking at Your picture on the television screen can receive some sort of physical manifestation of Your power. Now, how does that work?

Shri Mataji: Yes. By, just if they put their hands towards Me like this even now, they can feel a Cool Breeze flowing into their hands.

So many might feel, as they felt it in Hong Kong, but if you are complicated people, it's... takes some time. But normally people are simple and they get it, the Cool Breeze just starts blowing into their hands. And that is the breeze of the Holy Ghost.

Reporter: Just by holding their hands to the screen at the moment?

Shri Mataji: Just like this. Just like that, yes.

Reporter: Well, Your message is self-awareness, self-realism, I mean, what exactly does that mean?

Shri Mataji: Self is the reflection of God Almighty in our... in the heart. But it resides on top of your head. And what is Self-realisation in ordinary words you can say, the real baptism. Is the real baptism. Means what happens, that your Spirit enters into your awareness, into your conscious mind, into your central nervous system, so that you start feeling the awareness of the Spirit, which is flowing through you as energy. This is the energy of the All-pervading Power of God.

Reporter: But I'm sure many people must feel that they know themselves perfectly well already, without any extra power required.

Shri Mataji: This is a self-opinionated thing. But there is a way to find out if you know yourself, then you must know what are the centers catching in you, what are the centers are catching in another person.

It is the becoming that is important, it's not a mental projection that `I'm such and such.' Supposing I say I'm the governor of some place. Do I become? No. I must have the powers.

Reporter: And You can actually look at another person and say what is wrong with that person, or feel what is wrong with that person?

Shri Mataji: Yes, I can, I can look at the person and say, but others, those who are Sahaja Yogis, can just feel it on their fingertips. But we talk another language, we don't say `you have cancer,' because that's not good to say. But what we say, `You are catching on this center or that center.' Supposing somebody is very egoistical. Then we don't say `You are egoistical,' we say `You are catching on Āgñyā,' so he doesn't feel hurt, you know.

Reporter: But having identified the problems you can also cure them as well.

Shri Mataji: Yes. If we identify the problems, we also know how to cure them.

Reporter: What happened twenty years ago, before Gurus even were heard of in the Western world? We seemed to survive perfectly well without them.

Shri Mataji: You see, this is the time of resurrection, this is the time of Last Judgment. It's been pointed out by your great poet William Blake, who said that a new category of human beings, he called them Men of God, will be born on this earth and they will become prophets and they will have powers to make others prophets. Of course there has been prophecy also in India thousands of years back, that in... this work will start in 1970 and

that many people will get their realisation. Is already announced.

Reporter: And now we are in that time.

Shri Mataji: Yes, that the time has come, that's why these people have taken birth. And there are many children who are born realised and you do not know what they are, because they have these vibrations and they are different people.

Reporter: Mātājī, thank you very much indeed.

Shri Mataji: Thank you.

***Contents: 1982-10-21*, Public Program (5th Day of Navarātri), Miracle of Second Birth, St. George's Hall, Exeter, UK**

Sahaja Yogi:... to say anything about it and to allow you to experience it for yourself. And this is what you'll have to find out tonight..... and welcome again. Thank you.

Shri Mataji: They are transformed. Exeter has a speciality, I do not know why, of this kind. And I am really amazed that I've been here three times and people have not taken up life seriously.....

***Contents: 1982-10-21* Travel after the, Public Program and Overnight Stay in a Student Flat of a Sahaja Yogi, Bristol, UK**

[On the way, Shri Mataji asks to stop at a coach station. Though closed, the doors are open and Shri Mataji has Her photos taken at the two photo machines. The Coach station and Bristol are the Viśhuddhi of UK.] [Reaching the Ashram around midnight, the single key to the Ashram being with a Sahaja Yogi who was coming in

another car that broke down on the way, Shri Mataji has to wait outside for many hours.

After searching at 1 a.m. for a drink for quite some time, finally they all have a hot chocolate from a street vendor. Around 3 a.m., Sahaja Yogis propose to go to some student at.] Yes, why not? [After a very busy day with travels from Bristol to Exeter to Plymouth and back to Bristol, with a Pūjā, TV Interview and, Public Program and with additional three hours of waiting on the road, Shri Mataji is finally sleeping on a mattress on the floor of a small student room. Ruth and Janet sleep on the corridor.] [In the morning to Ruth and Janet:] Oh, but you should have slept in here with Me.

Ruth: [apologizes for the wholly unsuitable arrangements].

Shri Mataji: What's wrong? I've had a lovely bed to sleep on and everything's fine. There's nothing to apologize for.

Contents: 1982-10-25 **Letter to Jeremy, London, UK**

(8th Day and 9th Day of Navarātri), from Nirmalā Yoga, Issue 12 (Nov Dec 1982), pp.23,24 My Dearest Son Jeremy, Tomorrow morning I am going to New York for four days [Oct 26 to Oct 30]. I hasten to write this letter because I would like to inform you in the right time what is happening to you.

I think you are confused between left side experiences and the spiritual experience. Those who are on the left side can sometimes even see my past and show much more awesome respect and love but I know the reason behind it and thus I never encourage them. If you take

cannabis you are definitely dragged into Ida nadi and the ego recedes for the time being.

So you feel this emotional carnal love. But when you take more you start feeling a universal carnal love. Thus the fall of man starts because he gets out of the void towards the left side.

For your information I am quite aware of other Sahaja Yogis and their condition. You must know that after realisation there is nothing like rituals but it becomes actual living process. May be it is not done with perfection but still it is done by a realised Soul. It definitely evokes my vibrations to flow more and has helped all of them to awaken their deities. Of course I do not know all the filth and dirt people have accepted in the past, also the amount of illusory life they have taken to but it is not necessary to know.

Do you know all the dirt and filth of your household which you sweep? Do you count them or find out about their nature and history? If you are a master cleaner you can do a lot in one sweep. Western life has been attacked from 1919 by many devils who introduced ideas even in architecture and music. These destructive ideas have removed the Western people from their roots, from the Dharma that is the basic for the ascent. You must admit that Sahaja Yoga has definitely created Dharmic people if not perfect ones.

All drugs take you away from your awareness.

So how can you have a balanced attention to make your spirit shine? Reality should be achieved in complete awareness otherwise whatever you feel is illusion because you are in a dream. It appears that Sahaja Yoga

is spreading slowly, it does not matter; but if it is truth, how can you achieve in a dreamy state? I want all my children to be awakened to walk into the Kingdom of God, not into the left-sided hell of illusion.

My experience about the druggist and chemist has been a painful one. Those who come were very slow. Actually very few come, so your theory that the seeking of God starts with drugs is not true at all.

They have been very weak and vulnerable to left-sided attacks. The example is shown the way you all fell for a fake person like Ichel. They are mostly facing very dangerous diseases like cancer and many other incurable diseases. If you want to marry Karen, it is alright; but do not do it under the effect of drugs because it heightens left side so much that there is no balance of the will left to guide you to right decision by vibrations.

Actually drugs were condemned by all the Prophets and thus our laws do it because the basis of laws come from our void, our Dharma. I would like you all to see the sanity of law and not its fault. Gandhiji was opposed to slaves, but he was much more against drugs. He would not allow any druggist to enter his Ashram campus even if he had given up. “It's difficult to spread Sahaja Yoga in the West"; I also felt it, but the roots can not be sacrificed. There can be no compromise with the principles that nourish Sahaja Yaga. But now I think the media has taken over and we will be reaching stronger and righteous people for Sahaja Yoga. Already it has taken its flight and I can feel it. I am sorry for the druggist. They have to use their will to accept the challenge and give up their slavery to drugs. The sick

druggist and lunatics have taken so much time. They do not impress any one because mostly they are so much in the air and in personality, shabby and depressive. They are very lazy and always oppose anyone who tries to wake them for Sahaja Yoga.

Jeremy, I knew you were a left-sided person and you need more activity. The bus driving was a good idea but if you take to drugs God save the passengers.

You did not write a word about vibrations. They are your guide. Not your ego which judges others or your super ego which is self indulgent. This is not joy this is illusion.

Slow and steady achieve your reality in collectivity.

May God bless you.

Your loving Mother, Nirmalā

Contents: 1982-10-25 **Radio Interview (8th Day and 9th Day of Navarātri), University of Sussex, Falmer, near Brighton, UK**

Phil Ward: Sahaja Yoga Program for Radio Falmer to be broadcast on the 25th of October 1982.

Five, four, three, two, one...

And this is Phil Ward presenting a look at Sahaja Yoga, a new method of natural meditation through awakening a spiritual energy laid *[UNCLEAR* into/within] each of us called Kuṇḍalinī.

Some quite astonishing claims have been made for this Yoga and the effects it has on people's lives. People have eligibly cured of various illnesses and addictions and some pretty miraculous seeming transformations have been wrought. The University Sahaja Yoga Society will be

holding its inaugural meeting tomorrow, Tuesday, 26th of October, at seven o'clock, in Refectory, level one. And there you can find out for yourself whether its claims are true.

Apparently they'll be giving realisation at that meeting and it's all free. I went to London to interview the leader of Sahaja Yoga, Mātājī Nirmalā Devī and we'll be presenting that interview later in the program.

Meanwhile I talked to the organizer of Sahaja Yoga on campus, Jason Copeland, to find out how Sahaja Yoga had affected him and to get an idea of what it's all about.

Jason, you are on a tour studying international relations in *[UNCLEAR* Africa's] during your *[UNCLEAR]*.

Jason Copeland:... first year...

Phil:... your first year. Tell me, did you have any religious inclinations before you came to Sahaja Yoga? Jason: *[UNCLEAR* None more so ever] I was brought up a Catholic when I was a child which put me off for religion for good I think. And I spent most of my life organizing revolutionary activities of various sorts, mostly latterly housing *[UNCLEAR* co-ops]. And I don't think really I had any attitude about God, except that a scientific training in school gave me the attitude that if I didn't know for definite, it didn't exist. I would it keep an open mind just to the possibility. I did have some idea that there was something in Eastern mysticism to be discovered and a few years ago I looked at one of the Gurus that was going around then and spent six months trying his alleged meditation. And I found it was such a load of pernicious rubbish that now put me off trying further for another ten years.

So really after I had done that I had absolutely no inclination to look at any-thing religious or mystical at all and I was just concerned with constructing some sort of revolutionary way of making conditions for people on the planet a bit better than they were.

Phil: So, after all that, what brought you back to seeking God?

Jason: Failure. I found that in trying to organize people that there was a built-in problem that people however much they strove for collective action and collective sharing a vision, it just didn't work. The disintegration of the left in the 1970s depressed me enormously and when the conservative government came to power the newspapers were full of nuclear weapons every day. I just got really freaked out and the object mess the left and got itself into. And it seemed that no efforts at organizing among people was having any success at all. I got into a very big state of despair and I found myself out one night, although ostensibly I didn't really believe in God, I just found myself yelling out, “God, if you exist, help!" Phil: And did God help? Jason: Well. Yes, it seems like that's what happened because a couple of weeks after that I met a friend who have been ringing me wanted me to meet her new spiritual teacher. And I went round her place and I was sat down in a chair in front of this photograph of Mātājī Nirmalā Devī and I was taught to put my hands out, palms upwards and not to think of anything. And what I found was absolutely astounding.

The, what I know now to be the Kuṇḍalinī came rushing up. I felt a great Cool Breeze in my hands and suddenly all the appalling anxieties that I've been carrying around

for years just sort of evaporated and my mind was, in the old *[UNCLEAR* hedonic] phrase, completely blown. Phil: And you felt, `This was God,' did you? Jason: I was absolutely certain of it. The tremendously powerful feeling I got when the Kuṇḍalinī came up, left me in no doubt at all that this was a physical experience of the spirit. I mean there's just... it wasn't anything imaginary. It wasn't a mental trick that went on it. It was a very physical thunder *[UNCLEAR* clap]. And you could feel this immense breeze and this sensation of energy coming out of the top of your head. And it just seemed to me that there's only one way that, that sort of thing could happen. And it's not by any form of trickery. I mean it's only... if there is a God that you could get that sort of tangible internal process happening. It wasn't only that. It's that when, when I did feel the spirit coming up, it was accompanied by an absolutely mind shattering certainty that this was God, that after all God did exist and that God's energy does pervade the whole of creation and is in fact manifested in everybody as the form of life within us. And that the theories of all the Eastern mystics in fact were absolutely true. You can get in direct touch with this and have a sort of realisation as the Buddha had.

It just blew my mind completely that here I was and this thing happening to me. It still blows my mind because it's happening every day [laughing].

It's just amazing, I can't describe it. Anything I can say is that, “Just don't believe what I'm telling you. Don't believe anything I say. Try it for yourself." And it's extremely likely that if you have sufficient desire to want to try, then the same thing will happen to you. And if it

feels good to you and you feel this strong spirit and you feel at least the possibility that there is energy behind all the creation in the universe and that you can actually feel it and integrate with it and weave its vibrations and its laws of operation into the very stuff of your life... You know, if you get that feeling, then, “Great, you've got it." It's not an effort. It's not something that you do by learning a lot of theory and then striving to put into practice, striving to implement. It's just, it's a totally natural fountain within you that comes up and literally quite magically if you let it, if you become aware of its subtle gentle functioning, then all you have to do is refrain from putting obstacles in its way. And in its own gentle fashion it'll sort of push you in the right direction and reveal to you the ways that life becomes so gentle and loving and easy when you don't actually try.

Phil: Does everybody have such a dramatic experience as you had? Jason: It seems to vary immensely with what sort of state the individual is in when you approach the experience. It's..., if you've been poisoning your liver, for example, with a lot of alcohol, or dope, or whatever, then your attention is actually going to be somewhat impaired. Liver, being the seat of the attention and the source of putting your concentration on anything at all to that extent if your liver is damaged, than your awareness, your attention will be less. And that chances you have a slightly less dramatic experience. Also with smoking, smoking damages another spiritual center, a Chakra, called the Viśhuddhi at the throat. And that's the place of which the nerves from the hands join the spinal column.

And if you've been a very heavy smoker of tobacco or anything else then that center will be numbed and a bit desensitized and you gonna get some impaired functioning there.

So it really depends on the overall condition of your physical body and your spiritual body that you bring to the experience. That said, I think most people get a pretty definite experience during their first acquaintance with Sahaja Yoga. It can be very gentle. It's not always as dramatic as that. And often it's only perhaps a few days afterwards when people have walked away from the experience and then they look back on it and they realise that during that time they felt a peace and a mental quietness and a very blissful feeling of being at one with the whole universe, of sharing the same spirit with everybody else and again I do reiterate this isn't a mental trip. It's a definite feeling, it's a gut emotion.

Phil: I've heard that experimenting with Kuṇḍalinī can be dangerous? Jason: Absolutely, can be extremely dangerous. And if you manage to raise the Kuṇḍalinī at all, it could put paid to your chances of getting proper realisation at any point in your lifetime. Various spiritual charlatans of various times have evolved a legit[imate] techniques of messing about with people's Kuṇḍalinīs. I mean this jumping up and down and sitting in peculiar positions and all sort of tricks that people put about. But in fact what most people, what sensation most people get that tried these things is they get a very hot feeling, a very burning feeling at the base of their spine and they then think this is the experience they're after. But in fact that is not the case. If you get a hot burning feeling at

the base of your spine it means that the Divine is angry because you're messing about with it, when you are not authorized to and you're doing wrong things with it. In fact the only way that Kuṇḍalinī can be raised is if you do know what you're doing and if you're connected to the source of the knowledge of how to raise the Kuṇḍalinī. And then, when it comes up, you don't get a hot feeling at all. You get a very cool, very nice feeling.

Phil: Could you tell us about how much it cost to become fully trained in Sahaja Yoga? Jason: Nothing, absolutely nothing. Every aspect of Sahaja Yoga, every stage of the training, well there isn't any stages of the training, it's just an organic process, but every bit of it is given away completely free. I mean, look this is a, the basic test of what is real and what isn't in spirituality. How can a human being make a profit out of God? I mean the very idea is completely blasphemes, it's obscene.

The one thing you can be sure of in seeking is *[UNCLEAR* riff and your alleged] spiritual teacher is charging money for it? Then it's not real, it's bound to be fake. I mean it's. It's as absurd as trying to pay a tree money to produce apples out of its flowers for you. If it is the spirit, it's nature. It must be natural. It must be something that's within your body, that you were born with if it has anything to do with God. I mean... What does God know about money? Is God interested in money? God existed long before humans did *[UNCLEAR* allow] money.

So what's God gonna be interested in money for? Now the whole idea is completely absurd. We give it away completely free and anybody who wants realisation, anybody who wants to learn how to meditate, learn how

to keep themselves clean, learn how to become one with God, it's totally free.

Phil: In your posters you say, “Become your own Guru", what does this mean? Jason: It means the most staggering thing about Sahaja Yoga and the other index by which you can tell whether or not it's true spirituality and that is quite simply. That once you have your own Kuṇḍalinī raised, once you've been given realisation, in the very next minute you can give it to somebody else, you can pass it on. Once you've had your spirit awakened, you become a Guru and you become able to pass on the enlightenment to the next person, to anybody who wants it.

So you become exactly as spiritually powerful as our teacher is. Straight away you feel where your Chakras, your spiritual centers are on your own body and you also feel correspondences is in your hands. Each fingertip and one or two other parts of the hands represents, corresponds to a Chakra on the body and you can feel from tingles and various other sensations what is the spiritual condition of your Chakra system and indeed what your physical condition is. You can diagnose physical illnesses just by reading the tingles and various other sensations in your hands. And you can also do exactly the same with that mechanism of the sympathetic nervous system for other people by turning your hands towards other people. You can read what their physical condition is, what their spiritual condition is, what illnesses they've got, what they're thinking, what their emotions are. It's absolutely astonishing. You can read people like a book.

Phil: That's a very astonishing claim.

Jason: Well, all I can say is, “Don't belief a word of it. Try it out for yourself. Come along tomorrow night. Test what I've said.

And if you feel those sensations and if the suggestions we make can help you make sense of it then you know that I'm telling the truth. That's all there is to it. Just try it." Phil: Jason Clopeland, thank you very much.

The founder of Sahaja Yoga is Mātājī Nirmalā Devī, wife of the distinguished United Nations diplomat based in London. And last week I talked to Her at Her home for Radio Falmer: Mātājī, what is Sahaja Yoga. Could You describe it?

Shri Mataji: The `Sahaj', the meaning of the word `Sahaja' is, `saha' means `with' `ja' means `born'.

It is born with you, Sahaja, means it is spontaneous. It is a living process. As whatever there is born with us is also very easy. In the same way it also means it's easy, it's simple, spontaneous. For example the breathing mechanism within us is born with us.

So it is spontaneous. We don't have to read books about it or put any effort. In the same way it's effortless. You cannot do it through your metal projection. And `Yoga' means the union with the Divine. And the union with the Divine is to be understood through the technique of Yoga.

So it also means `technique'. It means the union and then the technique of the laws of the Divine.

Phil: Would it be possible, Mātājī, to describe Sahaja Yoga or Yoga generally as related to man's evolution?

Shri Mataji: This is the only way now human beings can evolve into their higher realm of collective consciousness or what you call Self-realisation where they become the self, the spirit. It is said in all the scriptures that you are a spirit but you have to be born again.

So there is something that is lacking in this human life, in this human awareness. And this human awareness has to be enlightened by the light of the spirit. But how to do it? We think that by reading, by talking about it, by thinking about it, or by crying for God, or worshipping God we can get it. It's wrong. It's a living process. Just like a seed's sprouting.

Just like a primule coming out of the seed in a living way. In the same way there is a Kuṇḍalinī within us, a power, a residual power which is actually our primal desire, the power of primal desire which manifests this happening. She's sleeping there till somebody who is the authority or has a capacity to awaken it.

Like the Mother Earth has got the capacity to awaken the primule in a seed. Nobody can do it. Even if you try to read the whole of Bible, the whole of Koran before a seed, it will not sprout.

Phil: Could you tell us Mātājī if there are any links or comparisons between Your teachings and scientific discoveries?

Shri Mataji: It's absolutely related between each other, science and Sahaja Yoga, as a shoot is related to the root. You see, you just see the shoot which is there, you see a flower. You say, “All right, this is a flower. Now it has got a corona, it has got a chalices, it has got petals." But from where does it come? How does it come? Science

doesn't answer certain questions. It says, “It is so. It is here. This is it." But it cannot say how, why? These questions can be only answered if you go to the root of it. And Sahaja Yoga is the one which takes you towards the roots, while science takes you towards the shoot. And now you have done quite a lot of research and understanding on the shoot's side. But if you have to go to the absolute, then you have to go to the roots to find out why these things are there. For example you say, “There is gravity." But how? Why? How gravity has come in there? How will you know there is gravity? So all these questions can be answered once you become the spirit. Otherwise in this human awareness you can only know what you see and what is there. To this your organs which are very grossly sensitive I should say. They have to become subtler.

Phil: Could you tell us a little about of Sahaja Yoga benefits on ordinary persons in every day life.

Shri Mataji: Now you can imagine that if all that what you see is the shoot and if Sahaja Yoga gives you the roots, then all the benefits that are possible can manifest through this. First of all, you become collectively conscious. Means that you start feeling you are collective. Not mentally, emotionally but you really feel on your fingertips that this is the problem with you and this is the problem with others.

The centers that are within you, the subtle centers you start feeling of other people within you.

So other person doesn't remain. He becomes you, part and parcel of you. This is the biggest advantage, I think, when we talk of all these things that, `You are my

brother, you are my sister,', it's all artificial. This is a very big thing that happens to a human being. I think personally that is the greatest enlightenment that we need. But the others are, personally you get your physical emotional and mental problems solved, absolutely solved. You get your peace. You get your blissful existence. Then what remains is nothing but love. Because this is the power of love of God which manifests through you and you start feeling this vibrations flowing through you which is the power of God.

So what you feel is real love which doesn't take anything, which just gives.

And I cannot in this short interview give you all the A, B, C, D's of the advantages, but they are so innumerable you become a transformed person. If you ask a bird, `What is the gain of becoming a bird rather then an egg?' So the bird will say, `It's easy to answer this question in one sentence that egg has no existence at all while I have an existence.' Or in any way you cannot explain this in such a short thing.

Phil: There are nowadays many cults and sects and groups that claim to give enlightenment in some form or another and often they seem to charge very large amounts of money for it...

Shri Mataji: Hmm.

Phil:... or demand lot strange practices. Could You briefly tell us Your views on some of these cults?

Shri Mataji: You see, by God's grace you have lots of brains. You should use for scientific purposes and also you must use your brains even for spiritual purposes in the way that you must first of all reach right conclusions,

must reach right conclusions. With your brains you must reach right conclusions what you are seeking, what are you to achieve, what should happen to you? You must reach right conclusions.

Once you have reached the right conclusions then you will be surprised to find out that there is some sort of a living thing that has to happen within you which Christ has said, “To be born again” or we can say in Sanskrit is called as `Ātmā sākṣhātkar', or say in the Koran it is said, “You have to become the *[UNCLEAR* Perat]." There were so many people who have talked about it, tried. Especially Mohammed Sāb has talked about the resurrection time, resurrection time. And in the resurrection time He has talked that, “When you'll be resurrected then your hands will speak." I mean He has given a right indication as to what should happen to you. Then we have got great psychologist like Jung who have talked about collective unconscious and all those things.

We have to find out from there that we have to reach a certain type of an awareness. It is something that should happen to our awareness. As human beings we have an awareness which is higher than the animal awareness.

So we have to reach an awareness which is higher, definitely higher than what it is today, minimum of minimum that should happen to you. If it is not going to happen then all these nonsensical ideas that you can jump, or you can swim, or you can fly and all these ideas, that you can do otherwise also. And if these things appeal to you and you think by that you are going to improve then it is not the mistake of your fate but is the mistake of your not understanding.

I feel in the West people are extremely naive and they don't understand that a Guru whose life itself is a parasitic life is not at all a life which can be called righteous. A Guru who has interest in your money and interest in your women, this kind of a base personality, how can he be a Guru? `Guru' means a deeper personality. `Guru' means `depth'. And if a person calls himself a Guru, he should have some depth. How can he take your money? He's a parasite out and out, no doubt. But we are used to this kind of a thing because we have seen in all so-called religions also, people take money. They live on the earnings of God's name. You cannot. You cannot take even a single pie in the name of God whether it is a church, or a mosque, or a temple, or any place. Alright, if you have to pay for the church building it's alright, but you must have your own work. You shouldn't work in the name of God and make money out of it. This is a simple thing, absolutely simple. But human beings cannot see simple things. That's the trouble. They are not so simple to see simple things, I think.

Phil: Might I finally ask You, Mātājī... Many people are seeking happiness in many different ways in the world. Is it true that, well, would You say that Sahaja Yoga really satisfies all these different sorts of seeking by different people? Does it really give people what they are seeking?

Shri Mataji: You see, under illusion man thinks that.

Sometimes he thinks that he wants money, sometimes he think he wants power, sometimes he thinks he wants emotional help and all that. But actually that is what human beings think that, “Perhaps this will give us happiness, that will give us happiness?" But you know

the economical laws are such that wants in general cannot give you happiness or satisfaction. It's written. They are not satiable. It's accepted by economics.

So these things that we think of do not give us real joy. Happiness is a thing that is perishable. And unhappiness follows happiness, again happiness comes, unhappiness comes.

So a man is dwindling between these two stages of so-called mythical enjoyment or a mythical unhappiness.

But there is something like absolute joy and that emits through your spirit. But if you do not go for your primal desire, the only desire for which you are made, to be one with the Divine, all other things cannot give you the joy. Because that's the primal in you existing and if you do not pay heed to that you cannot be happy.

But I must say that everybody doesn't have the seeking. They do not have. There are some people who are really of a very deep nature only who have seeking. Most of the people are seeking something else, nonsensical. And those who are also seeking God are so much mislead. But doesn't matter. They are born with the seeking because this they had for years and ages. And those people who have no seeking at all I don't know what's going to happen to them because time is very short and they must do something about it, to find out why they don't have any seeking? How are they satisfied with these mundane things and useless transitory things of life? If they can see around again, find out that all the people who are supposed to be very successful are extremely dominating, or extremely unhappy, or funny type of people.

So why do all those things which are of no use to us. Instead of that if we become the spirit, we solve all the problems on every level on social, economic, on political, on spiritual level, all problems are solved and just the whole human race will be saved because it is on the brink of destruction now by its stupidity.

Phil: Your Holiness Mātājī. Thank You very much.

Shri Mataji: Thank you very much. May God bless you.

Phil: Well we've heard the claims made for Sahaja Yoga and I must say that during both of the interviews I did feel a calm and the sense of coolness playing about the fingertips. It made me wonder.

But you can find out for yourselves tomorrow evening at seven in Refectory, level one. And if you want any more information, you can find Jason Copeland who's organizing Sahaja Yoga on campus via Oprah's Pigeon Holes or at 62 Park Village. Or if you're off campus, you can ring the Sahaja Yoga Center in Brighton on 561 847, again that's Brighton 561 847.

***Contents: 1982-10-26*, Public Program (one day after Mahā Navami and one day before Dussehra), Day 1, Institute of New Age, Manhattan, New York, USA**

America is a country which has attracted many people to come down to talk about Spirit, about God, about new consciousness, new awareness and all those things that you have heard about. I'm sure you must be fed up with that [soft laughter and laugh]. Everybody has been talking so much that you've been targeted.....

Contents: **1982-10-2x Advices, Manhattan, New York, USA**

[At the earliest beginners of Sahaja Yoga in the U.S.A., Sahaja Yogis were so scrambled as to need background music to meditate, to seek the peace and find the silence:] No problem, just be pleasantly placed [towards yourself].

You know what is wrong with you? You have no discrimination.

You must give up joyless pursuits.

You are My hands, you are My instruments.

You must introspect, you must correct yourselves. First, you must be pure. After all, I love to play with My children.

Contents: 1982-10-27 **Morning Conversation with a Sahaja Yogini, Judy Gaddy's Apartment, 215, West 92nd Street, Manhattan, New York, USA**

[Felicity Payment, who was pregnant and travelled all the way from Vancouver by car, overslept in Shri Mataji's bedroom. She leapt off the bed as Shri Mataji was already talking with the other ladies.]

Shri Mataji: You must never wake up like that. Be relaxed, take it slowly. How are you feeling?

Contents: 1982-10-28**, Public Program, Day 2, Institute of New Age, Manhattan, New York, USA**

[Introduction of Rustom by a young American Sahaja Yogi.] [Rustom: MISSING.] [Shri Mataji's talk:]... [left] side or to the right side. By going to the left side you develop your attention aware of the past, of the subconscious.

And beyond the subconscious is the collective subconscious. On the right hand side as I told you is the supraconscious and the collective supraconscious. If we do not know what is unknown is not Divine, we can be quite confused about it. Whatever is unknown to us suddenly can become Divine to us. For example now, somebody says that “I will get you from the air" say “a diamond." So immediately, you will feel it is coming from God directly. Or he might even give you a Swiss made watch. Now you must know that God doesn't deal in all these things. Must use your comment sense.....

Contents: 1982-10-29 **Talk to Sahaja Yogis, Creation, Incarnation, Manhattan, New York, USA**

Shri Mataji: You may be quite shocked when I tell you all these. But you *[UNCLEAR* would/all] can find out on the Kuṇḍalinī whether it is true or not, you see. The thing is, the Kuṇḍalinī the only One, which is going to tell you that whether it is true or not.

So now, we, to begin with, let's see, *[UNCLEAR* when, when/with, with] God Almighty or the Creator or they call Him, as Parabrahma. In the Sanskrit language, He is called Parabrahma. *[UNCLEAR* He's/He was] fast asleep.

So there was nothing. Just *[UNCLEAR* asleep/His sleep].

Sahaja Yogi: Oh, it's fine, a, I was going to show it to You...

Shri Mataji: *[UNCLEAR* If we had from/When I use to come to] India they *[UNCLEAR* use to also/were showing to Me], whatever it is, just find out.

Sahaja Yogini: Yes.

Shri Mataji: And keep contact. *[UNCLEAR* And/When] they are going to contact *[UNCLEAR* you/this man], [send them straight to] Doctor [Balawar] and he'll work [it out].

So, *[UNCLEAR]*. She said you sound very well. Now how was New York to you? I see, not so disappointing. Last time you remember Tracy was going back to New York. Tremendous vibrations, tremendous.

Sahaja Yogi: Mother, you were talking about some rock formation *[UNCLEAR* or/and] something with three faces on it.

Shri Mataji: [Aha].

Sahaja Yoga: Here's a photograph, but this isn't from India. It's from Nevada.

Shri Mataji: From where?

Sahaja Yogi: Nevada, Nevada, which is...

Sahaja Yogini: It's on the West...

Sahaja Yogi: It's a state there, yeah.

Sahaja Yogi: Near Arizona, Mother.

Shri Mataji: Is it natural? Sahaja Yogis: Yes, yes, Mother.

Shri Mataji: *[UNCLEAR* Dattereya this is/You can first share this one.] Three faces, na?

Sahaja Yogi: Yes.

Shri Mataji: Dattātreya, it is simple. It is, this is Moses. See here. [Hindi.] No light, you can see there, how do you *[UNCLEAR]*. He's working out very well. See the vibrations. They are so much.

So now we can just in short say that [Hindi.]...

Sahaja Yogi: Achcha, *[UNCLEAR* in all directions/it's non-veg means].

Shri Mataji: [Hindi.] In short, we can say that the ego was formed and that concentrated point became the Holy Ghost, what you call. But I would say it is better to call It Holy Spirit. Because you see, this ghost business has been taken over by these Jews and they are really exploited. And they say it's like a witch. I mean, when you get against, human beings *[UNCLEAR* and/when] they get against something, they lose all sense of proportion. Even against God. They have no sense of proportion left, then. They think this is their really. To say it, they have to have like that without any, without any sense that you are insulting God. And some told Me in Greece, what they call [this one]?

Sahaja Yogi: Who, Shri Mataji?

Shri Mataji: *[UNCLEAR* In a/Inner] for Holy Spirit.

Sahaja Yogi: *[UNCLEAR* Oh, the/Called It Pneuma] and in the Bible is the Breath.

Shri Mataji: Sacred Pneuma.

Sahaja Yogi: Yes, the Holy Breath You are.

Shri Mataji: So it is that, the Breath. You see, that's the Breath of God. Now this Breath of God, Holy Ghost or Holy Spirit, whatever you may say, is the Primordial Mother, the Ādi Shakti. In Sanskrit language, you see, one it has such an advantage that every word, every word, every consonant, every vowel has a meaning. And actually *[UNCLEAR* Samskrta] it is started in, according to, I mean, if you read the calculations, according to *[UNCLEAR]* [of] what he says that it started in Norway, that the mother language of Sanskrit *[UNCLEAR* related/handwriting/dialectic] was in Norway, according to him. That because the *[UNCLEAR* Romanic/Rohini]

constellation, I don't know what they call in English, is at right angle in Norway.

So it started there and *[UNCLEAR* Samskrta] means made holy, made holy. San means holy, Sanskrit.

So out of that mother tongue they found out through Kuṇḍalinī movement, you see, because when it moves, it makes sounds at every point. For example, here it makes all the vowels, the sixteen vowels. And that's why it was called as Deva nagari, means it is the script of the Devas. They can understand. That's why Sanskrit was called as Deva Nagari.

So now, so this, Ādi Shakti didn't want to produce or create Her duality *[UNCLEAR* in Her/about it]. And She was enjoying Her husband's company.

So She didn't want to have, *[UNCLEAR* I mean/only] in a very, a day-to-day language, we can say like that, in the sweetness of it.

So there's a *[UNCLEAR* lasier/laster/lustier] stage in between is, *[UNCLEAR* lasier/laster/lustier] is that, that She refused that She is going to create [for Sadāśhiva] and that's how She came closer to Him first. But then He made Her, He pushed Her. “Go. You have to do it." In that movement this Om was created, because She was at a point *[UNCLEAR* with/within] *[UNCLEAR* a/the] circle. When She came closer the circle broke. *[UNCLEAR* When/And] it was thrown away, the Om was created. Actually, if you see the Kuṇḍalinī rises, if you can see *[UNCLEAR* this/it], [its form], from supraconscious angle, you can see the Om on your head here, where Christ is sitting. In that movement, in that sound, Om was created and that it was *[UNCLEAR* like that/of Christ form].

So how Primordial Being just after the desire started activating, the first beginning of it. I mean, *[UNCLEAR* I/there] was pushed into activity, we should say and not *[UNCLEAR* in fact easy/in the activity] as that, He was created, at that time. That's the origin of Christ *[UNCLEAR]* Om. I think you call it Logos or something.

Sahaja Yogi: Yes, Logos.

Shri Mataji: Then the Goddess divided Herself into these three forms and She created one Son and one Daughter. And I mean, there is no sex in this work, because is coming from the Heavens. You see, it's for the lower people to take to sex to produce. For Them, They don't need any sex. And then they were married in the sense that they were given as powers, like passing from one to another. It's all a big story.

And all that was formed then a, you can say, the three main personalities or the main forces and their powers, the Shaktis. They were not their sisters but if *[UNCLEAR* they/we say] married, *[UNCLEAR* it was/because] from another mother they got it. It is just to give a combination, because if you have to balance; then if the male is working too hard then the female balances. That's why a person who thinks too much gets a heart attack. He should really get the attack in the brain but he gets attacked in the heart. This is because of this combination that was created. It's all deliberate, calculated, with complete understanding.

So these three formed the three channels within us: the first of the desire; second of the action; and third of the evolution, or the sustenance, or the Dharma, the religion.

So the religion, as you see, it's the valency; means our quality.

So now we come back to this creation of the innocence, the first one. The innocence is the first Logos, is the Om, is Christ. But He first was created as Gaṇeśha. When He came on this earth, He came as Christ, because He is beyond ego. He cannot have ego; He cannot have superego. And He is wisdom. To represent that, a head of an animal was put on His body, because the animal never goes into ego. And the wisest of all being the elephant and also elephant is the remain, is the only remaining animal, there's a story about that also, out of the large ones we had, the mammoth and all that, out of evolution.

So He was made as the symbol of that personality which was Śhrī Gaṇeśha. Is the, we can say, the seed of Christ, or just the analogy point. But we can say that, that's the stage as the primordial stage and Christ incarnated as a human being.

So He had to be human being. I mean, you will see some Gods and Goddesses shown with four hands and six hands and ten hands and all that. But actually they, that is in the, in the first stage of creation where they were like that, but when they come to human beings they have to have only two hands and [two] feet and a proper neck and a head. Otherwise, nobody will accept them. As it is, nobody accepts whatever you may try. Whatever you may try, all tricks *[UNCLEAR* they have tried/you will try]. Nobody accepts. That's the main point, because human beings think they are the wisest of all.

So, it came down. Then this two, the second Chakra, is of seeking, started. Then animals started seeking the food. While seeking the food they also started [food] seeking the strong shores of the sea.

And that's how they crept out of the sea and the reptiles started and that's how the evolution started in that area which you see as the green here, the round. Now this is the stage where we see how the Divine helped us. And He sent ten times the incarnation of the Viṣhṇu, we call Him, because Viṣhṇu is the One who gives us sustenance.

So the three aspects were, the first one as I told you was that of the desire, is the Shiva aspect. The second is the activity, Brahmadeva, the Creator, aspect of God as a Creator. The first as a desire and when the desire finishes is the destruction.

So the first one, you can call it, as the one who is the desire and existence, as well as destruction, because then if existence is not there, there is destruction. Negation of existence is destruction.

So that's the first thing. The second thing is the activity which is the creativity and that is Brahmadeva and the central one is the aspect of God, which is the sustainer, the protector or the one, which gives us our Dharma, is our religion.

So human religions are ten. In the evolution, they developed into ten religions we must have. These are the Ten Commandments of the Bible. Bible is all there. Everything is so interwoven to Me, I cannot see the difference at all. Because you deal with the present. Supposing I've seen a child growing like this and then

growing like that and growing like that and growing like that, to Me the whole personality is the same. In the same way that this Void is nothing but in the, you can say the Mediterranean Sea, *[UNCLEAR* that/but] is that void, where all this activity took place. This activity took place because there were ten main, these great prophets, were there. And these prophets are the people who are made out of the innocence, the innocence of these three aspects of Him. The innocence of these three aspects of God is made into a personality called Dattātreya or the Primordial Master. He comes on this earth again and again. Specially ten are the main, main incarnations.

So He comes again and again on this earth to tell people about their Dharma, their religion, their capacity, their quality. That's their job. That's why Moses did not talk of an ascent. But that doesn't mean Moses does not play any part. But one can ask the question that, why, why the balance? Why did He talk of the balance? Why did He talk of the Ten Commandments? For what? I mean, every intelligent man must ask. Every Jew must ask, `For what?' Because without balance you cannot ascend. I mean, even an aeroplane have to be a balanced thing to ascend. Anything, I mean even if we are walking, we have to have a balance.

So to establish the balance within us, these people came again and again, these ten primordial beings, we say.

Some on the left hand side, some on the right hand side. It's very symbolic. The whole thing is so wonderful.

So now we can say who they were from the very beginning. This is Socrates, Moses, Abraham, Lao Tze, we had Mohammed, Nanak, Janak and the last of all was

Shirdi Sāi Nāth, Shirdi Sāi Nāth, the one who lived in Shirdi. He is the last incarnation who came. After Mohammed Nanaka came; after Nanaka, Shirdi Sāi Nāth. All these are the one and the only one principle of Primordial Master who came and they all said the same thing. First of all, they were against alcohols, against any kind of an intoxication. But say at the time of Moses they didn't have cigarettes, you see, so He didn't say about cigarettes, naturally. They didn't have.

So the people who follow Moses think there's nothing wrong with cigarettes because He didn't say. But that time there were no cigarettes, you see. All these sinful things were devised afterwards.

So they didn't say. Today we tell *[UNCLEAR* no/you], I don't know what other sins people are thinking about. That whatever I see I say that, “Don't do this." Supposing you ask Me I'll say, “Don't do this." But tomorrow one may say that “Mātājī didn't say that, `Don't do this,' " because, you see, human beings are good at finding out things by which they destroy themselves. They are experts, you see, how to find out things by which your Dharma is destroyed.

S whatever at that time, whatever they thought *[UNCLEAR* was/wasn't] good they said, “Don't do it." Like Mohammed Sahib said that, “Now I will not come anymore; is the last prophet” because He thought He's done the job. But then he found that they are fighting and they are not at all bothered about their ascent, *[UNCLEAR* or/about] their balancing but they are going *[UNCLEAR* into/again to] the other extremes.

So He incarnated again as Nanaka and then as Shirdi Sāi Nāth.

So, these incarnations exist within us. They exist within us.

Now if you have to take the case of a person who suffers [say] from [say] stomach cancer. I had exactly this case, from Iran who suffered from cancer of the stomach.

So I told him, “Will you believe that Mohammed Sahib was the same as Moses?" Imagine, what a great challenge for a Muslims to say Moses and Mohamed Sahib were the same. He said, *[UNCLEAR* he'd never “I can't/”No, never, I can't] believe it. How can *[UNCLEAR* it/that] be?" I said, “But Mohammed Sahib Himself said that they are the same. They are all *[UNCLEAR* unsure/ten in number].

So why don't you believe it?" He said, “But they were not the same. I cannot believe." I said, “I cannot cure your cancer. Because you are a fanatic, that's why you have got this stomach cancer.

So you have to accept that they were the same." And he woke up, you know. *[UNCLEAR* Then/So] he went back home and, [and when] they went to the hotel again. They had come all the way from Iran.

So the wife said, “Now, will you please get *[UNCLEAR* alright/your Realisation]?" He was very sick. He was dying. Doctors said he was going to die. He came to *[UNCLEAR* his room/Me] and said, “All right, Mother, I'll do it." I said, “Now you say that again.

And that is the mantra for *[UNCLEAR* it/you] that, `Mohammed, I know that you were Moses.' This is the

simple mantra you have to say." And he got cured; you'll be amazed. He went back to Iran. He's still there [maybe] living *[UNCLEAR* still/to this day].

So this is what it is; all these ten are there. And now imagine the Jews fighting the Muslims. Why, I was so much in a fury yesterday because I just can't imagine, how can you do it in the name of God, in the name of the prophets who incarnated? The same person incarnated.

So now the evolutionary part is that the incarnations came on this earth, ten, the incarnations, as I've told you. The tenth has to come still *[UNCLEAR* we/you] can say, or is there, in a way. The incarnations came in and first one was the fish, *[UNCLEAR* with sea/which sees], which, which remained on this earth to guide, till we had the Great Deluge. It was He, that fish only saved that ship from getting drowned.

The same fish stayed on for the incarnation, after even it had [been] incarnated. It stayed in the seawater even when this thing happened [and] that he tried to save that incarnation of the sustenance.

So we start from fish in the *[UNCLEAR* mythology/beginning, like already] we have ten incarnation. First is the fish. The second is the tortoise, the reptile, which walked out.

But the leader has to come.

Somebody has to lead human beings. If you do not get the leader, they do not venture into it. Normally, they venture into all darkness, never onto the right side. This is what is the original sin, which also we should understand. In the Christian mythology they talk of the original sin. The original sin was committed because of

the *[UNCLEAR* same/sema], style the human beings are, that God created human beings like animals, *[UNCLEAR* to be/being], symbolic. Now He gave them freedom. But innocence was there and He told them, “Keep in innocence. There is no need to destroy your innocence and try to know something. If you are innocent, obedient and if you remain as you are, you'll become the Spirit. But in freedom you must live. You must have freedom. Because without freedom, how can you get the supreme freedom? So you have freedom." He gave them freedom. The animals are not. They are pashu. They are in the pash. Pash means they are in the bondage. They are not free.

Human beings are free. If you want you can be a scorpion, you can be a lion, you can be an elephant, you can be anything.

So this freedom was given and was told that, “Don't eat the fruit of knowledge." Now this fruit of knowledge was, what this knowledge is Avidyā, that we know of, like creating [at a myth form]. We drifted onto this. There was no need for us to know. And this when we started knowing, where are we? At the brink of destruction. By knowing how this world is made and what are the things and about the science and all that, we reached the point where we thought we can now use this and we are using it for our destruction. But the idea was different. First, it was to be innocent, to become the Spirit and then to know about these things so that you have wisdom.

So the whole thing failed at that point. That's why it's the original sin people talk of. That's the original sin. If we had waited, we had become the Spirits and then we had

seen to what all knowledge is. You are different. Then you use it for the purpose of the betterment.

Like in India, you'll be surprised, long time back, Rāma had an aeroplane which he described as 365 and 385 gadgets, which none of the modern things have. But He did it the other way round, you see. He had the other way round, that first you become the Spirit and then you know these things and handle them, which you know.

So what happened, the first we cut off our innocence. That's the first root. And the root that is the support of the roots is regarded, it is described, Mahāviṣhṇu is described as the support of the roots.

So we cut Him off again.

So this problem started then that He had to send human beings as incarnations. To first of all to give you the balance these ten and also incarnations, ascent. To give an awareness by which you come to a point that you start understanding that there is Spirit beyond this knowledge and that you have to achieve that Spirit.

So at the time, first time the incarnation as a human being came on this earth as we say of this sustenance was of Śhrī Rāma. But before that was Vamana Avatāra which is the short man, a very short [man]. I mean, first the man was created as a short man. He is the first one as Vamana Avatāra and that one came as a leader. The first one was Vamana Avatāra and He was given the power. He was given the blessings that He can spread into three worlds; so, into into the higher worlds, into the lower worlds and into the central ones. That's how human beings got distributed into these three worlds and a big, you see, problem started. Like the house that goes

wild, you know, then it goes amuck. Then you have to get all the things collected, put them right.

The original sin is the big problem. The biggest problem was that. Now to solve it up one had to do all these things.

So first the Vamana Avatāra came. After the Vamana Avatāra came this incarnation of a very tall and hefty man. That was Parashurama.

So I don't know in the Greek philosophy, it's Zeus who was Parashurama because it sounds like Zeus. Because Parashurama is contemporary of Rāma Himself.

Because somebody had to announce. You see, it is necessary that somebody must announce the advent.

At that time it was necessary.

So Parashurama came. The tall and *[UNCLEAR* a/the] hefty man who came on this earth, maybe Zeus is called. Otherwise they are so confused, that you see, to, to relate this to that, is another confusion. I don't know how, but looks like Zeus. But He is the incarnation of this sustenance force within us, sustenance force, the one that gives us religion, the one gives us ascent.

So He came on this earth, you can say, at the same time as Rāma came. And then He appeared on the scene at a point where Rāma tried to break the bow which was given by Parashurama. And Parashurama wanted to find out the incarnation.

So He gave this bow to a king, whose wife, whose daughter was Sītā. She was this central path of Mahālakṣhmī. She came on this earth as the central

power [of] Mahālakṣhmī. Later on She incarnated as the Mother of Christ.

So, Mother of Christ is nobody else but She is Mahālakṣhmī. She is Mahālakṣhmī, absolutely there's, is no doubt about it, that She is Mahālakṣhmī. But how will you know? When I say She's Mahālakṣhmī *[UNCLEAR* we/you'll] be shocked, that's all. But She is the power of that, complete power in Her *[UNCLEAR* came/being]. Now it is described in the Purānas, if you read there is a book of Mārkandeya, which these people should know how Mahāviṣhṇu was created by Rādhā, who was the second incarnation of this [principle]. First came Sītā, then came Rādhā and then came Mary. These are the three human incarnations of that force which is Mahālakṣhmī on this earth. And the only this one incarnates, this force, sustenance, because It had to raise you. This only incarnates, not the Shiva. He never incarnates.

That's why [is] Sadāśhiva. He's never incarnated. And the left side one has incarnated only, *[UNCLEAR* they/let's] say, once or twice. Once, of course, as the son-in-law of Mohammed Sahib, just to support Him also, who is Ali. And his wife, that was later on, his wife was also the same Mahālakṣhmī personified, the daughter of Mohammed. She incarnated also like that.

So the, in the main they are worshipped as three persons in India, as I told you, as first as Sītā and then as Rādhā and then as Mary. In India, Mary, three Mary is worshipped also, three, three persons. But otherwise she incarnated as Fātima. And She also incarnated as Nanaka's sister, as Nanaki. But because they were at a potential level, they were potential at that time.

So people do not know much about them. Even Mary was potential energy. She was not kinetic. But the reason why Christ never talked about Her directly was that it was the play of crucifixion; was a very important play. And if by any chance He would have said that She is the incarnation of Mahālakṣhmī, the whole destructive force would have been against Her and then He would have come out with His all eleven destructive forces and the whole drama would have puzzled out and the whole world would have been *[UNCLEAR* unsure/related].

So just to stop that, you see, this was kept a secret that She is the one who is the incarnation of Mahālakṣhmī.

My father who was a great realised Soul, as you know he was a great master of Bible and every, I mean he knew fourteen languages. He translated Quran Sharif into Hindi. Still his book is not published, I don't know why. And a very big master on religions. He was actually My Guru as far as human beings were concerned. He told Me about human beings, how they were, you see. And he told Me that, “Till you really develop the thing for which You are here, the en masse evolutionary process, don't talk of God; don't talk of anything. Because again You'll create another Bible and another religion will start and all the nonsense will start.

So just shut up till then." And really, I've did that as he told.

So he told Me, My father told that in Christianity, when Martin Luther King came, he was a realised Soul, no doubt. But he thought that at that time the force that was attacked in Christianity was Islam and he wanted to get Islamic people into Christianity.

So he, it was a political move by him, because he was just a realised Soul.

He was not an incarnation.

So he had to adjust.

So to put that right what He said that better not talk of the Mother, as an incarnation or a mediator or anything, as such.

So He just said She was a woman. They did not respect Her. Means then He did not show any special significance. But He did not disrespect Her. But others who followed Him disrespected Her that She doesn't exist as far as they were concerned.

So this is what it is how the, you see, how even the people who are realised Souls can create a thing just to adjust to the present and then how these problems start. Like Mohammed Sahib had to adjust also to the present though He was an incarnation.

But at that time so many women were left out and men were killed and there were very few men and many women.

So there could have been illegitimate relationships and marriages could not happen. *[UNCLEAR* So/Then so] He said, “All right, you can even marry five wives. But you marry." Means you must have a collective sanction; that was the point. You must have the collection sanction. And because of that, when He said it, now every Muslim thinks he must marry five times; otherwise, he's not a Muslim. This is human nature you know, to put everything opposite.

So I don't know how they see things. The brain, you see, it is upside down. And he sees everything from another angle.

Somehow or other he manages.

So this was they did to Mohammed Sahib.

So many things they have done that I am Myself amazed sometimes to see how they have accepted all these wrong things.

So that was what happened at the time of Mohammed Sahib. He had to save *[UNCLEAR* the people/them]. Even to this extent that, you see, to marry a young girl, say, even in India is regarded as sin, absolute sin. Anybody who marries a young girl is regarded as sinful. I mean, in tradition it is absolutely wrong to marry a very young person to you, who is like, could be less than your daughter's age or something. But even to overcome that He said, “All right. I'll marry a girl who is very young so that you forget about it." Because He didn't want the greater sin that illegitimately like prostitutions.

So to solve that problem at that point He said, “This is to be done." But like when there's an emergency you create a boat to cross over, but you don't carry that boat on your head when you have reached the shores, you see. That's what human beings are. They'll carry all the boats on their heads and say that, “We belong to this boat and we belong to that boat." That's the specialty of human beings.

And they will fight for the boats, you see, which are of no use to you. And they will not feel the grounds where they have reached. That's the problem. All right.

So now here at the Void point, it's very important to see that Sītā who was Mahālakṣhmī came on this earth and She became, She gave birth to twins called Luv and Kush. Two children She gave birth. They were human beings. They were created by Her. It's a very unique to create human beings. She created two human beings called Luv and Kush. Now these two human beings were to occupy two positions in the head here, from here to here.

So they had to ascend.

So the ascent was worked on these two persons throughout.

So we can say they are the principle of the disciple. They are the principle of the disciple.

And the principle of the disciple was worked in such a way that they occupied this position and this position in the *[UNCLEAR]*. Then Luv and Kush in their lifetime, now this is another story which is now being proved, which I told long time back. One of them, he was little annoyed with the father because the father has deserted the wife, for certain reasons. The father, though the incarnation, forgot about the incarnation, was made to forget His incarnation and became the incarnation of a benevolent king. He is the symbol of benevolent king and that's how the idea of benevolence in a king first came into the head of human beings, through His incarnation. It is He who charmed or, we can say, He enlightened the awareness of human beings, of understanding that *[UNCLEAR* the/a] king has to be benevolent. This happened eight thousands years back, when Śhrī Rāma came on this earth. And to show how a benevolent king should be, He

forgot that He was the incarnation. He lived like an ordinary king, behave[d] like an ordinary king, with all His ordinary feelings and all that. It was like a human realisation, we call it. And He acted as a benevolent king. This is Rāma's incarnation.

Then he had these two children, Luv and Kush. And in their lifetime when they came back from their exile He offered His kingdom to *[UNCLEAR* these/His] children. That is also the father's position. He was the father. Father's position is that of Śhrī Rāma, what you call as right Heart. Have you got the Kuṇḍalinī book in the...? You better go through that also, the right Heart. The right Heart is the Rāma's place, Rāma is. And He had these two children, Luv and Kush. And they went to, one went, the Kush went to China and Luv went to Caucasian's side.

So the Russians are called as Slavs because he was Luv; they were called Slavs. `Sa' and `luv' means `with'. `Sa' means `with'. Luv is the one who went to the right side, to Russia. And Chinese are kushars.

So you can imagine these two twin brothers are now fighting among themselves. I mean, ultimately if you follow the history you find that two twin brothers are fighting among themselves. This is the history, the historical truth. Ascent is like this, or we can call it the descent.

So that is what happened to both of them.

Now they were reborn again on this earth, later on, much later as Buddha and Mahāvīra. Say, they are the principle of moon and sun and the principle of disciple, because these two centers are in the void.

So then they became Buddha and Mahāvīra at this stage. They became Buddha and Mahāvīra. But they found out after their death that Buddhist were another nonsense and these Jainist was another nonsense, you see, because these human beings create such problems that the same incarnations think, “What did I tell them and what are they doing? So we are born again." So they came back again as the two children of Fātima Bai who was again Sītājī, of Her, as the grandchildren of Mohammed Sahib. And they then thought that you have to fight with weapons the evil forces and they died in Karbala.

So this violence of Buddha which was preached and nonviolence of Buddha and nonviolence of Jainath, means Mahāvīra's nonviolence was of a such an extreme nature, that both of them took on this earth their birth to prove that it is essential that you have to fight and this is not the nonviolence of the weak.

Now the nonviolence of the Jains is so horrible. They are vegetarians. Vegetarianism was never preached by Buddha, because Buddha himself died because he ate the meat of a wild boar, which was half-cooked.

So I mean, He was not a vegetarian. But He talked of a nonviolence of the human beings. You see, we are violent to other human beings but we are very careful about the cats and dogs and the bugs and the mosquitos. And we are trying to save the chickens. Now you tell Me: am I going to give realisation to chickens? See, human beings are wonderful. They'll create atom[ic] bombs to finish off most of the human beings and here they'll try to save chickens, chickens. You see, tell Me the use of this

human brain, what is it [like]. I just don't understand, that how can you think of such a vegetarianism.

But these absurd ones have another limit that they put a cloth on their mouth. They cannot, they do not breathe any things like any creatures which may be hanging around in the atmosphere. But the worse things they do is to get a Brahmin, you see, take him somewhere and they give him some money and they put him in a hut, get all the bugs of the village, put the bugs in the hut and the whole night those bugs eat the fellow and take his, suck his blood. And when they are full they fall off. Then he comes all exhausted and then they give him more money. This is the Jainism. And if I tell you even greater things that they do, you won't be able to eat your food today. They go up to the bathroom part. There also they try to save these bugs and other things like that. Imagine what Mahāvīra must have thought. He talked of all these things in the hell and they are repeating *[UNCLEAR* it/them]. Whatever they said they just do the opposite, I tell you. Just the opposite of that they have done. Everywhere, every religion, they have done just the opposite. Like Hindus were told that the Spirit resides in every human being, that the caste is a jati. Is the innate aptitude, is born aptitude, not according to your Karmas, not at all according to your Karmas. You see, these people talk, ask them such questions, like, “Who was the writer of Gītā? Do you know was he?" Writer of Gītā was Vyāsa. And who was he? He was the illegitimate child of a fisherwoman, who was a Shudra caste. Imagine, how can he write that your birth, according to your birth you get your jati? How can he write, a person who is not like

that himself? Tell Me. But look at these Hindus, horrible people. How they have made these jati['s] *[UNCLEAR* you see/seen] as a Brahmin.

They are all Rākshasas, I tell you. All the Brahmins of India are Rākshasas, sitting in the temples, absolutely devils. And some of them in Kashi are the Romans who disappeared in the thin air. They are settled down there. You see their faces; they are absolutely Romans, these horrid Romans who ran away from Rome are settled down now in Benares. You can go and find out. They are the same people. If you see their blood, you will know they [are] the same people, the Romans, who disappeared from Rome.

First day I have went to Benares, I knew they were who. And I wouldn't go inside the temple of Kashi Vishwanath though it is indeed a very great temple of Śhrī Shiva. There I said, “I will not enter into this temple till somebody gets rid of them." And you know, within eight days the government took over the temple. Then next time when I went I went inside the temple. It's like that. They are all devils who are sitting down in the temple, absolutely doing Tantrism and nowadays the business is to sell marijuana and all that to the foreigners who are coming. You can only get them in the temples of India. Can you believe it? And that is against Dharma, because intoxication goes against your attention and in that part is your attention, which is looked after by your Yoga, sustained by *[UNCLEAR* that/it]. This goes against the religion.

It's very simple, you see. Recently there was a Sahaja Yogi *[UNCLEAR* who/that] wrote a thesis on alcoholism. He

got his thesis. He is a Ph.D. and I mean, of course, I gave him the little point, on what happens to the, OH ion in the water when you take this alcohol. The OH ion, it's towards like this. It is, it is, in a normal way if it is like this, then oxygen is in the center, hydrogen here and hydrogen here.

That's all right. Then the water can carry the heat from the liver, you see. Even now when you feel the heat *[UNCLEAR* in/is] the, heat is nothing but it's the poison *[UNCLEAR* of/for] body and it is carried out. But when the liver goes out you never get the temperature. And the OH ion just instead of becoming like this, it becomes like this. And it is facing the liver like this. It cannot receive it. But with vibrations what happens, it become like this, *[UNCLEAR* so to say/see this]. And that is what it is *[UNCLEAR* compeller/for they were] all against all intoxications, all wines, everything. Now to say that Christ gave wine to people, *[UNCLEAR* among/and on] that day. You see, wine means [unsure].

It means the essence, [of] the grape juice, you see. *[UNCLEAR* I mean/Then] is there any other word for the grape juice in those days? That's the only word they used. You see, the words, the way they have twisted for their own *[UNCLEAR* things/taste]. *[UNCLEAR* Then/This] grape juice is the only juice *[UNCLEAR* you can drink/used there] in that country because that was available and another thing was that it was [so] a very hot country and people used to drink a lot. Anywhere you go, into Uzbekistan, I've been to, morning till evening, they are drinking nothing but grape juice. Grape juice is the main drink

they have, the only drink. They didn't have Coke Cola in those days.

You see, you see, it's symbolic. Christ life is so symbolic that unless and until you have symbolism explained, they will never understand. You see, it doesn't mean bread which is baked in this horrible bakeries. How can that be His body, you see? Body was made out of molasses I told you the matter and He was the essence of the Spirit. The essence of the Mother Earth came into the grapes and was taken out and that is the essence.

So from the Mother Earth you have to come to the essence. That's what He was saying, but hardly He had three and half years somehow, we can say. How much one can do in three and a half *[UNCLEAR* hours/years]? He did such a lot. I can't do so much, I can tell you. Four years I was struggling in England with seven Sahaja Yogis. Four years. In three and a half years, I must say, He did a lot. But whatever He did was neutralised, because of the shortage of time, because people never went into any subtler understanding. In a gross way, if you treat a subtle personality you won't understand. If you try to treat Me in a gross way, *[UNCLEAR* that/then] I'm wife of such and such and this and that and that and that, which has no meaning at all. I mean it is nothing. It's something so, so much outside.

You see, you have to be somewhere, you have to be born somewhere, you have to be somebody's wife, you have to be something somewhere, you see to be a human being. But it has no meaning. You must see to reason. And that's what we have missed in the life of Christ.

So, now Christ is there.

So Kuṇḍalinī moves on till He is all triggering. He is at Mūlādhāra. He is at every Chakra, because He is the essence. He is the essence. TatTwam asi. He is the Tattwa. You must give them the translation we have. You were here the other day after the Pūjā? You were?

Sahaja Yogi: No, we were not.

Shri Mataji: All right, the [tatt], we have got the translation, *[UNCLEAR* which/you] Brian give you.

Sahaja Yogi: Yes, we [have], this is the `Om' I have. *[UNCLEAR]* the translation of `Om'.

Shri Mataji: Of the, yes, the translation, of the worship of Śhrī Gaṇeśha which was written, I think, about fourteen thousand years back. It tallies exactly with Him. You will be amazed. If you hear that you'll be amazed, that it was written fourteen thousands years back. But the Christians won't look out of Bible. You see, to them Bible is everything. It's not. How can it be? How can? Bible of the whole Universe cannot contain Him. How can you put Him in a book and say, “This is what it is” and according to your limited brains you cannot explain; you cannot explain.

So this is what it is. We come to this evolutionary thing. Then they incarnated and they were settled down here as Mahāvīra and Buddha.

So we have two centers here of Mahāvīra and Buddha. But at the ultimate when He comes as the Kalki *[UNCLEAR* who were/then they are] part and parcel of His being and He uses them as one of the Rudras, is the destructive forces. He has eleven Rudras. You see, the're is twelve Rudras are the Shiva's, the entire ones. And He is the eleven Rudras.

So Christ is one less than the complete destruction. Can you imagine? Twelve Rudras are of Shiva, out of which He is the eleven Rudras which is here, on our head. And once we start getting these eleven Rudras we are in for a disease like cancer or any very destructive. Cancer disease, you find it here immediately. If somebody has eleven Rudras is in for either cancer or for myelitis. Of course, there are other symptoms also. You get the Paravāṇi, you see, the throbbing here. You see, the throbbing starts from here. You may get it, because this is the void. And the Dharma when it is destroyed completely, this builds in, because these are the ten of Dharmas plus one of Christ. This is what *[UNCLEAR* it means/is very important], the eleven Rudras shown here.

So I mean, anybody who has eleven Rudras, we just get after them. Any Sahaja Yogis settles down with eleven Rudras. You see, all those Gurus are giving part of *[UNCLEAR* it/each side]. Either they give the right side or the left side. Thank God.

So this builds in. But if you go to three, four Gurus of two different types, you might develop them. You see they are left-sided or the right-sided Gurus; these horrible Gurus, I'm saying, the fake ones.

So they will give you either the right side or the left side. Now if you go to the both you may develop it. Even you may go develop it with the drugs also eleven Rudras, possible. But not to that extent as the Gurus, you see. Because if you bow yourself before these people, you are not to bow before anybody else but the incarnations. Even the Gurus, anybody, you are not to bow. Only to

bow before the incarnations. An incarnation one has to know how to recognize.

So in realisation, till you are realised I don't allow anybody to touch My Feet. It's not the privilege given to everyone. But Indians are so clever, you know. Before I say anything they are just there. I mean, six thousand people, imagine, touching My Feet and the Feet become swollen, like that, [what to do]? Six thousand people can do it. And if you tell them, “You are not to touch Mother's Feet” they'll touch *[UNCLEAR* there/that]. But they must bow, because they know. They are very clever, you see.

In the knowledge of the roots, Indians are the cleverest. They know everything, how to attain, because their aim of life is to attain Self-realisation. Nothing else is important. You see, the basis of Indian life is, you have to receive your Self-realisation. As soon as a child is born you go to a horoscope person. He will immediately [say] tell you whether he will get his realisation or not in his lifetime, whether he has a Guru or not, if he is going to meet a real Guru or not, in the horoscope.

Like My grandchild was born and we all cast our horoscopes at the very beginning. He said, “A great news came, you see, with the wire." They sent a telegram. We had sent it to My husband's family people that, “Her Guru is in the family. She will find her Guru in the family itself and the Guru is the Goddess." It was all written down from them. Can you imagine? It came as a wire from them. That's the most important thing that you have a Guru in the family.

So the Indian life is, to them it doesn't matter if your carpet is spoilt. It doesn't matter, *[UNCLEAR* if/is/you see]

this thing, but the chances of your Self-realisation if they are spoilt by anything, then that is inauspicious.

So inauspiciousness is a very important thing in India, to look after the inauspiciousness. This is inauspicious to do like this. This is inauspicious, you see. They are very careful about inauspiciousness because the chances of Self-realisation which is ultimate goal of their lives, will be spoilt. But of course, the Western are intellectuals. I don't know what to say about them. The westernized ones, the westernized Indians are horrid. They have, some of them have become Gurus.

Some have become, I mean, they are horrible people. They are making nuisance of themselves.

So now we have up to the point I've told you about this and now I have given you about little bases, about the evolution part. But to go through it in the Advent, Gregoire has written quite a lot. Have you seen that? Gregoire has written on. Have you got the Advent?

Sahaja Yogini: Yes, we have.

Shri Mataji: So as he has given Me a present, have you got an Advent to be presented to him? If you have, please give one. Otherwise, I'll send him over. Do you? The Advent. That book we give to a Sahaja Yogi, not only to the realised Souls but to a Sahaja Yogi to read it, because, you see, reading can cause problems.

Sahaja Yogini: Can You [then] translate into English the Rudra? What does that mean in English?

Shri Mataji: Ekādaśha Rudra?

Sahaja Yogini: Yes, what, what is the English...

Shri Mataji: Kalki, Kalki is, is what you call... Kalki is what is called in English language?

Sahaja Yogi: Second coming?

Sahaja Yogini: The second coming of Christ, the Rider.

Shri Mataji: The Rider, the Rider, the Rider, Kalki.

Sahaja Yogini: But if you, You said if you have the twelve...

Shri Mataji: The eleven. The twelfth one is Sadāśhiva's; this is the last, when He destroys the whole thing. The whole thing disappears into Him, the last one.

Sahaja Yogini: But how can a false Guru give you the...?

Shri Mataji: You see, because you go against it, na? Ekādaśha Rudra is spoilt by false Gurus.

Sahaja Yogini: Spoilt one. *[UNCLEAR]* spoilt.

Shri Mataji: Gives a problem for you now, *[UNCLEAR* where/here], they are there. *[UNCLEAR* Because] Hita they can't give you. You see, it is to be released na? Ekādaśha Rudra.

So now, all right, I'll show... Can you give Me *[UNCLEAR* a/your] pen? Now here you have a *[UNCLEAR* painting/printing] which you can go through it, at the basis of it and you'll see all that is done now, see, a simple *[UNCLEAR* explanation/luxury thing]. Then Gregoire is another intellectual, horribly and there were two horns that were coming out of his head when he came.

So I allowed him to talk, talk, talk, talk, you see. Then when he wrote this book, poor fellow. You see, I gave him of course the way he wanted to write and all that and I tortured his life. A year he came and stayed in London, you see. And every day used to come. I could see from

top he was pulling his ears, you see, putting his ego on one side, *[UNCLEAR* as he is/you see], coming down in the same manner.

So first thing I noticed was the book was written in a language which was very harsh, extremely sharp.

I said, “You see, how can you have a language like that? After all, you are talking about Mother. It has to be sweet." So *[UNCLEAR* I/I've] sweetened it little bit, you see. I put little honey here and there to make it little sweet, you see. *[UNCLEAR* Then/But] that was quite troubling him. Then, you see, he had written the first chapter quite sweetly where he introduced Me and how he came and [then] why he came and all that. But the second chapter started with his all intellectual, you see. Then we can call it the intellectual garbage in the head, you see. That all came out in the second and the third chapter. Like suddenly you come up from a very sweet voyage and suddenly you find rock of Gibraltar *[UNCLEAR* sitting/you see] in front of you.

So I said, “Gregoire, this is the Rock of Gibraltar." He got a fright. He said, “Mother, no. Then I will not publish it." So I didn't know how to conquer him, you see, so I said, “All right. I got some two, three critics to read the book. And they said, `First chapter we could read but second rigmarole we know.

So we don't want to read the second and the third.' " So I said, “Now, Gregoire this is the problem with this." So I said to him, “Let us make it sweeter, sweeter." At the end of the book when he finished it, I said, “Gregoire, we have to put these chapters at the end." And he got a shock, real hit, I tell you. He said, “Mother, how can You

do that, to put these two chapters at the end when it is in reference with all other chapters?" I said, “When I, I corrected the book, I saw to it, I knew that I was going to put it at the end.

So there is no change in at all in the whole book." So he put it at the end of it.

So I said, “It's nice for the intellectuals who still do not feel satisfied with the book. They can read it. You see, like the cows, you see, when they eat something they take out other things.

So let them do it till they are tired of mastication. Then they will be all right." So that those two chapters are at the end and that is how the book is written.

He is a scholar; I must say, he is a scholar, but he says, “Mother, I am not a scholar." This is the first book he has written in his lifetime. But he says, “When I started writing, all these quotations came to him from somewhere" of which he was never aware. He had not read many of them. But then when he went and saw them, it was there, but I said, “You must have read. In your memory also they were there, but you might not be remembering, whatever it is." “But it all came so clear” he said. “My memory became so much open, just like a picture coming before me." And the whole thing then he wrote it.

So the book is very, written, it's scholarly [good] and it's not at all naive.

So what is your name?

Sahaja Yogi: Richard Payne.

Shri Mataji: Richard? Pen.

Sahaja Yogi: P a fly n e.

Shri Mataji: P a fly n e. Then I must say, though I am sixty years of age I write like a little girl. I hope you don't mind. My handwriting is just like a little girl. May God bless you.

Sahaja Yogi: Thank you very much.

Shri Mataji: *[UNCLEAR* Give him/How about] this one? So you can read there the complete, I mean, it is given there, what is the relationship of all these people to each other. It's a big story. And also Tantrism, *[UNCLEAR* in/and] Tantrism *[UNCLEAR* means/is] `come to the point'. Now he's writing another book, Advent, based on Advent, in French because this book we published ourselves, with our own money and it's only distributed to people who are Sahaja Yogis. It's not meant for people who are not yet Sahaja Yogis.

So we give this book to only those people who are Sahaja Yogis. It's very limited. And you have got one?

Sahaja Yogi: No, I don't.

Shri Mataji: Oh, then I'll give you Mine. Please take this. I didn't know. I thought that... Barbara, [you] didn't [you] give him?

Sahaja Yogini: No, Mother. We never brought one.

Shri Mataji: Look at her, ha? It's a secret.

Sahaja Yogini: But he's looked at to my copy somehow *[UNCLEAR* but/even if] he doesn't have one of his own.

Shri Mataji: No, no, but he must have his own to study it, all right? Now, they are great people.

They are going to do great jobs on the, this level. Now, this is the other way round you have put it, I think.

Can you imagine, this photograph was taken by someone who had never touched the camera before? The first photograph.

Some of My photographs are so... One of them has got... Have you got that one with the lights coming in?

Sahaja Yogi: I *[UNCLEAR* unsure/have it with me], Mother.

Another Sahaja Yogi: Yes, Mother.

Shri Mataji: Now it's a big one now we have. I mean so many types. But this one, the six photographs, they caught it in a village where they saw the light coming on My head at that time and *[UNCLEAR* this/it's] photographed. Now, what's your full name?

Sahaja Yogi: E w e r t. Ewert, spelled e w e r t.

Shri Mataji: E.

Sahaja Yogi: E w.

Shri Mataji: E w.

Sahaja Yogi: E r t.

Shri Mataji: E r t.

Sahaja Yogi: Yes. As far as I know it means shepherd.

Shri Mataji: Ewert, the shepherd. And what's the?

Sahaja Yogi: Cousins is. C o u s i n s.

Shri Mataji: May God bless you. May God bless you.

So that, you see, you will see the continuous flow of this spiritual power in creating these beautiful flowers on this earth, these great incarnations and these great prophets and they are all related to one force which is the culminating point today where so many flowers, here, this blossom time are there. That's why there is seeking. It was never before like that.

And just they have to become the fruits. The time has come. It is there.

Now I would request all of you who have the academically so much alert, that essence of the academics must be first, essence. If the essence is not tackled, then it's all artificial.

So the essence is for the good of the Spirit, Saheetya. In Sanskrit, you see, it is called, in every Indian language, the literature is called as saheetya. Heet, heet means the good for the Spirit.

So the one which has that essence which is good for the Spirit. Otherwise, it is not literature. The rest is not literature. It's trash. That's trash. It's useless. Only whichever is good for the Spirit, is saheet in Sanskrit language. It's so *[UNCLEAR]*, they were so clear-cut about it. They were not, *[UNCLEAR* I mean/having] any compromise. There is no compromise [in it]. When you see, Manu said that you must speak the truth, Satyam bruvya pryam bruvya and it should be dear, it should be sweet, it should be loving, people... Pryam means the one that is prya, that is loving, that is soothing and that's that you love. Prya means which is darling.

So they said, “How can it be? Because if you tell the truth that may not be prya." So Kṛiṣhṇa said, “All right. We'll put it like this. Satyam bruvya ritam bruvya, pryam bruvya." Tell the truth which is good for the Spirit, which will be ultimately *[UNCLEAR* mean/the] pryam, is a darling thing. Then you will not ask for anything.

Now look at these Sahaja Yogis. For them the most important thing are the vibrations. If the vibrations are not all right, they are disturbed. First thing is vibrations;

last thing is vibrations because that is the presence of Spirit in our consciousness.

So, once you get the nectar then you don't want all these things.

That's the point.

So the essence of academic life is the truth which is darling, or we can say which is prya is, what is, there's no word, loving, we can say, which appeals in a loving way, appeals not to the brain but to the heart and which is just for the good well-being of the Spirit, which is appealing to the Spirit. That's the essence of academic pursuits. Otherwise, it has no meaning. It's just madness going like this like that, like that, you see. It's just madness. You must come back to the roots because the attack came; attack definitely came to you people. There were attacks from every angle, as I was telling that Brian says that they were unholy, primitive, but I said to him, it's more than that. That on your architecture Gropius, he attacked. On your music, Wagner. Then there's another who said, “There is no God. Forget it." All these attacks came to you, about 1919. Can you imagine? 1919. Freud, another attack. He wanted to make human beings into sex points, reduce them to that level. All these attacks came to you and root was cut off. And the shoot stated growing. And now the shoot realises the root is missing.

So you have to become subtler, to go to the knowledge of roots.

So you must get your realisation. Even the music has lost its roots. The music goes on like that. It never comes back to the roots.

So this attack came. Like Vivekananda, when he first came, he attacked you. Definitely he did that. Vivekananda was another false man who came here in about nineteen what. What year he came here?

Sahaja Yogini: It was the Chicago World's Fair; I think there was a 1903 or something.

Shri Mataji: 1927?

Sahaja Yogini: It was a 1903 or earlier than that. I think it was around 1903 or something like that.

Shri Mataji: No, no, no, no, should be 1927 or '24 or '26 something like that, as I recall. After My birthday. But all these nonsensical people you see.

Sahaja Yogini: Well, was a World's Fair. I remember that.

Shri Mataji: Ah?

Sahaja Yogini: It was one of the World's Expositions.

Sahaja Yogi: '23.

Sahaja Yogini: It was a World's Fair, Mother, when he came.

Shri Mataji: World's, yeah, yeah.

Sahaja Yogi: That [he came] for the announcements.

Shri Mataji: He came for the International...

Sahaja Yogi: Congress of Religions.

Shri Mataji: Conference.

Sahaja Yogis: The Parliament of religions. When they founded the Parliament of religions.

Shri Mataji: Yes, Parliament. Look at that. Since then it started the unity, to form the unity, you see. And he came here. And what he said was nothing, without the essence.

So I call him anti-God, because without the essence, if you talk it is anti-God. He talked without the essence. Essence is the unity, to find the unity. If you find the essence it has to unite. And that's how the attack started first. Not that what he said was not truth, but partial truth can be very dangerous. More than dangerous that they are.

So the attack started gradually. And his Guru was an hypocrite, a complete hypocrite, I tell you. This Rāmakrishna Parmahansa was a complete hypocrite. He married a woman before the fire and then he calls her “the mother." All kinds of dramas he played. You see, he is the dramatist. That's never done in Indian life. You see and in India his photograph is abhorred in families. Because what a man he was. He had a wife. You love your life as a wife or you love her as a mother? It's nonsense. And she used to wear all the marks of a married lady. You see, she used to cover her, we have these things for a married lady, this she used to wear and that kangan here. All that she used to wear and who was her husband if he was her son? Such a confusion he created this way. He's the most untraditional man I can ever think of.

While people like him because he suffered, he looked so miserable. You see, that's what people like. They *[UNCLEAR* want/cause] people to suffer. He's going on, this gentleman who came. What was his name who came?

Sahaja Yogi: Lex Hexam.

Shri Mataji: Ha?

Sahaja Yogi: Lex Hexam.

Shri Mataji: Imagine. He wants people to suffer. He says, “We have the right to suffer." All right, [you] go on suffering. He doesn't want to find a solution. They want to play with it, you see. Because if they find a solution, how will his work go on? So they don't want to give you any solution, because if you give the solution then you can't talk of sufferings anymore. There's no suffering. Christ is there.

You see, they want to deny Christ. At every point when they talk of suffering, they are denying Christ, because when Christ is awakened within you He sucks in all your sufferings. It's written down. And the missionaries who went from here to India never told that Christ is born. They, what they told, about the Christ who Indians could not recognize, see not Mahāviṣhṇu who is there to suck your... because they never knew a word of Kuṇḍalinī.

So Indians got a fright, first of all with them. And they could not talk of second birth as we know of, as the real happening. And they talked of this baptism. That also Indians couldn't understand. And thirdly, they had no idea about Mahāviṣhṇu at all. They never read any Scriptures, Indian Scriptures to find out also.

So closed, you see.

And they converted people in such a funny way, you can't imagine. They used to put a loaf in the water of a well and they would say, “This is the beef that we are putting." And the people were then discarded from Hindu religion.

So they became Christians. Imagine, these donkeys becoming Christians. What is the use? Misrepresentation of Christ was the greatest sin Christians have committed,

the missionaries, I tell you. Because they never understood Him in the essence that He was Mahāviṣhṇu. He came on this earth to suck the ego and superego. That's why you have to pass through Him at the end. If you do not pass through Him, how who will suck the ego and superego? But actually, you pass through Him throughout because He is the essence, you see.

So ultimately He's the vice-chancellor of every university, I call Him. Even when you get realisation, He has to be there to give you the degree. And He sucks it and when He sucks it, then the Kuṇḍalinī rises. That's what is Christ is. And when I went to this Unity Church you see, there I found the Unity, is of all the bhoots and all the horrible devils. They have got Rajneesh. How can Rajneesh speak near Christ? I can't understand how can *[UNCLEAR* it/he] be in the church? Christ said, you say about adultery, " `Thou shall not commit adultery. I say, `Thou shall not have adulterous eyes.' " See the essence of it. See the essence. He talked of the essence throughout.

And these people are having Rajneesh as one of the persons as spiritual, Unity Church. And then when I, of course I, I couldn't help it, you see, I was a guest, but I had to tell them that this is the thing and this is what has happened to you and it is wrong. This is unity of all the devils you are having. I told them frankly.

So they had the anger on Me that, “She was a guest and She should not have criticised this." But I said, “How I was a guest? You never paid for My coming. You earned all the money when I spoke." They earned every day about seven hundred people were there. They charged them, I think, five pounds or something, each day. They

earned all that money. They never paid even for My conveyance, for My food or anything.

So how was I to be their guest? Actually, I'm forced upon themselves then I had to *[UNCLEAR]*... Actually, it is not at all the relationship of a guest. When you don't even feed your guest, how is he your guest? That's the thing. I hope they will come round because all Gurus are now on *[UNCLEAR* by way/byway]. But America is to be saved at any cost.

Today I told her what is America and then New York, the Haṁsa Chakra, the Hudson River, you see, goes like this. And this is the *[UNCLEAR* ridge/bridge]. And this is that *[UNCLEAR* what your Island/Wards island] *[UNCLEAR* and/I]? Sahaja Yogis: *[UNCLEAR* Stanton/Wards] Island.

Shri Mataji: You see, this is a very important point. You know this is the whole self-respect of the whole world and the whole universe is here. The nose is very important. If, you see, somebody's nose is cut, that means he's insulted forever. But if Americans themselves are cutting their nose, what can we do? So thank you very much and I hope I, next time when I come I'll give more elaborately anything. If you have any problems you write to us, all right? And we'll let you know about all those things, whatever you think proper. And now as you, you were saying, is the cool Kuṇḍalinī.

So you will see how these ten incarnations and other incarnations and Kṛiṣhṇa's incarnations, then Christ incarnation, Rāma's incarnation, the Goddesses' incarnations, all that is described.

Sahaja Yogi: As for, coming here, since 1976 we've been working on a Project that I spoke to you last night about called, `World's Spirituality'.

Shri Mataji: You see, the, it's essence. Again the essence.

Sahaja Yogi: Yes, the essence and is we, we attempted to, to create a community of academicians around the world, probably hoping to say four hundred, perhaps, all together in all the different traditions.

And we chose editors for each of twenty-five volumes on the criteria that You've just mentioned. But we wanted the academicians to *[UNCLEAR* recover/discover] the essence.

Shri Mataji: The essence should be the unity.

Sahaja Yogi: Yes.

Shri Mataji: To show the point where it is said the same thing. Now the only problem that is with the academicians is that if they know the essence of the whole thing is that, that at present, you see everything is dealt with the present. For example, in My lifetime what is most important is raising of the Kuṇḍalinī.

So I am not worried about other things. That's My job, you see. Now at the time of Christ His main thing was to be crucified, to [put there]. But His, His message is not crucifixion. That is His doing, because He had to be there on that point. It's a very subtle point, but that was His doing. The message is Resurrection. Message is Resurrection. That's the essence of Christ's life. And the Resurrection now is happening as Mohammed Sahib has pointed out, this is the time of Resurrection. You see, to

Me they sing the same song, elaborately more but according to the movement of the time.

So today we are at the time of resurrection where we have to enter into the Kingdom of God, into the limbic area. But those people who are not, [the] Ekādaśha is there. You see, that's why I like the Sistine Chapel where Michelangelo has shown Christ, really, the real way. You see Christ there and thrusting this side and that side at the Āgñyā. Even Blake has shown Āgñyā. I have a, I have a painting of Blake. Absolute Āgñyā he's shown, how God Himself is pressing it down, you see. You've seen that one? That's typical. That's nothing but Āgñyā itself. But who reads Blake? Who reads Blake? As Blake, I don't know if they have mentioned Blake in the Advent? No.

Sahaja Yogini: No, it's not much.

Shri Mataji: Later on. Ha, is there any paper on Blake we have done?

Sahaja Yogi: No, I don't think so, Mother.

Shri Mataji: But why not the Kuṇḍalinī in this thing as Blake has there? The evolution of Kuṇḍalinī.

Sahaja Yogi: The evolution of the Kuṇḍalinī.

Shri Mataji: Also give them if you can find. You take their addresses; you can. But you see on Blake I have spoken on this. He went to this extent, you see, that he has even described, you know, the houses where I lived. The first one he said, the first beacon will be lit in Sunny Hills, where lived first. Then about our Lambert Way where we have an ashram that a sinuous will vibrate. You see, such details he has given. Come to Lambert Way. Then Jerusalem is to be, means this is going to be the

pilgrimage. The last house that we have now is on the Twyburn Brook. And it's written there that it will be on that brook behind the Kensington Garden. It's exactly there and the Sahaja Yogis are the golden builders because they have painted some parts in the cornices with gold, the golden builders. And so beautifully written.

The hearts are thanks giving and the floors are honesty. It's beautifully he has done it. You see, if you read it, you'll be amazed. Jerusalem, in that he has described *[UNCLEAR* all that/God].

So I mean I must say that Blake, Blake is the same as Mārkandeya, the one who came about fourteen thousands years back to talk about Christ and Blake who came to talk about Me, about hundred years back in England.

Is it there?

Sahaja Yogini: Yes, this is, this is the book that has it, the description.

Shri Mataji: Milton. Yes, you can read in this one and they will give you exact pages and all that.

It's wonderful. He says the men of God will become prophets and they will have powers to make others prophets. I mean and Nightingale where we now have an ashram is actually, they came and told Me that, “Mother all kind of birds are coming there and they are singing songs and in that area. It's so beautiful You can't imagine." And then they found out. You see, it always happens after the event they find out.

They found out in Blake, nightingale is described that all the birds will come and sing the songs and all that, is

there. And I laid the foundations, foundations in Lambert Way and it's written, “Foundation will be laid in Lambert Way." And this happened later, they found it out. I mean, I laid the foundation earlier but they found out later and they sent the thing to Me when I was in Switzerland. He's, he's Mārkandeya, no doubt about it. Tremendous. He's Kabīra, he's Mārkandeya, he's the same. The great principle. He's Mahāvīra, the same person. See the vibrations. But nobody understood his telling in England. See the vibrations.

Sahaja Yogini: Mother, if they would like to have coffee?

Shri Mataji: Oh, I see, good idea. Please have it from Sahaja Yogis. Just, you can put this Milton.

It's very beautiful. See, he has also shown here. You see, in his own way, he has shown this, [that] Kuṇḍalinī resides in you. You may write to Me. I will now go to India. If you can make it possible to *[UNCLEAR* go/come] to India, it would be good.

Sahaja Yogi: Hopefully and I hope to see You in India. I will be in India at that time.

Shri Mataji: Oh, I see.

Sahaja Yogi: But I can't. I can't. Unfortunately, I cannot make it *[UNCLEAR]*.

Shri Mataji: Yes, but, but you see in a, it's better than, if I go to the villages it's very difficult, you see. I don't want you to go through those hazards. To live in villages with hundred and eighty people, you see, it's so difficult in India, you [don't] know. But they want to go to villages only. They love it.

So I have to go to villages in the first part of My trip. But the second part of My trip I'll be in Delhi in a more sophisticated nature. *[UNCLEAR* Where/You/They] have proper *[UNCLEAR* ablution/accommodation]. But to Me it does not matter, you see. Wherever I live where there are Sahaja Yogis, I really enjoy it. Actually, you'll be amazed that My family is an old royal family. My father's family is an old royal family, called as Shālivāhana; it's a dynasty, which lived at the time of Śhrī Kṛiṣhṇa also. And a bhagru, called as, somebody called Bhagru Mahan who came about two thousand years back started a calendar of Shālivāhana in India, in that part of Maharashtra, where Sāi Nāth also worked in that area. That is a place. It's a real place of the saints because these ten great saints which were called as natha, incarnations of the same principle, worked in that area. That is actually a place of such vibrations that Śhrī Rāma and Sītā also came there and walked bare feet through that place.

So the whole place is extremely vibrated and you have temples about thirteen thousands years old and it's a very, very ancient place. And there My forefathers ruled and you'll be amazed that My work, it's really there. Well, My father never went there and neither My mother went there. But My father and mother lived in their childhood in two villages, I should say, where the rulers lived. And now they have an old fortress. I think you have seen that fortress. I showed you.

Sahaja Yogini: Yes, we did.

Shri Mataji: It's there they lived. And My mother lived in the other village and there is a big river going in between. And then in their own family about three

generations back they had to take to Christianity for a certain purpose, that the, you see, these Hindus and the Brahmins tortured My great-great grandmother, I should say who was, became a widow. You see, they used to marry girls at a very young age because of the Muslim invasion. And then this girl became a widow and she was a very powerful woman and they tortured all the widows in those days. The Brahmins had diverse methods of torturing these widows. You see, they were to cut their hair, they had to sit in a dark room and they were not to show their faces to anyone. They were given the remains of the food and even they were ill-treated, I tell you. That's why they took to sati also in those days, you see. That's why they took to sati.

Now this lady was tortured like this.

So the brother felt that, “We should now give up the Hinduism” because the Brahmins were so horrible and he took to Christianity. That's how he became a Christian.

And he married her to, we are rajputs, we are kshatryas, we are warrior classes; that's the king classes and he married her to a Brahmin, his brother and his friend who was a Brahmin. He married her to a Brahmin. That's how two families came in to Christianity.

But My mother and father both were very learned people. My mother was a scholar of Sanskrit and of Mathematics. She was a mathematician and so she knew about Ādi Shaňkarāchārya and all that. But the Christians didn't see the sense, you know, because My father was shocked the way the Christians were.

I mean, they never saw [UNCLEAR…/through it]. We had all Christians who were just converts for money and this

and that. And he was the first Indian Christian to be elected. Because they all, all elected him not as a minority, not as a minority, you see, because minorities were just nominated, but he was elected member of the General Election you see. He was the first one to be elected in the Central Assembly and then to the Constituent Assembly, then to the Parliament. And now My brother is also a Member of the Parliament and now he is the Minister appointed for what you call these telecommunications and all these in charge of newspapers and things like that.

So all this is My mother's family, My father's family. Mother's family is, you must have heard about Shivaji and his mother was Jijabai, a very powerful woman.

So My mother is from that family called as Jadhavas. From that family she comes.

So I mean, it's a, family background is also so full of, what you call `Rajasas' is the activity, you see, activity. And Shivaji was a very Dharmic man, very Dharmic, you see, very religious person and extremely, of a very broad-minded person, broad mind and what you call a learned man and his brother went down to the south and he started a very big library and the South [India] took so many things from Maharashtra.

So it's a country where, Maharashtra is a place where great things have happened.

So it is called as Maharashtra. Mahā means the great, rashtra means nation, the great nation. And in that area Sahaja Yoga is settled down the best. It's because the people are not materialistic. They are very idealistic except for this horrible clan of certain Brahmins.

Now so many Brahmins are like this, I must say. Very starch Brahmins, who were Agni worshippers, means they used to have these yagñyas in their houses, thousands in one family. And they, this is My disciple now, Rajwari, he's become My disciple.

So they are also great men. But one thing you see, because we are not so organized it's very easy to break. But the organized religions have you see their own ideas from your heads. You can't break [it]. You see, if you break you are not a Christian. My father when he went to jail fighting the British. He was driven out of Christianity because he went to jail, as if Christ was born in England. Absurd, isn't it? Amazing how we had...

Sahaja Yogi: Mother, our work has, has got as to a point of, of creation that in, in a new company which it is a publishing and communications company [good in] [the] Spirit and in a, in the [good] people who wish to come together to work as a contemporary Christian community and to, to convene other communities from other traditions to, to work together, to, to provide communications that have this, the Spirit and to do this in a way that is witness, to a kind of cooperation among people with various traditions. Do You have any sense of, of this? I mean...

Shri Mataji: That's a very good thing, but again I would say that the essence should be, essence of the whole thing should be, to bring about into the light the factors which are uniting us. That should be.

That's the main thing, uniting us. And the dogmas and things you see which are making us hate each other...

Sahaja Yogini: The first community is to be called John 23rd perhaps and...

Shri Mataji: What?

Sahaja Yogini: John 23rd after Pope John 23rd, who said we should emphasize that which we have in common rather than that which separates us. It's that, would you feel that, that is inconsistent with what You're, what You were saying?

Shri Mataji: I think, you see, as it is it's all right with Popes, but you know what has happened.

John is different. I mean, he was unique. I must say, John was unique. But people see Pope as something you see, any, a dynasty coming out. Like we can say Ādi Shañkarāchārya was unique. Then all the other shañkar'āchāryas now are horrid. We cannot call them anywhere near. You see, so, the Pope if you say, as soon as, even the Catholics today, I would say Gregoire himself was a Catholic. He went as a priest and he did all that. But you see, when he went, when he went to Vienna, [oh no] when he went to Rome, you see, today their embassy was in a residence of a Pope or some sort of a thing and he was amazed because in the bedrooms were all the pictures with the nude women. All that was there. And you see, his eyes popped out. He just couldn't believe it, how they lead a life like that.

So the Pope is all that, you see. It is very generalised thing. It's very generalised. If you say of Pope, it becomes very generalised.

And poor John who was so great a man, you see. He was a realised Soul, no doubt. He was a realised Soul. But he

was crushed, I tell you. He was crushed by all the organizations and all that they did.

So I mean, I must say that you have to give him an importance. But for the whole organization if you give a name like that, nobody will understand. You see, I know he is a realised Soul.

Sahaja Yogi: `Amity house', *[UNCLEAR* this/that] is the name that we're going to have.

Shri Mataji: That's better. That could be, that could be much better. Give some abstract, give any abstract name. Or `Amity of Essences' you can put it. `Amity of Essences'. In essences. Or of essences.

If you can bring the essence.

Sahaja Yogi: *[UNCLEAR* Of/How] the essence [is].

Shri Mataji: The essence of the...

Sahaja Yogini: William Blake House has a nice sound, Mother.

Shri Mataji: Ha.

Sahaja Yogini: `William Blake's House' has a nice sound.

Shri Mataji: No, but Blake, you don't know... You see, what I am saying it is as essence it's an universal thing, isn't it? Now for an Indian, Blake doesn't ring anything, you see. But something abstract, if you talk to them then they understand. And then, because if, let's say Pope ninety nine per cent like Muslims say, Hindus or any other community will say “Oh, Baba, Pope, no." Because to them, John they don't know. Actually, you see, nobody knows John.

Sahaja Yogi: I was, this was only a house for those who were coming not only for sharing the [se] Christian

traditions. *[UNCLEAR* And that/Like for another] we would have other houses that would be [in fact] to great figures from other traditions, but under the same roof.

Shri Mataji: Yeah. That you can do. That's a different. That's a different thing.

Sahaja Yogi: Yeah, yeah.

Shri Mataji: Because first of all you must describe the whole tree and then the different flowers. It's perfectly all right. No harm, no harm at all in that. But first of all you must know that we are standing under one tree; that is God. Our God is our Father. You see, this is just to please Him, I am doing all this. But if He is not pleased He may destroy. He's just a witness. He's the only spectator I have to please. He is.

So we have to please him. And if you have the whole description as a big tree and then the little flowers that have come out of the same tree, it's beautiful. That it sounds great.

So the whole thing should be described as something like that and it would be very great, I tell you, a very great thing you will do. Very great thing in the honour of religion, in the honour of your God, your Father, *[UNCLEAR* that will be/that being] the biggest thing you can do, is to show that He resided in our collectivity, in our oneness. He is One and we can't deny Him. That is a very great thing.

So I Bless you again and again for this great work. May God bless you all! And the other thing as I told you also, you give it a thought...

Contents: 1982-11-01 **Guru Nanak's Birthday Pūjā, Every Sahaja Yogi Has to Become a Guru, Nightingale Lane, London, UK**

Today is the famous, great, full moon, called as Sharada Indu. Sharada Indu, that's the name of the Goddess also, Sharada Indu. The moon on the autumn season. This is the biggest moon, and, of course not in England, but in India that day the moon is giving the greatest light, see? And it's such a great thing that Guru Nanaka was born on such a date. As you know in India, people celebrate birthdays according to the dates of the moon, called as stithi, not as the dates we have here according to the sun.

They follow...

Rustom: Jaram, Shri Mataji. I'm going together with them.

Shri Mataji: Sure. *[Shri Mataji and a Sahaj Yogi converse briefly in Hindi.]* And this great personality was born in Punjab where people were unaware of God's ways. He was always bothered about the Dharma in all his lives, because as you know He was the Primal Master and the Primal Master is always placed in looking after our Void, in sustaining us and giving us a model of an ideal master. And He always took birth either in the most difficult places like hills and dales and mountains, or they took places which are even more difficult things, among people who were horrid and who needed their help.

So in India, [in] that time *[15th century],* somehow, Punjab was regarded as the place where people did not respect God or traditional Hindu idols, or you can say the statues that were regarded as the vibrating ones. But they worshipped money, even now and they worshipped

power. And as that time there was a King who was very anxious to convert people to Islamic religion by giving them money. Many were taking to Islam. As a result the Hindus started hating the Muslims and a big hatred developed among Muslims and Hindus. That's how in those circumstances where there was a quarrel going on between the followers of Mohammad and followers of Hinduism, Mohammad Himself took His birth on this earth, though He had decided not to take any more births, He thought that it will solve the problem.

Though this incarnation is such that it never dies, even if they leave the body, they are always around.

And they are the ones who perform lots of miracles when any other incarnation comes on this earth. They help support, guide and... seekers to go to the incarnations.

So, to celebrate his birthday, on such a date is also a myth because he never died. He is eternally living. They never grow and they never die.

But His birth is important, because symbolically He came on this earth not to propagate any particular type of the void as Mohammad did, or say Moses did, David, Moses and then before that Abraham, Lao Tze, or Socrates, which followed into a religion. But He came to create amenity, amity we can say, to create understanding, to create unity between religions. This was a very big step for Sahaj Yoga. After that as you know, He was born again, God knows where, no one knows where He was born, but He appeared as Shirdi Sāi Nāth. He too said the same thing, that to talk ill of any religion is a sin.

But these efforts are quite lost. Because the people who were Islamic at that time or those who were Hindus, are now very great fanatics.

So instead of them coming closer and loving each other they have become fanatics. Though we find that Islam is spreading so fast, Sikhism is spreading very fast too. In America there is a horrible Guru, he has started to spread Sikhism. He's converting all the white skinned people into Sikhs. They are growing their hair and they are also growing their beard and wearing their kara and all those five things that were required. At the time of Guru Gobind Singh, when the war had started they had to wear all these things, which was important. Because war had started and to protect Hinduism or Hindus from the invasion of the Muslims, the fanaticism of the Muslims, they took to this kind of a military stuff. Actually if you believe in God, nothing can be killed. But I think Guru Gobind thought that he had to take it.

In all these prophetic religions, if you see, all the prophets who have spread all the religions, they were always attacked so badly that they had to take to weapons. Even in Islam they had to take to weapons to protect themselves. Now when these people took to weapons they had some discipline put on the people. Without the discipline nothing's possible. And very strict discipline was there for the Sikhs. Now today's Sikhs are no more Sikhs, they are just outside and inside they are not. I would not describe all the strictness and discipline they had to go through. But every disciple has to go through a very severe disciplining of himself if he has to become the Guru. There is no doubt about it.

It is not that only somebody like Me comes and tells you do this do that and next day you forget this *[UNCLEAR* niss]. It's a very serious matter, one has to understand. You have got your realisation through Sahaj Yoga. Now you have become Sahaj Yogis. But still I would say you are not full Sahaj Yogis, because every Sahaj Yogi has to be a Guru. Otherwise he is not a Sahaj Yogi. First of all you are Yogis because you got your realisation. But Yogis are of no use, you have to be Sahaj Yogis.

So you were told about all the Chakras, every thing, you were... [someone coughs] *[UNCLEAR* given]... about all the problems of Kuṇḍalinī, how to cure them. Everything about it was told to you.

Now you became, with that, a different type of a race, different type of people, who are twice-born, who are born by the Spirit, not by the flesh, remember that, that's a very important point which John has said: that you are born by the Spirit and not by the flesh. Those who are born by the flesh are in flesh. But if you were born by the Spirit, that's how you were twice-born. And when you knew all about the Spirit and the Kuṇḍalinī, then you are a Sahaja Yogi. But unless and until you become Guru, you are not a full Sahaj Yogi.

So to begin with we must understand that Spirit is described as a Kala, as a phase of moon, one phase of moon. But a Guru's described as the full moon, Pūrnimā, Guru Pūrnimā. Guru is the full moon, it's not just a phase.

So from one phase you have to go to the stage where you become a complete Guru. Sixteen phases there are, altogether and you have to cross the sixteen stages to become the Guru.

Now how do we do it? We have to be extremely objective about it. How do we become Guru? Because we have to become Gurus, no doubt. Now you cannot just say that, `Mother you give us a tape and we learn by heart and we go to another person say blah blah blah blah blah.' Same thing whatever I've told you, or take My tape and show them that `this is our Mother and She's like this and like that and like that.' But they will say, “All right, She might be, but what about you, Sir?" Now Sahaj Yoga has a very big responsibility, which I don't think people understand. I wish they could listen to Me very intensely and understand it.

So far if you see, Gurus remained Gurus and no disciples became Gurus. They were still regarded as disciples of a Guru, whether it was fake or anything. They never became Gurus themselves.

So there was no need for them to grow, they had to take the name of their Guru, all right. Christ had His disciples; Mohammad Sahib had His own disciples; Nanak had His own disciples; Shirdi Sāi Nāth had His own disciples. None of them became Gurus. But now it is in your lot, sorry to say, that you have to become the Gurus. It's a privilege, actually. It's a very great privilege to become the Guru. And to become the Guru, we must learn what we have to do. This also sometimes becomes just a lecture. I think so. Because I've already told you on Guru Pūrnimā what are the Ten Attainments we have to have.

Today all these sixteen stages are to be seen, how we have to grow into a Guru.

First is, we have to have complete discipline put on ourselves. Nobody has to tell you. Like Mister Nick is

attacked by everyone. No, you attack yourself, you become Mister Nick now. You have to make this body subservient to you, that is first mastery. The mastery is that my body can sleep anywhere, it can starve itself, it can live under any circumstances, it dare not grudge. Anywhere. It should be able to sleep any time, it should be able to keep awake anytime. This body is to be mastered. Even if you read Ashtanga Yoga first thing is mastery over the body, they say.

So after realisation the first thing you have to do is to master this body and is the most difficult thing for Western people, because the matter is sitting on their Spirit. First the Spirit has to come, first phase, at least the Spirit has to be there.

If you have to be the Spirit, then the matter of moon has to be covered with that light. In the first phase we have to master our body.

So what do we do to master our body? First of all we must see that “what are the things that drain out our bodily mastery." We must know all the crooks who try to master us.

So take you out yourself...

[Shri Mataji asks some Sahaja Yogis to move and make some space.] So, I had to first face My body. That first and foremost thing in Sahaj Yoga we learn, that we have to respect our body. This is the first principle of respecting our body. Means indulgence is sinful to the body, because indulgence gives you a body which is no good. First of all you must respect your body so that you can master it. If I do not respect you, I cannot master you.

So to master the body first of all respect your body. And to respect your body, you must look after your body very well. But no indulgence. That doesn't mean that you go and stand in the mud or in the rain for hours together or get exposed, to make your body absolutely sort of a... abode of all the diseases and colds and coughs and things like that, so your poor Mother suffers cleaning your Viśhuddhi. It's like a horse whose neck is down.

So you must look after your body by not giving it diseases.

Laziness is against it. Persons who are lazy must know that laziness is against your body. Because lazy people will not bother to dress up properly, to cover themselves up properly, look after their body properly, put oil into different screws that they have, to massage themselves. Look after the body, that's the point. To look after the body you must give some time, because this body is the Temple of God. And now you have become the temple but if the temple is dirty, is sick, is filthy, is unimpressive, is like a stick, or like a balloon, nobody is going to come near it.

So try to improve your personality, that it has to be a beautiful temple.

I mean, I have given you so many tips, that I think in My lives time I have not given so many tips, even as Guru. Because normally people who came to a Guru in those days were really, really, great seekers.

They would hang themselves upside down, just to please the Guru, for months together.

So that was a very different quality people, but one or two. And when you have quantity, quality goes down I accept.

But why not you people take it upon yourselves that we'll make our quality first class? So first of all train up your body well. You must take some exercises in the morning, I have told you.

That people sleep after breakfast I am told, I was amazed. I mean, this is too much. You see, God has given you this house as a blessing, to be more alert, to give His light to others. Instead of that if the candle is not even flickering, what's the use? So what you have to do is to first of all brush up yourself, completely. Make your body all right, alert. Actually at your age one should not sleep for more than six or seven hours, I tell you. No need. Six and seven hours deep sleep is sufficient. I also, in the night I sleep about... never before eleven, sometimes at twelve. Yesterday we slept at two o'clock; got up at five-thirty as usual.

So how many? Three hours sleep, three and a half hours sleep. And just now I slept for about... at the most half an hour or an hour or so, finished. When you don't have to work, like Me, in the sense, even when I sleep I am working.

So to rest your body for such a long time you make your body sit on your head and it will be very, very difficult for you to be alert.

So first of all, body must be looked after. There should be no self-indulgence. I mean it can go to any extent of self-indulgence, like people don't keep their rooms clean, their clothes clean, they have no activity as far as all

these nonsensical thi, only it is too low, too base to talk about; but it happens. People can go to any base limit you know, that's the problem, what to do? On this full moon day one has to realise that on a full moon day you are overactive. As the moon starts growing the activity starts. In the night also. But none of you so far are active in the night except for Me.

But if you come up you'll be surprised, even in your sleep you will be active.

So first and foremost thing is that you must look after your body; the body should be presentable. And you should not go with the... so-called fashions of the day. Is very important today. One should not go with the fashions of the day and take to something that is nonsensical, which is not good for your appearance, which makes you look funny or very fashionable, like a dandy person. We have to wear a dress which is in the center, dignified, just good.

Now I'm told that it is very difficult even to wake up, in England.

Somebody had told Me, when I was young, that “Don't wake up an Englishman." I haven't tried that even with a barge pole. I just tell you, at this time, never in the morning time. Because I've been warned, that “Never wake up an Englishman, that is the greatest sin on this earth." So why should English be so much addicted to sleep? The whole country's sleeping today. They want more wages, more wages so that they can sleep more. Eat and drink, drink and eat; in between, sleep. This is the pre-program... life, programed life. It was very difficult. From the very beginning I saw the Sahaj Yogis

coming in, that to wake them up was difficult. And these are the same people who were known for punctuality, that they won the war at Waterloo because of punctuality and they were so punctual that people used to set their watches, even in America. They are the same people.

Now the other side of it is that they sleep like logs of wood. They used to sleep before also, must be, because this is an old saying that, “Don't wake up an Englishman." But I used to think something else about it, why it is said, but it is nothing but simple laziness.

So, try to see why we sleep so much. If the left side is strong, people sleep, if the back Āgñyā is strong people sleep. If the front Āgñyā is working too much then people don't sleep.

So even if I say, “Don't sleep” it means that you put your right Āgñyā in working condition, that means you start thinking, which is against Sahaj Yoga again.

So it would be left Āgñyā, right Āgñyā, right Āgñyā, left Āgñyā, right Āgñyā, left Āgñyā. It will be going from one to another.

So in the center you have to be with Christ. He is alert every second of the day; killing, beating, hitting, curing, looking after, guiding, twenty-four hours a day. And go and ask any realised Soul who is called as Avadhūta, the One who is a Master, they will tell you they hardly sleep for three hours or four hours.

Because they cannot work when they are sleeping, so they sleep for four hours, the rest of the time they are working; either they meditate and do things by projection, or they work with their hands. They are busy

people, they are very busy. You have to be very busy people because now you are employed by God.

And you have to do full justice to this employment by working hard. On the contrary you have seen that it's very easy to get lazy.

So now, as many of you are already feeling sleepy, put your... First thing should be for all those people who are lazy, is to put their right to the left seven times, let's have it... With the right hand... Is better? Now the back Āgñyā. Let's have it. Laziness is first. Śhrī Kṛiṣhṇa was against laziness. I mean, anywhere He got a chance He talked against laziness, alasya. Now watch Me. On the photograph you can do the same... Better now? Tonight we have to keep awake. Big problem. But don't sleep formally here, all right? Informally you can. Better? Put your eyes, thrice... Again.

So the mastery should be, first of all, of your body. Say, you are sleeping on one side you get a pain, then what do you do? You'll sleep on the other side. In the same way, this body is to be made immune to different shocks, you see like you put the watch in the water. Shock it with the water, so it is waterproof.

So a Sahaj Yogi has to be an all-proof person.

So... he has no place to complain then, because he's supposed to be all proof, you see? Anybody, Sahaj Yogi who complains, you can say, “How are you complaining? because you have to be all-proof?" So no complaints of any kind, of Sahaj Yogis, are to be accepted or sympathized. If you start accepting people who are complaining type, you will be always busy looking after them and you will be of no use for Sahaj Yoga. Those who

have habits of complaining and all that should go to the hospital and stay there. Complaining people are really people who have some sort of a possession, I think, that they all the time complain and try to torture you and make a nuisance out of them. Such people cannot become Gurus.

Imagine if the Guru is complaining then what is he going to teach? Only complaining. The teachers will be experts in complaining and the students will be also experts in complaining.

So you create a set of complaining disciples, you see. And when they come to Me what I find they all have doubled list than yourself *[UNCLEAR]*, about their complaints. But also it is very characteristics like... Australians seldom complain and if they complain they are hit also very badly. Seldom you will find an Australian complaining. I have got letters, except for one or two who have now found themselves out, seldom they complained about themselves, about their body comforts, this thing that thing.

So under any circumstances those who can live are the people who have achieved the one-sixteenth, only the one sixteenth. “Jaisera khahu taise hirahu." “Mother, the way you keep it we are willing to stay." Of course the Mother has kept you very well. All the luxuries offered, Mother has given you. She doesn't torture you like other Gurus have tortured. Once for all, My Son has gone through all the tortures. There is no need to put you to any tortures or troubles. But you should see how your body reacts and tell your body, “Yes, Mister Body, will you please now, behave yourself and not try to be

indulgent." All these indulgences come to us through our senses.

So if you can master your body you will also master your senses. For example, the master or we can say the highest of the organ, which controls most of the organs I personally think is the tongue. Because it's the primordial... nonsense. By tongue we speak things... to hurt others. With tongue we learn: how to go on jabbering. With tongue we can show, how frivolous we are. Either we are tongue-tied or tongue-loose, there's nothing in between with the tongue.

That's only about talking part, that's lower. But when it comes higher, eating. All the time thinking about eating. I have told you a hundred times, that Sahaj Yogis should go on, really sometimes, on absolutely bland boiled horrible food, just to test the tongue. Can eat it, try this, then try this. My father used to tell, that “You must burn your tongue a little bit." That's one of the tests he said one should prove, but he was a hard taskmaster as a Guru.

So, we should see what our tongue can bear. Is it fussy about food? When it sees the food does it starts watering, first of all. Does it take our attention to food; is food important to us? So the first thing to overcome the problems of your tongue is to starve. Starvation is the only way you can correct yourself.

You see if you starve yourself say, morning just have little to eat, reduce it to half. You'll be surprised your intestine will be halved also. After some time you cannot eat more, even if you want to. Your interest will go off. Train up yourself. Starvation is a very good thing. I think

forty days that Christ did is very good idea. But that should not be a kind of a thing that, like... they have Ramadan, that they eat the most spicy food during that time early in the morning and the whole day they starve, thinking about food. Starve yourself fully, but don't think of food. That's difficult, so starve yourself halfway and don't think about food, halfway. Gradually try to master your tongue.

Mastery of your tongue is only possible if you know how to starve yourself: this is for the Western side. For Eastern side they fast morning till evening. I know ladies, if you ask them they said, “I observe Monday, I observe Tuesday; I observe Wednesday, I observe Thursday; I observe Friday as a fast and perhaps maybe, if I do not starve on Saturday I will eat on Sunday." I have known such people in My lifetime, many, who just go on fasting. They are such experts and scouts, you see, that they can show you that they can fast for fifty days, eighty days, hundred and eight days and three hundred and sixty-five days. Starving masters.

So for them I have to tell, “You have to eat” when they are starving.

To you I have to say, “Let us see which date we can starve ourselves. Let us have one day to celebrate today's great day of Nanaka. One day let us starve. Which day should we?" Monday we cannot because Monday we have a program. Tuesday we cannot because it is a day when Hanumāna has to work.

Wednesday we cannot, because that's the creativity took place, how can it be? Thursday we cannot, because we are Guru at that day, we have to work very hard as

Gurus. Friday we cannot, we have to work the Shakti of Mother, Saturday we cannot because we have to do all the intrigue of Śhrī Kṛiṣhṇa. And Sunday, how can it be? This is the day of the Sun! So which is the best day for starving now, let us see. We should have Thursday, because Thursday is the Guru's day and let us do some fasting. Half day, can we, start with the half day? Then full day.

Thursday let us have, maybe second half because breakfast is essential, I think. Without breakfast you see, the horses cannot run.

So let us have the second half... or we can have the first half. Actually you have to devise yourself. If you have to be the Gurus? It's like going to a college, where you are left to yourself. It is you who has to discipline yourself, nobody has to tell you that you do this and do that.

That emerges to wake you up.

In India is the other way round. If you tell somebody that “You have to wake up at five” the person who has told will be awakened at four o'clock, himself, the one who has told, so that he doesn't get up to wake him up. Did you follow Me? And the whole house will be awakened at four o'clock so that they can take up the duty from the person who has to get awakened. But the fellow who has to awaken might not sleep the whole night. It is just the other way round, the other extreme of it.

Say if I am there, one night I sleep there. If I get up at one o'clock I find all of them sitting and meditating, in the passage, up to the bathroom everywhere. They have not gone home, not taken food, nothing. Just meditating, taking vibrations, correcting. I am sleeping inside. In the

night I want to go to the bathroom, I just cannot go because they're all meditating. Nobody's sleeping, nobody is sleeping.

[Sahaja Yogis chuckle.] So is the other way round.

So to you people, let us do one day that you must have one day fasting, one day keeping awake. Which day should it be? Let's see.

A day when there is no film. Half, half night. Second half I mean, not the first half. Which day? Which is the most difficult day when you cannot, cannot keep awake. Sunday night. But there's a film on.

Without the film! You see, treat yourself like that, joke with yourself! “Now, Sunday night is there a film on? After twelve there isn't." So Sunday night you get up at twelve o'clock. Let's have it. Enjoy it. Don't get angry. Make a fun out of it. You think more about it, then you get upset. You just don't think about it really enjoy. It's like swimming. Get up at twelve o'clock, all of you, go for a bath nicely, sit down, say Bhajans, this that, let us do it. Should we? [Sahaja Yogis murmur support.] Michael, what about you?

Sahaja Yogini: *[UNCLEAR]*.

Shri Mataji: Eh?

Sahaja Yogini: I can go to bed at two o'clock.

Shri Mataji: At twelve o'clock, no! You have to get up at twelve. No, no, you have to go to bed till twelve o'clock, get up at twelve o'clock. You see the first half of the night one must sleep, always, it's better. Second half of the night is the better part, all right? So the first half of the night you all have to sleep anytime. You can sleep

about eight o'clock or nine o'clock if you want to. But that should not be important, what time you sleep, whatever time you sleep, you have to get up at twelve o'clock in the morning, or say after twelve.

So Kṛiṣhṇa was born in the night about twelve o'clock; Nanaka was born twelve o'clock in the night.

All the Gurus mostly took their birth twelve o'clock in the night. To celebrate that, we must have one day where we do not sleep after twelve. But then what about Caxton Hall?

Sahaja Yogi: Shall we try Saturday, Mother?

Shri Mataji: Eh?

Sahaja Yogi: Saturday night. Shall we do it Saturday night? It'll be safer, so if there's any accidents they happen on a Sunday rather than on a Monday.

Shri Mataji: All right. So you can sleep in the day time of Saturday... or of Sunday. Sunday I'm sorry, Sunday afternoon you can sleep. No, no, no that won't be all right. But if you make any compensation then you are not torturing your body much. You must devise a method by which your body does feel that it has to get up at twelve o'clock: better keep it that time, what do you say? All right.

Another Sahaja Yogi: Do you think the people's work might suffer on Monday? People's work might suffer on Monday at work.

Shri Mataji: What's he say?

Sahaja Yogi: The people's work might suffer from getting up for Monday morning, Mother.

Shri Mataji: They will never, take it from Me, they will not. You see, work is not important. What is important is your Spirit, your mastery. Work in any case you are not going to have, after some time.

So that work is not important; this new work that you have taken better look after that. Forget about your work. Forget about these things. What is important is your Spirit, otherwise you cannot become Gurus.

Spirit is the most important thing. The rest of the things are absolutely unimportant, a zero. I've been very slowly trying to take you out of the mud of materialism and of these mundane things. But you have to work for God. You are special people.

So, you have to make yourself a Master, so God gives you all the blessings, everything. But the idea of luxurious life must be given up. People want to make life luxurious, then you will have the luxury of this world but not the luxury of God's blessings. One of these two you have to select. Either you lead a luxurious life here,...

[Aside:] Come this side.

... either you lead a life which is luxurious, on the material level or you lead a luxurious life of God's blessings. One of these two you have to choose, the time has come.

So nothing is important. You see the insecurity of money also, is another nonsense, at least you people should not have it. I mean, you will never starve at least, but Indians if they do not work they will starve. Not... you people can never starve.

If you are unemployed, government is happy more, as long as you don't bother them. If you sit at home and meditate they'll be very happy.

So to earn more money or to make more money is not important at all in Sahaj Yoga. Most important thing is to be the Spirit, for that whatever is to be done has to be done. Let everything suffer. You don't make your Spirit suffer. Because you have to become the full moon, like Guru Nanak. How much did Guru Nanak earn? You should find out. How did he live his life? There is nothing to bother about money, because more money is not needed. Just needed for your food and for your living. And then money is arranged if you need any extra money sometimes, emergencies. I've done it for many Australians, you know. But those are the people who have dedicated themselves fully. And that is why they have been helped, whenever there is an emergency they don't have to bother. But the dedication to your Spirit has to be full, complete and nothing to your work, actually. Because that goes hand in hand.

If you are not worried about yourself after realisation, about your Spirit, you'll have all the problems of the world. First and foremost is financial problems. Then, physical problems, mental problems, emotional problems. All kinds of problems will follow, because I've awakened your Kuṇḍalinī; one part I've done.

But another part that is your heart, you have not opened. You must give your heart to Sahaj Yoga. You have not opened your heart as yet. Heart has to be opened. You are still worried about your father, mother, brother, sister, wife, children. Open your heart fully, to Sahaj

Yoga, in a doubtless way. Then only doubtless awareness will settle down. Unless and until you open your heart, Kuṇḍalinī rising has no meaning. Because Kuṇḍalinī is rising but the heart has not opened. If the Mother Earth sends forth Her power through the seed and the seed doesn't open, then what's the use? It's all a waste. Open your heart to Sahaj Yoga.

Open your heart to Spirit and say, `Mother we are the Spirit.' You have to realise this, many people also perhaps do not realise that you have come on this earth to be the Spirit and not to be workers of human beings. You must understand your greatness and know that you are not like mundane people.

That's why you are blessed. Who is blessed so much? You are described long time back by Blake, that such and such people are going to come on this earth, Men of God. Men of God, what do you have in your heart? Your heart will be like a stone, unless and until there is light of Spirit it is a stone heart and this stone is going to hurt everyone, is going to ruin you completely. Open your heart... hundred percent.

When you have met Indian Sahaj Yogis, they have problems of money. Oh how much they've worked for Sahaj Yoga, day in and day out, how much they have contributed for Sahaj Yoga. *[UNCLEAR* You] can imagine about seven lakhs of rupees [=700,000] they have collected, Rustom knows. Seven lakhs of rupees, they have collected for their ashram. Seven lakhs is... thirty-five thousand pounds. Thirty-five thousand pounds they have collected, only in Bombay [Mumbai]. In Delhi they have collected about five lakhs, twenty-five thousand

pounds. They are working, they have families, they have children, but what they think about is nothing but Sahaj Yoga, nothing but Sahaj Yoga, nothing but Sahaj Yoga. They give most of their money for Sahaj Yoga itself. They live with minimum.

If I tell them, “Why don't you buy another shirt for yourself?" so they will say, “Mother, I have worn lots of shirts in my previous life." So satisfied! “We have found the Ātmā now, let us dress up the Ātmā. We have found out our heart, let us become the heart." What is the need to worry about these things? We have done enough of all this nonsense. I tell you they will think they are poor, but they are not. Wherever they can save their money they will save it. They used to give Me some money before: I said “No, I don't need just now, there's no need." They say “I have no place to keep there is no trust, nothing, how are we to do it?" They continued like this till about, I think... '73... '74, when I went back we thought of starting an ashram because you people were all coming there.

So I said “All right, now you have to give Me money, all the Sahaj Yogis can give Me money, whatever they have saved." And you'll be amazed everyone came out with one thousand rupees, every one of them whether he was a laborer or, every one of them one thousand rupees, minimum. Up to twenty one thousand. In three years' time they had saved because they thought “It is our responsibility to save money for Sahaj Yoga. Tomorrow if we have to have an ashram how are we going to have?" But we still indulge into things.

So this is what is the Gurupad.

[Aside:] The gentleman has to sit down. Give him a seat. Please come in. Please. Come. Need not be standing. All right. So today is such a great day of Guru Nanaka's birthday and we have to see his own life, how he spent his own life, how he lived and in what conditions he managed.

So the first thing is to look after disciplining yourself, feeling responsible for Sahaj Yoga. I was amazed: people told Me that in the ashram people keep the lights on and the oil costs so much, three hundred pound, every week. I'm amazed! Every one of you should be responsible for every electricity everything that you spend here. This is God's place.

Somebody has given the car, everybody wants to use the car. You see, this saving, saving the pounds is still going on the heads of Sahaj Yogis. If they can save by taking somebody's car they would borrow. Never borrow anybody's car. Is not for you, you must have your self respect, why to borrow anybody's car? Is not to be done.

So the second point of the Self is self-respect. First is the respect of your body and the second is self-respect. We are arrogant, we can be rude, but we have no self-respect. But it is the training that is lacking. See suddenly I find after war, there has been no teaching how to be self-respecting. Unlike in the war, might be, the atmosphere might have been created I don't know why, that, “I'm above everything, don't care for others." May have been, I don't know why this kind of a thing has come, but, it is so, very prevalent. But you people have to be the other way round. Others are first and then yourself with your self-respect. Doesn't matter. Nobody's

going to die, I can tell you this much. You all must have self-respect; and such mediocre people should not be allowed to stay in Sahaj Yoga, at least in the ashram, because it brings bad name to Sahaj Yoga. One person can spoil the whole. Only people who want to be Gurus have to stay in the ashram. It's not going to be made into a convenience for anyone.

But the other way around is that “We are going to look after ourselves. We have to become this, we have to grow, we have to do it." Then it's just the other way round, everything works out, I don't have to tell you. You know this is so base and so gross that after being here for so many years, you should all have become Avadhūtas by now, absolutely. Controlling all elements everything, should have been possible.

But still you are under the grip of the element, how can you control it? First of all get out of the slavery, this mental slavery. “All right, if it is there is there, if it is not there doesn't matter. Nothing is more important than me, I'm the king of the whole world. If I have to sleep on the ground I can sleep if I have to sleep on the palaces I'll sleep, nothing can dominate me." Then you are the master. You know in India there are some Sahaj Yogis who are controlling, definitely controlling the elements.

We have examples of that; lots things have been published as you know that in Nirmalā Yoga, you must have heard. But you meet them, you will find they are Avadhūtas, so when they talk you feel a great sage is talking; the way they behave, all the time you see their behaviour and everything's so great. We need people of

that calibre today because that is the situation of all the nations.

You have to be extra good. Because today is not the time when we can allow things to go as they are.

Or, we are not just disciples, we all have to become Gurus. And it is not the time when you can play with time. You cannot play with evil. You have to surmount it, you have to come on top of it, it's the time when the whole ship is going to be drowned or to be saved, this is the situation today. And that's why you have got your realisation so far. If that precarious time had not arrived, how many of you really think you deserved it? But you got it, because the time is such that everybody must be given realisation and they must be given all powers so that they come up.

But if you do not open your heart, put all your attention to your Spirit, these powers will not work out; none of these powers will work out in you. This is the problem, every Guru had a command on the elements. Nanaka, you know definitely. People were sitting there and they asked him for the water and he put his hand on a rock and the water started pouring down. That's why it is called “Panjab”, “Panja” five and the five rivers exist there too. It is said about all of them that they had powers over elements.

So how much we are lacking? Still we are like other people who are selling cheap things, or who are busy making cheap things, or who are of no value. You are the ones who have to save the whole world.

And the maximum of My life, blood and toil and everything, sweat, I've put in, in this land of yours.

And the time is coming for Me to go. Only three years more are left. Before that, I hope, we establish an ashram. You need not pay for it, but, you have to be ready to occupy it otherwise you cannot occupy it, I can tell you, you cannot get any more blessings of God.

So why should God bless you? This is the point one should ask oneself. Are you your own Spirit, or you are all else but the Spirit? But when I say something, it just goes as a big roaring, I don't know if the frequencies reach your ears or not, but I would request you now, as Gavin has asked Me for Guru Nanaka's day I really didn't want to come, because to talk of Guru Nanaka and to hear about Him, one has to be a very great person. Because such a light to bear, you have to make up yourself. Everything else is important, then how can you talk of Sahaj Yoga coming there.

I went to America, I was surprised! Americans, whatever it is, few people, but to them Sahaj Yoga is the most important thing. They talk nothing but Sahaj Yoga, their life is Sahaj Yoga; morning till evening they are working out Sahaj Yoga nothing else. They are not bothered. Australians you know. But the Heart is not open, the Spirit has not shown its light. It is the one that gives you complete satisfaction, complete joy, complete Guru's Principle, because then you start giving, if there is no light what are you giving, darkness? What are you giving to others? The darkness that is within you, if you are going to give that.

So the second phase, has to be, as I have told you, to have self-respect. The one who asks, demands, has dearth, has no self-respect. Who can give Me? When I am

forgiving nobody can give Me. We have to learn to give and give and give and give. Does not matter. I am so worried sometimes that I do not give you any hard tests, I tell you. Even a little bit when you try to be funny, you do get little bit hurt, but again I soothe you. But sort of a mediocricy you see. This mediocricy is not going to help us. This is the age of mediocres. In the politics are mediocres, useless people. You go in the economics there are mediocres, everywhere there are mediocres.

In Sahaj Yoga we have to have extra-brilliant, extra-sacrificing, extra-dynamic, extra-compassionate people, otherwise Sahaj Yoga is not going to work out. If you fail, it will be your responsibility. Naturally you want Me to help you. I have done My level best, you see. All the quick methods, you see? Instant, like Pūjā, all that I've allowed you to have. But that does not stay in you, does not retain in you, the vibrations are so much. You have no idea.

Some people have felt a gale coming out. Gale, so it is there.

You may not feel it. If you ask Gagangiri Mahārāj he'll tell you what happened to him when he first faced Me. But to you, nothing happens. What if gale comes to rock of Gibraltar, it doesn't feel it.

So as far as I am concerned I've worked very hard you know that. And I know you can come up, you have that potential in you.

So, you must make your own rules and regulations, nobody needs to make. If somebody makes so much, you make your own so much, like tea drinking, like mad. I mean I just don't understand. It's like a life which is a

swingy thing, you see. It has no direction, it has no guidance. You must, if you are the master you must at least be the driver of your car, if not the master. You should stand on your both legs and know that you are the Guru, that you must have your own staff in your hand, the staff that will guide others not a support to you. If you are yourself a lanky-panky person, how are you going to hold all the masses to you and how are you going to guide them.

So, strong effort, very tenacious effort must be made. Form your own rules and regulations. Treat yourself as a disciple. You are the Guru, you are the disciple.

So the third phase of this thing is to be the Spirit. The Spirit that is the Guru and the rest of it is the disciple. Your body, your mind, your emotions, your intellect, everything is a disciple and you are the Guru. For this you do not need people of very great intellect. You do not need people of very great education. But a person who is courageous and a person who is of that quality.

When you go to India you must meet a gentleman called Harishchandra [Koli], he's a very simple fisherman. He's a graduate of course, but, a simple man works in a bank. When he came to Me in Sahaj Yoga [in 1979], he got his realisation. I've told you his story, once and again I'll tell you what sort of man he is. He told Me that they went to the sea [same year 1981], he was to go to the other side, on a small little island [village of Sakhar], to talk about Sahaj Yoga. There were twenty-five people and it was a storm, really a tempest.

So went and stood before the sea and towards the wind that was blowing and he took out his hand and he says,

“Stop it now. I have to go for Mother's work, this is God's work. Will you stop! Until I come back home, you are going to keep it like that." Once he said it then the whole thing stopped. They all saw, witnessed. He went there, did all the work came back home and when he entered his door then the water started raining, it started drizzling down.

He's an ordinary man to look at, I mean compared to you people who are really great Englishman. He lives in a very ordinary way, wife is a fisherwoman also. She sorts out fishes and sells them in the market.

But see his body is so well built and shining and the muscles so developed and... the man he stands up and the way he talks! Absolutely humble person. No wonder Christ chose fishermen. While he has got thousands of fishermen as his disciples. But he doesn't call them `disciples', he says “All they are Mother's children." Thousands, you don't know. He has been calling Me to go to them and all that but they come to My program, some of them. One day I have to go down, to those island.

“Any one of the islands” he said “You come they'll be all there the whole day waiting for me." But the way he's there is surprising. Where I'm there, he brings fishes for Me. But I said, “You see I eat fishes that you bring but what about My other children?" He said, “No, next time, all the fishes will be sent to You." And he sent one truckload you won't believe! And I said, “Now I don't even have truckload disciples, who is going to eat all this?" [Chuckles.] And he said, “Nothing, I just went and told fishermen that `Mother has asked for fishes' and everybody gave their fishes. One day we'll not have

fishes, what is there, what does it matter?" Imagine those people who live day-to-day in that country.

Modi told the newspaper people that we can control the elements somehow by Mother's grace.

So the newspaper people felt they were very much boasting. But is true, they can. To them it is not boasting is just what it is happening, so they are telling the truth, you see? But that should happen. We should also have some things to boast here. [It's] important.

So now we have the other phase as I told you, is of becoming the Guru of yourself. Detaching yourself, identifying yourself with the Spirit which is growing in its light.

So detachment, one has to develop detachment. “My mother” it starts like that. “My mother is suffering from cancer, my father is suffering from madness. Mother, can you cure them?" So now first I cure mother and father. Then “I'm married, my wife is like this, my child is like this." Then “My house” then “My motorcar” then “My dog” then “My umbrella." I have to go on suddenly from A to Z, from Z to A. All right? I can do, up to a point, but for what? For what? Why to cure the mother, father, brother, sisters, every relationship, the tenth marriage and the eleventh divorce? Why to correct all this, for what? It must have some purpose and if that purpose cannot be served, what is the use of doing it? The purpose is that you at least leave all these things into My hands and detach yourself. But you want to bring the case to Me as well as worry about it. Detachment.

But the idea of detachment is like this, “I'm very detached about money, Mother, absolutely. I'm not

bothered. I keep the lights on, why to worry about money?" This is argument. “Why should we worry about looking after the gas and all that, after all we are detached people. We are in detachment, you see.

We are not attached to money." But who is going to pay? The other type of detachment that I see, very interesting one is this one is, “I'm very detached.

So, I'm not bothered about having a bath, having all kinds of diseases, having all kinds of problems within myself, giving my problems to others, I'm detached.

Why should I cover myself? I'm detached. If I get cold, I'm detached. Let everybody get cold from me." That's why, “What can I do, I'm detached. I've got cold, so what does it matter, I'm a detached personality. Why should others mind? They should also get detached!" This is the ridiculous limit we can go in our idea of detachment. Detachment is from within. You are not bothered. You are not bothered. You know your Mother. The first detachment is shown in generosity.

Detachment is generosity. Grezna is. She sold her ornaments for nothing at all. I mean I would never have accepted that money, she just sold them. It's remarkable. She's poor. She's Polish, not English. She sold her ornaments and this is what communism has done to people, they are very detached, communists are very detached people I tell you. Of course, I would never take that money, it's just there. But the way she did it, just like that. You see I was just... Record it I must have... For God's work all right, what is ornaments, things? I mean you know I have given away so many of My ornaments, to keep relations all right. The other day I gave away My

kana, to Christine you know that, when she got engaged. Just it came out of the Hand and went away. I was detached you see, [chuckles]. And I never even felt the coming out! So much detached that Christine poor thing, you see, toppled down with pleasure but, to Me it was just, just nothing. Dust! So that detachment has to come. Now you should know which part you are, there. Like, idea of detachment should not be that, I would say hippy-style of detachment: that you have right to exploit everybody else. Or the another type as I told you which is very ridiculous. It's not an idea, it's a thing, it's your awareness itself, is detached.

So, these four things for your material side is important.

What you eat is not so important, because whatever you eat, if the brain is going to be such a nonsensical thing, it's better... whether you eat it or not makes no difference, just standarlize it! Like in the hotel, “What will you have?" “I'll have pancake." “What will you have?" “I'll have this, I'll have that” for what? I just don't understand why waste so much energy, why not you all have pancake all of you put together? Is a very big thing, you know? Or “Today I will have this” “I." Out of all this materialism what comes out is Mister I.

So we develop this Mister I, so the word “I" must go away, we should spake “We." “We." Means you and all the Sahaj Yogis put together. When you say “We” you'll find it will be different. Or take your name like, “This Norman. This Norman won't listen” like children say. I asked a little boy, I said, “Will you go home?" “I will go, but this” his name was Munna, “, this Munna won't go, he's very obstinate, what can I do?" This is detachment.

To speak in third person is detachment, in which you are not in the picture, you are a witness. You are the witness to the show.

So this detachment should work in such a way that you should witness the whole show, you are not involved into it. But just see what happens, in collectivity also. It becomes a political issue certainly, In Sahaj Yoga also, political issue, nothing short of political issue. We are not here fighting like union leaders. We are all leaders. Where is the time to fight? Whom are we to fight? That we have to decide.

So, as far as all these things concerned, are detachment and attachment to Spirit.

So we go further, see now, what should be our attitude on our mental level. Physically you have seen that you have to develop a complete detachment in these four ways... that I have told you. Now on your mental level what you have to do, is to understand the essence of every writing, try to discriminate between Vidyā and Avidyā. Because Avidyā will kill you, will take away your energy, but Vidyā will sustain you.

So try to find out books which are supporting Vidyā.

I was surprised there's a lady Barbara, she met Me only last time, Gavin and she has written such a tremendous book, you'd be amazed. I mean of such a level on Sahaj Yoga, very direct. I'll show you that and you know that book is now being considered for giving her a doctorate, can you believe it? In an American university, of course that's only possible in America. But still. That book has that level I was amazed at the book.

So try to gather nourishment, like reading `Devī Māhātmyam', reading about, finding out about `Bible' and finding about other scriptures, about `Koran', this that and which supports you, which nourishes you. Blake, Kabīr, Nanak. I mean there are so many, Lao Tze. This is the Guru, is the knowledge. But you'll be amazed, once you start doing it it comes to you.

I met a man, in, near Rahuri as you know we go there and there's a man who just drives a bullock cart and he had brought the bullock cart to take Me down to one of the programs, you know what we do there. He was sitting there, we were waiting and I was talking to him. And I felt he was an Avadhūta is sitting there to drive Me I mean, uneducated absolutely, he's never known book, he does not know how to write, but the when he was talking I said, “Oh God, from where this knowledge! From where all this coming, this wisdom?" Such wisdom, I tell you! Such wisdom that I just was stunned, I was stunned really! From a man who is not even been to any school-college, Christ did not go to any school or college. Such wisdom you can't imagine you meet him, next time when you go there.

If you could, if somebody could translate him, you'll feel like touching his feet the way... Extremely unassuming simple man, wearing a white, clean, you see their topi and clean dress and driving Me down.

And to him, this was the greatest privilege of the whole world, is to drive Me. He said, “It must be the greatest of all, something I must have done, to be able to drive You." In such simple ways he was explaining to Me about the character of the bullocks and the human beings. Just

imagine. Other things he talked about, if I tell you, you won't believe, so I... just don't know. That's the sign of a great man. He doesn't talk of frivolous things, he has no time to talk about frivolous things.

I have seen My own grandchildren, they never talk of frivolous things, they have no time, they are so busy, you know? All the time clearing out, when they came here, they said, “We have to clear out this Brompton Square then we have to clear out this Knights Bridge, then we have to clear out this London, then we have to clear out this England where is the map of England bring it” all the time they were busy, you see clearing out and then, “This place is Whales and this place is this. Oh God, this is horrible, bring some shoes, do this, do that” all the time they are busy morning till evening. They would go upstairs in the room and they are busy. They are busy people, they have no time to talk of the mundane things and all that.

Then we brought the dolls, I brought some dolls and toys for them, they put all of them there, you see and they put them and the map there. “Now. See now” to dolls, “Now you look after. You know?" They talking to dolls like that. Dolls are their disciples, teaching the dolls, “... you see, ah, don't sit like this, you must sit properly, you don't know. You can't bend your knee? Better learn that. You must learn to how bend your knees." You see, because dolls have straight legs, you see. [Sahaja Yogis laugh.] And all the boys, even the little children I have seen, the way they are busy all the time doing Sahaj Yoga. Every level they are working.

Today I was telling Rustom about My own father, you see? He was a learned man, of course. But, when he talked to someone, he used to talk of something, like I told him about the state of a person called Sambhranta. He told Me that Human beings are very different from God. When the God incarnates, then the Sambhrant state, which is awakening between the subconscious to the conscious state, is direct, see.

He comes down directly. But human beings go this way, they never go straight. See God descends, so he descends properly, but ascent is always in a very separate way. He goes on like this and he gathers everything that is in his subconscious.

So the Sambhrant state, where he is waking up, is such a dangerous thing that he can gather up anything. And by the time he gathers up, the dream becomes something so funny. He may look at a god, whom he has seen in his dream like a witch and the witch like a god.

[UNCLEAR] the way, you see, I saw him always busy. I went to talk to him, I found a companion and he found Me a companion sort of a thing. He could talk, because his attention was there. His attention was not `how everybody has made their hair and how they are sitting down or what dresses they are making, what do you have in this thing?' Nothing. His attention was on the Spirit, his own Spirit and Spirit of others. And he was so dynamic in his brain that he knew your dictionary by heart, I tell you.

He never consulted dictionary all his life, neither Sanskrit nor English. And he was master of fourteen languages. Can you imagine? How he must have managed. He used

to play tennis very well, he used to swim for three miles everyday, three miles. He had muscles that he could lift you up and [laughter]... yes! Very healthy personality, healthy man. Very generous, very generous man. Much more generous than Me, so you can imagine. Very generous, to him nothing mattered, “All right, you like it, take it. You have it." He'll starve himself but he will be generous. And a man of principle.

So we come to the second point which is we have started the fifth one, is mentally you must only take to things which are nourishing. Through vibratory awareness you will know. Ask other Sahaj Yogis, if you do not know. But take nourishing things to read and not horrible, detrimental to your progress.

If you read them, you are responsible for them. You are real, great readers, I must say. You ask any name, everyone knows. I said, “Who was Gropius?" everyone knows. You need not be an architect to tell.

Everyone knows what happened, what happened, who is this, who is that. Out of your seeking you have done one good thing, to read everything, whether good or bad, whatever it is. But now after realisation, you must try to find out what you have to read, what you have to know, should be nourishing. Talk that is nourishing, helpful.

So in talk you should have compassion. If you are talking to someone it should be full of compassion. Sahaj Yoga is a system of compassion. A Guru has to be very, very patient.

It's not like other Gurudom, or even real Gurus had no patience. This is a system where patience is the only way it will work out, because no Gurus gave realisation, it is

only you who have to give it. And you know what is realisation is. The other day we met one. The fellow sitting tight. I said, “Now..." They said, “We have failed Mother, we can't give him realisation, it's hopeless case." I said, “Really?" So I went there. At the end of it you see, they said, “Mother, there's one fellow sitting." I wanted to avoid, you see, but they said, “All right." So I raised his Kuṇḍalinī, raised it up. Tied it up, My hands paining now.

“Oh no, so I didn't feel anything!" I said, “This fellow is least bothered how much we are working on him. He's just thinking he's obliging us." So then two or three people came forward, brought a light, put the light before him, did bandhan here, there, everything: Again I raised his Kuṇḍalinī thrice. “No, not at all...!" Went on like that for half an hour, then I gave up. I said, “Sir, I'm sorry, you are too great for realisation. We'll try again." “I'm not convinced!" And I was fagged out, I said, “Really, I am convinced about you, so you allow us to go." And then I came out.

You have to have tremendous patience and sense of humor, you just can't tell him off. You see if I told him, “You are good for nothing, useless, you have a bad Kuṇḍalinī you go away from here, get away, get lost!" I couldn't say these things to him, I had to bear him through and not only, in the end I had to say that “You are a great man” you see? Because otherwise he would have used some other method. Because already the ego was so big, that with all the pins I put inside it, it could not deflate! It was made of a special fibre I think. [Laughter.] It was such a difficult task.

So one has to know that we have to be compassionate. You have to read something that nourishes our compassion. Read of people who gave away everything that they had. TukāRāma. Read TukāRāma.

TukāRāma was a poor man. And one day he went to some place and did some good job, so they gave him lots of sugar cane. His children were very fond of sugar cane.

So on the way every child would ask, “Give me one sugar cane." He was giving to everyone. When he came only one was left.

So the children said, “We are three." “It's all right” said “next time I'll bring for you. Share it amongst you three." And they had it. They said, “Better have it, now one more child will come and this will also go away." So one has to know about lives who have been giving. Read about people who have been giving. They gave their lives. They crucified themselves. They tortured themselves. They allowed to be exploited. They allowed to be poisoned. Read of such sacrifices, of great sacrifices. We are lucky people that we have seen all those things with our own eyes. But at least you be one of them, that you can at least, if not see, visualise it. You can. Bring that as your principle.

So we move now, from detachment, which I've told you four types of detachments. And then I told you the nourishment to your mind and nourishment to your heart. Nothing nourishes more to a person than giving away. Nothing nourishes your heart, your compassion, unless and until you learn to give away. Now will you please make a list of things, how many things you have given away in this one year, last one year.

I can't because it is too much. Please make a list of things, how many things, except for your brains, you have given away to others, without thinking about it, or have thought of giving. Since Christmas let us say, to this Christmas.

Heart is opening. Think of giving. On material level, other help is there to give. But no, we don't even give the other help, for which you don't have to spend any money. Just give a hand. I've seen, very easy to make out, labor saving devices. Now, I have come here, some will be running, others are just sitting.

Tea is brought to them, food is brought to them, everything is done. They'll just put the plate also before, “Go and wash." It's not only selfishness but it's unmannerly, unmannerly to be like this. In Sahaj Yoga, you have to be extremely busy, helping others, at every point. To be helpful.

You know Ravi Shankar's Guru was a very great, a very great man, realised Soul he was, a great person, So he knew so many things. And one day I was there, in the night you see, there was a doctor, we were his guests in a way, for dinner we had gone there. In the night the call came that, “I need you very much” to the doctor. Doctor said, “Now I'm tired." He was also another very giving person, no doubt. He said, “Oh you must come, I have a big problem. See, I saw a little baby." I said, “What baby you found?" He said, “It's a baby”, he was an old man, he said, “I found a baby of a deer which is suffering now and the mother is dead, nobody to look after it." So I said, “All right I'll also come with you” because I knew I will touch the baby. I went with him.

So, he was sitting with the little thing to his heart. So the doctor said, “What are you doing?" He said, “I'm trying to give him my life, you see if possible, so that when you come at least you find him alive." Just like this, such love.

So he took out the thing, doctor, his coat and all that, he said, “All right, put it down." Sitting there, ready *[UNCLEAR]*.

Though he's a realised Soul, no doubt. I put My hand on the thing and I caressed it and it came to life and it started, all right, he was very happy. He said, “You are a Devī, you are a Goddess, I can tell you.

But one bad thing you have done." I said, “What?" “You are married." I said, “But Devīs must marry, also." He said, “No, but supposing you have married a miserly man, then what will happen to you?" I said, “I will see to it that I don't marry a miserly man." That would be the greatest curse. He said, “I had the same type of a wife who was miserly and I'm fed up with her, for her miserliness." So that is what it is, miserliness should be hated, absolutely to be hated, absolutely to be, the worst of all it's like leprosy for Sahaj Yogis. Miserliness. It's saving, saving pounds, you know. That must go away from your mind. Miserliness to yourself is good, miserliness to others is bad.

Gregoire told Me shocking thing. He said, “This is our culture." I said, “Your culture? What is it?" You see, he said that if we go in a hotel and if somebody is paying, we start looking this side that side. I said, “Really?" He said, “That is very common." I just can't believe it, if this is culture? It is the opposite of culture. Whatever you may call it, it's not culture at all! Culture would be to

come forward, “All right I'll pay." But Americans are even worse, they'll say, “I paid for you yesterday, you pay today for me." I think absolutely disgraceful miserliness.

But this is gracious, you see when somebody's paying, you look on the other side. It may be gracious, I don't know, whatever it is, it is just the same, it's filth! I tell you.

So compassion, compassion at any cost. You may have to work till two o'clock, you may have to work at four o'clock, doesn't matter. You have to work, you have to work, you have to work, because compassion itself is joy giving. Because your Spirit is the Ocean of Compassion. There's no other way, there's no other way to enjoy your Spirit, but to give to give to give. Doesn't matter if you have not eaten your food, doesn't matter. Nothing matters. Many a times a you know that I don't have food for twenty-four hours sometimes, still I am busy. It's not necessary for this body. The food of this body is compassion. That nourishes.

So you have to be miserly towards yourself, but you must have compassion.

Heart, open your heart. Open your heart first to God for thankfulness. This is the other quality one should have. Is a higher quality I should say, of Thankfulness to God. He has given you realisation. He has given you this body. Do you realise that this body, human body, He's given you. He has given you everything. Count your blessings. Even to have the morning, to enjoy it as a human being, you are not in any bandhan, you are not in any pash, you are not pashus, you are not animals. Animals are pashus.

You are free people, God has given you freedom. And he has given you His realisation.

Sense of thankfulness. But our language is such, “Thank you, thank you, thank you” finished. It is only in the lips, it finishes, lip service. From your heart thank Him, from your heart. Not outside just go to church, “Thank you God very much” all right done. It's to thank Him from your heart, write praises.

Praises. Sing praises, “Glory to God" to the Great who has created us. Your disciples are sitting and every moment when you are talking you think say about Mother or about God. You'll be amazed! It's only possible if you have sensitivity, if you have memory. The greatest miracle of this world is that everybody has to die and nobody remembers it. But another one, is that everybody is blessed by God but nobody knows it. But you are so specially blessed.

So what you should do? Be in joy, be grateful, so that bliss comes to you. Without thankfulness nothing is going to work out. Thankful heart. You need a heart that is thankful to God so that He gives you. But when you give others He will definitely give you. But don't think it is your own! You are giving what God has given you.

So today I have told you eight-fold movement.

So you have become half-moon, only in mind. And the other half, keep it for the next `Guru Pūrnimā'. All right? May God bless you.

What do you want Me to do? Is to eat these ladoos. That's your job.

[Short exchange in Hindi. Shri Mataji laughs.] I told you, now let Me see what he has brought. What is it? Should we have our food first? Let's have our food, I don't want you to starve also... [Laughter.] [Shri Mataji comments on the beautiful day, moon and mentions that that those not going on India tour should be given responsibilities to coordinate and run programs in other cities around, UK. They must “chalk out a proper plan."]

Contents: 1982-11-14 **Diwali Pūjā (Diwali Day), Wealth and Generosity, Nightingale Lane, London, UK**

Here we are here, all of us, to celebrate a four-day festival called as Diwali. Diwali comes from the word dipali, dipali in Sanskrit, the word dīpa means `the light' and ali means the `line', the `rows'. Now, there are many things that have happened during these four days and that's how it is celebrated with such a great enthusiasm. The first thing is the day of the Lakṣhmī's birth, that is the thirteenth day of the moon: teras they call it. Is the real day when Lakṣhmī was born out of the sea; that's why She is called as Miriam or Mariam. Word `Marie' or `Marine' also comes from the word `sea'.

So, She's born out of the sea, is created out of the sea. And the wealth of the sea, so far, thank God, human beings have not yet exploited, but they may one day start doing that also.

And lot of wealth is still there, so when people start getting worried about exhausting the Mother Earth, we must know that sea is much more than the earth is.

So nothing is exhausted, still there is such a lot reserve for you and one should not worry as to the supply of wealth that can come from the sea.

Now, this Lakṣhmī is the Goddess, who stands on the lotus. She represents all the well-being, the wealth, the glory of wealth, the decoration of wealth; whichever is auspicious.

Whatever is not auspicious is not wealth. According to Sahaja Yoga, or according to any scripture, it is not wealth at all.

So She's a lady who stands on a lotus, showing that a person, who has got wealth, has to be a person who doesn't assert his pressures on people, who doesn't push people around, who doesn't pressurize. And then, She's a lady, She's a mother.

So wealth, is the first opening to our seeking. But when you start seeking the wealth, you realise that the superficial wealth that you are seeking is not sufficient, is not going to give you complete joy.

So you start seeking the deeper wealth.

As I said that: “On the Mother Earth you've exploited all that is possible” still there, deep down in the sea, lot of wealth is still there.

So then the seeking moves towards the deeper seeking.

So the same Lakṣhmī becomes Mahālakṣhmī.

When you start expanding yourself to higher and deeper valuables then this Lakṣhmī doesn't lure you much; She's just there for your glory, but not for your satisfaction. The wealth is there for distribution.

You enjoy the, there's no word for dhan, I think?

Sahaja Yogi: Generosity.

Shri Mataji: Oh, `generosity', but `generosity' is different. But what I'm saying: “Generous, generous fondness." It's a fondness, you see, that you should be generous. It is, sometimes is a very great happiness and joy that you feel. That is the greatest, when you are generous, when you give away. That's a fondness, that's a kind of a human expression of one's own being, that you want to be generous.

And this generosity only can come when Mahālakṣhmī principle is born in you. But at Lakṣhmī principle also She stands like this; Her hand is like this, one *[UNCLEAR]* and the another is like this.

So miserliness is not a sign of wealth.

I mean, if you are miserly that means you are not wealthy. If you are really wealthy why will you be miserly? It's simple equation is there: that means if you are really wealthy, you will just give away. If you cannot give away, then you are poor, you are a beggar. You are still hankering after that, that means you are still a beggar, you are hankering for it.

So this left hand, She is giving all the time and with the right hand, She protects people. She gives protection to people; the wealth must give protection to people, in the way it must look after the well being of others, not your own self-indulgence; like having all the best things to yourself while others are starving.

That's not a sign of a wealthy man; a wealthy man is a person who knows that unless and until, he shares his things with others, he is not going to be happy, ultimately. For the time being he may be, people live

with imbalances. They live with wrong ideas, but ultimately they have to correct it. If they do not correct this, there are problems. Then there's upheaval, lots of changes come in, people start seeing that, “Oh, this doesn't work out, that doesn't work out." The children run away from the houses, the family goes into problems. All sorts of things happen and then they realise, “This is the reason: I've been very miserly. I've not been generous. I've not been using money for the sake of others." Now, after coming to Sahaja Yoga, you become a Divine person. Definitely you become Divine, you are now a Divine personality, you are not a human personality.

So you have to give up, all that is human within you, then only you will be fully Divine.

But it's very difficult, that's the problem is, that it is very difficult to really accept that you are Divine and that you have to take Divine policies and Divine attitudes and Divine temperament. Now, the Divine temperament is generous, it is not bothered, as to what happens next. It's not bothered, because it is connected with the Source. If you give one you'll get hundred; it is sure about it. And to a Divine person, worldly things have no meaning, if they cannot give pleasures to others.

A person who is very self-indulgent, always bothered about himself, is not a Divine person at all. In no way he's Divine. It's very common, it's human; everybody does that, everybody is self-preserving.

But after Sahaja Yoga, you do not start all this nonsense again; you give it up.

And who looks after you? Who looks after your self-preservation? Is God almighty. You are now completely

dedicated to Him and He looks after you. You don't have to worry as to how to look after yourself: how to do this, how to do that. It is His work. The more you go on worrying about yourself, the worse it will be.

The moment you give it up, it is looked after. Many Sahaja Yogis must have experienced [this] in their lifetime that when they try to give it up, they get all the help from God. But whenever they try to assert and worry about their well-being and things like that, then there is a problem.

You don't know from where the help comes.

Now, we have had so many, so many examples, so many so-called miracles, where people wanted to do something and suddenly they got the money from somewhere they least expected.

So for a Divine person, the attitude should be of giving and of protection, protect.

Now, we are very good at protecting our bhoots and protecting others who are bhoots.

You see, the sympathies always go to bhoots, because they have a way of creating a sympathetic attitude in your heart.

So you start looking after that person because that person looks so much miserable, you see. You have to protect the saints. You have to protect the principle of God, the Divinity in others and not the bhoots. You are not here to care for all the bhoots of the world.

So the idea of Lakṣhmī must be understood in a proper way.

In Sahaja Yoga it's a very different thing from all other people know about; like charity. Like, people say now, “We must be charitable, start a charitable organization; in that, you look after this kind of people, that kind of people." We are not bothered. You are not, that's not you are given Realisation for, to look after every sort of a person. You are here to look after all the saints and all born-realised children. And you are not to bother about people who do not matter to God and Divine.

When they came to Realisation, if they get Realisation, if they become saints, all right. But you don't worry about every Dick, Tom and Harry, on the street: `Oh Mother, he's so miserable and this and that.' So the charity must be understood in a Divine light. And the Divine light will give you discretion, to understand whom to be charitable. You have to be charitable to your brothers and sisters. You have to be kind to them. Now you will say: “What about worrying about, Mother, people who are starving, who are this." That's not your headache. Why should you do their jobs? We are all good at doing others' jobs.

For example, you are driving in the car: “Oh, look at this; there should have been this properly done, that they should have done properly." But that's not your job. Why should you waste your energy, in finding out what the others should have done it? You should do what you have to do. And don't waste your energy in these things.

See, all these charitable institutions, I've seen, those people who work there are very difficult for Realisation. You see, this is the proof of the pudding. Because to

whom to do the charity? If there is no other person, you do not do charity to anyone.

I mean, sitting down here, I can do charities to people, so-called, which are not charities, they are part and parcel of My being.

I just do it, because they are part and parcel of My being. I don't have to go all out to sacrifice something to do charity, because that's nothing but ego pampering and ego-oriented: “Oh, I have helped this man and how dare he say such a thing?" So this is one quality of the Divine, one should know that It is generous, it is generous to a fault, to a fault. It is generous because It is generous. It is not bothered; It doesn't reason out Itself: `Why should I be generous?' It is generous because It is, because it's the whim, is a fondness.

The fondness of generosity is such as you have fondness, say, people have fondness to drink, for example let's say, that's not fondness, that's a habit, I think. But you can say some fondness people have.

What kind of a fondness you have, without forming a habit I don't know. Because you always have a habit and then you form fondness. But supposing you just have a fondness. For example, you are fond of, say, good food, let us take it. Now, if you have fondness of good food, then you will just do it because you're fond of it. Now someone will say: “Why are you fond of good food?" “I'm just fond, finished.

Who are you to ask me such a question?" If somebody is fond of generosity, he will be generous whether you like it or not. And it is sometimes, to a reasonable man, may look to be a bit too much.

The greatest generosity a human being can do is to forgive. I mean, it's not generosity to others but to yourself.

If you forgive others you are generous to yourself. First of all be generous to yourself, that is you forgive everybody else. If you forgive everybody else, then you are not tortured by that, you spare yourself from their tortures. This is a generosity towards yourself. Towards yourself the greatest generosity is that you do not bear any malice or bitterness about anyone. But clear-cut ideas that: “He's like this and he's like this.' Just a clear-cut idea, but no reaction out of it.

Somebody is a man, say, he's bhootish, all right he's a bhootish fellow, we know he's a bhootish, keep yourself in bandhan, but don't have a reaction out of it, then you have really forgiven everyone. Forgiveness gives you a big kavacha; is a big bandhan, is a big protection, we can say a `shield', from all kinds of evil that other's can put on you.

Just forgive them and then you see what happens to them. You just try this trick: just forgive and see what happens to others who try to torture you. Of course, Divine never wants to torture anyone, that is definite. It never wants to torture; It is extremely generous, It likes to forgive. It enjoys Its forgiveness, It really enjoys. Generosity is to be enjoyed in the same way forgiveness is to be enjoyed; it's very enjoyable.

When you forgive others it's the most enjoyable thing is that you see the play; you become the witness.

So the Mahālakṣhmī Tattwa, when it develops into you, first of all you have to forgive if somebody has borrowed money from you, has not returned it, doesn't matter.

It's very difficult for people to forgive people who borrow money and don't give.

And beyond that there is another problem I've seen [laughs] that if you lend some money to somebody, then run away from that person.

Because even to give is easier, but take is even worse. A person who takes money from you, will never forgive you all your life. Because you have lent money to him.

So one has to understand that, when you become Divine, you just give. We just give. This is Mahālakṣhmī Tattwa, Mahālakṣhmī Tattwa is that you give. Don't worry about what is the result, how others react to it, what happens to it, what is the ultimate result and what you achieve out of it and how the person has taken. Just give; that is Mahālakṣhmī Tattwa.

But when I say `give', also you must use discretion; that is the part we always forget.

You see, Sahaja Yoga must teach you discretion, that is the Divine truth. Divine is the most discreet thing.

Now, when I say: `give' I know people will just start running on the street, finding out somebody where you can give something.

You don't have to run about to find out somebody that you should give something to someone, there's no need; it's just flowing, it's just flowing. Wherever the chance is, just try to give material things, something kind words, sweetness, comfort. But never give one thing which I

sometimes do by mistake: never give advice; that's a very dangerous thing.

You can give bandhan; you can beat the person at his back with shoes, but never give an advice in words.

That is one of the principles of Sahaja Yoga, for the time being. Because giving advice, you know what it means, you may have a boxed nose or something. It's a very dangerous thing.

So best is on that part, I would say, as far as advice is concerned, you have so many ways and methods of handling a situation.

So better not speak about it; just handle it in complete silence. Whatever you have to do about a person, just handle him without talking to that person. The more you try to convince the person, the worse he will get, because they are not Divine. They haven't reached that Divinity. Is a special, they are special type of people, you see, who cannot become Divine and you do not break your necks with them.

Also don't give advice to other Sahaja Yogis. Everybody at this stage thinks that they are all, they know all about Sahaja Yoga, it's all right; good idea, very good idea. But never try to tell them what they should do, what is good for them, unless and until they come and ask you.

Now, this Mahālakṣhmī Tattwa, when it goes into collectivity, what happens: that you learn that you have to just give and you don't worry about the receiving.

As Kṛiṣhṇa has said: “Karmanye vadhikaraste phaleshou Ma kada chana." Our job is to do the Karmas and we are not to worry about the *[UNCLEAR* products/results]. Just try

to give whatever is possible to everyone: vibrations, Realisation. I know it is wasted so many times; you give Realisation it is wasted.

It's like, you see, the seeds that are thrown on the rocks. Yes, I know, it is, so many times; I have wasted thousands of them, but doesn't matter, you give them. It is not your giving them for their sake, but for your sake. It is for your satisfaction you are doing it, for your fondness you are doing it; so just try to give Realisation to everyone, anyone who asks for it. But, as Christ has rightly said that: “Don't throw pearls before the swines." I mean, I shouldn't use these words today, on such an auspicious day, but doesn't matter.

So, this He has said it.

Now, this kind of people, who are they? They are the people who don't deserve it.

So there is no need to give Realisation to every person you come across, talk to everyone.

Gradually you will meet such people who will ask for Sahaja Yoga for Realisation; you'll give it to them.

Gradually those pigs, or what you call them, whatever Christ has called them, they will evolve, I'm sure, one day and they'll come to you.

So, let us try on the first level, where there are genuine seekers of a high level and you'll be amazed how they are sorted out.

You see, there isn't much space in the Kingdom of God, to be very frank. And we should not worry if we don't have many people over there. F or us, it is a

responsibility we must have all the population of this world going up there, is wrong idea.

That's not needed at all, you see; we should not crowd them there.

Here only, we can't sit all of us you see, we'll have to have a bigger place.

So we should not bother so much as to the, so much as to the quantity, that the quantity is not much.

Of course we should try our level best to pass the message; Because they should not say that `We didn't get the message.' Pass the message is all right, but we need not in any way force people or ask them to come to Sahaja Yoga or make them Sahaja Yogis; it's a difficult thing.

The more you will try, the worse they will be; they will be so troublesome that it's going to be an impossible task.

So in your generosity you must have discretion: how far to go with people, how far to work it out. This is the Mahālakṣhmī Tattwa which comes to you as a result of Śhrī Gaṇeśha, who blesses you with wisdom as to how to be generous: where to give, what to give. The discretion starts working. You don't have to think about it, it just works out, it just works out.

Discretion in Sahaja Yoga doesn't mean, at all, thinking or rationally coming to a conclusion, but it means that it just works out that way, in the sense that you feel it in your vibratory awareness. Once such a discretion is developed, you'll be amazed that those who are not to enter into the Kingdom of God will just shun it, they will not come close to it.

And it's better for us; less headache, you see, because they think that we need them, while they don't know, they need Realisation, not we. We have got our Realisation.

So this is about generosity; today I wanted to tell you about being generous to Sahaja Yogis.

Now, I'm not going to tell you that you go on giving presents to Sahaja Yogis and all that, because, as you know that, these material things have no value except they have symbolic value. And symbolically if you work for them and if symbolically if you try to express yourself, it is going to work out much better than in material way: that it should be so expensive, it should be so much, that's not good. Symbolically you should work out material gifts and things among yourselves.

But the main thing one should understand: that collectivity will only grow when you do not, by any of your attitude or behaviour, suggest that others are lower than you or others are higher than you.

For example, you see something straight, you see quite far away; I see much more than what you can see; is a fact; you know that.

But I don't tell you; I just say: “I don't know. Maybe try this, try that." I keep quiet; I just try to play about. I say: “All right. Let's see." I'll consult you, I'll consult him, everybody I'll consult, you see: “All right, try this." And, or I'll do all these tricks, you see, because I don't want you to feel that: `Mother knows everything, so why should I know?' First of all you can say that. Or you may say that: `Mother knows so much and I know nothing. I can never reach Her.' So, what you have to do is to make

another person see as much as you see. How will you do that? By being with him all the time, by being in such a relationship that the other doesn't feel the oppression, oppression of that personality, as if that person: `Oh, he is so great, he is so great, he knows so many things and he's so evolved. What are we? We are nothing.' When, if you develop such an attitude towards a person, then the other person can also develop another attitude, just the other way round. That he'll oppose such a person, he'll stand out, he'll be angry all the time at the slightest pretext, he'll be off and he'll feel hurt and he'll be miserable.

All these things can come up.

So it is not going to help you, nor the other person.

But to tell another person, if you want to raise that person higher, the best thing is to make him your friend, your dearest person and let him see as much as you can see, together.

Then the vision is brought out. Is not that one person sees something more and others do not see and the other person, the person who can see, thinks no end of himself.

You should behave in such a manner as if you don't know anything; it's better. You should see Me, how I behave. I don't tell you anything, I just say: “All right, go ahead. Whatever you think proper, do it." Then you come round, you say: “Mother this has happened like this and You have told us this way." So I say: “I told you, all right; but I didn't say: `All right, this is going to happen', but it happens." So is better that you should also develop that kind of an attitude that, `All of us have to go together.'

There is nobody who can just pull out one self ahead. We all have to go together, even Me.

Even if I maybe anything, what does it matter? What does it matter if God is great? So what? He may be great in His own play. But what do we gain out of Him is the point, that His greatness should be seen through us.

If we cannot move up to that point, what's the use of His greatness. It's better that He's away, He's too great for us.

So He has to come down. He has to come down to this level to make everybody feel that they're part and parcel of His own ignorance.

He may be the most knowledgeable person, so what? You have to take the cover of the ignorance upon yourself and go on slowly exposing yourself.

In the same way, if you can do it with other Sahaja Yogis. Then only you could be good leaders and you have been really generous with a full discretion.

So today's day is, as I told you, the thirteenth day is the Goddess, Dhanteras it is called, as that is the day of the Gṛuhalakṣhmī; She came as Gṛuhalakṣhmī. In the household, the lady is the one who is the symbol of that Lakṣhmī, to begin with. Because she's the one who looks after your food, looks after your comfort, she protects you, she nourishes you, she gives you joy. And the women who cannot do that are not Gṛuhalakṣhmī's, they are not the... `housewife' is a very poor word for that. They are the Gṛuhalakṣhmīs; means they are the goddesses of the family.

So, the other day we were in America. I told the girls; I said: “Better let us wait and what we can do is... all right, I am the Mother; you can give Me food if you want.

I don't mind, give the boys first and then the girls should eat." And one of them got very angry with Me. She said: “Mother what is this? They are dominating us." As if somebody eats before or later, what is the domination? I mean, in any case you are going to eat before or after. I don't understand the portion of domination. But, see, you are privileged, you are privileged that you can look after so many people, you see. What is so wrong in it? You see the whole atmosphere is so funny that if the men eat first, then women should feel that we are put down.

It's absurd, because it's a privilege; you are like a Mother, you are the person who has to look after them and you have to feed them. It's a privilege that a Gṛuhalakṣhmī should do that, look after everybody, give them food to eat and treat them just like their proteges; you can say, something like that. It's such a privilege; it's a sign of complete maturity.

Even little, little girls, you have seen, if they are brought up properly, you see, otherwise they can be horrifying. But normally little girls are very generous, more generous than men are and they are very, you see, always try to make you very happy.

They have great sense, if somebody is sitting down they'll come and give you food and look after you and... I mean, I have seen My all three granddaughters, do that. You see, even once a washerwoman came in the house; they said: “You must sit on the sofa." She said: “But no, I can't. I can't sit on the sofa.' `No, you must sit on the

sofa” they said. They opened the fan for her and they brought all the things that were in the kitchen for her to eat, now and they brought some plate and this and that.

And the elder one, she told Me, I told her: “What do you want to be?" She said: “I can only be a nurse or a air hostess." “Why? Air hostess and nurse, why?" “Because this is the only, these are the only two professions where one can give, isn't it, food; otherwise there's... I mean it's a privilege. Other professions you can't do this great job, this noble job, you see, this of giving food.

So that's why I want to be either the nurse or the air hostess." And they play; I have seen these girls play: “Now I'm the air-hostess, now you must eat this." They bring food in small, little things, you see. They make their own things: “Now I'm the air-hostess” and they'll bring it.

Now, there may not be any food in it, see maybe some stones they have put, or whatever it is. “You must eat, you must look after yourself, you're thinning down, you better..." Like that, you see; so sweet.

And then they'll bring some pillows, “Now you must lie down." Like air-hostesses they are working, you see: “Ah, are you feeling cold? Would you like to have a blanket or something?" I said: “What game is this?" “We are air hostesses." It's such a privilege, an innocent privilege.

And that's what, if we develop, this nonsense of a right that `We are higher; they are lower.' all this nonsense will go away. Who is higher and lower? See, like some hair are here and some are here; are they higher or lower? You can't do without this or this. It is an absurd idea, that has come into our heads, that we are higher, lower.

So a Gṛuhalakṣhmī is the one who has to be a noble woman, has to be an example in the family. Like, a housewife herself is a drunkard, marries ten times. What will happen to her children? Just think of it! Such a woman, a woman who has no sense of chastity, no sense of auspiciousness, no sense of protection for them, how can she talk? Who is she? What does it matter? I mean what comfort can anybody give to a housewife? She is the one who is the source of comfort; what comfort can you give her? To her the greatest comfort is that you eat your food properly, you sleep well, you keep well; that is the greatest comfort.

So this is what one has to know that a Gṛuhalakṣhmī is the woman in the family, She is the Gṛuhalakṣhmī.

But the man should not be a wolf, also a Gṛuhalakṣhmī cannot marry a wolf, you must understand.

If the man is a wolf, then he doesn't deserve to have a Gṛuhalakṣhmī but he can have a she-wolf as his wife; that's a good idea. Then they can fight, quarrel, have all kinds of divorces, this thing. But it's the responsibility of the Gṛuhalakṣhmī, to begin with I must say.

To keep the balance it is her duty, it is not the duty of the other people in the family. It is she who keeps... she doesn't give up at any cost... of course, if he's a wolf all right, he can go to the forest. She's not bothered.

But the men must understand: the more you start respecting the housewife, the Gṛuhalakṣhmī, in the family, the more there is respect, the more there will be settling of these women in their proper places, becoming proud of their houses and families and their own set up

that they have put in, they'll feel they'll have a meaning and the whole society will change.

But if the men run after dirty women and cheap and street women, then the same housewives can take to that.

So that is very important, that they must be respected, because they are Gṛuhalakṣhmīs. That is one thing.

The second thing is, they are also Rājalakṣhmīs. Rājalakṣhmīs are the Goddesses who are looking after the country.

Like England has a Rājalakṣhmī, too. Now, we say, we can say, the princess now is a Rājalakṣhmī, she is a woman with dignity, she carries herself with that bashful sweetness and all that, she's a Rājalakṣhmī.

Our Queen is very good too. But, we can say, other people in the same family are funny.

They belong to Royal family; they haven't got that strength of character to belong to that.

They have all the privileges, but they think they have all the rights, but no duties and as that also the Rājalakṣhmī can be very funny.

Like in this country there has been curses and curses because of seven queens were murdered in this country, I mean, I can't think of any country where even one queen can be murdered by the king.

This country has a very funny curse of these seven women who were killed like this. I mean, what sort of women they must have been? What sort of queens they must have been? I mean, there's no, nothing of a Rājalakṣhmī.

A Rājalakṣhmī is a dignified woman. She is the one who is the glory of the country, she has to be a glorious woman. She has to be a woman with all the attributes of a queen. And that is the Rājalakṣhmī: is the, is the queen, or the Goddess, that is the queen; and She resides in every country; every country has a Gṛuhalakṣhmī. And if that is insulted, then the people suffer. They will suffer in so many ways, like they will have money problems, they'll have financial problems, he'll have... also have problems of society, all kinds of things. Because whatever the queen does, whatever the king does, it is done by others. But especially the queen. Most of the fashions, say, in England, have come because the queen started it.

So whatever she does, she is so important and she has to have that idea in her that she's the Goddess.

She has to represent that Goddess which resides in every country.

So that is the Rājalakṣhmī.

Now, in countries where there is no, say, in democratic countries, then all right, then the head of the... the first lady of the country should behave not like American lady who married a tycoon somewhere, an old man and is now a photographer: What is this? So cheap, it is so cheap, she doesn't deserve to be there.

There's no dignity about her, she's competing herself with cheap street women. She should know that she is the first lady.

In the countries where there is even, say, not democracy and other sorts of governments are there, there is also a first lady. And why now these first ladies also have become competitors and they compete there with their

husbands and try... Wherever they have tried such a trick, you see, even *[UNCLEAR* `Bandha Naiki'] tried these things; she failed... Anywhere they tried like to outwit their husbands by this, then they failed, because God is not with them.

They are there because they are first ladies and they should take all pride within themselves. Even if they feel they are a little bit let down by people, not respected. But if she respects herself, nobody can be disrespectful to her. She should keep her respect and everybody will respect her. But just to punish people, if she has to behave like this, that means she has no value of her own.

So the first thing that one Lakṣhmī gives you: the value system. Your value system is corrected. You evaluate yourself properly; like, you know the value of this and value of that and value of this. But the value system for a Divine person is not based on the amount of money or amount of matter it has, but it depends on what vibrations.

So the whole evaluation system changes when you get into Divine temperament, that you start seeing things: what is precious is what has the maximum vibrations.

Whatever has vibrations is the precious thing for a realised Soul. And not what is not Divine. What is not Divine, we have nothing to do.

But you'll be amazed, whatever is Divine is all very precious, also otherwise. Like the paintings, which are done with divinity, means the realised Souls have done, are today very expensive; may not be in those days, but now today.

Actually all the truth comes up gradually and people can see that clearly, that there is something special about these things.

So your value system changes as your Mahālakṣhmī essence starts growing and manifesting. You stand absolutely open and you find new things, new ideas, a new evaluation of everything starts up.

Once this happens to you, know that you are growing. You must know how to judge whether you are growing or not and that is how you will know that you are growing in the right direction, if your value system is in place.

Today's day is the Lakṣhmī's day; I bless you with all the Lakṣhmī's powers and specially the discretion.

To improve your value system; whatever more valuable is to you, what is the most valuable thing to you; you must try to devise that.

Then there is, after this day when they worship the first day is, they say that, that is the day when Diwali was celebrated, when Rāma was made the king. He killed Rāvaṇa on Dussehra and on this day that Rāma was crowned and that's why they celebrated.

Now, Rāma is the person, at that time when He's crowned, He represents the benevolent King; and the benevolence of a king is being crowned, so that's why they celebrate Diwali.

But we have a special significance of Diwali, it's a very special significance, I think, that the light that we see here, you will see, always goes upward.

Fire is the element that always goes upward, it's always against the gravity and it is against all that pulls you down.

And the light of the Spirit is also like that, it always takes you upward. And the person who is a realised Soul is called as an enlightened person, because he has the light. And the light has a capacity to give you a full idea, to see what is what, to relate to each other, to find out the distances and the differences and to discriminate.

So the light represents discrimination. And when you are enlightened, the Spirit is enlightened, in the sense, Spirit is the light, but which starts expressing itself in the atmosphere, manifesting in the attention of yours. Now, what we have done in Sahaja Yoga is nothing but is Diwali.

First one light was enlightened, then that light enlightened another light and now we have so many lights. This is the Diwali that I have, I enjoy this Diwali than anything else.

Now some lights are really sometimes flickering, I know that, doesn't matter.

Some lights are afraid of the wind that might affect it, so I have to look after them. In India you see this part is called as achala of the Mother", it is where she keeps her child hidden and this is where she looks after the candle also, the light is that she has kindled. And very carefully she looks after it and tries to see again and again if it is burning or not and then she is sure that it is burning nicely, then she puts it on a higher place where it burns, not for itself but for others. It enlightens others and

enlightens the path of the people who are going in the darkness.

So, for us, Sahaja Yoga today is a Mahā Yoga, because it's a dīpavali. It's not only one dīpa of your Mother burning, but it's so many lights all over the world, you know they have taken their light and they are burning.

Even small children are giving Realisation.

It has spread to the villages now and is spreading slowly as the Diwali; and every day we celebrate Diwali we have more and more lights and I'm sure these lights are going to grow *[UNCLEAR]*. Those people, who still have flickering lights have problems, you see, they always have problems and they must know that their light is to be brought in properly into proper shape.

They must put all attention to put their light in order. If your lights are ordered there cannot be a problem, there cannot be a problem.

So the correction is also a Divine quality in you, which should work inward, by which you correct yourself.

The other day I was explaining how you don't have to think. Is very simple, it's a machinery, it's a Divine machinery which you have found out now within yourself.

Now at this time when you have got a machinery, you don't have to think about it. Because the machinery that is Divine, is just like any other machinery. For example, you know the machinery of the car, you don't have to think. You don't think: `I have to put a brake,' you just put it. When you are a master driver, you just do it; you don't think. Do you think? If you start thinking, you'll kill so many people by that thinking.

So in the same way, if you have mastered this machinery; if you know which one to move, how to move, how to work it out, if you have mastered it you don't think about it, we just work it.

And that is what it is we have to understand that, after developing Mahālakṣhmī Tattwa, which is the main Tattwa, which is the evolutionary principle by which you have evolved; is the ultimate, the Suṣhumnā, the central path, which is the most important.

If the Suṣhumnā is not all right, then you cannot do anything, because there is the flow, there is the opening, which is important, which makes you wider, which makes you deeper, which makes you greater.

If that is the path of Suṣhumnā which must be always kept open, must try to keep it open by balancing yourself, by this generous attitude and by seeing everything in your, through your discretion. Keep it open. Keep your Suṣhumnā open; and that is the path of Mahālakṣhmī. If you keep your Suṣhumnā open, there will be no physical problems, no emotional problems and of course no spiritual problems. That is how one has to understand today's Mahālakṣhmī Tattwa.

Now at this position when you reach, you see, this position is very important at Mahālakṣhmī's principle, is that it gives you the witness state, no doubt.

But as I've told you before, just after this first day's Pūjā of the Lakṣhmī, when Rāma was crowned next day they have the second day. And on this second day...

This is the... thirteenth day, as I told you, is the day when the Lakṣhmī was born.

Fourteenth day is a horrible thing, which I do not want to tell you much about, because that is the day the Goddess had to fight all the horrible Rākshasas.

So I don't want to talk about it much because you know all that; that is the fourteenth day.

Then the fifteenth day is the day when the moon is absolutely missing from the thing; it's absolute darkness, where you put these lights to suggest that: `There are lights; now let Lakṣhmī come within us.' So there is no spot that should be left which is dark.

So everywhere the Lakṣhmī resides and give us the glory of Her blessings.' Then it is the night when you have the dark night, as you call it, Amāvāsyā. Then the first night after that is the first moon that the, you say the, What? The waning moon?

Sahaja Yogi: New moon.

Shri Mataji: New moon. The new moon comes up; the first day, is the day when the New Year starts for Shālivāhana. As you know, Shālivāhanas are My ancestors, or whatever you call it; think Dynasty; that is the day.

That day, they take a shawl, shawl of the Mother, like this and put this water carrier on top, to suggest the Aquarius time. You see, the Aquarius time has started according to them; they put that on top of that and put it, like a ag, on top of their houses to suggest now the Aquarius time is there.

With the Mother's shawl they make the flag and on top of the flag is the water carrier, is put upside down to suggest that the Aquarius time has started, that the time

of Kuṇḍalinī has started and that this awakening has to take place.

That's the first day of the year they start. Then after that, the second day is, so it is five days actually; but why I said four-day celebration, because one day is a horrid day in between.

But also there's a celebration because, after killing all these Rākshasas, there were Diwali.

Many a times you see these things happen and every time She killed all these Rākshasas they celebrated it by putting lights all around.

So after that is the second day, is very important, which is here, is the brother and sister special day, where the sister invites the brother to her house for food. And if he is a small boy she will give him a bath; even if he is a big boy he sits with all his clothes on and she will throw water on him and puts something very fragrant things on his body and gives him a bath nicely and gives him a protection. It's a purity of relationship between a sister and a brother.

And then the brother gives her something as a present at that time. He may give anything, it's just symbolic. Is the love and affection of a brother and sister is expressed at that time, is very important.

And then the sister, you see, actually gives him a bandhan, with actual light, which we call as the Ār.ti they do for the brother. And that's how they try to give a big protection to their brother.

So this is the day of the, they call it in Marathi Bhau beej or Bhaiya dooj; or that is the Dwitya, the second day of the moon. *[UNCLEAR]*.

Now it has significance because it is very important that our relationship as a brother and a sister must be strengthened, must be purified, must be looked after.

In India, even if somebody calls you a sister or a brother, then he is a sister or a brother; it is a very difficult situation. If somebody calls you a sister, then you have to accept that situation. And if you accept that situation, all your life you have to carry on that relationship of that nobility, whether he may be your brother or not, doesn't matter; she may your sister or not, does not matter. But once you've said she's your sister, then all that purity is there, all her chastity is to be protected and she is to be looked after.

But this is how it is; these are the five days they are celebrating; short I've told you, how we Sahaja Yogis should understand, these five days are days of real festival for us because we have overcome death now, we have overcome that degradation that would have followed after it.

Now we are people who are victorious; so this is to celebrate our victory over evil, our victory over our weaknesses and our victory towards the goal of our achievements: that is full Self-realisation.

And that's how it's a great day of celebration and may God bless you all.

And in this jubilation I join you all and I'm very happy that we are so many today in this country and a day will come when we, our righteousness and our greatness will

definitely enhance the path of darkness with this light and improve the conditions, to such an extent that people won't believe that they were living in this wretched world and today they are in such a beautiful world, they won't believe.

It will happen; as it has happened within yourself it will happen without. And that's what is the day I am waiting for, when such things will happen. And all these things we are doing here, living a righteous and good life now, with forgiveness for others and with all the generosity it will became a universal thing for people and when this will become a universal happening and when people will universally accept Sahaja Yoga, then will be the real days of Diwali celebration.

May God bless you.

[Shri Mataji discusses with Sahaja Yogis.] So I must say, for Christmas I won't be here, I'll be in India. It's nice way because I'll escape all your presents. You gave Me so many presents last time that it was too much for Me.

Of course if you say that I gave you because that's of course is nothing great because, you see, if you give to one person. It is too much to carry, they say you have to have a shipload.

And if one person gives to so many, it's not such a difficult thing, isn't it. But if everybody gives to one person it is too much. If one person gives to many it's very good because the load is lessened on everyone and also shared you see of that one person.

So My giving was a better thing than your giving to Me, because I was really thinking of taking a ship, see, to put all the nice presents you gave Me.

So, do you have any questions? [Long pause.] [Aside to some Sahaja Yogis:] So, now, just... this is your ring, maybe is this one is. Kay? Here is the ring. Where is the... Simon, come along? So, you see, today's Pūjā is more sort of asking for the expansion, expansion of your Suṣhumnā; more that.

So as it is, when we are doing this Pūjā, first of all you must develop a mood of forgiving others and forgiving yourself also; just that mood, first of all, to improve your Suṣhumnā further to grow, first of all.

So there's a mantra for that: `Ya Devī sarva bhooteshu kshama rupena samsthitah', all right? And, `shanti rupena'.

All these mantras, if you say, all of you, if you say these mantras, one you can say and they can repeat you and then that will definitely improve. These are all mantras for the Suṣhumnā.

[Shri Mataji talks aside, they laugh, then Shri Mataji says:] The Indians are that way very funny.

I think you people don't have any machine, a grinding machine in the thing.

So I had better pay for that machine. Because I would like to give some present to the ashram.

And what do you call that machine, grinding...?

Sahaja Yogi: Grinder, Shri Mataji.

Shri Mataji: Get something greater and higher. That's the point is.

Contents: 1982-11-26 **Talk to Sahaja Yogis, What You Can Do (Feel the Beauty of Thankfulness), Caxton Hall, London, UK**

Let's start! Today is a day of departure for Me, for India, and, I am very sad that I have to leave My children here. It's a sad day, no doubt. But I have to go as you know and you all are going to join Me, quite a lot of you.

But those who are going to stay here have to understand that they are here with a purpose, not without a purpose and during My absence one should not waste that time. On the contrary, you must put your mind to find out what you can do to improve the conditions of other Sahaja Yogis.

Many of you are Sahaja Yogis and you have felt Cool Breeze from the very first day and have been feeling it also. But there are so many, still, who don't even feel the Cool Breeze and they feel very funny about it and feel sort of guilty.

Sometimes they feel that they are something of a lower type, or something wrong with them: that they don't feel the Cool Breeze.

So, one of the greatest worry, for all of you, should be that there are some people who are not feeling anything in their hands. They have been coming to Sahaja Yoga, have been religiously working it out, but they haven't been able to achieve the first experience of Cool Breeze. For this there can be many, many reasons, not one, but there can be many reasons. And without getting involved into these reasons, if you try to see within yourself, and, if others who have felt it are compassionate and kind, they can definitely help others.

But the worst thing that we human beings suffer from is ego. And this ego makes us feel small, at the slightest thing anybody tries to help you.

Some people might have a hurt ego, might have a bloated ego, might have a state of mind, which does not even see the ego. And that is why it is difficult to talk to anyone [about] what is to be done to improve? So those who are better off, suffer from a dilemma: they don't want to hurt another person and another fear they have [is] that, if they try to help others their ego might go up! [Laughing.] Because they are afraid of their own ego.

But we must understand that, once we have come to Sahaja Yoga, once our Kuṇḍalinī has been awakened, then, all of us have now become part and parcel of one body, of one body of the great Primordial Being. In a body, as human bodies are, supposing a finger is numb, then all the body's attention is on that finger to cure it and all the other fingers and the whole body, the brain, the mind you can call it, everything is worried about that finger [and] how to make it alright. Naturally there is no ego for these fingers, so nobody feels hurt or bad. And the fingers are also anxious to do it, because they can feel the problem of the finger which is numb.

If there is some problem, say, internally within your body, all the cells which are needed to correct that problem will rush. The blood will rush. The heart will pump. Everything will work out in a very co-coordinated way, but nobody sees that but that, “Why should I take help from anyone?" Neither the one who helps is frightened or afraid or also feels the ego. The reason is, the cells of the

body are under the complete control of one brain, of one personality, of one cell.

But in Sahaja Yoga, this collectivity is not yet established. That's why people feel hurt, people hurt each other. They have fear of another `cell', which is the brother `cell', it is the partner `cell'. Which is the part and parcel of your own being. Are we afraid of our eyes? Or afraid of our nose? Are we afraid of our hands, or of our feet? And this collectivity is such a vicious circle that unless and until you become really collective, you cannot feel another person. And unless and until you have that sense of responsibility of collectivity built in yourself, you cannot help another person.

So certain amount of growth is needed in the whole body to be sensitive enough to help each other, to be wise enough to help each other, to be resourceful enough in us to really nourish really nourish another one. And that development has to come again through collectivity; is most surprising it is.

I know sometimes people feel that there are Sahaja Yogis who are not even of one mind. I agree. That somebody will say, “Your Viśhuddhi is catching” another will say, “Your heart is catching." Another will say, “Your void is catching." They don't say that, all of them will say the same thing. One will say this, one will say that, one will say that. The reason is, some of them have developed certain sensitivity to a certain center, but not to all the centers. And that's how there can be a difference of opinion as there should not be at all.

So firstly we must all know that we are still growing. We have to still grow. In Sahaja Yoga even if you get your

realisation, that doesn't mean you suddenly become John the Baptist! We all have to grow.

And for growing and growth we have to discard something and we have to accept something. And the best thing that should be discarded is your ego and it comes in so many ways that it creates a barrier between you and your Creator.

Sometimes this ego can take you to anti-God activities and you will not know that it is your ego is taking down there, because the identification with ego has been, not [only] in this life, but in many lives before also.

So to get this identified, or we can say, to get dissolved this ego, or to get away from this ego is a difficult. But as you grow out of the mud of this ego, the lotus starts becoming fragrant and everybody can see that fragrance.

It is more difficult in the Western countries, than in the Eastern, because the whole basis of the growth in the West has been so far based on ego and competition. There is no competition in Sahaja Yoga.

You just think if one finger starts competing with another finger, what will happen? It is as absurd as that! Now we are talking of roots, you are not talking of the shoot, what people have achieved through Western style of thinking. Now we have to go deep down into the roots, so we must change our methods.

There is no competition at all among roots, they help each other: if one fails, another goes and helps him.

That is how this living process can work out.

We have to change our ways of tackling ourselves and others, and, you have to realise, that God's Power of Love is the highest, deepest and the mightiest. And this is the power of love that we have to assert. But love just does not mean that you spoil someone or tell lies just to please someone. It may not be pleasing, in the beginning maybe, but ultimately it will be.

So when you have to talk to someone, of course you need not be arrogant or rude at all, should be sweet, you should be kind, compassionate, but it's not diplomacy going on there. It's not any that you are trying to get out some votes from that person. It's a guideline you are giving to the person. And the guideline can be even silent. The greatest guideline for anyone is the precepts that you follow, the ideals you have, the way you behave.

You know in India one person gave realisation to 10,000 people. And how he did it, how he impressed others. He impressed others because he went to a office, the commissioners office, for some [of] his personal work and then he started talking in such a manner that they couldn't understand that, this man has come for some practical, every day-to-day stuff and the way he's talking, the way he's behaving, the way he's dignified and so firm. How is he managing that? So they said, “Who is your Guru?" Immediately it came into their head [that] “Must be some good Gurus they have." He said, “I have no Guru, I've only a Mother." He said, “We all have." That's how it started.

So one must know that, by your own behaviour you can talk to another person; and that behaviour should not be superficial, must be coming from the heart, the concern

within, the concern that this person should be alright. Genuine concern. And even a dog knows that, you don't have to tell anybody by taking some sort of a vow, but even a dog knows what is a genuine concern and what is not a genuine concern. With that concern you have to talk. And that is what we lack is the genuineness within ourselves, our heart if not open.

Open your hearts! Now you have entered into the Kingdom of God open your hearts! Just see yourself, why have you got fear? For what? Ultimately what is going to happen? We are all going to die, isn't it? So put that, fix that point! We are going to die. Whether a tiger eats us, or we jump from anywhere.

Something has to happen to us to die.

So why should there be any fear? Now if there could be a genuine fear [it] is this, that, you may not receive your realisation. Even this genuine fear has no meaning because this will also kill your chances of realisation. If you believe that God is great and that His compassion is great, really from your heart, you'll get your realisation no doubt. You all are there for that and the Divine Power itself is anxious to do it, extremely anxious. You can see, can you believe that there are so many people who are realised Souls today in this London? I came here about twenty years back, if somebody had told Me that there are going to be so many realised Souls here in this place, I would never have believed, because at that time I had met very few, in the whole world I would say.

So the things are happening, but be patient! And believe in the mercy of God, in the kindness of God, in His

compassion, in His anxiety to give you this gift of realisation.

And this is one of the greatest hindrances people have, when they do not feel their vibrations.

Today I received a letter from Gill [from Brighton] and she said she went with My photograph to be framed or something, in a shop. And the shopkeeper, that lady she looked at the photograph. She was little bit, I don't know, concerned and she said, “Who's photograph is this?" So Gill just said, “You put your hands towards it." “Oh God, what has happened? As if some door has opened." Just she puts hands there and she gets it. And Gill was amazed, because six months, she never felt anything! [Laughing.] She was breaking her head with it: “Mother, I never feel Cool Breeze, I never feel Cool Breeze." But she is a great seeker no doubt. And now, she says that her brother came in and he didn't feel the Cool Breeze.

So Gill said, “You have a bad liver” “Yes, yes, How do you know? I have.

I've got pain in the liver. I've had problems with the liver." So Gill said, “Put your hands towards the photograph and put your left hand on the liver." “Oh God, I am feeling this [the right middle finger] and I'm feeling the tingling" and this and that and he showed the finger for the liver. And she was amazed that this gentlemen just walks into the shop where are so many people are coming, going, no Caxton Hall, no peaceful atmosphere, no other Sahaja Yogis sitting there and suddenly you find [that] this gentleman feels the Cool Breeze. Not only that, but he can exactly say where he's catching. Nothing happened, no trembling in the hands, no shaking, no

burning. And he felt better on the liver! She couldn't understand what was the reason. The reason is very simple: when you come for a program there are many others who are already feeling vibrations and you don't feel it, it's like, you see, they have a property and you don't have sort of a thing.

So your mind, which has worked to competition, mind which has worked through realizing that, “Somebody has something I don't have” haves and have nots, you see, that mind starts putting fear into your head “Oh God, will you have it or not? Will I get it? And even if I get it will I lose it?" And that fear I see on the faces of many new people. Give up that fear! You are all going to get your realisation. Give up that fear! You have not entered into any competition here. Just to relax. Just relax now! Then the more you want to do about Sahaja Yoga, again you are tense. “I have to meditate early in the morning; I have to get up tomorrow early in the morning” you see, you go on pestering yourself.

Whole night you won't sleep and when you are meditating you are dosing. Relax! God is looking after you, believe Me! [Smiling] He is going to give you realisation and He is going to look after you and He's going to wake you up in the morning too, but relax! The first idea that “I can do it" is wrong. He has to do it. It's not working out because you think you can do it. If you can come to this conclusion that “I cannot do it, it is His mercy, His graciousness has to work out." But, after realisation, you have to do something, in the sense [that] you have to desire. But when I say you have to desire it, again you will say, “Alright. Now I'm going to sit down

here and nail myself to this place and I'm going to sit down and desire it!" This desire is a dead desire, you see, just pushed onto your head that, “Oh, I must desire! Mother has told I must desire." You have to be hungry. You don't say that “I have to desire that I have to be hungry” do you? The hunger is from within. Which is there, no doubt, but is clouded. The hunger is clouded because you have fear. If you put a goat before a tiger and give him to eat, he will reduce with that, eating, whatever it is, because it has that fear, that there is a tiger which is going to eat me.

So first kill all the imaginary tigers around you. Again we come back to the same, that, desire must come from within you. And it is there, but is clouded. Relax! It should not be that, “I'm very relaxed!" [making Her hands into clenched fists and smiling]. It's childlike. It's simple. A relaxed person is just like a child.

So not to get frantic. Try to relax. That's all. For everyone. But relaxation never means that you are inactive, on the contrary, the person who is relaxed is extremely active on the exterior, but inside he's absolutely silent, absolutely relaxed and at ease.

Outside you may feel.

As you know, now at this time tremendous vibrations are flowing. And I can see the flow tremendous.

And all the Chakras are within like this around Me [demonstrates shaking both hands and rotating them a bit] but I see them and their play. At the most I may stop talking, but it is flowing.

So whether it is for the seeking or for anything else in the world, the first thing is that you must take an attitude of

a relaxed witness. If you can do that, then those who are not feeling vibrations will definitely feel. I have see people on whom I've been working and it wouldn't work out. Of course they were not rude or in any way arrogant, but felt very sad that they couldn't get the vibrations, so I said, “Alright, today you go and enjoy the flowers in a garden. Enjoy the birds and talk to the sky and come back tomorrow", it works out.

Because you have been always like this. In Sahaja Yoga you don't have to achieve anything. You become.

First you become and then mentally you understand Sahaja Yoga. But those who try to understand Sahaja Yoga mentally first, are really in for trouble. Because when you read it, it sounds so great and you think, “Oh God, where am I?" So please, if you give realisation to someone, take it easy. It will grow. Don't give Advent to read, next moment. We do it! Why? We think we should impress the person that Sahaja Yoga is a great thing and the person must read Advent so he'll come to Sahaja Yoga and we'll establish this man because he will see and will be impressed.

If somebody is going to be impressed by these things, such a person is of no use for Sahaja Yoga, take it from Me. If they are going to be impressed by something exterior and superficial, how far will they go? They have to achieve it within themselves, their own Spirit. They have to be impressed by themselves, by their own achievements. If you understand this simple principle that, when we become the Spirit, we manifest a power which is just the opposite of any other so-called powers.

Like, [if] you take science, it will analyze. Sahaja Yoga will synthesize.

Take philosophy, so-called, it will try to find out the dogmas. Sahaja Yoga will neutralise all barriers of all religions.

Because all these forces are deadening, they deaden. The religion is deadened, God is deadened, everything is deadened by that. While Sahaja Yoga is a living force within you and that's how it neutralises all that is destructive all that is deadening. It's a living force of God, is a very powerful force, is very wise, it understands everything. We have heard about it, but we never believe there could be such a force. And the first time we feel that force, we don't want to believe it: “How can that be?" Because we still don't believe that we can be the source of that force, which is integrating, which is synthesizing completely, which nourishes, which helps you, to rise above falsehood to Reality.

It doesn't allow any falsehood to build in. While all other forces, whatever you try, political forces [are] based on falsehood, absolute falsehood. All politics is based on falsehood, we can see that. How can you explain the policies of these nations? You just don't understand. All falsehood your democracy is `demono-cracy', your communism, I don't know what sort of a thing it is! All absurd, perverted and false. But in Reality you are a communist, you are a democratic person. Everything within yourself is the Spirit.

But to become the Spirit, if you stand on falsehood and want to achieve it you cannot. Give up all that! Become

the Spirit. Then you start seeing [that], from the window, of the Spirit everything is different.

So the falsehood that we have accepted throughout stops your vibrations, all this is falsehood, believe Me.

The Truth is God's love. That's the only Truth there is. That's why they say that “God is love and He is Truth." The rest is all falsehood and if you believe in this principle to begin with, really from the heart, then this power starts flowing through you.

It's the most powerful thing, universal thing, which is doing thousands and thousands of things of making these beautiful flowers, fragrant flowers, our heart beating, creating human beings, animals, everything is done through this living power. And this living power just has to flow through you and believe Me that human beings are the only instruments of that power.

Some people think of compassion and think that they must help other people. That's falsehood! You can't help. You help on a superficial basis. The only help one can give to another is when you become part and parcel of that Great Being and realise that other `cells' are also there, who are awakened or may be awakened. That's the real help, that's the real compassion, that's real happening. Sahaja Yoga is definitely, is the deep understanding of this fact.

We indulge into activities which are superficial and could be anti-God, as I told you. But for Sahaja Yoga the activities are extremely simple even a finger movement like that, is sufficient to do tremendous things. There's no need to stand on your head for it. Awakening is your own, there's no problem on that. The problem is, to prepare

yourself for that awakening by not preparing yourself! Be unprepared! Be simple! Just be simple! Be childlike! Just that. Which is such a difficult thing, to be simple. No elaborations are needed, nothing is needed for that, no preparations as such, except, open your heart.

Now how will you open? Like that? [Moves Her hands from the chest outward as if opening a pair of doors in Her chest.] Pay attention to your heart, just pay attention to your heart. You'll be amazed, it will start melting. Just melt your heart. The thawing starts as soon as you pay attention to it. Tensions will drop out and you will feel Cool Breeze.

So those Sahaja Yogis who came to Sahaja Yoga and didn't feel vibrations, should know that the fear that they have... Everybody thinks there's a show on, like a dog show, like other shows you see. And they come with that idea. There's no show on. It's a thing that you have to achieve yourself, which you achieve, that state, automatically. Now this is about the Sahaja Yogis who feel that they do not feel any vibrations. Maybe sometimes it happens also in some places also, where the Viśhuddhi Chakra is very bad, you don't feel any Cool Breeze.

So doesn't matter! As long as you feel peaceful, enjoy them! Why worry about the vibrations? I don't understand. What is the need? If it is not there, well and good. As long as you feel the peace of your Spirit. You just put your hands to another person.

I remember one gentleman in India always used to say, “Mother, I don't feel anything, I don't feel anything. I've done that, done this." I said, “Thank God you don't feel

it." He said, “Why do you say that, Mother?" I said, “Enjoy your peace! Enjoy it!" But then he wouldn't listen so I said, “Alright, go and feel the vibrations of particular gentleman!" And he got blisters on all his five fingers! [Laughing.] And he came to Me and said, “Mother, Oh God!" [Laughing.] I said, “You wanted to feel now have the blisters! What can I do?" So those who do not feel, also are avoiding some problems for the time being! Take it easy! Is a very good word [phrase] `Take it easy!' Which is, you know, this word, has come very recently. It was not there, never. It was `Run! Run! Run!' before. Now everybody says `Take it easy!' Specially if you have been to some other Gurus and some other `meditation' centers and all that, where you have been jumping morning till evening, you see, you don't want to believe that Sahaja Yoga you get, only by sitting quietly! Now there are ways and methods for improving your vibrations. As you know in Sahaja Yoga they are all described. For people who suffer from ego, I think best thing is to put your hands into the ice, right hand, may be. It may work out. Try it! But don't prepare! Just push your hands into ice sometimes. It may work out. And for people who suffer from superego, little bit burning your hand on the candle may help. Just try! Because the hands are not sensitive.

So there is a heat or a cool too much. Either you are a frozen personality or you are a heated personality, you are not in the center.

So if you are a frozen personality, better melt it a little bit, try! I never said this before because half of you would have run away if I had said this! But don't burn it to have

blisters I am saying! Just a little bit, try to see that, if you burn your finger the sensitivity will improve. But someone is thinking just now that, “If you have both the problems, what do you do?" [Laughter.] There are permutations and combinations because if you get out of your ego you have a big superego that comes up and if you get after your superego the ego comes up. There then, the attention has to be brought here [puts Her palm on Her Brahmarandhra]. And Sahaja Yogis know what it is, here to keep attention here. If you can keep your attention here, then you are above this and if something drops out it drops out forever because you are standing here.

Say if I have a shawl and somehow I can jump on to that gallery [pointing upwards to gallery in the hall] and this shawl falls off, then I never have it, isn't it, because I'm [up] there and the shawl is down here.

So the ascent must take place. If you do not ascend... How do you ascend is through your attention.

Where is your attention? Ask yourself, `Where is my attention?' Either you are counting your money, counting your votes or some people even count lampposts I am told! If they have nothing to do they can go on doing whatever they like! But count your blessings! Count your blessings! And your ascent will start. Count your blessings. And that is how you ascend, ascend in the Realm of God.

If there is no ascent, then you'll move from left to right, right to left, you will be [a] wobbly person.

But count your blessings with your heart, feel it! The thankfulness. English language is very good, you say

“Thank you” now in Indian languages also you see, we translated it, to say “Thank you” but we don't say `Thank you' because what is there to say with the mouth? Normally there are no words for thanking, because how can you say this if you are feeling from the heart? Even a glance, even a tint in the eye, glint in the eye, can express that, just a smile, just the bending of your head. There's nothing to be said, to feel the gratefulness and thankfulness for the great blessings of God. But if you read newspapers every day you'll forget this mantra, because when you read newspapers you say, “Wha! What a curse it is! God is a curse on this earth!" or that, “He has put his curse on me and I am the persecuted animal!" For ascent it's not a mental procedure, it's a procedure of the heart which is thanksgiving. Look at the flowers, they are giving thanks to God. The whole being is nothing but thanksgiving! Not worried, they are being plucked, they will die tomorrow, not worried. As long as they live it's giving thanks. Look at everything, look at this candle, what is it? Is thanksgiving. Everything that is created is giving thanks.

What about us human beings? We say, because we can say it, they cannot say. It doesn't have words to say. We have language, that's how we have become superficial, we have lost our depth because we have language. There is no language for the silent expression.

So those who do not feel realisation, should be thankful to God that, at least the desire, that they are seekers, that they are seeking God. How many there are? Today when I was coming to Caxton Hall, I found people walking with their tailcoats and so many, serious all of them. Bow

ties! How many are seekers in this world? How many are seeking God? How many are seeking higher life? So be thankful that you are seekers, that you have felt the need of God's love, that you do not want anything that is not God. It's such a great thing, that you have a heart, you have a mind that desires the Highest! Be thankful that you are seekers and born in this great time where you have to get your realisation. Be thankful. I know you have committed mistakes, alright doesn't matter! In your seeking you have committed mistakes, doesn't matter. But be thankful that God is looking after you. You are the special people created by His love, guided by Him.

So be thankful. And thankfulness is a quality of heart. That's how, when you feel the beauty of thankfulness, then you start feeling the Spirit within you.

It cannot be expressed, it cannot be returned, it can only be enjoyed. The blessings can only be enjoyed isn't it? And it is for enjoyment only, it's not for anything else. Just that you should enjoy the blessings, that's why the blessings are there.

So to achieve the blessings, is not the point. Blessings are everywhere, or I would say, there are tremendous vibrations today in Caxton Hall. And now some of you are not feeling it, that doesn't mean that God has not accepted you, that doesn't mean that. It only means you have to turn your face a little bit this side. Nobody should feel higher because they are feeling vibrations or nobody should feel lower because they are not feeling vibrations. But if somebody tries to help you, don't feel bad.

Now all of you who are going to look after the new people here, must know that, again, it's God's blessings that you

are here, that you have this great work to be done. That you are now employed by God and He has given you this special job, to give realisation to people. Again, count your blessings.

Don't feel depressed.

Some people say, “Mother, now you are going and they are all going with you." God knows why I'm taking them there that, perhaps, they need more training than you do. But again the competitiveness comes in the reserve force as they say! But where am I going? And that is how, in both ways, we have to count our blessings, that you are going or not going is not the point. Both of you have a responsibility which is bestowed upon you as a blessing from God. If the attitude towards Sahaja Yoga becomes of a child who expects everything from God, because he's the child of God. What's wrong? It's no ego. Because if God is Almighty, He'll jolly well have to look after you isn't it? But we are not like children you know, that's the reason. A child will demand. But you must have that faith, that, whatever you demand, He will do it! I don't know if you have forgotten a story I used to tell long time back, what My grandmother told Me once upon a time...

[A very small child comes up to say hello to Shri Mataji.] Yeh! Yeh! Come! Come! What do you want? You want this? Alright, have it. No, you want chana? Ha! Have it.

Child: No.

Shri Mataji: Chana? No? Then a kiss? Come, come, give Me a kiss. No? Alright, give this to mummy, come along give this to mummy. Responsibility, they like it, they like it. You must watch them.

Alright. Now, what do you want? You want flowers? [Pointing to a bunch of flowers offered to Her.] No? Alright. You give it to them, give it to them. Not for himself but for others! Give it to you. This is Godsend. How children explain things so in a, such a, simple way. We cannot be like children. We are very grown ups you see! Today really I don't know what to say. You better ask Me some questions. Any other questions please?

Shri Mataji: Come here, I can't here. You see the vibrations are just blowing in My ears! Seeker or

Sahaja Yogini: You suggested to us that we have a day without food and a night without sleep each week.

Shri Mataji: Good idea, better try! Seeker or

Sahaja Yogini: So we've been doing it for four weeks.

Shri Mataji: It helped you? Seeker or

Sahaja Yogini: Yes, I don't mind the days without food but when I have the days without sleep I find that, really like now, I can hardly keep awake in the evening. I don't think if it's really very good to continue it every week.

Shri Mataji: I think every day you must sleep early, is a good idea. It's not nice to keep awake in the night. Night time is not very good. And, why I said to keep awake in the night was that, because what I find that Sahaja Yogis have more problem of the left side. For the left side people it is important that they should keep awake in the night and lots of things work out, because you are alert. In the night only these attacks come. Left-sided people get all their attacks in the night and right-sided people get all their attacks in the daytime.

So for the people who are left-sided, in your case, specially, you are left-sided, so what you have to do is to sleep less in the night. You can sleep in the daytime, I don't mind.

Sometimes you can do it, now do it on a Saturday or a Sunday. Otherwise, this left side won't come up. Because we have to try and experiment you know.

Seeker or

Sahaja Yogini: Will you say something about the timing because for example to keep awake from say 12 o'clock to 4 is very easy for me and the other night I stayed awake from 12 to 6:30.

Shri Mataji: The other way round I would say. You get up at 12 o'clock, that's better.

Seeker or

Sahaja Yogini: Yes I did that. Then if you're awake from 12 to 6. And then can you rest for an hour before you go to work?

Shri Mataji: No, no. It's all your lookout. There's no compulsion in Sahaja Yoga. You experiment with it, see whatever suits you. And you will be able to see yourself. You have to experiment. You see, every individual has their individual problems and this is one of them. One has to see that, if you are a left-sided person, is to keep awake before 12 o'clock is better. Afterwards, gradually if you sleep, you see, all these left-sided problems will disappear. But the right-sided problems start in the morning, you see, `I have to go, I have to catch the bus, I have to take this' plan it, plan it, plan it! So that time if you at least don't eat, you get more time. You get more

time and apart from that, your stomach, which is active is better off.

Seeker or

Sahaja Yogini: I don't mind about not eating. You want us to do it every week then? One night?

Shri Mataji: No, no, you have to experiment. There's nothing like that in Sahaja Yoga, as you know it is not compulsory. But if it helps you, the way it helps you, [then] try. That doesn't mean now [that] all of you should buy a bucket of ice and put your hands into it. You see this is the trouble with human beings, you tell them anything and you find them sitting with a bucket in the hand! [Laughter.] No, I'm just saying `try'. You see, because, you must know, I have no problems. Alright? You are all individuals, you are all professionals, you are research scholars. Keep your mind open and try and find out if it helps you. Every individual has individual problems. All these little, little problems you can solve yourself, because you have the light. You have the light of vibrations, the Spirit is with you, so you are independent.

I just give you guidelines, that doesn't mean that you everyday have a vision! No, horrible it is! But it has helped some people. May not be for everyone, this may suit or may not suit. But for left-sided people is better, I have seen.

With the right-sided people it suits better that they don't eat so much, or [that] their attention is more towards better things of life. Actually I don't think right-sided people eat much. On the contrary they are very fussy people about food. I mean the whole thing is a mental

thing. Mentally they will say, “That's not good, I don't like it, what will I have it?" You go to a party and the menu card will come and seriously they'll think ten times [about] what they will eat! I mean what difference does it make what you eat? Does it? And they'll all discuss, “What will I have?" and they'll eat two morsels and finish it off! They'll not relish even that! Because food cannot be enjoyed by mental activity, simple thing as that. The tongue has to enjoy, but all your energy has been spent in your mental activity so tongue is not there anymore to enjoy.

So, towards food also, anything, if your attention is too much [then] reduce it. And that's why I said, “Eat less!" Or if you fast you don't have to think about food. You think more about food than you eat! And enjoy less. Least of all. That's why it is said “fasting” but when I say fasting people start thinking, “Then what time I should eat Mother exactly? Is it alright at 8:30 or say 8 o'clock?" As if there is a jail in Sahaja Yoga! Eat at any time you feel like it. But if you are thinking about food what's the use of fasting? Like in India, we have fasting, you see, women start planning about the fasting ten days ahead, “What will you have for your fasting?" Because in Indian life, people have made some concessions that “If you eat this, this is not fasting, [but eating] that is fasting!" So then they will plan out, what they are going to eat! [Laughter.] And they accumulate everything, you know, all that is to be eaten because you are fasting! And the whole attention is on `fasting' only. And actually you are eating all the time [laughing]. Like this Ramadan [that] Muslims have. They are supposed to early in the

morning. But they eat so much in those days that they never [normally] eat, because they know that they are not going to eat later on.

So it's a funny situation. You see I'm just giving you it as a research scholar to find out about yourself, what type of life will suit you.

Any other question? Seeker or

Sahaja Yogini: Mother, what was the end of the story about your grandmother?

Shri Mataji: Oh! That you want to hear again? It's a real grandmother story.

So don't use too much intellectual things. It's a simple one. You see, she said that, those who believe in God, just believe in His blessings and they have full right on God. She told a story that: once a man had to go and see God. Now don't ask question `how is it possible?' but it's a story! [Laughing.] And on his way he met a gentleman who was doing Haṭha Yoga, Western style! [Laughter.] Sometimes he was standing on his head and sometimes standing on one leg and then tying up his hair to some branches and dangling himself and shouting “oh God, oh God, oh God." This fellow got frightened you know, the way he was hot. His bones were showing, all his bones, skeleton. He said “Now what are you doing?" He said, “I'm calling God, when will I see him!" He said, “Alright, I'm going to see God now, I'll tell you, but till then, at least don't go to this extreme it's too much! And you settle down. I'll go and tell God that He must come and see you, otherwise this is going on too much." Then he went ahead and he saw one gentleman, just on the side of the road was sitting there. He said “What are you

doing here?" He said, “I'm doing nothing! God is doing everything, what am I to do?" So he said “I'm going to see God, have you any message?" “Oh no, you just tell him, you see, I have not eaten my food today and He is not bothered. Please tell Him to send all my food properly to me. And tell Him that I need the food." So this fellow said “Look at this arrogant fellow to order God like this! And he says God is doing everything and he's just relaxing and ordering God!" So he went to God and whatever work he had he finished with God and all that and then he looked a little perplexed you see, so God asked him “What's the problem?" He said “I have two more jobs to be done. There is one fellow who met Me on my way and he was doing all these horrible things to his body and he said that I hope I'll meet God with all this." “Oh ho, I know him, I know him very well” God said, “Alright, go and tell him that you have to do some more of this, it's not sufficient." So he got a shock of his life! He said “Look at this! God has no compassion at all! How does He say [that]?" So the other fellow he told about, the one who was just on the roadside.

So he said “Oh, he hasn't got His food? How can it be?" God called all his managers, everyone, He said “How is it you haven't given him his food? Please, arrange him immediately!" He was surprise that, “What sort of a thing it is?" And this fellow is just ordering God and God is looking after this fellow! So God as he knows about everything, He told him “Alright, you are perplexed. Alright, you go down and tell them one story. It's a tall story but you tell them and see their reaction." So He said that, “You go and tell them that I saw God passing a

camel through an eye of a needle." He said “Alright, I will do that” “To both of them you tell and see their reactions and then you will know why I tell you." So he went to the first fellow and told him that: God has said [that] still you have to do more of these things. He'll come and meet you but you have to do more. He said, “Yes, yes. Then he will meet? So I will do more and more and more." Then he said, “Then what happened at God's place?" He said “It's something miraculous." “What was that?" He said, “The God passed a camel through an eye of a needle!" He said “Must be a very big needle!" [Laughter.] He said “No! just ordinary one!" He said “How can that be? Now you have been to God so you are telling me stories! You can't get along with me like this! I understand this is all false, just telling me stories." So this gentleman said “Alright, I'll go to the other gentleman." So he went to him. He was having his food. He said “Sit down, sit down, sit down. God has sent all food for me. I know, once I tell Him...

there's no need to tell him also. He really looks after me, but you wanted to have some message so I said to Him, but how much he has sent food for Me! How can I eat all that?" So this fellow was surprised, you see, so he said “What happened? You went to God, what did you see there?" He Said, “I went and I saw a camel was passed through an eye of a needle, a very small needle I tell you and I saw it!" He said “So what? What's so surprising? After all He's God!" [Laughter.] “What is for Him for a camel? He can pass Universes after Universes [through it]. He's God Almighty! What is so miraculous for Him?" Then he realised! This is what it is.

If you have faith God wants to establish it. Only your faith works it. But the faith in Sahaja Yoga, as you know, has to be the faith of Spirit, of the experience, is not blind faith. When your eyes are open you have to have faith in God. But still after realisation [people say] “So what! Vibrations are there, so what? What is it so great? Yes, so what?" Then God says `Alright, go ahead!' It's such a tremendous thing you get but you don't have faith in yourself, how can you have faith in God? You don't respect yourself, how can you respect God? And this is exactly what happens to human beings when they deny Sahaja Yoga.

As you know there have been some miracles also in England, which were stunning and people were surprised. But there's absolutely nothing to be surprised at all, it's absolutely very common. And I wish Gavin could tell you about these few miracles that he has seen because some of you may not be knowing about it, so I would request him to tell all about this what happened and what happened in India. To Me it is not at miraculous, this is nothing. It's very simple. And this has been published in the newspapers and all that, I think it's better that Gavin should tell about this. Come here! Loudly! Gavin Brown: For the first time Shri Mataji had a program in Bedford and, we learnt the next day, that, a young boy had been going home on his motorbike and, he had an accident, he fell off the bike and he said that: a Lady stopped her car and got out and put her hands on where he was hurting and he felt better.

So he went to the hospital because they asked him to do that and they said “You are alright" and they discharged

him. And then he saw the picture of Mother in the newspaper and he told his own mother and he said “That's the Lady who stopped Her car." So a newspaper Reporter heard about this and he rang up the people who were organizing the program in Bedford and he said “Is it true that this Lady who came to Bedford stopped Her car to heal this boy?" He said “What time was it?" He said, “It was about 9:30 on that evening." He said “It's impossible, Mother was giving a program in Bedford in the Guild house [at that time]." But he's convinced that it was Her and we know that it was Her, in a way, also because we've heard other things, for instance in India, even more remarkable.

Shri Mataji: Loudly.

Gavin Brown: There's a very highly placed attorney in Bombay [Mumbai], who's a very great devotee of our Mother. Many of us have met him, he's come here, Mister Pradhan. And one day, when he was at a program of Mother's...

Shri Mataji: No, no, at home, with other people, sitting and talking.

Gavin Brown: No, at a meditation program, just sitting, taking vibrations together. He realised that there was a case that he was due to defend, which might come up in the courts. But it was a long way down the list and he thought `It's alright, there are a lot of other cases, they'll be heard today and mine will come up on Monday.' So the next day he went to the court just to check and they said, “What do you mean? You were here yesterday, it's down in the court records, you defended the case brilliantly, the judge commented what an excellent

defense you made, you won the case! What are you talking about?" So he said “Oh, was I there?" [laughter] and then he thought “No, Mother was there."

Shri Mataji: Ani Petkar tsa diste ahai [Tell about Petkar].

Gavin Brown: And Petkar is another one in Poona, that's a great Sahaja Yogi named Petkar. And he had a dream in the night that his brother fell in a big well in the village where they live, which is some way from Poona and...

Shri Mataji: He had a habit of walking in the night, the brother.

Gavin Brown: So he was so anxious about this dream [that] he got up, he prayed before Mother's picture that his brother should be alright and the next morning he went home to his village and he met his father and his father said “Yes it's true he did fall in the well and they were looking for him with torches and suddenly your brother came up out of the water and was just sitting on the side of the bank" and his brother told him that, this is what happened: “In the lights he saw a hand with bangles and it came and it pulled him up out of the water." And at first he couldn't speak, he fainted and he was able to tell this to the people who had come looking for him. And the brother wasn't a devotee of Mātājī, but Petkar had done something and Mother was there.

Shri Mataji: It's like a camel being passed through the... [Laughing.] Alright so any other questions please? Thank you very much Gavin.

There are thousand and one stories which so many Sahaja Yogis can tell. How they were helped in every way. God looks after everyone, but specially the ones

who are seeking and the highest of all, the ones who are realised Souls. If there's any question please ask Me.

Seeker: What can be done about the threat of nuclear war?

Shri Mataji: If you believe in God just don't think about it! [Laughter.] Everything can be diūsed isn't it. It's only if God wants [that] there will be war otherwise there cannot. But there should be people for whom God should interfere. If all of them are horrible devils, it's better to have a war. Man proposes and God disposes, this is [an] English proverb! You have forgotten all that.

Nuclear war is the creation of human beings. Alright? And human beings are the creation of God.

So the Creator, is not going to allow these stupid children to work it out. But in case they are that stupid, all of them put together, let them have it! What's the use of also saving stupid people and donkeys? Only the people who are realised Souls will be saved, because nobody dies, they will be reborn again, those who are innocent. And those who are devils will go to hell. Alright? We have one of them born here, you see, Mārkandeya, he's a born realised child. There are so many you can find them here.

Seeker: How does one dissolve fear?

Shri Mataji: Fear? Fear of what? Unconscious or conscious fear?

Seeker: Fear of fear.

Shri Mataji [laughs and makes a gesture of incredulity]: What fear it is! I tell you.

Seeker: No, fear without reason.

Shri Mataji: You see the fear comes to you because not you are one with Reality. You are not one with Reality. Alright? So in Sahaja Yoga there are so many ways by which you come in the center. You can have fear from your ego or from superego, from anywhere you can have, but if you are in the center, fear drops out. Gradually the fear drops out completely. Alright? It's the happening of awakening that takes you away from that fear. It's a happening. You don't have to do anything. What has to happen is that, when you ascend, it will all drop out automatically. We have so many ways and methods of keeping yourself in the center and of ascending, that's all. Not only fear but so many things drop out: habits, addictions, tempers, lots of things. All these barriers drop out because you get out of it. You are born again. Alright? That's how.

So you are not to do anything about it, just ascend. And there are so many ways and methods. I hope you will come to our programs and to our ashram here. And they will tell you how to do it. There are many we have, people, who had horrible fears, but they are alright. Now they are fearless. But they are not fearful.

Indian Seeker [presumably a vegetarian]: Mother could you advise us regarding food.

Shri Mataji: In Sahaja Yoga we do not pay much attention to food. Only thing I feel that, so much attention has been paid to food, is not a correct attitude. You see, the Spirit doesn't eat at all, it's a detached thing. Ātmā is beyond.

Now when we try to say that, if we eat this kind of food, Ātmā will be happy, that kind of, Ātmā will be happy, is

not true. For example we'll say vegetarianism, which is a very common problem with people is, you'll be amazed, all the false Gurus are vegetarians; one by one. Maheśh yogi, Rajneesh, Rajneesh is a great vege! He doesn't even eat garlic and onions. This Maheśh yogi's disciples, if you show them a garlic, they'll jump a hundred times! They are afraid of the garlic! Can you imagine! But I don't say that you eat meat, that's not [what] the point is. But those people, whatever they require they should eat, but don't eat meats of animals which are bigger than you.

Now what happens? How the evolution in the animals takes place? Nobody has put attention to that! Supposing there are many chickens you save. I am not going to give realisation to chickens am I? Or to bugs, am I going to give realisation? Or to mosquitoes? So our attention is on these, not on the higher level of life.

When we think of food that we must, save chickens, actually nothing dies: is Kṛiṣhṇa Himself has said “Nothing dies." Alright? And that's how some people denied Kṛiṣhṇa, because He had a samhara Shakti, He used to kill. And killing is so important in evolution. Otherwise if you don't kill these rākṣhasas, are you going to adore them? What are you to do with them? They are to be killed they are to be thrown out.

In the evolutionary process also, so many things have to die out for the real thing to come up. Say this flower has to die to become the fruit, alright? And there is no `himsa' in it. The word `himsa' is so misinterpreted that people are satisfied if they do not eat meat! Is not true. For some people it is essential they must eat meat. Now as you know, Sahaja Yoga works on the principle of

Shakti. And the Devī not only killed Rākshasas but She ate them! And She drank the blood of these Rākshasas as you know, Raktabīja's.

So how can She be vegetarian? Just tell Me? Put reason! Alright? Because we are conditioned that way, we think [like that].

But actually what happens in the evolutionary process, when a person, say, eats chicken, not person, we should say, a higher animal, eats a lower animal, then it passes through the circle and achieves a higher life. Is absolutely this is how evolution takes place. Of course, we can give realisation to human beings so we need not worry about that. That's a different point. But, if you eat chicken, you definitely give it a higher life. But not the animals which are bigger than you. Smaller animals if you eat it's not going to be harmed by that. No doubt. But you may be harmed. For example, if you eat mosquitoes, you'll be harmed! Now in countries where there is not even any vegetable or anything, they have not seen green leaves, like Greenland. Now the name is `Greenland' they have never seen green colour! Are they sinners that they can't live without eating meat? How can God be so partial. There are many countries where they cannot live without eating meat, so, there must be some reason. Alright? So reason it out. If you eat vegetables, alright. If you want to eat meat it's alright.

But again for a Sahaja Yogi, what we decide is not on what you like, but what is good for you. For example, for Western people it is better that they don't eat much meat now because, I think they and their fathers have eaten all that. Eat less. They should have more

carbohydrates, while the vegetarians should take more proteins. If they do not like meat they should take to other proteins, because proteins are very important. If you do not take proteins in life people suffer. In Sahaja Yoga we find such people have trouble from left Nābhī. I have seen in India, many people, who are strict vegetarians, have a problem of left Nābhī.

So we told them, alright, you can eat proteins, there are so many proteins you can eat. If you don't like to eat meat, from childhood you have not eaten and you don't feel like eating, alright, forget it.

Eat some.

We have to be wise, we have to be open, we are not to be bound by our conditioning from childhood.

This we must understand, that: vegetarianism is not going to take you to God, neither is non-vegetarianism, because the Spirit is neither a vegetarian nor a non-vegetarian. It is a detached thing, it's above food. But whatever you need for your body is important. If you need protein, eat protein. If you don't eat protein, don't eat protein, but then eat something which you need.

So it is not that one has to understand it in a way that we understand as a chicken and vegetables, but we must understand in a way that a doctor understands: a protein and carbohydrates. Alright? Whatever you like you can eat. There's no, in Sahaja Yoga there's no such a compulsion.

So many saints used to eat meat.

So many saints. Guru Nanaka, Kabīra, Mohammed Sahib, Christ, Rāma Himself, Kṛiṣhṇa Himself. All of them eat

meat. Even Buddha ate meat. The proof is that, at the end of His life, he went to one of His disciples who was a hunter and He told him, “I am very hungry, give Me something to eat." So he said “Sir, I have nothing else but a wild boar which I have killed very recently and it is not yet fully cooked." So he said “Alright, doesn't matter I'll have it." And He ate it and He died because of that half-cooked wild boar. And He died with that.

So now Buddhists think that, “We should not eat meat." It's not so, because He ate something that was half-cooked. That means He did eat [meat], isn't it. Even Jains know that, it's only Neminath [cousin of Śhrī Kṛiṣhṇa] who got a kind of a feeling against meat eating. That was Neminath was at the time of, he was contemporary of Śhrī Kṛiṣhṇa. When his marriage was celebrated he found many birds were killed and he felt terrible about it and he didn't want to eat any meat. Was alright. It's alright, if you don't feel like, don't eat it. But then a cult started. But that means [that] till Neminath, means, Jainis are ancient people, [yet] till Neminath they were eating meat, is a fact.

So to get attached to some idea is not the way you are doing it. If you don't want to eat, just don't eat it and if somebody has to eat it, because of health purposes or because of the need, there's nothing wrong in it. Everybody has a different need, every individual has a different need.

If I, personally, take just to vegetarian food, I won't exist I can tell you! Because I have such a great capacity to have purges. If I meet somebody, shake hands with somebody, he has lots of bhoots you see, then I just clear

him out by purging. And if I take just to say, carbohydrates, I don't know what will happen to Me! But doesn't mean that I should be a meat eater, but I have to have proteins. That's [what] the point is. It's no question of meat or anything but is a question of eating proteins or carbohydrates.

We have to be wise about it. And all such cults you see, that [say] “You eat this you eat that” is not so. There is no cult in Sahaja Yoga, every individual has a different personality. But, the common thing is one and that is the Spirit. But for example, drinking, we abhor. But after realisation, before that I don't talk of you drinking. Because it goes against your chetanā, means your awareness.

So one has to look after the awareness.

So much time has been wasted in people in deciding what to eat what not to eat! What have they achieved? Nothing! Sometimes I have seen vegetarians can be horrid people! Absolutely horrid! We have a community in India called Marwadis, they are blood suckers you see and they are vegetarians. Not all [are like that].

We have some in Sahaja Yoga also, but very few. They are extremely money-minded people, you know that.

So, this kind of thing, to believe that such food will make us great is, will be, falsehood.

So you don't decide on that. You decide on proteins and carbohydrates.

Whatever [is] good for your health, you should do. Those who eat too much of vegetarian food are liable to certain types of diseases and those who eat too much of non-veg

are liable to some. Those who eat vegetarian food can get leucoderma [loss of skin pigmentation relatively common in India] very easily, can get leukemia very easily. Certain types of cancers they can get very easily. Those who are non-vegetarians can get another kind of diseases, there are numerous diseases they can get.

So we have to have a balance, that, when we eat vegetarian food also we must see that we eat sufficiently, sufficient amount of proteins, because body has to be alright.

Healthy body is the temple of God and to temple of God, you have to keep it healthy and happy. That's the attitude. But it's not so important because, once you get into Sahaja Yoga, as it is, automatically doctors bill drops to nil! Automatically! So we have to take a wise attitude towards ourselves. Not to torture ourselves because of certain conditionings. Because we have been taught something from childhood we should not accept it, but see for ourselves.

I have seen that, people who had tremendous stigmas about vegetarian food, when they took to, say, protein food, they improved very much in vibrations. They did. Protein food is very important for certain people and for certain people carbohydrates. Liverish people should take to carbohydrates. It is absolutely a open thing for us to understand. But whatever goes against our awareness, because in our own awareness we have to achieve our Spirit, we drop out that, also, very easily. I don't have to say that, `Don't drink! Don't smoke!' You just drop [them] out.

Seeker: Mother, Bernard Shaw, a very distinguished Irish writer apparently once said that: he doesn't like his stomach to be graveyard out of dead animals.

Shri Mataji: Now Bernard Shaw did not give realisation to anyone did he? You see, he might become vegetarian doesn't mean that everybody should is it? It's not a graveyard, I tell you it's not a graveyard.

He must be constipated. [Laughter.] That's all I can say. You see Bernard Shaw, is alright, whatever he has said according to his own is correct. For him it may be. You see most of the vegetarians have a problem and non-vegetarians have a problem. I have seen it every day in My life. Today is not Bernard Shaw here otherwise I would have told him what he suffered from! You see it is, whatever they express, is their individual experience. Alright? I am not expressing an individual experience, I am giving you an experience of many. Alright?

Seeker: I take your point that one should eat proteins. Are you saying that vegetarian food doesn't have proteins?

Shri Mataji: What is it? Yes you can.

So you should eat! When did I say no? I never said that.

If you can eat, eat proteins, finished! It should be decided on proteins and carbohydrates and not on all these things because nobody dies! You see, we have no compassion for our own fellow being. Where are we? We have no compassion for our own relations, our own father, our own mother, our own brothers and sisters and other people. And what's the use of having compassion on things which do not understand it at all? And they don't need it! Who needs compassion are human beings,

who are aware of it. It is too far fetched and that is very true with human mind, because they want to shift their mind to something which will take them away from Reality.

Like the other day I told somebody not to feel guilty because they were catching on the left Viśhuddhi and she said, “I feel guilty” I said, “For what?" She said “I feel guilty for Vietnam." I said “For what?" “Because the people are dying in Vietnam” I said, “Are you going to solve the problem of Vietnam? Are you concerned with it? Why are you worried about them?" You do whatever is good for you and what you can do. This is how we shift our mind. And it's very true, you see, people have their accepted ideas, they stick onto it and get nothing.

So I say that there should be no `ism' about anything. You must have an open mind. Absolutely an open mind. Anybody who, whatever problems they have, they know and they should solve it. I am not here to spread vegetarianism or non-vegetarianism, I am here to spread Sahaja Yoga. “Sahaja Samādhi Lago." That's what is said. You have to get your Samādhi. And that how do you get? Sahaj, spontaneous.

Seeker: How will you get money *[UNCLEAR]* if you don't have proper food or anything?

Shri Mataji: Now, I will say that, I've already told you about Buddha. What do you think of Guru Nanak? What do you think of Christ? You think, were they any way lower? You see because the Spirit is not concerned, as Kṛiṣhṇa has said, “Nainam chindanti shastrani nainam dahati pavakah. na chainam kledayanty-āpo na sosayati marutah." [The Spirit cannot be cut or burned, nor

moistened nor blown.] It is Śhrī Kṛiṣhṇa Himself has said it! And He Himself has killed Rākshasas and Jainis are against Śhrī Kṛiṣhṇa because He killed Rākshasas. According to him He's a hinsatmak fellow! If you go too far with it, then you go to that limit where you start saving bugs and mosquitoes.

But we have got it, we have got realisation, no doubt about it. First of all you get your realisation. You have had all these ideas, all our forefathers had these ideas, they never got realisation. Alright? So forget it. First thing is get to your Spirit. This is not important, this is just you are directing your attention to something else which is not important.

So many of them.

So we discard Mohammed Sahib, we discard everyone? That's how it is, it's Brahmanism, it's Brahmanism. It's `ism' again. We discard all the great people of the world by this.

They were not realised? Kahlil Gibran was he not realised? How will you know? Unless and until you are realised you will not know who was realised or not. You will live on these ideas only. You have to feel it.

William Blake, was He not realised? He was Mārkandeya Himself! We have forgotten so many things. Even in the Indian Scriptures we never see, we don't want to see these things. We had a great saint in India called Sajan Kasai.

So one should understand that, in Sahaja Yoga, whatever is the Reality, we try to accept. See for yourself! What about your vibrations? Are you getting vibrations or not? That's the main point is. Attention should be there.

Actually vegetarians have much more attention on food than the non-veg have, I can tell you this fact.

And the women of vegetarian people are all the time busy what to make for their men. All the time they are planning what to have `Aaj papad banaye? Ki falana banaye ki...' They are all the time busy cooking, cooking, cooking. And the men are all the time fussing about food! “In that house I ate that karela [bitter gourd]. In that house I ate this, you better make that!" All our Indian men I know too well and I know all the vegetarians, I am from that country! And the women are busy with that and men are busy with that. All their attention is in food all the time. Women want to cook and men want to enjoy. That's not the way. Remove your attention from food, it's not important. Whatever you are eating is alright, have a balanced diet. Don't worry about others. You are not forced to eat anything in Sahaja Yoga, nothing is forced, but you eat what you like. But the thing that you like must be balanced, must be proper, must be health giving. That is the point is. Whatever you eat, you eat. Nothing is forced. You have to see for yourself.

So many of Sahaja Yogis just don't eat meat at all. I mean they just don't eat and they need not eat at all, there's no need. I mean if you don't want to eat, just don't eat it! It's not important... [GAP]... All your quality is tested when your Kuṇḍalinī is awakened. Before that you do not know. I have known of people who think: Oh, they are very great! Like one Sannyāsī fellow came in and he was sitting on the dais [stage] and he thinks `oh, he's a great man, he's the very big man and all that.' And My grandchild who's a realised Soul, she was sitting in front

and I was the guest of honour there, so I was sitting there.

So she shouted from her seat, she said, “Mother, ask this man with the maxi to get out he's giving too much heat to us!" And this fellow was going to talk on vegetarianism, this that ism, another ism and religion and God and this and that! And she said, “Please ask him to get out! He's giving heat to us this maxi-fellow." She thought he was a maxi-man. She didn't know he was supposed to be detached! Those so-called `Sannyāsīs', be careful of them.

So-called `vegetarians', they are such hot-tempered people. Aren't you hot-tempered! [Laughter.] So what you manifest is the point and manifestation is silent! It works.

So, `Somebody said so,' `Another fellow said so,' so what? What about you? What have you to say? What have you manifested? Have you got the powers of your Spirit? Ask a question to yourself. That's the first thing you achieve. Then we'll talk about these things! First of all you achieve your Spirit.

This is the first time people are achieving their Spirit isn't it? This is the first time it's happened.

So you cannot have any relationship with anything else, you can say. This is an absolute thing that should happen and that you should ask for. Because somebody said so, because this was so, so what? What have they done? Did they manifest their Spirit? Alright, they did, one or two, here and there.

So first, get your Spirit manifested, don't get lost into these things, be kind to yourself, first be `vegetarian' to

yourself, by being kind and by getting your Spirit liberated completely from all these ideas. Spirit is a Reality, it's not an idea and it cannot be nourished by any idea, except Reality, which you face yourself and manifest!

Seeker: Mother what should we do with that Spirit?

Shri Mataji: That's what I said, don't have to do anything! Na? That's what we should [do]. The Kuṇḍalinī has to rise, alright? Now what does this lamp do when it is to be enlightened? The another enlightened light comes near it and manifests itself! You are all ready for it. Alright? Only thing [is] the Kuṇḍalinī has to be awakened and it works out.

Anybody who is enlightened can give you realisation. You want us to work it out on you? We'll try.

All of you who haven't go realisation so far, we can try that. Not today. I'm sorry but, because the time is up, I think [looking at the clock]. You have to go to our ashrams where people are doing this work and you all are going to feel the realisation. I used to do that before, in every program we did it. All of them got their realisation, in the programs only. And if the Kuṇḍalinī is not coming up, they will tell you what's the problem is, alright? Try to do that. Help yourself. You have to cooperate with yourself. You are not to get identified with some wrong ideas or right ideas or whatever you think it to be. It is the Kuṇḍalinī which is not moving na? That's the main point is. Every Indian knows that the Kuṇḍalinī has to be awakened to get to Ātmā sākṣhātkar, to get to Self-realisation. And if the Kuṇḍalinī is not moving then there's a problem. And what is that problem? That, these

people know. Alright? So just cooperate with yourself. Be humble about it, it has to work out. Thik hai na? [OK?]

Seeker: Zarur [absolutely].

Shri Mataji: Aasha ruk lijiye, aisa hath rukhiye [Keep hope, keep you hands like this]. Just see it will work out as Chaitanya Lahari in the hands. I mean, I would say people like Ādi Shañkarāchārya, who was such a great person but he had to take to Sannyāsa because he had to do the work. He's the one he said, “Na yoge, na sankye" [neither by Yoga, nor sankya], na by any thinking you do not get it. “You get it by Mother's grace." So simple he is like that. But look at Him! When his mother died, they would not allow him to burn the body, because they said a Sannyāsī cannot burn! You see this is also an idea. A Sannyāsī cannot burn the idea of a grahasta. Another idea you see. Same type.

So they say that he burned the body of his mother with the banana tree, which never burns! And it is said that, he did not curse, but it was cursed for that, that they will all bury their dead in their houses and even today you find in Kerala they do it.

So, so many people with these ideas have killed so many saints. Do not have fixed ideas.

Sāi Nāth, so many people Sāi Nāth, they say that, many people say that way. Sāi Nāth was a realised Soul. Not this new one but the [actual] Sāi Nāth. But he was a Muslim. Kabīra was a Muslim [but] still, Nanaka included him in this Guru Granth Sahib. Only a realised person can understand who is a realised person. Before that, talking about it is just a mental feat. By mental feat you are not going to go there.

Aren't you tired already of your mental feats? Aren't you? Thinking, thinking, thinking mad? One doctor once said, “Mother, you cut my throat, do what you like but stop this thinking!" [Laughter.] So give up all these ideas that are yours: achieve the Reality, achieve the Reality. That is, also, you cannot achieve it, the Kuṇḍalinī is to be awakened, somebody will awaken for you and once you get it you can it do for others. You can awaken others, there are so many who have given realisation here, these people are looking so simple and ignorant but they know all about it, they are experts! Immediately as you were talking they were all giving bandhan on your Chakras that were catching. They all know. You do not know but they know. Alright? So with humility you must go and receive your realisation, learn all about it and then you give realisation to another person. That's the main thing we have to do today. We are not here to save bugs, mosquitoes and chickens! [Laughter.] I hope nobody is coming out about the support of smoking some horrible thing like hashish or... they smoke or eat I don't know. Like we had a big letter from somebody who says that, “Mother, people will never understand you unless and until they smoke cannabis” I don't know what is that supposed to be, but they said that, “Without that they cannot understand you and Sahaja Yoga." Alright, how many have felt Cool Breeze, the new people? Let's see. Cool breeze? Did you feel the Cool Breeze in the hands? Yes, I know. What about you? You? You have felt it? What about you? Great. Aab dekhiye, ye logon vegetarian nahi, aur unko Cool Breeze ā raha, aur āp ko nahi ā [now look,

these people aren't vegetarians but they felt it and you didn't]!

Seeker: I have already had this. I have had this before.

Shri Mataji: But you have lost it! Seeker [very rudely]: No I have not!

Shri Mataji: You are getting it now.

Seeker: I already had it.

Shri Mataji: You never had it.

Seeker: I have had it.

Shri Mataji: And then what is your situation just now?

Seeker: My hands are cool! Is that so?

Shri Mataji: No, Just see if he's cool above the head. He's catching on liver. Ha? Hot? Alright, that's the compassion! The proof of the pudding is there! [Laughing.] Alright. What about you did you feel? Good. What about you? You were very tense, what is the problem with you?

Seeker: I felt it earlier when you were saying about ego. I felt if very intensely.

Shri Mataji: But then what happened? You started thinking about it?

Seeker: No, I started feeling physically uncomfortable.

Shri Mataji: I know, then you sit on a chair, there's no compulsion. No, no, you be alright. I tell you, you'll be better off. We have no compulsion like that, you please be seated. Yes, come along, sit on the chair, alright. That's a good idea! There is no compulsion, you see because the hall, they thought `there will be many people' so we spread out. There's no compulsion, whether you sit on a chair or a throne make no

difference, makes no difference, it's not that. You see it is the Kuṇḍalinī is inside, is a subtler being, it doesn't mean where you sit. Of course it helps, if you sit on the ground, in a way, because the Mother Earth helps you. If you sit before the light it helps you also, that's a different point, but if you can't sit on the ground, doesn't matter. We have given realisation to people only on, sitting on, chairs! [Laughter.] Yes! What to do! All of you got it sitting on chairs isn't it! [Laughs joyfully.] About 400 people in Vienna got it, just like that, sitting on chairs! It happens, if it has not happened it should happen to every one of you.

Seeker: Can you say more about Kuṇḍalinī?

Shri Mataji: There are so many lectures of Mine! Today, you see, because I am going away, I'm rather quite full. And there so many lectures I have given on Kuṇḍalinī, you don't know, I must have spoken at least thousand times. In Caxton Hall itself at least 600 times! So there are lectures and lectures, you can see, listen to them. But it is Kuṇḍalinī, by that listening to it, nothing will happen. Actually it's an actualisation. You see it's like a seed sprouting.

So by the talking about Kuṇḍalinī, nothing happens. It has to raise. *[UNCLEAR]* hona chahiye. Aap, Shivaji Mahārāj, unko bare me kya sojte? [What do you think of Shivaji Mahārāj?] Shivaji Mahārāj and Rana Pratap, they were Kṣhatriyas and they used to eat meat. What do you think of Shivaji Mahārāj? Was he a bad man by any chance? Or Rana Pratap?

Seeker: They were not spiritual.

Shri Mataji: Who? Shivaji? Oh, He was very spiritual. That's the trouble na! Because you are not a realised Soul you cannot feel their vibrations. Those who take that flag that they are spiritual, they are not, mostly. Mostly they are not. You see, they are very simple people. They can be kings, they can be anybody. We never understand them, unless and until we have realisation. Śhrī Rāma was understood by Shabari, but His own father never knew who he was! The understanding of the Spirit comes from Spirit only. “Ātmāny eva Ātmanā tusht.ah" [Bhagavad Gītā 2.55: The Spirit is satisfied by Itself]. Ātmā, should not, nothing else. Through your mental attitude you cannot reach there. It's the Ātmā knows Ātmā. You ask about Shivaji, all of you ask, `Was he a realised Soul', see the vibrations you get. Now they can know. Was he? Now ask, `Was Blake a realised Soul?' Was he? You can feel it. It's sometimes shocking you know, to find out about people who are supposed to be very spiritual, are not even realised Souls, so many! Are you from Vallabhacharya? No.

Vallabhacharya was a great realised Soul and when Surdas went to him and he said, Surdas was supposed to be very spiritual, but he was not a realised Soul.

So Vallabhacharya said to him, “Why are you weeping like a baby for God? I have found Him. The one who has found doesn't weep." Spiritual person is that who has found the Spirit. You still find that he is not spiritual? Maybe spiritual in the way that his attitude is, but he must find it, then only he's a really, a spiritual person. Even an ordinary person could be a realised Soul and a king may not be. We have so many like that. We have so

many misnomers in our country if you find out, in every country. Here also, so many are called as `saints' and horrible vibrations come from them. They are `saints' you know. Saint this, saint that. I don't know [whether] saints or Satans but they are something like that! And there are people who are real saints [and] nobody knows about them! How will you make out? Only through Ātmā, the Spirit knows the Spirit. Not through mental activity, outward things, but through the knowledge that is manifesting, [in] the knowledge of Reality, you know the Spirit. There's no other way out. That's a fact. All other things are useless because, whatever you do in ignorance, are useless. But when you have the knowledge of the Spirit then you do it with your absolute value. It does not know any race, any creed, any colour, nothing! It knows vibrations. Is described, everything is described.

So now, what should we do now at the end when I'm going now? Would you like to sing a song to Me? If they allow us.

Sahaja Yogi: Jerusalem Shri Mataji.

Shri Mataji: Alright. Close the door I think they should not say that we have misused their liberties.

Who will sing it? Who will start? [Sahaja Yogis sing Jerusalem, Shri Mataji closes Her eyes in meditation, then bows.]... Thank you very much.

Contents: 1982-12-03 **Reception for Shri Mataji offered by the President Sanjeeva Reddy, Rashtrapati Bhavan, New Delhi, India**

[The President and his wife express their deep gratitude and invite Shri Mataji to stay with them in Rashtrapati Bhavan. Shri Mataji thanks them for their kind invitation but declines to stay with them, as She did not believe in accepting the hospitality of someone She had cured. However, when Shri Mataji arrives in New Delhi, the President personally calls on Her and requests Her to bless Rashtrapati Bhawan.

He specially gets a sandalwood chair made for hHer. He welcomes her with flowers and humbly sits at Her lotus feet.] Shri Mataji [bashful as She is embarrassed]: Sir, what are you doing? You are the President of India, why are you sitting on the floor.

President Sanjeeva Reddy: I may be the President, but you are a Saint.

Contents: 1982-12-19 **Śhrī Mahākālī Pūjā (English+Marathi+English), Lonavala, Pune, Maharashtra, India**

[Shri Mataji talks in English:] So welcome to you all, Sahaja Yogis, to this great country of Yoga. Today, first of all we have to establish our desire within ourselves that we are seekers and that we have to achieve our full growth and maturity.

Today's Pūjā is for the whole universe. The whole universe should be enlightened with your desires. Your desires should be so intense that they should emit out the pure vibrations of Mahākālī Shakti, which is the pure desire of attaining the Spirit. That's the real desire. All the other desires are like mirage.

You are the people who are chosen by God. Specially, first to express your desire and then to achieve it. And by intense desire of purity you have to purify the whole world. Not only the seekers, but even those who are not seekers. You have to create an aura around this universe, of desire to achieve the Ultimate, the Spirit.

Without desire this universe would not have been created. This Desire of God is the one that is the Holy Ghost, is this All-pervading Power, is the Kuṇḍalinī within you. Kuṇḍalinī has only one desire, is to be the Spirit and anything else, if you desire, the Kuṇḍalinī doesn't rise. Only when it knows that this desire is going to be fulfilled by somebody, who is facing the seeker, it is awakened. If you do not have the desire, no-one can force you. Sahaja Yogis should never try to force this desire on other people.

The first ordeal we face, as soon as you get your Realisation, is that you just start thinking of your family. You start thinking, “My mother has not got it, my father has not got it, my wife has not got it, my children have not got it." You must know that these relations are worldly. Sanskrit is `loukik'. They are not aloukik, they are not beyond the worldly relationships. These are worldly relations and these attachments are worldly.

So if you play into that, of course, as you know, that Mahāmāyā Shakti allows you to play with that. You go ahead, as long as you like. People bring Me all their relations, parents, this and that and ultimately they discover that this was a very wrong thing they did. They lost so many precious moments, so many hours, so many

years, wasting their energy on people who never deserved any attention of Mother.

Sooner you realise the better, that this desire may be within you and may not be in anyone of your so-called worldly relations. Makes no difference.

As Christ was told that His brothers and sisters are waiting outside, so He said: “Who are My brothers and who are My sisters?" So one has to realise that those people who involve themselves into the problems of their family all the time and attract My attention, you must know that I am just playing about. It is of no value to you.

For your ascent it is important first of all to have no desires to create desire in your kith and kin. This is the first principle of establishment of Mahākālī Power. Specially in India where people are too much attached to their family, it's a very big problem. If you give Realisation to one person, you are amazed to see that all relationship they have is with a big bunch of bhoots and once you give Realisation to one person you are in for trouble. Then all the bhoots walk in, slowly, torturing My life, wasting My energy and absolutely disgusting! It should happen to you to understand that this is not auspicious. If you want to waste your time, I will allow you to waste your time. But if you want to have the ascent fast, first of all one must remember that these are relations which are absolutely worldly relations and this is not your pure desire.

So try to separate your pure desire from your worldly desires. It does not by any means, suggest that you give up your family, you give up your mother or give up your sister, nothing. But you witness them and see, as you

would see anybody else and see for yourself, whether they are really desirous or not. If they are, well and good. They should not be disqualified because they are your relations. It works both ways. As they cannot be qualified because they are your relations, they cannot be disqualified because they're your relations.

So in Sahaja Yoga to make your desire a pure desire, you have to get out of so many things. But for people who are attached to their family, are bound by their family, they have to see to it that they do not force Sahaja Yoga on anyone of their relations, at least don't force them on Me.

[Shri Mataji starts coughing.] I've been speaking every day! I have to speak about Śhrī Kṛiṣhṇa otherwise he thinks I'm just talking about Mahākālī! Now this desire within us, which is the Mahākālī Power which is manifesting, comes to us in so many ways. As I told you first of all, it comes to us after Realisation, because you are all Sahaja Yogis, to do something about our relations. Then the second desire that comes to us, that, let us try to cure people, who are our relations. This is the second desire, you should face yourself and see, that this has happened to many of you.

So, right from leprosy to any small thing like cold or sneezing, whatever they have, you think you should bring to Mother. And all the worries of your families should be brought to Mother.

Simple thing like pregnancy or sneezing, very simple things, which are so natural are brought into your attention.

So when you have them in your attention I say: “All right, go ahead with it. Try to solve it, if possible." But if you do

not have them in your attention they are in My attention. You leave them in My attention, I'll manage that.

But then it's a vicious circle. It's a very subtle projection of the mind that thinks: “All right then Mother we don't have this in our attention, You'd better look after it." That's not the way. You should have only one intense desire within yourself: “Have I become the Spirit? Have I achieved my Ultimate? Have I risen above the worldly desires?" Purify it. Once you start purifying whatever falls off, I'll look after that. This is just an assurance, but not a guarantee. If it deserves My attention I will definitely look after you.

You have to value your attention as I value My attention. I think you have to value much more of your attention than Me, because I can manage many more things within Myself, because everything is in My attention. But you try to purify your desires away from the worldly problems that are facing you.

So you expand it more, then you start thinking: “Mother, what about the problem of our country?" All right, give Me the map of your country, finished. That's more than sufficient. Then purify yourself. The desire that you have, you leave it. And once you are purified that area will be covered through your attention, it's very interesting. When you get over it then only you can throw light, but if you are inside you are hidden by that. Your light is hidden, there's no light emitted. You all rise above that desire.

Every time you get a desire you rise above it, so your light is emitted on that wider problem that you are facing which you think should be solved by Me. These are all My

headaches which you are taking on yourself. You have to do only one thing is to become the Spirit that's all. Is a simple thing. The rest of it is My headache.

Now the problems that should take your desire on the collective should be very different. To substantiate your purity, to be fragrant with your purity, your attention should be on the other side. Now you are not facing Me, you are sitting with Me facing the whole world. See, the whole attitude will change. The attitude should be: `What can I give? How can I give? What is my mistake in giving? I have to be more alert. Where is my attention? I have to be more alert towards myself what am I doing? What's my responsibility?' You must desire that you should be pure. You should be pure desire. That means you should be the Spirit.

That, what is your responsibility to yourself? You should desire that your responsibility to yourself should be manifested, should be complete.

Then your responsibility to this Sahaja Yoga. What is your responsibility to Sahaja Yoga, which is the work of God, which has started and you are My hands. You have to do the work of God and you have to fight the anti-God elements, the Satanic elements. You are not responsible for your family any more, those who are, are the half-baked Sahaja Yogis I said, are useless absolutely good for nothing. All such will drop out, their families will suffer, I know this is going to happen because now the forces are gathering in such a way that sorting out will start.

Your responsibility to yourself, to be the Spirit, your responsibility to Sahaja Yoga, your responsibility to understand Me, better and better and better. Your

responsibility to understand this mechanism that is within you, your responsibility to understand how this mechanism works out everything. The responsibility is to how to become a Guru yourself. Your responsibility to be a dignified and a glorified personality. A responsibility to be a respectable person and not a cheap personality. Every one of you is worth the whole universe. If you want to rise to that height. Universes of universes can be thrown away at your feet. If you want to rise to that height, to that magnitude that is within you to prosper. But those people, who still want to live on a very low level cannot rise.

For example, the Western Sahaja Yogis have certain problems of committing the sin against the Mother and the Eastern Sahaja Yogis have the problem of committing sin against the Father. It's not difficult at all for you to get out of it.

The attention is to be kept pure. In Sahaja Yoga you know all the methods how the attention one can keep it pure. If the attention is not pure then this desire will be always attacked by all petty nonsensical things which has no meaning in your ascent. Now a person who is a good Sahaja Yogi is not bothered about clothes, what others say to him or what others are talking to him, how they are behaving towards him and the attention is not on that criticism that this person is like this, that person is like that. Nor there is the aggressiveness of anyone else, because nobody is the other. But the problem is when I say that, no-one thinks that I'm saying about you, each persons. Those who are aggressive take the other role and those who are non-aggressive think the other way.

Like I say something for a person who is aggressive, the non-aggressive immediately thinks of the person who is aggressive, not about himself. You immediately start shifting your mind to other person, finding faults with other people.

So this desire becomes gradually lower and lower and lower because of the loads that are put onto it.

So the alertness is very important, complete alertness, `satarkata'. That we should keep our attention purely for the sustenance of our pure desire. Desire comes from your heart and you are so built that your Brahmarandhra is also the heart. If you don't have a clean heart, this won't keep clean. There are people who think if they talk about Sahaja Yoga big and all that, they are all right. They are cheating themselves.

If the heart is not open then this is closed.

So try to open your heart by projecting it. Projecting it.

I hope today when you do this Pūjā and you do the worship of Mahākālī and this special yagñya, we will definitely establish this aura and enlighten the universe. But your outlook should be, `How much I have contributed to this. Am I still thinking of other people? Am I still thinking of my petty small problems, or I'm thinking of my Spirit?' So, the left side starts and ends with Śhrī Gaṇeśh. Śhrī Gaṇeśh has only basic one quality, that He's completely surrendered to His Mother, He does not know any other God, He does not even know His Father. He only knows His Mother and completely surrendered to Her. But this pure desire has to have the action and about which I'll tell you later as we will be having more Pūjās and more Pūjās.

But today let us establish ourselves into that pure desire, to be the Spirit. Now, as it is, with the Western mind we'll say: “How?" Is always coming, “How to do it?" Should I tell you? It's very simple.

Ādi Shañkarāchārya wrote `Viveka Chūḍāmaṇi' and so many other books of treaties and then all these big intellectuals got after his life. And they said: “How this and how that and how?" He said: “Forget these people." Then he wrote `Saundarya Lahari', it's just a description of his Mother and his devotion to Her and every couplet that He wrote is a mantra.

It is not the surrender of your mind through your mind, but the surrender of your heart. Is absolutely the surrender of your heart. Western Sahaja Yogis know very well how there have been attacks and attacks of negativity on them, specially when horrible people like Freud came to destroy their basic, the roots.

And how the West accepted it blindfolded and put them on the path of hell. All that has to be brought out. That is all nonsense, is wrong, absolutely against God, it's anti-God activity. Then you will realise that you will fight fully, by saying, “This is the destruction of our basics, our roots, when our Mother is the source of everything that is sublime, noble, all that is nourishing, all that is elevating, emancipating.

You are cutting us from our roots." When he dealt with, I think, animal-like creatures and he wants all of you to go down to that low level of human beings, which exist as pathological cases, I don't know.

So it is important for you to understand all the attacks that came on you and be alert and don't be identified with anyone of these.

Last I would say you have come to this country to see the roots and not the shoot. Change your attitude of Western style. Telephones are no good. You cannot get any telephones done here. Postage is horrible.

Railways are worst. I shouldn't say because we are in a railway. But, the people are excellent. They know what is Dharma. They are not being attacked, somehow or other because it being the Kuṇḍalinī.

The Gaṇeśha is sitting here how dare anybody attack? This great Maharashtra has got eight Gaṇeśhas, protecting them. I don't know if these Maharashtrians know this fact. And so many Marutis, so who can attack this country? There is no negative attack except that they themselves are rather money-minded sort. That's the only curse they have, if they can get out of it they are great people.

So, we have come to this country not to enjoy the comfort of the West, but the comfort of the Spirit.

So to change your attitude towards India. I don't mean Air India, by any chance. This is a wrong idea that you come by Air India because you are a Sahaja Yogi. Not at all. Air India is nothing to do with Sahaja Yoga. All our railways, all our everything, they have nothing to do with Sahaja Yoga, so far.

So you be patriotic and use your own airlines, for heaven's sake. But when you arrive here you will see that the people are too innocent, they can't understand Freud, you can't talk to them, it's beyond their minds.

They are a higher type of people in this respect now, because they are not attacked, while you are higher in a way that though you are attacked you have come out of it. You have just turned your faces and you are on the other way. That's something great.

So you would also have a confidence there are many people who believe the same way as you believe, in this big country where there's such a big population to support you.

So you shouldn't feel lost.

Thus today, we have to start this Pūjā, on Mahākālī Day. And is the Day of the Gaurī we can say and Gaṇeśh-Gaurī's Day today, though according to the scheduled time it may not be. But according to Me, let us establish within ourself on a subtler level the desire to be pure and to be cleansed out. All the barriers and unclean things that are within us, to desire to be great Sahaja Yogis, desire to be responsible Sahaja Yogis and desire to be surrendered to your Mother. It's not difficult. That is the easiest, the last one is the easiest, because what you surrender, I don't want anything from you, except that you accept My Love. Surrendering just means you open your heart to accept My Love. Give up this ego. That's all and it will work out. I'm sure it's going to work out. I am trying to push Myself into your hearts and I'll definitely settle down there.

[Shri Mataji talks in Marathi: MISSING.] [Shri Mataji talks again in English:] Mahākālī has a special capacity to weep, because She is left-sided. When She's helpless and She cannot act, She weeps. This is the only manifestation of Mahākālī is that She desires and if She doesn't get Her

desire enacted then She just weeps, that's the only thing She can do in helplessness, isn't it. And sometimes when She's full of Love as I've seen you today all of you coming down here and all these people sitting down here. When She cannot express Herself fully, with full heart, also She feels that joy pouring as tears. May God bless you for today's Pūjā, I hope all of you will take it in such a way that the subtlest of subtle will be awakened within you, the sensitivity every way and the Love, which culminates into joy.

Love that flowers into the fragrance of joy will manifest in today's Pūjā.

May God bless you.

Contents: 1982-12-24 **Talk to Sahaja Yogis, Christmas Eve, Pune, Maharashtra, India**

Before we start, the celebrations of the birth of Christ, we have to little bit review what we have done after his Birth, so that we understand where we stand in relation to him. He was the son of a virgin, so that even the slightest blot on his name should not be created. Because he was to do the greatest job of creating for us Āgñyā awareness which would help us to suck in all our sins, all our conditionings and all our egos.

And this great personality was created for such a great work within ourselves. But, unfortunately, we have spoilt both these institutions within us to such an extent that it's the most difficult task to give realisation to Christians.

On the one side we have too much conditioning, as you know, through Catholicism and other ideas about Christianity which created a horrible conditioning in our

superego, which is just like a solid rock, I think, sometimes. And those who have been to Catholic churches still get stuck up with it. I mean, if they are facing Me, I find their eyes are blinking and the Āgñyā is not straight.

You have to give up all that conditioning completely if you have to really get to Sahaj Yog. To that extent we went that we tried to create institutions. Of course, we collected money, no doubt about it, lot of money, all kinds of drama, of a papal order and of archbishop order and all these archbishops and of tomfoolery. All kinds of nonsensical donkey people were created, absolutely. They have nothing to do with the Christ, they have nothing to do with God, they have no idea of Divine Life. And to them prohibiting people from doing something was, only, religion. And this has taken the West into such darkness that Sahaja Yoga has to be worked out in a very great speed and in a very expansive way, otherwise you cannot get over these horrible ideas of archbishops and the bishops and the popes.

The other side is the ego part. Then people like Mr. Freud came in and they put absolutely anti God ideas into people, absolutely anti-God; is against the Mother, against the Son. Absolutely, it is absurd. These anti-God devilish ideas penetrated and people started saying, “What's wrong?", “This is all conditioning, we should remove all conditioning!" So they became ego-oriented, which is the other side which Christ had to work out.

So I mean, after Christ has been established in the West, they have seen to it that they create all hurdles, that are

possible under the sun, for the Āgñyā Chakra to open out.

Despite that, I find that all Sahaja Yogis who are from the West are still attached to Christianity and not to Christ. There is a lingering Christianity still within you and that Christianity has to drop out.

While Indians are very good at dropping out all nonsensical ideas, because we have had lots of challenges in this country for everything: for the conditioning we have had challenges; for the ego-oriented we have had challenges.

So people are used to this kind of a `giving-up'. But in the West, we still are very much attached to that nonsense of Christianity. It has nothing to do with Christ, believe Me! And this fanaticism which is lingering still in your minds must be given up otherwise you do not do any justice to Christ. That by no chance means that you take to another religion like Hinduism or any nonsensical Jainism, or anything.

The essence, the Tattwa, of Christianity is Christ and it is so thickly clouded by all these nonsensical things that you really have to drop out this word `Christianity' from your vocabulary completely and from your mind, otherwise you can never go to that principle. It's a fact, take it from Me. And even now the attention of all the people is on what Christ said, or Mother Mary has said and which has come through these horrible people to us.

So to learn about other Deities and other Great Incarnations, you neutralise this. You must try to neutralise this too much attention by learning about other Deities, say, Śhrī Gaṇeśha. If you talk about Śhrī

Gaṇeśha, he's the essence of Christ. You understand that. Gaṇeśha is the essence of Christ and Christ is the manifestation of Śhrī Gaṇeśha's powers.

So, if you go to the essence-most thing, that's better. Then, of course, Christ is there but we must see him as he is; which very few people have seen before. But now in Sahaja Yoga you should see him as he was. He was the holiest of holy, first of all you accept that position. Then this Freud nonsense has nothing to do [with Christ].

Those who call themselves Christians: five days they do all nonsensical of Freud and sixth day they talk of Christianity and seventh day they go to Church. How can they go? I mean, how can they call themselves Christians? By what standard? Just tell Me! I mean, just think of it! And the Indians have asked them to get out because they won't understand what it is. It's so nonsensical, it's filth. The holiest of the holy, we have brought him down to such a low level by our nonsensical ideas.

So one has to understand that these conditionings of Catholicism made us so repulsive to ourselves that we took to the other side which is even worse, much worse than the conditioning itself. And you come in contact with these people [from] morning till evening. Either they are Freudians or they are so-called Christians; even after realisation! But you must know you are special people. You are above them. You've risen above them. Christ is awakened in you.

So, to do justice to Christ, you must get over all your conditionings, to begin with, of Christianity, if you have any. Or if you have been freudian get rid of that horrible

fellow, absolutely. He was anti-Christ, sick, sick, sick! We have nothing to do with Freud's ideas, even this much, believe Me! We are not to justify him at any point for anything. He took full advantage of the repulsion people developed out of the conditionings. And then he built up all these stories, because he was himself a very low level man; not to be counted as a human being from any standard. You see, Christ came for human beings but not for these low level people. Even the lepers were better than him, I think. Horrible it is! Even to think about the whole thing makes Me [feel] nauseating; it's very unholy.

So, for all practical purposes, we have to understand that we have nothing to do with Mr. Freud. He is filth, he is dirt, he is absolutely a low level man. We have nothing to learn from him nor from his ideas.

Now, the other side of it is the conditioning of the churches. There are still many Sahaja Yogis still confused with it. Of course, if you have to save the Christians, so-called, you have to take them out of the conditioning. Luckily, we have someone who is writing a thesis about these things, how these things are dangerous to society. But still nobody realises this is anti-Christ activity. To condition you is a anti-Christ activity. Christ came on this Earth where Moses has laid down the Dharma; after him, so many years later. He thought people would be in balance and he has to give the message of his resurrection and ascent. That's how he came on Earth. But then they created even worse things than the Shariat. Shariat is in the Bible. All these laws are in the Bible where they say that: anybody who does this thing should be killed, anybody who does like that should be

beheaded. It's all in the Bible. Whatever these Muslims are doing is all in the Bible, it's coming from Bible.

So, to neutralise all that, Mr. Freud started another style.

For us Divine laws are binding because we know that's the only way one can rise. It is not compulsory, but voluntary acceptance that we have to rise, that we have to be alright. There are no conditionings in Sahaja Yoga but this is how we improve, this is how we go further, so we accept the situation and we move forward with it. That's why realisation should give you that strength to fight anti-Christ activities within your mind. You have to face yourself, is the point I am saying. Not only that you have to face yourself, but you have to face the so-called society that is around you and see for yourself that these conditionings and these anti-Christ activities, into which you have indulged, are completely detrimental to your growth and to your ascent. And as you are special people who have got realisation you have to argue it out with yourself and reach proper conclusions. No use arguing out with others.

As you know, with the conditioning, people get quiet, they don't talk, but the conditioning is growing inside. With the ego people they talk too much and they aggress others with their talking and the ego is growing too much.

So one has to be in the witness state. That means wherever you have to talk, you have to talk and wherever you have to keep quiet, you have to keep quiet. This is at the Viśhuddhi level.

At the Āgñyā level, you have to detest all that is ugly, all that is unholy, all that is filth. Because now a new

sensitivity has developed within you, a new sensitivity to holiness, to auspiciousness. Try to improve this auspiciousness within you. I find people get very easily attached to negative people, they get identified with negative people. It's very common. And they think that they have been sympathetic. It is a sympathy they are working in. It could be your sister, could be your brother, mother, or could be your wife, your child. It can be anyone. But by getting attached to such people, you are really harming that person because that person will go down to hell and you will also go down to hell.

So if you want to do any good to the person, best thing is not to be attached to that person and tell that person that these are anti-Christ activities. And get attached to that group which is positive, which is doing auspicious work, which is doing holy work. And understand that the strength lies in getting attached to that group than getting attached to one, some singled-out, negative personality.

Now, every one of you has had some experience of this. I'll give you an example of Warren's wife, she's not here, neither he is here. But it's nice to understand what happened, in her case. He was very attached to her. He married her. He asked Me. I was really shocked that he's so insensitive, “Why can't he see her? Why can't he understand her?" But I did not know what to say now. I said, if I say, `Don't marry,' he will think that Mother is trying to force him down or something. I did know what to say but I was really shocked and for about two minutes, I didn't say anything. And she also played her cards very well. And I said, “Alright, you can marry. You'll

get happiness. If you think you can get happiness” that's all. I didn't say `joy'. “If you think you can get happiness, marry him." Now she got married to him. Then he said she must come with him to England. He brought her. He tried to avoid. I told him “Warren be careful." Then they lost their passports. He found his passport, she did not. But he got after My life, he said, “Please ask Mr. Srivastava.

Somehow get her passport. Passport should be there." I said, “Alright." Then they made her passport. Then she came with Me. Still she was continuing. I told that, “Please send away this lady. I don't want her to be with Me. It's a headache. All the 24 hours she is with Me. I must have some time without these horrible bhoots around Me. Please get rid of her, she is bad." But he couldn't understand it. Still he was siding with her. Then one day it happened that she attacked My heart. The heart got into a big fist. I said, “Now you put hand on My heart and see it” it was throbbing like anything. He couldn't put his hand, couldn't even bring it near it. I said, “Now please ask her to get down." Then she got down and it stopped. Then he realised this is the thing. But still he did not give her up, he did not give her up. I went to Los Angeles, everywhere she followed Me. The sympathy, you see. She could have gone away, she was quite a robust lady, no problem.

But in Los Angeles, then she started showing her teeth to him, gradually. And then, ultimately, he got into trouble. He started getting the pains. But as soon as I left Los Angeles, she got her epilepsy. And he realised how dangerous it was to carry her all the time with Me. Now

he can't send her away because she has epilepsy, so he took her back. She tried to disrupt all the ashram by telling them her sympathy story, “Oh, you know, my husband, he wants to leave me” this, that, nonsense and all of them fell for it.

Now, she's a bhoot and a bhoot and a bhoot; and the bhoot started increasing. One more bhoot added [for] sympathy you give them, one more bhoot added, once you give her sympathy. One more bhoot added.

And she was creating problems, “This is not good, he is not good, he is against me. This family is against me. That is against me." Then he got heart attack, Terrence got heart attack, that's it.

So then he sent her away. Now you do not repeat all that nonsense.

Negativity is not to be tolerated, nor to be carried on with. Discretion is the better part of valor.

One need not be afraid, but discretion is better part of valor. Alright? If you have negativity, better get rid of it. If somebody is so negative, better have nothing to do with that person, whatever may be the relationship. Just have nothing to do with them. Because no use going down. If you are a seeker, you are a responsible seeker and a Sahaja Yogi, one has to be careful.

This is on a Christmas day, I have to say, because there only the fight starts, at the Āgñyā Chakra.

Because if you shift from the principle of Christ you start giving argument in support of the negativity, always, in the opposite direction. Alright? And you have all the arguments which works against Christ. The same Āgñyā

Chakra, when it goes funny, you start seeing things [as] very reasonable which are absolutely false and wrong.

So we have to be alert.

We have to be with Christ. Now, they will say, also, about getting vibrations, “Mother, alright. I am also very much there. It's true, we saw the vibrations." Nothing doing! I feel embarrassed.

Sometimes I do not tell [but] I feel embarrassed. And people also try to manoeuvre Me by playing tricks on Me, so that I am rather worried, sometimes, how to tell people. Because I have seen ego-oriented people are extremely sensitive. Now they are not arrogant, that's one thing is there, but they are extremely sensitive. And if you tell them anything they will not accept. Like yesterday, I lashed all the Poona people, they said, “It was for our good." Nobody said that, “Mother why did you say such and such thing?" No, Not one word.

Everybody said, “It was for our good." But in the West if you lash them, then you will be lashed. Nobody is going to take it that way.

So I have to tell you one thing to have your ego problems settled, first of all, see that you are not playing to your ego. And also, to see your conditioning which are now bhoots, all these conditionings have become bhoots in you. All the Church bhoots have got into your heads. They are all there.

So you must see that these bhoots are not there because we have to be holy, we have to be clean, we have to be resurrected.

We are resurrected people, Christ has resurrected us. But you have to think how much he has to work for us. The more you try to be in unison with negativity, we harm him more, we torture him more, we trouble him more. The one who was born in the manger in the most difficult circumstances. Where everybody requires comfort, who was from the very beginning, went through hazardous life till his death. His birth itself, you can see, was in a cowshed. None of you are born in a cowshed. And while the Christians are so particular about comforts, most surprising is, while Christ was born in a cowshed. In a very, very cold night Christ was born. Nothing much to cover: sparkling, beauty it was.

Now we have to keep him, within ourselves, comfortable. We are not going to give him that manger in our Āgñyā Chakra. Manger of thoughts and a crown of thoughts, that we are not going to give him.

We are going to make him comfortable by not accepting negativity as a sympathy. You have to be kind towards your auspiciousness and holiness so that Christ enjoys his stay there in your Āgñyā, that we do not torture him by our useless ideas, uncomfortable behaviours, inauspicious appearances and unholy acceptance of wrong ideas.

Try to respect Him. There he stands, try to make him very comfortable. I wish I could do that but he resides in everybody's Āgñyā Chakra. If he was only in My Āgñyā I would have given him the greatest comfort. But he wants to be manifested in everybody's Āgñyā.

So I have to request you, as a Mother, to look after him. Give him a nice cradle, give him a comfortable time

because he's born to give you your resurrection. He's taken up such a great responsibility to suck all your conditioning and to suck all your ego, but that does not mean that you put stones on top of him.

It's like, sometimes I find the conditioning of some of the people in the West is so great that a big mountain is falling on this little child. And sometimes I find a bad breath, horrible breath of ego, which stinks, blowing like a big wind towards him and a horrible stink coming out of this terrible type of a ego which is absolutely not the way to treat the King of Kings who is born within you. You are so respected that Christ is born within your Āgñyā but you must respect your Āgñyā Chakra. Your attention should be in the center so there's no wobbliness. Imagine put a child, like they say, a child is to put on the winds.

So this Āgñyā Chakra is to be kept very clean, healthy and holy. The attention should be holy. The attention outside is still not very holy, should be detached attention. If you start seeing through your Āgñyā it should project a power of holiness so that anybody who looks at your eyes should know that serenity is flowing from these eyes and not lust and greed and aggression. All this we can achieve because we've got Christ within our Āgñyā. Accept him there. He's born, let him grow. I am sure Sahaja Yogis will understand the importance of the Āgñyā Chakra.

In the East [it's] no problem because to them he is only Gaṇeśha. Gaṇeśha is a child and they know for definite [that] the childhood has no contaminations, no problems, nothing.

So they are still children as far as sin is concerned. There is a story: one pastor went to a village and gave a big lecture to them and the villagers had to thank.

So he got up and he said, “Thank you very much for telling us all about it, we did not know what was sin and thank God you have told us that there is sin!" So this awareness is not in their heads, they don't understand it. You will be surprised, you can't outdo Indians. They won't understand what it means. They may say it's Freud, this, that, but they don't understand [because] it is so anti-God. Actually I did not know till the other day, when Rustom told Me, with great hesitation, what it means, really.

So that is what it is and we have to understand this.

Today is the great day of holiness. Let us celebrate the birth of Christ in our Āgñyā Chakra. And let us sing praise of him so that he, in his pure essence, in his holy body, he should be there. Not Christianity and neither Freudian nonsense. Christianity is equally bad as Freud. There is no difference, I find. Whether you kill the child with the mountains falling on him or with a horrible stinky, dirty-smelling breeze blowing on him, it's just the same.

So please get rid of both the ideas, absolutely. And in purity you respect him.

Absolutely in purity, because he is purity.

Now you may say that, “Mother if he is purity...", there are some stupid people who ask Me, “... if he's purity, then how can we make him impure?" But, I mean, if you do not respect him, why will he be there? He will disappear. He likes purity. He will disappear from there! It is not good for you.

So better create a cradle, a beautiful cradle, of love, of honesty, as his Mother prepared for Him, with all sweetness and kindness and assurance that you will nurture the beauty and the auspiciousness of Christ.

May God bless you all.

You can sing. After food we will have a bonfire here and then we can sing a nice some carols, till twelve o'clock and then our great friend who is here, Mehrotra, he has decided to give you some cakes and tea, we'll have some cakes and tea and then you can sleep off. And tomorrow morning, as I told you, is the celebration of his birth, in a full way, by all the people. Not only by you but by Indians and other people who are here. We all have to celebrate. It's a very great thing. And unless and until you show the signs of holiness and auspiciousness Indians are not going to be impressed by him, I can tell you this much, not going to be impressed. They can't understand these pastors coming here and these padres telling them about Christ, they just cannot believe it, how can he be like that.

There's another interesting story: once there was a fellow from a village: so his name was Bura, means a blondie and he came and they said, “You become a Christian” So he said, “Oh, I'll become a Christian." He made him a Christian. He said, “We have to change the name” he said, “But my name is blondie." He said, “Alright, we'll give you another name." He called him `Alexander'.

So his name was Mr. Blondie Alexander, Bura Alexander. Now this Bura Alexander used to come to Allahabad where always he would go and have his bath in the river Ganges.

So the pastor said, “Now you can't do it. Now you are a Christian you can't go and have a bath in the river Ganges." He said, “Why? I have become a Sahib, I have become an Englishman now but I have not given up my religion." In his own language he said, “I have not given up my religion. It's alright, I know the river Ganges is my Mother and She has got vibrations.

I am not going to give up that. Of course, I have become a `Sahib' now. I have become an Englishman." So that's the idea they had about Christianity.

Any questions you have, you can ask Me and then the food is ready, you better go and have your food.

Alexander: When I am in thoughtless awareness, I can't see clearly.

Shri Mataji: I think you must be seeing more than what you seen normally! Alexander is correct.

When you are thoughtlessly aware your eyes, the pupils, are dilated. It's correct. But you [must] take it higher, the Kuṇḍalinī, slightly higher. Push it up. Alright? If Kuṇḍalinī is staying at thoughtless awareness means just dilated and the eyes can become black, but there's no sparkle. But when it comes out [above Sahasrāra], then you find a sparkle in the eyes; there is a difference in the eyes, if you see. The eyes get dilated, the pupils get dilated, when the Āgñyā Chakra is being just penetrated and still here it is, then you can't see clearly. Correct. But at thoughtless awareness is all this part [Āgñyā and above].

So if you push it, little up, higher, you know how to push Kuṇḍalinī with your attention, or you watch here [Sahasrāra], or you think of Me, Kuṇḍalinī will go up.

Alright? So thoughtless awareness is just the beginning. And it's a great area, up to this point, up to Śhrī Kṛiṣhṇa point, where you become the witness. From the witness point, when you become, then there is a sparkle in your eyes, your eyes sparkle. And the sparkle in the eyes is a sign that Kuṇḍalinī is flowing well. That time you see more than you see normally. I mean the stars start looking bigger, everything starts looking much clearer. Alright? Better now. It's correct, dilatation of the pupil takes place.

Some people really at that time have opened their eyes and they said, “Oh we have become blind." That's true.

It happens. It's correct. Alright, now what else? It's a good question....

Sahaja Yogi: Mother, is there any relation between the numbers 888 and Christ?

Shri Mataji: 888? There could be. But what is the relationship you have found out?

Sahaja Yogi: Many years ago I was looking at the Hebrew Kabbalah and they had a system of different numbers that they combine.

Shri Mataji: That is [OK]. That they must be having 888 is alright. Because, you see, their Chakras don't move in six form. That is that they should move, but they move in 888 because the 8 we don't have any Chakra, so they are on the sides. They are on the left side, Kabbalah is on the left side, so they work it out from 8, means from the outside. 7, 3, 4 are in the center. Now at the 6th point, if you have 666, means absolutely both the Swādhiṣhṭhāna on both the sides you occupy. And also in the center, so you hit all these three, that's why this number is not

good. And 888, you go onto left Swādhiṣhṭhāna more and use your Mūlādhāra, it works out with Mūlādhāra. It's a funny one, because 4 into 2 is 8, alright? And 4 into 2 comes where your 4 is Mūlādhāra. Instead of going to Swādhiṣhṭhāna, you just combine Āgñyā and Mūlādhāra, in such a way that you go outside. Alright? So you put your Āgñyā, is two, from 2 you move this side. That's how it is. Kabbalah is a very dangerous thing, one should never try. Then you start seeing things, future and all that, isn't it? That's not a good thing at all.

So, for us, the number is 7, 3, is the best number, 7 and 3 number.

What else?

Sahaja Yogi: I would like to pick up on Alexander's question. Now I can see longer distance than I used to, does that have something to do with Āgñyā?

Shri Mataji: Yes, yes of course. I mean, Āgñyā is very important and best way is to take your Kuṇḍalinī up. Don't roam about in Āgñyā, it's very dangerous. You can be thrown as he said on the 4, 4, 4 side, or you can go this side 6, 6, 6, 6. It works out 6, 6, 6, 6 this side and 4, 4, 4, 4 this side, it's dangerous. Never go. [With] Āgñyā you should be very careful. You should never roam about in Āgñyā because it's thrown out, the attention is thrown out, projected. You start seeing things; all problematic, very problematic.

Try to take your Kuṇḍalinī out all the time. See that it's coming out. Put your attention there. And the best is, now, is to put your attention to Me, because I am at Sahasrāra. And don't allow your Kuṇḍalinī to remain in Āgñyā part; it's dangerous, no doubt. You have become

subtler and you can start moving left and right if you want to and if you try to.

Any other question? Robert Ruigrok: I don't understand one thing: that is the connection of images like are described in certain books and our thoughtless state.

Shri Mataji: Alright, I'll tell you. If you start closing your eyes, say you are sleepy and you start seeing images at that time. That means you are going on to the left side, they are dead bodies, you start seeing their faces, this, that, you are going to the left side. Now supposing you start seeing lights and stars and this and that, all sorts of things, I mean, more the colours, we should say, you are moving on the right hand side.

So try to avoid it. `Just I don't want it,' you should say. And you try to put your Āgñyā, if it is left, you put it to your right side or if it is right, just by pushing it. Like this and like that. But what happens that, after some time, when you have achieved a certain state of higher consciousness then, if you want, you can penetrate into these areas, you can see all these things. But then certain different types of things you see, for example, you might see from My Sahasrāra, huge, big these valayas coming out, or something like that. That's a different point altogether. And also sometimes you might see a little flame, that's a good sign, that means somebody's guiding you. But you have to be careful not to indulge into these things because there is a guidance for you and you are all followed by great Deities, no doubt, but you should not try to hanker after that. If they are there, let it be, because your Āgñyā is very important.

You should not allow your Āgñyā to be attracted by these things. You might just find a flame, like that.

Sometime you might just find a little dot: standing dot. They are all actually angels who are with you and trying to assure you. But that's not important. What is important is, on your way, you should go further and do not go this side or that side.

But if you are seeing every day those images then try to push it back, or this way, whichever way it is and try to finish them so that you go further. That means you are sticking on to the same point or you are moving in the other direction on the sides. Because direction should be further and further and further.

Alexander: How should we protect our subconscious as we cannot be conscious about it?

Shri Mataji: You need not. I mean, you don't have to worry! You just keep to the conscious. Alright? You don't protect anything, actually you don't do anything! Actually, if you see; what do you do? Alexander: We are just enjoying!

Shri Mataji: Yes, just enjoy. That's the best part. Just enjoy! Just I want you to enjoy. Don't create problems for yourself that's all and just enjoy. Alright? Just don't create problems for yourself.

Don't be ambitious. Don't be aggressive. And don't be, I mean that's rarely so, but [don't be] submissive too much to others. That's rarely so. But be submissive to Sahaja Yoga. Be surrendered to Sahaj Yog.

I would like to know who are the people from Perth [Australia], give Me your names.

[Shri Mataji continues to ask for the names of all the people who are seeing her for the first time in person, mostly from Australia. She then continues with informal conversation and discussion about the tour.]

Contents: 1982-12-25 **Christmas Pūjā, Pune, Maharashtra, India**

Today we are celebrating birth of Christ, which was a very big event in the realm of human awareness. As you know that he is born in the Āgñyā Chakra and he sucked the ego and superego that is the condition within us and our ego. Such a great happening has taken place, about 2,000 years back. But today is the time for us to use utilize that great advent on this earth. To understand Christ first of all we have to know that he was just nothing but Omkāra. He was just made of vibrations and that is why he was resurrected. And he was detached because of his very nature and so we too have to understand that we have to be detached first from our thoughts and that as you know is achieved if you know how to forgive others. There is this very subtle attachments people have that those who are born in the Christian religion think that Christ is their own and that he resides in their pocket. On the contrary it is just the other way round. That he has nothing to do with them and he is against them. As Christ has said you will be calling me Christ Christ and I will not know you.

So it is important that Christians should never think that Christ is our own and that he is our because all your life you have lived like Christians. Actually you have not; you have not lived like Christians.

So those who have not lived like Christians only have taken the name of Christianity are not in the real sense the people who follow Christ.

So now we have to change ourselves and follow him in our life. Unless and until we imbibe him in our lives we have not understood the greatness of his advent. Just because we are Christians or so-called Christians to believe, we have much to do about him and to be identified with him is absolutely wrong and that is what I want you before that we have to imbibe all his qualities. It was a living example of a very great advent that he came on this earth and led such a pure and holy life. Try to develop your purity and holiness and a powerful holiness and a powerful auspiciousness which does not get contaminated, but fights whatever is anti-God whatever is antichrist.

So today is the day when we are celebrating his birthday again and on this day let him be born within us let him be born in our character, in our behaviour, in our temperament.

He was a detached man, not attached to material things, nothing of the kind; he lived like a carpenter's son, in a very uncomfortable life, absolutely. And he never bothered about small things of life. Actually you know a carpenters house is one of the most dangerous place to live in because you have all kinds of nails, you have all kinds of funny types of instruments that you use. Any day you can step along on to anything and can get hurt and there is hardly any place where you can sleep, the whole place is filled with wood and the people mostly sleep on wood, but just the other way round. The so-called

Christians are so particular about our comfort and it is very easy for us to condemn others it is very easy, it is something so absurd, I mean it is so absurd, you see anything they will go say to a market place oh it is horrid they will go some place they will say that's bad. What about you? What is within yourself? Just see within yourself. And this is the thing we have to develop now. We have to cleanse our self from within. You have to be uncomfortable with yourself not in with out. You have to be uncomfortable with what bad things we have within ourselves and not from without. Take your attention from outside inward as Christ lived a life which was inward. He was not living outside. He was living inside himself and that is what we have to today understand, on this day that our new birth should take us inward. Our worry should be for our inward comfort and not for outward comfort. Like yesterday, if you didn't like the picture, it is a good sign that you can't live with dirt and filth. But that is still outside. But what about the inward dirt and filth, what about the inward thoughts that are contaminating us what about the silly ideas that are still in our head, take them away, throw them away and be again born like a lotus like Christ, who all his life lived like this died for us and was resurrected.

So we have such a great example to be imbibed within ourselves in our character in our lives. This is I am saying again and again because we really get confused.

We think if we have a sort of a passport, we are alright, no that is not simple. It is the becoming within yourself of Christ like behaviour. And the greatest of all is forgiving, the forgiveness which is so lacking in us. You see, unless

and until we develop that this ego has to go away. If you have to be Christians, you have to be egoless and that is what one has to understand that when we talk of Christ birth such a beautiful time, though he was born in complete discomfort. He could have born in a king's place, he could have born anywhere but why he did it? Because he knew that when Christians will come they will select the best beds for themselves, the best houses for themselves and little bit here and there they won't tolerate. They will be shouting for little things, like the carpet is spoiled this is spoiled that is spoiled. It is so low minded.

So for you it is important that you must rise higher. Higher and see how he was born in a manger, in such a uncomfortable place where there were all kinds of cows and cow dung and everything was spread there and he just didn't bother. He just got his birth in a place which you would not like to even visit or to sit there. And the mother cleaned the whole thing for him and he was born there a sparkling star of the heavens, to cleanse. Because if you are clean, you clean others.

So this today, the great day of his advent let us celebrate in this great country of Yoga specially this Bhūmī of Poona which is the Puṇya Bhūmi that auspiciousness, the holiness and the complete detached temperament of Christ you are going to imbibe within ourselves and we are going to live like real followers of Christ and his life.

Today we are Sahaja Yogis so you have no cars, no customs, you have no religion now. Now you have only one universal religion that is Sahaja Yoga.

Christ is worshipped everybody worships Christ because he came not for one person, two person or ten persons but those who worship him must express his character, his life, the materialist how can they talk of Christ I just can't understand because there was no material thing in his body. He had no matter in him.

He was just vibration. That is how he walked on the water, so how can materialist ever claim anything about Christ I can't understand. This is the problem one faces when one sees how we juxtaposition of what we proclaim. Now this is the part which we have to achieve and once you achieve it, you will be amazed that God looks after you. How a flower flourishes in the wilderness, how it gets its water, how it is looked after how it is so beautiful. It is not bothered in the same way when you become that beautiful being which is the spirit you are looked after. You get all the blessings, all the joy because the source of joy is that absolutely. But when you cover it with your ego that joy will get away, so just try to clean that ego somehow see your ego how much ego still you are there, you get out. Take it out with affection, with kindness towards yourself and towards others, try to rise, rise higher and higher into that realm which Christ has created for us in the limbic area where it is the kingdom of God.

May God bless you all that you follow his life and you imbibe all his quality within yourself and also your mother and I am here to teach all these things and to tell you how to do it. And you have to see to it. How I am detached in the same way try to be detached. You try to please Me by giving Me this and that but you know I am a

very detached person, I don't understand it attachment I don't understand attachment and I just sometimes smile at people when they try to say Mother we would like to give you this and that alright give but I am not attached. I cannot get attached there is nothing within Me that gets stick on to anything, nothing, I am just a moving force of Kuṇḍalinī, how can I stick on anyone. I am just moving all the time so it is not possible for Me to get attached to anything. In the same way, you just get inside this force and move with Me and just forget about all the rest of the things which stop your progress. You must progress with dignity, you must rise. I am sure it is going to happen. This time the people have been very sensible, they have been least critical, though some are still like that like that but most of them have been very sweet and very dignified and the collective is good and I am very happy that the people are being so well in this program. I am very happy May God Bless you.

[The Pūjā starts.] The mantras should be in rhythm.

Today is the day which is called the ekadashi means the eleventh day of the moon and the name of this special 11th day is ekadashi but we have different ekadashis but today's ekadashi is called as Mokshada the one which is the giver of Moksha. See what a Sahaja [GAP]... that on the day of Christ is Mokshada and now you will know why I did not celebrate it yesterday, alright I don't see Pañchang but I know everything.

From Europe, you washed it. You are not from Europe. Now who is from Europe, come along.

Englebert you come, one person who has not done it, alright, now who else come along. Now from England.

You have not done Belgium, but we want somebody, alright come along come along. Wash.

Now we get one lady from Australia. Australia within someone. One lady who has not washed, alright now wash both of you. Wash My feet, rub it, rub it hard, rub it hard.

[In Marathi:] See shivayoge Mokshada ekadashi, what else do you want. Did you understand? [In English:] Today's day is such a great day that very auspicious.

Sahaja Yogi: They should repeat.

[Pūjā continues.] [Aside:] Good, alright, may God bless you.

England. Here is Allan. England. We have done Europe, alright. Now England. Mary you sit down at your level because nobody can see at your back. You have to sit at your own level. Don't just stand up alright, now who is that, from England. John Watkinson and Cathy come along.

[Pūjā continues.] [In Marathi:] Distribute the water everywhere around all the corners.

Give him the translation to read, the Australian where is he? Warren or anyone. Why don't you come? Let him read, behind.

Now he will say, now give him, 2-3 persons can read. You can also read with them.

After this now, [In English:] Gregoire has got some names, could you please, no you haven't got.

Warren: 108 names of Lord Jesus Christ Mother which recently came from London I think Patricia might have a copy.

Shri Mataji: Patricia have you got this. Now you have got the eight names of the Goddess which you always say. Those eight names have you got them

Sahaja Yogi: 108.

Shri Mataji [in Marathi]: You say the names. You hold this; you hold this, see to it that your hand doesn't go inside. Now take the yoghurt. In the last sugar. Give everyone, the Pañchamṛut. Ask for water and ghee. Did you ask for the milk? Keep adding the yogurt.

Sahaja Yogi [in English]: Shri Mataji we have the names of the Virgin Mary in Latin which Gregoire prepared we also have the English names of the lord Jesus Christ.

Shri Mataji: Alright you say that then we will say the names of the Goddess.

Sahaja Yogi: Would like to read the Virgin's names.

Shri Mataji: Alright. come along Gregoire come along. In Latin is good, Latin is Sanskrit. It has the same effect. You see when Latin became holy became Sanskrit.

Spirita sancta they have said that you see.

[In Marathi:] Ādi Shakti they said to the Devī.

[In English:] You read in Latin the vibrations flow.

Sahaja Yogi: To he who is conceived in the heart of Shri Mataji.

Shri Mataji: Created by Śhrī Rādhā.

Sahaja Yogi: To he whose mother is Jashoda.

Shri Mataji: No no, Śhrī Rādhā.

[In Marathi:] Now say the Mahālakṣhmī stotra. First call the unmarried ladies and then the married.

[In English:] Unmarried ladies about 4-5-7 should be there. I mean unmarried girls.

Now we shall start with the Śhrī Sūkta, then sing.

Please sing Śhrī Sūkta.

[In English:] Have you got the 108 names? Lalitā Sahasrānam, have you got that. Alright you know it in Sanskrit. Do you have it? All of you have to read it. Come along, go ahead. We are going to read and you all are going to follow. Have you got it? These are selected 108 names. Say those. Give him, along with translation.

[In Marathi:] Now call the married ladies. Seven married women.

[In English:] From the foreigners, the sari from. You know.

[In Hindi:] You all sit down now, when required will call you. When there is some work for you then will call you. There is work again and again. Women are also Brahmins, without them the Pūjā of Mother will not be complete.

[In Marathi:] Is the Mr. Jadhav here who wanted to play the music? He was going to play shehnai what happened. Mr. Mane what happened, we had asked for him, why did he not come. Ask Gaikwad, I had told him to come today. Has not arrived yet, must call him. How did he not come, I had asked him to come? If someone knows his house, send somebody to collect him. He had said that Shri Mataji I will come. You might not have told him. Go bring him.

Today something special, [in English:] I never take two saris at a time. But I think it is a tremendous day today. Mokshada, everyone should stay in meditation.

You must keep in meditative mood. When all this is happening just keep in meditative mood because all the centers are being getting decorated all the powers are being decorated so you have to be in meditative mood so that you receive you see, the blessings on your center. It is very cooling and nice, alright. Be in meditative mood.

Not like that 4 and a half, like fighting the bhoots. Please be seated now. After the Ār.ti, you can take My photograph.

[In Hindi:] Please go for five minutes in meditation.

[In English:] Go into meditation for five minutes. Very deep silence. Close your eyes.

[In Marathi:] Eternal Blessings.

[In English:] May God bless you all.

***Contents: 1982-12-26*, Public Program, Lions Club International, Pune, Maharashtra, India**

The organizers of Lion Club, the members of Lion Club and the seekers of truth who are lions and otherwise. The name `lion' has come to us since long. In this country, lion has been respected as the King of the Forest. And this King of the Forest is the one who has that dignity, that sense of authority and benevolence which is expected of a king like a lion.

I'm very fortunate that you have given Me this chance to talk to so many lions today and I'm extremely grateful to all the organizers that they have found time for Me. I've been following the working of Lion Club, though I have

not been a member of any club like that, to find out what are the principles on which this club has been formed. As it is, it is human nature to club together. Clubbing together comes to us from the unconscious force of which we are not aware. When the unconscious force, which tries to make us form groups, to form certain collective organizations, which work out for the good of the collective.

So, person like Jung, who was a disciple of Freud to begin with and who revolted against him later on, said that “There is a universal unconscious within us." And the universal unconscious, he tried to prove with the help of dreams. He found out that in the dreams, he get symbols which are of universal nature.

And these dreams, when they are depicted, it is found out that they have the same message whether you dream it in Japan or in America or in India.

So there is some sort of an area within us which is unconscious, means it is not in our conscious mind, in our central nervous system which guides us as to what is wrong and what is right.

So we can say, in a way, that Jung has created that stage for us.

Now this country of ours, this great Yoga Bhūmi of ours, has been working it out since long to find out about the inner side of human being. The reason, I think, is this that in the West the life, every day to day life, is really very difficult. For example, if you have to go out of the house in London, you have to get ready fifteen minutes ahead. You have to wear your shoes. You have to wear your socks. You have to wear at least one sweater and a coat

and something to cover your head. And then you have to rush into your car or whatever you have to do, it has to be done very carefully. All the time you feel that the climate around is just trying to overpower. While in this country of ours, the life is much easy. The atmosphere is much easy. You can walk about without much clothing. You can live under a tree also with great satisfaction.

There is no problem of the weather. First I didn't understand when the English started saying “Good morning! Good evening!" What it means? But now, in London, when I went there I realised it has a big meaning.

So, for us it was such a blessing that we had an atmosphere which we did not have to fight.

So, then people had time to find out about the inner side of life.

To find out the inner side of life, they went into the, you can say, into forest or on to Himālayas or all to these places of seclusion where they could devote some time to find out what's within us. Now this is the knowledge of the roots. While in the West, all the knowledge of science and all the knowledge about outside is about the shoot. When the shoot is obviously there, we can see it so clearly. It's apparently existing. It's very easy to deal with the shoot. And so it is very easy to believe that the shoot is there and it is growing and it has a function. It has a different, we can say, different forms. In the same way, about science we can say that whatever we seek, whatever we find out, is there. But science cannot explain many things. First of all, it cannot explain universal love. It cannot explain. It does not believe in it.

Science has decided not to believe in certain things which they cannot explain. But there is universal love. Out of this universal unconscious love only we create these clubs. Even United Nations also has come out of that force which is unconscious, that we have created these things to be benevolent to others.

Now this unconscious force is within us. Actually God is love and love is God. But our idea of love is very limited. Because we are limited. We have not reached that state of unlimited. Our mind is limited.

We think in a limited way.

So far as we love our children, we love our family, we love our parents or we love our country. Like that it goes on expanding. But it is not a limited thing.

So what is that love which is really universal? We should try to find out. This love is the one, is the power, which is called as the Holy Ghost. It's called as the Ādi Shakti, or they say it's Rūh. In Koran, it's called as Rūh.

This power is All-pervading Power. It's called as Chaitanya and is described as Saundayra Lahari by Ādi Shañkarāchārya. Everybody has described it. Whether it is Lao Tze or it is, we can say, Zen system or any system which has still survived has described this as the Brahm or we can call the power of God which is all-pervading. But as human beings, we cannot feel it. We may feel the force of it. We may work because of it. Like Lion Club is one of the, we can say, the sprouting of that love. But this love, which is acting, which is manifesting, we cannot feel it.

Now where does it manifest? It manifests everywhere. Like a flower becomes a fruit. How does it become?

Nobody can say. No scientist can say. If you have to, say, sprout a seed, you have to put it in the Mother Earth.

So the Mother Earth has that love by which she sprouts it. It's a living force. And the living force is not understood unless and until we become one with that universal force which is all-pervading.

This is all around us but it's a big belief. People talk about it: “You have to become. You have to be reborn. You have to become Self-realised. You have to know God." It's all talk, talk, talk, talk, talk. And so far, it has not worked out on en masse scale. Only a few people got it. They were called as saints, *[UNCLEAR]*, they were in a... as Christ and other great people came on this earth. And today is a great day of the birth of Christ. I would say it was Christ who brought this message to us that “You have to be born again." He Himself in His resurrection has shown that something has to happen to us.

Even Mohammed Sāb had said that when there will be the time of resurrections, your hands will speak.

Clearly He said it. But what it means, nobody has tried to find out. We go on singing the praise. We go on saying the thing like “*[UNCLEAR* Prayer of 30-40 words in Sanskrit]." Then where is it? Why don't we find it out? So, to find it out, to know about it, there has been no curiosity. Just like scientist, we had said, “All right. We will sing the song. We'll do the bhajans." Finished.

But all these great saints came on this earth with one purpose, to begin with, that they should give a balance to human beings. And this balancing force is within us, again. We call it as Dharma. You may call it by any name but it is the sustenance, or you can say, it is the

balancing of human beings. As you know that in the matter there are valencies up to eight only. Carbon has valency of four. And some carbon, the human, we can say, the livings, living beings started and we have come out of that carbon, that beginning started with carbon, from four valencies. Now it has reached to ten valencies we have when we are human beings. Now if something is missing in these ten valencies, we get imbalanced. And we then form some sort of a compound with a negative or a positive force and we become little abnormal human beings. We are no more normal people. For example, we can say that we had people who were very ambitious.

So ambitious that they lost certain balance within themselves. When they lost that balance, they could be charmed by people like Hitler. And when Hitler combined with them that funny type of an idea, that their race was a very special one and they have a right to kill all other races, a combination of a very Satanic idea started building up with human beings. And then human beings became so Satanic that they can't believe it. And even now, they say that it was a political mistake. I do not say it's a political mistake. It was an imbalance.

So, we call this in Sahaja Yoga the imbalance of the right side. And there could be the imbalance of the left side. Where people are too emotional and start becoming, you see, suppressed by others. They take suppression from others and become slavish. That type of another left-sided behaviour could be there also in human beings.

So, this religion was given to us by these prophets just to give us strength, to have our valencies, to have our sustenance, to be in complete balance. But then a

question can be asked, “Why balance? For what?" Even, “Why balance? Why to have a balance life? What is the need to have this balance? And all your life, you struggle to have balance for nothing at all?" It's not so. Now you have seen that in our lifetime, we have seen people are going shooting out to moon. And when they are shooting out to moon, somebody must be going to the spirit also. Because if there is a growth of the shoot [GAP of 3 seconds] and that, then the question “Why Self-realisation?" will be solved.

Sahaja, `saha' means with, `ja' means born. It's spontaneous. It's with you. As your nose is with you, as eyes, everything we take for granted, we have this spontaneous method of uniting with God Almighty or this Divine Power built in within us, which is a living force, which is lying within us. Now this force is the Kuṇḍalinī. It's a force lying in the triangular bone. And it resides there.

Sometimes in the course of Sahaja Yoga practices, you can see the pulsation in people where there is a problem of it's ascent or there is a *[UNCLEAR* blockade]. You can see this Kuṇḍalinī just behaving like a heart and pulsating in the stethoscope. You can feel one by one on the centers the way it stops. You can even feel here on the head, on this fontanelle bone area which we call as Tālu in Sanskrit language, a kind of a throbbing in the beginning and then the throbbing disappears. And then you start feeling a kind of a Cool Breeze from your hands. Now this happening is a living happening. You can't do it. You can jump. You can dance.

All sorts of things these Gurus teach you, all that you believe in. But that you can't do. Everything can be done but for this that you feel the Cool Breeze coming out of your head.

Like *[UNCLEAR]* has clearly said *[UNCLEAR]*. Now, these people were not false people. They were not trying to cheat us. Why did they say this? So we should try to see also what is behind this knowledge.

We should not be only satisfied with the Western knowledge. That is one of the things our intellectuals and educated people are doing because we have had nothing but this Western knowledge so far. We must turn back and see what do we have. We are in trust of this great knowledge that is in our country, which is now in the hands of some very bad people, we can say, Western interest people, who are trying to use it for wrong purpose. Of course Kuṇḍalinī rising cannot be used for wrong purpose. Because you cannot make the Kuṇḍalinī rise unless and until you are the right type of a person. But people who know about it, can talk about it, try to do some sort of a nasty thing, try to harm you and call themselves to be great Sādhus and saints. But actually everyone of you has a power to become the spirit. Everyone of you, as long as you are a human being, it can happen to you. Once you become the spirit, you are amazed that this starts flowing. Then the universal love, real universal love starts flowing.

Now, as you must have heard that I've cured some people, they will tell you. Actually I have not done anything like that. I've not cured anyone. I cured Myself. Because: who is the other? Because everything is within

Myself. If I cure Myself, if I feel the pain in this finger and I cure My finger then I'm curing Myself. But that finger is actually say this thing to Me that this gentleman has this problem, but to Me, he is not the other.

So in universal love, you do not think it mentally. It's not a mental projection, `Oh, he's very poor. You must help. Oh, he is very much suffering. You must do something about it.' It just flows. It just works. It's not mental. It's beyond mental. It's what you call unlimited love. It just flows and works out. You don't have to think about it, `Oh, I must help this man.' Actually this might build up your ego.

And most of the social workers, you know, are terribly ego-oriented, terribly ego-oriented. You have to keep away from them because they can be so ego-oriented. I've seen one lady. I shouldn't name her but she's got a very big position in social work. But I've seen her jumping with *[UNCLEAR* temper] from here to there and there to there for a little thing like that. I was amazed. How can this lady be given some sort of a prize for peace and thing and she's so hot tempered. There is no love in her. This is such a hot tempered lady. And she is just building up her ego. And she is trying to do some sort of work which, she thinks, is helping people.

We must understand that this power resides within us. Holy thing we should try to exploit. We should try to work it out. That this power of our spirit should... We don't have to argue with anyone. We don't have to say anything about it, just works. Even little, little children, if they are realised Souls, you put them together, tie them up and ask them, `Now, what is the problem with this

person who is facing you?' Immediately they raise a finger and tell you, this is the problem. And everybody would say that this problem means this. And if you ask the person, “Do you have this problem?" “Yes” he said, “I have.

But how do these children know? They are not doctors." So the children are the persons who will diagnose it. They are the ones who will cure it. And they are the ones who are enjoying. It's a different realm about which I'm telling you. It sounds very fantastic. It sounds very funny. And many people have told Me that, “How is it, in such a short time, it has to happen?" Now the blossom time has come. They use to give Me one of the flowers in olden days. For example at the time of *[UNCLEAR* Jalaka/Janaka], we had one fellow *[UNCLEAR]* I'm going to Jalaka. And he said, “You give me Self-realisation." He said, “If you want to take my whole kingdom, but don't ask me for Self-realisation." But ultimately he gave him. One. Now today the time of blossom has come.

The blossom time has come. Kṛiṣhṇa did his Kṛishi, means He sowed the seeds. Christ did his job. He put this awareness of resurrection within us. Now the time has come for us to reap the fruits of all these incarnations and these saints and all these people who worked it out, the blossom time when the flowers become the fruits without much difficulty.

It's very simple, especially if you are simple people, if you are in balance. If you are a little imbalance, the Kuṇḍalinī puts you into balances and you get it. As a result of that, as a result of this happening, you get first your physical fitness. As a result of that. Now for doctors, it is very easy

to understand. If I tell them that you become the master of parasympathetic. Now how? They will ask, “How do you become master of parasympathetic?" Because doctors don't know much about parasympathetic nervous system.

But you talk about autonomous nervous system. Now I say, “Who is this `auto'?" Supposing you become the auto. A simple example could be that we have a accelerator within us and we have got a brake. Now we are learning how to run this machine of ours or with this car of ours. First we make mistake. We go this side. We make another mistake. We go the other side. Then we become drivers, in the sense we know automatically, without thinking we work it out. But then we become the master of the driving.

So we see the driver within us and we see those two things and we enjoy it. That state, when it comes to us, then we are not to bother. Physical happiness comes to us without much difficulty.

Now how cancer can be cured is very simple. If you want, I would like to tell you. If you don't think it's going to take too much time. It's very simple how to cure cancer. Now, within us there are seven basic, seven basic Chakras. They are subtle centers. And they express outside. I mean you may not believe. It's a hypothesis for you, doesn't matter. But, if it is proved then you have to believe. As scientists, you must keep your minds open to receive this hypothesis and if I prove it to you then you have to believe. Now these subtle centers manifest outside all the plexuses we know about. These seven centers, these subtle centers are called as Chakras. And

they reside within us, in the Medulla oblongata [lower portion of the brainstem], in the brain and in the limbic area. Now if you know how to handle them or reach them by any chance, you can work it out from the roots.

Now, why cancer is caused? Nobody knows how cancer is caused. But I saw a very *[UNCLEAR* interested] feature by some doctors which the BBC showed a very nice feature film about the, about, I mean they showed lots of things in that, about cancer also, that they have found out that within us there is an area built in which is built since our creation. We call it collective subconscious. We, the Sahaja Yogis, we call it as collective subconscious. And from this area, there is an attack on the being by some proteins which the doctors call *[UNCLEAR* as it] protein 52, protein 58. See they have no name so they call it by protein this and that. Now this triggers cancer. And we say that these are dead spirits which attack.

Virus, according to us, is the attack of the all kinds of vegetables which have gone out of the circulation of evolution. If they attack then the virus is caused. But virus comes and goes away. *[UNCLEAR]* it's effects on us. Then there is an attack of the dead spirits, as we call them, of *[UNCLEAR* this] proteins, *[UNCLEAR]* protein 52, protein 58. You see, if you call them by those names, nobody is shocked. But if I say these are dead spirits, people are shocked.

So it triggers cancer. By some chance, if we can get rid of those attackers and put your system into proper shape, we can manage cancer all right.

So first the attack *[UNCLEAR]*, to begin with.

Secondly, what happens that supposing this is a left side sympathetic and the right side sympathetic and *[UNCLEAR* these] sympathetic nervous systems are in the center, as you can call it, this is the *[UNCLEAR* vertical line], the center, is the central line, what we call as the parasympathetic nervous system. Now, when there is too much of pressure on these sides because of over activity of the sympathetic nervous system due to emergencies then they brake *[UNCLEAR]* between these centers. And this, being connected with the whole, the connection with the whole is lost and you become on your own.

So a person becomes on his own. What's wrong? There are many people who say, “What's wrong? Let us get out of the society, do what we like, be abnormal. What's wrong?" But actually you become malignant. And such a person touches another person, he also becomes malignant. Then the third person becomes malignant. You see, you can say, like people who have no idea of the whole. They start behaving on there own. In the same way, the cells become. And when they become malignant, they start attacking other cells, other cells also become malignant. Then the triggering comes again from the left side as said by protein 52 and protein 58.

So, by any chance, if we can remove the ones who are triggering it and also we can put these back and give energy, sufficient energy for them to act together, they are again put with the whole and the system starts working. And that's how cancer can be cured sometimes in ten minutes.

In ten *[UNCLEAR* minutes] you can do it, Leukemia in five minutes. Diabetes, you can put it right in no time. But

then you have to continue with it to maintain. It's very simple to create this kind of an atmosphere by which you become really absolutely a healthy person.

Then, mental conditions: same. A person who is mentally affected is also affected by the spirits. All the mental cases are affected by spirits. I haven't seen one which is not. If you can remove the spirits, the person can be all right. Today I saw a child who was blind. Suddenly he became blind. His eyes are open but he can't see. There is no light. It's absolutely a spirit sitting down here. If you can remove the spirit from there, he can see. But the doctors don't believe in it nor they know how to do it. Psychologists are really absolutely children. *[UNCLEAR]* have no sense at all how to conduct therapy to the mind.

They are so outward. I mean, I call them unauthorized. They have no authority to deal with the mind of human beings because they do not know how to penetrate into the mind.

So, we have the patients who are suffering from, say, mental troubles. They can be put right. Your mental problems can be brought round. No doubt you can do it. You can be cured of *[UNCLEAR]* mental troubles.

Now, then we have another problems of intellectual problems that you go on thinking, thinking too much. *[UNCLEAR* Thinking there are] I met a doctor in Switzerland. He said, “Mother, you cut my throat or cut my head but stop this thinking." Because we get into the habit of thinking. And we are all the time jumping on the cusp of every thought. Now, we have to make this thought so tired by some means that they get elongated and there is a space in between. But the other way it could be: to

raise the Kuṇḍalinī and the Kuṇḍalinī takes you into the realm of the present.

So neither you live in the past or the future but you live in the present.

That's impossible. If I tell you, “Live in the present." You said, “Mother, how to live? It's impossible." Because as soon as you try to live in the present, a thought from the past comes in or thought from the future comes in. But that time you become thoughtlessly aware. There's no thought and you see everything. If you want to think, you can think, but you can absolutely peaceful. That bliss which is described as the Divine bliss starts pouring into you and you become absolutely blissful. With this, with this *[UNCLEAR]*, you become much younger or twenty years younger. How many people who were even bareheaded, got their hair? Many people who had spectacles, you see, they lost the use of that. All kinds of things have happened. It's so miraculous.

Now the highest thing that one has to achieve is the spiritual life. In the West, I must say, men of God are born much more. They are seekers. They are real seekers. Because they had enough of all this.

They've had enough of affluence. They know what is the advantage of affluence. Aūence has taken them nowhere. They've made all kinds of mistakes. Their family are spoiled. All the old people are numb lying *[UNCLEAR* in the] orphanages and all that. They have seen to the end of it. They are fed up with it.

The scientists have reached a conclusion that now we are waiting for the shock, that's all. The shock of the science. They are worried now, “Why we have created these big,

big things like atomic things and all these things to go to moon?" Because they have achieve nothing out of it. Just waiting for the ultimate shock when everybody will be destroyed.

And this kind of thing, *[UNCLEAR* when] happen, that people are so agitated that they look backwards.

How to go *[UNCLEAR* forward]? We have come to the precipice now. We have to fall down.

Now, how to save ourselves? So the developing *[UNCLEAR]*, they are much better off in this respect and they want to go back. But in this country we, being Indians, we are doubly blessed. There is a... there is a Yoga boon, we say. What is the Yoga boon? Every Indian, he maybe a *[UNCLEAR]*, in his heart of heart he knows what is wrong what is right. This is what we have. He may do, he may try every trick but still in our heart of heart we know it is wrong.

I say, there are to types of sins we commit. In the West, they are committing the sin against the Mother. They have no sense of Mother. They commit it and now they are absolutely fed up of it. Here we commit the sin against the Father. Father, the God Almighty, is so powerful. He's going to look after us. Kṛiṣhṇa has said “Yogakshemam vahāmyaham." You just take to Yoga and [God will] look after your Kshema, is your well-being. But here we are not bothered. We are doing all sort of cheating, all kind of nonsense, for what? For a little gain. If you believe that there is God and you get to your Yoga, all your material problems will be solved for practical purposes. You may not become very rich because it's a headache to be a rich person, very big headache.

So you'll become a rich person in your heart like a bhatch.

I can give you My example Myself, you see. I am, I don't know, people say I'm born in a rich family.

Of course I'm this according to normal standards I am. Maybe My husband is a rich man maybe, whatever it is. But as far as I'm concerned, I don't care for any comforts. I can sleep on the street. I can sleep in the villages. I can take bath in the rivers. I've no problem. I've no problem of any kind. I just don't understand. I've no problems of bathrooms or comfort on a bed or anything. Because I think, “I am Myself. Myself the bhatcha Myself." What can dominate Me? There's nothing can dominate Me. And I live in that joy of My own being and I just don't bother. I'm not bothered. Nothing can make Me subjugate to that or in any way enslaving. No habit. I have no habits, I mean. As such I don't know how people form habits. I tried to form habits. I cannot. I just cannot form habits because nothing can overpower Me.

And this is what is going to happen to all of us when we become the spirit. Because spirit is detached, is not bothered. It is absolutely above all the things, like a lotus. It's like a lotus above the dust and the dirt and the filth *[UNCLEAR* and that]. It just sees the thing like a drama and it just watches and it just emits fragrance. By that fragrance, it clears and cleans all that is dirt and filth and also it makes it beautiful. It covers the complete point which is suppose to be so dirty and ultimately makes it cleaning.

It is that which is *[UNCLEAR* to/should] happen to every human being. It is for the emancipation for all human

beings. To Lion Club, if it is to happen, let it happen. We are all great people with great ideas and the time has come for you to get the special power of enlightenment which will make even Lion Clubs roar with enlightenment, the joy of happiness that you received from your spiritual blossoming.

May God bless you.

[GAP]... questions and as he has directed, I would like to know what we have to ask for...

[GAP]... is to bring the unconscious to the conscious. Now, in our evolutionary process, whatever we have achieved, we have achieved in the conscious mind. That means in the central nervous system, actually.

For example, if you have a dog. The dog can pass through any dirty lane. It doesn't smell any dirt, filth or anything, doesn't even see the beauty of the place. Whether it's a dachshund or a big collie or some sort of a very, very great dog, all dogs are absolute immune to all the dirt and filth. But for a human being...

[GAP]... central nervous system.

So now, whatever has to happen in the evolutionary process follows logically that should happen in our conscious mind. Whatever is in the unconscious has to come to our conscious mind. Now, what is subconscious within us is the one which we have experienced before and has gone into the past.

So, for all practical purposes, the past doesn't exist. But, if you want to go into the past, you can, but's dangerous. Because from past, you go to the collective subconscious and it's a very dangerous thing which area you should

not go any further because that's finished for you. The ascent is through the conscious mind, through the present and that's how the spirit which is the source of your joy should start expressing itself or manifesting itself through your conscious mind so that on your central nervous system you should feel the existence of spirit. That's one thing.

Now the second question is about the parama and all those people are that how the secular state of our senator that is going to work out, now...

[Aside:] [5 seconds dialog with another person.]... the religions which are formed outside are all artificial. It has no meaning to real religion because Hinduism as such if you see, Ādi Shañkarāchārya has said “Na *[UNCLEAR]*." He has just talked about the Mother. He just talked about Self-realisation. He never talked about all these nonsensical things that Hindus are following now and they think that this is Hinduism. Or if you say any other, say, Islam. Islam is *[UNCLEAR* sales] now. I mean, everywhere what I find that all these so-called religions are nothing but the projection of Western interests. There is no reality.

For example the Christians. The Christ has said, “You have to be born again." So they get a person and baptize him, put some water on his head and he is realised. We say he's become a Brahmin without knowing the Brahma. We just put some sort of a thread on him and *[UNCLEAR* if you give] some money to the Brahmin, he becomes a Brahmin. Same with Jains, with all of them. We are not doing what we are supposed to do" is to seek the truth and become the spirit as every religion has said. And

then, once you become the spirit then you will be amazed that these all incarnations and all of them are so related to each other that we are just quarreling with each other for nothing.

Like Christ has very clearly said that those who are not against Me are with Me. Who are they? And so for TukāRāma or Namadeva, anybody, there was no caste or system or anything. For them it was just the spirit. Spirit has no caste, no system, no formal sort of a thing. It is beyond all these things. And it is said in... that sanyāsi has no, the sanyāsi has no caste, it has no caste. And always you have seen all of them have suffered, all of them. TukāRāma has suffered so much because they thought he was not a Brahmin. I don't know. But the way he was suffered because of the Western interest. Even Sāi Nāth, who was recently here, who has suffered so much on account that they called him a Muslim.

So, for a Muslim also there is no caste or formal religion left. You'll be amazed. I went to a place called Darkili and asked people, “What is this place? It's very vibrating?" And they said, “There was one mia and he was a Sādhu who was Muslim." And they all worshipped him. I went and saw. He was a realised Soul. You can see because the vibrations were coming from him.

So whether he is a Muslim or a Hindu born in any whatever it is, he is a realised Soul, so he is a realised Soul.

Now, the secular state of our city government I say, I have nothing to do. I don't know how to work out through the government. Their ideas of secular state and all that are based on something superficial.

Because for Me, these things do not exist.

Now we have got people coming from Algeria, lots of people are coming from Algeria. They are all Muslims. They had taken to Sahaja Yoga. They know about Gaṇeśha. They know about Christ and they know about Mohammed. And many Hindus who are in Pune who are Brahmins, are now worshipping Mohammed Sāb because they know that Mohammed Sāb exists as Dattātreya himself. But this is to be proved and they have to see that this is so.

It's very surprising that fanaticism has nothing to do with God. It has nothing to do. On the contrary it is an anti-God activity. All kinds of fanaticism is anti-God activity. It causes also cancer. I know one gentleman who came from Iran. He was a doctor and he had stomach problem. And he had cancer in his stomach. And when he came, he told Me that “I don't believe in any other person but Mohammed Sāb." But I said, “Mohammed Sāb Himself is angry with you. Because He is Dattātreya and how can you say that?" I said, “You have to believe in Dattātreya." He said, “I can't believe in Dattātreya, Nanaka or anyone." I said, “Alright. I cannot cure you. I'm sorry." He went back. For fifteen days he worked very hard. He couldn't get cured. The doctors said “He is going to die." His wife came. She said, “We believe in whatever you say, Mother." Then he became a great Sahaja Yogi. He's cured. He's alright.

All these things are outside by him. I'm talking of the inner being. He said, “Any difference in the body of one human being and another human being whether he is a Hindu or a Muslim or a Christian?" We, we have made.

We human beings have made all these things. It's absurd. God never knows these things. And we are told “many Muslims have come." Farsis are coming. All kinds of people are coming.

Now those who are all Western people, they are all followers of Christ. They have come to Me. And Christ is very much there within ourselves. But where does He reside? What is His work? Who was He within our mythology and another mythologies? We have to understand everything, the relationship.

It's all the knowledge of the roots, as I said. But, to go into the roots, you have to become subtle. It's not, “*[UNCLEAR]*" in Marathi as said. That there's talk, talk, talk, talk, talk. It's something that is experienced to be know that all of them are one. How can they be two? I'm different.

[Somebody else talks for 5 seconds.] Who is the Prime Minister? I don't understand it. To Me, I don't understand `Prime Minister'. For you it's alright. I have no problem *[UNCLEAR* bothering] with them. To them... Me, they are human beings as everybody. To you, it's a big thing or small thing. To Me, it is not. It doesn't go into My head, you see? So particularly if you're understanding about someone, it maybe your own mental projection.

But to Me, she is a human being. That's all. Nothing more than that.

[Somebody talks for at least three seconds. It feels like the latter part of the question was cut.] If so, it should work out. *[UNCLEAR* Then] that's the thing. *[UNCLEAR* You] understand? Why worry about these political things and these things, you see? They already you are having. As

soon as you got, you see them. Inside at least, have your self. Worry about yourself more now. Isn't it? It's a good idea. If you think so? Reply: Yes.

Shri Mataji: All right? Reply: Yah.

Shri Mataji: [GAP] *[UNCLEAR* channels] within us. One is left side, another is right side. And the left side energy is the energy of desire and the right side is of action.

So, first of all, you have to put the left side towards Me. That means, you are desirous of your Realisation. Just like this. You have to put your hand towards Me. Keep it comfortably on your lap if you want. Very comfortably. You should be comfortable but not slouching or in any way too erect, just in a comfortable way for you. And not too much putting back your neck or forward but just in a comfortable way. You have to sit down with the hand on your left lap, if you like, or on your left side arm.

This one. Now, the right hand is the... is the action which we have to use. First of all, please put this hand towards Me like that. And now close your eyes. Please don't open your eyes. Till I say, please don't open you eyes because when the Kuṇḍalinī rises, it goes through this Āgñyā Chakra which is connected with your eyes. And the eyes have to be little bit sometimes attracted and even the people *[UNCLEAR* style] it.

So it's better to keep the eyes shut so the Āgñyā Chakra opens out without any difficulty. Please keep your eyes shut. And put your both the hands towards Me. Just like that. Just like that. Now close your eyes. All of you should do it. Because with this, at least you've got anything, your health will be alright.

So, put your both the hands towards Me. Close your eyes. And everybody should close the eyes.

That will help everyone. It's a collective happening. If somebody doesn't want to do it, he should go away.

But he should not disturb others by obstinacy. That's not a good thing. To be kind and civil to others, everybody should.

Contents: 1982-12-30 **Conversation with Sahaja Yogis, Tales of Shivaji Mahārāj, Ram Das Temple, Satara, Maharashtra, India**

In the music score, I must say the Western people have done so much better. What about the Indians? When are they going to take to music? I mean, there is no progress as far as music is concerned. We have great musicians in this Sahaja Yoga group like Mrs. Venugopalan and all that, but somehow or other, I find that the music is not coming up. What's the reason? In Maharashtra, of course, we've so many people who can do something about it. They haven't done anything.

So better get these things translated. You can't sing that fast in, I don't think in Indian way.

Beautiful, fantastic is the word, I tell you.

So now, we are ready for the war, is it? [Big laughter.] [MISSING 20 minutes of aside comments.] *[UNCLEAR]* stones you got from *[UNCLEAR* Gujarat there]. If you could ever do that, is to go to a place called Bhilwara. There you find huge big marble stones. I feel this is not real marble. This is something like marble, but not real marble. But real marble, you see, worked out in one big stone, the whole thing worked out like that and very

beautiful. This is only one of them, you can see. But this is not real marble. You see, marble is on the sides, you see. Sides is marble. All is marble, here down below.

But all this is a kind of a stone which is being carved out.

Now these, if you see, these are the, all these are eight, they're called as dikpālas, means they look after all the directions. All the directions are there. These are put in the directions. And then these are nine grahas. See, grahas are the stars, see, nine stars which are protecting here, all of them. This is the Sun with so many horses. You see, that's the one Sun and the rest are there. All of them. You saw the eclipse? No. That's good. The moon was under eclipse, you see, when we were coming. And I gave, was giving it a bandhan. When the eclipse was over then only we reached here. Thank God. And you didn't see it. I'm very happy. The moon you saw was, must have been the moon, which was full. It was.

Sahaja Yogis: Yes, yes.

Shri Mataji: Good.

Sahaja Yogis: It was very full. Yes.

Shri Mataji: But in the beginning, we did see it. All right.

So now, there are matrakas outside, you can see. And this side is the right side, is all Brahmadeva, Agni and all these Devatās on this side. Outside they are carved and this side, there are ganas and gaṇapatis on this side. And in front, is Śhrī Hanumān, like that. It's a beautifully done thing, I must say.

Typically Indian and this is the statue of, here if you see on the right hand side is Śhrī Rāmdās Swāmī, the one who was the Guru of our great king Shivaji Mahārāj and

Śhrī Rām. They used to respect him because he was the ideal king. See and Gaṇeśha here and Hanumān statue.

Sahaja Yogi: It's a very beautiful thing.

Shri Mataji: And now they have made some place for us for sitting down.

He worshipped from his childhood, you see and because Hanumān is an angel, you know that and he doesn't marry. But he was forced to marry, it seems.

So when he was getting married only, he ran away from that place. Because when they said, “Sawadhān, Sawadhān” means now after marriage they say, “All right, be careful, be careful." Just before the marriage took place, he just ran way from there, without getting married because he cannot be married. He told them, they would not listen and he couldn't bear it any more, so ran away. Then he went and he came back again in the time of Shivaji and then Shivaji became his disciple. But he took some tests of his disciples. I do not take any tests but he took some tests.

First of all, he said, “I'm very, very sick and I've got a very big wound in my foot and it has become a ulcer now. It's all full of pus and full of all blood and pus and all that and only a, my disciple can only suck it out. Otherwise nobody can suck it out." So all his disciples got a fright of their lives. They said, “How can we do that? It's too much!" But Shivaji said, “All right." Shivaji came and took out his crown and he just sat down, sucking his wound, you see. And it was nothing but he had tied a big mango and he was just. [Laughter.] But then he told Shivaji and others that they, said that, “I'm very sick now. You must get me the milk of the tigress, you see.

You must go and get." Those days there were lots of tigers and tigresses here, but not nowadays.

So he said, “You must go and get the milk of the tigress for me." So they all thought, how they can go and milk the tigress? It's very difficult.

So they... Shivaji said, “All right, I'll go down." He went in the village and then we went to the forest, you see. And there he saw a tigress, you see.

So he went and told the tigress, he just bowed before the tigress and said, “See, I don't want to disturb you but my Guru wants your milk.

So you please allow me to take your milk?" And the tigress came and stood before him and he milked the tigress and took the milk to his Guru and gave it to him.

So the Guru, so people asked him, “How did you manage? How could you do that?" He said, “Don't you know what our Guru is? He is the Hanumān himself. He is God himself. What is there? I just went and told and tigress knew about him. She just said, `All right, if your Guru wants it.' How can she trouble Me? If you have to do anything for your Guru, whatever you have to do for your Guru with full faith and understanding about the Guru, then of course the animals understands. Then why not human being?" So, he said, “I can't understand why you are very afraid of it? It's nothing much." And that is what it is.

But in those days, all the Gurus used to take such pareekshas [tests], but when ultimately you see after his all training, the king who was Shivaji, was crowned.

See, after crowning, one day this Rāmdās Swāmī went to his house and wherever he went he used to ask for some alms. Only from one house he used to get and he used to go and just knock his, he had something he used to carry with him that he used to knock and he used to say that, “Jai Jai Raghuveer Samarth." He used to say like that. He went and said that.

So his disciple was the King there and he understood that, his disciple understood that, “My Guru has come. I have to give something as a dakshina. What can I give him?" So he wrote a letter that, “All my kingdom is yours. I give everything to you, Sir. I flowe nothing." And he sent that letter to him.

So when the letter came into his thing, in which he was asking for alms, you see, he opened it and read it and he laughed and he called his disciple. He said, “You see, I'm a Sannyāsi [Monk].

So you can't give Me anything. What will I do with a kingdom? I don't know how to run the kingdom. But you have to run the kingdom. But you must now, as you have given it to a Sannyāsi, do it with a detached mind." Whole thing should be done with the detached mind of a Sannyāsi and for that you must use this, my, he used to cover himself with a loincloth, you see, with a double type of loincloth, which you've seen how little loincloth he was wearing. This should be used as the flag to show that just a loincloth of a Sannyāsi is the flag of Marathas. And that's how this orange-coloured flag was hoisted as the flag of Shivaji and now it is used politically also by some people. That's a wrong thing to do. But this is the ag, which you must have seen in My, all My, most of My

processions, they use it, is the flag which was taken by this King Shivaji Mahārāj as his own flag to announce that he is doing this, he is running this kingdom with the detached mind of a Sannyāsi.

So there are many stories about them, lots of stories about Rāmdās and his disciple, this king and how he used to tell him how to run his administration. And Shivaji was the ideal king that we had in this country. Ideal king. A very good character, a very Dharmic fellow and a very nice person. And because he wanted four people, four kingdoms to join together, they said that, “If you marry our daughters, only we'll accept you." So, he had to marry four women. He married them and looked after them very well.

And he was a very good character and a very nice person and a very good king and he is such a great source of inspiration to Maharashtrians and he used to worship all these Gods and Rāma specially and when you will go to Tuljapur also you will see how he used to come by his horse all the way from miles together to visit this Devī's temple.

There is another temple formed by the same Śhrī Rāmdās who found a statue of the Goddess and he calls it Angla Devī. See now Angla in Sanskrit means English. Can you imagine? Something surprising, isn't it? And he called it Angla Devī. He put that statue in a temple there and he has called it Angla Gaon [village]. Angla in Sanskrit means English, you see. Angla. It's very surprising, isn't it? So I think, at least the English Sahaja Yogis must go and see. Already he must have thought of a[n] English goddess, you see, from London. When they

do My Pūjā, sometimes they call Me Londonpur Vasini [The One who resides in London].

[MISSING.] No end to it.

Sahaja Yogi: Can you tell us about his mother?

Shri Mataji: No end to that, either. He was a very obedient son, very obedient son. And his mother had given him a sword which was called, she said that this is given to him by Bhawani. The Goddess Herself has given you this" and he always used to carry it with him. But then, when the English came here, they took away that one and now it is lost. They don't know. It was said that they're willing to give it back. I don't know what happened. And then people went down there and I think they, it's a funny thing you see, they don't realise the value of that. It's still lost there, but with vibrations, one can find out. But I don't think they realise the value to us of that sword that's called as Bhawani Talwar. The Chief Minister from Bombay [Mumbai] had gone, he was himself a Muslim, to ask for that and he was denied. I don't know English people. When will they understand the subtleties of life? I hope sometime to convince them.

His mother was that. She was a very clever woman and his father was Shahji Rao. Actually, her mothers' family was Jadhav [a Maratha clan] and My mother's family, also same. They come from same family. My mother's family and Shivaji's mother's family is the same family and they, it so happened that she found out in Shivaji's childhood that the husband is quite subservient to the Muslim kings, you see.

And the Muslim kings are just overpowering everyone here. And then Aurangzeb came in, too. Aurangzeb was

one of the worst of all. I think Khomeini must be Aurangzeb. He used to kill at least in one year.

So, he was a very thin man, you know, a right-sided, horrible, absolutely thin person. And he used to kill Brahmins or Hindus who would wear this thread. You see, we wear that thread for the [UNCLEAR...] Even the Kṣhatriyas also wear that and the weight of those threads had to be as much as that of Aurangzeb's body. He was like that, horrible, this Aurangzeb. And this lady then decided that he, Shahji Rao, was at Golconda and all those places in the south. See he was, he was the sort of, you can say, subservient to the Muslim kings.

So she decided to elope with her son Shivaji in the night and she put her son on the horse and with few of her people from her own family, Jadhav family, she eloped. But he tried to follow and capture her but she somehow or other escaped and then she came and stayed in one of the forts.

Now you'll go and see tomorrow another fort where there is the Samādhi, means the tomb of Śhrī Rām.

That you should see. I think you'll be happy to see that Sajangarh, is on the fort. You have to go. I think you have to walk at the most for a furlong or so but most of you can go by your buses. And then she came there and there was she found a Guru for her son, Rādhā Pundir and made Shivaji learn from him about Sanskrit and everything and about how to run a country with valor, honesty, upright way, I mean, in a virtuous and in a righteous way. And then she told him that, “We have to fight the Muslims and the Mughals." And the Mughals were very powerful, very powerful and extremely cruel.

So, the only way was to do a hide and seek game, called as Gameenivika, we call it, guerrilla warfare.

So in these hills and rocks, she collected her own people who were ordinary villagers. She called them Mawade. These are the people whom she collected and made a army for Shivaji and that's how Shivaji started fighting and looting these people and harassing them in these mountains. Where you are moving is all Shivaji's kingdom and all these are Shivaji's forts.

So Aurangzeb called him the rat of the mountains because he could never catch him and at every place, you see, he tried to oust the Muslims from here. Ultimately, they had to give in also because Aurangzeb's sons, four sons he had, they only fought their own father and perhaps he was killed, God knows what happened. But his tomb is in Aurangabad, just down south, you see. He was here. He was very busy with Shivaji, fighting him and ultimately he died and he has got a tomb there, this Aurangzeb.

Now this Shivaji fought in different ways. There are different stories about him, how he fought. When you went to Poona, I don't, if you saw that Shaniwarvada, I didn't know whether you had time to go and see that place Shaniwarvada. It is the same place where, in the center of Poona, where Shivaji used to live. But he had gone onto a fort when the, there was one fellow called Sahistyakar, who was in the court of this Aurangzeb, who said that, “I will catch Shivaji and bring him down." And he came and settled down himself in his big house, which was called as Shaniwarvada in Poona.

So Shivaji came back as in a marriage party and Sahistyakar said that, “Nobody is allowed to come in a group here. No group is allowed but a marriage party." He could not refuse.

So they said, “There is a marriage party that is going around." And in the marriage party, all these people were all dressed up like marriage party people but inside they were all dressed up like soldiers. And he knew all the ways and roads and at the back they went and he entered through a some sort of a place, tunnel or something inside and there Sahistyakar was sleeping. And he woke him up and said, “Get up now. I'm here. I'm Shivaji, I've come now. Now, why don't you catch me?" Sahistyakar got such a fright that he jumped out of the window. And, but Shivaji wanted to, see, kill him, so he hit him but only hit him on the fingers, so his life was saved. His fingers were lost and then Shivaji occupied the place and Sahistyakar ran way. Everybody ran way.

So many stories like that.

Then once, I mean after this, you see, they all got very frightened but they tried to follow Shivaji back and Shivaji coming back. You came by that circuitous route on top of the Katraj. They called it Katraj ka Ghat, you see. But there's no English word for ghat. I mean the circuitous road, which takes you on top of the hill. Is there any way? There is no name for that. We call it ghat. There are so many ghats you are seeing that but this is one of the famous. See, he came on the Katraj Ghat, you see and what he did, he lighted a kind of a beacons, on the horns of many bulls and made the bulls run on one

road, you see and he himself climbed over this Katraj thing.

So every all of them thought that, “This is way Shivaji has gone” and they followed the other way round and they followed them for quite long distance. Then they found out that they were just bulls, you see and they were tied with these beacons which were burning.

And they thought, “This was Shivaji” and Shivaji went to his own place.

Once Shivaji was followed like that, many a times. It's very interesting stories, how he was arrested and came out of Agra and all that. I will have to tell you how he did all that. Very interesting. There are so many stories that I can't tell you just now. [Marathi.] But tomorrow, they want to take you to Sajangarh. Early in the morning. Morning. I think you should all just get up and go, that's better. All right? Early in the morning say about... Morning you take your tea and go there. By six o'clock, you should be ready to go. All right. Take your tea in the morning time.

By six o'clock you be ready to go because it will take about two hours or so, two and half hours, about nine o'clock. Then you go and have your breakfast and by 11 o'clock, there's a little Pūjā from 11 to 12.

Then we'll have our lunch and then after lunch, we are going to Kolhapur. It's rather hectic but we have to do that way, what can you do? We have so many... If you have to see Sajangarh, because that is nothing but what you have to go is to pay homage to Hanumān Himself, you see, who took his birth on this Earth.

So it would be a good idea for you to go. Little hectic but I have been there to Sajangarh, long time back. I had come here to play in a [UNCLEAR...]. In 1938 or something, I was here. 1938, I should say. Yes, 1938, I was here. Then we had gone to see *[UNCLEAR* Achintyakara]. There are two but this has more value because is a, the, is just barren, nothing but his Samādhi is there. His tomb is there.

So I think you would like to take darshan. It's a very beautiful thing to see.

Sahaja Yogi: The tomb of whom, Mother? Whose tomb?

Shri Mataji: Rāmdās Swāmī's. Śhrī Rāmdās Swāmī's tomb is there.

Contents: 1983-01-00 **Quote on Individuals, India (other month 0200)**

Shri Mataji: What do you think of modern art? Robin Reid: [says that he thought it was rather individualistic].

Shri Mataji: Individualism is when everyone is trying to be an individual, but is no longer individual.

What we need in Sahaja are strong individuals.

Contents: 1983-01-01 **Śhrī Mahālakṣhmī Pūjā, Kolhapur, Maharashtra, India**

Today again is a new year's day, every new year comes, because we have to take to something that is new.

It has been so arranged that the sun has to move for 365 days and again a new year has to come. Actually the whole solar system is moving in a spiral way.

So, there is definitely a higher, higher state of this solar system. Every year it is rising higher in a spiral way.

So it is not only that, it is because 365 days have passed because it has moved a step forward higher than what it was. Now, we can see that in awareness, human beings have definitely risen much higher than what they were, say, about 2,000 years back, but the first system that started, the whole universe was the first model, you can say was created and that model has to be perfect and that was a perfect model which then started perfecting the rest of it.

So that is the perfect model which is in the principle of this ascent and that is working out this ascent. Now the perfection of the rest of the universe takes place in various directions but today we have to consider the Mahālakṣhmī Principle. Now Mahālakṣhmī, as I told you, is a perfect principle, is a perfect principle, it's perfect. It is born as perfect, will remain as perfect, will be always eternally perfect so that it is not necessary to be corrected. Now this Mahālakṣhmī's thing I am discussing here because you may be able to go today to see the temple of Mahālakṣhmī. Now the temple of Mahālakṣhmī when you go there, you have to know that this deity has come out of the Mother Earth, in this particular place. That means this place has got a capacity to give you a force. You can say, additional force or an intensive feeling of evolution. If you are sensitive enough you can see that, you can feel it and you can do it. If you are not so sensitive you are still so conditioned and still outside, that may not work out. I mean all kinds of things can be done, but if somebody wants to remain a stone you can't do anything about it.

So this Mahālakṣhmī principle is working out in this place Kolhapur, normally, this place should be very very warm because of its position but even in summer this place keeps very cool because of the vibrations, from the temple that is emitted. The people in this place may not be so aware either, we can not say they are not aware because as negativity has to come forward, there are lots of sugar factory and lots of alcoholism going on here but we have to take the best advantage of every place which is created specially for a particular purpose.

So it's a pilgrimage in a way that we are here, that we have to look after our Mahālakṣhmī Principle of our ascent. As you know this ascent starts at the Nābhī and is surrounded by the Guru principle.

Now the Guru Principle within us, if it is absurd, if it is juxtapositioned, placed in juxtapositioned where if it is not properly embedded within us, if it is not emitting through our character and behaviour, Mahālakṣhmī Tattwa cannot be strengthened. Mahālakṣhmī Tattwa is strengthened through Guru principle.

Now we are lucky today because there was the birthday of Datta, Dattātreya just the other day when we had the Pūjā and today is this Mahālakṣhmī Pūjā.

So two things together we have got together, First was the Datta Pūjā and today is this Pūjā of Mahālakṣhmī, So, to have the Guru principle all right, we must make our Dharmas correct. Now these Dharma's, as I have told you many times, are ten and we should look after these ten Dharma's in a very careful manner. These are expressed outside but whatever inside comes out. Now I find when you people talk and you say things, I know that this

person is negative, that person is definitely positive. There are so many ways of expression of positivity but how I know that, I can't tell you I just don't know how to tell you that but I just know that such a person is definitely positive and such a person is negative. The positivity lies in understanding why are we here. First of all, why are we on this earth? Why are we human beings? In understanding what are we doing about it? Why are we Sahaja Yogis? What a Sahaja Yogi has to do? What is his responsibility as a Sahaja Yogi? Then he moves forward to understand why Mother is so kind to me? Why have I got vibrations? Why am I among very few who have got this special blessings, the special knowledge of vibratory awareness? And then to ask yourself, what am I doing about it? Am I still very much embedded in my cheapish-ness or in my childishness, in my stupidity, in my harshness, in my aggressiveness? We always see these things in other people, not in ourselves.

So we are not Sahaja Yogis. We should understand at that point, when we start seeing these things in other people, then we are not Sahaja Yogis. We should see in ourselves and emit pure compassion to others but always people see that, it is in another person this exists. Whatever I may try to say they always see in other person.

Now supposing there's a negative person amongst us, you need not compassionate to that person, on the contrary better be away. Get rid of that person, as far as possible, don't have anything to do, is a definite sign of great compassion to yourself, if not to others. Better not have anything to do with the person who is negative, if

you have to come up. He may be your brother, sister, anyone but try to be away from a person who is not positive. It causes lots of problems. I've been telling you this and I've been requesting you, but the conditioning is such that still though you have become a Guru Tattwa, you don't understand that you have to be detached, for a Guru there is no brother, sister or any other relationship except for the relationship for the Mother. There is no other relationship exist. One of these principles are to be understood. Very important I feel is for all of us that our relationship is only to Mother and to Sahaja Yogis and not to any relationship, which has come to us, whether through Sahaja Yoga or whether through anything else. Now this I have been explaining because our Mahālakṣhmī Tattwa is not all right, that's why we get sort of fritter away, lost into these things and the Mahālakṣhmī Tattwa has to be like an ascending force, all put together like My father used to give an example that supposing you have collected lot of wheat and you spread it on the ground, it will be all lost. It will be spread out like this, this side, that side, it will be all lost but if you put it in a bag, it will rise, in height naturally. It will have Maryādās, it will rise and it will go higher and higher. In the same way this principle of Mahālakṣhmī can spread just across like that and can just destroy all that Mother has given us and all that we have had all these years, only by spreading it out.

Now to collect it inside is to pay attention to yourself, first of all try to clarify your ideas and your understanding in brain is important because Mahālakṣhmī Tattwa ultimately works in the brain. Is the enlightenment of the

brain, is done by Mahālakṣhmī Tattwa, it gives you the Sattva the Truth you see.

So in the brain you must clarify, reach logically, logically you must reach the conclusion that I don't have to do these things, I have to do these things, I have to ascend, this is why I am here, why I'm here.

What am I supposed to do? Now logically you convince your brain, first of all. It is very important now after realisation because if logically your brain doesn't understand, it will always be cheapish, childish, undignified or could be harsh, horribly oppressive. It could be one of these.

So, in Guru Tattwa, there are ten elements. Five of them deal with the weight, weight. Guru is the weight you see, weight of a person. How much weight you have got? The gravity, as we call it. Person has gravity. When he talks how much balance he's got. See in Indian music, we call it Vazan means the weight. The weight of the person, means when he is dealing with himself or with others, how much weight he caries. In English also they use this weight. How much weight he carries with others? Means, how much he can really impress others. If you impress too much, all right, then the person will say, Oh, it's too much. That is a very big quality with Western people is Oh, that is too much. They have an idea, you see this is all ego-oriented. That is too much. If you tell them too much, Oh, that is too much. She is too much. I move slowly, slowly. It is too much for me. It's very common, it's very common reaction, so how much weight you have and the second one is the quality of magnetism. Two things magnetism.

First is the quality of weight, that's how much dignified you are, how you talk, how your language is, how your behaviour is. You should be human but sometimes even with Me, I find people talk in a very funny manner. I just don't understand, how is it that always they say the wrong thing. I mean, even if they have to say one sentence, they will say a wrong thing. It is absolutely with them. Is also Viśhuddhi which is also Nābhī comes from Nābhī because you must know that Viśhuddhi Chakra is the ascent of the Nābhī Chakra.

So what happens, that a person whatever he is, is expressed through his language, through his behaviour, through his face, through his nose, his eyes, everything, through the Viśhuddhi Chakra.

So the ascent of the Nābhī is expressed, shown, through the Viśhuddhi Chakra. Now whatever you have in the Nābhī, is shown here. Supposing now a person who has the Mahālakṣhmī Tattwa properly developed, such a person will have a way of dealing with another person where he will have the weight, as well as the understanding, how far to go with the person. How far to carry on with this person. How far talk to a person. How far to think about person. How much importance to be given. That is one point, is very important.

And the another point is that how much magnetism you have.

So you reverse back to yourself. The magnetism is a magic, is a magic of a person. A person is magnetic because he has certain magic. Now this magic is comes from your own personality, from your own personality.

So the basis of magnetism on the left hand side is starts and that basis is Śhrī Gaṇeśha. Śhrī Gaṇeśha is the basis of that magnetism.

So your innocence, innocence is the best way to have that magnetism. Magnetism you cannot express in material way, it is not a material stuff but it is something abstract, comes from your quality of Gaṇeśha, Śhrī Gaṇeśha. Such a person is magnetic, magnetic means that such a person attracts another person because of the weight of the person, because of the quality of the person. Such a person attracts, but does not attract for lust, greed and nonsensical things but attracts another person because of the fragrance of love in the subjects. Now it is always confused, confused because it's such an abstract thing.

So one must understand it in a very subtle way. What is this magnetism that one should understand. You see, there some gestures people use artificially which normally they have been using just to attract other people, the way they walk, the way they dress, the way they live. All these things are of no use. It is something so inner, that fragrance is so inner which must be developed but in Sahaja Yoga I have seen people just don't bother about it, just don't bother. They think the way they have been living, the way they have been this, say if they are English, they are English, if they are French they are French, if they are Indians they are Indians, if they are from Kolhapur they will be from Kolhapur. These ideas first must be curbed off because the fragrance spreads everywhere whether you are English or anyone.

So the fragrance of a person develops through first of all in Gaṇeśha principle within you.

Gaṇeśha principle is to be first of all seen to. Now a Gaṇeśha person is not a person who is absolutely a remorse type or a person who is such a gone case that even if you beat him up and make him into a complete minced thing, he will bear it. It's not like that, it's not that. On the contrary the quality of magnetism is such that it attracts you, to a point where you are not disturbed. Now this is a very important point we should know. You see, if you have other loves, love like carnal love and all other love you have, then that love you may attract the person, then that person can destroy you and it destroys you, always.

But this attraction does not destroy, does not destroy. The attraction is up to that point that you are not destroyed because you being much higher much deeper and much weightier, you cannot be destroyed by a thing that, whom you are attract. Always the greater magnet attracts the smaller magnet and that is what one should understand. This magic and this charisma, charismatic temperament of a person, comes by first of all, the Gaṇeśha Tattwa, innocence and secondly by complete dedication and devotion. Those who are completely dedicated and devoted to Mother not to anything else Gaṇeśha Tattwa again, not to your wife, not to your husband, not to your sister, not to your country, not to anyone but to Mother.

Complete dedication gives you that charisma or that attraction. In Sahaja Yoga such a person becomes really attractive and such a person has it.

Now some people think that if you are *[UNCLEAR]* some people think that if you are a very passive person and if anybody says anything to you and you don't mind, sort of a person you are charismatic, is not. People like you because they can dominate you, they like you because they can dominate you. Now if you think that by your aggressiveness and by your shouting and by your screaming and these people, you will achieve that charismatic temperament, you cannot. You cannot achieve that height, so how do you achieve it by becoming more innocent. Now how innocence develops in a person is by not thinking about it, like you see somebody asked Me. How do you manage your income tax? I said By having no income at all. Then they asked Me, How do you solve your car problem? By not having any car at all not Mine.

They said, What about your house problem? By having no house of My own nihi, nihi. Everything nihi for Me. Then how do you sir solve your this problem, by not having it, just have no, not have it, don't take up headaches upon yourself, see when you take up headaches of yourself then only the innocence is reduced. That headaches like this, that, this is my shawl, this is my sarī, this is my thing, this is this, this is this, this is this, but only one thing is that “This is my Mother and I have to proclaim Her” that is all. If that is the way it is, then innocence starts rising like Śhrī Gaṇeśha and by having no other headaches. This is mine, that is mine, this mine business causes the problem, I think personally I think this must be the reason that this mine business this is my because whatever is mine somebody told Me this is very good

argument to give. Whatever is mine is not I, means that's not Sahaj. My body, my head, my everything, my, but `I' he gave me this idea, `I'. What is I? Then I is separated, whatever is not mine is `I'.

So what remains is your Spirit'.

Somebody gave Me this argument I said it's very good argument to work it out then whatever remains is `I' and that `I' is the one we have to see.

So you go on reducing all these mines, mines, mines.

So the pure spirit of innocence will rise, so the idea about spirit also, people think that if you become spiritual, I mean, I don't know what people think about spiritual people but the idea about spiritual people is that you have to be something terrific like a bull or I don't know. You have to be sharp like a fox, you have to be intellectual like Freud or something. All sorts of ideas people have, no it is not.

Spiritual person is just innocent, just innocent. There is no intelligence, nothing, just innocence. The whole thing is innocence, see whatever he talks or says comes through innocence. It doesn't have intellect as such, which your people have it through reading and through understanding and by analyzing, nothing of the kind. It just has pure and simple innocence and it comes work out very well, it's so clean just says what it knows and what it knows is the highest.

So this deconditioning has to be brought within us, but you should not discuss it among yourself also. Once you start discussing then you also you see it becomes sort of a theological argumentation. There's no theology about it, it's very simple, it's the simplest thing is to be

innocent but the innocence is lost, why, because our attention is in different way, we are attentive to other things. We are looking at other things. Is so simple, you know. Today I was thinking I have to buy three nine-yard sarīs. A simple question as it is, because there were three ladies who wear nine-yard sarīs and I have to give them three nine-yard sarīs, that's all. I just thought of it, all right, I came here, I saw very nice sarīs being put here, so I asked her, “Where do you get these?" She said “You get it here." I said “All right." So you go and buy these three sarīs. No analysis, nothing of the kind. I just came into my mind that I have to buy three sarīs, finished, the answer is here, so even the atmosphere is so innocent, the whole situation is innocent that the solution is presented by innocence to innocent. Innocence works out in everything, you see because every body has little bit of innocence in every one, isn't it? So you can, it's like a fifth column, you see, the innocence is the fifth column within you.

So if any person is innocent, you see he will work on your fifth column and will make you all right. When you give bandhan to others, what happen, you actually bind him by your innocence and the poor fellow doesn't know. He has his innocence within him, you capture that innocence, that's how you are there, that's how you manage, it is very simple to work out thing.

Only principle, the Tattwa, the whole thing rests on what Tattwa is nothing but innocence.

So try to develop this by all these things neti, neti, saying not this, not this, not this, not this to all your faults. Not this, not this, not this, not this you reach there. Not mine,

not mine, not mine, not mine, you reach there. And that is how it is and you see the whole material world is not attacking the innocence, because they are frightened. You cannot attack, innocence cannot be destroyed, it cannot be destroyed.

Innocence is something, is all-pervading and it cannot be destroyed.

So whatever people may try, it cannot be destroyed but it can be covered, it can recede but it cannot be destroyed. It will act, it's own way, so try to develop that innocence which is the basis of Mahālakṣhmī Tattwa, we should say, or that is the essence of Mahālakṣhmī Tattwa.

So the outward things, the weightage, the weight, the dignity, the behaviour everything, is outward thing and the inside thing, the Tattwa, the principle on which it is based is innocence. Now if it is this, if we understand Mahālakṣhmī Tattwa within us, how it has to work out.

It's not intellectual, again I would say that, I don't want you to project your intellect into it and to find out but just remain where you are and you will find the answers, just coming to you, automatically. Just don't project your minds into it. Just you will get all the answers to every question just like that because innocence in everyone is the simple answer where all the complications drop out innocently and that is what is the love of God, is the love of God.

So don't confuse this with love, with all your nonsensical love, ideas you have about people and identification, misidentification. This is pure love within us the purity, innocence which is love and which is life itself, which is

should say is a part of that, the prized but Prāṇa Shakti is not Mahālakṣhmī, so Mahālakṣhmī is the essence and essence of everything because if creation has to take place, also if desire of God is there and if there is no Mahālakṣhmī Tattwa, then what is the use of having the desire, is finished. Supposing even if you have creation and you do not have Mahālakṣhmī Tattwa. How will you work it out? you can not work it out, you have to have Mahālakṣhmī Tattwa because they do not have any meaning.

So outwardly it is Mahālakṣhmī Tattwa, but inside, inside is, we can say, there are three cores. The first core is Mahālakṣhmī Tattwa, outside to look at, you see the growth all right but inside is the creation, that is all the elements being created and all that but inside that is the desire and inside the desire is the half-one, you can say, is Gaṇeśha.

So this Gaṇeśha Tattwa ultimately overpowers everything and permeates through everything and this is, I would say that don't think about it. Just allow your innocence to grow, simple innocence and your dignity that's very important to have your dignity. Like some people think if they wear torn clothes and walk about on the street, *[UNCLEAR]* they are big sannyāsis. It is wrong.

Why? You are not being dignified and God has given you so much why should you try to show that you haven't got anything. Just to show off that you have not got anything, God has given. This is just a sort of a thanks giving to God that God you have given me so much. You have to wear the best, like in Pūjā if you see ladies here wear all their nose rings and all their ornaments and everything,

in the temple, everything they wear and in the same way, men also wear their very clean dresses, very clean things, whatever they have, they wear simple clean dresses, whatever they have but no ostentatious, it is just a thing by which you express. The God has given this, O God I thank you. It is such a great day today to be the New Year, on the New Year day to be here on Mahālakṣhmī's place of Kolhapur and this is also called Kolhapur because Kolhasura was killed here. Kolhasura was horrible fellow like a fox and he was born again, now he is again dead. Thank God! He was here and now he is dead. Kolhasura died.

You don't think about it again your mind goes out, don't think about it, I'll tell you about it. I have deliberately avoided the name. He was born again and was pitched out.

So this is the place where Kolhasura was killed, where this was established.

So Mahālakṣhmī's incarnation came in and that's how this place has a special value that we have come here for a pilgrimage and let us be in humble way think about it. Actually these things could not take place in the West because even if they had come out of the Mother Earth who would have recognized them. Who would have known about them, who would have respected them, who would have worshipped them? That's why it didn't happen in the West too much, but it is there, little bit is there, no doubt but here now we have these all these temples and attack on the innocence has come from the Tāntrikas and so the Tāntrikas rented out this temples and they tried to establish themselves and gradually they

are being neutralised and cleaned out. These Tāntrikas have gone into every temple of all the Goddesses and they will be gradually all out, straight out.

So this is the attack that came through and that's how these Brahmins you see came down and settled in these places, so-called Brahmins and tried to preach about all Tantrik method and things here in the temple and they really spoilt the atmosphere here.

So may God bless you all.

I want you people to develop concentration of mind so that you rise above all other misidentifications and get identified with the pure spirit through your Mahālakṣhmī principle.

May God bless you.

Contents: **1983-01-0x Quote, Kolhapur, Maharashtra, India (year not sure)**

Sahaja Yogini: Mother I shall never be able to love You as I should.

Shri Mataji: Well, don't worry whether you love Me; it's important to know that I love you.

[There is a woman who had been carting around heavy video equipment:] There were plenty of men to carry it around.

Contents: 1983-01-01 **Talk to Sahaja Yogis, About the Vīnā, Evening Program, after Śhrī Mahālakṣhmī Pūjā, Kolhapur, Maharashtra, India**

The gentleman who accompanies, his name is Mr. Chatterjee but I have never seen anyone so far, playing those talas [rhythms] on tabla so well. It's alright to play

all North Indian talas on tabla, but to mix up both and to manage the South Indian talas on tabla is the first time I am seeing. Otherwise they normally use mrudungum.

It is a very, very unique combination of things we have worked out and, if you have time, do come some time to our centre and we'll explain to you what is the nāda and what does it mean and what is this great instrument which is called as vīnā, which is the Primordial Instrument. All the instruments are variations and manifestations of this instrument, which is the first, the primordial, conceived first, in the awareness of human beings and that's why it is regarded as a holy instrument.

It is in the hand of the Goddess Saraswatī, who is the Goddess of Learning and of Lalitākala, meaning the five arts. According to the great seers, the Goddess of Learning suggests or symbolizes a personality which must know music; means if a person, if he is learned, then he must know what is music. If he doesn't understand music then he's not yet a perfect, learned man. Everybody who is a learned man, must know music. That is indicated by this instrument in the hands of Saraswatī.

And there are two other things She has: one hand has got books in the hands, that she should really know the real Scriptures, or the person who is a learned man must know real Scriptures, the truths about the real Scriptures. They should be able to discriminate [between] which is real and unreal.

The another is, in the hand, is a rosary, means a person who is learned must be a detached person. If you do not play vīnā with a detached mind the spontaneity gets

controlled by your conditioning. That's why it is important that a person should be a realised Soul and, when you are a realised Soul, the spontaneity flows absolutely unhindered, unobstructed by your conditionings, by your biased temperaments, by your misidentifications.

And that is why, after Self-realisation only, I find, that Mr. Rayat has suddenly started manifesting it so beautifully and the whole thing is blossoming so good. I'm sorry that people from London could not come over here to listen to him because we have specially arranged this program in such a manner that it makes [it] interesting and understandable for all of you. Doesn't matter, next time, again, we are going to try this. But I am really very happy to see him working out the inner being within you, the inner force of Kuṇḍalinī, the force of your residual consciousness which gives you realisation, beautifully on the vīnā, which is a very, very rare thing; seldom people can do it and I could see that and I congratulate him.

And may God give him more and more of this art so that he puts Spirituality into an awakening state into many people who are seeking it.

May God bless you all!

Contents: 1983-01-04 **Śhrī Gaṇeśha Pūjā, What Are You Here For, Sholapur, India**

We talk to you directly about things and though you know I've been looking after you very well...

[UNCLEAR].

And I didn't have so much time but you know I have to work very hard and when you have only one program, I have three or four programs and I'm working very hard

for them. And you see, I've told you that Maharashtra is going to be very fast movement and we have to move very fast. Now what you have to understand is that you have come for this program of Maharashtra for what? Why have you come here? That people must understand. What I find that there is no understanding of this simple fact... with some people...

Some people are murmuring souls among you and they don't understand why are they here.

They are here to learn certain things for Sahaja Yoga.

Now, especially if you do not have an ashram also there's always a problem to learn how to live with others and in a way that we should move in a Spartan way, in a Spartan way, how to live in a Spartan way and how to be smart. Now see these people here, Maharashtrians are. Just look at them, you have to learn from them. How quick, I don't have to tell them anything. See they are so self disciplined within themselves... I don't have to tell them anything. You see, they organize, they're working so hard, you can't imagine. You are doing no work, if you look at it, what work are you doing? Just taking your luggage, putting on the busses, getting down, sleeping again. What work are you doing compared to them? But there is no smartness about it. What I find, they themselves are seeing you, they think you are all lethargic people and some of you are druggist or what is it? And the complaints are so funny, that as if you think there's a package deal of a touring thing, bus going and the organization is not good and some are dominating and this and this. It's absolutely absurd, I think.

Some people are taking Sahaja Yoga as a lethargic stuff, you see, like a drug business, that you get into lethargy, nobody has to tell you: `Get into the bus.' But why don't you get yourself? Everybody must organize, must learn something, otherwise it's a waste. I think it's a waste coming down. You have not come here for a tourism. One thing. Must understand, this point must be understood by all of you: it's not tourism department working this for you! Little comfort you get immediately you get into that nonsense and you must know that too much of materialism has brought you to this stage that you have too much of Ego. It's a big headache, for Sahaja Yoga and for you also. You know that! Too much of materialism. And this matter always tries to overpower the Spirit and your Spirit is always overpowered by the Spirit. And you get into a lethargic mood and then anybody tries to tell you: “Get fast or get do” you think, “You are dominating!" and “This is a, This is a nonsense” I can't understand this! Now why aren't they seeing they want to do any more organizing? Who wants to do it? Now, those who were complaining raise your hands. Take it over. Good idea! He says: “I don't want to do any organizing." All right! Who wants to do it? Let's see who were complaining that he was crossing the Maryādās. Now let them take over! It's not the way to behave. You see, you must have your own disciplining, you must learn disciplining. People have taken many things for granted. You see and that's what happened with Nick when he tried to do. They are very comfortably settled down in Linda's house. And there also I've seen people do the same thing. Because when you, they live there, there's

no need to have any disciplining, there is nobody to tell. That's not lethargy! Sahaja Yoga is a Spartan thing, a smart stuff.

See, look at these people, how smart they are. Early in the morning, 5:30 they're up and they are doing the jobs. You see the way they are organizing, you can't imagine how much they are organizing. In far fetched places, here also to organize everything is an impossible situation. Now what are we doing? Just trying to think that, you see, “We are in a very package deal, we are here and that everything should come to us in a way that is a tourist, this thing." Now Warren has retired, now, who wants to do the job, let Me see? Those who have complained should I put? What's this going on, I just don't understand. One person starts a joke and everybody starts with it, it's absolutely wrong, there's no tourism going on. You better go back, I'll return all your money that you paid Me and you go back. Here you have come to learn about Sahaja Yoga, how to become smart, how to be Spartan, how to be light.

How much your Mother is working at this age? I'm sixty years of age. How much I'm working, just look at that. You have to be, I'm your ideal or queen Elizabeth? Who is your ideal? I mean I just don't understand. Why are you here? And one person starts a joke, another takes it over and they all start talking like this. This it's absolutely an impossible situation. I don't have to tell them, even once. Can't imagine? In the night they cook the food for you, you know? In the night, After the program, they came down, made all that food for you here and we took it. Those who were with Me know that. They cooked the

food, all of them, these young boys and again up they are in the morning 5:30 organizing everything.

Look at that! Learn from them! You see, you people, in quality are no good, must understand. You have nothing but Ego and a self-consciousness that you are very great. No, you are not! I've to tell you very frankly. You have to come down with that Ego, completely. Material development has ruined you completely there. You see thousands of people raising here their hands. See the people here! Are we going to forget all the civilization that's doomed one in the West? You are the people, who are the foundation.

What are you, you are not saints, are you not? How does a saint live? You have seen Rāmdāsa Swāmī, I went to see. Now do you realise that you went to Mahālakṣhmī, that's one of the, one of the Pīṭhas of, one of the Kuṇḍalinī's Pīṭha, you see, of the whole Universe. Did you follow that? Looking after your comfort state or looking after your Spirit, what are you doing here? Did you go, did you understand that the temple was for that? Did you follow that point? And now I want you to see another temple and then another temple I'm going to have. It's not so easy, no tourist has gone to these temples. Actually no Indians are, no foreigners are allowed in these temples. Because you are saints they have allowed you, but behave like saints. What's this nonsense going on? Talking about comfort, this nonsense. What comfort do you have there? I feel most uncomfortably in the Western countries. There's no comfort of the Spirit. Most uncomfortable I feel. Everybody drinking, everybody nonsensically, so materialistic, so materialistic. Horrible!

Now don't think too much of yourself for Heaven's sake. I don't want you to talk that somebody's dominating you, crossing your Maryādās, Sahaj means lethargy. Why don't you have your own Spirits and your own arrangements? Everything you have misleft, two rooms, four rooms there unlocked this thing. There's one girl looking after Me, how smart she is, just see how smart she is. Even ten English girls can't look after Me the way she looks after Me. Every little bit of that she knows. I'm not saying only English but all of you have this problem. Please get rid of it! Otherwise forget the West! You have to do tremendous jobs. I'm trying to look after you the way I can.

You have to look after yourself. The way you are moving I just don't understand. Is it a package deal you have come? Those who have come for the first time are more troublesome also. Because they have never seen this before. I mean those who want to go back, can go back tomorrow. I'll give you money, you go back. Rahuri is going to be much worse than this. This is the first time you got a hotel, Aāā! I mean, I don't understand the way you have to be feeling comfortable. You want a bathroom? All right, get attached to a bathroom and move about with the bathroom all the tour.

I mean you know how I live in England, what sort of a house I have and what sort of bathrooms I have. I've have never complained, I've never thought of it even. Never! For Me it's the Spirit. And don't think too much of yourself. Please! Everything they are running, Pūjā they are running, things they are running. Look at them! Never a problem for Me.

Now you have to go tomorrow to Tuljapur place. This Viṭṭhala is a very big place here of Viśhuddhi that you have to see and you have to go to Tuljapur. They are not comfortable that's why they never appear in the West. They are not comfortable there. Who would have built temples on these stones? They would have? Do you think they would have understood Hanumāna? See the standards! Look at him how he lived. Even a person like Shivaji, he lived here. He was a king! I mean I have never put you to any test or anything, but the amount of, you see, not that I want you to sleep in the cold or anything, I didn't want you to sleep in the cold, that you misunderstood. But what's this going on? Why don't you get up 5 o'clock everyday? I sleep, I work much more than you too! Today you know what programs you have? Pūjā here. You don't have to run the, anybody's Chakras, do you? You don't have to raise mountains of Kuṇḍalinīs, do you? Stones and stones after thousands of, do you have to do that? I need not talk about Myself. Then after that this program I have to deal with intellectuals, then there's a press conference, then after the press conference there's a huge meeting at 6 o'clock.

The so-called comforts are nothing but enslavement of your Spirit. It has enslaved your Spirit, the Spirit is enslaved, believe Me. Get out of it! It's a nonsense! Your are saints, you are seekers of ages, now get out of it, absolutely get out of it! They are so Spartan, so smart. Mūlādhāra is first class, just see... Early in the morning, 5 o'clock bath and finished, they are ready! What are you thinking all the time, that you are lazy, every time people

see, they told Me some are taking perhaps drugs. That's what they felt the way some of you are lethargic.

What is there to tell you, you can't get into the bus and they can't understand. In five minutes they'll arrange things, five minutes. Can you imagine, after the program they came here, cooked food and I was there.

Now don't think too much, thinking too much makes you just lazy lumps... that's all... it's not good. Thinking is another style of materialism, is a subtler materialism. What is there to think? [Get into bhoots.] Get rid of it! And there is one bhoot who is of fussy one here, I know all of them, very well, they have been always a headache and I don't know why they have come and they introduce to another person and that bhoot goes on, on, on, on, on.

But all such misfits will get out of Sahaja Yoga, take it from Me! They'll get out! You want Sahaja Yoga or not, that's the point. Then, why worry about comfort? It's most surprising! Some of you who have come for the first time from such a long distances, like Frankfurt people are perfectly all right, Toronto are all right. From New York they are all right, these are all right, Steven and his wife they are all right.

I mean they all have the same proffle. Why other people? Now, please, try to give Me some joy. I don't want to hear, “Now he wants to resign." You see, everybody starts talking, “He's very dominating." But why? What are you? You don't deserve any bad thing better, do you? You have to be smart. Are you smart? Your Mūlādhāras' like stones hanging round, all the time thinking, thinking, what? Clear your Mūlādhāras! You must have Me as your ideal in Sahaja Yoga. Look at Me! I mean, can you

imagine? I have so much *[UNCLEAR* slunk]! I'm working very hard, you know that! I'm not, I'm marathon, you'll go away. You'll go to England, you'll go away to Europe, you'll go away! What about Me? I'm still working, working, working, working... Only reason is that I have a very good Mūlādhāra and a very good Āgñyā and an excellent Sahasrāra! I don't think! Talk too much, better not talk! I think you better stop talking to each other! That's the best way it will work out. All this nonsensical things you talk, you have nothing great to talk, sublime things, about God, about the Spirit. You must have peace in yourself! If you have peace, you'll enjoy it! The whole place is so peaceful! Why don't you see the peace of this place which is lacking in that horrible comfortable place? All of them! There's no peace. Feel the peace, you are saints! Feel the peace of this place; in their hearts see, feel their peace. The riches have ruined you. That's the curse! That's the curse! So feel the peace of the place! There's no peace within. Feel the peace within. What side of all these sides you see, anywhere you go? “Oh very nice, this is very nice." What is nice about it? The peace of it, the subtler side, you have to be subtler persons to feel the subtle side. Feel the subtle side, the music behind, the fragrance behind.

If I'm your ideal, I feel very comfortably, to be very frank. I don't know when will I be out of that, I call it vanwas, is that staying in a forest, a jungle. I feel it's a jungle of people who are anarchist, arbitrary, such ego-oriented, horrible people those who don't know how to talk to each other. Horrible! I'm for vanwas, I hope it finishes after twelve years. It's real vanwas for Me! But now, you

people give Me some hope! Now, no more talking like this! Shut up yourself for this point! Absolutely! Nobody's going to talk like this, it's anti-God. See, why are we here? Get individualistic in the sense you sit down for meditation, don't talk. Sit down for meditation! You see you are trying to find organization mistakes. I just can't understand, what is the matter? Pull your ears for this, please pull all of you. No more of this nonsense. And next time such people should not come, I request such people who have been complaining please don't come. Look at Genuine, she's so old, she never says anything. Whenever I ask her she says: “Mother, I'm happy." You are not going to enjoy anything, you see, because you are not subtle. Even coming to the subtlest places you don't enjoy anything. Where is your attention going? Inward? Believe Me, they're the most peaceful places where you have been. But your brain will never allow, this brain, this horrid Ego will never allow you to enjoy.

So get rid of it! All right? Please, I want you to enjoy. I brought you here to enjoy. Don't criticise! And any side of comfort, you just get rid of it. You've got a cot? Sleep on the ground. Best is. Tell your body: `I'm here! I'm a seeker!' You must know your true nature that you are seekers, you are not like other people but that is still sticking on into your heads, you still think on those lines.

You must know that you should never challenge anybody who's organizing. That hurts Me! Never! He's doing some job, you're doing no job. Must do that! What job are you doing? Very nice to criticise another person! What job are you doing? Are you responsible for anything? Even for your clothes? He's the one who is working hard, it's very

nice to criticise such a person! It's like any Dick, Tom and Harry comes and criticises Me that: “Why don't You do this and why don't You do that?" Is exactly the same situation. You are doing no job, very nicely criticising others. Why, for what? You think you've paid for yourself, you've paid very little, not much, I know that. How much I had to take for your travelling and the amount of luggage you have brought. It's a big problem in these places.

Even if you pay you can't get it. But I've not brought you here to give you comfort at all. You must know I told you it's a very Spartan one. I've told you some that don't get more than 80 people. It's an impossible situation. You can't get busses, these are from the state trading busses, we got with great difficulty. They gave us two busses, you see. They have their own passengers, they have to sacrifice a lot. These are not the places we, I didn't want to travel this time, you remember. I was telling I don't want to travel this time with all of you. I want to go alone.

I've told you that we have to spend some money, more sometimes, sometimes less, sometimes we have to spend quite a lot, much more than we expect, sometimes it's lucky that we have less money. Whatever money remains it will go for Sahaja Yoga. I don't want your money, you know I've already overspent My money. My bank is exhausted! You know that all! So, why you talk like this? You don't think how much Mother spends. You never think on that. You know Portugal, what happened. You know how much money I spent in England. Then you don't think on these lines, do you, ever? Are you going to return that money to Me, anyone of you? But why stupidly talk like this, as if there's some tourism

department going on, you paid for the money, you paid for it, so you find faults with the organizers. Give up all these bad habits, absolutely. Even if somebody beats you, you are not to complain now, keep it on that point. Ego needs beating, nice beating, I tell you.

Sometimes good beating will sort out all the problems. Otherwise, if nobody beats you, beat yourself. That's the best way.

Now not that everyone is like that; most of you are very good, I know you are enjoying, but these are few people who are bhootish and they are creating this problem and these bhootish people will give others bhootish nature, so be careful. Those who have got the bhoots better turn them out. Just don't do anymore of this, just stop it. All right? We have to have self discipline. These people, look at these people, no problem, no problem, such love, such organizing capacity. How much, from 3 o'clock they're waiting here for Me, 3 o'clock. Every ended up, you see, they came back by 3 o'clock. Twelve hours. Again today they are back for Pūjā. And they are engineers, they are doctors, they are everything. At least everybody's a graduate, at least, minimum.

It's true that in England even a garbage cleaner gets more money than these people can get. But what, so what? Are they going to carry their money with them or their bathrooms and their comforts? All these mythical ideas you must give up. This is another world, that's another world. You have to adjust yourself to this world. It's very sickening to Me, I tell you. Even if there are one person like that, will be so sickening. Now don't pay any attention to anybody who talks like that. Just shut him

down! You are so many who are good, only there are few who are funny. You just shut them down: `Now you will shut up, this is a bhoot!' on this point. You must get up early in the morning, do your meditation, get into busses. You are here for a package deal for one month to spartan yourself.

All right? So, it's a promise. It's a promise *[UNCLEAR* since forward].

Now with Rahuri it's even much more, you see. The villagers, they are going to get a shock that I brought some drunkards with Me and those who cannot get into the bus, can't get out, everything and, “I can't do this and I can't do..." Everything you have to do! Just it's a promise, it's a promise. We are going to do it. All of us! All right? Even I! [Laughing.] All right! May God bless you! So not to feel bad, most of you are all right, most of you are enjoying, I'm not saying, but there are few who are stupid and you don't listen to them! Just don't listen! If somebody says that you shut that out, you'll be amazed if you shut that person out, you'll be amazed that person will improve, you'll help that person! Nobody should talk like this! Noone should talk like this! It's nonsensical! All right! May God bless you all! Let's sit down with the Pūjā, with that smartness! We have to be smart not lethargic in Sahaja Yoga! Sahaja means what? Like lazy lumps? How are we going to do the work of the whole world if we are lazy lumps? Imagine the amount of mountains we have to lift in the West, to think of them. And here we are already exhausted... Hāa, like that! What are we going to do that? Ha! It's a tremendous task! See, it's like, I don't know what to say, it's like

taming a hippopotamus or I don't know what to say! Horrible! And you better smarten up yourself, maybe next year I may never bring anyone of you, I tell you, I'm so fed up. But this is the style, is the last chance perhaps, now I was saying it's just last time but everybody said: “No, no Mother!" Is it, remember Gregoire... I was not wanting, really, anybody to come! It's a headache you know! You still carry the ideas. Now, so that's Paul! And look at down there! Look at him! He's any *[UNCLEAR]*, he has a house of his own, he has a wife, he has children, all that he's given up, he's coming. Look at him! He's a big engineer with the Municipality, he's so doing so much of big, big bridges and all that, he is here? Do you see in it any Ego? Do you find any Ego in him? Learn, learn from them. If not from Me, from them.

The one who arranged our program is a multimillionaire, do you know that? He's a multimillionaire.

The one who took us to his to his farm house, he's a multimillionaire. But do you find anything, any...

While My grandchildren themselves have just come from a multimillionaire family. Do you find that in them? Why? Not that they don't have money, they don't have comforts. But he told Me that “I haven't got a car", he's a multimillionaire, “because I don't need it, I need a jeep so I bought five jeeps." Finished! But if somebody gets some money there, he'll have a swanky car to show off. They can't understand, “Why to buy when I don't need it, I'm working on the farm." Finished! And you're telling Me he'll go by ordinary bus, he'll do everything. He's a multimillionaire, can you believe? Have you seen his business? How many *[UNCLEAR* looms] he has got, which is

working out? Not that he's miserly, how generous he was! How his wife lives, how everything, just see! They might be having hundreds of diamonds in the house but they don't show off. I mean we must learn from them, you see, also there are poor people, all of them are smart, very smart. They may live in a small, little tent but you see, early in the morning they go to the river, have their bath, they're ready for the job! Smartness is one of the things you have to get in Sahaja Yoga. Spartan! Living should be Spartan and smartness. Those two things you must keep in you.

All right! Otherwise they think half of you are sick. All right! So no thinking, just now. Put yourself into Nirvichara. Watch Me, all of you, watch Me. Raise your heads again.

All right! You've got rid of your vices and things, but now get rid of this nonsense, of a Ego. This is the biggest problem you have. The Ego is the biggest problem. And when you think you are dominated better accept it, hundred times. Don't tell others! Who's right-sided, left-sided, right-sided, left-sided, everybody's branding everyone! In Sahaja Yoga nobody remains left, right-sided.

Better? Much better. Whatever is good for the Spirit, the enjoyment for the Spirit, then you will be in the other world, you see. Forget this nonsensical world that you have been. You are all seekers, you are great people, God gave you birth in that country, just to see what materialism is, not to get involved into it. Get out! But evolve! Get out! We have all this poverty, we have all this discomfort. See the peace.

Feel the peace of the landscape, of human beings, everybody has peace. Look the smart little children this age, so happy here. All right? May God bless you! And don't look miserable, anyone of you. They can't understand why are you looking miserable. They are, they think that they are not doing their work properly or you don't like the food. They just don't understand because you look so miserable, anxiety and tired for nothing at all. All right, may God bless you! Let's have it now! Get up fast and go down! Let's see how fast you can get up. All right! Let's see how you get down.

Contents: 1983-01-04 **Address to Sholapur Brunch of Indian Medical Association, Sholapur, Maharashtra, India**

The organizers and the members of the Medical Association in Sholapur. It's such a pleasure to know.....

Contents: 1983-01-04 **Talk at Rotary Club (Marathi+English), Sholapur, Maharashtra, India**

[Shri Mataji Talks in Marathi: MISSING.] Question [in English]: What should be the relation between state of mind and awakened Kuṇḍalinī? Will it affect the body or mind? [Shri Mataji replies in English:] Actually it affects everything but let's see how it works? Now, what is `mind' also is not a very clear-cut idea. People don't have a clear-cut idea about `mind', you see.

To them `mind' means `mana' or `buddhi', or `ahaṁkār'. Now, we will make it clear to you that when the Kriya Shakti [Power of action] works and acts then you create Ahaṁkāra that is Ego, a balloon like thing. And when the

Mana Shakti works then you create the Superego in the head.

So we have two balloon like things called Ego and Superego.

When they meet each other and the calcification takes place that's how this Fontanelle bone area becomes hard and we become `I', `you' and `you'.

Now, the mind which you are talking, I don't know which you are talking about, but if you think how the thought comes to us. Let us see the thought process. A thought rises and falls off by itself; another thought rises and falls off by itself. The rising of the thought we can see but not the falling of it.

Now a thought comes to us either from the past or from the future and again it disappears in the past.

Our attention is jumping on the cusps of these thoughts but in between these future and past there is the present and that gap is called as Vilamba in Sanskrit language.

Now what happens when Kuṇḍalinī rises, these thoughts get elongated and the space between these thoughts becomes wider.

So your attention remains in the present. Like if I say: “You stand in the present." You cannot because there is no thought. You become Nirvichara. You go into the state of Nirvichara Samādhi in which you are just without any thoughts but if you want to think you can think.

You become a Sākshī. You start seeing thinks as if this is a drama going on. The drama is over. That is the state you get.

So, the Ego and Superego, both of them are sucked in. When the Kuṇḍalinī rises at the Āgñyā Chakra these, both the things are sucked in.

Now, Ego is Ahaṁkāra and Superego is all the `paffpas' [sins] and all the ideas we have got the `kusamskaras' [base thoughts?]. Everything gets sucked in and that's how a space is created at the Fontanelle bone area and you get a Tālu which is soft and you get a Cool Breeze coming out of your head.

So this is what is the Kuṇḍalinī which makes you thoughtlessly aware.

So the state of the mind is thoughtless awareness to begin with but after some time you become Nirvikalpa. There's no Vikalpa in your mind, nothing. You know this is it. That's what one has to go into and that is the state is little difficult because you get it so easily, Realisation, that you don't value it properly. As we have not valued our Independence. The same way. Those who have suffered for it, have worked for it know. But we do not know how much they suffered.

In the same way those who have worked in the past for Kuṇḍalinī organization we have not known that. And so whatever they have suffered and done for us we do not know and because the Kuṇḍalinī rises so easily that you are not bothered to go further with it. You just enjoy that state of thoughtless awareness but you have to become Nirvikalpa. Till you become Nirvikalpa you are not a master.

To give a concrete example, I'll give an example of a car. In the car, you have got a brake and an accelerator. You are working out the brake and the accelerator in the

beginning you don't know how to drive. You don't know how to rive. And to drive the car you have to work hard to know how it works...

[GAP]

Contents: 1983-01-07 **Śhrī Gaṇeśha Pūjā (English+Marathi), Rahuri, Maharashtra, India**

[Shri Mataji talks in English:] You have come here to learn something, to go deep into your experiences of the knowledge of your roots. Śhrī Kṛiṣhṇa has said that this is a tree which is upside down, the roots are upwards and the leaves are outwards. In the same way, you know that Kuṇḍalinī really, when it rises in the Sahasrāra or above Sahasrāra, then you start getting the feeling of Kuṇḍalinī.

So, one has to understand that when we are now getting subtler and subtler and trying to feel the Kuṇḍalinī, we should try to get out of materialistic attitude and materialistic viewpoint and materialistic sticking point.

I had met one Guru before, because you know I went to all of them. And I asked one of them, I said, “Why do you take money, so much money from these people who are Western people? So much, why do you take and just they become beggars, absolutely, like beggars they become because you charge them so much and so heavily?" And he told Me that unless and until you make them beggars they will never take to God. They are too rich to be near God.

I mean, this explanation I just could not understand, it was absurd, I could not understand how can this explanation have any proper meaning that you should make people beggars and then they be nearer to God. I

said, “In India we have many beggars, do you think those beggars are nearer to God?" So he said, “No, otherwise, you see, they get stuck up with their money and you must just make them absolutely without any money, moneyless." So, I mean, of course to such a stupid person what can you talk? What can you convince? I couldn't say to him, `Then why are you taking the money?' Then he would have said, `Because I'm detached.' You see, anything one can say like that if you start like that you cannot just stop it.

But one has to understand that materialism has gone into our roots and if we have to clear out our roots we must get out of materialism. That's important, but that does not in any way mean that you torture your body or anything, I don't mean that. But what I'm saying, your attention. [Addresses some children.] So now, when we are dealing with our roots we have to be in the center, in the core. In the core mean we are taking in, sucking in the feeling or you can say the... Feeling and awareness put together, what do you say to that in English, is there any word? Is there any word which makes awareness and feeling put together? Is there Gavin? Answer: Experience.

Shri Mataji: Oh, yeah, experience, you can say the experience into your awareness and feeling. You have to get the experience into your awareness and feeling.

In Marathi it's a very simple word zāniiv comes from the word ja. Ja comes the word spontaneous.

Also ja has two meaning. Ja means also gñyāna, awareness and also it means spontaneous zāniiv.

So you start sucking that within yourself, when you are not entangled into other things. If your attention is entangled outside, you cannot enjoy.

So, to be lost into which is Samādhi you see, is the one where your attention is completely drowned into the experience.

That is what we have to achieve.

So it's not only materialism, also emotionalism, all kinds of `isms'.

We are attacked by all kind of `isms' since the history of *[UNCLEAR* word] started in this world I think and now the unholy thing that the `ism' latest is, could be `Sahaja Yoga-ism' also could be the greatest word because now there has to be attack on Sahaja Yoga also. In this one is that as I told you, I didn't explain it properly or you didn't hear Me properly that day, that Sahaja Yoga does not mean lethargy or slowness, not at all, but is a quick and a fast stepping in into the dissolution. Very quick! And once you very quickly dissolve into it, the whole movement of your body is quick but not jerky, is smooth and quick, rhythmic, is musical, neither is awkward nor lethargic, but is musical, is as a rhythm about it, is very gracious. The whole movement of dissolution can happen to you very easily if you don't allow your attention to be attacked by all these `isms'. There's no end to it, I mean, if I have to write all of them I think we'll have to need at least one book to write all the `isms' of the world, there's no end to it, which we have created.

Then the worst of all is now I think Sahaja Yoga-ism in which first of all is the feeling of lethargy: “It will happen Sahaja, sit down. Mother will do everything for you." The

another is Sahaja Yoga-egoism" in which we haven't got one fellow *[UNCLEAR* lying] there, in which people get into Tantrums, try to show off that they are great Sahaja Yogis, they have reached the third stage or the seventh stage or whatever they may. Now it's good this example is a very good example, I wish you had taken up.

But see the expression of the Indian, the enamoured expression, see, it's so genuine, they can't control the singing. Now, see, it's like a... I just don't know, but people think it's a package deal sort of a thing.

It's so nonsensical I tell you, that either they could be taken out all their money or if they are to be told now for Pūjā, all of them are paying twenty-one because they have to do this or this extra work, so they are charging twenty-one and if you tell them for Pūjā they'll even give them fifty-one. But I'm told some of you have even refused that I mean it's so shameful I tell you! It's absolutely shameful! Can you imagine? What is twenty-one rupees to you? To them it's quite a lot, because it's some sort of part of you you are giving which is so nonsensical, is a *[UNCLEAR]*, is a sign of complete negativity. Left Nābhī. It's a problem.

Materialism it's complete materialism. Those who have been, say, doing vegetarianism are materialists in India, we have seen the cases like you see the Jains and the Marwari and the Gujaratis. They're all vegetarians, supposed to be compassionate people, they build some temples also and sometimes they give to poor people also and sometimes to people like Hare Rāma Hare Kṛiṣhṇa who are begging in India. They give money to them. Supposed to be very compassionate... They're

more compassionate to chickens than to human beings. We have that kind.

At the same time I've seen in the West also such materialistic people, I mean, they have no shame.

So when you just turn and see that, should abhor that, abhor, it's shameful! How could you be like that even in Sahaja Yoga? So as I have told you, there's some people who are materialistic, some people who are emotionalistic and some people who are egoistic. Now leave all these things on the sides, then you come in the center.

Now you are in the center. In the center, people enjoy just the love of their Mother, like Śhrī Gaṇeśha does. Just think how your Mother loves you, finished! Can you? This very sweet feeling?... And who is your Mother if you really believe in Her, in Sahaja Yoga, these two things should solve the problem. No more thinking. Just think how much your Mother *[UNCLEAR]* that means you are jumping onto My Kuṇḍalinī and when you jump onto My Kuṇḍalinī, then there is no thought, you cannot think. When you think that how much your Mother loves you, you are jumping onto My Kuṇḍalinī and that time there's no thought. It's very simple to meditate in Sahaja Yoga because you have somebody in person. They never had somebody in person.

So I can understand their problems, there was nobody in person; they had to do it in the air. But here a sure shot thing: you can feel your vibrations you can feel My love and you can feel your own quality. It's very simple. But it's not the love that is selfish, it's not the love where you say, `Oh Mother loves me so She'll look after me, She'll

do everything for me, She's going to do everything.' It's the love that `Mother loves me so much, what can I do for Her? Which is the best flower I can give to my Mother? What does She need? She needs nothing. She doesn't need money, She doesn't need anything.

What can I give Her? Which is the best flower?' Like Śhrī Hanumān was given a gold necklace by Śhrī Sītājī and He saw that and He was sitting on a tree and He was breaking one by one all of those big-big gold balls of His necklace.

So Sītājī said, “What are you doing?" He said, “I'm trying to see in these balls where is Rām." He said, “None of them has, so I'm just breaking them to find out, otherwise why should I wear it?" And then She said, “Really? Where is Rām?" He opened His chest. He said, “See in My chest. He exists there." So it is never one sided sort of a thing, it's a thing that exists within you and you feel that and then has to be reciprocal. In the water, if there is a ripple it goes to the shores and then it returns back.

So with this force only, I tell you, you can conquer your ego and super ego. There's no way out. And for these Indians it's very easy to do because they know their Mother's love.

I know there has been an attack on that point and the mothers have been funny there. But doesn't matter, when you see something just put yourself to it. To feel your roots. These are your roots and then you see the enjoyment. The Mother Earth Herself is sucking you now. She's sucking you down. That is how you meditate now. This is how you have to meditate and it's such a security

giving thing. It will change your expressions, faces, everything. And that enamoured expression that you find in these people will be on your face *[UNCLEAR]*.

And complete silence will exist once you come on My Kuṇḍalinī, but not through your mental projections, but through your meditative, spontaneous experience. It's very joy giving. Just feel the joy of that.

You're all with Me here and the joy of that feeling will really enlarge your hearts and then, then you can give it to others. You don't have to be crazy about these things but just to feel it within yourself.

All right, now I move on to Indians because they are different style of people.

May God bless you! [Marathi.] Now, I was telling them, I must translate it to you in English is the most important point I was telling that now you are transformed, now you have become saints, no doubt of it. Now from an egg you have become a bird, but, now what should happen to you? Your Kuṇḍalinī is still in the sacrum. How it has happened that now you have got all the Gaṇeśha Shakti? I've made you like Gaṇeśha, in the same pattern as I had made Gaṇeśha you are made. Now you have become a Gaṇeśha and from this Gaṇeśha stage, which you think you are a Gaṇeśha now, if I offer you a throne of Śhrī Gaṇeśha, if you have to sit on that throne as a king, then what should happen? Actually, that now your Kuṇḍalinī should not be anymore in the sacrum bone, but in your stomach, because Gaṇeśha's Kuṇḍalinī is in the stomach. In the stomach means in the Nābhī Chakra. Means all your seeking has been so far in materialism, has been in other things like in money, or in power or in love or

whatever it was. But now your Kuṇḍalinī itself is in the Nābhī Chakra, means your seeking is nothing but itself has become the Kuṇḍalinī. Your seeking has become the Kuṇḍalinī, means that you are the giver, now you are the Guru, you have now become the Guru. When the Kuṇḍalinī starts from the Nābhī that means now you are the Guru, now you have to give all the blessings, everything, as a Guru does. Now you all have become Gurus.

But that's only possible when the Kuṇḍalinī has risen, has lifted Her abode from the sacrum to the stomach and this stage, unless and until it has arrived, you are not a confirmed Guru. Once that has happened you become a Guru and then you can really impress people and work it out. It has to be done very fast. It has to work out very fast and for that, first of all, please get rid of your entanglements which are stupid.

If you really believe that you have to progress in your seeking, that you have to have your Kuṇḍalinī coming up from your Nābhī, then please, please hurry up, please try to work out, otherwise you are very few who have been given also the privilege of doing My Pūjā, very few. And those who have been given have a chance to develop to that stage and once you become that, all of you who have achieved that stage can become the Gurus. And for that, you have to have only wisdom. Wisdom, keep to your wisdom and like Śhrī Gaṇeśha has His wisdom and in that wisdom He knew one thing: that His Mother was all powerful and that He doesn't have to worship anybody else but His Mother. And He has to have all the powers

which are granted by Her. His powers, no one, even Brahmā, Viṣhṇu, Maheśha does not have.

They cannot reach Gaṇeśha; They cannot reach His stage because They are one-sided but Śhrī Gaṇeśha has all the powers, all the Chaitanya powers He has.

So to become like that, to be like that, He should be your ideal: how He behaved and how He would sacrifice anything for the sake of Mother.

Here there are people who don't even want to pay for something like a Pūjā *[UNCLEAR]* stuff which you may just spend away somewhere in nonsensical things, because your attention has to be brought round completely. It has to be completely severed from all these nonsensical entanglements and there should be less talking and more experiencing. Then only it's going to work out.

It's a good pleasure and a great thing to be here in this holy land, it's a very holy place you can see it, so peaceful. Try to feel the peace within yourself that is within every human being and after that you have to know that this peace that you are achieving has to be given to others. In Sahaja Yoga, perhaps you have realised, whatever you have got from the nature, you can release it back. For example if you give vibrations to a plant you can make it grow. If you give vibrations to a flower you can make it sustain its life. For the first time you are giving something to the nature, but as soon as you grow up to that state of a Guru then you can give the peace that is in the nature, you can give the feeling of bliss that is in the nature.

But first achieve it within yourself. Make this go inside you and see that bliss settle down within you. You don't

see other nonsensical things which are very disturbing sometimes to your Western mind.

For example if a telephone is not working or the road is not all right, if the bathroom is not... These nonsensical things have no meaning, but feel the peace outside, try to establish that peace within because this peace you have to give to others.

The whole development plan that I have is very fast and I'm sure you'll keep pace with it.

So may God bless you! When you sit down just feel the peace and try to achieve that peace within yourself. Don't pay attention to nonsensical things and this with this your little brain trying to criticise, but try to achieve the peace within yourself so that you can give peace to others.

It's not proper that some of you are looking after the negative people all the time, it's not proper. You don't have to look after the negative people. Just leave them alone. Keep out of that because negative people can always bring you down. Don't try to improve the conditions of the negative, leave them behind.

You go fast. Once you have achieved that state then we can arrange for them to come. For example, if My car has failed, all right, I got into another car, which was all right because I have to come to the program.

Then I can send the tempo from here to get that another car where there were some people who were not supposed to be at the program. That's how you have to be quick and not bother your heads too much about the negative people who are sick people, trying to be compassionate. There's no need. Tell them, `Tell Mother.

Let you talk to Mother.' Look after yourselves and don't be bothered about them. This is another nonsensical idea of compassion.

Compassion is not mental projection I told you: the compassion that works, that flows. It's all mental you see for us compassion is mental, every idea, peace is mental, bliss is mental, God is mental, everything is mental for us. He's not. He's the one that resides in the heart as Spirit. He's the one who works through the compassion. And now you know My compassion is that it flows, it works, it acts. It's not mental.

So don't try to be mentally concerned with people and try to be compassionate. All right? I hope you understand that the compassion is not a mental idea that `We are compassionate, we are working for the unity of the world.' And all that.

Even unity and all those ideas, even the idea of collective understanding is in the heart, it should work. In Sanskrit it is Kāryanvit. In English there's no word. Kāryanvit is embodied with the working capacity, embodied with the working out capacity actually `working out capacity' you can translate like that. It should work. If it does not work out then what's the use of looking after somebody who is sick? “All right, come along..." This is nonsense, this is very mental. Just don't waste your energy; you have not come here to look after the sick.

I hope you understand this idea of looking after the sick and being very... is all ego-oriented, see “We are trying to help the sick, we are trying to help this, that” all ego-oriented. Another superego-oriented that we are sacrificing this and that and we are becoming beggars in

India like the Hare Rāma Hare Kṛiṣhṇa. Beggars, parasites. Both are just the same, now please don't do all these things and try to keep yourself glued to one ideal: that you have to ascend faster.

You have to individually ascend faster and collectively pull out everyone but not those who are heavily laden with problems and who are creating problems and objecting your progress. That doesn't mean that you are not compassionate. You know how much compassion that I have but My compassion doesn't make stories, `I'm so compassionate and this and that.' Up to a point is all right but don't so too much bother about people who are dragging you behind. You have come here for a training, a training into the understanding of awareness which is compassion. You all have to, even, even you go to the school, you're not bothered about a person who's lacking in the class, do you? You want to study fast so that you come up. In the same way, I would request you not to bother your heads too much about people who are trying to pull you down because I don't want you to be pulled down. That's My compassion for them and for you. Let Me look after them and you just don't worry your heads about them. It'll be all right.

See, may God bless you! Let's have a Pūjā today and this Pūjā will be simple today. I think we'll have Gaṇeśha's Pūjā and then we'll have Devī's Pūjā today and then we'll have a good havan. That is a good place for havan.

[Shri Mataji talks in Marathi:] I am feeling so happy to see all of you as I wanted to come to Rahuri. Earlier, the Devī has done a lot of work in this pure environment of Rahuri. But the work that is to be done now is the most

auspicious and purest of all. That's because killing Rākshasas is not an especially pure work. Instead of confronting such dirty people, at least once I should enjoy the fun of making those people, who like beautiful lotus buds, are waiting somewhere in the world, into flowers and fruits. I had this desire for a long time and it has been fulfilled in this birth and I am enjoying a lot by seeing your joy. Whatever one says about this land of Maharashtra, which is like the support of this land of India, is less. This Maharashtra has the Kuṇḍalinī of the whole world. This I have told you many times. The proof from the scriptures is that this land has three and a half Pīṭhas...

[The three and a half Pīṭhas in Maharashtra are at Tuljapur [Śhrī Mahākālī swayambhū], Kolhapur [Śhrī Mahālakṣhmī Swayambhū], Mahurgad (Śhrī Mahāsaraswatī/Śhrī Renuka Devī swayambhū), Saptashrungi [Śhrī Ādi Shakti Swayambhū]. All these places are described in Devī Gītā.]... and only the Kuṇḍalinī can have three and a half Pīṭhas [seats]. Also, the Ashtavinayak are in Maharashtra. Whether these are true or false, you cannot understand unless you are a realised Soul. But after your Realisation, you can find out from the vibrations coming from these places. But in Musalwadi, Sahasrāra itself is present. Then, you will understand what a great land this is. Also, the miracles that will take place here cannot take place anywhere else. You may not know this but this is a place full of miracles.

There was Macchindranath who was born here and he was a great incarnation of Ādi Guru Dattātreya.

He worked very hard in this place. Before him, Shandilya muni was here who made this place very pure.

Thus this land of Rahuri is so pure that Śhrī Rāma and Śhrī Sītā themselves had to remove their sandals and come here.

So, it is on such a pure land that you are sitting and are extremely fortunate. It is because of this good fortune that today we have so many seekers and so many Sahaja Yogis who are doing this work.

Concerning the Pūjā, you know that we allow only few people from countries like England to come to the Pūjā. We have people from twelve countries over here and there are around 5-6 from some countries and 10-15 from others. But very few of them are allowed to come to the Pūjā.

The reason is that in foreign countries, people have forgotten what Dharma is. There have been a lot of attacks on Dharma and some of them have been so dirty that people don't know the difference between good and bad. An Indian, however horrible he is, knows that he is doing something bad. But these people don't even know that. However bad their actions might be, they will still ask, “What's wrong?" This means that a certain authority that is given to Dharma is not there. They behave as they wish and then it becomes like hell.

So, to come out of that hell, take to Sahaja Yoga and to become completely pure like coming out of the havan fire is a very miraculous thing. This means that these people must have been very great saints in their previous lives. Any other person in their place would have run away.

But that is not your case. You have grown up in a very Dharmic environment.

Some of you may have some problems here and there which Sahaja Yoga can solve, but overall you are leading a good life. It is not so for the foreigners. However, the hard work and dedication with which they work Sahaja Yoga out is not seen over here. That's because we don't value the things that we have got so easily.

You can see clearly that in Khedegaon, 6,000-7,000 people get their Realisation in no time at all but in the foreign countries, I have to work on one person for five months and break My hands.

So, people over here don't understand what they have got through Sahaja Yoga.

Once many Sahaja Yogis went to meet Gagan Gadh Mahārāj and he told them, “It took me a total of 21,000 years to feel the vibrations. I was initially a frog and I remember everything from that time and from a frog I slowly became a human. In that time, I used to always say to God that `O God, somehow give me the Chaitanya.' Even after becoming a human, I did penance and meditation for around 12,000 years. Only two births ago, I finally got the vibrations on my hands. This being my third birth of feeling vibrations, I know its importance. But you people have got it just like that from Shri Mataji.

So, I asked Her many times that `why are you giving this thing so simply to these people? They don't even have the brains to understand this.' So, Shri Mataji told me jokingly that `it is just My wish!' " But it is not so. The time has come for it. When the time of giving comes then it has to be given to everyone. If human beings are not

saved now, then the whole creation will have to be destroyed. The entire creation rests on Man. If Man is destroyed, then God will have to destroy the Creation and it will be a complete waste. Thus, the time has now come, this blossom time, where so many people are getting saved. Nevertheless, this is a very important thing that is taking place.

So, we must understand that this special gift that we have got must be used in a special way and we too must become special. Otherwise, such a great thing will just become a waste. For example, if you place a beggar on a king's throne but he continues to beg then what is the use of the kingship? So, the beggar should understand that I was a beggar but now I am a king and he should assume the kingship with all the grace and attitude of a king. How else can he rule? Now those who are ruling in our country were initially beggars but now they are much worse as they do not have the qualities of a ruler. But, in Sahaja Yoga your basic nature is itself changed. You become a different personality. Like I said earlier, initially man is like an egg. At that time he is called as `mānav.' This means that he is not a `pashu.' An animal (pashu) is in the pāsh [noose] of God and it cannot get out of that noose. That is why it's called as `pashu'. Now, just when the pāsh has come off, man exists like an egg and he has the complete awareness of how to develop himself.

But after that awareness, how he behaves, where he goes, what does he take upon himself, all this comes out of his mental activities. By doing all these things, he slowly develops subuddhi [wisdom] in his life. Once this wisdom sets in, he takes to that path which is the path of

God. But many people have not taken to that path, yet they have got their Realisation. This means that they have been reborn as a bird.

On the outside, we don't see any similarity between a bird and an egg. But when the bird comes out it is in a completely different form.

So what is wrong in giving you kingship when you are in a completely different form? This is what I told to Gagan Gadh Mahārāj, that why do you feel so bad about it? Because now the form is completely different. Then he asked Me, “How many people are ready to give their lives for You?" I told, “I don't want to take anybody's life! There is no need to give any life." But the form in which I have brought you now, you have become saints, great saints. Now, the fact that you raise the Kuṇḍalinī on your fingertips is possible only and only for Śhrī Gaṇeśha. Earlier, people used to raise the Kuṇḍalinī on each Chakra, one by one and wait. But now, just by moving your hands you can raise the Kuṇḍalinī of not one but many people. What a great position of Śhrī Gaṇeśha has been given to you! Now you have to see, have you come to the Gaṇeśha swarūpa? Śhrī Gaṇeśha has only one speciality: eternal Bhakti towards His Mother. That's why Mother has given Him all the Shaktis, all possible Shaktis.

“Sarva Shakti Samanvite." In this Gaṇeśha Shakti, all the Shaktis are present. When you recite the Gaṇeśha Atharva sheersha, you see that He has all the Shaktis. You see Shaktis of Śhrī Brahmadeva, Śhrī Viṣhṇu and Śhrī Maheśha are present but the essence of these Shaktis is present in Śhrī Gaṇeśha.

The reason is this that if the Mother is the Shakti of Parameshwara then She has given the essence of all Her Shaktis to Her Son.

So all those Shaktis are with Śhrī Gaṇeśha.

So, Mother has given us Gaṇeśha swarūpa and given us birth like She gave to Śhrī Gaṇeśha. And our Kuṇḍalinī which is rising from the triangular bone should now rise from the stomach. Just like Śhrī Gaṇeśha's Kuṇḍalinī is in His stomach...

[This is the reason why Śhrī Gaṇeśha is often shown to have a snake on His waist because the coiled snake represents the Kuṇḍalinī.]... in the same way instead of the triangular bone She should now come from the stomach. Only then you will become great saints.

So, what is the meaning of `rising from the stomach?' It means that whatever desires we have like seeking God or earlier we used to seek money or food, all this working of the Nābhī Chakra that used to take place now has the Kuṇḍalinī itself. This means that we don't have to seek any more. We sit on the Kuṇḍalinī Herself. Only when this state is achieved, we can certify that we have passed the test, we have become true saints and we don't have to go beyond this.

Contents: **1983-01-1x Conversation with James Murdoch about his Marriage, Rahuri, Maharashtra, India**

James Murdoch [after quite some time]: Yes, I'd like to be married.

Shri Mataji: I've got two girls in mind, an Australian and an Indian.

James Murdoch: All right, yes. Mother, I'd like to marry the Indian girl.

Shri Mataji: Well, she's that girl over there.

[James knows instantly who she is as he stayed in their house overnight because they were near the airport.] Let Me know in a few days' time what you want to do.

James Murdoch: OK, Mother. Thank You.

[After receiving some good repots from Patrick Redican about the girl]: I'll accept her.

Shri Mataji: It may take a little time because I haven't spoken to the girl and I haven't spoken to the family. [She calls Raolbai and James goes out of the room.] [After half an hour Shri Mataji comes out to speak to the Sahaja Yogis:] I've got some good news that Malcolm and Kamakshi are to be married.

Contents: 1983-01-11 **Talk to Sahaja Yogis, Farewell, Rahuri, Maharashtra, India.**

.. to Dhulia. Reaching there about, let's say four hours it takes, don't stop the car much in-between. You reach there four hours, so even if you leave about let's say 10:30 you should there by 2:30. But try to leave at ten, it would be better, so that you can reach there about 2.....

Contents: 1983-01-13 **Talk to Sahaja Yogis, LeftMūlādhāra and Supraconscious, Dhule, Maharashtra, India**

In India we celebrate the changing of the Sun's orbit *[UNCLEAR* Surnao]. He turns away from tropic of Capricorn to the tropic of Cancer. Is it so? Now? So, now the heat is going to come more in this country.

So to prepare for the heat and to prepare people for that, they give little jaggery and sesame seed or sugar and sesame seed and say that “we give you sweet so you also speak sweetly” because the heat makes people rather bitter. And in that people start, if there's heat inside you, then you start talking very bitterly to each other.

So to pacify that sweet, they give the sugar or the jaggery for your livers, but you can't just give that *[UNCLEAR]*... which is also a [soothing] oil.

Now. It's very symbolic. That's all, it's a symbolic thing. And it is done every 14th of January, it starts. It is called as [Makar Sankra], the change to [Makar], means Capricorn. And [it's] surprising! Like in the ancient times Cancer was called as [Karkar] in India, [Karkar] and the... you also call this thing as Cancer since long. Now, the disease cancer is also called cancer. You see how it is related. And in Indian language also it is called as the disease of the Cancer, in the sense [Karkar], they call it [Karkar Ruga], you see, two words. They also... call it due to the [Karkar Ruga] and that was also called [Karkar Ruga], means heat produced. It produces heat first of all and secondly it has other meaning, that in Cancer, Cancer stands for the Mother.

So when you commit sins against the Mother cancer is produced, sin against the Mother. Cancer's sign is the sign of the Motherhood. And when you try to commit sins, sins against the Mother this starts. And since My Advent, this disease has become very prevalent because sin against the Mother is the biggest sin... in the modern times.

So, one must know that the sin against the Mother will lead equal to cancer.

So it started from Gaṇeśha Tattwa.

Many people who have this problem, [a] Gaṇeśha problem, they may be very good in other things but still, if there is a left Gaṇeśha problem, they should be very, very careful. Karkar is like a hole in your being. And to overcome that problem you may cover up with something else. Like such people may say: “Oh, I am so great, I never feel like that." That's not the point. Just overcome your Gaṇeśha problem with which you are covered it. All these perversions must be sucked in just like the tortoise sucks in the four limbs within themselves. That is how you must suck in those things and do not try to overcome by right Viśhuddhi, by saying that you are great or you are this or you are that.

Some people I've seen also try to show off about it and try to say things which look quite great but ultimately I find that they have a left Mūlādhāra. It's a serious problem. It is very serious.

So be careful! Don't deceive yourself! Anyone of you. Those who have a left Mūlādhāra problem have to be extremely careful, not to be tempted to any supraconscious behaviour or talking. Try to overcome it by a complete surrendering, say “I do not know anything, Mother", first mantra for them. “Mother, I do not know anything." You surrender because it's a Mother. Like Śhrī Gaṇeśha. He never shows off anything. He's just surrendered, completely: “I do not know” like Ādi Shañkarāchārya, “I do not know, Mother." The more you try to sort of express yourself logically or with your

brains, then know that you are deviating from that point because that's the only way you compensate.

So be careful. I'm telling all of you. It's very common in the West, I've seen. Suddenly they become all Sahaja Yogi experts and then they follow the path.

So those who think that they are great Sahaja Yogis must know there is something seriously wrong with them, first of all. All have to grow together, nobody should try to show off. I know who's well. That's very important. And you need not feel jealous of such people or enamoured of such people. Know that you have to be with Reality.

So left Mūlādhāra is a very serious problem. Be careful of it! It can be infectious, it can be just catch over. Sahaja Yoga is only that very delicate point among Western Sahaja Yogis. *[UNCLEAR* Only on/When we have] this point *[UNCLEAR]* left Mūlādhāra.

So be careful! Try to keep your attention clear. Perversions, keep away. Try to keep yourself your Chakras al right. Better thing is to look after your Chakras than to discuss it.

[Hindi.] Who are coughing? Something definitely wrong. All this, why, why are you coughing? You are not paying attention properly. You have to look after yourselves. You are disturbing Me when I'm talking.

This is something wrong. You better look after of yourselves. You have to say “Allah hu Akbar" sixteen times, morning, evening *[UNCLEAR]*. Put yourself to test. Try to avoid eating things which are not good for your throat, make gargle. You see, sometimes people feel proud of it, *[UNCLEAR* as/and] sometimes the way they look at it, I'm surprised. One should be ashamed.

So, please, see that you look after your throats and don't disturb Me. I have done much more travelling that you had to. You know that. I've gone through too much. And apart form that you know that... I sleep very late, compared to you. If your throats are not alright, please, look after it. [There] must be something wrong. What's it? Some bhoots are there? It's just that. How is it it's not coming round? Better do your dhuni and [empty] everything that you want to [do] *[UNCLEAR* it's nothing so]. It's important. How can it be? How are you getting this? All the time, all the time.

So, now, I give you dhunis, this, that, finished. I've suffered much more here, I mean in the sense that I'm God. Lot of sufferings in the way that I am raising their Kuṇḍalinī, everything... You know that. But to say even that there was too much test in all that, you must get used to. It's possible. On the contrary, the more you try to do it, the better you... you feel are doing a contribution to My talk. You are saints! Behave like saints! It's important.

But first... Give them... These who have caught, put something in the mouth. And you should not cough. Give them something to eat. Look after yourselves. I should look after yourselves, big, big boys? You better look after.

Do you find anyone of the Indian Sahaja Yogis coughing? No one! Just look after yourselves. Just tell, moving your hands too much also isn't good, all the time you talk, like this. Don't do all that! Keep your hands straight. Respect! Try to steady your hands! All the time jerkiness, shifting your hands too much also is not good.

Something one must understand, we have to get into Sahaja Yoga, to work it out in a serious way. Work it out! No use carrying on with the nonsenses, no use getting angry with yourself, no use also sort of saying that “I, I, I” “I don't know” “I'm this thing." It's a nonsense. “I am this, I am that, I can feel [it]." All this is nonsense, you see. The supraconscious nonsense going on. Be careful! You should not try to impress others by your nonsense at all.

Then there's another thing I will tell you about. *[UNCLEAR* Trupta], did you say that you have to learn Sanskrit to know Sahaja Yoga? Not at all! This is absolute wrong. Please take it from Me! Again mental activity started, better stop it. All these wrong things, ideas you should not get into your head.

Dumal does not [know a word] of Sanskrit. Not a word of Sanskrit. What is there? It is all borrowed feathers? Even why borrow from Ādi Shañkarāchārya, what is all your depth, your feelings? Why to borrow from others? Develop your own feelings, your depth, your sources instead of borrowing from any…

Why to learn Sanskrit? There's no need. You may know something about Shañkarāchārya, but not about Sahaja Yoga and not at all about Me.

So don't go into all these tricks. Now you stop making any names or anything. Please, stop! Otherwise you'll get into supraconscious, I'm telling you. Just don't do! All these mental activities you all must stop, `cause the main problem is your left side. And tomorrow is the day when you have to decide. Tomorrow is the day when we worship the Sūrya, tomorrow is the day when we worship the Saraswatī.

So that the Saraswatī should give you your exhausted energy that has passed out and now don't exhaust Her more. Use your left side. Surrender to your Mother, be good mothers, be good daughters. Alright? Surrendering is the way. And don't think too much about Sahaja Yoga. Talking chuck, chuck, chuck, about Sahaja Yoga is not the way. All such people arise nowhere. I know that. I know everyone. I know people who just think too much of Sahaja Yoga. I know them very well. They don't know anything about Me! On the feet I know! On the vibrations I know! On their development I know! There's no need at all to know Sanskrit, it's true, but it is the need to know your Mother through your love, through pure understanding. Because it will *[UNCLEAR* take/tell] you because you are used to that kind of [a] thing. You want to know the whole of Sanskrit, the whole of this, the whole of that, you read the whole of Vedas. And so many are like this here in this country that are useless for Me. Good for nothing. Just forget it! Don't go into that trip of knowing through your brains. Know through your heart. And that's the reason is, because it's not available to you. That's the base. Left Mūlādhāra is ha, *[UNCLEAR]*. You look up for another thing. Just not available. That in the sense it is not available.

Try to go to that. Try to awaken that within you.

And then you'll be amazed, you'll know Me better. And yesterday only *[UNCLEAR]* how these complications have created a barrier. They just see Me, just see the faces in the same way. Still you look so sometimes miserable, sometimes look lost, no? Because still you are using your brains. Using your brains is not the way to get to Sahaja

Yoga, please. Better now your throats? You are not coughing? These were all bhoots. What has happened to you?... Don't try to cough.

But if you want to know Sanskrit, you can know. But that's not the end! And that's not the way. Of course, on your way you can know it, but that's not the way. I mean I don't want you to get to things where you are diverted from your own surrendering and ascent. That's more important. What Shañkarāchārya has said ultimately is already translated in English. If you see it, that he has just talked of surrender.

Nothing else. He hasn't talked of anything else to start. That's it.

All these names also that you have given Me are just a part of it, Sahaja Yoga is also a part of it. I mean, why should you care of these things? Try to establish, establish that, because of that you use your brains too much. Establish to your left... Better? Be in Nirvichara! See! Where is your coughing now? Finished. They have run out! In the same way you should control. Tell them off.

Also you speak too much, while in front of Me be meditative. Don't speak. There's no need to speak.

Be in meditative mood. You are with Me, I'm with you. Keep in meditative mood. It will help you.

Very much help. It is here you should keep quiet. Absolutely. And feel it. No discussions, no talkings, not using brains. We have come here to gain something within for your altering. Be responsible about it.

Some people definitely, Mathias, improved a lot. Tremendous. I was amazed. He *[UNCLEAR* changed/approached]. But some are just the same. I asked them: “How are you?" “Still like that." What to do? Try to pacify. Be peaceful. Be peaceful. Be peaceful. Tell yourself: `Be peaceful. Be careful. Be peaceful.' And just imagine, before I started My lecture, nobody was coughing and suddenly, as soon as you sat down, one after there was a competition. Look at the bhoots how they are acting through you! Even if the Rākshasas want, they cannot cough before Me, *[UNCLEAR* no doubt/know that]. Only because you are My children you can have a *[UNCLEAR]* to do such a bad thing. All right? Now don't try to disturb.

It's alright! So, before tomorrow's Pūjā we have to *[UNCLEAR]* for a bath properly, whatever it is. I'm going to have the Pūjā starting at ten o'clock, not early. But you need not go in the out or anything, have your bath and all that and then I'm going to come down to you. *[UNCLEAR]*. Keep yourself aloof with others. Don't get entangled with anybody else. Keep quiet. Don't talk.

Have the maximum now for this Pūjā at least. It is going to be Saraswatī Pūjā for the first time.

Actually I wanted to do Ekādaśha, but to do Ekādaśha is not an easy thing. And I thought, let it be! Not tomorrow. But one day we'll have to do that, also. We'll have to prepare. Don't talk, keep quiet.

Keep quiet. And then sit down here for meditation. All of you come quietly. Actually you don't have to do anything, you don't have to organize, or nothing, you don't have to... Now those Indians who are organizing are in

meditative mood. Surprised? Those who are organizing, who are running about, managing this, managing that... It's not easy thing, you know, to manage for so many people's food, morning, evening, every time. They are in meditative mood.

So keep yourself in meditative mood. Try! Tell yourself: `Be peaceful. Be peaceful. My mind be peaceful!' Be still. Be still. Tell your mind to be still. Alright? And you'll be amazed, it's all within yourself. Try to merge your stillness within you. If you don't allow it, you'll get supraconscious which is very dangerous.

Better now. Let's keep to your source of peace. Sit down, sit down for one minute. That's the trouble.

Let her sit down, Linda! Can't you make her sit for a while? Sit down straight. Make your children understand... They will never sit! *[UNCLEAR]*. Sit still, within yourself. Sit down still within yourself.

Just sit still. It's all inside you. You don't have to go anywhere, create anything, it's all within. Nothing is to be created. It's all within you. Better. Sit still! “Be still, my mind!" This stillness business establish, what I want you to establish within you. That's an escape. All perversions are escapes.

I'm quite happy with your progress, I must say. This time, it was a very good collective date. It was good. Everybody is coming up very well. Everybody, I must say, has progressed well; everyone of you has improved a lot. But try to know where is the problem. Everybody has individual problems. At a point you stop it. Just stop it. You can. It's all bhoots, you know, perversions come through bhoots. I mean, there is nothing to be explained

any more. Anything, any diversion, any... I should say, bending away from Sahaja Yoga or from the center. Be in the center! And don't pay attention to this, pay attention to yourself. Everyone of you is great. Nobody is greater or less greater.

So just don't worry about anybody.

Don't talk too much about Sahaja Yoga. In India you be peaceful. There's a lot of time for you to discuss it in your own countries. Just here be quiet. Take it. Take it.

There is a bird in India, it's called as *[UNCLEAR* tzaqua] and *[UNCLEAR* tzakwili]. And they are the ones who just live on the rays of the moon. And they go on sucking the rays *[UNCLEAR* slowly].

They don't need anything. That's all... Still [your mind]! Still your mind! Whatever mantra we say, if it is mechanical it will have no effect. We say: “Ya Devī sarva bhooteshu shanti rupena samsthita." Still it. But you must do it with complete understanding, full deliberation. We have come here to gain something tremendous depth. And some of you are at the end of your trip.

Better? What a central Heart! [The] futuristic still thinking about *[UNCLEAR* Me is going on/...].

Don't be futuristic at this moment. Be there! I know what your mind is working on. Don't be... Just don't think I am sitting before you. That's all. Don't think of time or anything. Just be still. Just be still... Still thinking! Keep your eyes open. Don't think. You watch Me. As you are the foundations still your minds! Cement is working *[UNCLEAR* down/it out], but still it should [be].

Just by stilling you get over all your diseases. Just by stilling your mind. *[UNCLEAR* I've seen/see] that. Better? *[UNCLEAR* listen/just see in] your head. Better. *[UNCLEAR]*.

Also, I think, another way to put your Mūlādhāra alright is to see how long you can remain without blinking. Better... Now just ask: “Mother take us deep into your stillness." Just ask. Don't close your eyes. Trice! You need not say loudly, just say it in your heart.

At Sahasrāra. Still at Sahasrāra. Can you imagine? This talking leads you to nowhere else but to your Sahasrāra. It's knocking. *[UNCLEAR* there is heat at/just feel] your Sahasrāra. How clear it is? Can you feel it? It's like a stone! Just see yours. I mean it is your own Sahasrāra. Don't worry about others, worry just about your own Sahasrāra. See? It's like a stone. Can you follow? So, surrender. Just in your heart, surrender. Surrender. Put Me down and your Sahasrāra will open [out]. The great journey. Forget about everything else. Just do that. Better. Sahasrāra better now?...

You are My children, you are My sons and daughters. Alright? Better now see on your Sahasrāra.

`Mother, You are God.' Like Gaṇeśha! [Looking up.] `Make us like Śhrī Gaṇeśha.' *[UNCLEAR* Opening up/Looking up]...

Something's happening?... One see that.

Come up. Let it come up.

Also some of you unnecessarily worry about Me. Better worry about yourself, because that's another escape.

So it's like Himālayas, one has to [be]. Raise your Kuṇḍalinī, slowly, slowly, slowly... Higher, push it higher,

very much higher. Do it properly! With full attention. Not in a small way. Push it back! *[UNCLEAR]*... Up there. Again. With all undisturbed attention. Here, knot three times. One, two,...

It should be done fully and properly. Not half way I've seen the way people give bandhan, the way people raise their Kuṇḍalinī. It's not the way. Do it properly. You are saints; you *[UNCLEAR* are/show others] archbishops of saints. You are the foundations of all the saints that have to come.

... prophets. Have we all the powers of these prophets? Ask this question. Then you'll develop that.

`Are we really realised Souls, Mother?' `Are we the epitome of human civilization?' `Are we the epitome of God's creation?' Alright? Good! Much better now. Also don't turn your heads too much or turn your eyes too much. Keep them still. Try to keep them still...

Now I would suggest that all of you should ask each other to give a proper Ār.ti to your Mahāgaṇeśha.

Alright? So your Gaṇeśha will be awakened. All of you should give an Ār.ti, every one of you should ask somebody else to do it. And you'll be amazed how nice you'll feel. [And] that will relief. Relief [to the] Mahāgaṇeśha. That's the quality you have to achieve. It's not easy, you must know. *[UNCLEAR* Whenever/Wherever] I touch the point I find a big huge mountain in the head. Gradually you must face it. Take it out. Clear it out. Slowly and steadily. Better now? Much better. This mountain has to be cleared out. Clear it out! I think you better give bandhan to yourselves. I'm giving a bandhan to Myself so that everybody gets a bandhan. Alright?

Done? Better? You must learn all these mechanisms. Alright? How many times you give bandhan to yourself in a daytime? At least five times, like five namas. [It's good]. Seven times is the best way. See how much you are clearing up to yourself? We have to *[UNCLEAR* do/be] ourselves a bandhan *[UNCLEAR* as well as/instead] we can give it to other. Let's use it for ourselves sometimes, our powers. See how it's clearing out? Can you see that? All your sickness, all your illness. Better? Everyone, everyone. Just give bandhan. Phil, give bandhan to yourself. Now left Nābhī. How you are clearing out, just see that! You like to do it because you feel [it's] so clear. All this back side is opening. Alright? No try? First time? Hundred and eight times it's the best way, sometimes. Now, see? Leave it, see if you are feeling better, aren't you? I thought you have already tried this. Never? It's like telling you how to eat. That's the basic of Sahaja Yoga. Better? You are enjoying it. Look at that. You all *[UNCLEAR* thanked] we should never take out all our own problems like this? Heat from the left? Good. You may do it whenever you feel like. It's so enjoyable to go on to doing it. You like it.

It's so relieving, you know. Instead of clearing others, better clear yourself. All others are sucking it automatically. Just try. Go on doing it. Left Swādhiṣhṭhāna. In the *[UNCLEAR]*.

Somebody has left Swādhiṣhṭhāna? Linda, aren't you doing it? Do it properly, with proper care. The whole head is improving. Can you believe it? That you never knew. This is protection from yourself to yourself. Good.

Still your Swādhiṣhṭhāna. Give it a bandhan to left Swādhiṣhṭhāna. Right Viśhuddhi. Right Viśhuddhi.

Right Viśhuddhi. Left Swādhiṣhṭhāna, right Viśhuddhi. *[UNCLEAR]*. Most dangerous combination.

Right Viśhuddhi's burning. Burning right Viśhuddhi. Better. Alright? Now, leave it to Me... Everybody is enjoying now. Do it at every finger. It's good. Much better. Rub this finger. Right Viśhuddhi. Talk too much. Right Viśhuddhi. English don't talk much, I think. Good quality, good quality. As long as they don't suddenly blame themselves. It's a good quality. Try to listen. Aāa, better? Now the right side has started flowing. Little tricks here and there. Good...

Gregoire: Mother, we'd like to drive Your chariot and we are all your horses.

Shri Mataji: You see, to drive My chariot I must have at least horses which do not cough. Otherwise I'll be getting all the [junks]. Already I have had enough of it. You have to be [smart]. Very good. Much better....

Ekādaśha also, *[UNCLEAR* leave it/few minutes] rub it out. Ekādaśha. Rub it hard. It's good.

Better? Much better.

So preparations for *[UNCLEAR* tomorrow's morning]. Always rub your hands *[UNCLEAR]*... Conditioning goes out, rub[bing] your left [hand]. Now, now Devī prasanna bhave *[UNCLEAR]*. Alright? Alright? So this is you have done your own Pūjā. Tomorrow, your Mother's Pūjā.

May God bless you all.

Contents: 1983-01-14 **Śhrī Saraswatī Pūjā, Dhule, Maharashtra, India**

With love all kinds of creative action takes place. You see how Raulbai has love for Me and in this place you all also got new idea of creating a beautiful thing. And as love will increase your creativity will develop.

So the basis of all creativity of Saraswatī is love. If there is no love there is no creativity. It is even in the deeper sense, you see; people who have created all the scientific things are also out of love to the masses, not for themselves. Nobody has produced anything for themselves. If they make something for themselves it has to become for universal use, otherwise it has no meaning. Even if you say atom[ic] bomb and all these things are created from science, they are also very protective. If they had not created, those people would not have taken out their minds from war. Now, nobody can think of having a big war. Of course, they are having cold wars, but that also will gradually stop, when they will be fed up.

So, all the activity on right hand side, of Saraswatī, basically has to end up in love. Starts with love and ends up in love. Whichever does not end up in love, coils up and finishes off. It just disappears.

So you can see that even matter which is not used for love just finishes off. The basis has to be love. Otherwise all such matter that we create which has angularity, which is not fitting into the mass media which is not appealing to the masses; of course, it takes time, you have seen that it takes time, but it does have that tendency always to disappear in the thin air as soon as you find it does not appeal to the masses.

Now this love of, that we talk of, the great love of God we talk of, we know that it for definite through vibrations. People do not have vibrations, but still they can feel the vibrations in a very unconscious way. All the great paintings of the world have vibrations. All the great creative works of the world have vibrations. Only those who have vibrations have been sustained by time, otherwise all other things are destroyed. There must have been monuments and horrible statues and horrible things that have been created long time back. But they are all destroyed by Nature as they could not stand the impact of the Kala, that is the destructive power of time.

So, all that is sustaining, all that is nurturing, all that is enabling comes from this sense of love, which is within us very much developed, but within others also, who are not yet realised. Ultimately the whole world has to realise that one has to go to that ultimate love of God, otherwise it has no meaning.

Now you have seen in arts people have taken to other methods of appealing to people by using cheap things and very vulgar things, just to make people think that this is art. But this will all disappear. It cannot sustain the impact of the time as I told you, it cannot. Because the time will kill it. All these things have to disappear and already you can see the result, how things are changing everywhere, even in the West.

So there is no need to be so much disappointed with the West and to say that the Western world is a waste-land. It is going to be alright and it has to be done. Specially it has done lot of Pūjā of Saraswatī, I should say in the West. Much more than they have done in India because

they have gone to learn it and they have tried to find out so many things. But only thing they forgot that it is a Goddess, God is the Giver. Everything comes from the Goddess. That is what they forgot. And that is why all the problems have been created. If there is no Spirit in your learning if there is no source of the Goddess in your learning, then it is absolutely useless. If they had realised that there is the Spirit that is working it out, they would not have gone that far. And that is what I was warning the Indians, although, that you are now taking to industrial revolution in a way and to avoid all the complications of industrial revolution, you must try to know the Spirit. If you don't know the Spirit you will have the same problems as these people have. Because they are also human beings, you are also human beings. You will also go the same way. At random you will run and there will be problems, the same problems as the Western people have.

Now Saraswatī's blessings are so many that one cannot describe in such a short time. And the Sūrya [Sun] has given us so many powers that it is impossible to tell them even in one lecture, even in ten lectures.

But how we go against Sūrya and how we go against Saraswatī, while doing the worship of Saraswatī, it is to be seen very clearly within ourselves. For example the Western people are very fond of Sūrya because they have no Sūrya. But they go too far with it, as you know and create complications within themselves of Sūrya. But the main thing that one has to achieve through Sūrya is the Light, `Vivek' *[UNCLEAR]*, 628, is the light within. And if Sūrya Chakra at the Āgñyā level is occupied by Lord

Jesus Christ then it is even more essential that the purity of life, what you call `Niti', is the morality of life.

Now morality itself has become very much sort of an argument in the West. People don't have any sense of absolute morality. On vibrations of course you know. But they have all gone against it. Those who are worshippers of Lord Jesus, those who are the worshippers of the Sūrya, of the Saraswatī have all gone against, against the powers of Sūrya, just disobeying it. Because you cannot be a Sūrya if you don't have a proper sense of morality and holiness. The Sūrya itself brings light to see everything clearly.

So many qualities Sūrya has got. It dries up everything that is wet, dirty, filthy. It dries up all those places which create parasites. But so many parasites are created in the West. Not only parasites, but there are horrible cults and horrible things which have come into that; those countries which are supposed to be full of light and in that darkness they exist. Darkness about the Spirit, darkness about their own knowledge and darkness about love. These three things have taken over in the places where you are supposed to love light. Light does not mean, light does not mean what you see with your gross eyes. Light means from within, the Light of Love. That one should understand Light of Love. And it is so soothing, it is so sweet, it is so beautiful. It is so enamouring, it is so abounding that unless and until you can feel that light within you, that light which is of pure love of purity, pure relationship, pure understanding. If you can develop that kind of a light within yourself, then the whole thing will be cleansed. “Wash me and I shall be

whiter than snow." This is what happens to you when you are completely cleansed.

The purest form of Nature is within us. The purest form of Nature is within us. Our Chakras are made out of that `purest' form of Nature. We are the only people who are spoiling it by our mental thinking.

Against the same Saraswatī power. You are going against Saraswatī itself.

Saraswatī cleanses all that is impure in nature, while with our brain activity we are spoiling all that. All our brain activity goes against pure intelligence. And that is what one has to understand, that this pure intelligence, is not to be spoiled by our thinking. Our thinking can make us so bumptious, so ego-oriented, so impure that we can really eat the poison and say “what is wrong in it?" Just the opposite of Saraswatī.

If Saraswatī is within us, She gives us `Subuddhi', wisdom. And that is why to worship Saraswatī, to worship Sūrya, we must have that clear vision as to what we have to be. What we are doing. What filth we are living in. What our mind is getting into. After all we are here for emancipation and not for just for pampering our ego and living with our filth that is with us.

So this light has come within us and we should try to rise above our own mental filth, which is being created around us.

Apart from that, you have to go higher and understand that there is, within us, a thing called ego.

And this ego is false, absolutely false. You do not do anything. Actually when you turn your eyes here and

there, when your attention is here and there it is nothing but your ego that is trying to overpower you. But actually ego is an absolute falsehood because there is only one ego and that is the God Almighty, Mahat'ahaṁkāra.

There is no really any ego that exists. It is myth. It is a very big myth, because if you start thinking you are doing everything, you are doing this, you are doing that, which you are not doing; then this nonsensical ego comes in and you start working it out, it can project in every direction. When it projects forward, it overpowers others, it tries to dominate others, tries to kill others, becomes Hitler. When it moves to right side, it becomes supraconscious. It starts seeing things which are absurd, which are foolish, which are stupid. When it moves to left side then it starts talking, I mean, seeing things, yourself as a big man, as a big Christ or as a big Devī or something like Ādi Gurus and “I am a very great personality", that is left-sided. When it moves backwards, that is the dangerous one. Then people become Gurus which are ruining other people. When their ego moves backwards then they become Gurus, they themselves have lots of defects in themselves and they try to pull people into those horrible stuff which is described as absolute Naraka. Naraka is the movement of ego on all the sides.

Now when people try to use their right Viśhuddhi that is, to talk about themselves, is the worst of all.

Whatever type of ego you may have, if you start boasting about it and talking about it, then it encircles, thickens the walls of ego so much, that it is impossible to penetrate into that. Because such a person is completely

satisfied with himself and he believes that he is so. And once he starts believing into a nonsense like that, it's an impossibility then, impossibility to penetrate.

So when you boast about these things or you talk big, be careful, you see. You know what I am, but how many times do I say `I am that'? Even if I say once, you get tremendous vibrations for you. But how many times do I say so? At the most if you say something, I say “yes." But I don't say that. If I say it loudly, I don't know what may happen.

The whole thing, might be blasted! So, one has to understand that Mahat'ahaṁkāra is the one that acts, that works, that creates.

Sometimes I shout at you. Immediately all the bhoots run away. Just once I shout. Yesterday, you saw all the bhoots that were talking, they all ran away. Yesterday this I talked to you.

So you should understand that now you are a realised Soul, you can also do the same. Use your right Viśhuddhi to shout at yourself, `Now will you please stop boasting, will you stop talking all this nonsense, will you stop showing off!' Then it will stop.

Now this thickening takes place by people who really are active. They want to do something about it, not that they are not active. They want to do. But they know only one way, is to act talkative. They don't understand that there are inner ways by which you control it much more. Because they don't want to take to that, they take to this talking. And once they take to talking and they talk about it, the whole power goes out. But if they do not talk about it and keep it within themselves, it is alright. You can tell

Me about your experiences, alright, but if you start telling others and talking about it too much, then the power that you have got will be all disappearing gradually. And you will just come down to absolutely lowest level.

So one should not too much talk that I have this power, I have this power or I think this or I do this, which is a very wrong thing. I warn you, do not try to show off.

Yes, you can talk about My powers. It is all right. But don't try to talk about your powers. When it comes, of course, you talk to somebody who is a negative person or to tell somebody, then you should say that we, not I. `We' have, `some of us' have felt this power within us. `We' have seen people. It may be you only, but you need not say, `I' have. What you've to say is `We'. Then you become the Mahat'ahaṁkāra.

When you say `We', `here some of us', `we do'. Like in Gregoire's book I made it, I saw to it that he should not have many `I's', but he should have `We'. `We think,' `We do,' `We' means the whole collective being, the whole collective organism, living organism of Sahaja Yogis.

So if you say, `Yes, some of us have got,' that means, you put yourself down, but put all others above you. Say: `Yes, some of us have. I know some people have this.' That is the way one should do it. Because if you have to overpower your ego, you must allow it to spread into everybody else. That is how you will make it perfectly alright. Let it spread.

We all Sahaja Yogis, `We all.' But that pride is not there. I've seen that pride is not there. Still it is very individualistic. If you start thinking, `We Sahaja Yogis,'

then what happens, that you become `one' personality, `one' organization.

But the person will look down upon other people. He will see that person is low, that person is higher, that person is there. But he will not think `we' the Sahaja Yogis, how beautiful we are. `We' the body of Sahaja Yoga, how beautiful we are.

So always think in the words of `we', so your ego will become much less, much less, much less. And the same ego which looks so funny and absurd will fall tomorrow to the Ekādaśha. Today, individual ego will merge into Ekādaśha. But we all must remember to say `We' all time.

This is what is today's day is great day for us to change, because the sun has changed its move, now.

Sun is coming this side.

So let us welcome the Sun, coming to the north now, this way. And for Australians to say that though the sun has gone, let us establish the Sun, the domain of Sun, within ourselves. Because Sun never disappears from our inside.

So that is how we have to take a mode by which we should think of `one' personality, `all of us together, all of us together.' And anybody who tries to be something separate or different, he will drop out. I will drop him out. Whatever it may be, it will drop out.

So you judge yourself, anybody who tries to be singled out or anything.

Everybody must do whatever they like, to nurture the whole, to help the whole, to help the whole, to

emancipate the whole. But not to, in anyway, put anyone down always. Because this is not the way the Sahaja Yoga is. Sahaja Yoga only works in collectivity. And the one who has developed this permeating spirit, is a real Sahaja Yogi. Who has not, is not! Whatever you may think of yourself, I have nothing to say. But this permeating personality which moves from places to places, whether you talk or not. Like your Mother is. Whether I meet you or not, makes no difference, but I am permeating through all of you, by little, little things also I am there with you.

So like that, try to permeate into each other and see the beauty in you. Enjoy yourself the best because that is the biggest thing. That's the biggest thing that is to be achieved. Because this ego you know makes you like a nutshell and it just cannot have a rapport with that beauty of permeation and just see how the notes move into each other.

It will be a great idea today, it is great thing today that we are having Pūjā at Dhulia. Like the Dhulia means the dust. Dust. And one day I had written in childhood, a poem, I remember. Very interesting poem it was, I don't know where it is now, but which said that: “I want to be smaller like a dust particle which moves with the wind. It goes everywhere. Can go, sit on the head of a king, or can go and fall at the feet of someone. And it can go and sit on a little flower and it can go and sit everywhere. But I want to be a particle of dust. That is fragrant, that is nourishing, that is enlightening." Like that, I had written a very beautiful poem, I was about seven years of age, I

remember, `To be a dust particle', I remember that very clearly, long time back, “That I should be a dust particle.

So that I will permeate into people." Which is a very big thing, to become a dust particle of that kind. To just whatever you touch, you see, that becomes enliv[en]ing, whatever you just feel, that is fragrance. It is such a great thing to be like that. And that was My desire and it will be achieved. At that young age, I had this idea of becoming a dust particle and today just while talking to you, I remembered that I wanted to be that and that is what this place is.
